For the books which are circulated under the name of Hermes contain Hermaic opinions, though they frequently employ the language of the philosophers: for they were translated from the Egyptian tongue by men who were not unskilled in philosophy. [. . .] The Egyptians do not say that all things are physical. For they separate the life of the soul and the intellectual life from nature, not only in the universe but also in us. [. . .] They likewise arrange the Demiurgus as the primary father of things in generation; and they acknowledge the existence of a vital power, prior to the heavens, and subsisting in the heavens. (Ibid. VIII.4, 132–33)²⁷

A particularly interesting aspect of the above section is that Iamblichus refers not only to the theoretical hermetica here, but also mentions the technical aspects, including astrology, the interpretation of the zodiac, the decans, and naming the leading planets.

Iamblichus' approach suggests that later neoplatonists in fact did not see the *Hermetica* and their own philosophy as isolated from each other, as many modern intellectual historians have suggested. In the fifteenth century, in setting himself to revive the pagan achievements of neoplatonism, Ficino certainly thought likewise. He, for example, found it very appropriate to unite the two traditions, namely the philosophy of emanations and the spirit-lore of the Platonici on the one hand and the mythology of *exaltatio* drawn from the *Corpus hermeticum* on the other. It was not coincidental that he decided to expand his *Hermetica* translation into an anthology of neoplatonic mysticism, the contents of which were preserved in Ficino's *Opera* as follows: "Dionysii Areopagitae translatio cum suis argumentis" (Ficino 1576, 2:1–1128); "In divinum Platonem epitomae" (1129–1533); "In Plotinum Philosophum ex Platonici familia nati" (1534–1800); "Expositio Prisciavi & Marsilii Theophrastum defenso, ac phantasia, & intellectus" (1801–1835); "Mercurii Trismegisti Pymander, de potestate

ac sapientia Dei item Asclepius de voluntate dei" (1836–1870); "Iamblichus de mysteriis Aegyptiorum, Chaldeorum, atque Assiriorum" (1873–1907); "Proclus de anima & daemonum [commentariis in Alcibiadem Platonis primum]" (1908–1928); "Proclus de sacrificio & magia" (1928–1929); "Porphyrius de occasionibus sive causis ad intelligibilia nos ducensibus" (1929–1932); "Porphyrius de abstinencia animalium [de animi ascenta & descenta]" (1932–1938); "Psellus de daemonibus" (1939–1944); "Pithagore aurea verba & symbola" (1978–1979).

Here one finds those late neoplatonists (Iamblichus, Proclus, Porphyrius, Psellus) whom Brian Copenhaver identified as being Ficino's main inspirations, together with the tracts of the *Corpus hermeticum*, or, as Ficino translated it, "Mercurii Trismegisti Pymander, de potestate ac sapientia Dei item Asclepius de voluntate dei."²⁸ And if we decide to look for John Dee's possible sources of hermeticism, we find that he had the entirety of this literature at his disposal, not only a copy of Ficino's *Opera* (R&W 204), but also a beautiful 1516 Aldus edition of Ficino's "anthologia esoterica" (R&W 256)²⁹ that is now kept in the Folger Library and preserves Dee's marginalia on Iamblichus and the other Platonici as well as on the hermetic treatises (cf. Clulee 1988, 277n. 75; Håkansson 2001, 213; Harkness 1999, 228).

MEDIEVAL MAGIC

Medieval magic has not been excluded from the recent radical reinterpretation and revaluation of magical and occult lore. As with intriguing questions related to the *Hermetica* or Renaissance magic, the research of the Middle Ages has also led to the discovery of new texts as well as to the development of new theories on the meaning and the use of those texts. If we want to classify the medieval traditions of magic as possible input for Dee, again we shall have to look into his library catalogues because this is where we have a good chance of encountering missing links between his collection and the presumable sources of his magic.

One category is well represented and clearly visible in his collection: medieval texts that engaged in the definition and classification of magic, often either condemning it entirely or refuting just some of its branches.³⁰

The second category would be those scholarly works oriented towards scientific questions whose authors restricted themselves to *magia naturalis*, optics, and alchemy. The best example in this category would be Roger Bacon, who, as Nicholas Clulee has shown (1971, 1973, 1988),

was one of Dee's favorite authors, especially in his early career. Bacon's works were widely represented in Dee's library,³¹ but belonging to this category one could also mention Al-Kindi's *De radiis* (R&W M149b, DM 42); Arnaldo de Villa Nova (*Opera*, R&W 299); Ramon Lull (*Opera*, R&W 1421; *Arbor scientiae*, R&W 1415; *Ars magna*, R&W 1418); and Johannes de Rupescissa's *De quintae essentiae* (R&W 1436).

A third group of sources would be medieval mystics, reflecting on the hierarchical world model, angelology, spiritual illumination, and related subjects. The following great authorities should be mentioned here: first and foremost Pseudo-Dionysius, whose complete works Dee possessed in an 1556 edition that survives with his heavy annotations (R&W 975, cf. Harkness 1999, 113 ff.). A work of similar scope was *De omnibus rebus naturalibus* by Pompilius Azalus, a 1544 Venice edition of which belonged to Dee (R&W 134) and also survives with his emphases and annotations. These notes indicate that the Doctor purchased this copy as early as 1550, probably during his visit to Paris and—then, or later on—he heavily glossed the chapters on angels (Roberts & Watson) 1990, 83; and Harkness 1999). Among medieval mystics a writer of great importance for Reformation millenarism and chiliasm was Joachim of Fiore. His apocalyptic visions can be compared in many ways with that of Dee's angelic conversations and in fact Dee had a considerable collection of Joachim's works, including his *Opera* (R&W 436, 706, 2028).³²

Finally, the most obscure and problematic group of possible source texts are those proliferated from the thirteenth century and dealt with divination and various forms of ceremonial magic. In this category we face a strictly unpublishable manuscript lore that until recently has been neglected as trash and bogus literature. However, lately, largely inspired by the pioneering studies of Richard Kieckhefer, it has increasingly come to the forefront of attention.³³ And there are good reasons to believe that John Dee's angelic magic had much to do with this murky and mysterious tradition. It was Stephen Clucas (1998, 200?) who recently has most emphatically pointed out this possibility, analyzing carefully a great number of medieval manuscripts of ritual magic and comparing them with Dee's own ritual magic as developed in his *Spiritual Diaries*. It was also Clucas who has noticed in Dee's library catalogue that the Doctor in fact possessed such manuals of medieval ceremonial magic.³⁴

Having set up a general typology of medieval magic, I would like to state that in *magia naturalis* there was little or no trace of the mysticism and theological orientation of magical *exaltatio* that characterized the Hellenistic neoplatonic philosophers or the hermetic writings. All this

does not mean that the hermetic tradition was totally absent in the Middle Ages. Although we find few hints concerning it in the official discourse of theological schools and universities, ancient magical lore did find shelters in which to survive. To discover those we have to look at the evidence concerning medieval ceremonial magic.

Medieval Ceremonial Magic

If the concepts of this magic were mainly platonic, the actual practices had a much more dubious origin. We gather more and more evidence about the existence of a complex magical lore during the Middle Ages which in certain respects reached back to the Hellenistic period or even earlier, without having much in common—admittedly—with the conceptual ideas of Hermes Trismegistus or the Platonici. Arthur Waite called this lore “ceremonial magic” (1961 [1911]) and recently it has been Richard Kieckhefer who has done the most to examine this textual heritage (1989).

As in my earlier discussion of the relationship between the philosophical and the technical *hermetica*, I have to restate my suspicion concerning the possibility of maintaining a clearly visible borderline between the high (the more or less accepted *magia naturalis*) and “underground” (perhaps a better expression than the rather problematically used adjective “popular”) magic of the Middle Ages.³⁵

An interesting feature of this corpus is that among the medieval documents of ceremonial magic a great many treatises survived under the name of Hermes—some of them are alchemical, while others deal directly with conjurations and divination by means of manipulations using angelic names. It seems reasonable to associate at least some of these texts with the technical hermetica recently studied by Fowden (1986) and Grese (1988). The technical hermetica certainly offered a great deal of practical information from alchemical operations to various ritualistic spells, conjurations, enumerations of demons, and the like. Although most of them (such as the Egyptian-Greek papyri and the Coptic library) were unknown to the Renaissance magi, it is also true that—as I have just mentioned—many similar texts did circulate in the Middle Ages as a rather secret and illegal body of literature associated with the name of Hermes.

Already Waite has noticed that these two groups of texts could have had some connection with each other: “Between the most ancient processes, such as those of Chaldean Magic, and the rites of the Middle Ages,

there are marked correspondences and there is something of common doctrine. The doctrine of compulsion, or the power upon superior spirits by the use of certain words, is a case in point" (Waite 1961, 9). Then he adds: "The Ceremonial Magic of certain Graeco-Egyptian papyri offers the closest analogies with the processes of the Kabalistic school" (ibid.).

Lynn Thorndike, in his *History of Magic*, described the scope of the popularity of this literature and summarized their main contents. He identified a large number of thirteenth- to seventeenth-century manuscripts that contained alchemical and magical treatises associated with Hermes (among them, *The Book of Hermes on the Six Principles of Nature, and Book of Propositions . . . said to be by the Philosopher Termegistus*; cf. Thorndike 1923–1958, 2:214–29). It is interesting to notice that these writings enjoyed a partly positive reception. For example, Robert of Chester's Latin translation (from the year 1144) of an Arabic alchemical treatise under the name of Hermes described the supposed author as one of the three "Hermeses," namely Enoch, Noah, and himself, the Triplex, who was at once king, philosopher, and prophet (Thorndike, 215). Another fifteenth-century manuscript, containing a treatise on the fifth essence ascribed again to Hermes, characterized the author as "the prophet and king of Egypt, [who] after the flood of Noah, father of philosophers, had [the text] by revelation of an angel of God to him sent" (219). This is reminiscent of the Enochian legends, suggesting that some privileged men after the Fall or the Flood were entrusted by God to possess divine wisdom and teach mankind the skills and technologies of survival. As we shall see later, this motive constituted a central theme in John Dee's angel magic.

Thorndike also mentions specific treatises of theurgy and necromancy under the name of Hermes, which treated magic images, incantations, and spells using the names of God. These were strictly condemned by the scholastic philosophers and scientists: Albertus Magnus included them in his list of evil books on necromantic images often of which Christians were to beware, and Guillaume d'Auvergne, bishop of Paris, although he mentioned Hermes and Asclepius approvingly, generally considered this necromantic-hermetic literature to be dangerous.³⁶

The above scholastic authors condemned even more strongly another group of similar literature that survived under the name of Solomon, legendary king and savant of the Jews. Treatises with such titles as *De figura Almandel*, *Clavicula Solomonis*, and *Ars Notoria Solomonis* circulated in great numbers from the thirteenth century until the seventeenth century and contained invocations of angels for the purpose of seeking communion with God, as well as mystic figures and magical prayers

(Thorndike 1923–1958, 2:279–90; Clucas 200?; Fanger 1998). They often stated that the Creator revealed this art through an angel to Solomon, and it was useful for acquiring all the liberal and mechanical arts in a short time. In fact, the Solomonic art is more than that. In the *Liber sacer*, or *Liber juratus of Honorius*, which consists of ninety-three chapters and is supposed to be derived from a conference of magicians who decided to condense all their knowledge into one single volume, one learns about a variety of topics, among others how to compose of the great name of God of in seventy-two letters, how to redeem the soul from purgatory, how to get your wish from any angel, how to learn the hour of one's death, how to control spirits by words or seals, and many more mundane goals, such as how to open closed doors, catch thieves, and find lost treasure. Interestingly, two chapters, 91 on the apparition of dead bodies and 92 on the creation of animals from earth, were omitted, as contrary to the will of God.

In spite of this tactful caution of its authors, Albertus Magnus automatically included them in the list of evil books, and Guillaume d'Auvergne called them "cursed and execrable" books (cf. his *De legibus*, quoted by Thorndike, 1923–1958, 2:281). Roger Bacon classified the Solomonic literature as something that "ought to be prohibited by law" (Thorndike, 279), and in his famous epistle "concerning the marvelous power of art and of nature" wrote as follows:

It ought to be denied, which is claimed by some, that Solomon and other wise men composed these books—for books of this sort are not received by the authority of the Church but only by seducers who accept the naked letter and themselves compose new books and multiply inventions and inscribe renowned titles on their works. . . . (Bacon 1923, 19)

One cannot fail to notice that this illicit literature in many respects points back to the technical hermetica (Fanger 1998a); however, they also reveal a more immediate source, namely the early cabalistic literature with its concentration on characters and magic names (Kieckhefer 1998). Gershom Scholem provided us with a full account of the development of this early medieval Jewish mystical literature (Scholem 1974 [1946]) and he also gave illuminating hints concerning the continuous popularity of this kind of magic, in spite of and against the development of rationalistic philosophy. Mystics and philosophers, as he suggested, were "both aristocrats of thought; yet Kabbalism succeeded in establishing a connection between its own world and certain elemental impulses operative in

every human mind. It did not turn its back upon the primitive side of life, that all-important region where mortals are afraid of life and in fear of death, and derive scant wisdom from rational philosophy. Philosophy ignored these fears, out of whose substance man wove myths, and in turning its back upon the primitive side of man's existence, it paid a high price in losing touch with him altogether" (Scholem 1974, 35). One could add to this concept two points: to begin with, Scholem's dichotomy between rational philosophy and the cabala could be applied to other forms of mystical wisdom, such as Pythagoreanism, gnosticism, and hermeticism. Second, beside the fears and anxieties of "the primitive side of life," which were better answered by mysticism than philosophy, one should also take into account the desire for deification, the drive for *exaltatio* that has never ceased to be a major ambition of humankind. And this ambition characterized certainly not only the popular register of culture but caught the highest minds, too.

Returning now to the mixed textual lore of medieval ceremonial magic, by observing that these works were in constant use in the form of manuscript literature as late as the sixteenth and seventeenth centuries, one can see a continuity between the medieval and the Renaissance traditions of divinatory magic. One can also easily accept the possibility that the great Renaissance magi, a Trithemius, an Agrippa, or a John Dee, did not model their magical practices only on the venerable philosophical sources of the neoplatonists, or that of the "real" Hermes Trismegistus; they also must have tried out the illicit methods at their disposal, extracting them either from medieval or from contemporary underground sources.

As opposed to the medieval teachers, what encouraged them to do so? On the one hand, undoubtedly their increased self-confidence, catalyzed by the rediscovered hermetic tradition. On the other, the complexity of the traditions. In spite of the condemnations of the medieval authorities, tracts of ceremonial magic all claimed to be pious and to aspire to magical exaltation. The Solomonian *Liber juratus*, for example, described itself as follows:

This is the book by which one can see God in this life. This is the book, by which anyone can be saved and led beyond a doubt to life eternal. [. . .] This is the book which no religion possesses except the Christian, or if it does, with no advantage.³⁷

With their enlarged self-confidence, the Renaissance magi could see and acknowledge Christian piety in places where their medieval predeces-

sors expressed abhorrence and disgust. In this attitude the Renaissance magi were, of course, also encouraged by their extensive classical learning, whether Christian or pagan. They could take courage from the Christian concept of the angelic hierarchies elaborated by the Pseudo-Dionysius, who also spoke much about the possibility of religious *exaltatio* and a union with God during earthly existence. He wrote about the souls that

by means of angels as good leaders, they can be uplifted to the generous Source of all good things and, each according to his measure, they are able to have a share in the illuminations streaming out from that Source. (*The Divine Names* 696c, in Pseudo-Dionysius 1987, 73).

The Renaissance magi could easily find similar passages in the works of the neoplatonists, in the hermetic treatises, or, even, in such murky medieval tracts as the infamous *Picatrix*. If we take a look at that text, we shall have made an almost full circle, to arrive at the connecting link between Hellenistic and Arabic hermeticism and medieval ceremonial magic, which all seem to have inspired Renaissance neoplatonic magic.³⁸ This text is the only one, however, among my examples in this book that does not feature in Dee's library catalogue nor does he mention the title of the *Picatrix* in any of his writings. Nevertheless, I find it useful and necessary to include it among the input sources of Dee for the following reasons: as I shall show in the next chapter, the *Picatrix* definitely influenced many of the great Renaissance magi who were Dee's most important sources: Ficino, Trithemius, and Agrippa. Dee himself was interested in Arabic magical literature, as many of his references show (see, for example, his treatment of *alnirangiat* in the *Mathematical Preface*; cf. Clulee 1988, 167), not to mention his highly treasured *Book of Soyga*, the "Arabik Book" that Harkness recently identified as an English-Latin compendium of astrology and ceremonial magic (1999, 44–45). Even if Dee did not read the *Picatrix* itself, he must have been familiar with it through his other readings and its concept of exaltation may have been amalgamated with his own ideology of deification by means of magical science.

Magical Exaltatio in the *Picatrix*

I would like to call attention to the fact that the earliest surviving copies of the *Hermetica* are medieval codices, which indicate the uninterrupted

interest in hermeticism even during the Middle Ages.³⁹ There is another medieval textual lore, however, that not only testifies to the survival of hermetism but also demonstrates the active use of this tradition, a kind of medieval rewriting or recycling of the *Hermetica*. This is the fascinating *Picatrix*, which may, or may not have been known to John Dee.

The Hungarian scholar Miklós Maróth noted concerning the *Picatrix* as follows: “[it shows] that the neoplatonic interpretation of the world was still feasible for certain groups, outside the circles of scholastic philosophers. Those who today could be called ‘the practitioners of the occult’ ” (Maróth 1995, 24). In the Middle Ages this magical treatise was attributed to an Arabic scholar, Maslama al-Magriti; today it is rather seen as a compilation, *summa*, that documents the interest of Arabic science in hermeticism. Alphons, King of Castile, had it translated into Spanish in 1256 and this later became the basis of a Latin translation. Until the twentieth century no printed edition was known, the surviving manuscripts deriving from the later Middle Ages.⁴⁰ According to the Latin text, *Picatrix* (Buqratis, Picatris) is none other than the author of the book: *liber, quem sapientissimus philosophus Picatris in nigromanticis artibus ex quampluribus libris composuit* (a book on magical arts compiled from several others by the wisest philosopher, Picatris).

The *Picatrix* is good evidence that Hellenistic neoplatonism—like other elements of the Greek philosophy—returned to Europe via Arabic mediation. This text is similar to previously mentioned medieval magical sources in that it discusses at length the ways of sympathetic magic, among them astrology. It suggests that a constant energy radiates from the stars to the Earth and influences the happenings here. In the *Picatrix* magical-astrological observations are mixed with philosophical considerations:

These two sciences [i.e., magic and alchemy] aim at boosting a desire to study. But this goal can be reached only by the philosophers, those men who are familiar with all the fields, branches and steps of wisdom. These two sciences are at the end of philosophy like a conclusion drawn from premises in a syllogism. Mark this well, because I have just revealed to you a marvellous secret. (*Picatrix* 1.1)⁴⁷

The material world is full of occult sympathies drawn from the corresponding stars and planets. With appropriate knowledge and skills the researcher can discover and use these energies, says the *Picatrix*. It is most important to know the hidden correspondences. If, for example, someone wants to exploit the energy of Venus, he has to know what

animals, plants, metals, and stones belong to her, and he must use those when trying to contact the demon of that planet.

So far this is not radically different from the sympathetic magic of the *Liber secretorum Alberti Magni* and other similar treatises capitalizing on the concept of the organic world model. The peculiar feature of the *Picatrix* is that, reaching back to the hermetic tradition, it pays great attention to the spirits and demons of the universe. What is more, the explanation of the spiritual hierarchies is done in an elaborate symbolic-mythological framework that also derives from the Hellenistic ideology. The cornerstone of magic in the *Picatrix* is the assumption that man can contact the decans and the demons of the planets by using magic talismans as mediators. Talismans—by the power of images and inscriptions—capture the virtue of the planetary demon even to the point of conjuring it up. To illustrate this with the example of Venus, the researcher needs to know the symbolic attributes of Venus and these will be used to form the image on the talisman, which has to be made of the appropriate metal, and will have to be used only in the astrologically appropriate moment.

The *Picatrix* also discusses a great number of correspondences, related to the various talismans described in the first part of the treatise. Here follow description of the images of a few planets:

Two images of Saturn:

“The form of a man with a crow’s face and foot, sitting on a throne, having in his right hand a spear and in his left a lance or an arrow.”

“The form of a man standing on a dragon, clothed in black and holding in his right hand a sickle and in his left a spear.”

Two images of Jupiter:

“The form of a man, sitting on an eagle, clothed in garment, with eagles beneath his feet. . . .”

“The form of a man with a lion’s face and bird’s feet, below them a dragon with seven heads, holding an arrow in his right hand. . . .”

An image of Mars:

“The form of a man, crowned, holding a raised sword in his right hand.”

An image of Sol:

“The form of a king sitting on a throne, with a crown on his head and beneath his feet the figure (magic character) of the Sun.”

An image of Venus:

“The form of a woman with her hair unbound riding on a stag, having in her right hand an apple, and in her left, flowers, and dressed in white garment.” (*Picatrix*, 2.10).⁴²

While the first part of the treatise provides the necessary information on talismans and the way they should be made, the second part deals with the correspondences of the macrocosm and the microcosm and this is where we find passages relating to the role of man as a potential magus. These suggest that astrological determinism can be suspended if man (by means of magic) learns how to master nature:

Man is a small world, similar to the great cosmos, consisting of a complete, living and sensible body and a sensible soul. [. . .] He possesses divine power [. . .] can make miracles and can manufacture miraculous images. [. . .] God ordained him to become the inventor of all sciences, with a prophetic faculty to understand everything and to recognize the valuable in everything. . . . (1.6; Ritter and Plessner 1962, 35–38).

Eugenio Garin compared this image of the human being to the hermetic magus, even to Pico's oration on the dignity of man (1983, 50).

The fourth book of the *Picatrix* contains an interesting mythological fable that is a direct reference to the magical deeds of Hermes Trismegistus. According to the text he was not only the first to create magic talismans, but through his magic power founded a wondrous city in Egypt:

There are many among the Chaldeans who can create magic images, and they claim that Hermes was the first to make such [talismans] and by their help he regulated the Nile. [. . .] It was also he who founded a city in Eastern Egypt which was 12 miles long, with a palace in the middle and with a gate on each of the four sides. He attached the image of an eagle to the eastern gate, a bull to the western, a lion to the southern, and a dog to the northern. Then he infused a living spirit into the images which then could speak with voice and none could enter without their consent. [. . .] In the middle of the palace he built a tower and in it he placed a shining body which produced every day light of different color while on the seventh day returned to the first one. [. . .] Around the city he placed statues. By the power of these the inhabitants remained virtuous, free from wickedness and vices. The name of the city was Adocentyn. (4. 3)⁴³

In the description of this marvellous city Garin finds a predecessor of sixteenth- and seventeenth-century utopias, such as those of Filarete and Campanella. Frances Yates furthermore emphasized the relationship of this text to the motif of the magical, man-made statues in the *Asclepius*. I could add that the ambition to reveal the great secrets of Nature could

also be compared to the vision of Hermes Trismegistus before Poimandres, described in *Corpus hermeticum* 1:

When I wanted to reveal the secret working of the world and the process of creation, I found a dark cave, full of shadows and winds. I could see nothing and I was unable to light my torch. Then I saw a beautiful creature in my dream who said: "Put your torch under a glass jar in order to protect it against the winds and then it will shine in spite of the storm. Thus you will be able to penetrate even into the underworld region." (3.6; Ritter and Plessner 1962, 198)

Yates and Garin highlighted two different, although complementary, aspects of the *Picatrix*. For Yates its importance lay in the links with the hermetic literature and ideology. She emphasized how the medieval text had moved forward from a philosophical vision towards practical magic, the construction of talismans in order to exalt their users. As she wrote, "The work is thus a most complete text-book for the magician, giving the philosophy of nature on which talismanic and sympathetic magic is based together with full instructions for its practice. Its objects are strictly practical; the various talismans and procedures are used to gain specific ends, for the cure of various diseases, for long life, for success in various enterprises, and so on" (Yates 1964, 54). Garin appreciated the theoretical depth, the attachment to the speculative neoplatonic philosophy: "[I]t puts all the vast inheritance of ancient and medieval magic and astrology into, on the one hand, the theoretical neoplatonic picture, and on the other the hermeticist one" (Garin 1983, 48). Both emphasized, however, that the motive of bold human inquiry and the ambition to research nature had been crucially important in the grounding the notion of the dignity of man by the time of the Renaissance. The secret magical lore preserved by the Arabs provides a connecting link with both the magical theology of the Florentine neoplatonists and the experimental natural-ceremonial magic of the sixteenth century.

John Dee, as a truly versatile Renaissance man, was equally interested in science, technology, and inquiry into the occult. He could thus take inspiration from all the intellectual trends summarized in this chapter of medieval magic. Indeed, he seems to have researched the path of *magia naturalis* advertised by Roger Bacon and Albertus Magnus as well as the techniques of talismanic magic originally worked out in the *Picatrix*, until he came to crave a direct communication with God and the spirit world, somewhat along the lines of *Clavicula Solomonis* and its type of literature.

Keeping a chronological track of possible sources, in the following chapter I shall examine the elements of Florentine neoplatonism that undoubtedly contributed to the formation of Dee's program of *exaltatio*.

Florentine Neoplatonism and Christian Magic

John Dee's library catalogues as well as his marginalia and scholarly references show that in his syncretic magical system one of the main inspirations undoubtedly came from the neoplatonist magi, especially Ficino and Pico. In the part of my book entitled "OUTPUT" I shall discuss textual parallels and influences. Here I intend only to summarize briefly the ideas and iconography of magical *exaltatio* as seen in some works of Ficino and Pico.

FICINO'S TALISMANIC MAGIC

Ficino's translations of Plato were published in Florence between 1462 and 1468, sponsored by the Neoplatonic Academy of Lorenzo de' Medici, il Magnifico. These publications exercised a major influence on the subsequent development of Renaissance philosophy as well as on the early modern history of magic. Ficino's scholarly output was complex and versatile, far exceeding the present sketch of pre- and early modern Western magical traditions. From the angle of this narrower scope, his ideas on beauty, love, and celestial correspondences are of particular interest.

The philosophical discussions of beauty and love go back as far as Plato himself and his mentor, Socrates. The former treated these questions in his dialogues *Symposium* and *Phaedrus*, and came to the conclusion that the catalyzer of love was beauty, which appeared in the physical as well as in the metaphysical spheres of existence. Thus religious desire

could also be explained as the analogy of the soul's craving for perfect beauty. This explanation proved to be congenial for many Renaissance theologians, too, such as Cardinal Bembo, one of Castiglione's protagonists in his *The Courtier*. Ficino himself remained evasive in defining the borderline between theology, philosophy, and even pious, white magic. The common ground among the three areas seemed to be a curious blend of a philosophy of beauty and love, a poetical theology, and a theory of magic based on the sympathetic love among the elements of the universe.¹

The Florentine philosopher wrote extensive commentaries on Plato's works that he later collected under the title *Theologia platonica* (1482). In this work Ficino expanded his philosophy of beauty. As Tibor Klaniczay summed up: "beauty is nothing else but the symbol of divine perfectness, that is the reflection of God in the sensible world, a visible aspect of Truth. Beauty derives from a creative act of the divine, consequently Man, who can also create beautiful things, becomes partaker of the divine attributes" (1975, 14). And this is precisely the point of the amalgamation of philosophy and magic in Florentine neoplatonism. And also at this point we can detect Ficino's great synthesizing ambition, how he enriched Plato's philosophy with that of the other neoplatonists as well as with his admired hermetic lore. To begin with, let us remember the command of the creative Mind, *Nous* from the eleventh tract of the *Corpus hermeticum*:

Thus, unless you make yourself equal to god, you cannot understand god; like is understood by like. Make yourself grow to immeasurable immensity, outleap all body, outstrip all time, become eternity and you will understand god. Having conceived that nothing is impossible to you, consider yourself immortal and able to understand everything, all art, all learning, the temper of every living thing. Go higher than every height and lower than every depth. (1.20, in Copenhagen 1992, 41)

As we shall see, this concept of hermetic deification will not only echo in Ficino's philosophy, but also become one of the most important commonplaces of Renaissance magic, expounded in innumerable fifteenth- and sixteenth-century works, from Pico through Reuchlin, Agrippa, Giorgi, Lazzarelli, Gohory, Paracelsus, Postel—whose works were important readings of John Dee.

In his commentary on the *Symposium*, Ficino identified magic with love. In fact he called love "a magus":

Why do we think love is a sorcerer? Because in love there is all the power of enchantment. The work of enchantment is the attraction of one thing by another because of a certain similarity of their nature. The parts of this world, like the parts of a single animal, all hanging from one author, are joined to each other by the mutuality of one nature. [. . .] From their common relation a common love is born, and from that love a common attraction, and this is true enchantment. (*In convivium Platonis de amore*, 6.10; Ficino 1944, 91/199)

Using this general framework, Ficino relied on a wide range of sources—from the Neoplatonici through the *Asclepius*, even the Latin *Picatrix*—in order to integrate and elevate magic onto the rank of venerable science. He not only translated and propagated the magical views of the Platonici and the *Corpus hermeticum* in his already mentioned *Anthologia esoterica* (Ficino 1497, 1516), but he also developed one of the most ambitious theories of astral magic in his late work, the *Three Books on Life* (*De vita triplici* . . . , 1489). Brian Copenhaver characterized this book as follows: “Ficino took natural magic to be as much the province of the natural philosopher as cosmology, astronomy, matter-theory. The wisdom of the *magus* and the learning of the *philosophus* were distinguishable but interdependent parts of the same enterprise . . .” (Copenhaver 1988a, 274).

In the remaining part of this subchapter I shall concentrate on this work of Ficino, which, according to Copenhaver, was “the fullest Renaissance exposition of a theory of magic and the most influential such statement written in post-classical times” (*ibid.*).²

De vita . . . consists of three books. Its first part, *De studiosorum sanitate tuenda*, was written in 1480 and deals with the ways of preserving the good health of scholars. The second book, *De vita procurenda*, treats the possibility of prolonging human life. This was written last among the three books, completed just before publication in 1489. From the viewpoint of magic, the third part is the most important and most discussed: *De vita coelitus comparanda*, which is about the capturing of the celestial powers.

Ficino dedicated the whole work to Lorenzo de’ Medici and in this dedication mentioned important facts pertaining to his whole scholarly career:

I had two fathers—Ficino the doctor and Cosimo de’ Medici. From the former I was born, from the latter reborn. The former commended me

to Galen as both a doctor and a Platonist; the latter consecrated me to the divine Plato. And both the one and the other alike dedicated Marsilio to a doctor—Galen, doctor of the body, Plato, doctor of the soul. Therefore, for a long time now I have practiced the medicine salutary to souls under Plato: after translating all his books, I straightaway composed eighteen books concerning the immortality of souls and eternal happiness, so to the best of my ability repaying my Medici father. Thinking I ought next to repay my medical father, I have composed a book *On Caring for the Health of Learned People*. In addition, after this, learned people desired not only to be healthy for a while, but also, being in good health, to live a long time. And so I then gave them a book *On a Long Life*. But they distrusted terrestrial medicine and remedies in a matter of such importance; and so I added a book *On Obtaining a Life Both Healthy and Long from Heaven*, so that from the very living body of the world, a more vigorous life might be propagated as if from a vine into our own body, which is in a way a part of the world's body. (Gen. Proem., Ficino 1989, 103–105)

The program is clear: based on the doctrine of correspondences, Ficino offers medical methods that utilize cosmic forces for maintaining the human body and prolonging human life. The first book contains relatively little magical material; it concentrates instead on the correspondences of the macro- and microcosms. Complying with the concept of the four elements and the four humors, Ficino tries to define the nature of scholars and outline the dangers following from their way of life. Separate chapters are devoted to the threats of coitus, overeating, and getting up late. Next to the body, Ficino pays attention to psychology as well: he enlists cosmic rules that should be observed by the melancholic learned persons.

The second book was dedicated to Filippo Valori, a Florentine nobleman in the service of the Medicis who sponsored the publication of this book as well as the Plato translation. This treatise also starts with medical advice derived from the doctrine of correspondences and discusses how to regulate the bodily fluids and the body's temperature, what diet is good for the elderly, and what the advantages of ascetic life are. The book already introduces various magical concepts, offering recipes that follow the popular medieval concepts of sympathetic magic, including chapters 10 ("On Gold, Foods Made of Gold, and the Revitalization of Old Man") and 19 ("The Medicine of the Magi for Old People"). Also in this book we come across the leitmotif of Book Three, which led Ficino to

the ground of Christian neoplatonic magic. This is nothing other than the notion that astrological influences have medicinal effects, as is explained by mythological characters in chapter 13 (“What means of fomenting all the parts of the body the elderly may receive from the planets”) and 15 (“Mercury addresses the elderly and counsels them about pleasure, odors, song, and medicines”). One should note that old people are counseled to converse while traversing the green fields under the leadership of Venus (chapter 14) and, if their body dries out, to “choose a young girl who is healthy, beautiful, cheerful, and temperate, and when you are hungry and the Moon is waxing, suck her milk” (ch. 11, Ficino 1989, 197). As Frances Yates ironically remarked: “We might be in the consulting room of a rather expensive psychiatrist who knows that his patients can afford plenty of gold and holidays in the country, and flowers out of season” (1964, 63).

Book Three is dedicated to Matthias Corvinus, the Hungarian Renaissance ruler, who on several occasions unsuccessfully invited Ficino to his court. According to Ficino’s dedication,

The ancient philosophers [. . .] judged, as I suppose, that the elements and all that is composed therefrom would be known by them in vain, and that the motions and influences of the heavens would be too aimlessly observed, if the knowledge of both, taken jointly together, did not eventually lead to life and happiness for themselves. Thoughts of this kind profited them, as it seems, first of all in the present life; for Pythagoras and Democritus and Apollonius of Tyana and all who have made this their special study have by using the things they knew attained good health and long life. (Proem 3, Ficino 1989, 237)

These introductory words indicate that the following treatise belongs to the territory of astrological medicine, and one should also note that Ficino emphasizes the importance of utilizing celestial forces for maintaining the body in this earthly life—a typical Renaissance concern!

The next passage of the dedication also reveals Ficino’s source and inspiration in writing this book:

Now among the books of Plotinus destined for the great Lorenzo de’ Medici I had recently composed a commentary on the book of Plotinus which discusses drawing favor from the heavens. With all this in mind, I have just decided to extract that one (with the approval of Lorenzo himself) and dedicate it especially to your Majesty. (Ficino 1989, 239)

The first chapter of this famous book again recapitulates some basics of the organic world picture and the correspondences: the celestial powers, the World Soul, the planets, and the demons. Ficino, following Plotinus and the hermetic tradition, asserts that each planet and the houses of the zodiac have their demons and governing angels, which translate the will of the World Soul (*Anima mundi*) toward the inferior spheres.

The system of will transfer (in Plotinus, "emanation") sustains the harmony of the world (chapter 2), a notion which became a central component of the Renaissance world model, primarily due to Ficino and the other neoplatonist philosophers. As the miniature model of the cosmos, the human soul is capable of absorbing the strength of the World Soul through the rays of Sol or Jupiter. This is how one becomes of solar or jovial temperament (chapter 4). The point is that all these astral forces can be used for medical purposes in order to improve man's physical and mental functioning (chapter 10).

In chapter 13 Ficino introduces the concept of talismanic magic, probably borrowed from the *Picatrix*: "On the power acquired from the heavens both in images, according to the Ancients, and in medicines." The following chapters enlist the various planetary and stellar forces and the talismanic images corresponding to them. Chapter 16 treats the question of the rays from which images are thought to obtain their force. After the "flames without light" (Ficino 1989, 321) penetrate the metals and gems embellished with the magic images, they "imprint in them wonderful gifts, since indeed they generate supremely precious things in the womb of the earth" (323). This is as when the rays of a beautiful eye generate great love in one who beholds that eye (as Ficino already had explained in his *Symposium* commentary).³ Chapter 18 describes talismans already known since Antiquity and in some of them elements of Dee's hieroglyphic monad can be recognized. It is even more so in chapter 19, which advises on the construction of a general image, representing the whole cosmos. As we shall see, again, in this respect Dee's *Monas* was the ultimate achievement (see chapter 6 below, p. 161 ff).

Beginning with chapter 21, Ficino adds to the treatment of powerful images a description of powerful words, incantations, magical prayers and he offers a seven-grade typology of celestial influences according to the seven planets. The theoretical introduction is followed by practical advice: how to find our place in the web of astral influences, how to defend against the harmful domination of Saturn, how to capitalize on Jupiter's benevolent strength (chapter 22). The next chapter gives the following counsel: "To live well and prosper, first know your natural

bent, your star, your Genius, and the place suitable to these; here live. Follow your natural profession” (Ficino 1989, 371). The influence of the talismanic magic of *Picatrix* is quite obvious here: the complex of prerequisites—place, astrological and physical correspondences (zodiac, planetary position, materials, colors, and odors) and the magical images on the talismans and the accompanying incantations—all follow the traditions of hermetic and Arabic authors.

Beginning with chapter 24 further pieces of advice are gathered and directed to scholars specifically: “By what system people dedicated to learning may recognize their natural bent and follow a manner of life suitable to their guardian spirit.”

The closing, twenty-sixth chapter summarizes astrological magic returning to the theoretical plane again: “How by exposing lower things to higher things, you can bring down the higher, and cosmic gifts especially through cosmic materials.” Ficino’s wording is a clear product of Renaissance neoplatonism inspired also by hermetic magic:

As Plato teaches, echoing Timaeus the Pythagorean, the world has been produced by the Good itself the best it could possibly have been. It is therefore not only corporeal but participating in life and intelligence as well. (3.26, Ficino 1989, 385)

The definition of the magus and the encomium of magical practices follow this tone, concluding again with an equation between magic and love:

Agriculture prepares the field and the seed for celestial gifts and by grafting prolongs the life of the shoot and refashions it into another and better species. The doctor, the natural philosopher, and the surgeon achieve similar effects in our bodies in order to both strengthen our own nature and to obtain more productively the nature of the universe. The philosopher who knows about natural objects and stars, whom we rightly are accustomed to call a Magus, does the very same things: he seasonably introduces the celestial into the earthly by particular lures just as the farmer interested in grafting brings the fresh graft into the old stock. [. . .] The Magus subjects earthly things to celestial, lower things everywhere to higher, just as particular females everywhere are subjected to males appropriate to them for impregnation, as iron to a magnet to get magnetized, as camphor to hot air for absorption, as crystal to the Sun for illumination, as sulphur and sublimed liquor to a flame for kindling, as an egg-shell, empty and full of dew, to the Sun for elevation, or rather the egg itself to the hen for hatching. (3.26, 387)

His own definition Ficino strengthens by the authority of Plotinus and Hermes Trismegistus:

Plotinus uses almost the same examples in that place where, paraphrasing Hermes Trismegistus, he says that the ancient priests or Magi used to capture in statues and material sacrifices something divine and wonderful. (3.26, 389)⁴

This locus is a good example to show with what determination Ficino tried to amalgamate his different sources: Plato, the Platonici, and the hermetic tradition. While modern scholars are usually sceptical about Plotinus' approval or even knowledge of the *Corpus hermeticum*, Ficino thinks him to have paraphrased Hermes. This claim is not void of cultural politics, though: Plotinus' opinion was more acceptable for Christian authorities than that of Hermes Trismegistus, so it could serve as a mediator for the Christianization of the *Hermetica*.

But now let us get back to Hermes, or rather to Plotinus. Hermes says that the priests received an appropriate power from the nature of the cosmos and mixed it. Plotinus follows him and thinks that everything can be easily accomplished by the intermediation of the Anima Mundi, since the Anima Mundi generates and moves the forms of natural things through certain seminal reasons implanted in her from the divine. [. . .] The Anima Mundi can easily apply herself to materials since she has formed them to begin with through these seminal reasons, when the Magus or a priest brings to bear at the right time rightly grouped forms of things. [. . .] Sometimes it can happen that when you bring seminal reasons to bear on forms, higher gifts too may descend, since reason in the Anima Mundi are conjoined to the intellectual forms in her and through these to the Ideas of the Divine Mind. (3.26, 391)

In Ficino's interpretation, then, magic is nothing else but the capturing and manipulation of supernatural forces in order to free man's soul and intellect from the burden of the material world. The goal is to unite the human spirit with the divine not only after death but during earthly life, in the form of *exaltatio*. The roots of this concept originated in neoplatonic hermeticism but for the Renaissance philosopher the platonic concepts of Supreme Good, creative Nous, and the transmitting demons could be easily associated with Christian doctrines: God, angels, and the human soul. Ficino's purpose was precisely this association: the Christianization of neoplatonism and her-

metic magic. A good example of this process can be seen in his commentary on Plato's *Symposium*, when his discussion of demons involves the Pseudo-Dionysian discourse on angels:

The good daemons, our protectors, Dionysius the Areopagite is accustomed to call by the proper names, Angels, the governors of the lower world, and this differs very little from the interpretation of Plato. [. . .] Plato does not in the least bind spirits of this kind within the narrow limits of the spheres, as he does the souls of earthly creatures in bodies, but asserts that they are endowed with such great virtue by the supreme God that they are able to enjoy the vision of God at once, and they are able without any labor or care to rule and move the globes of the world according to the will of their father, and by moving them, easily govern lower creatures. Therefore it is rather a difference in words between Plato and Dionysius than a difference in meaning. (*In convivium Platonis* . . . , 6.3; Ficino 1944, 79/186)

Florentine neoplatonism was not the only trend in Christian philosophy to assimilate the teachings of Plato. Its intellectual novelty was nevertheless the emphasis on magical possibilities (through the synthesis of the Platonici and hermeticism) that was to enable humankind to assume a more central and important role than previously had been permitted in the framework of medieval Christian philosophy.

A look at the critical history of *De vita* . . . can refine the character of Ficino's magic so far outlined. The first extensive analysis was done by D. P. Walker (1958) whose views were further developed by Frances Yates in her book on Bruno under the heading "Ficino as Christian-Renaissance magus" (1964, 62–84). Her thesis was grounded on a reading of *De vita* . . . , and this well fitted the concept of the dignity of Renaissance man as established by Cassirer.⁵ As Cassirer suggested, the Renaissance preserved the idea of the Great Chain of Being, but the great innovation was that man's place changed—from fixed to movable. As a result the neoplatonists thought man could climb up the Chain, even up to God. This possibility intensely occupied Renaissance philosophers who tried to validate the idea from the works of Plato and other pagan sources, mixing them with the ideas of Christian mystics, such as the works of Pseudo-Dionysius.

This philosophical *exaltatio* was supposed to be comparable to a reverse emanation in Plotinus' system, first described by Plato in his *Symposium* and the *Phaedrus*. The human soul encaged in the material body does not entirely forget about its supernatural origin and keeps

longing for it.⁶ And when the human perception encounters something beautiful, this earthly beauty reminds the soul of its divine heritage, and the soul then longs even more strongly for the heavenly perfection. And if the soul is strong and disciplined enough, it can break out of the prison of matter and can dine with the divinity: the *exaltatio* happens.

One of Ficino's important theoretical works was his commentary on Plato's *Symposium*,⁷ where he Christianized Plato's theory of love and also articulated the doctrine of the deification of man. In this process the catalyzing agents are Plato's four furors or "sacred madnesses"—prophetic, religious-mystical, poetical, and love (cf. *Phaedrus* 244a–249c), which are able to lift the soul from—in Ficino's wording (7.13–14)—dissonance to harmony and from variety to unity. The first step is done by poetic madness:

The Soul cannot return to the One unless it itself becomes one. The whole soul is filled with discord and dissonance; therefore the first need is for the poetic madness, which through musical tones arouses what is sleeping, through harmonic sweetness calms what is in turmoil, and finally, through the blending of different things, quells discord and tempers the various parts of the soul. (7.14; Ficino 1944, 231)

The other madnesses follow and complete the elevation of the soul, climaxing in Christian, holy love:

Finally, when the soul has been made one, it recovers itself into the One which is above essence, that is God. This the heavenly Venus completes through Love, that is through the desire for the divine beauty, and the passion for Good. So the first kind of madness tempers dissonant and unharmonious parts. The second makes the tempered parts one out of many. The third makes it one above all parts; and the fourth into One which is above essence and above the whole. (7.14, 232)

To sum up: Ficino laid down the theoretical framework of his magic in his commentaries on Plato and Plotinus by means of "re-platonizing" Pseudo-Dionysius and amalgamating it with a syncretic mix of classical traditions. The magical praxis of *exaltatio* using astrological talismans was, on the other hand, grounded in his *De vita coelitus comparanda* and again can be considered to be the result of the fusion of various earlier practices.

According to Frances Yates the most dominating intellectual force on Ficino's development of neoplatonic magic was Egyptian-Hellenic hermeticism. Based on this assumption she coined the historical category "Renaissance hermeticism," which she considered to be the most important intellectual achievement of the fifteenth and sixteenth centuries. Research over the past few decades in many ways has broken with Dame Frances' thesis, philologists above all demonstrating that the magic of Ficino was more complex, relying on sources outside hermeticism, such as the Platonic, Arabic and Jewish sources of the Middle Ages, and medieval sympathetic magic.⁸

Taking all this into consideration, one has to conclude that the category of hermeticism must either be enlarged ad infinitum to accommodate all the significant phenomena Frances Yates tried to bring under this label; or it has to be understood as a well-defined but by no means generally influential intellectual trend. However, I would still like to emphasize with Yates what an important inspiration the doctrine of ascension/*exaltatio* meant for the forging of the man-centered world picture of the Renaissance.

If the Yates thesis, including her model of the "Rosicrucian Enlightenment," has become outdated in current historical research, even today's historians have to face the facts according to which occult philosophies produced an amazing amount of written, printed, and illustrated material during the sixteenth and seventeenth centuries in genres ranging from philosophical tracts to spiritual diaries, from poetry to learned theology, not to mention the popular imagination of the age as manifested in anecdotes, broad sheets, *volksbuchs*, and intriguing plays on the stages of Europe. And also there remains the surprising fact that neither the occult philosophies nor their complex iconography disappeared after the scientific revolution.

Compared with this variety of the Western esoteric tradition, Yates was also right to point out that Ficino's magic was largely restricted to a pious and limited version of talismanic lore. The purpose of the next subchapter is to show what giant steps were taken in Renaissance magic after Ficino's initial experiments, resulting in the fact that in the second half of the sixteenth century John Dee could encounter a more enlarged and complicated magical world picture than Ficino had dreamt of seventy-eighty years earlier.

The first step in this development was undertaken by Pico della Mirandola who integrated Jewish cabala into neoplatonic-hermetic magic, as manifested in his *De hominis dignitate*.

PICO'S ENCOMIUM OF *EXALTATIO*

Ficino always made a point of detaching himself from dark or evil magic, calling his own system theology. This division of magic into white and black had been in use since Antiquity. The word *magia* originally referred to the practices of Persian priests, and the abused version of this practice was identified as "black magic."⁹

Greek philosophers, such as Plotinus, differentiated between *theurgy* and *goétia* (Dodds 1951), while Christian theologians talked about *mira* and *miracula* as opposed to wicked *maleficia* and *veneficia* (Flint 1991, 33). The Catholic Church, in spite of the careful distinguishing of many theologians, did not like theurgy either. It is almost surprising that Ficino never encountered a conflict with the church because of his experiments with magic; his disciple, Pico, on the other hand, had to face serious charges of heresy several times during his short life (1463–1494).

As I shall show later, the typologizing of magic always depended on subjective motivations, and the labelling of esoterically oriented minds either as venerable magician or wicked witch and conjuror always belonged to the repertoire of power politics.

No doubt, with his bold ideas and gestures Pico provoked the suspicion of church authorities. The dangerous elements of his philosophy were as follows: he articulated the doctrine of the dignity of man in a more inflammatory way than his master, Ficino; he openly advocated magic as being a suitable means for the elevation (*exaltatio*) of man to the level of God; and, last but not least, in professing magic he introduced a new methodology taken from the Jewish cabala. In this section I briefly outline the system of cabala and its connecting points to Christian mysticism, then examine Pico's cabalistical magic as a life program given to the people of the Renaissance.

Cabala and '*exaltatio*'

Cabala is the theosophy of the Jewish religion, that is, a mystical-philosophical system. The word itself means "received doctrine" or "tradition." Opinions differ about the origins of this tradition. Believers speak about a time even before the revelation given to Moses; historians connect it to Merkabah mysticism beginning in the first few centuries B.C., then flourishing in the Hellenistic period. The historically distinct

cradle of the cabala is the early Middle Ages (eighth and ninth centuries), and its real flourishing starts from the twelfth century.¹⁰

The two fundamentally important texts of the cabala are the *Sefer Yetsirah* or the “Book of Formation,” and the *Zohar* or the “Book of Splendor.” Neither of them is possible to date precisely. The *Sefer Yetsirah* is supposed to have been written between the second and the sixth centuries A.D. The *Zohar* is a much later development; it must have been compiled toward the end of the thirteenth century, in spite of its claiming the authorship of Simeon ben Yohai, a scholar of the first century A.D.

No matter the exact dates of composition, these books obviously relied on earlier oral or textual traditions, and what seems to be rather certain is that the roots of cabala reach back to the period more or less coinciding with the creation of the other great corpuses of mystical literature: the *Corpus hermeticum* and the early Christian gnostic literature. Thus the Jewish cabala also sprung from that cosmopolitan and decadent atmosphere of the decaying Roman Empire where religious systems almost freely mixed, became open to mysticism, and sought individual revelation. Most of these experimental trends were influenced to some extent by Hellenistic neoplatonism as well as the Eastern mystical lore, from Egyptian magic through Persian Zoroastrianism to the early Christian gnosticism. All of these tried to explain the creation of the material world from the divine Mind (variations on the emanation theme) and they also tried to provide man with a key to be able to transfer himself between these two worlds, the material and the supernatural.

Among all these religious and theosophical efforts, Jewish cabala stands out because of its coherent system. Although there was a great variety even within Jewish mysticism, after the synthetizing schools of Samuel Abulafia (1240–1292) and Abraham Gikatilia (1247–1305), the system attracted Christian thinkers, too.¹¹ As has been recently demonstrated, this medieval Jewish mysticism exercised a great influence on medieval ceremonial magic, especially on its “underground” angelology. But it was some of the great Renaissance humanists—especially Pico and Reuchlin—who rediscovered this lore for themselves and established the Christian cabala as an important trend in Renaissance cultural history.

The most important key to the ideas of the cabala is the *Sefirot*, or the system of divine emanations. According to the doctrine that was grounded in the *Sefer Yetsirah*, God—that is, *En-Sof* the infinite—fills and contains the universe at the same time. Since God is infinite, it cannot be comprehended. In order to demonstrate its existence, God then became active and creative,

emanated from itself. This process is described by the sefirotic tree, which consists of ten sefira, usually arranged in a special order:¹²

With the appearance of Kingdom the emanation is completed, the Spirit becomes manifested in the material world. The characteristic arrangement of the sefirot is often called the Tree of Life, where the stages of emanation are grouped in triads, forming three columns and three tiers. The right side is the “Black Column,” standing for mercy, which is positive, active, and male. The left side is the “Silver Column,” standing for severity and is negative, passive, and female. In the middle one finds the column of equilibrium, standing for grace and divine will. The three tiers represent the three aspects of the divine nature: the upper three sefirot constitute the Divine Spirit, the next three the Divine Soul, while the lower three the Divine Will (Halevi 1979, 6 ff.).

Graphic representations of the sefirot became common by the time of the Renaissance. One of the much reproduced early prints is from Paulus Ricius’ *Portae lucis* (Augsburg 1516), which shows a Jewish cabalist, deep in meditation, holding the sefirotic tree in his hand.¹³ To illustrate the structure of the sefirotic tree, I am referring here to Cesare di’ Evoli’s diagram, which was printed in his *De divinis attributis* in 1573. The woodcut clearly represents the triads composed of the elements of the sefira (Figure 4.1), and, needless to say, John Dee had this volume in his library.¹⁴

During the emanation this threefold nature manifests itself in four phases, which is why the cabala is said to consist of four worlds. This has to be understood in such a way that the ten sefirot are repeated four times, or that the emanation repeats itself on four occasions. The first ten sefirot constitute the world of Manifestation, or *Atsilut*, that is, the primal emanation of the divinity. The next emanation is Creation, or *Beriah*, the Throne, or *Merkabah* with the highest angels. This is followed by the world of Formation, or *Yetsirah*, the domain of the angels and the world of Making, or *Asiyah*, the spiritual archetype of the material sphere,

FIGURE 4.1 The Sephirotic Tree. Cesare d' Evoli, *De divinis attributis, quae sephirot ab hebraeis nuncupata* (Venice, 1573), 8^r. Herzog August Bibliothek, Wolfenbüttel [98.9 Theol /2/].

something like Plotinus' hypostasis of Nature (Scholem 1974, 272). The threefold and fourfold connections of the sefirot are repeated in each subsequent world until the Spirit unites with Matter. Aspect four is as important as the aspect three, since—as we learn from the Zohar—the tree has four parts (root, trunk, branch, and fruit), there are four elements, and the most special name of God (the Tetragrammaton) also consists of four letters: JHVH (Halevi 1979, 8–9).

The theory of the four worlds has roots in the Book of Isaiah: “Even every one that is called by My Name [*Atsilut*]: for I have created [*Beriah*] him for My Glory, I have formed [*Yetsirah*] him; yea, I have made [*Asiyah*] him” (43:7). The teachings of the sefirot thus are not only a cosmogony but also a means for biblical exegesis that was used for the interpretation of the *Pentateuch*, the Books of Moses. One of the most important episodes in these books was, of course, the appearance of humankind, the mission of Adam on earth. The same threefold and fourfold logic was then applied to the explanation of man, too. According to the four worlds, the microcosm of man also has a fourfold structure. As the cabalists explained, there

were four Adams: most superior was Adam Kadmon, the Divine Man who is mentioned in the vision of Ezekiel:

And above the firmament that was over their heads was the likeness of a throne, as the appearance of a sapphire stone: and upon the likeness of the throne was the likeness as the appearance of a man above upon it.

And I saw as the color of amber, as the appearance of fire round about him. . . . (Ezek. 1:26–27)

This man of *Atsilut* is the first reflection of God who has all the potential for will, intellect, compassion, and action. According to the cabala, all creatures derive from this Adam Kadmon, including the angels and arch-angels. No wonder such notions also gave rise to ambitions of *exaltatio* and catalyzed efforts to contact the world of angels.

The next Adam is of *Beriah*, who was created on the sixth day. He still possessed fully the emanation of God and the angels became jealous of him. This Adam existed already as an independent intellect; however, he had not yet been tested. The examination took place in Eden, the World of Formation where the male and female principles were separated. After the Fall, the fourth Adam came to life, the mortal, who had to interact with the sphere of Matter and had to justify himself in the World of Making.

As Scholem explains, the sefirotic tree is anthropomorphic and the simile of man is often used to describe the sefirot.

“The Biblical word that man was created in the image of God means two things for the Kabbalist: first, that the power of the Sefiroth, the paradigm of divine life, exists and is active also in man. Secondly, that the world of the Sefiroth is capable of being visualized under the image of man the created. From this it follows that the limbs of the human body are nothing but images of a certain spiritual mode of existence which manifests itself in the symbolic figure of Adam Kadmon, the primordial man.” (1974, 215)

As I have mentioned, the cabala is not only cosmology and anthropology; primarily it is teaching, a key to understanding and illumination. As opposed to the interpretation of the Torah, the recorded and public teaching, the cabala was an esoteric knowledge, reserved only for a select few.¹⁵ By the Middle Ages we see the development of patterns of ecstatic-prophetic and meditative illumination that became highly individual

techniques, sometimes involving only the mystical relationship of a master and a disciple.

Another, very important feature of the cabala was, however, that it more strictly attached itself to the codified text than any other form of mysticism. In the Bible creation happens through words and the truthful testimony of God is also handed down in writing. Thus the cabala has closer ties with the structures of verbal expression than to mystical or symbolic imagery, and its system in a way becomes a whole philosophy of language.¹⁶ The three most important manipulative techniques of the cabala—in fact, adapted from earlier procedures of Hasidism—were *gematria*, *notarikon*, and *temurah*, all of which combined theology, language philosophy, and number symbolism. The first associated numerical values with the letters of the Hebrew alphabet, thus allowing certain associations on the basis of equal numerical meanings. Therefore the name of Adam could be equated with that of the Tetragrammaton. *Notarikon* was the interpretation of the letters of a word as abbreviations of whole sentences, while *temurah* meant the interchanging of letters according to certain systematic rules.

The ultimate goal of all these practices was to reach illumination, or *exaltatio*. The cabalist—through various exercises and meditation—prepared for an inner journey by the end of which he was supposed to reach the unification of the split, dualist universe. The earthly man, the *tabutonim*, that is, one of those “who live below,” was to have a glimpse of the *elionim*, the world of those “who live above.” Alongside other, platonically oriented philosophies, the cabala also professed the dignity of man, capable of encompassing both lower and upper worlds. The cabalistic techniques promised the acquisition of external and internal sensation, reaching downward and upward alike, even bridging different worlds, if necessary. This faculty is especially useful when divine emanation has to be steered to areas where further development is needed or chaos rules and where, due to this, the community lacks a mystical encouragement.

I hope, even this sketchy outline of the cabala shows those areas where Christian humanists, already engaged in Platonic and hermetic mysticism, could take interest. Those were the concepts of emanation and ascension, the man-centered creation myth, the interpretation of Adam as a demigod or demiurge, and, above all, the efforts to unite man with his creator.

Because of the above parallels, it is not surprising that from time to time syncretizing efforts took place between the Jewish, the Christian,

and the Arabic-Muslim philosophies. Philo of Alexandria, the scholar who developed the Jewish religion into a highly conceptual philosophy in the first century A.D. applied neoplatonism to systematize the description of the religious experience. Philo used Greek philosophy to corroborate monotheism, for himself a sacred doctrine. By bringing together the Law of Jahve and the Law of the *Logos*, he tried to modernize the Rabbinic tradition. His notions of emanation and divine radiation later became incorporated in the works of the medieval Jewish philosophers, with the modification that the work of creation and government was not the work of God directly, but rather required the help of mediators, such as angels. As the Platonic ideas became angels in Christianity, a similar development took place in Jewish theology, too. This is why the *Zohar* speaks of "mediators" and the ten ranks of angels (as opposed to the nine angelic hierarchies in Pseudo-Dionysius).

Pico's "Oration," Cabalistic Magic, and Exaltatio

Considering the historical circumstances, Pico almost seems predestined to discover Jewish cabala for the purposes of Christian neoplatonism and to try to integrate its magic into the expanding system of Renaissance occultism. During the Middle Ages not only was the cabala basically hidden from gentile scholars, but so were traditional rabbinic teaching, and even, by and large, the Hebrew language. This happened partly because Christians did not trust the Jews, even suspecting that they consciously forged those passages of the Old Testament that were suitable for Christological explanations and Christian typological symbolism. Because of this atmosphere, those who became interested in the Hebrew language could not expect much support from Church institutions or the universities. Although in 1311 Pope Clement V encouraged the study of Hebrew, Arabic, and Sirian languages, even at the time of the Synod of Basel in 1432, Hebrew departments were not present within strongholds of Christian learning such as the universities of Paris, Oxford, Bologna, and Salamanca (Lloyd Jones 1983, iv ff.). Another cause hindering the development of Hebrew studies in Europe was the attitude of the Jews themselves who considered it to be sacrilegious to share sacred knowledge with gentiles.

The spread of humanism and the new ideas of the Renaissance finally changed this situation. The humanist slogan "Back to the Sources" generated efforts to research Hebrew and all the available texts surviving in this language. The study of the Bible was continued on the basis of new,

philological methods with the aim of cleaning the Holy Writ of the distortions of the previous centuries. From this time on the “three sacred tongues” (Latin, Greek and Hebrew) were of equal importance.

Two Renaissance popes, Nicholas V and Sixtus IV, accumulated significant collections of Hebrew manuscripts and encouraged translations from Hebrew to Latin. The Florentine neoplatonists rejoiced concerning this incentive since it fully coincided with their efforts to widen syncretically the theological and philosophical background of Christianity.¹⁷

In summing up the motivations behind the heightened interest in Hebrew studies, the following reasons ought to be taken into consideration: primarily there was a Christian-humanist motivation to incorporate the third sacred language in the humanistically enlarged Christian tradition. Another important aspect was that until the Reformation froze the boundaries of religious thinking, many humanists had hopes about a new universal religion in which Christianity, Islam, and Judaism could be merged. I shall soon discuss the questions of these heterodox ideas, which strongly characterized the works of Christian cabalists from Pico through Reuchlin to Postel, since traces of them can be found among Dee’s angelic prophecies, too. Last but not least, the attention of the Florentine neoplatonists and their followers were turned toward Jewish culture because of certain similarities between the cabala and the hermetic doctrines of *exaltatio*.¹⁸

We should remember that Renaissance humanists thought the hermetic writings were as old as the books of Moses. While calling the *Corpus hermeticum* “a book about the power and wisdom of God,” Ficino became interested in certain rabbinical texts for the sake of comparison. But he did not know Hebrew and was unaware of the full system of the cabala. Pico, on the other hand, took the decisive step of bridging the separate traditions. In 1485, during a journey in Germany, Rudolf Agricola praised him as a “man who is well versed in all languages, in Latin, Greek, Hebrew, Chaldean, Arabic, and furthermore he is a theologian, a philosopher, a poet and in all excellent” (quoted by Secret 1985, 25). Although modern scholarship has doubts about the perfection of Pico’s knowledge of Hebrew (for example, Lloyd-Jones 1983), his familiarity with the cabala enabled him to develop hermetic-neoplatonic magic by infusing a cabalistic cosmogony into the hermetic mythology. From a parallel analysis of the two, he concluded that according to Trismegistus as well as the cabala God created the world by means of words.

In 1486 Pico went to Rome and advertized his nine hundred theses, in which he called for a public scholarly discussion of the possibility of

creating a syncretic theory that could accommodate all religions and philosophical schools in order to make the Christian doctrines even more perfect. The theses were not unanimously approved, and a year later Pico had to defend himself from charges of dangerous heterodoxy. This polemical material nevertheless shows the twenty-three-year-old philosopher to have been a broad-minded humanist, interested in a wide range of topics, including mathematics, geography, medicine, and other sciences.¹⁹

The theses, or theorems, were divided into larger sections, the first few of which dealt with Christian, Arabic, Aristotelian, and Platonic philosophers: "Conclusiones secundum doctrinas latinorum philosophorum et theologorum," "Conclusiones secundum doctrinam Arabum," "Conclusiones secundum grecos, qui peripateticam sectam profitentur," "Conclusiones secundum doctrinam philosophorum, qui Platonici dicuntur." In the next section Pico offered his own arguments for the reconcilability of Aristotelism and Platonism ("Conclusiones numero quingentae secundum opinionem propriam"). Most startling was the last section—"Questiones ad quas pollicetur se per numeros responsurum"—in which he included subsections dealing with the mysticism of Zoroaster and the Chaldeans, magic in general, the mystical hymns of Orpheus, and, finally, seventy-one theses on the Hebrew cabala: "Conclusiones cabalisticæ numero 71, secundum opinionem propriam, ex ipsis Hebreorum sapientium fundamentis Christianam Religionem maxime confirmantes."

Pico advertised twenty-six theses on magic, which scholarship refers to as the *Conclusiones magicæ*. In the first thesis Pico employs the maneuver of his mentor, Ficino, separating himself from the outset from black, diabolic magic. "Magia naturalis licita est, et non prohibita . . ." states the second thesis (Pico 1973, 78), and in the third he claims that magic is part of science. The following theses deal with questions of magic and the cabala, and claim that there are no more suitable means for proving the divinity of Christ than these: "Nulla est scientia que nos magis certificet de divinitate Christi, quam Magia et Cabala" (*Conclusiones magicæ* 9, in Pico 1973, 79).

The nine hundred theses were to be introduced by a preface, an oration on the dignity of man. Although the theses were never published, the *Oratio* . . . was permitted to appear in 1487. This pamphlet is the peak of Pico's early career, perhaps his whole scholarly output. The views expressed in it became emblematic images of Renaissance ideology.²⁰

According to the *Oratio* . . . there are two kinds of magic: one is harmful and is the work of demons, while the other is pure natural philosophy. The latter helps man to extend and exploit his potential to

the ultimate limits. The treatise starts with the famous saying of Hermes Trismegistus, “Magnum, o Asclepi, miraculum est homo,” and this is the maxim that urged Pico to venture into his philosophical investigation concerning the divine nature of man:

When I weighed the reason for these maxims, the many grounds for the excellence of human nature reported by many men failed to satisfy me—that man is the intermediary between creatures, the intimate of the gods, the king of the lower beings, the interpreter of nature, but little lower than the angels. [. . .] Admittedly great though these reasons be, they are not the principal grounds, that is, those which may rightfully claim for themselves the privilege of the highest admiration. For why should we not admire more the angels themselves and the blessed choirs of heaven? At last it seems to me I have come to understand why man is the most fortunate of creatures and consequently worthy of all admiration and what precisely is that rank which is his lot in the universal chain of Being—a rank to be envied not only by brutes but even by the stars and by minds beyond this world. (Section 1; Pico 1948, 223)

In the following sections he argues that the divine nature of man has roots in God’s desire to have a creature of universal potential who can fully appreciate the work of creation:

When the work was finished, the Craftsman kept wishing that there were someone to ponder the plan of so great a work, to love its beauty, and to wonder at its vastness. Therefore, when everything was done (as Moses and Timaeus bear witness), He finally took thought concerning the creation of man. [. . .] He therefore took man as a creature of indeterminate nature and, assigning him a place in the middle of the world, addressed him thus: “Neither a fixed abode nor a form that is thine alone nor any function peculiar to thyself have we given thee, Adam, to the end that according to thy longing and according to thy judgement thou mayest have and possess what abode, what form, and what function thou thyself shalt desire.” (Sections 2–3, 224)

This special status, the concentration of potential and possibilities, then ordain man to shape his fate with full freedom and even elevate himself directly to God:

We have made thee neither of heaven nor of earth, neither mortal nor immortal, so that with freedom of choice and with honor, as though

the maker and molder of thyself, thou mayest fashion thyself in whatever shape thou shalt prefer. Thou shalt have the power to degenerate into the lower forms of life, which are brutish. Thou shalt have the power, out of thy soul's judgement, to be reborn into the higher forms, which are divine. (section 3, 225)

From this statement Cassirer postulated the novelty of the Renaissance world picture in comparison with that of the Middle Ages: the so-called man-centered ideology is nothing but the idea of man capable of *exaltatio*, of moving upward along the Great Chain of Being and becoming the partner of the Creator. Pico himself must have felt rapture from his own thoughts because the following passages reach an exalted poetical intensity:

O supreme generosity of god the Father, O highest and most marvelous felicity of man! To him it is granted to have whatever he chooses, to be whatever he wills. [. . .] And if, happy in the lot of no created thing, he withdraws into the center of his own unity, his spirit, made one with God, in the solitary darkness of God, who is set above all things, shall surpass them all. (section 4, 225)

After corroborating his thesis about the privileged place of man by citing the Bible and classical authors, he poses the question: "what ought we to do to achieve ascension?" Following the Apostle Paul and Dionysius the Areopagite he suggests that the first step is purification (cf. Völker 1958, *passim*). This will lead to illumination and perfection. Pico's argumentation is quite eclectic: the variety of his sources indicates that the new theology will have to be an amalgamation of the great world religions and that Christianity will have to be renewed with the help of classical philosophy. He refers to Jacob's ladder and the example of Job from the Old Testament, then he mentions the Egyptian mythology of Osiris to which he adds a few thoughts from Empedocles.

Then he outlines the hierarchy of human learning, setting up the following triad: moral philosophy—natural philosophy and dialectics—theology. This threefold division corresponds to the neoplatonic concept of sensual, rational, and intuitive knowledge. On the highest level one finds the Peace that springs from the understanding of the One and Primordial Truth, no matter whether it is the result of Christian, Pythagorean, or cabalistical meditation:

This is that peace which God creates in his heavens, which the angels descending to earth proclaimed to men of good will, that through it

men might ascend to heaven and become angels. Let us wish this peace for our friends, for our century. (section 14, 232)

Pico draws a parallel between the process of initiation in Moses and in the Greek mysteries before he comes to a conclusion by restating the program of ultimate sacred *exaltatio*:

Who would not long to be initiated into such sacred rites? Who would not desire, by neglecting all human concerns, by despising the goods of fortune, and by disregarding those of the body, to become the guest of the gods while yet living on earth, and, made drunk by the nectar of eternity, to be endowed with the gifts of immortality though still a mortal being? (section 16, 233)

The second part of the *Oratio* . . . , after having introduced the state of rapture through sacred illumination, is devoted to a detailed methodology of achieving the desired ascension to God. Here Pico supports Apollo's precepts derived from the oracle of Delphoi ("Nothing too much," "Know thyself," "Thou art" [i.e., the theological greeting, $\epsilon\omega$]); then he offers an imposing outline of various philosophical schools, beginning with the teachings of Pythagoras, Socrates, Chaldean magic, and Zoroaster, continuing with Christian philosophers (Augustinus, John Scotus Erigena, Thomas Aquinas, Albertus Magnus), the Arabs (Averroes, Alfarabi, Avicenna), and finishing with the Greek platonists (Theophrastus, Ammonius, Porphyry, Iamblichus, Plotinus, Proclus, and others). At this point he openly attests syncretism:

I have so prepared myself that, pledged to the doctrines of no man, I have ranged through all the masters of philosophy, investigated all books, and come to know all schools. Therefore, I had to speak of them all. (section 26, 242)

[. . .] This has been my reason for wishing to bring before the public the opinions not of a single school alone but rather of every school. (section 28, 244)

After this methodological introduction, Pico discusses in a detailed way his sources belonging to heterodox or apocryphal philosophical trends, such as the hermetic writings, Pythagorean mysticism, and the Jewish cabala. Finally he adds his own conclusions:

I have not been content to add to the tenets held in common many teachings taken from the ancient theology of Hermes Trismegistus,

many from the doctrines of the Chaldeans and of Pythagoras, and many from the occult mysteries of the Hebrews. I have proposed also as subjects for discussion several theses in natural philosophy and in divinity, discovered and studied by me. (section 29, 245)

Hereafter Pico summarizes his nine hundred theses which he orders in six groups: the first group covers the correspondences between Plato and Aristotle whom Pico does not see as irreconcilable as many of his contemporaries thought (section 29). The second group offers seventy-two new propositions concerning natural philosophy and metaphysics derived from the parallel study of both Plato and Aristotle (section 30). The third great topic is Pythagorean number mysticism (section 31); the fourth is the area of magic (sections 32–33); the fifth touches upon the cabala (sections 34–37); and, finally, in the sixth group Pico explains his own ideas concerning the prophetic verses of Orpheus and Zoroaster (section 37).

For our present concern, we should concentrate on the propositions relating to magic and the cabala. He continually emphasizes the difference between white and black magic, that is *mageis* and *goétia*. Here he cites Porphyry to assert that the word *magus* in Persian means the interpreter of the gods. From the history of white magic he mentions the ancients (Zalmoxis, Zoroaster, Plato, Apollonius, Hostanes, and Dardanus), the Arab Al-Kindi, and medieval authorities (Roger Bacon and Villiam of Auvergne). All of them practiced a magic that “rouses [the magus] to the admiration of God’s works which is the most certain condition of a willing faith, hope, and love” (section 33, 249). Pico uses a metaphor that reminds one of Ficino: “As the farmer weds his elms to vines, even so does *the magus* wed earth to heaven, that is, he weds lower things to the endowments and powers of higher things” (ibid.). Pico’s image suggests an ambition to join the sympathetic magic of the Middle Ages with the new, hermetic theology.

But how to avoid the mixing of the two magics, white and black? How can the magus preserve his purity during the concrete operations? This is to be achieved with the help of the mystical lore of the Jews, the cabala.

I come now to the things I have elicited from the ancient mysteries of the Hebrews and have cited for the confirmation of the inviolable Catholic faith. [. . .] Not only the famous doctors of the Hebrews, but also from among men of our opinion Esdras, Hilary, and Origen write that Moses on the mount received from God not only the Law, which he left to posterity written down in five books, but also a true and more occult explanation of the Law. (section 34, 250)

[In it t]here is the mystery of the Trinity, there the Incarnation of the Word, there the divinity of the Messiah. . . . (section 36, 252)

Although the *Oratio* . . . does not say more about the connection of magic and the cabala, from the *Conclusiones magicæ* one can see that for Pico it was the cabala that could ensure the safe handling of magic. The reason for this was that the cabala dealt only with the sacred names of God and the angels, with the sacred letters of the “holy tongue,” and so because of its medium could not turn in any dangerous direction.

As we know, John Dee had an 1532 edition of Pico’s nine hundred theses (R&W 974, B121). What could he have found crucial in them and in the introductory *Oratio* . . . ? To begin with, certainly the bold and daring spirit advocating philosophical and theological syncretism and at the same time fervently rejecting the charges that his experiments could be termed as black magic. Dee also might have been attracted by the lofty, sometimes nearly poetical diction of the introduction in describing the *exaltatio*—a style toward which he himself often tended. As for the theses, they were written in Dee’s favorite scientific genre, a series of theorems such as he used to express his ideas in the *Propædeumata aphoristica* and the *Monas hieroglyphica*. Furthermore, in Pico’s work he could find references to a mix of classical, Arabic, and Christian authors, and he also could gain inspiration to look into the hermetic writings as well as the cabala. Last, but not least, in the *Oratio* . . . one finds some of Dee’s crucial iconographical-ideological motifs, like the mention of Jacob’s ladder and several references to Enoch’s translation from earth to the throne of God and his conversations with angels.

To summarize, in the magical ideology of the Florentine neoplatonists, we can see that the texts I have reread as Dee’s possible sources were rich in theoretical observations and programmatic recommendations, although they provided little in the way of technological advice in practical directions. This could follow because of several reasons, including the natural caution of theologians and the fact that natural science in fifteenth-century Italy was not in the forefront of investigations. Thirdly, the neoplatonist orientation, in fact, worked against the pursuit of systematic experimentation, since Platonism always favored theoretical speculations and metaphoric expression as opposed to more rationalistic Aristotelianism. In this respect even Pico, who tried to reconcile Plato and Aristotle, is more a Platonist than an Aristotelian, at least in this early period of his career. Later, when he started criticizing judicial astrology, for example, his argumentation became more critical and analytical (*Disputationes adversus astrologiam divinatricem*, 1496).²¹

The sixteenth century brought significant changes in the status as well as in the practice of Renaissance magic. For a while the Scientific Revolution found it inspiring to incorporate magical ideas: this transitional period from the organic to the new mechanical world picture can be dated from the 1510s to Newton's synthesis at the end of the seventeenth century.

Beside the Scientific Revolution, other cultural-historical factors, such as the revolution in Renaissance art and esthetics, the great religious Reformation, the period of eschatological-chiliastic prophecies, and the information explosion resulting from printing, all contributed to the spreading and changing of magical concepts. In the next chapter I shall look at the symbolical-metaphorical systems of a few sixteenth-century magical thinkers—Trithemius, Agrippa, Paracelsus, and Postel—who belonged to the generation immediately preceding Dee and whose works seem directly to have influenced the intellectual development of the English Doctor.

5

Occult Philosophy, Symbolism, and Science

During the sixteenth century the pious and speculative magic that characterized the works of the earlier Renaissance humanists, such as the Florentine philosophers, radically changed from the enthusiastic study of the ancient texts containing the *prisca theologia* to an ambition to influence and manipulate the supernatural powers.

When recognizing this, one has to be careful not to jump to early conclusions. The changes did not occur as a line or development from Florentine hermeticism to Agrippan magic, as Frances Yates tried to make us believe. While undoubtedly appreciating the neoplatonist magi, the next generation also capitalized on dark medieval practices that were quite unimaginable to their humanist mentors. Later I shall propose a hypothesis as to why these changes took place, but first let us see some of the details of this new magical pattern in early modern European thinking.

TRITHEMIUS AND ANGEL MAGIC

John Dee admittedly found Trithemius' *Steganographia* to be the greatest inspiration in his own recourse to magical philosophy and theology. In 1562 he visited Leuven, one of his favorite cities, a center of learning which he had already visited several times before. Perhaps it is here that he wrote the unpublished "Cabbalae Hebraicae compendiosa tabella" (Roberts and Watson 1990, 76), which shows his rising interest in the cabala and angel theology. At that time he purchased manuscripts of

astronomical and astrological interest (R&W M119, M120), some books on Hebrew grammar (R&W 1600, 1612), and Jacques Gohory's deeply hermetical *De usu & mysteriis liber* (Paris 1550), which dealt with number symbolism and preserves Dee's annotations on the Monad. Probably this is the intellectual context from which the idea of the *Monas hieroglyphica* sprang and it must have been catalyzed by his acquaintance with the work of Trithemius, as we learn from Dee's letter written to his patron, Sir William Cecil, dated from Antwerp in February of the following year.¹

This letter is an excellent specimen of Dee's humanist style where personal information, scholarly speculations, and passages considering the politics of patronage are melded together:

Briefly to place before your eyes the chief of my requests, thus standeth my case. [. . .] Wherein our country hath no man hable to set furth his fote, or shew his hand: as in the science *De numeris formalibus*, the science *De ponderibus mysticis*, and the science *De mensuris divinis*: (by which three the huge frame of this world is fashioned) [. . .] after my long serche and study, great cost and travaile have fallen under my perseverance and understanding. (Dee 1854, 6–7)

The quoted passage clearly shows the directions of Dee's scholarly interest at that time: formal mathematics, occult mysticism, and the question of divine measures—all aspects that feature in the *Monas hieroglyphica*. In the following section Dee speaks about his own plans: he prepares to publish a work of his own but is still in search of a suitable printer. After politely asking for further sponsorship from Cecil, he comes to the most important piece of information:

Already I have purchased one boke, for which a thowsand crownes have ben by others offred, and yet could not be obteyned; a boke whose use is greater than the fame thereof is spread; the name thereof to you is not unknowne. The title is on this wise, *Steganographia Trithemij*. . . . (9–10)

We learn furthermore that he employed a Hungarian nobleman to copy this book, which ultimately would become a present to his patron: "I give unto your Honor, as the most precyous juell that I have yet of other mens travailes recovered" (11).

Johannes Trithemius (1462–1516), the Abbot of Sponheim, is one of the most important Renaissance thinkers who devoted himself consciously

to the study of angelology, seeking to syncretize the medieval traditions with that of the new neoplatonist philosophy.² At first sight his *Steganographia* (written in 1499 but published only in 1606) looks to be a work on writing systems and cyphers; in fact, is an interesting example of applied magic.³ In Trithemius' system, alchemy, cabalistical number symbolism, and magic are united and magic is interpreted as the means of *exaltatio*, the theologically justifiable mystical elevation to God.

This clearly seems to be connected with Pico's theory of magical illumination, but Noel Brann in his new monograph on Trithemius' magic differentiates among his sources according to Patristic and medieval demonology on the one hand and medieval and early modern defenses of magic on the other (1999, 13–33). Brann discusses Trithemius' demonological vision and occult vision in separate chapters, suggesting that his angelology had stronger ties to the medieval monastic heritage, while his complex occult philosophy was more the product of the Renaissance.

In a letter addressed to his humanist friend, Arnold Bostius, Trithemius himself heralded his *Steganographia* as follows:

[it will] teach very profound, marvelous, and incredible things to all who are ignorant of them, things which have never been heard of by this age. [. . .] If ever published, will be marveled at by the entire world. . .⁴

As he informed Bostius, the first book would deal with a hundred ways of secret writing, the second with ways of sending messages through great distances "without words, without writing, even without signs"; the third book would demonstrate a new and extremely fast way of teaching Latin; while the last book would be devoted to the transmission of thoughts from one person to another, totally secretly, even in the company of others.

The author had considerable misfortune with his letter to Bostius: because of the death of the addressee it was misdirected and became public, appalling many conservative church authorities, even humanists. A further blow was the visit of the famous French humanist and philosopher of the Great Chain of Being, Bovillus (Charles de Bouelles), to Sponheim, where Trithemius tried to convince him about his magical ideas. Bovillus, although not insensitive to the hermetic philosophy,⁵ seems to have disapproved totally of what was presented by Trithemius. As he wrote to their mutual friend, Germaine de Ganay, another humanist interested in magic, the unaccustomed names of spirits and the demonological procedures described in the *Steganographia* terrified him, and his overall conclusion was that Trithemius was "a magician who is not in the least

degree distinguished in philosophy.”⁶ In this letter he also went into details concerning the Abbot's angelic magic, which consisted of designating the names of spirits for conjurations according to various ranks (emperors, dukes, counts, and servants) and associating them with the twelve regions of the world as well as the forty winds of the universe. At this point Bouelles remarked that Trithemius seemed to him to be better representing the ancient demon-conjuring Zoroaster than the demon-shunning Christian saints.

Although Bouelles' critique was quite devastating to the reputation of Trithemius, one can imagine to what extent Dee, who possessed ten books by Bovillus including *De intellectu* in the 1510 edition (R&W 311), became interested in the author of the *Steganographia*. In fact, his hierarchies of angels in the *48 claves angelicae* (Dee 1584) and his invocations in the *Tabula bonorum angelorum*; *Fundamenta invocationum* (Dee 1588) had close kinship with the system of Trithemius.

Abbot Trithemius was not deterred from his devotion to angelic magic by the criticisms. Just the opposite, in his last years he went on defending, expanding, and explicating his magic in his autobiographical tract, *Nepiachus*, his appendix to his main work, *Clavis steganographiae*, and in various letters written to patrons and fellow scholars. Brann summarizes this last phase of Trithemius' career as follows: “The apologetic strategy adopted by Trithemius went beyond arguing for a mere toleration of magic by Christians, after removing magic from the exclusive domain of the demons, of putting it in the service of Christian theology. [. . .] In this more sublime sense, Trithemius determined, the essential affiliation of magic is not with the secular arts and sciences, but with the religious quest for God” (1999, 90).

In Trithemius' magical system, alchemy, magic, and cabalistical number symbolism are intermingled, and—similar to Pico's strategy—he defends magic by relegating it to the sphere of the highest intellectual activities. As he describes *exaltatio*:

The alchemists make promises with reference to compound bodies, but they err; they are deceived, and they deceive everyone who willingly listens to them. They want to imitate nature and to divide what is exclusively a whole, since they do not understand the basis of virtue and nature. [. . .] Our philosophy is not earthly but rather celestial so that we might perceive that highest principle, which we call God. [. . .] The mind is free; it does not follow motion, but rather a supercelestial principle by which it was created and by which it communicates so much. (*Epistolarum familiarum*, 1536, 90–93; quoted by Baron 1978, 95)

Trithemius had a discordant personality, similar to the other protagonists of my book who contributed to the development of Renaissance magic. On the one hand, he was a widely read and highly cultured humanist who also had a visionary, perhaps somewhat frantic mind, for whom the ultimate evidence could only be supernatural revelation. This dilemma could be associated with what Deborah Harkness calls the “crisis of the Book of Nature” (1999, 64–71). However, for Ficino, Pico, and also for Trithemius, this revelation did not result from sacred simplicity, but rather from the cognitive faculties of the human intellect. According to the train of logic of the following quotation, Trithemius appears as almost a forerunner of the rationalism of Hobbes and Locke, except, of course, for his clinging to the final revelation:

Study generates knowledge; knowledge bears love; love, likeness; likeness, communion; communion, virtue; virtue, dignity; dignity, power; and power performs the miracle. This is the unique path to the goal of magic perfection, divine as well as natural. (*Epistolarum familiarum*, 92; Thorndike’s translation, 1923–1958, 6:439)

The quotation embraces knowledge, *exaltatio*, and power, constituting a “holy trinity” of the magi. The scholarly way of illumination for Trithemius leads through mathematics and Pythagorean number symbolism, enriched by the numerology of the cabala. In this respect his main sources were Pico and the greatest Hebraist of the Renaissance, Reuchlin, who devoted two books to the occult mysteries of the cabala⁷ and to whom Trithemius referred as his mentor.

The speculative theology of Trithemius was built on a paradigm that aimed at developing the variety embedded in the duality of the world through the trinity into a sacred unity. The soul, aspiring toward this sacred sphere, could elevate itself to the metaphysical world only by comprehending the mysteries of nature, especially of numbers. Although, according to his letter to Ganay, quoted above, Trithemius seemed not to approve of practical alchemy, he extensively referred to the *Tabula smaragdina*, which he interpreted not simply as an alchemical recipe, but as a concise mystical cosmology. In this context he repeatedly used the term *reformatio magica*, “referring to a passage of the soul, on the model of alchemy, through a series of purgative stages to a state of godlike sanctity and ‘enlightenment’ ” (Brann 1999, 116). As we shall see, Dee, in the middle period of his career, employed similar syncretism in constructing the hieroglyphic monad, fusing mathematics and alchemy in order to achieve spiritual *exaltatio*.

One of Trithemius' last works could have influenced the later Dee in constructing his own vision of the angelic world. In 1508 the Abbot of Sponheim addressed a treatise to Emperor Maximilian of Habsburg⁸ in which explained the seven secondary gods or demons moving the seven planets and also offered prophecies concerning world history up to the twentieth century.⁹ Although Trithemius maintained that the human mind was free from the influence of the stars, in his scheme of planetary history (partly borrowed from the thirteenth-century Paduan alchemist Pietro d'Abano) each of the seven planetary spheres is governed by an angel who is also responsible over a historical period, lasting 354 solar years and four lunar months. The angels of the planetary spheres are as follows: Orifiel for Saturn, Anael for Venus, Zachariel for Jupiter, Raphael for Mercury, Samael for Mars, Gabriel for the Moon, and Michael for the Sun (Brann 1999, 134; Thorndike 1923–1958, 6:441). This scheme again may remind us of Dee's *De heptarchia mystica*. Although the Doctor employed different angel names, he also divided his angels into ranks of Kings, Princes, Subjects, and Servants, and one of his admitted aims was to learn about the future history of mankind.

Right after the time of writing his *De septem secundeis* in 1509, Trithemius received yet another visitor with whom he discoursed about magic and the occult sciences. The visitor was the still young German humanist Heinrich Cornelius Agrippa von Nettesheim, who a year later dedicated the first edition of his main work, *De occulta philosophia* (1510), to the aging master.¹⁰

AGRIPPA'S TRIPARTITE MAGIC

If Trithemius' magical experiments pointed much beyond the humble beginnings of Florentine Renaissance magic, Agrippa (1486–1535) could be termed as the Renaissance magus par excellence. He also relied in many respects on the achievements of his predecessors—ancient philosophers, medieval scholars, and contemporary humanists alike. Nevertheless he was able to create a unique system distinguishing him from everyone else dabbling in magic and cabalistical mysticism.

His main works show a curious chronological mismatch: the *De occulta philosophica* was written in 1510, but its definitive edition was published only in 1533, not much before Agrippa's death. His other major work, *De incertitudine et vanitate omnium scientiarum et artium atque excellentia verbi dei declamatio*, on the other hand, was published

twice before that and the paradoxical fact is that while *De occulta philosophia* was meant to be a huge primer in magic, the much slimmer and highly ironic *De incertitudine* . . . in many respects refuted and disavowed his other work published only two years later. Since the two books are almost exact opposites of each other, cultural historians have pondered why the author allowed the publication of his enthusiastic affirmation of magic to happen after he had expressed his scepticism about the topic (Keefer 1988, 618). Before examining this question, I would like to set myself to a general survey of *De occulta philosophia*, naturally concentrating on the theme of *exaltatio*.

De occulta philosophia

Following Dionysius the Areopagite, Agrippa maintained that the universum consists of three worlds: the elemental, celestial, and spirit-worlds. Agrippa classified magical operations according to these spheres, too. His system of magic, however, as Keith Thomas emphasized, needed not only the cosmos of the medieval *magia naturalis*, but also the emphases of Renaissance neoplatonism, such as the doctrine of the dignity of man and the classical notion that the spirit world and the elemental world could melt into each other: "The potentialities open to human ingenuity were greatly enhanced by the tide of Neoplatonism which swept through Renaissance Europe" (Thomas 1971, 265).

The first book of *De occulta philosophia* dealt with elemental, or natural magic, and mostly concerned itself with the sympathies inherent in the organic world model. Next to the questions of *magia naturalis*, however, already on the first pages of the book are references to magical *exaltatio*. Agrippa refers explicitly to magic in a more direct way than Ficino or Pico:

Seeing there is a threefold world, elementary, celestial, and intellectual, and every inferior is governed by its superior, and receiveth the influence of the virtues thereof, so that the very original, and chief Worker of all doth by angels, the heavens, stars, elements, animals, plants, metals, and stones convey from itself the virtues of his omnipotency upon us, for whose service he made, and created all these things: wise men [i.e. *magi*] conceive it no way irrational that it should be possible for us to ascend by the same degrees through each world, to the same very original world itself, the Maker of all things, and First Cause, from whence all things are, and proceed; and also to enjoy not only these

virtues, which are already in the more excellent kind of things, but also besides these, to draw new virtues from above. Hence it is that they seek after the virtues of the elementary world, through the help of physic, and natural philosophy in the various mixtions of natural things, then of the celestial world in the rays, and influences thereof, according to the rules of astrologers, and the doctrines of mathematicians, joining the celestial virtues to the former: moreover, they ratify and confirm all these with the powers of divers intelligencies, through the sacred ceremonies of religion. (1.1; Agrippa 1997, 3)¹¹

When discussing the connections of natural sympathies and the spirit world, Agrippa arrives at the question of talismanic magic already treated by Ficino. For example, if you want to capture the power of the Sun, seek those things that are solar:

amongst vegetables, plants, metals, stones, and animals, these things are to be used, and taken chiefly, which in a solary order are higher. So thou shalt draw a singular gift from the Sun through the beams thereof, being seasonably received together, and through the Spirit of the World. (1.34, 105)

Chapter 37 summarizes the system of the Great Chain of Being, giving at the same time an exact definition of magic. Citing the Platonists, Hermes Trismegistus, and Jarchas the Brahmin,¹² he states that everything existing in the elementary world has a counterpart in the celestial sphere, too. The middle nature, or quintessence that keeps together the Chain of Being, is generated in turn by the ultimately superior highest Archetype:

Now the first image of God is the world; of the world, man; of man, beasts; of beasts, the zeophyton i.e. half-animal and half-plant; of plants, metals; of metals, stones. And again in things spiritual, the plant agrees with a brute in vegetation, a brute with a man in sense, man with an angel in understanding, an angel with God in immortality. Divinity is annexed to the mind, the mind to the intellect, the intellect to the intention, the intention to the imagination, the imagination to the senses, the senses at last to things. (1.37, 110)

This chapter also emphasizes the bi-directional nature of this organic communication, which suggests the understanding of the entire cosmos as a homogeneous whole. This homogeneity is exploited by magic:

Hence everything may be aptly reduced from these inferiors to the stars, from the stars to their intelligences, and from thence to the First cause itself; from the series, and order whereof whole magic, and all occult philosophy flows. (ibid.)

As we shall see, John Dee spoke about the cosmos as a well-tuned lyre on which the magus can play. His thought might go back to Agrippa, who also states in Chapter 37 that

For so inferiors are successively joined to their superiors, that there proceeds an influence from their head, the First Cause, as a certain string stretched out [. . .] of which string if one end be touched, the whole doth presently shake, and such a touch doth sound to the other end, and at the motion of the inferior, the superior also is moved, to which the other does answer, as strings in a lute well tuned. (1.37, 111)

Based on the doctrine of sympathies, then, natural magic can manipulate powers from this world as well as from the world of demons (1.39). Witchcraft using magical power, the wearing of magic rings and amulets, even the some practices of raising the dead are treated under this field of occultism (1.42–48).

After discussing the general features of the tiers of the cosmos, Agrippa comes to treating of the microcosm, man. Here he speaks of those human faculties that are capable of magical operations. Among others, he mentions the power of dreams that arise either from the memories of real experiences or can be sent by spiritual agencies. As a consequence, our emotions may greatly intensify even to the extent of changing our physical shape, transposing our body to faraway places or influencing magically other human beings. He underscores here the communicative power of language:

It being showed that there is a great power in the affections of the soul, you must know moreover, that there is no less virtue in words, and in the names of things, but greatest of all in speeches. (1.69, 211)

Uttered words have magic power, especially proper names: “That proper names are very necessary in magical operations, almost all men testify” (1.70, 213). Stronger than proper names are “sentences,” such as enchantments, invocations, orations, conjurations, and the like (1.71). Book One closes with a review of these, which are treated again under ceremonial magic in Book Three.

Book Two starts with a discussion of mathematical magic, and discusses the power of numbers:

Severinus Boethius saith, that all things which were first made by the nature of things in its first age, seem to be formed by the proportion of numbers, for this was the principal pattern in the mind of the Creator. Hence is borrowed the number of the elements, hence the courses of times, hence the motion of the stars, and the revolution of the heaven, and the state of all things subsist by the uniting together of numbers. Numbers therefore are endowed with great and sublime virtues. (2.2, 237)¹³

Mechanics and optics are based on abstract mathematical science and are capable of creating wonders. Such were the automata of Dedalus, the speaking statues of Hermes Trismegistus,¹⁴ the flying wooden dove of Arthita, and all the optical miracles reported by classical and medieval authorities (2.1). This enthusiasm for mechanics and optics would be very important in forming John Dee's *Mathematical preface*, too. Dee himself created such a "mechanical wonder," a flying scarabeus that was used at a school drama performance in Cambridge and earned for its creator the fame of "conjuror," as Dee often complained (e.g., Dee 1851, 5).

This Agrippan *magia naturalis* is the territory that links theological magic with the new, rising, natural sciences. This is the terrain in which the occult fantasies of Roger Bacon through to Leonardo da Vinci, della Porta, and Francis Bacon were almost freely mixing with surprisingly rational propositions. Take, for example, Agrippa's sober remark:

Therefore [people] seeing any wonderful sight, do impute it to the Devil, as his work, or think it is a miracle, which indeed is a work of natural, or mathematical philosophy. [. . .] But here it is convenient that you know, that as by natural virtues we collect natural virtues, so by abstracted, mathematical, and celestial, we receive celestial virtues, as motion, life, sense, speech, soothsaying, and divination, even in matter less disposed, as that which is not made by nature, but only by art. (2.1, 234)

The second part of the quotation also shows that rationally approachable natural science only partially excites Agrippa. His main concern is the manipulation of natural and supernatural forces by magical means, which in this chapter he identifies with abstract, mathematical formulas. And since the most divine kind of numerology is the cabala, Book Two exten-

sively deals with the possibilities of synthesizing Christian philosophy and Jewish number symbolism. Chapter 2.27 offers a memorable image of the microcosm, based on mathematical-poetical iconography:

Seeing Man is the most beautiful and perfectest work of God, and his image, and also the lesser world; therefore he by a more perfect composition, and sweet harmony, and more sublime dignity doth contain and maintain in himself all numbers, measures, weights, motions, elements, and all other things which are of composition. [. . .] From hence all the ancients in time past did number by their fingers, and showed all numbers by them; and they seem to prove that from the very joints of man's body all numbers, measures, proportions, and harmonies were invented; hence according to this measure of the body, they framed, and contrived their temples, palaces, houses, theaters; also their ships, engines, and every kind of artifice. [. . .] Moreover God himself [. . .] made the whole fabric of the world proportionable to man's body; from hence it is called the great world, man's body the less. (2.27, 345)

Book Three of ceremonial magic begins with passages emphasizing the importance, power, and usefulness of religion. Interestingly, Agrippa does not classify magic within the larger system of religion, just the opposite: "The religious operation obtains no less efficacy which oft-times of itself alone is sufficiently powerful for us to obtain this deifying virtue . . ." (3.3, 449). And, of course, needless to say, magic in association with religious rites has no other purpose than to achieve the *exaltatio*:

Now we will declare a mystical and secret manner, necessary for everyone who desireth to practice this art, which is both the beginning, perfection, and key of all magical operations, and *it is the dignifying of men* to this so sublime virtue and power, for *this faculty requireth in man a wonderful dignification*. (3.3, 448; emphasis mine)

Since a true magus needs to know God as much as possible, lengthy theological discussion is inserted here on the nature of God, on his names and their power (3.12), about the heavenly spirits (3.15), then of about three types of intelligences and *daemons* (undoubtedly based on Iamblichus and Proclus, cf. 3.16) and the types of malevolent demons (3.18). In discussing Dee's angel magic, it will be useful to return to these chapters for further scrutiny. Another chapter on the language of angels also points toward Dee's occultism. This language, according to the ancients, could

be nothing but Hebrew, since "that was the first of all, and came from heaven, and was before the confusion of languages in Babylon [. . .] and seeing all tongues have, and do undergo various mutations, and corruptions, this alone doth always continue inviolated" (3.23, 530). As opposed to the above view, Agrippa speaks about the angelic language without trying to tie it to any existing human idiom: "that instrument, whatsoever the virtue be, by which one spirit makes known to another spirit what things are in his mind, is called by the apostle Paul the tongue of angels" (ibid.).

As for concrete magical operations, the magus needs to be in contact mostly with inferior spiritual orders. Agrippa, just like Faustus in the legend, was most interested in the possibility of regulating natural forces by occult means:

I have seen and known some, writing on virgin parchment the name and seal of some spirit in the hour of the Moon: which when afterward he gave to be devoured by a water frog, and had muttered over some verse, the frog being let go in the water, rains and showers presently followed. I saw also the same man¹⁵ inscribing the name of another spirit whith the seal thereof in the hour of Mars, which was given to a crow, who being let go, after a verse muttered over, there followed horrible thunders with thick clouds. Neither were those names of spirits of an unknown tongue, neither did they signify anything else but their offices. Of this kind are the names of those angels, Raziel, Gabriel, Michael, Raphael, Haniel. . . (3.24, 532)

Since Agrippa devoted all three of his books to the overlapping systems of the macro- and the microcosms, Book Three also has chapters relating directly to man. While Book One discussed the elemental composition of the body and Book Two pondered the mystical numerology of its proportions, Book Three concentrates on the act of creations and on the power of the human intellect. The ideology of this part follows quite closely Pico's *Oration*, adding to it the description of concrete magical procedures.

The creation of man is presented more on the basis of the *Corpus hermeticum* than on the Bible. Agrippa's man is strong and determined, before everything he needs to know himself (as if following the ancient Platonic advice: know thyself!)—but this knowledge should lead to the perfect knowledge of God, too: "Whosoever therefore shall know himself, shall know all things in himself; especially he shall know God, according to whose image he was made" (3.36, 580). The process of

deification, or *exaltatio*, is compared here to spiritual alchemy, the kind of transmutation already mentioned by the Arabic philosopher, Geber:

And Geber in his Sum of Alchemy¹⁶ teacheth, that no man can come to the perfection of this art, who shall not know the principles of it in himself; but how much the more everyone shall know himself, by so much operateth greater and more wonderful things, and will ascend to so great a perfection, that *he is made the son of God, and is transformed into the image which is God, and is united with him, which is not granted to angels*, the world, or any creature, but to man only. (3.36, 580; emphasis mine)

The hermetic *exaltatio* of Ficino and Pico here is explained with the precision of a scientist:

Man being united to God, all things which are in man, are united, especially his mind, then the spirits and animal powers, and vegetative faculty, and the elements are to the matter, drawing with itself even the body [. . .] even until it be glorified into immortality. (3.36, 580)

From this special status of man it follows that it is difficult to learn about the nature of the two components of his existence: the immortal soul and the mortal body. It is especially difficult to find out what happens to these after death. Agrippa devotes a number of chapters to the theories concerning the immortality of the soul and he touches upon those instances when dead souls cannot rest and return to this world. The magical aspect of this problem, according to Agrippa the highest degree of ceremonial magic, is the calling of these spirits by magicians for help in various worldly matters: "By what ways the magicians and necromancers do think they can call forth the souls of the dead" (3.42). It was especially because of this part of *De occulta philosophia* that Agrippa was known in the Renaissance as a sorcerer and a dangerous heretic. This must be the reason why he became Faustus' teacher in Marlowe drama and why a notorious sixteenth-century compendium of black magic was published as "The Fourth Book of Cornelius Agrippa." This book came out sometime after Agrippa's death, and scholars have ruled out that he could have written it. Johann Weyer, the "doctor of witches," also rejected this possibility. "The Fourth Book" nevertheless relies on Agrippa's genuine work and this similarity must have contributed to the bad reputation of the German humanist.¹⁷

John Dee's library catalogue proves that he possessed the 1550 Basel edition (R&W 742) which contained the spurious "Fourth Book" as well as

other important treatises on ceremonial magic, such as Peter of Abano's *Heptameron*, "Ratio compendiarie Magiae naturalis ex Plinio," "Disputatio de Fascinationibus," "De incantatione et Adiuratione, Epistola incerti authoris," Trithemius' Apologetical Letter from the preface of his *Steganographia* as well as his *Octo questionum*, and, finally, "Diversa divinationum genera." To put it simply, quite a primer in magical and divinatory practices.¹⁸

According to the literature of magic, *necromantia*, or the calling of dead spirits, belongs without dispute to the terrain of black, diabolical practices. Agrippa himself wrote so in *De occulta philosophia*, yet in spite of this, he treats the subject at suspicious length. He classifies necromancy into two categories: *nekyomantia*, which raises the dead body and employs the blood of the deceased, and *skiomantia*, in which case only the shadow of the spirit is invoked.

To conclude, it worketh all its experiements by the carcasses of the slain, and their bones and members, and what is from them, because there is in these things a spiritual power friendly to them. Therefore they easily allure the flowing down of wicked spirits, being by reason of the similitude and propriety very familiar: by whom the necromancer strengthened by their help can do very much in human and terrestrial things, and kindle unlawful lusts, cause dreams, diseases, hatred and such like passions. (3.42, 606)

Witches, says Agrippa, can easily use these unfortunate souls "for the effecting of their witchcrafts, alluring these unhappy souls by the apposition of their body or by the taking of some part thereof, and compelling them by their devilish charms" (ibid.).

After having plunged into the appalling details of black magic, Agrippa then returns to sacred theurgy and tries to include even the act of raising the dead within the highest level of white, ceremonial magic:

He which would restore the souls truly to their bodies, must first know what is the proper nature of the soul from whence it went forth, with how many and how great degrees of perfection it is replenished. [. . .] To conclude, by what influences the body may be knit together again for the raising of the dead, requireth all these things which belong not to man but to God only, and to whom he will communicate them, as to Elishai who raised up the son of the Shunamite; so also Alcestis is reported to have been raised by Hercules; and Apollonius Tyanensis restored a dead maid to life. (3.42, 606)

The general conclusion of the monumental work restates the sacred and dignified nature of magic, which aims at using the secrets of nature for the glory of the Creator. On the one hand, Agrippa mentions magic as a kind of natural science, requiring systematic research:

Some of these things are written in order, some without order, some things are delivered by fragments, some things are even hid, and left for the search of the intelligent, who are more acutely contemplating these things which are written, and diligently searching, may obtain the complete rudiments of the magical art. (3.65, 677)

On the other, however, he emphasizes the need for purity because the secrets of the art coded in special symbols cannot be comprehended otherwise. Those who are deserving will be rewarded with incredible gifts: “those virtues will appear to you, which in times past Hermes, Zoroaster, Apollonius, the others, who wrought miracles, obtained” (ibid.).

Although, according to some scholars, Agrippa’s work lacks originality and is in many places confused and fragmentary, one can consider it the most comprehensive, encyclopedic *summa* written in the Renaissance. In it the author tried to present whatever he could gather from a great many different traditions of magic: classical sympathetic magic and demonology, late Hellenistic hermeticism, Arabic magic, medieval *magia naturalis*, and ceremonial magic framed by the ideology of Florentine Neoplatonism, especially its doctrine of *exaltatio* and the dignity of man.

Like most humanists, Agrippa included a great many examples in his work which are rather surprising for the modern reader. It seems that, like other humanists, the author had no scruples about the tales and anecdotes of the classical authorities. The stories of Pliny and other unreliable sources make a sharp contrast to Agrippa’s own serenity and lofty enthusiasm.

Agrippa’s magic is perhaps more a theology than natural science; nevertheless, it shows a great deal of rationality and analytical faculty in discussing many questions (see the chapters on mechanics and optics and on language and the psyche). Intellectual historians belonging to the Warburg school tried to approximate Agrippa’s magic to science and discuss it as a subchapter in the history of Renaissance natural philosophy, a grounding of the Scientific Revolution (cf. Yates 1964, and 1979, 37–49; Debus 1978, 13, 19; Webster 1982, 27), but one should note that by the 1980s this opinion became greatly refined.¹⁹ During the hermeticism debate, science historians argued that the occult philosophy played only a marginal role in

the development of the Scientific Revolution. Though it may be true from a strictly scientific viewpoint, the general intellectual historian still feels bemused by Agrippa's occasional efforts to draft hypotheses in a clear and concise language. On these occasions he also shows his irony which gleams like that of the greatest humanists:

According to the opinion of Synesius, seeing there are the same accidents to things, and like befall like; so he which hath often fallen upon the same visible thing, hath assigned to himself the same opinion, passion, fortune, action, event, and as Aristotle saith, the memory is confirmed by sense, and by keeping in memory the same thing knowledge is obtained, as also by the knowledge of many experiences, by little and little, arts and sciences are obtained. After the same account you must conceive dreams. [. . .] By this means shall a diviner be able by little, and little to interpret his dreams, if so be nothing slip out of his memory. (1.59 "Of divination by dreams," 186)

This humanist irony occasionally appears in the chapters of *De occulta philosophia*, but its real feat can be observed in his other famous work, *De incertitudine et vanitate omnium scientiarum*. Although the latter does not appear in Dee's library catalogues as a separate item, it is difficult to imagine that—with several copies of *De occulta philosophia*—he would not have known about it, especially since many chapters of *De incertitudine . . .* were attached as appendix to *De occulta . . .* (under the title: "The censure or retraction of Henry Cornelius Agrippa, concerning magic, after his declamation of the vanity of sciences, and the excellency of the word of God," Agrippa 1997, 689).²⁰ Since *De incertitudine . . .* also exercised great influence on the imagination of the sixteenth century, I shall discuss it, too.

De incertitudine et vanitate omnium scientiarum

Charles Nauert devoted a voluminous study to the philosophy of Agrippa and developed the following thesis as the backbone of his argument: the appearance of magical themes in Renaissance philosophy displayed the crisis of early modern thought and the very same crisis can be detected in the fact that Agrippa's two main works were so much the opposites of each other (cf. Nauert 1965). Nauert's monograph was written at the height of the so-called mannerism debate that characterized the 1960s

and early 1970s.²¹ At one point in this debate even the whole Reformation was interpreted as a crisis phenomenon of the Renaissance. I do not think that the entirety of Agrippa's magic could be interpreted as a product of crisis; rather, *De occulta philosophia* represents one of the peaks of the occult philosophy as developed by the sixteenth century. If we speak about crisis, I see it in one specific area, indeed. Although Agrippa and others tried to meticulously separate white from black magic, that proved to be a futile effort and subsequently led to a feeling of uncertainty and discomfort. Combined with other aspects of the growing intellectual crisis toward the end of the sixteenth century, these opinions can naturally be interpreted as characteristic features of mannerism.

In any case, when trying to find clues for the contradictions in Agrippa's work we must proceed to a more refined micro-analysis of *De incertitudine*. . . ²²

The general tone of the work, which consists of over one-hundred short chapters, is sarcastic irony, found first in the preface where the author compares himself to Hercules, brave enough to attack the sciences. And he is aware of the expected consequences:

I well perceive what a bloody battle I have to fight with them hand to hand, and how dangerous this fight will be, seeing that I am beset on every side with an army of so mighty enemies. O with how many engines will they assail me, and with how many shames and villainies will they load me? [. . .] The obstinate Logicians will cast against me infinite darts of syllogisms; the long-tongued Sophisters, which wrest to every part their talk, with intricate snares of words, like a bridle, will stop my mouth. The Musicians with their many tunes will make me a laughing stock through the streets, and with jarring sounds and unpleasant ringing of pans, basins and dishes will trouble me more than they are wont at their weddings which be twice married [. . .]. The vain worker in the art Perspective will engrave and depaint me more brutish and deformed than an ape, or Thersites; [. . .] the monstrous Gunner will cast against me the revenging flames of Jupiter, and the fire of lightning. [. . .] The monstrous Magicians will transform me, as it were another Apuleius or Lucian, into an ass, yet not of gold, but perchance of dirt. The black Necromancer will persecute me with spirits and devils; [. . .] the circumcised Cabalists will wish me their fore-skin; [. . .] the almighty Bishops will reserve my sins for everlasting fire. [. . .] The obstinate Divine Sophistical Doctors will call me heretic, or compel me to worship their idols; our grim masters will enforce me to recant. . . . (Agrippa 1575, Av-iAii^v)

In the second half of the preface Agrippa reveals his motivation in attacking all the human sciences:

Now, Reader, thou perceivest through how many dangers I shall pass. Yet I hope easily to escape these assaults if you, supporting the truth, and setting envy apart, shalt come with a gentle mind to the reading of these things. Beside this, I have the Word of God wherewith to defend myself. [. . .] Furthermore, in many, and almost in all places of study, a perverse custom and damnable use is grown, in that they bind with an oath the scholars which they receive to teach, never to speak against Aristotle, Boethius, Thomas, Albert, or against any other of their scholars, being accounted as a god, from whom if a man differ a finger breadth in thought immediately they will call him heretic, a sinful person. [. . .] These then so unadvised giants and enemies of the holy scriptures are to be assaulted, and their fortresses and castles ransacked; and to declare how great a rashness and presumptuous arrogance it is to prefer the schools of philosophers before the Church of Christ. (Ai^v)

After this strictly orthodox introduction, he rejects scientific research in general. Referring to the doctrines of deification that several authors associate with the advancement of learning, Agrippa states that learning plays no part in salvation and in fact hinders it. He provides two arguments: since all sciences are based on certain basic principles, without those knowledge collapses, meaning that finite investigation cannot grasp the infinite truth. Furthermore, all scientists are tyrants, who enforce their opinion on men rather than offering honest and convincing reasoning.

In a similar style, the following chapters condemn logic, natural philosophy, politics, church government, medicine, law, even theology:

Lastly it resteth to speak of divinity. [. . .] But let us speak first of scholastical divinity, which doctrine was first made by the Sorbonistes of Paris, with a certain mixture of God's worde and philosophical reasons, fashioned like two bodies, as if were of the Centaurs kind. [. . .] Hereof it is come to pass that the high science of school divinity is not free from error and naughtiness, so many sects, so many heresies have the wicked hypocrites and hair-brained sophisters brought up. (chapter 97, 168^v–171^v)

In the middle of the work several chapters are devoted to the magical arts. These (chapters 41 through 48) were also appended to the 1533 edition of *De occulta philosophia*, perhaps to camouflage the radicalism of

that work. Interestingly, although he criticizes the practices dealing with magic, he finds little condemnable in the principles of the occult arts. “Of Magic in general” Agrippa says:

Magic therefore comprehending all philosophy, natural and mathematical, joins the powers of religions to them. Hence also they contain in them goetia, and theurgia, for which cause many divide magic into two parts, viz. natural and ceremonial. (chapter 41, quoted from Agrippa 1997, 689)

The greatest danger of magic, he says furthermore, is that even if it is practiced without the intention of *goetia* or necromancy, wicked spirits may arise instead of the invoked angels. As we shall see, Casaubon argued similarly when condemning John Dee’s angel magic. Although Agrippa is more permissive concerning theurgy, he finally calls it futile: “Now many think that theurgia is not unlawful, as if this be governed by good angels” (chapter 46, Agrippa 1997, 699). Interestingly, he cites Porphyry to deny the possibility of magical *exaltatio*:

Of this theurgia, or magic of divine things, Porphyry disputing at large, at length concludes that by theurgical consecrations the soul of man may be fitted to receive spirits, and angels, and to see God: but he altogether denies that we can by this art return to God. (ibid.)

Here he mentions his own *De occulta philosophia* which he interprets in a new light: “Here is great need of caution, as we have lately discoursed at large in our books of Occult Philosophy” (ibid.). In fact, as I have quoted, in *De occulta* . . . he spoke about magical deification—and the cabala—in the loftiest tone. Here he calls it “pernicious superstition, by the which they gather at their pleasure, defaming the Scriptures, they calumniate the Law of God, and by the supputations of words, syllables, letters, numbers impudently extorted, they assay to bring violent and blasphemous proofs for their unbelief” (chapter 47, Agrippa 1997, 701–02). Let us remember that in the second book of *De occulta* . . . Agrippa did his best to fuse Christian number symbolism and the cabala, developing complicated tables of the principal sacred numbers, always giving the corresponding Hebrew letters, too (“The name of Jehovah with ten letters collected; The name of Jehovah with ten letters extended . . .” 2.12, Agrippa 1997, 288).

The title of chapter 100 in *De incertitudine* . . . is “De verbo Dei” and admits only the Scripture as the receptacle of truth. However, as

Keefer observes, Agrippa does not speak merely about the truth of the Word (that is, Christ, the *Logos*), he also introduces here the concept of a type of illumination which the occult sciences can substitute. To be precise, this illumination can fulfill what magic is incapable of:

[This faith] truly is much higher and more stable than all the credulity of human sciences by as much as God himself is more exalted and more truthful than men. Nay rather God alone is truthful, and every man a liar. [. . .] Indeed God alone contains the fountain of truth, from which he must drink who desires true doctrines: since there is not, nor can be had, any science of the secrets of nature, of the separate substances, much less of God their author, unless it is revealed by divine inspiration. (chapter 100, Agrippa 1575, 177^v)

The quotation suggests that faith is not the ultimate goal, rather a means that opens the gates of sacred illumination and allows man to peep through this entrance into the supernatural world. A passage from chapter 98 seems to confirm this reading. Here Agrippa writes of interpretive theology, acknowledging that he himself does not belong to those elect who have this divine gift. He can only interpret the prophecies, thus trying to get nearer to God. There are, however, more ways than one to interpret prophecies. Agrippa rejects “defining, dividing, and compounding” Aristotelians because God “cannot be defined, or divided or compounded” (quoted by Keefer 1988, 634). The more acceptable way lies

midway between this and the prophetic vision, which is the agreement of the truth with our purged intellect, like a key with a lock. As our intellect is most desirous of all truths, so it is perceptive of all intelligibles, and therefore it is termed the passive intellect [*intellectus passibilis*] by which even if we do not perceive in a full light the things which the prophets set forth, nonetheless the gate is opened to us, [. . .] and it is granted us to read and understand, not with outward eyes and ears, but to perceive with better senses, and with the veil taken away. . . . (Chapter 98, Agrippa 1575 71^v-172)²³

The allusions to the New Testament are obvious here,²⁴ but the reader well versed in hermetic literature can immediately add a complementary text from chapter 13 of the *Corpus hermeticum*, the so-called hymn of light:

Powers within me, sing a hymn to the one and the universe. Sing together, all you powers within me, for I wish it. Holy knowledge, you

enlightened me. [. . .] I thank you, god, power of my energies; through me your word hymns you; through me, O universe, accept a speech offering, by my word. (13.18; Copenhagen 1992, 53)

Chapter 102 of *De incertitudine* . . . is a perplexing digression on the praise of asses (*Ad encomium asini digressio*). Here Agrippa praises the simple ass on which Jesus rode into Jerusalem. Knowledge is the invention of the Serpent, so it is reasonable that Christ invited no rabbis and learned priests as his apostles, rather simple working men who themselves were “asses.”

The conclusion of the work also refers to the asses, and Agrippa calls the pious reader thus:

Wherefore O ye asses, [. . .] be you loosed from the darkness of flesh and blood. If ye desire to attain to this divine and true wisdom, not of the tree of the knowledge of good and ill, but of the tree of life, cast aside the sciences of man. Now entering not into the schools of philosophers and sophisters, but into your own selves, ye shall know all things: for the knowledge of all things is compact in you. . . . (Peroratio, Agrippa 1575, 186)

After putting on this tone of the propagator of holy simplicity and naive illumination, in the last paragraph Agrippa takes yet another turn. By alluding to the wisdom of Solomon and the apocryphal Book of Wisdom, he echoes the hermetic teachings once more:

It is he that hath given me the true knowledge of those things which are, that I might know the disposition of the compass of the earth, the virtue of the elements, the beginning, consummation, middle, and revolutions of times, the course of the year, the disposition of the stars, the natures of living creatures, the anger of beasts, the force of the winds, the thoughts of men, the difference of plants, the virtue of roots, and finally I have learned all things which be hidden or unknown, for the Artificer of all things hath taught me wisdom. (Peroratio, Agrippa 1575, 187^v)²⁵

What is this if not a reminiscence of the *exaltatio* of the magus? This biblical locus, not entirely fitting in with the general tone of *De incertitudine* . . . , makes us aware of Agrippa's possible multiple intentions, showing the work to be much more complex than it looks at first sight. This becomes even clearer if we discover with Keefer Agrippa's conscious misquoting: “In the Vulgate the last words of this passage are

'omnium enim artifex docuit me sapientia.' Agrippa, adding one letter, writes 'sapientiam'—and wisdom becomes, not his teacher, but the content of what he is taught, not an aspect of God, but an instrument of his own desire for power over nature" (Keefer 1988, 640).

After this one could ask if Agrippa really became a sceptic, or rather had he something to hide on the pages of *De incertitudine* . . . ? Pondering this question, Frances Yates noticed some interesting textual parallels (1979, 42–44). She mentioned *The Golden Ass* of Apuleius where the hero has to turn into an ass to rid himself of earthly drag before entering mystical initiation. Similarly, Agrippa leaves behind secular sciences before the sacred illumination. Yates entertained the thought that Agrippa's ambivalent attitude in *De incertitudine* . . . could be interpreted as covert subversion. There were too many attacks against him with charges of black magic, so with a witty humanist treatise he discredited the branches of scholasticism unappreciated by the new learning. With this he testified to his Christian faith and orthodoxy.²⁶ The rejection of traditional sciences by no means guaranteed pious orthodoxy. Faustus, in Marlowe's drama, does something similar and his arguments in his first soliloquy are quite close relatives of Agrippa's sarcastic criticism. Still, out of desperation, Faustus ends up making a pact with Satan. In the light of this possible outcome of the disillusionment with the human sciences, Agrippa's subversion gains unresolved significance.²⁷

Agrippa's scepticism could be rooted in, at least partly, the humanist literary traditions, too. In this respect two possible parallels can be mentioned. The first is Cusanus' *De docta ignorantia* (*Of learned ignorance*, written in 1440), which explains in a quasi-naïve manner that learned ignorance "is a practice and style of mystical contemplation that depends upon a prior commitment to rational knowledge and to the investigation of nature" (Koenigsberger 1979, 125). The second parallel is the *Praise of Folly* (*Encomium moriae*, 1511), written by Agrippa's contemporary and fellow-humanist, Erasmus of Rotterdam. In the *Praise of Folly* Erasmus mocked monastic life as well as scholastic sciences in a manner quite similar to *De incertitudine* . . . The allegorical woman personifying Folly discredits not only the corruption of the church and the stupidity of the monks, but she also rejects sciences from grammar through mathematics to magic. The conclusion of the work is again similar to that of Agrippa: the only firm truth can be found in the Gospels. Erasmus also entertains thoughts on sacred illumination; here he speaks of the "madnesses" of Plato and his concept of illumination is not far from the concepts of Ficino and Pico discussed earlier.²⁸

One can also see interesting biographical connections between Erasmus and Agrippa. While the former was working on the *Praise of Folly* in the house of Thomas More near London, Agrippa also traveled in England (1510). There is no evidence that the two humanists met at that time but later they corresponded on various occasions. In 1530 Erasmus recommended to Agrippa a student who wished to pursue studies in the occult philosophy. In this letter Erasmus also mentioned that he had heard of *De incertitudine* . . . as a “bold work.” Agrippa quickly answered, calling himself an Erasmian and a faithful Christian, and asked for Erasmus’ opinion about his work. The scholar of Rotterdam replied only three years later, already after the publication of *De occulta philosophia*. Erasmus politely praised Agrippa’s scholarship, but made his intention clear that he would not be involved in the debate concerning the German’s magical work.²⁹ In this correspondence we see an Erasmus different from that younger and more enthusiastic scholar who had passionately defended the Christian-cabalist Reuchlin a few decades ago—at about the time when he himself had alluded to neoplatonic *exaltatio* in the *Praise of Folly*. By the 1530s he had become distrustful of number symbolism and other magical and mystical practices.³⁰

We have come closer to the ideological context and the literary models of *De incertitudine* . . . , but so far we have not been able to explain Agrippa’s strategy in publishing his two works in the described manner. His argumentation quite certainly rules out that his purpose with *De incertitudine* . . . was merely to open an ideological safety valve, although the 1533 edition of *De occulta* . . . , especially its paratext, the various prefaces and dedications, definitely reveal some ironic and subversive gestures. In the general preface, “To the Reader,” Agrippa emphasizes that *De occulta* . . . was a product of his foolish youth: “I wrote this being scarce a young man, that I may excuse myself, and say, whilst I was a child, I spake as a child, I understood as a child” (Agrippa 1997, lii). Realizing what logical question would arise from this remark, he immediately puts it up himself: “You may blame me again, saying, behold though being a youth didst write and now being old hast retracted it; what therefore hast thou set forth?” (ibid.). Then he tries to convince the reader that his only purpose with the late publication was to eliminate the danger resulting from the circulation of corrupted manuscripts and prints.

As opposed to this, in his next preface, dedicated to Prince Hermann, Archbishop of Cologne, Agrippa presents his work as a valuable gift to the patron, which has been amended: “You have therefore the work, not only of my youth, but of my present age, for I have corrected many

errata, I have inserted many things in many places, and have added many things to many chapters" (Agrippa 1997, lx).

Swinging in the opposite direction, in the first chapter, Agrippa humbly says, again:

I know not whether it be an unpardonable presumption in me, that I, a man of so little judgement and learning should in my very youth so confidently set upon a business so difficult, so hard, and intricate as this is. (1.1; Agrippa 1997, 3)

And, as we already know, in the ensuing several hundred pages of the book the author provides an elaborate and lofty encomium of the magical arts concluding with the appendix, which is his retraction of magic, using the chapters from *De incertitudine*. . . .

I think that among scholars dealing with this problem Michael Keefer has come nearest to a solution. He has introduced an ingredient in the examination of intellectual magic that has not been much discussed previously, but which I myself find central for the understanding of the occult philosophy, including John Dee's seemingly paradoxical thoughts.

The first element in Keefer's argument is that both of Agrippa's works concentrate on the same notion: the mystical rebirth and the revelatory, illuminative understanding that leads man in his earthly life to comprehend God. To put it simply, the question of *exaltatio*. In this respect Agrippa found a corresponding harmony between the Gospels and the hermetic treatises: for him Matthew, Saint Paul, the fourth and thirteenth tracts of the *Corpus hermeticum*, Plato and Plotinus, and also some medieval mystics spoke of the same thing. As Keefer propounds, in respect to the *exaltatio*, the two works of Agrippa show only a seeming contradiction. The real dilemma for Agrippa must have come, Keefer continues, when he discovered yet another source aspiring for revelatory rebirth, but this source was terrifying and detestable for the devout philosopher. This line of magic pointed toward the Faust legend and its archetype, the story of Simon Magus.

Simon is mentioned in the Acts of the Apostles as somebody who tries to purchase for money the knowledge bestowed by Jesus upon the Apostles. Peter, however, calls him a charlatan and chases him away (Acts 8:9–25). Here we also learn that Simon "used sorcery, and bewitched the people of Samaria, giving out that himself was some great man" (Acts 8:10). The people, entirely taken with him, believed that "this man is the great power of God."

In early gnostic literature the character of Simon became inflated, and the tradition of the early church considered him to be the first gnostic.³¹ According to the legend he was touring Palestine with thirty disciples and a woman called Helena. Finally he turned up in Rome and contested Saint Peter in magical power. First he was defeated in raising the dead, then he tried to fly over the city, but after Peter's fervent prayers he fell. Simon also called his lover, Helena, an incarnation of the Divine Wisdom (Ennoia) who had been captured by her creatures and imprisoned in matter. She had various reincarnations, including Helen of Troy, and, finally, Simon freed her from the body of a harlot of Tyrus. László Kákósy, the Hungarian Egyptologist, points out that this bizarre creation myth interestingly echoes the mystical program of gnosticism, that is, the liberation of the spirit from crude matter (1984, 21).

Patristic sources unanimously stated that Simon's power derived from Satan. All this would not deter the notorious sixteenth-century rebel, Doctor Faustus from expressing his commitment to magic in a terminology deriving from Simon.³² As Keefer has noticed, Agrippa also used Simon's terminology, although not on purpose, and perhaps this was the reason why he became so horrified when recognizing Simon's teachings in his own argumentation, which he intended to follow the *Corpus hermeticum*. As we read in chapter 44 of his book on ceremonial magic,

There is no work in this whole world so admirable, so excellent, so wonderful, which the soul of man, being associated to his image of divinity, which the magicians call a soul standing and not falling, cannot accomplish by its own power without any external help. Therefore the form of all magical power is from the soul of man standing and not falling. (3.44; Agrippa 1997, 614; also quoted by Keefer 1988, 648)

The whole of this chapter is close to tracts 4 and 13 of the *Corpus hermeticum*, but the expression "soul standing and not falling" can only be found in relation to Simon Magus. As Pseudo-Clementine wrote,

By nation [Simon] is a Samaritan; by profession a magician, yet exceedingly well trained in Greek literature; desirous of glory, and boasting above all the human race, so that he wishes himself to be believed to be an exalted power, which is above God the Creator, and to be thought to be Christ, and to be called the *Standing One*. (Recognitiones II.7; quoted by Keefer 1988, 646)

At some point Agrippa had to realize that his work inescapably implied an affiliation between the sacred and the demonic quite contrary to his lengthy effort to clearly separate the two. He was looking for the divine and in successive stages he created a syncretic vision of magical hermeticism and the Holy Writ, scientific investigation and faith, pagan rituals and Christianity, finally to end up with the conceited demonology of Simon. As Keefer concludes: "If Hermetic rebirth and the ideas of Simon Magus are indistinguishable, then the whole effort is compromised: the breaking down of oppositions has been allowed to go too far" (Keefer 1988, 650). Recognizing this, Agrippa may have written the following sentences on jugglers in chapter 48 of *De incertitudine*. . . . These words, significantly, constitute the last sentences of the 1533 edition of *De occulta philosophia*, too:

But let us return to that magic, part of which is an art of juggling, i.e. delusions, which are made according to appearance only, by which magicians show phantasms, and play many miracles by circulatory frauds. [. . .] And now there is by magicians raised a great company of heretics in the Church, who as Jannes and Jambres resisted Moses, do in the like manner resist the apostolical truth. The chief of these was Simon the Samaritan . . . [. . .] But of magic I wrote whilst I was very young three large books, which I called Of Occult Philosophy, in which what was then through the curiosity of my youth erroneous, I now being more advised, am willing to have retracted, by this recantation. [. . .] For whosoever do not in the truth, nor in the power of God, but in the deceits of devils, according to the operation of wicked spirits presume to divine and prophesy, and practising through magical vanities, exorcisms, incantations and other demoniacal works, brag that they can do miracles, I say all these shall with Jannes and Jambres, and Simon Magus, be destined to the torments of eternal fire. (Agrippa 1997, 706)

The abominations of Simon Magus were, of course, well known and publicized also in contemporary popular, moralizing literature. George Whetstone in his *The English Myrror* summarized Simon's overweening pride as follows:

Simon, envying the miracles the Apostle did by grace, he continually studied to doe the like by magicke, and in the ende he grew so famous, as in the time of the Emperour Nero, he was so reuerenced in Rome, as between the two bridges over Tiber, his Images were set up with this superscription, *To Simon the holy God*: Simon being drunken with this admiration of the people, arrogantly offred to contend with S. Peter in doing of myracles. . . . (Whetstone 1586, 60–61)

From a pure moralistic viewpoint Simon's machinations were heresy and damnable pride, but seen with the ambitions of a Renaissance magus, this archetypal narrative embraced the dangerous borderline between holy *exaltatio* and arrogant conceit.

Agrippa's work, then, subverted itself, and in this respect we may accept Nauert's proposition to see in it a product of crisis. This was not, however, the crisis of Renaissance thought, rather, an inherent, built-in contradiction of the doctrine of magical *exaltatio* that Agrippa finally recognized. Although he naturally could not resolve the contradiction, the very fact that he was able to articulate it clearly marked an important step in the history of Western magic. The intellectual dynamism of many of his followers—such as Paracelsus and John Dee—can be seen to have derived from the ambivalence between the sacred and the demonic. And this incertitude catalyzed the birth of such great literary characters as Doctor Faustus and Prospero.

In the title of this chapter I proposed the investigation of magic in relation to the natural sciences. As may be seen, my concern was not that of the traditional historian of science, but I hope to have shown that neither were Agrippa's concerns for traditional scientific experiments or theories. For him magic meant a sacred science of the supernatural in which the highest form of knowledge was revelatory illumination. This science was not the analytical approach of the scholastic natural philosophers; however it did not entirely exclude certain scientific approaches, such as the inclusion of mathematics and astronomy. But even these subjects were filled with symbolic imagery which substituted for induction and deduction.³³

John Dee's natural philosophy was of a similar approach to the physical world. Before I examine it in detail, we shall have to become acquainted with two more topics crucial to the formation of his occult worldview: on the one hand the philosophy and ideology of Paracelsus and on the other the ideas of apocalyptic prophesying that made Enoch a central character in sixteenth-century intellectual discourse.

PARACELSUS, ALCHEMY, THEOSOPHY

In the previous chapter I tried to show how Agrippa's synthetic magic combined the comprehension of the world with a theological approach, uniting *magia naturalis* and ceremonial magic. In the fifteenth century—under the influence of neoplatonism with its theological concerns for the

supreme beauty and the supreme good—the figure of the magus was often associated with artistic creation. “Divine” painters or sculptors, even poets, were thought to be able to create something out of nothing just like a god. By the sixteenth century the image of the creative man was extended to natural scientists, too, and the word *magus* became at least partly synonymous with the word *scientist*. As Paracelsus wrote, “as God created the heaven and the earth, so also the physician must form, separate, and prepare a medicinal world” (*Archidoxa* 10.8; quoted from Paracelsus 1894, 90).

This new type of magus emerged with Trithemius, in whose thought mystical operations such as the conjuration of angels mixed with very practical technical purposes, like telecommunication and distance learning, which also needed the consideration of contemporary scientific ideas. Agrippa in his tripartite magic designated a branch of science for the investigation of each world. The lowest, physical world was to be researched by physics and medicine. Mechanics, for example, had always been intriguing for those who dabbled in magic since man-made machines reminded one of the act of divine creation and coincided with the superhuman ambitions of Renaissance man. I have already mentioned the living statues of Hermes Trismegistus and the *automata* of Heron (page 53 ff), which were seen as magical wonders just as much as the production of gold in alchemy. There were especially three branches of science that became tinted with occult ideas—astrology, alchemy, and *magia naturalis*—and it seems that all important scientific fields had their mystical extension. Applied astronomy could be either navigation or occult astrology; applied chemistry could be metallurgy or occult alchemy; applied mathematics could be algebra or occult numerology. In the background of great scientific discoveries, such as Copernicus’ heliocentric world model or Miguel Servet’s theory of the circulation of the blood, we find inspiration from magical and hermetic theories.³⁴

The most spectacular intertwining of hermeticism, magic, and science can be seen in the natural philosophy of Philippus Aureolus Theophrastus Bombastus von Hohenheim, commonly known as Paracelsus (1493–1541), whose works constituted one of the most important sections in John Dee’s magical library.

Since Paracelsus primarily practiced medicine, it is quite understandable that his magic was nearest to natural science; however, one should also note that his works abound with theological and speculative arguments. He exercised strong and manifold influence on the intellectual discourse of the sixteenth and seventeenth centuries, in spite of the fact

that his violent temper and arrogant style made him largely unacceptable to his contemporaries. The following generations, however, discovered in him a prophetic master, and “Paracelsianism” became one of the catchwords during the time of the Scientific Revolution.³⁵

It has been a relatively recent finding of Dee scholarship to discover the great impression that Paracelsus exercised on the English Doctor. Frances Yates almost entirely neglected this aspect; Peter French briefly mentioned it but did not go into details (1972, 60–61, 76–78, 127–28); and, most amazingly, Nicholas Clulee had only one mention of the German mystic (1988, 141). Dee’s interest in Paracelsus has been brought to light only by the publication of his library catalogues and the editors, Roberts and Watson, devoted considerable attention to this (1990, 11, 36). From the inspection of the catalogues it has turned out that between 1562 and 1582 Dee purchased 92 editions of Paracelsus in 157 copies, in both Latin and German. The only dated survivor among these is a German edition (R&W 1476) that is heavily annotated by Dee. He, in fact, set up separate subsections for his Paracelsica in the library catalogues, such as “Paracelsici libri compacti” (R&W 1461 ff.) and “Paracelsici libri latinè compacti” (R&W 1502 ff.). As a result of this discovery, Deborah Harkness makes more mention of Paracelsus in her new study on Dee’s cabala and alchemy (1999, 63, 147, 199–203, 217–25) but even her review is far from being complete. A full comparison of Paracelsus and Dee would also exceed my present study, so in the followings I shall concentrate on Paracelsus’ occult natural philosophy and his views on *exaltatio*.³⁶

Although I have not intended to elaborate on Paracelsus’ complicated and legend-ridden biography, it may be instructive to note that his career seems to have emblemized his disparate and contradictory thoughts. Academia and exile, professorial chair and homelessness, appreciation and poverty in his life; philosophical depth and cheap vulgarity, intellectual subtlety and arrogant mocking, religious enthusiasm and blasphemy in his works. He reached the zenith of his professional career in the mid-1520s when he became a professor as well as a town physician in Basel and for a while could enjoy the peaceful company of fellow scholars and disciples, such as Johannes Oporinus, his assistant in the Basel years and the later editor of Vesalius’ anatomy (1543). This was when he wrote his most important medical works. After he had publically burned the books of Avicenna in Basel, he again had to set out on the road, and changes in his fortune steered his interest from medicine toward hermetic philosophy and esoteric theology. In the last years of his

life, he returned to practical medicine (the *Grossen Wundartznei*, his monumental work on surgery was published in 1536) while he was also working on his mystical synthesis, represented by *Astronomia magna* and *Philosophia magna*, two treatises exceeding 700 pages (1536/1537). He died in 1541, his last three years remaining very obscure. He must have possessed titanic energies: the Sudhoff and Matthiessen critical edition amounts to over eight-thousand pages and his theological writings are still partly unpublished.

Let us examine several of Paracelsus' works, beginning with the nine books of *Archidoxa*, which date from his early creative years (about 1526) and present his medical philosophy without some later characteristic developments. For example, the mention of the three primary substances, salt, mercury and sulphur, is entirely lacking from it. It nevertheless contains the germs of Paracelsus' basic ideology and since Dee had seven editions of this work, it is worth examining.³⁷ Another work under a similar title is the *Archidoxis magica*. Although Sudhoff treats it as of spurious origin, in the sixteenth and seventeenth centuries this work was one of the most popular among those attributed to Paracelsus. Huser also accepted it as authentic and included it in his edition of 1589–1591. The work is a compendium of alchemy, talismanic magic, and ceremonial magic in popular Paracelsian rhetoric. In 1656 it was translated into English by Robert Turner, who a year earlier had also translated and published Agrippa's *Fourth Book of Occult Philosophy*. Turner, in his preface, advertised the work to the English reader as follows: "This little Treatise presents you with the rare secrets of Alchymy, and the miraculous cures of diseases by Sigils and Lamens, made in their proper seasons, and attributed to the nature of Celestial Bodies" (A3^r).³⁸ He also noted:

[A]s this author will tell you, and woful experience daily shews: how frequently, and familiarly did those blessed Angels visibly communicate with the holy men and Magicians of Old! though now such is the wickedness of our age, that they have almost quite forsaken us. (Paracelsus 1975, A5^v)

No doubt, Dee would have appreciated this remark since he must have read the treatise with great interest specifically for its concern with the occult philosophy. And indeed, he had several copies of this text.³⁹ The third book to be looked at is Paracelsus' monumental philosophical-magical-theosophical synthesis, the *Astronomia magna*, or "Die gantze

Philosophia Sagax der Grossen und Kleinen Welt” (the whole philosophy of the macro- and microcosms).⁴⁰ Dee had a copy of this work, too (Frankfurt 1571; R&W 289), which interestingly appears at an earlier section in the catalogue instead of together with the other “Paracelsica.” If we single out just the aforementioned three books, it already indicates that Dee was in possession of a substantial package of works containing Paracelsus’ mystical natural philosophy and system of magic.

As I have mentioned, the *Archidoxa* is an early work, but it already contains those leitmotifs that explain Paracelsus’ expectations about the ideal doctor, as advertised in his later great works, the *Opus Paramirum* and the *Paragranum*. To begin with, for him the true physician must nest his practical knowledge in a higher, theosophical theory, and needs to know not only about man’s body but about the whole created universe of which the microcosm is only a miniature model:

It is to learn the mysteries of Nature, by which we can discover what God is and what man is, and what avails a knowledge of heavenly eternity and earthly weakness. [. . .] For although many things are gained in medicine, and many more in the mysteries of Nature, nevertheless after this life the Eternal Mystery remains, and what it is we have no foundation for asserting, save that which has been revealed to us by Christ. (Paracelsus 1894, 4)

Along with contextualizing medicine in theology and theosophy, Paracelsus also emphasized from the outset the importance of experience, which is to be gained from the study of nature rather than from the study of ancient authorities. He never tired of mocking and scolding Galen and Avicenna; however, we must be aware that his concept of experience—just as in the case of Dee—was nearer to Roger Bacon’s *experientia* than to Francis Bacon’s deductive reasoning: “We have drawn our medicine by experiment, wherein it is made clear to the eye that things are so” (5); “and let no one wonder at the school of our learning. Though it be contrary to the courses and methods of the ancients, still it is firmly based on experience, which is mistress to all things, and by which all arts should be proved” (9).

These quotations warn us that the two traditional standpoints of science historians will not work in the case of Paracelsus: those who called him a confused charlatan were certainly wrong, but those who tried to purge him of his magical concepts and mystical philosophy and, thus, include him in the pantheon of science history as a venerable

pharmacist were equally mistaken. Marie Boas noticed this problem in the 1960s, describing Paracelsus' thought as "combined iconoclasm with appeal to 'experience,' primarily mystic experience. He attacked reason because it was opposed to magic, and magic was to him the best key to experience" (1962, 177). For these reasons he despised the ancient authorities but found a perfect synthesis between science and mystical illumination among biblical characters: Adam, the forefather, and his descendant, Enoch. As we shall see, these two became extremely important for Dee, too. And among Paracelsus' works it is the *Archidoxa* which for the first time raises the questions of primordial knowledge:

As long as we have the power and knowledge, we possess the capacity of sustaining our life. For Adam attained to such an advanced period of life not from the nature or condition of his own properties, but simply from this reason, that he was so learned and wise a physician, who knew all things in Nature herself. . . . (Paracelsus 1894, 70)

Adam's knowledge was emblemized by his mystical language, which provided him with a direct means of communication with God and with the angels. And it was Enoch who was the last man privileged to be able to learn the *lingua adamica*, the key to perfect knowledge so much sought by Renaissance philosophers who all aspired to be among the new elect of the *pansophia*. Many of them, with Paracelsus in the forefront, indeed became convinced that they had come into the possession of universal wisdom:

The celestial treasure, in these last days of grace, has been freely revealed to me from on high, which, indeed, make a true Adam and paradoxical physician, according to the days of Enoch, in the intellects of a new generation. [. . .] There is no doubt, that in that very great multitude of men, mentioned in the fourth book of Esdras, the Lord God will reserve for Himself a small number of certain elect persons, who will desire faithfully to pursue my Theophrastic doctrine, to love the truth, and help their neighbours in their destitution and diseases, for pure love of God. . . . (83)

Antirationalism, magic, and experience are also mixed together in the *Archidoxis magica*. Paracelsus advises even theologians to study magic instead of stupid reasoning, but not to practice it, however just "to know the virtues and effects thereof":

Those things which are impossible to be searched out by humane reasons, by this Art, to wit, Magick, it may be found out and known: wherefore it is the most occult and secret wisdom; and reasoning against it is nothing else but extreme folly. It were therefore very necessary that the Divines would learn to know something of this Art, and be experienced in Magick what it is. (Paracelsus 1975, 81)

The *Archidoxis* divides into three main parts. The first is a study in applied alchemy, explaining how to use it for medical purposes such as producing the perfect healing tincture. It deals with the variety of metals, their astrological spirits, and also with the circumstances of the transmutation, the fire, the furnace, and the glass. The third part is applied talismanic magic: Paracelsus gives detailed illustrations regarding how to construct magical images that would cure specific illnesses, such as leprosy, gout, contractures, or discomforts like menstruation. These magic seals recall Ficino's talismanic magic, or even more that of the *Picatrix*, in which the underlying theory presupposes a sympathetic correspondence between earthly living organisms and the macrocosm, governed by the houses of the zodiac. The middle section addresses topics of ceremonial magic, conjurations, enchanting, enthusiastic imagination, spirits and devils, possessions, and also such practical questions as how to find hidden treasures.

The work is not without contradictions. While in the third part he approves the use of magic seals and characters, in a chapter of the middle section called "Of occult philosophy," Paracelsus speaks against all the great Renaissance magi: "we will write therefore in most briefe and plain words, the most occult and secret things, which neither Cornelius Agrippa, nor Peter de Abano, much less Tritemius, never understood or wrote of" (Paracelsus 1975, 31). Here he seems to follow Agrippa's strategy in *De incertitudine . . .*: he does not deny mystical *exaltation* but tries to separate it from all earthly imperfections. As he states, the only source of true magic is the Scriptures:

We do intend to treat of the greatest and most occult secrets of Philosophy, and of all those things which do appertain to Magicke. Clearly and fully demonstrating and setting forth every thing that may be investigated, effected and brought to pass thereby: this Philosophy in the practice thereof is much abused, by Ceremonies and other abuses, and hitherto the foundation thereof hath been built falsely upon the sand. [. . .] It is therefore necessary that the foundation of these and of

all other Arts be laid in the holy Scriptures, upon the doctrine and faith of Christ; which is the most firme and sure foundation. (29–30)

Reading all this, one can agree with Andrew Weeks' repeatedly stressed argument: "Most of the medical-theoretical work is as much religious as scientific" (1997, 41). Although a deep religiousness definitely distinguishes the natural philosophy of Paracelsus, his theology was by no means orthodox; rather it was as iconoclastic, nonconformist, and heterodox as any of the great occult thinkers. He approximated the Reformation in his antipathy to ceremonies and rituals, but his thinking was too idiosyncratic to shift from Catholic orthodoxy to Lutheran dogmatics. His religious individualism can be compared to that of Miguel Servet, Giordano Bruno, Guillaume Postel, or John Dee.⁴¹ His *Astronomia magna* is the clearest manifesto of his esoteric philosophy.

Like Agrippa, Paracelsus approached and explained the dignity of man from two directions: the viewpoint of the Scriptures and the viewpoint of hermetic rebirth. As for the biblical message,

From Holy Scripture comes the beginning and guidance of all philosophy and natural science, and it must be taken into account before anything else; without this fundament all philosophy would be expounded and applied in vain. Consequently, if a philosopher is not born out of theology, he has no cornerstone upon which to build his philosophy. For truth springs from religion, and cannot be discovered without its help. (*Astronomia magna*, I,12:32;⁴² Paracelsus 1951, 196)

And similarly, later on:

Let man not be surprised that God is with him, and that he can perform miracles on earth by virtue of His power, for man is of divine nature. "All of you are gods and sons of the Most High," says Holy Writ. (I, 12:328; Paracelsus 1951, 195)

For to become "gods," man also needs hermetic knowledge, which gives the key to the secrets of the universe by the help of personalized Wisdom. Man, just like in Hermes Trismegistus or in Pico's *Oratio* . . . appears as the greatest miracle, the book of all mysteries: "Man is the book in which all the mysteries are recorded; but this book is interpreted by God" (*Liber Azoth*⁴³ *sive de ligno et linea vitae*, I,14:547–48; Paracelsus 1951, 44). "How marvellously man is made and formed if one penetrates into his true nature. [. . .] Where else can Heaven be rediscovered if not in man?

[. . .] God made His Heaven in man beautiful and great, noble and good; for God is in His Heaven, i.e., in man" (*Opus Paramirum*, I,9:219–20; Paracelsus 1951, 44–45). And, indeed, it is the presence of God in the microcosm that permits man to become himself a creator of miracles:

Thoughts create a new heaven, a new firmament, a new source of energy, from which new arts flow. [. . .] When a man undertakes to create something, he establishes a new heaven, as it were, and from it the work that he desires to create flows into him. [. . .] For such is the immensity of man that he is greater than heaven and earth. (*Astronomia magna*, I,12:183; Paracelsus 1951, 45)

When man undertakes to create something miraculous, it happens by the help of magic: "After all, God has permitted magic, and this is a sign that we may use it; it is also a sign of what we are" (*Die Bücher von den unsichtbaren Krankheiten*, I,9:271; Paracelsus 1951, 138), and in Paracelsus' works we also come across with magic, corresponding to all three worlds of Agrippa, from *magia naturalis* up to gnostic spiritual rebirth. In the *Archidoxis magica* he states that the physician needs to know the original cause of all diseases, which may result from three areas: material things ("evil meat or drink"), celestial or heavenly influences, and supernatural causes ("inchantment or some Magical Sorceries").⁴⁴ These three areas demand corresponding medical practices: material magic needs "to know the secrets of Herbs and Roots, etc.," celestial influences are treated with medical astrology, and sorcery can be fought only by magical remedies (*ibid.*).

Physicians with magical power are comparable to the Saints of God who also worked miracles:

As God awakens the dead to new life, so the 'natural saints' who are called magi, are given power over the energies and faculties of nature. For there are holy men in God who serve the beatific life; they are called saints. But there are also holy men in God who serve the forces of nature, and they are called magi. God shows his miracles through His holy men, both through those of beatific life and through those of nature. . . . (*Astronomia magna*, I,12:130; Paracelsus 1951, 139)

A characteristic of celestial magic is that it makes man a ruler over the stars. It is all the more important because in Paracelsus' medicine astrological influences and corresponding cures are of central importance. At this point astrological power, Wisdom, and the deification of man are

intertwined: "The wise man is the man who live by divine wisdom and is an image of Him in whose likeness he was created. [. . .] He who imitates the image of God will conquer the stars" (*Astronomia magna* I,12: 41–42; Paracelsus 1951, 155–56).

Celestial magic is crowned by angelic magic. Paracelsus here is more cautious than Agrippa was; nevertheless he clearly professed the magical potential of man:

He who inherits God's wisdom walks on water without wetting his feet; for in the true art inherited from God, man is like an angel. But what will wet an angel? Nothing. Similarly, nothing will wet the wise man. God is powerful and He wills it that His power be revealed to men and to angels in the wisdoms of the arts. He wills it that the world and the earth be like Heaven: (*De fundamento scientiarum sapientiaeque*, I,13:306; Paracelsus 1951, 163)

One notices another parallel with Agrippa here: the ultimate end of true magic is Christian exaltation, which is also signified by the steps of spiritual alchemy. Paracelsus uses the term *rebirth* just like his colleague from Nettesheim. Paracelsus' most elevated thoughts on *exaltatio* can be found again in the *Astronomia magna*:

But if the whole heart is to be filled with love of God, all opposition to God must withdraw from the soul, and that which is not divine must go, to the end that it may be all pure, untainted by any other thing, separated from all the rest, perfectly clean and pure itself. (I, 12:299; Paracelsus 1951, 199)

Our Father in Heaven teaches us in the reborn body, and not in the old body, and in this reborn man he teaches us heavenly wisdom . . . (316–17)

Man is born of the earth, therefore he also has in him the nature of the earth. But later, in his new birth, he is of God and in this form receives divine nature. Just as man in nature is illuminated by the sidereal light⁴⁵ that he may know nature, so he is illuminated by the Holy Ghost that he may know God in his essence. For no one can know God unless he is of divine nature. (326)

As I have pointed out, in Agrippa's work the phenomenon of *exaltatio* received an almost scientifically precise analysis. Paracelsus did likewise, and this is the subject-area where anthropocentric, Christian-esoteric natural philosophy can be best understood. The reborn man of Paracelsus is called in the alchemical treatises *corpus glorificationis*, and this is noth-

ing else but the primordial man of *prisca theologia*, and the Adam Kadmon of the cabala.⁴⁶ Paracelsus' views on spirits and the soul also point back to the *prisca theologia*. According to him, "as man is built, so is built God after whose image he was created."⁴⁷

For Paracelsus *astronomia* means not only cosmology, but primarily the description of man who is built in harmony with the macrocosm. Consequently, he presupposes close connections between the spirits populating the outer skies and the ones living in man's inner heaven.⁴⁸ And as man has two bodies (the elemental and the sidereal), so has he also two spirits in which rebirth takes place. These souls are bathed in the mystical Light of Nature (*lumen naturae*), which is identified with the Wisdom of Nature, corresponding loosely to Ficino's *anima mundi* (see Kämmerer 1971, 29; Müller-Jahncke 1985, 72). The seat of spirits in the body is the soul, thus Paracelsus does not divert from the traditional Platonic triad: body—soul—spirit, but he completes it with the elements of the "alchemical trinity," *sal, mercurius, sulphur*.

Using this triad, Elizabeth Ann Ambrose (1992) describes Paracelsian ontology and gnoseology with the terms *Cosmos—Anthropos—Theos*. These three stages mean not only the three paradigms of existence (world—man—God) but also include the steps man uses to know the world and God. The process starts with a phase of submerging in the material, then concludes with a spiritual ascension. Man is born in a structured *cosmos* and has to suffer separation (the alchemical *separatio* is one of Paracelsus' favorite terms), then, due to *Theos*, he can again build up his primordial homogeneity.⁴⁹

Cosmos is the incarnation of the divine, the *corpus* of God which is the self-expression of the Supreme Being (Paracelsus calls it *Yliaster*) through the *Logos*, by the help of thought and will. Such a complicated process involving enormous creative energy is not without dangers and the possibilities of flaws, the German Doctor realized. He mentioned that the *mysterium magnum* might result in deformed incarnations. A good example for that is man, and especially, woman.⁵⁰ The dualism of spiritual and physical existence can best be seen in the context of *Anthropos*: this is a necessary but hazardous separation from which reintegration by the help of *lumen naturae* is chancy, not guaranteed. This reintegration is of course nothing else but the mystical rebirth, the *exaltatio*, provided the self is able to achieve it.

At this point it is instructive to look at Paracelsus' concept of evil. He suggests that without the stage of the purely material, and the experience of godlessness, one cannot recognize the Creator, the Supreme Being.⁵¹

Among scholars it has become a commonplace to speak about the interconnectedness of Reformation theology, gnosticism, the *prisca*

theologia, and the cabala. According to Jung, all these whirl around the idea of the primordial man, whose once existing perfectness and power should be reestablished by the reborn mystic ([1942] 1983, 129–32). For Paracelsus the road to this idea led through mystical medicine and alchemy, which was framed by a theological synthesis, and influenced by Ficino, Pico, Reuchlin, and Agrippa. In his theological works one finds ample evidence for this:

[R]emember that you must take unto yourselves the teachings of the cabala. For the cabala builds on a true foundation. Pray and it will be given you, knock and you will be heard, the gate will be opened to you. [. . .] Everything you desire will flow and be granted to you. You will see into the lowest depths of the earth, into the depths of hell, into the third heaven. You will gain more wisdom than Solomon, you will have greater communion with God than Moses and Aaron.⁵²

This quotation indicates Paracelsus' indebtedness to the hermetic magicians and Christian cabalists of the Renaissance, but also points toward various schools rising up from his legacy, ranging from John Dee's scientific application in his hieroglyphic monad to a purely spiritual alchemical theosophy in Jakob Boehme.

Paracelsus not only synthesized Renaissance occultism, but he also suffered from the inherent contradiction of the magical worldview, just as we have seen in the case of Agrippa. It was again Jung who first noticed this: "Paracelsus was, perhaps most deeply of all, an 'alchemical philosopher' whose religious views involved him in an unconscious conflict with the Christian beliefs of his age in a way that seems inextricably confused. Nevertheless, in this confusion are to be found the beginnings of philosophical, psychological, and religious problems which are taking clearer shape in our own epoch" (1983, 110). As Keefer (1988) discovered the contradictions in Agrippa's ideology of rebirth, Jung in 1941 pinpointed the contradictions of *exaltatio* as the main problem of the hermetic magus. And as Keefer associated the dark side of *exaltatio* with the heresy of Simon Magus, Jung compared Paracelsus' arrogance with that of an other archetypal heretic, Doctor Faustus.

Paracelsus never questioned the power of magic and alchemy because according to him these were agents of the *lumen naturae*, which in turn was nothing but revelative illumination about God's rationally incomprehensible truths. Achieving this revelation meant the deification of man: "God has given us the eternal body to the end that we mortal men on earth may

become immortal" (*De honestis utriusque divitiis*, II,1:249; Paracelsus 1951, 203). The true physician should become such an immortal man. Speaking of the office of such divine practitioners, Paracelsus cried out: "I under the Lord, the Lord under me, I under him outside my office, and he under me outside his office" (*De caducis*, I,8: 267; Jung 1983, 117).

The outspokenness of this statement is breathtaking and reminds Jung of the later Angelus Silesius:

I am as great as God,
And he is small like me;
He cannot be above,
Nor I below him be.
(Jung 1983, 117)

This is the kind of attitude that many scholars identified with the man-centered spirit of the Renaissance, which endowed humankind with divine dignity. And this spirit manifested itself most dramatically in magic and alchemy. "*Deus et Homo* in a new and unprecedented sense!" concluded Jung in rapture. But he also saw the traps on the road of the magus who had said "I under the Lord," but really thought "the Lord under me": "Man takes the place of the Creator. Medieval alchemy prepared the way for the greatest intervention in the divine world order that man has ever attempted: alchemy was the dawn of the scientific age, when the daemon of the scientific spirit compelled the forces of nature to serve man to an extent that had never been known before. It was from the spirit of alchemy that Goethe created the figure of the 'superman' Faust, and this superman led Nietzsche's Zarathustra to declare that God was dead" (Jung 1983, 128).

Jung also speaks of Agrippa's crisis, manifesting itself in *De incertitudine*. . . . In its preface, the magus of Nettesheim wrote with greatest outburst of intensity:

This Agrippa spareth none, he condemneth, knows, is ignorant, weeps, laughs, is angry, pursueth, carps at all things being himself a philosopher, demon, a hero, a god,—and all things.⁵³

According to Jung, Paracelsus was not a split character to such an extent, but his arrogance and extremist diction derived from the unresolved tension between his Christian piety and his Agrippan attitude of "philosopher, demon, hero, and god." According to Jung "the Christian and

the primitive pagan lived together in [Paracelsus] in a strange and marvellous way to form a conflicting whole. [...] His spirit was heroic, because creative, and as such was doomed to Promethean guilt" (1983, 189). This guilt resulted from Paracelsus' conceited hubris which generated discomfort: although subjectively he thought of himself as a faithful Christian, even a good man since his whole life was spent helping the physically wretched, he could never overcome his bad consciousness and an inferiority complex.

To what extent can we find Jung's insights helpful today, when trying to comprehend Paracelsus' concept of *exaltatio* and enter into a dialogue with the work of this enigmatic philosopher? Jung's opinion of course reveals his own preoccupations and his own personal characteristics. That he started dealing with alchemy after a serious private crisis and that he wrote his Paracelsus essay in 1941, at the height of the great demonic war, should throw a special light on his cultural historical paradigm embracing Paracelsus, Faust, Goethe, and Nietzsche.

In our analysis today we can hardly appreciate Jung's opinion that the history of alchemy is more or less identical with an age-old case study in psychiatry. Consequently, we do not need to look for signs of mental distractions in the works of the Renaissance magi. On the other hand, Jung also juxtaposed the outlook of Christianity and rational scientific investigation and interpreted alchemy as something that first tried to bridge the two, yet later indeed contributed to their separation.

Furthermore, Jung's reading of Paracelsus offers one more lesson to be observed in our postmodern age. Namely, he highlighted the unnerving ambiguity that not only characterized Paracelsus himself, but can also be seen in the whole history of Western magic and occult philosophy. How can we account for the fact that an ancient and venerable, basically stable and conservative tradition could produce such representatives whose synthesizing works prove to be trampled by contradictions, paradoxes, and discrepancies? The Platonist philosopher would say only that this is the consequence of the Fall. The human spirit besieges infinity, but it is unattainable. Now and again it approaches only to fall back again, *ad infinitum*.

The modern cultural historian must be more cautious in drawing conclusions but may venture to suggest that this striving, this self-destroying subversion, has been responsible over centuries for the dynamism of European culture. Paracelsus' endeavors for synthesis clearly show that traditions are never homogeneous or clear-cut or isolated. Subversion, antagonisms, and variety on the one hand and lasting tradition on the other are equally important segments of culture.

ENOCH, SCIENCE, APOCALYPTIC PROPHECY

We have come to the last theme among the intellectual impacts that contributed to the formation of John Dee's doctrine of *exaltatio*. This was an idiosyncratic attitude of certain sixteenth-century intellectuals who gained inspiration from the hermetic Renaissance of the Florentine neoplatonists and who themselves contributed to various chiliastic and apocalyptic tendencies of the Reformation and to the general religious climate of early modern Europe.

As attitudes are often shaped by role models embedded in mythologies or ancient wisdom, in this case we also find such elements, including fables, images, and characteristic iconography. Let us start from Paracelsus' already quoted remarks concerning the wisdom and magic power of Adam and his descendant Enoch (see above, p. 136). The latter was relatively little discussed until the Renaissance, however in the sixteenth century he was made into a sensational biblical figure, and Dee himself felt much obsessed with his character.

In the Old and New Testaments Enoch is rather briefly mentioned. We learn that there were two Enochs, the first was Cain's son (Gen. 4:17) who thus belonged to the third generation of humankind. The second, "real" Enoch derived from Adam's son Seth; his father was Jared who beget Enoch in the year 622 after the Creation (Gen. 5:18–19). Enoch lived 365 years; at the age of 65 he beget Methuselah, then he "walked with God: and he was not; for God took him" (Gen. 5:24). Saint Paul in his epistle to the Hebrews remembered that "by faith [Enoch] was translated that he should not see death" (Heb. 11:5). Finally the epistle of Jude briefly mentions that "Enoch, the seventh from Adam, prophesied of these, saying, Behold, the Lord cometh with ten thousands of his saints" (Jude 14).

There is much more apocryphal and pseudepigraphical⁵⁴ material on Enoch in the Judeo- and the Christian traditions alike. The historiography of this literature is interesting and complicated. Though the text of the so-called Book of Enoch was in fact not known to Europeans until the eighteenth century, there was a great interest in Enoch from the sixteenth century on, as we can see in various mystical trends of humanist literature. It is important then to examine Dee's sources for the Enochian legends.

At present there are three known collections associated with the name of Enoch. *1Enoch* is the so-called Ethiopic Apocalypse of Enoch, the full text of which survived only in the Ethiopic language and was brought to Europe in 1773 by the Scottish Africa traveler J. Bruce. The original

book might have been written either in Hebrew or in Aramaic. Some fragments have survived in Aramaic (among the Qumran scrolls), in Greek (an eighth-century manuscript found in a Christian grave in Egypt, plus some quotations in the *Chronographia* of Georgius Syncellus), and in Latin, found also in an eighth-century manuscript.⁵⁵

1Enoch consists of the following themes: after the introduction, Chapters 6–36 relate the story of the fallen angels, how they intercoursed with women and corrupted all men, and how Enoch tried to intervene on the angels' behalf before God. The second part contains apocalyptic visions concerning the final judgement of the righteous and the wicked, while the third part (Chapters 72–82) is an astrological treatise that undoubtedly inspired the medieval astrological tracts to be discussed below. The fourth part contains dream visions about the future of Israel and tells the history of mankind from Adam to the Flood. The fifth part is Enoch's testament. From the viewpoint of Dee's mystical writings, the first part of the work, also known as the Book of the Watchers, is particularly interesting, because it is a kind of angelology (Charlesworth 1983, 5).

2Enoch is the so-called Slavonic Enoch. It survived in old church Slavonic manuscripts, but the origin and history of those even nowadays is totally obscure (cf. F. I. Andersen's summary in Charlesworth 1983, 91–100).

3Enoch is a fascinating Hebrew text, belonging to the body of Merkabah mystical literature (fifth through tenth centuries, A.D.) that survived in various fourteenth- to sixteenth-century manuscripts, and one of its chapters (48BCD) was also printed in Cracow, in a Hebrew publication of 1579 (information on *3Enoch* by P. Alexander in Charlesworth 1983, 223–53).

Since Dee had no interest in orthodox Christian texts and the Slavonic book of Enoch was not known to Western Europe in the time of the Renaissance, this text can be neglected in our investigation. More interesting is the case with the other two versions. Although we have no evidence of Dee's relationship with Jewish scholars or rabbis, one should not forget that a few years after some parts of *3Enoch* had been printed in Cracow, Dee spent several months there and might have had access to this publication, in which he could read in Chapter 48A about the right hand of God that rewards the righteous; in 48B about the seventy names of God (the list wrapped in a literary imagery not dissimilar from Dee's own visionary writings); and, finally in 48C about a short account of the elevation of Enoch, the story arranged cabalistically along the Hebrew alphabet:

Lamed: "I took him"—Enoch the son of Jared, from their midst, and brought him up with the sound of the trumpet and with shouting to the height, to be my witness. . . . (48C:2)

Peh: "I appointed him"—over all the storehouses and treasures which I have in every heaven, and I entrusted to him the keys of each of them. I set him as a prince over all the princes, and made him a minister of the throne of glory, to deck and arrange it. . . . (48C:3–4; in Charlesworth 1983, 311)

The above passage, as well as *1Enoch*, contains all those motifs—Enoch being chosen to see God face to face; being entrusted with the knowledge of all sciences and a *clavis universalis*; and, finally, being elected to be the minister of "the throne of Glory to deck and arrange it"—which truly corresponded to Dee's burning desires to obtain universal knowledge and attain *exaltatio*, that is, to converse with angels and perhaps see the Creator face-to-face. Although it is most unlikely that he would have had access to the full text of the Book of Enoch, he certainly must have been aware of the long medieval tradition as well as the new Renaissance attraction to Enoch, who became one of the emblematic figures of the omniscient magi.

References to Enoch's exaltation abounded in Christian literature throughout the centuries. He featured in the writings of the Church fathers and the early theologians and then in some medieval treatises, although his fame was eclipsed during the Middle Ages. According to Thorndike (1923–1958, 1:342–45), Alexander Neckam in the twelfth century spoke as if Christendom had some acquaintance with the Enoch literature. He also pointed out that Hildegard of Bingen's visions had interesting parallels with that of Enoch. In his *Speculum naturale*, Vincent of Beauvais (thirteenth century) also referred to the Book of Enoch with reverence, but perhaps even more important is that corpus of pseudo-Enochian literature that in the Middle Ages attributed to him the privilege of being the inventor of astrology and alchemy. In these treatises Enoch was also identified with Hermes Trismegistus, or called "one of the three holy Hermeses." This is the claim in the "Treatise on fifteen stars," which survives in many medieval manuscripts (Thorndike, 1:340), and it is repeated by Robert of Chester's *Liber de compositione alchemiae* (published in Dee's lifetime in Paris, 1564); and by the thirteenth-century manuscript "Hermes Mercurius Triplex on the six principles of things." Enoch's lore on angels was echoed in the whole of spurious medieval manuscript literature of ceremonial magic, including the "Book of Venus,"

the *Liber Juratus*, the *Liber lunae*, and the various versions of the “Book of Toz” (Thorndike, 2:220–27). It also appears, that Roger Bacon (whom Dee unconditionally admired for his engagement in the magical-mechanical arts), highly regarded Enoch and mentioned him in his *Secretum secretorum* as equal being to Hermes (Clulee 1989, 209).

These occasional and more or less illicit mentions gained a new dimension during the late fifteenth century—undoubtedly due to the Florentine neoplatonists’ enthusiasm for hermeticism. Enoch and Hermes Trismegistus became role models for magically oriented humanists who were obsessed with the practical methods for achieving *exaltatio*, even to the extent that they claimed themselves to be the reincarnation of those ancient sages.⁵⁶ A notable example was Giovanni Mercurio, the wandering hermetic magus who around 1501 visited France and had his sensational appearance recorded by Trithemius. Mercurio left no writings of his own, but accounts of his activities reported that he had declared himself to be the heir of Apollonius of Tyana, the ancient magician. After Mercurius Trismegistus he also called himself Mercurius Secundus and, according to Trithemius, promised “great, strange, and exceedingly marvelous things.”⁵⁷ Although Trithemius claimed similar magical power for himself, he was ready to see in Mercurio a charlatan, a fraud, at best a convenor of evil spirits. He exploited the example of the Italian in order to show how narrow and uncertain was the dividing line between real, pious magic and necromancy (Brann 1999, 66). Not everybody, however, was so critical of Mercurio. In 1505 Jacques Lefèvre d’Étaples, the hermetically oriented humanist, published a work in Paris by the Italian mystic, Lodovico Lazzarelli titled *Crater hermetis*, together with the *Pimander* and the *Asclepius*, that is, the basic texts of hermeticism.⁵⁸ Lazzarelli (1450–1500) belonged to the humanist circle of Ficino and Pontano and later turned into an apostle of the hermetic tradition. This conversion was greatly influenced by Giovanni Mercurio, who in 1484 appeared in Rome and roamed the streets with a crown of thorns and preached a mystical renovation of Christianity. Lazzarelli remembered this encounter in a work assuming the form of a letter by Enoch, in which he called himself “Lodovicus Enoch Lazarellus Septempedanus, once a poet but now by new rebirth the son of true wisdom” (Thorndike 1923–1958, 5:438). Thus, it seems, Lazzarelli considered himself to be a reincarnation of Enoch and his ideas of hermetic rebirth can be compared to those of Agrippa and Paracelsus, as mentioned above.⁵⁹

Another sixteenth-century humanist who became involved with the questions of Enoch and hermetic rebirth was Guillaume Postel, one of

John Dee's personal acquaintances. They met in early 1551 in Paris, where Dee had been staying since July 1550 and where in September he had lectured on Euclid. The title of his talk was "*Prolegomena et didacta Parisiensa in Euclidis Elementorum Geometricorum librum primum et secundum*" (Dee 1851, 25). According to his recollections from 1592,

I did undertake to read freely and publicly Euclide's Elements Geometricall, Mathematicè, Physicè, et Pythagoricè; a thing never done publicly in any University of Christendome. . . . (Dee 1851, 7)

Here Dee also gives a long list of eminent scholars whom he met during his stay in Paris. Among the names of Pierre Mondoré (the king's librarian), Oronce Finé (a famous mathematician), and Pierre de la Ramée (the reformer of logic), one also finds Guillaume Postel, who in many ways can be considered as one of the closest intellectual relatives of the English Doctor.⁶⁰

Postel (1510–1581) had a career similar to that of Dee.⁶¹ Coming from a poor family, on attending school he was characterized by an extreme thirst for knowledge, often even forgetting to stop reading for the sake of eating.⁶² As we also know from about Dee, "I was so vehemently bent to studie, that for those yeares I did inviolably keepe this order; only to sleepe four houres every night; to allow to meate and drink two houres every day; and of the other eighteen houres all was spent in my studies and learning" (Dee 1851, 5). Postel quickly learned Greek and Hebrew and later, during a trip to Constantinople, Syriac and Arabic. Like Dee, he also became a devoted collector of books although his even less stable life did not allow him to gather such a large collection as Dee's. The first sentences of William Bouwsma's monograph on Postel give a good introduction to his significance in the history of Renaissance humanism: "Postel is at once one of the most interesting and one of the most puzzling figures of the sixteenth century. His spectacular career and the wide range of his interests and activities have frequently attracted the attention of historians, and his name appears in the most various connections. He was the most learned Christian cabalist of his day, one of the earliest systematic Arabists in western Europe, a pioneer in the comparative study of language, and a humanist of distinction" (1957, v).

These thoughts have been repeated almost verbatim about John Dee, too. The two men had not only their humanist and scholarly interests in common. Both were deeply interested in the occult and the cabala, and both of them had a particular mystical conversion or illumination that concluded in a radical turn in their careers.

Parallel with his humanistic and philological interests, Postel's chief concern was the religious reformation of the world. He hoped that through rational reasoning non-Christians could be convinced of the superior truths of Christ. He was also looking for a human instrument to be the missionary of his project and he thought of the Jesuits. In 1544 he went to Rome, met Ignatius Loyola, and asked for admittance. Although Postel had only a brief encounter with the Society of Jesus (a year later Ignatius felt compelled to set up a committee to examine the religious heterodoxy of the Frenchman), Rome proved to be of crucial importance. In 1546 he met an Ethiopian priest who described for him the Book of Enoch, which existed only in that language. Postel became quite enthusiastic about apocryphal literature in general—he translated James' *Proto-evangelium* and proposed that the Pope adopt the *Zohar* and the Book of Enoch as the keys to the Scriptures—and also often cited Enoch, since "its esoteric character and messianic emphasis were exactly the sort of thing to appeal to Postel" (Bouwsma 1957, 36).

His interest in Enoch may have led him to a preoccupation with reincarnation (cf. Secret 1990), which manifested itself in 1547 in Venice. There he met an almost illiterate elderly lady serving in the Hospital of Saints John and Paul, in whom Postel recognized the incarnation of the *anima mundi* or the divine radiation, the Shekhinah of the cabala. He called her "mater mundi" and the "New Eve" (Bouwsma 1957, 15 ff., 155–60; Kuntz 1981, 73 ff.) and he was fixated on her until his death in 1581. Mother Joana (or Zuana) died in 1549, and two years later an even more dramatic event occurred in Postel's life. He was celebrating Christmas, when he suddenly fell ill, suffered terrible awe and tremor until Mother Joana appeared to him, announcing that she would occupy his body as she had promised at their last meeting:

I shall send you two beautiful gifts in our garments, and you shall be our first born son, who shall cause to be understood by Intellect and Reason the truth of our mysteries. (*Le prime novo del altro mondo*, Venice, 1555; quoted by Bouwsma 1957, 157)

Postel recorded the incarnation of the "Venetian Vergin" in his body as follows:

Two years after her ascension into heaven, her spiritual body and substance sensibly descended into me and sensibly extended throughout my body, so that it is she and not I who live in me. (*Les très merveilleuses victoires des femmes*, Paris, 1553, 20; Bouwsma 1957, 158)

Although Postel felt heavenly peace and bliss after the initial shock, one cannot be surprised at the wry observation of the modern historian: “The leap from simple desire to full belief in the actuality of an incarnate feminine principle and her first born son, not to mention the identification of himself with the latter, is considerable; and it is hardly surprising that his strange convictions bewildered his contemporaries [. . .] and these beliefs raised doubts about his sanity” (Bouwsma 1957, 165). As Bouwsma explains, Postel in fact saw himself as the incarnation of a “lower Messiah,” a new Elias, the governor of the feminine sphere. As he himself wrote, “It is entirely necessary that there should be a lower Messiah, the image of the Wife, subordinate to her husband, and of the body subordinate to its soul . . .” (*Restitutio rerum omnium*, Paris, 1552; Bouwsma 1957, 163). Postel in fact called himself a reborn, or restituted, man, a herald of the last epoch when all things would be renewed to their primal perfection and Satan would be defeated for all before the final apocalypse.

Giovanni Mercurio, Lodovico Lazzarelli, and Guillaume Postel seem to have accomplished—at least in their subjective reality—all that to which Agrippa and Paracelsus were only aspiring, and which John Dee stubbornly tried to achieve during his decades-long “angelic conferences.” The latter will be the subject of the next part of this book.

The Ideology and Occult Symbolism of Dee's Natural Philosophy

I have devoted the previous part of this book to the examination of magical *exaltatio* as it appeared and reappeared in Western thought from classical Antiquity through the Middle Ages up to the sixteenth century—undertaking this by looking at books that were in the personal library of John Dee. To a certain extent I have revisited the Yates thesis and thus laid a special emphasis on the great magi of the fifteenth and early sixteenth centuries, whose activity strongly contributed to the rise of the much-discussed “man-centered” world picture of the Renaissance. Their texts demonstrate that *that* “man-centeredness” by no means meant religious scepticism, let alone atheism.¹ Instead, we could rather speak of a new type of religiosity, some individual and idiosyncratic versions of which are clearly distinguishable from the official branches of the Reformation. Historians often call these religious attitudes heterodoxy, or interconfessionalism.

As I have shown, the idea that man had a special role in creation and had been endowed with godlike faculties directly relating him to the Supreme Being had been emphasized since earliest times. And as is also clear, these thoughts have always been associated with mysticism, gnosticism, and symbolic magic. I am aware that it is impossible to explain a very complex cultural phenomenon, such as the Renaissance, by reducing it to a product of a single intellectual impulse (that was the special weakness of Frances Yates and her uncritical followers); still, I am nevertheless quite convinced that the magical vogue started and made acceptable by the Florentine neoplatonists became a particularly important

catalyzer in helping Western humankind break out of its medieval intellectual framework. Later, in the early modern period, this interest in magical *exaltatio* spread widely, became differentiated and popularized, influencing the Scientific Revolution on the one hand while on the other incorporating itself into the discourse of various religious denominations. Thus it became the property of much larger communities than it had been in the time of humanism and its patronage system. Another important contribution to this popularization was the expansion of book publishing. This meant not only more and cheaper books, but the technical development fostered a fascinating trend in magical illustrations that filled the works of Heinrich Khunrath, Michael Maier, Robert Fludd, Athanasius Kircher, and the later editions of Jakob Boehme.

With my references to Simon Magus and the appearance of the Faustian archetype, I argued that the doctrine of *exaltatio* had inherent subversive contradictions that may have led to total or partial self-destruction, too. I am convinced that the dynamism of the reborn European culture followed from these contradictions: from the tension between affirmation and negation, construction and demolition, tradition and subversion. Renaissance magic clearly shows this dichotomy. Because of this I can hardly believe early modern magicians who confidently asserted the possibility of separating white from black magic. It was only self-defense and propaganda in claiming that they were entirely free from all dark temptations. But why should we want to expel the examination of those murky experiments from the study of our cultural heritage? Cultural history is not to be purged; rather it should be interpreted and comprehended. As I suggested in connection with Paracelsus, Christian magic—and the doctrine of *exaltatio*—is more like a heroic torso, a gallery of broken dreams; still, it exercised an admirable influence on modern Western mentality.

I want to argue that John Dee fully integrated with this tradition, in fact that he was a prominent representative of it from the later sixteenth century. So much has been written about his career and works that I can do without the obligatory sketch of his biography and a general review of his writings. Let us plunge into the texts, a selection of his "output" that has pertinence for the notion of *exaltatio*. I am going to look at his *Propaedeumata aphoristica*, the *Monas hieroglyphica*, *The Mathematicall Praeface*, and the spiritual diaries as representing repeated efforts, successive stages, and sometimes different underlying theories in order to attain that pristine knowledge which leads man during his earthly life to the full comprehension of the universe, the manifestation of God's infinite intellect.

ASTROLOGY: *PROPAEDEUMATA APHORISTICA*

According to recent analyses, especially Nicholas Clulee's definitive interpretation, Dee's early career was dominated by his fascination with mathematics and medieval *magia naturalis* (Clulee 1988, 19–75; Heilbronn 1978, 50–105). As for geometry, his continental trip to the Low Countries and to Paris in 1550 and 1551 was spent under the sign of Euclid, though his account of the successful Paris lecture betrays an interest in mystical occult lore, too. He described Euclid as “Mathematicè, Physicè, et Pythagoricè,” and even if at this point he was not yet aware of neoplatonic hermetism, he could refer to Proclus and the contemporary Jacques Lefèvre d'Étaples as representatives of a Pythagorean frame of thought. The evidence we have indicates that Dee from the earliest years of his scholarly career was occupied by an ambition to seek and acquire perfect knowledge, which necessarily made him aware of esoteric concerns.

Given his early interests, it should not be surprising that his first major work, the *Propaedeumata aphoristica* (“An aphoristic introduction [. . .] concerning certain virtues of nature, dedicated to Gerard Mercator, distinguished mathematician,” London, 1558, 1568; modern edition: Dee 1978), dealt with the connections of geometry and astrology. It is not clear from where Dee acquired his expertise in traditional astrology, but as we know, in the same year of the publication of the *Propaedeumata*, he was invited to determine the astrologically most suitable day for the coronation of Elizabeth I.² His interest in astrology may have been rooted in the studies he had pursued in Louvain during the years 1547 and 1548. He met there scholars—Gemma Frisius, Gerard Mercator, Caspar à Mirica, and Antonio Gogava—who were eminent representatives of a syncretic Renaissance science tinted with occultism and alchemical-astrological studies.³ He came home with valuable astronomical instruments, made by Mercator. Still earlier, however, “First, from Lovayne did the favourable fame of my skill in good literature spread, that thereupon divers noblemen came from the Emperour Charles the Vth, his court at Bruxelles to visit me at Lovayne . . .” (Dee 1851, 6).

The *Propaedeumata* shows that Dee tried to approach prognostication on a strictly scientific ground, astrology being treated here as applied mathematics. While the neoplatonist magi of the early Renaissance tried to control the influence of the stars through talismanic magic and ritual incantations, Dee thought to accomplish this task by the help of mathematically constructed optical mirrors. In this scientific program his predecessors were Ptolemy himself and the medieval authorities on optics:

the Arab al-Kindi (*De radiis stellarum*), Urso Salernitanus, Robert Grosseteste, and Roger Bacon (cf. Clulee 1988, 52–69; Harkness 1999, 71–77; Szulakowska 2000, 37–43).

The nature of my present investigation does not require a digression into Dee's mathematical reasoning. The point is that for the improvement of astrology he needed the exact number of stellar constellations. While traditional astrologers usually differentiated between 120 constellations, Dee in his book consisting of 120 aphorisms, determined a number of 25,341. Dee tried to derive astrology from nature alone, avoiding demonic intelligences that haunted even his learned contemporary Giordano Bruno. According to Clulee, the early natural philosophy of Dee was built on a naturalistic concept of the world and man, in which the dualism of natural and supernatural was not particularly emphasized. The *Propaedeumata* represents an eclectic synthesis, argues Clulee, that cannot be directly linked with neoplatonic hermetism as the representatives of the Warburg school and Yates saw it. He is undoubtedly right that Renaissance occultism was not a homogeneous and monolithic subject and that it was rooted in many medieval sources, too. But as Harkness recently noticed, by 1550, "during his visit to Paris [Dee] became more acutely aware of the enormous potential, and the enormous difficulties, associated with the study of the natural world" (1999, 82). And in my opinion, from the time of his earliest writings this awareness pushed him in a more and more mystical direction as the only means of promising true *exaltatio*. I can see this attitude among the aphorisms of the *Propaedeutama*, as well.

The title page itself is characterized by iconographical elements of esoteric symbolism summarizing the occult correspondences of the universe. The frontispiece shows an architectural construct with the four elements at its four corners; at the centre of the columns the two main characters of the alchemical process can be seen (Sol and Luna); the central icon is a modified astrological-alchemical sign of Mercury that can represent all the planetary metals. This is stated by the motto written in the ribbon: "*STILBON, acumine praeditus est instar omnium planetarum*" (MERCURY, endowed with a sting, is like all the planets). This combination of Mercury seems to be Dee's invention; it appears here for the first time and later becomes the central motif of his major work, the hieroglyphic monad. The lower motto refers to connections between Christianity and occult philosophy: "And there shall be signs in the sun, and in the moon, and in the stars" (Luke 21:25). The upper motto offers one of Dee's favorite maxims: "Let him who does not understand either be silent or learn" (cf. Figure 6.1).

FIGURE 6.1 Frontispiece of Dee's *Propaedeumata aphoristica* (London, 1558). Reproduced from Dee 1978 [facsimile].

The book is dedicated to Mercator and mentions that the catalyzer of the work was his friend's recent letter in which he asked about his projects. Remembering their philosophical studies ten years earlier in Louvain, he decided to comment on the problems they were discussing at that time. Admittedly, thus, the *Propaedeumata* is the synthesis of the studies of the past ten years, including his intellectual encounters in Louvain and Paris. The treatise clearly demonstrates Dee's working methods and the characteristic structure of his works (at least before the spiritual diaries). All of his surviving scholarly works were written in haste and in a short time, usually after a long period of gestation. He liked the concise, aphoristical expression; thus, his writings look like drafts or outlines for larger—but never written—works.⁴

The first aphorism is a general thesis of ontology, asserting Dee's monistic, nature-oriented interest:

As God created all things from nothing against the laws of reason and nature, so anything created can never be reduced to nothing unless this is done through the supernatural power of God and against the laws of reason and nature. (I, Dee 1978, 123)

Aphorism II introduces the principle of *magia naturalis* and in Aphorism X we are assured about the realistic and legal possibility of magical transformation of the world. Although Dee avoids speaking about Man the Magus, his program implicitly involves the prospect of *exaltatio*:

The entire universe is like a lyre tuned by some excellent artificer, whose strings are separate species of the universal whole. Anyone who knew how to touch these and make them vibrate would draw forth marvellous harmonies. In himself, man is wholly analogous to the universal lyre. (XI, 126–27)

This thesis refers to the analogy between the macro and microcosms, and although one cannot say that the correspondences of the Great Chain of Being were the intellectual property of neoplatonism and hermetism, Dee's words evoke their atmosphere. Clulee is right to emphasize that Dee's scientific reasoning shows no relationship to the Florentine synthesis; however, in my opinion, his contextual aphorisms nevertheless point in that direction. He mentions, for example, the cabala (XVIII). Like Ficino, he praises the healing power of music (XXIII), and even speaks about talismans (XXVI). He also treats alchemy as *astrologia inferior* (LII), not unlike Paracelsus, and praises the mystic monad, constructed by himself.

Furthermore, in Aphorism LXXIII he speaks about "the assiduous mage" who can discover the great harmony of the world. He illustrates the correspondences by the paradigm of Sun—gold—and human heart and here he speaks of anatomical magic. In LXXVII he again uses parallels from alchemy and the cabala: "What is seven times properly separated is prepared also to be seven times joined for the making of that most famous philosopher's stone."⁵

The concluding aphorisms again show openness toward hermetic neoplatonism. Although according to Clulee the reference to Hermes Trismegistus in CXIX comes not from Ficino but from the late Hellenistic *Iatromathematica*, which was used throughout the Middle Ages (1988, 45), he also accepts that by the time of writing the *Propaedeumata* Dee already had the basic primers of hermeticism: Ficino's edition of the *Corpus hermeticum*, Giorgi's *De harmonia mundi totius*, Reuchlin's *De verbo mirifico*, and Agrippa's *De occulta philosophia*. One should take Clylee's caveat seriously, namely that the acquisition of a book does not immediately mean its appropriation; still, while re-reading the aphorisms, I am inclined to find in them the natural philosopher who is just about ready to abandon scientific humanism for the sake of hermetic mysticism.

During the six years between writing the *Propaedeumata* and the *Monas*, Dee's intellectual arsenal became enriched with important elements. This is the time when he started establishing his collection of Paracelsica and his occult studies were also boosted by his long travel on the continent in 1563 and 1564.⁶ The next subchapter will look at the *Monas hieroglyphica*, considering its sources and its importance as Dee's full-fledged manifesto for the study of magic *exaltatio*.

ALCHEMY: *MONAS HIEROGLYPHICA*

On September 8, 1563, one of the many bemused observers of the coronation of Maximilian II as King of Hungary was Doctor John Dee, the English mathematician, promotor of ascending British imperialism, and later notorious visitor of East-Central European courts with a strange, mystical-chiliastic message based on his conversations with angels. The Hungarian coronation city, Pozsony or Pressburg, present-day Bratislava in Slovakia, was just one stop on Dee's long European journey, which included visits to Zurich, Padova, Venice, and Urbino. The English humanist's main purpose was to meet leading intellectuals on the continent, such as Conrad Gessner and Frederico Commandino; he consulted with the former and with the latter he prepared a joint publication.⁷ From Pozsony, through Germany, he moved back to Antwerp where he spent the whole of January 1564 finishing his major work, the *Monas hieroglyphica*, which was published in March by the well-known printer Willem Silvius. The spectacular pageant of the Hungarian coronation so much impressed the Doctor that he decided to dedicate the whole work to "Maximilian, by the grace of God the most wise King of the Romans, of Bohemia and of Hungary" (title page, Dee 1964, 113). A passing reference in Dee's memoirs, almost thirty years later, from 1592, suggests that after the publication he returned to Vienna with the intention of personally presenting his work to the Emperor:

[15]64. Junij 14, after my return from the emperors court, her Maiestie very graciously vouchsafed to account her self my scholar, in my boke written to the Emperor Maximilian, entitled *Monas Hieroglyphica*. . . .⁸

As Robert Evans (1973, 52–3) has noted, Maximilian seems to have been interested in esoteric subjects while his religious views were ambiguous.

Dee's work itself is a slim volume, introducing and explaining a magic diagram, which is supposed to demonstrate all visible and metaphysical aspects of the universe in the form of a geometrical-alchemical-philosophical image. We have good reason to say that it was to function as a revelatory mandala in order to propel the soul's flight, that is, to bring the viewer into the state of *exaltatio*, an intuitive understanding of the cosmos and a unification with the wisdom of God.

Dee himself explained the layers of his mystical meaning in the lengthy introduction addressed to Maximilian. As he wrote, his monad is explained "mathematically, magically, cabalistically, and anagogically" (Dee 1964, 155), but these four layers of meaning ought to be completed with two more: the alchemical and the linguistic aspects that seem to link intricately with the others.

The text of the *Monas hieroglyphica* is nothing else than twenty-four theorems explaining the diagram. This explanation constitutes two planes of argumentation: the first acquaints the reader with the geometrical elements and the mystical-mathematical-cabalistic meanings of the diagram; the second outlines the potential capabilities of Man the Magus, in relation to his privilege to recreate the lost unity in the split, dualist existence.

The title page in a comely manner incorporates the full diagram, surrounded by an architectural composition and several emblematic and philosophical phrases. As I have shown, Dee had already used the monad on the frontispiece of his previous work, the *Propaedeumata aphoristica*, and there are similarities between the two title pages. However, it should be noted that while in the *Propaedeumata* the hieroglyphic monad served only as emblematic decoration and the text did not provide its interpretation, this new book was entirely devoted to the explication of this mystical device. There is also a great difference between the two versions of the diagram, the later being much more refined and placed in an egg-shaped oval—this is what Dee used for the second edition of the *Propaedeumata*, too (cf. Figure 6.2). Although Dee retained one of the mottos—"Qui non intelligit, aut taceat, aut discat" (He who does not understand should either be silent or learn)—he replaced the key biblical quotation from Luke 21-25, which referred to astrology, with Genesis 27: "May God give thee of the dew of heaven and of the fat of the earth." This promise may have seemed to prefigure the kind of mystical synthesis of heavenly, occult knowledge, and earthly well-being the hermetic magus so much craved (see Figure 6.3).

FIGURE 6.2 Frontispiece of the 2nd edition of Dee's *Propaedeumata* . . . (London, 1568). Reproduced from Dee 1978 [facsimile].

FIGURE 6.3 Frontispiece of Dee's *Monas hieroglyphica* (Antwerp, 1564). Herzog August Bibliothek, Wolfenbüttel [223.3 Quod 1/1].

It is notable that no apparent model has been identified so far for Dee's cosmogram, which, as I have said, seems to be his own invention. We can hardly trace graphic or diagrammatic sources because the time of composition fell so much before the great vogue of symbolic and emblematic illustrations, the kind that fill occult and scientific books from the early seventeenth century on. Khunrath, Fludd, Maier, Kircher, and others, in fact, often used and further elaborated Dee's monad.⁹

The first serious scholarly commentator of the hieroglyphic monad (after Tymme's pioneering interpretation of the 1610s), C. H. Josten, admitted his uncertainty about the sources:

It has not been possible to identify any ancient author as the principal source of Dee's ideas on the monas and on numbers. [. . .] Trying to determine why Dee chose to name the universal principle of transmutation, and his symbol thereof, *monas*, i.e. essential oneness, one recalls the *una res* of the *Smaragdine Table*; but a more immediate source is perhaps to be found in chapter iii of book II, of Henry Cornelius Agrippa's work *De occulta philosophia*, which chapter is titled "De unitate, & eius scala." (Josten 1964, 106)

Next to these, Josten mentions Ioannes Pierius Valerianus' *Hieroglyphica* (Basel, 1556), in which there is a woodcut of Mercury carrying a ram while the accompanying text interprets this as the astrological symbol of restored health.¹⁰ Although Dee possessed an 1567 edition of this work (R&W 114, published three years after Dee's *Monas*), he does not seem to have had either Horapollon or Francesco Colonna's *Hypnerotomachia Poliphili*, or any other books directly touching upon Egypt or hieroglyphics.

On the other hand, he did have several other works in which interesting passing remarks discussed the Egyptian writing system. One such volume was his copy of Alberti's *De architectura libri decem* (1523 edition, R&W 607) in which he could have read:

[The Egyptians'] reason for expressing their sense by these symbols was, that words were understood only by the respective nations that talked that language, and, therefore, inscriptions in common characters must in short time be lost. [. . .] The manner of expressing their sense by symbols, they thought must always be understood by learned men of all nations, whom alone they were of the opinion that things of moment were fit to be communicated." (quoted in Daly 1998, 22)

In his article on the *monas* Michael T. Walton cited Meric Casaubon's opinion that Dee was "a Cabalistical man, up to the ears"¹¹ and applied cabalist writers—Pico, Agrippa, and Postel—to extract the precise meaning of the cosmogram. His view—"Dee's treatment of the Monad's interpretation as an art of writing which revealed all astronomical knowledge, both the greater astronomy of the heavens and the lesser astronomy or alchemy"—is corroborated by Dee's text in the preface addressed to Maximilian, according to which

[T]his our holy language, which I have called the real cabbala, [. . .] which was born to us by the law of the creation, is also a more divine [gift], since it invents new arts and explains the most abstruse arts very faithfully. [. . .] I know well (O King) that you will not shrink away in horror if I dare proffer this magic parable in your royal presence. (Dee 1964, 135)

One cannot help noticing, though, that neither Dee nor his interpreter, Walton gave any indication of the exact origin of the monad's graphic design.

Nicholas Clulee has analyzed the *Monas hieroglyphica* at perhaps the greatest length, but even he has not been able to identify sources or really close parallel texts among Dee's readings. He noticed the concept of the metamorphosis from the "horizon temporis" to the "horizon aeternitatis" in Dee's thought, which is nothing but the *exaltatio*, although he did not call it so. He cited Pliny, Trithemius, and Pico among those who voiced similar notions and finally concluded: "I believe that it is from Roger Bacon that Dee derived the basic inspiration to seek an integral knowledge of nature" (Clulee 1988, 121). To strengthen his argument, he recalled Dee's lost treatise from 1557 titled *Speculum unitatis*, written in defense of Roger Bacon. Relying on Bacon's *Tractatus brevis et utilis*, Clulee argued that Dee had been able to receive information about ancient theology and hermeticism through purely medieval sources. But then he also added that Dee himself had interpreted his cosmogram in evolving turns from a diagram of natural magic in the 1550s to a summary of a universal grammar by the 1560s. In this context the monad should be seen as a pythagorean or cabalistical formula generating the spiritual transformation of the soul and its mystical ascent from the material to the supercelestial realm.¹² At this point Clulee turns to Renaissance sources that could reveal concepts of magic for Dee, "far less natural than that he encountered in Roger Bacon" (Clulee 1988, 128). These sources primarily meant the neoplatonic philosophers—Ficino, Pico, and Agrippa—whom Frances Yates called "the hermetic magi."

Here I would like to argue that Dee, possessing and heavily annotating Ficino's *Index eorum* . . . (R&W 256), had a compact primer in neoplatonic hermetism at hand that could provide him with a wide spectrum of that philosophy in a single textbook. As I have stated above, merely by looking at the contents of this compendium (reprinted and expanded in his *Opera* of 1576 which Dee also possessed), one can conclude that Ficino's ideal of magic must have been a synthesis between the hermetic lore and the so-called Platonici.¹³ The collection unites the two kinds of corpus in the following order: "Dionysii Areopagitae translatio cum suis argumentis" (Ficino 1576, 2:1–1128); "In divinum Platonem epitomae" (1129–1533); "In Plotinum Philosophum ex Platonici familia nati" (1534–1800); "Expositio Prisciavi & Marsilii Theophrastum defenso, ac phantasia, & intellectu" (1801–1835); "Mercurii Trismegisti Pymander, de potestate ac sapientia Dei item Asclepius de voluntate dei" (1836–1870); "Iamblichus de mysteriis Aegyptiorum, Caldeorum, atque Assiriorum" (1873–1907); "Proclus de anima & daemonum [commentariis in Alcibiadem Platonis primum]" (1908–28); "Proclus de sacrificio & magia" (1928–29); "Porphyrius de occasionibus sive causis ad intelligibilia nos ducensibus" (1929–32); "Porphyrius de abstinence animalium [de animi ascenta & descenta]" (1932–38); "Psellus de daemonibus" (1939–44); "Pythagore aurea verba & symbola" (1978–79).

Here one finds those late neoplatonists (Iamblichus, Proclus, Porphyry, Psellus) whom Brian Copenhaver (1988 and 1990) identified as Ficino's main inspirations—together with the tracts of the *Corpus hermeticum*, or, as Ficino translated, "Mercurii Trismegisti Pymander, de potestate ac sapientia Dei item Asclepius de voluntate dei." And if we are looking for John Dee's possible sources of hermetism, it is enough to look at this collection, in which Chapter 4 of the *Corpus hermeticum* in its title mentioned a monad: "Mercurii ad Tatium Crater, sive Monas." The very first sentence of the text refers to *that* magical language/grammar that Walton, Clulee, myself, and now Harkness have considered as the main idea behind Dee's *monas*:¹⁴

Since the craftsman made the whole cosmos by reasoned speech, not by hand, you should conceive of him as present, as always existing, as having made all things as the one and only and as having crafted by his own will the things that are. (4.1; quoted from Copenhaver 1992, 15)

The passage then speaks about man's exaltation: "The man became a spectator of god's work. He looked at it in astonishment and recognized

its maker" (4.2). And "God shared reason among all people" (4.3). In the conclusion of the chapter, Hermes explains the mystery of the unit of oneness, the monad:

The monad, because it is the beginning and root of all things, is in them all as root and beginning. Because it is a beginning, then, the monad contains every number, is contained by none, and generates every number without being generated by any other number. (4.10; Copenhaver 1992, 17)

This is exactly how Dee's monad works: it represents oneness but one can derive from it all numbers, all letters, in fact all (alphanumeric) systems of information. Ficino's commentary to this locus emphasizes the *exaltatio* of man catalyzed by numbers: "Mox unitatis, & numerorum analogia, ad veram monadem cogitandam, verosque naturæ numeros nos elevat. Haec Crater" (Ficino 1576, 2:1842–43).

Recently Håkan Håkansson has studied Dee's annotations in the Greek *Corpus hermeticum* and emphasized that it was the gnostic themes of these texts towards which Dee directed his attention in his marginal notes. Håkansson corroborates my view that in Chapter 4 the "Crater sive Monas" image could represent for Dee that kind of divine illumination he associated with the magus-adept in the *Monas hieroglyphica*.¹⁵

Ficino's compendium included the editor's most radical esoteric work: *De vita triplici*. Although Dee did not annotate this part of the book, this may result from the fact that he possessed *De vita* in two other editions (R&W 779, 896) which have not survived.¹⁶ If we compare John Dee's speculations and the third part of the work, that is, *De vita coelitus comparanda*, which contains the author's boldest occult deliberations, we notice first of all a great deal of similarity between them concerning the general aims of magical operations. A program drawn up in one of Ficino's chapters strikingly resembles the English Doctor's ultimate goal with his monad:

But why, then, should we neglect a universal image, an image of the very universe itself? Through it, they seem to hope for a benefit from the universe. The adherent of these things, if he can do it, should sculpt an archetypal form of the whole world. (3.19; Ficino 1989, 343–45)

Although mostly concerned with talismanic images representing the classical deities of the planets, Ficino also thought highly of mathematical and geometric entities that could serve as a sign repertoire for the construction of the universal image:

To keep you from distrusting figures too much, astrologers will order you to remember that [. . .] numbers and figures, to obtain celestial gifts, they are very powerful. For in the heavens, lights, numbers, and figures are practically the most powerful of all. [. . .] For thus figures, numbers, and rays, since they are sustained by no other material, then deservedly they claim the most dignity in the primary—that is the celestial—levels of the cosmos. (3.17; Ficino 1989, 329)

Then he arrived at concrete geometrical elements, praising their power to express universal harmony: “Proportions constituted out of numbers are almost figures of a sort, made, as it were, out of points and lines” (3.17, 331). And finally, he offered geometrical shapes for his talismans in a way that might have inspired Dee to construct his monad out of circle and straight lines forming a cross:

The recent authorities on images have accepted as the general form for these a round shape in imitation of the heavens. The more ancient authorities, however, as we have read in a certain Arabic miscellany, used to prefer above all other figures that of a cross for the following reason. [. . .] Above all a cross, like a plane, possesses length and breadth. This figure of the cross is primary; also, of all the figures, it is rectilinear in the highest degree, and it has four right angles. (3.18, 335)

As we know, Dee also added a geometric form (two semicircles) to the diagram, which was to represent the element of fire, corresponding to the fiery zodiacal sign of Aries. Referring to the appropriate time of the operation, Ficino also pointed out the importance of Aries:

But when exactly should he imprint it? When the Sun has reached the first minute of Aries [. . .] because a particular Lot of the world being reborn, so to speak, is revolved through the same position in every year. At this time, therefore, he should construct the figure of the world. (3.19, 343–45)

These textual parallels not only include the very geometrical base, but also Dee's intention to offer the monad as a mystical object for revelative contemplation. A similar goal is designated by Ficino for his talismanic images: “Nor should one simply look at it but reflect upon it in the mind” (3.19, 347). And since he renders “reflection” into seven steps—in harmony with the number of the planets—it is interesting to see that after four elementary stages or functions, the three higher ones relate to different

human intellectual activities. The fifth is the sphere of imagination ("Fifth are the strong concepts of the imagination—forms, motions, passions"—Mars), the sixth is discursive logic ("the sequential arguments and deliberations of the human reason"—Jupiter), while the seventh could be called intuition ("the more remote and simple operations of the *understanding*, almost now disjoined from motion and conjoined to the divine"—Saturn).¹⁷ This is the concept that Thomas Hoby in his translation of Castiglione's *The Courtier* also named "understanding":

In our soul there be three manner ways to know, namely, by sense, reason, and understanding; of sense ariseth appetite or longing, which is common to us with brute beasts; of reason ariseth election or choice, which is proper to man; of understanding, by the which man may be partner with angels, ariseth will.¹⁸

The idea of the reborn world comes up often in Dee's later mystical writings, the private diaries. The importance of this idea for Ficino has recently been demonstrated by Michael Allen. In *Nuptial Arithmetic* he examined Ficino's commentary on the famous "Fatal Number" section in Plato's *Republic* (Book VIII). In the complex analysis of Ficino's number symbolism, Allen points out that "Ficino was in no position to follow his brother Platonist Pico della Mirandola into the arcana of cabalistic gematria with its substitutions, [. . .] still such intellectual consequences were the next logical steps" (Allen 1994, 144).

Drawing a conclusion from the above remark, I am suggesting that Ficino's cited passages of *De vita coelitus comparanda* can be treated as Dee's main and immediate textual source for constructing the monad, and if Pico's cabala was the next logical step deriving from Ficino's magic, then Dee took the following two logical steps: first, constructing a geometrical-cabalistical-magical cosmogram, then abandoning the whole enterprise and turning directly to angel magic.

The theorems of the *Monas hieroglyphica* explain the cosmic image on two planes: the geometrical, cabalistical, and anagogical interpretations—including astrological, alchemical and linguistic insights—highlight how the elements and proportions can give a mystical but strictly scientific expression of the ultimate cause of the World, the Oneness. The second plane refers to Man, the Magus who goes through a mystical transmutation of "understanding," the *exaltatio*.

As for the elements and mystical proportions of the monad, interpreters have pointed out the mathematical (cabalistic as well as geometrical), astrological, alchemical, and linguistic components. In the theorems, Dee mostly concentrates on the mathematical aspects and adds explanatory charts to show how the combination of simple forms (straight line, circle, point, crossing lines at right angles) can symbolize the general principles of the natural cosmos. As he explains in Theorem VI,

We see Sun and Moon here resting upon a rectilinear cross which, by way of hieroglyphic interpretation, may rather fittingly signify the ternary as well as the quaternary: the ternary [in so far as it consists] of two straight lines and one point which they have in common and which, as it were, connects them; the quaternary of four straight lines including four right angles [. . .]. And so here the octonary offers itself in a most secret manner, of which I doubt whether our predecessors among the magi ever beheld it, and which you will especially note. The magical ternary of the first [of our] forefathers and wise men consisted of body, spirit, and soul. Thence we see here manifested a remarkable septenary, to be sure of two straight lines and a point which they have in common, and of four straight lines separating themselves from one point. (Dee 1964, 157; cf. Figure 6.4)

FIGURE 6.4 Compositional schemes of the Monad. Compiled by Gy. E. Szönyi from the illustrations of the *Monas hieroglyphica*, copy of Wolfenbüttel [223.3 Quod 1/1].

A near-contemporary interpreter Thomas Tymme (who planned an English translation of the *Monas* although we have only his preface to the projected edition) included the alchemical aspects in his explanation of the work's number symbolism:

By the word TERNARIE is meant the first matter of the Philosophers stone, which are there in.

By the QUATERNARIE is meant the 4 Elements: Water, Earth, Fire & Air.

By the QUINARIE is understood Quintessence.

By the SEPTINARIE is understood the 7 heavenly Planets [. . .] by which are meant Gold, Silver, Lead, Tynn, Iron, Copper & ☿ or Quick Silver.

By the BINARIE is understood common quick Silver, which is not the Mercury of the Philosophers, and therefore being without that Mercury it is rejected as a false Medicine. . . .

By the OCTONARIE is understood the 8 parts of Alchimy: Calcination, Dissolucion, Coniuncion, Putrifaccion, Separacion, Coagulation, Sublimacion, & Fixacion.

By the DENARIE is meant the Multiplicacion of Gold & Silver, by the perfection of the Medicine, from 1 to 10, from 10 to 100, & so by the Number to a Number Infinite by Arithmetically proportion. (Tymme 1963, 27–28)

Dee himself refers to the alchemical importance of the monad when he identifies the double semicircles at the bottom of the diagram with the astrological sign of Aries: this is nothing other than the sign of fire providing heat for the transmutation (X–XI; Dee 1964, 161). The egg-shaped frame of the diagram furthermore refers to alchemy, as it may stand for the alembic of the adept, also called the egg of the philosophers. Here Dee again calls attention to the interrelatedness of astrology and alchemy (*astronomia inferior*, XVIII).

In Charles Nicholl's interpretation, mystical geometry, number symbolism, and alchemy make the monad "a cosmogram of astrological import, [and on the other hand it] works as a talismanic synopsis of the alchemical process" (1980, 45). The alchemical plane of reference incorporates the doctrine of *exaltatio* or deification of man in Dee's natural philosophy. As Nicholl suggests, the creation of the alchemists' Mercury—that is, the quintessential, perfect Mercury in the final phase of the Work—leads to the liberation of the spirit, too, because the process of (spiritual) alchemy entails two transformations: while it captures the celestial energies and channels them into the material, it also elevates the soul and leads it back to the supernatural spheres from the prison of the material

substance. Elaborating on this process, in the preface written to Maximilian, Dee interprets his "magic parable" as follows:

This, our hieroglyphic monad possesses, hidden away in its innermost centre, a terrestrial body. [The monad] teaches without words, by what divine force that [terrestrial body] should be actuated. When it has been actuated it is to be united (in a perpetual marriage) to a generative influence which is lunar and solar. [. . .] When this Gamaaea has (by God's will) been concluded, the monad can no longer be fed or watered on its native soil, until the fourth, great, and truly metaphysical revolution be completed. When that advance has been made, he who fed [the monad] will first himself go away into a metamorphosis and will afterwards very rarely be held by mortal eye. This, O very good King, is the true invisibility of the *magi*, which has so often been spoken of. . . . (Dee 1964, 135–37).

In developing a philosophy of the alchemical *exaltatio* of man, Dee's masters were undoubtedly the hermetist magi Ficino, Agrippa, and Paracelsus. Agrippa in *De occulta philosophia* (1533) claimed that

magicians affirm, that not only by the mixture and application of natural things, but also of images, seals, rings, glasses, and some other instruments, being opportunely framed under a certain constellation, some celestiall illustration may be taken, and some wonderful thing may be received; for the beams of the celestiall bodies being animated, living, sensuall, and bringing along with them admirable gifts and a most violent power, do, even in a moment, and at the first touch, imprint wonderful powers in the images, though their matter be less capable. (2.35; Agrippa 1997, 373)

Similarly, Paracelsus in his *Astronomia magna* wrote,

The Magus can transport many meadows of heaven into a small pebble, which we call 'Gemaheu,' or 'Imago,' or 'Character.' For these are containers in which the magus keeps sidereal forces and virtues as in a box. (Paracelsus 1589–1591, 10:376)¹⁹

All the Renaissance magi tried to clarify through natural-philosophical speculations the nature of that transcendental material, or radiation, or agent that transferred the energy of the *anima mundi* to the talismans. These philosophers also strongly asserted the bidirectional nature of this

process: if the magus can draw the power of the World Soul to base matter, so can he elevate himself above the material world.

In the alchemical process the catalyzer is the pure mercury, "the celestial messenger" (Dee 1964, 177). The transmutation means the meeting of two worlds, represented as a marriage, where the "terrestrial body" is the material of the *Gamaaea* or talisman by the help of which the magus can boost its elevation. The talisman—because of its inscription—is also a character or sign of the heavenly language, the exploration of which is the ultimate goal of the magus. This aspect of metaphysical linguistics has only recently been explored: following Clulee's train of thought, Umberto Eco in his book on *The Search for the Perfect Language* connected Dee's interest in the reconstruction of a mystical and universal language to Postel's similar objectives (1995, 185–90). As he pointed out, the view that the three sacred languages (Hebrew, Greek, Latin) developed from a common geometrical-numerological base was put forward by Postel in his *De originibus* (1553). The Frenchman there claimed that "every demonstration of the world" came from point, line, and triangle, and that sounds themselves—following the principles of Pythagoras—could be reduced to geometry.²⁰

In the theorems Dee, who of course had *De originibus* in his library,²¹ exercised various manipulations on the monad (rotation, dismantling, combination and permutation of its elements), not unlike cabalistic, numerology works on and with the Hebrew characters. The preface to Emperor Maximilian clearly refers to this "science":

The science of the alphabet contains great mysteries, since He, who is the only Author of all mysteries, has compared Himself to the first and last letter (which is to be understood not only for the Greek language, but also for the Hebrew and Latin ones). How great, then, must be the mysteries of the intermediate letters? [. . .] We have demonstrated that the shape of all letters are derived from points, straight lines and the circumferences of circles. [. . .] By the same process we discover clearly enough that the first humans could not have established out of such mystical principles that very stupendous fabric of the Hebrew letter and the Nekudoth had not the afflation of the divine power been most [effectively] present. (Dee 1964, 125–27)

From this it would follow that his intention in the construction of the Monad was not only the creation of a mystical emblem for contemplation,

a mandala, but also a “geometrical automaton” that could generate the alphabet of all languages and thus would represent the universal principle of language.

Theorem XXII of the *Monas hieroglyphica* wonderfully unites in a concise maxim the interconnectedness of metaphysical semiotics and *exaltatio*:

The Logos of the creative universe works by rules so that man, godly-minded and born of God, may learn straightforward work and by theological and mystical language. (Dee 1964, 201)

This mystical language, then, like the inscription on a talisman, can transmit the energy of the World Soul and, conversely, can illuminate the magus with intuitive understanding. Does not this, again, remind us of Ficino's aphorism from *De vita*: “Nor should one simply look at it but reflect upon it in the mind?”²² And if one moves from “looking” to “reflecting,” the meditation over the revelatory cosmogram-mandala can accomplish the magical *exaltatio* spoken of in the *Tabula smaragdina*: “It ascendeth from the Earth into Heaven, and againe it descendeth into the Earth, and receiveth the power of the superiours and inferiours. So shalt thou have the glorie of the whole world.”²³

By no means exhausting all the possible magical connotations of the *Monas hieroglyphica*, I would conclude by comparing the first two great works of John Dee. One can clearly see the continuity between them as well as the innovation Dee added to the *Monas*. When writing the *Propaedeumata*, Dee was primarily still a scholar only superficially interested in the occult philosophy. By the time of the *Monas* Dee had turned into a hermetic magus, albeit one who had not entirely abandoned his earlier scholarly objectives and who still had the ambition of uniting the “old science” (Roger Bacon) with the “new philosophy” (Ficino, Agrippa, and Paracelsus) and “linguistics” (Postel). The connecting link between the two works was his ever present desire to acquire a superior knowledge that could lead him to the comprehension of the nature and intentions of the Logos. In this sense the *Monas* represents the ultimate step toward pure theology, the term meaning, of course, not orthodox dogma but a highly intriguing and idiosyncratic interconfessionalist vision.

MAGIC: *THE MATHEMATICALL PRAEFACE*

As I have already emphasized, Dee's career was characterized throughout by the pursuit of perfect knowledge and this crystallized in the search for the *lingua adamica* from the time of his constructing the hieroglyphic monad.

From this point on, Dee became more and more imbued with a spiritual-cosmic vision and this concern can clearly be felt even in his most practical work, the lengthy *Preface* to the English translation of Euclid's *Elements* (1570).²⁴ This introduction was to serve the popularization of mathematics in the vernacular and show how it could support the arts and crafts. Dee in fact created a whole new scientific terminology, at the same time giving a retrospective summary of his previous scientific studies. To a superficial reading, it seems that the *Preface* is nearer to the old, scholarly Dee of the *Propaedeumata* than to the magus of the *Monas*. Evidence of this is that while he mentions his work of 1558, he neglects to refer to his "hieroglyphics" (Clulee 1988, 146–48). Because of this, Roberts and Watson call this work a "retrospective" endeavor (1990, 9–10), also noticing that while the *Monas* was secretive, speaking to a small number of elect, the *Preface* is much more open, ecumenical, programmatic, and didactic. Interestingly, the literature Dee cites is relatively outdated, mentioning from among his books only those he had bought before 1560.

In this respect, the beautifully executed emblematic frontispiece can also be considered conservative; it has no esoteric motives, only scientific elements and figures. The ten-fold division contains six portraits of classical philosophers and scientists, and four emblematic pictures representing the subjects of the quadrivium (cf. Figure 6.5).

FIGURE 6.5 Frontispiece of Euclid's *Elements* with Dee's *Mathematicall Praeface* (London, 1570). University of Chicago, Department of Special Collections, reproduced from Dee 1975, 35.

It should also be noticed, however, that by that time his mind was already fixed on the "Otherworld," and Clulee suggests that the Doctor's new preoccupation can definitely be felt as a subtext of his main discourse. On the frontispiece, this subtext is indicated by the emblems of the Sun and the Moon, while at the bottom of the page one sees Mercurius carrying his winged staff with two serpents twined around it.

In the text itself, according to his new orientation, Dee develops a diction occasionally using phrases recalling the neoplatonists. He praises harmony, mathematics, and proportions in passages that at times soar up like prayer, like in the chapter explaining the laws of Archimedes:

Thou onely, knowest all things precisely (O God) who hast made weight and Balance, thy Judgement: who hast created all things in Number, Waight, and Measure. [. . .] And for as much as, of Number and Measure, the two Artes (auncient, famous, and to humaine uses most necessary) are, all ready, sufficiently knowen and extant: this third key [the weight], we beseech thee that it may come to the nedefull and sufficient knowledge, of such thy Servantes, as in thy workmanship, would gladly finde, thy true occasions whereby we should glorify thy name, and shew forth thy wondrous wisdom and Goodness. Amen. (Dee 1975, b.iiiij^v)

Such passages indicate that Dee by no means wanted to write a simple engineers' handbook; rather, he considered the mathematician a magus, capable of *exaltatio*. According to Knoespel (1987), this highly rhetorical diction identifies Dee's writing as premodern scientific discourse, since—as opposed to the language of the Scientific Revolution—it still heavily relied on images, allegories, and analogy, and the mixing of mathematical formulas with biblical quotations and religious eulogies.²⁵ In this vision the applied mathematician was not yet liberated from logocentrism and he appeared as the priest of science, even of culture:

All things (which from the very first originall being of things, have bene framed and made) do appeare to be formed by the reason of Numbers. For this was the principall example or patterne in the minde of the Creator. O comfortable allurements, O ravishing perswasion, to deale with a Science, whose subject is so auncient, so pure, so excellent, so surmounting all creatures, so used of the Almighty and incomprehensible wisdom of the Creator, in the distinct creation of all creatures [. . .] by order, and most absolute number, brought, from Nothing to the Formalitie of their being and State. (Dee 1975, *j)

From such an ideological platform Dee wanted not only to educate his readers but to offer a kind of mystical initiation into science. His deep veneration of the mathematical arts resulted from his conviction that the proportions and balances as well as the cabalistical numerological correspondences taught the secrets of God's creative mind. Because of this logic, he emphasized the importance of the vernacular translation in a peculiar way. Although he never spoke against the official seats of learning, the universities, he also suggested that initiation into mystical knowledge was not a sole privilege of the higher schools of education. The adept must learn, but university position could not guarantee the proper intuition also needed by the scientist.

In the *Mathematicall Praeface* . . . Dee created a hierarchy of sciences that culminated in *Archemastrie*, a discipline he characterized as follows:

This Arte, teacheth to bryng to actuall experience sensible, all worthy conclusions by all the Artes Mathematicall purposed, & by true Naturall Philosophie concluded. [. . .] And bycause it procedeth by *Experiences*, and searcheth forth the causes of Conclusions, by *Experiences*: and also putteth the Conclusions them selves, in *Experiences*, it is named of some, *Scientia Experimentalis*. [. . .] But wordes, and Argumentes, are no sensible certifying: nor the full and finall frute of Sciences practisable. (Dee 1975, A.iiij^v)

Historians of science have often interpreted the above passage as evidence that Dee professed the experimental and practical disciplines and, what is more, advocated science in the vernacular, so in this respect he could be regarded as an important forerunner of the Scientific Revolution. But at this point one should remember Allen Debus' caveat from the 1970s: "In reality sixteenth-century natural magic was a new attempt to unify nature and religion" (1978, 13). And, indeed, by putting Dee's "Scientia Experimentalis" in the wider context of the work, we must be cautious about this carefree deduction. Immediately after the above passage Dee introduces the chief auxiliary sciences of *Archemastrie*, which according to him are

the *Science Alnirangiat*, great Service. Under this, commeth *Ars Sintrillia*, by Artephius, briefly written. But the chief Science, of the Archemaster, as yet knowen, is an other OPTICAL Science: whereof, the name shall be told when I shall have some (more just) occasion, thereof, to Discourse. (Dee 1975, A.iiij^v)

Although Dee apparently had no more occasion to expand on these sciences and never gave a clear definition of optics as he understood it,

in the next chapter—following Clulee's investigations—I shall suggest that these sciences were more magical activities than experimental natural sciences. Under optics, in fact, we can find *scrying*, crystal gazing, which by 1570 was definitely on the horizon of his interest (see Harkness 1999, 63–78). And Dee's purpose with this kind of optical magic, no doubt, was to attain to great, superhuman knowledge. Clulee tried to derive Dee's interest in mystical intuition from Roger Bacon's works and his frequent use of the words *experience* and *experiment*. By the time he was writing the *Preface*, Dee had accumulated so much literature of modern Renaissance magic that we ought to look for the genesis of such ideas in the works of, say, Paracelsus, too. In his treatise on syphilis, the German Doctor wrote,

The right path does not consist in speculation, but leads deep into experience. From experience the physician receives help, and upon it rests all his skill. He must have rich knowledge based on experience, for he is born blind, and book knowledge has never made a single physician. For this purpose he needs not human, but divine things, and therefore he should not treat truth light-headedly. He does not act for himself, but for God, and God bestows His grace upon him so that he may come to the assistance of his fellow men in their needs.²⁶

Dee's definition of *archemastrie* is in harmony with Paracelsus' views: "There, then the Archemaster steppeth in, and leadeth forth on, the Experiences, by order of his doctrine Experimentall, to the chief and finall power of Naturall and Mathematical Artes" (Dee 1975, Aiiij^v).

External evidence of Dee's admiration for Paracelsus can be found in the *album amicorum* of the famous Swiss natural scientist Conrad Gesner, whom Dee visited in Zurich in April 1563. In the album, next to Dee's signature, Gesner commemorated his English guest's great knowledge of and interest in Paracelsus (cf. Durling 1965, 134 ff).

But what was behind his burning desire to have a glimpse of the mysteries of Creation? His motivation was the same as that of the Florentine neoplatonists, and later on of Trithemius, Agrippa, and Paracelsus, that is, the new self-consciousness of Renaissance man who considered himself God's almost equal partner and asked for his share from the secrets of nature. Its logic was driven by a confidence that God could not be pleased with the praises of the simply humble, will-less, and boring creatures; rather, he would require the adoration of ennobled and all-powerful humans, suited to the label "the image of God."

With this in mind it is difficult to enroll Dee among the forerunners of the seventeenth century epistemological reform; rather, he seems to represent a return to occult universalism, which was one of the products of the ideological crisis on the eve of the Renaissance. An examination of his last intellectual period, that is, the full bloom of his angel magic, shows that he finally arrived at a conviction according to which—because of internal contradictions—rational scientific progress was not feasible for the purposes of humankind. From this dilemma he managed to create an almost perfectly consistent theory of meta-science or anti-science, whichever term one wishes to use.

This page intentionally left blank.

Illuminaton and Angel Magic

Earlier Dee studies tended to separate the Doctor's "scholarly phase" from the twenty-five-year long period of "angel conferences." In fact, traditional science historians were not able to handle this phenomenon within the sphere of their subject field. Apart from two exceptional accounts of professional historians (Evans 1973; Firpo 1952), it was only in the 1980s that new efforts were made to look at the entirety of Dee's output from a unified perspective. The first decisive steps in this direction were taken by Christopher Whitby (1981/1988, 1985)¹ and Wayne Shumaker (1982, 15–53). Following these pioneers, Clulee's analysis "from science to religion" produced the first extensive and widely contextualized study, embracing Dee "the scholar" as well as "the mystical and supermetaphysical philosopher" (1988, 203–31). Clulee's example was emulated by Harkness to that extreme that she speaks about Dee's earlier scientific works as "the genesis of the angel conversations," (1999, 60–98). I would be cautious to follow her to that point, since such an approach might repeat the earlier blunder of the Yates school by explaining all and everything from one single vantage point. In this respect I would rather side with Clulee, who was careful enough to show the variety and the inconsistencies in Dee's intellectual development. As I see now, Dee must have been haunted by the same *idée fixé* during his long life, which pushed him through schools and books and acquaintances pursuing knowledge, power, and prestige. But at various stages of his career this single drive manifested itself in various forms, leading him to various subject fields and various ideological positions. Looking backward, one can say that his recourse to

angel magic was a logical conclusion of his earlier efforts, but at the time of his other attempts that outcome was not at all inevitable. While pursuing results by means of the natural sciences, the Doctor's final goals were nevertheless very similar to what we identify as being supernatural and magical today. On the other hand, while becoming engaged entirely in angel magic, Dee still considered himself a scientist looking for the ultimate truths of nature.

Dee's angel—or Enochian—magic can be examined from several aspects. In the following subchapters I shall look at some of these, trying to answer the questions:

—what was the scholar's motivation in turning away from science and pursuing angel magic?

—what was the philosophy behind angel magic and the connected idea of the *lingua adamica*?

—what was the nature of Dee's practical methodology, that is, scrying, and how was it related to the program of conversing with angels?

—what were the contents of the angelic conferences, and how may a typology be established concerning these?

—what can we say about Dee's theology and religion in view of his angel magic?

Finally, in the next chapter I am going to touch upon one more, equally important aspect—the historical anthropology and sociology of Dee's occultism, which includes his relation to his scryers as well as Meric Casaubon's early explanation of Dee's spiritual magic.

ANGEL MAGIC AND THE SEARCH FOR THE PERFECT LANGUAGE

From the perspective of a positivistic model of science history, Dee's turning from humanism to magic was described by John E. Bailey, editor of his diary, as follows: "[Dee had] long forsaken the exact sciences, having exhausted their study; and had devoted himself to the blighting influence of occult investigations, intermingling with them in credulous simplicity what remained in him of the Christian faith" (Dee 1880, 2).

One of Dee's remarks of a confessional quality helps to explain this change. When he was finally given an audience by Rudolf II in Prague, he explained his life-long ambition in and his disillusionment with science as follows:

Hereupon I began to declare that All my life time I had spent in learning: but for this forty years continually, in sundry manners, and in divers Countries, with great pain, care, and cost, I had from degree to degree sought to come by the best knowledge that man might attain unto in the world: and I found (at length) that neither any man living, nor any Book I could yet meet withal, was able to teach me those truths I desired and longed for: And therefore I concluded with my self, to make intercession and prayer to the giver of wisdom and all good things, to send me such wisdom, as I might know the natures of his creatures; and also enjoy means to use them to his honour and glory. (Dee 1659, 231)

The quotation certainly displays scepticism and disappointment with science but also, in fact, that his transition from science to magic was not as abrupt as it seemed until recently. Based on analysis of the unpublished spiritual diaries, Yewbrey (1981) and Whitby (1981/1988, 1985) called attention to the fact that Dee started his angel magic before 1581, the usual date accepted by scholars. According to his first, previously unstudied angelic diary, he had already employed a scryer in 1579 and, commenting on this, he even added: “Ab anno 1579. hoc ferè modo: Latinè vel Anglicè (ast circa annum 1569 alio et peculiari . . . , ”¹² that is:

From the year 1579 usually in this manner: in Latin, or English; (but around the year 1569 in another and special way: sometimes on behalf of Raphael, sometimes of behalf of Michael it has been most pleasing to me to pour out prayers to God: God works his wonderful mercy in me. (Yewbrey 1981, 167)

The reference to 1569 is very important because just at that time, during 1569 and 1570, Dee was also working on one of his most ambitious scientific works, the *Mathematicall Praeface*, in which he attempted a synthetical survey of all the mathematical sciences. The question thus becomes even more relevant: what was the relationship, if any, between Dee's scholarly thinking and the angelic conversations? I have already emphasized to what extent the ambition to gain omniscience motivated Dee's investigations in natural philosophy. His radical turn from science to magic, in my view, must have been in close connection with this ambition. Dee's preface to the above quoted spiritual diary started with a confession similar to the one he delivered before Rudolf:

I have from my youth up, desyred & prayed unto thee [i.e. God] for pure & sound wisdom, and understanding of some of thy trutthes naturall

and artificiall, such as by which, thy goodnes & powre bestowed in the frame of the word might be brought, in some bountifull measure under the talent of my capacitie, to thy honor & glory, & the benefit of thy Servants, my brethren & sistern. (MS Sloane 3188; Dee 1996, 1.4)

This burning desire for inspired knowledge led him to various fields of the natural sciences, including mathematics, geometry, astronomy, and philosophy, but we would not miss the fact that a strong theological framework was present in his thought from the very beginning of his career. His admiration for the work of creation led him to a hymnic eulogy in the *Propaedeumata*:

The revolution of the stars has been established for the sake of that total and unceasing celestial harmony—which is a kind of first form of everything. [. . .] The most beneficent and wise Maker of the whole having ordained things in this way. (LXXV; Dee 1978, 163)

No wonder that he concluded his work with these words: *SOLI DEO HONOR ET GLORIA* (198). The same deep religious enthusiasm can be found in his later works, too. He offered the *Monas hieroglyphica* to Emperor Maximilian with the following advice:

For all things, visible and invisible, manifest and most occult things, emanating (through nature or art) from God Himself, are to be most diligently explored in our wanderings, so that thereby we may proclaim and celebrate HIS GOODNESS, HIS WISDOM, & HIS POWER. (Dee 1964, 125)

The *Mathematicall Praeface*, too, abounds in such passages:

The Heavens declare the Glorie of God: who made the Heavens in his wisdom: who made the Sonne, for to have dominion of the day: the Mone and Sterres to have dominion of the nyght: whereby, day to day uttereth talke: to night declareth knowledge. Prayse him, all ye Sterres and Light. Amen. (Dee 1975, biiij)

Although the theological texture of the above three quotations is homogeneous, the three works from which they were cited represent Dee's stations along his journey from science to magic. At the beginning of his career he strongly believed in the potential of the natural sciences and perhaps it was his "discovery," explained in the *Propaedeumata*, that an astrologer should calculate using over twenty-five thousand constellations for a single nativity chart, that disturbed his trust in quantitative science.

The disappointment led Dee to another trend of natural philosophy, Renaissance hermeticism, which combined neoplatonism, Ficino's talismanic magic, and Paracelsus' spiritual alchemy. This train of thought was stretched to its ultimate limits in the *Mathematicall Praeface*, where Dee laid the theoretical foundations of *archemastrie*, a universal science (Dee 1975, Aiii).

By the early 1580s he must have become disillusioned with this universal science, too, as we may see in the confession written in his spiritual diary in 1581 and later reconfirmed before Emperor Rudolf in 1584. He must have come to the conclusion that no human discipline could lead to the desired omniscience. His situation thus became quite similar to that of Doctor Faustus—we remember how Marlowe's hero cried out with great dismay about the uselessness of human sciences:

Settle thy studies, Faustus, and begin
To sound the depth of that thou wilt;
Having commenced, be a divine in show,
Yet level at the end of every art. . . .

(A text 1.1.1–3)

Philosophy is odious and obscure,
Both law and physic are for petty wits;
Divinity is basest of the three.
Unpleasant, harsh, contemptible and vile. . . .

(A text 1.1.138–41; quoted from Marlowe 1991)

Although the English Doctor did not make a covenant with the Devil, he arrived at a method of trying to gain superhuman knowledge that he himself had abhorred earlier. In general, he rejected the use of demonic magic and always passionately complained of being called a sorcerer or conjuror.³ On the other hand, he always believed in a strong symbiosis of science and deep religious faith, which necessarily affected his scholarly work, too. In 1592, in an apology, Dee summed up his program of a combined scientific and spiritual *exaltatio* as follows:

By the true philosophical method and harmony proceeding and ascending, (as it were) *gradatim*, from things visible, to consider of things invisible from things bodily, to conceive of things spirituall: by things mortall to have some perseverance of immortality. And to conclude: by the most mervailous frame of the *whole World*, philosophically viewed, and circumspectly weighed, numbered, and measured, most faithfully to love, honor, and glorifie alwais the *Framer* and *Creator* thereof. (published in Dee 1659, 57; also 1851, 72)

It seems, however, that at some point a disconcerting discrepancy emerged between Dee's religious convictions and his scientific program, which led him to abandon the scientific investigations entirely and turn to angel magic. In fact, this solution is remarkably logical from the Doctor's subjective vantage point. He came to the conclusion that if the human endeavor is insufficient to reveal the secrets of nature, man should turn directly to supernatural beings and gain information from them. This is how angel magic evolved as the ultimate solution to help Dee out of the failure of his scientific projects, and this is how the ex-humanist became more and more absorbed in the questions of the *lingua adamica*.

As I have pointed out in the introductory chapters, Dee, as an attentive reader of the Bible, was, naturally, well aware of those pieces of information in the sacred book that asserted the dignity of Adam in Paradise and dealt with the omniscient intellectual capacity given to Man prior to his fall.⁴ A beautiful visualization of the glory of our forefather can be found in Schedel's *Weltchronik*, depicting the creation of Adam on the sixth day. While being moulded from clay, Adam is holding the hand of God, surrounded by animals as if waiting for him to give names to all the beings of the world (Figure 7.1).

FIGURE 7.1 The sixth day of Creation: Adam names the beings of the world. From Schedel, *Das Buch der Chroniken* (Nürnberg, 1493), fol. 5^r. Somogyi Library, Szeged [Inc 10].

If ever John Dee had the chance to see this page, four lines above the illustration he could read the well-known hermetic maxim on the dignity of man in German: "O Asclepi, wie ein gross wunderwerck ist der Mensch."

This happy state and high status was ended by the disobedience of primordial humankind, but Renaissance philosophers never stopped searching the Holy Script (including the apocrypha and the pseudepigraphica) for signs of promise and hope that Man could regain the lost dignity. Next to Psalm 8:4–6 and Wisdom 7:15–21, a section from the Book of Jesus, Son of Sirach sounded especially promising:

The Lord endued them with strength by themselves, and made them according to his image. . . . They received the use of the five operations of the Lord, and in the sixth place he imparted them understanding, and in the seventh speech, an interpreter of the cogitations thereof. Counsel, and a tongue, and eyes, and a heart, gave he them to understand. Withal he filled them with the knowledge of understanding. . . . (Sirach 17:3–7)

The above passage suggests that one of the most important gifts of God to Man was the sacred language, through which communication with the godhead as well as understanding of the work of creation was possible. From this passage alone, the early modern thinker could infer that by recovering this lost sacred language all his ambitions and desires concerning *exaltatio* could be fulfilled. This train of thought is the key to John Dee's later scientific and philosophical investigations.

I have already shown how he suggested a way of recovering the perfect language in the *Monas hieroglyphica*. As it seems today, the monad was equally meant to serve as a mystical emblem for contemplation and also as a "geometrical automaton," which could generate the alphabet of all languages, thus contribute to the restoration of the lost universal language.

Realizing the failure of this project, Dee finally must have come to the obvious conclusion, namely, that he could not find any other way but turning to God directly:

I have sought [. . .] to fynde or get some ynckling, glyms, or beame of such the foresaid radical truthes: But after all my foresaid endeavor I could fynde no other way, to such true wisdom atteynning, but by thy Extraordinary Gift. . . . (MS Sloane 3188, 6^r; Dee 1988, 2:8; Dee 1996, 1.4)

I understand the phrase “extraordinary gift” as referring to Dee’s being permitted to contact the angels and learn the divine language from them.

He saw an encouraging example of such a gift in the Old Testament. The gift he craved was similar to Enoch’s privilege of learning the angelic language and being “translated” by God. According to Old Testament pseudepigraphica, it was Enoch who invented the human crafts and created writing for his descendants. Dee, on the basis of his readings on Enoch,⁵ associated the learning of Jared’s son with the use of a “shew-stone,” a crystal ball that could be used as the connecting device in communication with angels:

I have read in thy bokes & records, how Enoch enjoyed thy favour and conversation, with Moyses thou wast familer: and also that to Abraham, Isaac, and Jacob, Josua, Gedeon, Esdras, Daniel, Tobias, and sundry other, thy good Angels were sent, by thy disposition to instruct them, informe them, help them, yea in wordly and domesticall affaires, yea, and sometimes to satisfy theyr desyres, doutes & questions of thy Secrets. And furdernore considering the Shew stone which the high preists did use, by thy owne ordering. (ibid.)

Dee thus finally arrived at a radical method in order to gain supernatural knowledge: he employed a kind of magical divination to contact angels in order to learn directly from them the primordial perfect language, which had once been summarized for mankind by Enoch but was ultimately lost with the destruction of humankind at the time of the Flood. As Dee claimed, since Enoch he was the first human being who—by the help of angels—could have some insight into this language.

The fact is that Enoch caused quite a lot of excitement among early modern humanists and chiliasts. His portrait could be found even in such general encyclopedias, as Schedel’s *Weltchronik* (Figure 7.2). Dee’s direct source must have been Guillaume Postel’s *De originibus* (Basel, 1553) in which the French enthusiast related his meeting with an Ethiopian priest in Rome in 1547 who described for him the Book of Enoch in detail (cf. Bouwsma 1957, 13–14). As I have mentioned in another context, Dee possessed this book, and his surviving copy in the Royal College of Physicians testifies to his fascination with it: all the passages referring to Enoch are marked and underlined (R&W 868; cf. Clulee 1988, 297n. 25).

We cannot know if Postel and Dee discussed the question of Enoch at their meeting in France in 1551 but obviously Postel’s mystical and apocalyptic writings with their speculations on the origin of languages

FIGURE 7.2 The portrait of Enoch from Schedel's *Das Buch der Chroniken* (Nürnberg, 1493), fol. 10^v. Somogyi Library, Szeged [Inc 10].

attracted the English Doctor into a similar circle of thought. Postel might have also drawn Dee's attention to the Hebrew *3Enoch*. He was deeply interested in Jewish scholarship, including the cabala, and translated several important works of the Judaic tradition. Already before their meeting he had published *Candelabri typici in Mosis tabernaculo jussu divino* (Venice, 1548) in which he—following Johannes Reuchlin—advertised the *Zohar*, the *Bahir*, and the cabala as Jewish treasures leading to the final verification of the evangelical truths. He also translated and edited the *Sefer Yetsirah*. Its title page claimed that it was Postel who had recovered the text from Babylon and now decided to restitute it for the edification of mankind (*Abrahami patriarchae liber Jezirah sive formationis mundi* . . . Paris, 1552). In the same year he published one more exciting text, *Restitutio rerum omnium conditarum, per manum Eliae profetae terribilis*, which suggested that the horrifying prophecies of Elijah, deriving from the language of “Saint Adam,” would contribute to “the restitution” of the whole world the first example of which was his own “translation” by the Venetian Virgin (Bouwisma 1957, 276 ff.; Secret 1985, 178–86). There is no proof that Dee was aware of Postel's personal “restitution” as the first-born of

the new epoch, but his rhetoric in the spiritual diaries sometimes suggests something of a similar conviction about himself.

Although Dee could not have read the Book of Enoch, he and many other enthusiasts were eagerly awaiting the return of its manuscript. Even in the seventeenth century, several codices brought from Ethiopia stirred excitement in regard to the long awaited discovery. For example, a learned Capuchin monk retrieved a manuscript that he brought to Europe and believed to be the hunted text, but in 1683 Ludolfus Hiob clarified that it was an unknown Ethiopian work called "The Book of the Mysteries of Heaven and Earth"—nevertheless a close relative of the Book of Enoch. In this atmosphere, especially considering the passages in Postel's works of which Dee must have been well aware, one cannot be surprised that even without being directly familiar with the core of Enochian literature, the English Doctor chose this biblical-apocryphal character as his role model. And it was indeed logical that Dee, who could not have had access to the sacred text of the Book of Enoch, finally turned to the angels for information. And they seem to have been good informants because Enoch's appearance in Dee's private mythology embedded in his angelic conversations shows interesting convergence with the since-discovered original Enochian literature.

For example, the first part of *1Enoch* relates the story of the fallen angels, how they intercoursed with women and corrupted all men, and how Enoch tried to intervene on their behalf before God. This book is usually referred to as the "Book of the Watchers" (Charlesworth 1983, 5). As we shall see, Dee in one of his visions called a mighty angel "the chief Watchman" and his dwelling place a "Watch-Tower"⁶—all this may have been accidental but nevertheless suggests that the Doctor's train of thought ran parallel with that of the imagery of the Book of Enoch.

Let us now examine how the Enochian mythology unfolded in his spiritual diaries through the communication of Archangel Gabriel. On Saturday, April 21, 1584, at a scrying session, Gabriel himself revealed the mythical story of the *lingua adamica* to the bemused Doctor:

GABRIEL: Man in his Creation, being made an Innocent, was also authorised and made partaker of the Power and Spirit of God: whereby he not onely did know all things under his Creation and spoke of them properly, naming them as they were: but also was partaker of our [i.e. the angels'] presence and society, yea a speaker of the mysteries of God; yea, with God himself: so that in innocency the power of his partakers with God, and us his good Angels, was exalted and so became holy in the sight of God until that Coronzon (for so is the true name of that

mighty Devil) envying his felicity, began to assail him. [. . .] And [Man] was driven forth (as your Scriptures record) unto the Earth: where being dumb and not able to speak, he began to learn of necessity the Language in the which he uttered and delivered to his posterity, the nearest knowledge he had of God his Creatures. (Dee 1659, 92)

According to this piece of information, the prelapsarian Adam was partaker of the perfect divine knowledge and he could be set as the model and measure the magus wanted to achieve. The key to this knowledge seemed to be the reconstruction of the lost angelic language that would provide the way of return to the world of transcendental superexistence. Dee's solution was remarkably simple: according to his finally crystallized opinion, neither mathematics nor poetry could teach the language of angels. One should rather contact them and learn it from themselves.

The Archangel indeed assured the pious magus of the goodwill of the spirit world in sharing their knowledge with him:

With this that we deliver, which Adam verily spake in innocency, and never uttered nor disclosed to man since till now, wherein the power of God must work, and wisdom in her true kind be delivered: which are not to be spoken of in any other thing, neither to be talked of with mans imaginations; for as this Work and Gift is of God, which is all power, so doth he open it in a tounge of power. (ibid.)

So Doctor Dee devoted the last twenty some years of his life to this goal and, surprisingly, the scholar who was perfectly intimate with the most subtle intellectual procedures of his time chose the crudest way of contacting angels: scrying.

THE THEORY AND TECHNOLOGY OF ANGEL MAGIC

Theory and Sources

When we discuss the nature and procedures of scrying, we also cannot help noticing the connecting links between medieval science, natural magic, and this kind of uncultivated divination. So far these links have been largely neglected by science historians, but I hope to demonstrate that although Dee's recourse to the practice of crystal gazing may seem at first sight quite surprising, his decision was not at all a sudden and

whimsical resolution, but just the opposite; it followed from his previous ambitions and investigations.

Although there seems to be an enormous difference between optics and scrying, I agree with Clulee and Harkness that the roots of Dee's crystal magic should be looked for in his early interest in medieval optics. In connection with optics, one should remember that this term refers to at least two strands of exploration: first, the practical study of light rays in their effect on the human eye and in their reflective and refractive behavior in relation to objects, such as glass, crystal prisms, and water; and, second, mystical concepts concerning the occult operations of light, a potent force in activating inert matter.⁷ This double nature of optics can be compared to the Janus face of alchemy, which included practical procedures with chemical matter on the one hand and on the other spiritual transformation, that is, soaring up from base existence to supernatural understanding.⁸

Again similar to alchemy in which the two orientations did not separate, but rather overlapped, medieval optics was also a mixture of mystical concepts and practical observations. Thus in one of the most famous medieval Arabic treatises on optics, al-Kindi's *De radiis stellarum*, we find a concoction of theorizing from light rays to astrology (Clulee 1988, 52–69; Garin 1983). Even late medieval experimental optics—as in the works of Robert Grosseteste and Roger Bacon—was heavily influenced by neoplatonic mysticism, ideas related to the Plotinian emanations, and light imagery often borrowed from Jewish mysticism, primarily the *Zohar*. Dee was deeply influenced by these medieval opticians and his library catalogues testify what an amount of manuscripts and printed materials he collected in this field. In the following paragraphs I am going to demonstrate that each of Dee's major scientific works had some themes related to optics and that all these led toward a theory of magic.

Let us begin with the *Mathematicall Praeface* because this elaboration contained an interesting hierarchy of scientific disciplines. Dee made it clear that the ultimate end of any science should be the understanding of God's creative genius. In relation to this, Dee emphasized the cosmic significance of mathematics and suggested that the mathematical practitioner had the power to become a magus, capable of *exaltatio*, the emulation of God:

By Numbers [. . .] we may both winde and draw our selves into the inward and deepe search of all creatures distinct vertues, natures, properties, and Formes: And also, farder, arise, clime, ascend, and mount up

(with Speculative winges) in spirit, to behold in the Glas of Creation, the Forme of Formes, the Exemplar Number of all thinges Numerable: both visible and invisible, mortall and immortall, Corporall and Spirituall. . . (Dee 1975, *j-*j^v)

When mapping the hierarchy of sciences, Dee put on top a discipline called *archemastrie*. “So that, this Art, is no fantastick Imagination: as some Sophister might [. . .] dash your honest desire and Courage, from beleving these thinges, so unheard of, so mervaylous, & of such Importance” (1975 A.iii^v). As I have quoted earlier, here Dee also listed the auxiliary sciences helping the work of the Archemaster: *alnirangiat*, *ars sintrillia*, and *optical science* (see above, p. 177).

Nicholas Clulee has identified all three above mentioned sciences as magical practices. The expression *alnirangiat* derives from Arabic sources: the term *nīranġiyāt* meant a certain magical procedure; in the Arabic version of the *Picatrix* the term *nīranġ* referred to magical incantations that were used to invoke heavenly powers. It was also used in such contexts when pictures or talismans were involved. As Clulee explains, Dee’s source for this term was Avicenna’s *De divisionibus scientiarum*, in which “scientia *alnirangiat*” is listed among the subordinate branches of natural science. Here it is a form of natural magic, for the manipulation of the hidden virtues of things (1988, 167). Dee possessed this work in his library and from the surviving copy we know that he underlined the word *alnirangiat* and glossed on the margin: “magicae” (R&W 395).

The next science mentioned by Dee is *ars sintrillia*, which has been connected with the name of a medieval author, Artephius, who is often referred to in a great many treatises though his identity is unclear. According to Dee’s catalogue, in 1556 he possessed a manuscript that contained Artephius’ *Ars sintrillia* but this treatise is no longer extant. The only clue scholars have been able to track down is a remark of Guillaume d’Auvergne who mentions a certain Artesius known for his ability to conjure up visions by placing a glossy sword over a water basin so that the glittering of the two caused the viewer to see strange sights (Clulee 1988, 168). The context of Dee’s note makes this conjecture plausible since he subsequently lists “optick science,” which—also according to Clulee—is not only physics but rather crystallomancy, or as commonly known, scrying. As we have seen, Dee started his scrying experiments around the writing of the *Mathematicall Praeface* and his scientific treatise suggests that, at least at that point, he saw no fundamental contradiction between natural science and occult spirit lore.

Although Artephius' *ars sintrillia* has not been recovered, it should be remembered that Artephius, the legendary twelfth-century alchemist, was said to have lived over a thousand years due to the magic elixir he managed to distill. His story became a paradigmatic point of reference in sixteenth-century humanist mythologies and his name was occasionally associated with Enoch as well. François Secret in his studies (1979, 1990) brought together these motifs and many of our main heroes in an intriguing combination set in mid-century Paris. There is Postel, who in the 1540s worked in the Collège Royal founded by Francis I. His colleague there, Oronce Finé, the famous mathematician, extensively dealt with alchemical experiments, too, and introduced Postel to the art of "inferior astronomy." There are many references concerning alchemy in his early masterpiece *De orbis terrae concordia* (Basel, 1544), where, among others, he mentioned Artephius, who, thanks to his alchemical studies, succeeded in living 1020 years.⁹ According to the *Secret Book of Artephius*:

I, Artephius, after I became an adept, and had attained to the true and complete wisdom, by studying the books of the most faithful Hermes, the speaker of truth, [. . .] when I had the space of a thousand years, or thereabouts, which has now passed over my head [. . .] by the use of this wonderful quintessence. (Artephius 1999, paragraph 30)

Postel's source for this legend was Roger Bacon, of whom he could have learned from Finé's recent edition of Bacon's *De mirabili potestate artis et naturae*. A few years later Dee visited Paris and met Finé, with whom he could discuss not only Euclid but also his own beloved author, Roger Bacon, while he also met Postel, who was interested in Enoch and Artephius like himself. Soon after, Postel had his "restitution" by the reincarnation of his "Venetian Virgin," and from this time on he claimed that he was reborn and endowed with the gift of extremely long life. The legend, according to which he lived over 120 years, was still remembered in the seventeenth century. It was repeated by many distinguished scholars, such as the philosopher Francis Bacon (1560–1626) and Gabriel Naudé (1600–1653), Mazarin's librarian and the historiographer of the Rosicrucians (Secret 1979, 85).

Perhaps it was his conversations in Paris that set Dee to studying the critical edition of Roger Bacon's *Epistolae de secretis operibus et naturae*. To propel his enthusiasm, he could also consult Finé's earlier publication (Paris, 1542). Dee's text appeared only posthumously in Germany,¹⁰ but its English translation published half a century later still recalled the Doctor's editorial efforts: *Discovery of the Miracles of Art, Nature, and*

*Magick. Faithfully translated out of Dr. Dees own copy, by T. M. and never before in English.*¹¹ Here one could read about Artephius in the passage referring to the prolongation of life: “Artephius, who wisely studied the forces of animals, stones, etc., for the purpose of learning the secrets of Nature, especially the secret of the length of life, gloried in living for one thousand and twenty-five years” (Bacon 1923, 34–35).

The fame of Artephius continued also in France. His story was convoluted with that of Nicholas Flamel (1330–1418), the legendary French adept who was said to have discovered the elixir of long life himself and his followers believed that he was still alive though retired from the world, and would live for six centuries (Seligmann 1971, 123–24; Spence 1960, 162). A publication of 1624 finally introduced both Flamel and Artephius to the English readers: *Nicolas Flamel, His exposition of the hieroglyphicall figures which he caused to bee painted upon an Arch in St. Innocent’s Church-yard in Paris [. . .] Together with the secret booke of Artephius [. . .] concerning both the theoricke and the practicke of the Philosophers Stone. Faithfully done into English out of the french and latine copies by Eirenaeus Orandus.*¹²

Before returning to the career of crystallomancy in the Renaissance, I would like to mention one more aspect of “opticall science” that is also pertinent to Dee’s works. Already in 1558, in his first synthetizing work (*Propaedeumata aphoristica*), he mentioned “catoptrics” of which he wrote:

If you were skilled in “catoptrics,” you would be able, by art, to imprint the rays of any star much more strongly upon any matter subjected to it than nature itself does. [. . .] And this secret is not of much less dignity than the very August astronomy of the philosophers, called inferior [i.e. alchemy], whose symbols, enclosed in a certain Monad and taken from my theories, I send to you along with this treatise. (Dee 1978, 149)

Catoptrics in classical natural science meant the study of the radiation and reflection of light, and Roger Bacon in the Middle Ages devoted much work to this field. Not only in his great scholarly works did he discuss “burning mirrors” and the like, optical devices were also mentioned in his programmatic Epistle (Bacon 1923, 28–29). As we know, Dee was most interested in Bacon’s work, and it was partly this influence that encouraged him to try to catch the power of the stars by the help of mirrors, which activity he interpreted as the scientific version of ancient talismanic magic.

Talismans, which had been much discussed in medieval Arabic and Latin sources, were reinvented by the Florentine neoplatonists, and their scientific application was proposed by Heinrich Cornelius Agrippa and Paracelsus.¹³ Of these magical images, or “sigils” Agrippa noted:

So great is the extent, power and efficacy of the celestial bodies, that not only natural things, but also artificial when they are rightly exposed to those above, do presently suffer by that most potent agent, and obtain a wonderful life which oftentimes gives them an admirable celestial virtue. [. . .] Such an image, best prepared to receive the operations and powers of the celestial bodies and figures, and instantly receiveth the heavenly gift into itself; then it constantly worketh on another thing, and other things do yield obedience to it. (2.35; in Agrippa 1997, 373)

Agrippa developed an intricate typology of these magical symbols ranging from direct emblematic representations of celestial demons, through traditional signs of planets, metals, and zodiacal signs, to the numerologically symbolic cabalistical characters or sigils (Figure 7.3). One of his notable examples describes the power of planetary amulets:

FIGURE 7.3 Magical sigils from Agrippa's *De occulta philosophia* (Basel, 1550), 286, 394. Herzog August Bibliothek, Wolfenbüttel [Na 146].

This fortunate Moon being engraven on Silver, renders the bearer thereof grateful, aimiable, pleasant, cheerfull, honored, removing all malice, and ill will. It causeth security in a journey, increase of riches, and health of body, drives away enemies and other evil things from what place thou pleasest; and if it be an unfortunate Moon engraven in a plate of Lead, where ever it shall be buried, it makes that place unfortunate, and the inhabitants thereabouts, as also Ships, Rivers, Fountains, Mills, and it makes every man unfortunate. (2.22, 319)

Dee could also read much about amulets and catoptrics in Paracelsus. From a 1562 Paracelsus edition, annotated by Dee in 1594, we learn that he was preoccupied with the German sage even in his later career and discussed it with his disciples, Mr. Barker and Mr. Alped. The names of his good angels, Anchorus, Anachor, and Anilos, inscribed in the same book, indicate the interrelatedness of Paracelsus and angel magic in old Dee's interests (Roberts and Watson 1990, 101; note to item 1476).

Paracelsus wrote about images and defined *Gamaaea* as follows:

OF IMAGES [IMAGINUM]. This science represents the properties of heaven and impresses them on images, so that an image of great efficacy is compounded, moving itself and significant. Images of this kind cure exceptional diseases, and avert many remarkable accidents, such as wounds caused by cutting or puncturing. A like virtue is not found in any herbs.

OF GAMAHEI [GEMAHEORUM]. These are stones graven according to the face of heaven. Thus prepared they are useful against wounds, poisons, and incantations. They render persons invisible, and display other qualities which, without this science, Nature of herself cannot exhibit. (*Erklärung der Gantzen Astronomie*; Paracelsus 1894, 2:295)

Let us compare this to Dee's thesis in the *Propaedeumata*:

The stars and celestial powers are like seals whose characters are imprinted differently by reason of differences in the elemental matter. [. . .] You will therefore consider talismans rather attentively, and other still greater things. (Dee 1978, 135)

And to the already quoted passage of the *Monas*, written in 1564:

This our hieroglyphic monad possesses, hidden away in its innermost centre, a terrestrial body. It [the monad] teaches without words, by

what divine force that [terrestrial body] should be actuated. [. . .] When this Gamaaea has (by God's will) been concluded, [. . .] he who fed [the monad] will first himself go away into a metamorphosis and will afterwards very rarely be held by mortal eye. (Dee 1964, 135)

As I have pointed out, in the *Propaedeumata* he only passingly mentioned talismans and instead concentrated on a scientific method that was to substitute the use of magical images. As opposed to this, the *Monas* is nothing but a magical image, a talisman that here has a double function: as earthly material it participates in the process of transmutation, and as a heavenly esoteric sign it helps the magus to soar up to the higher spheres of reality.

The above quotations from Dee redirect us to Paracelsian contexts, since in his synthetizing *Astronomia magna* the German Doctor made it clear that

Man is born of the earth, therefore he also has in him the nature of the earth. But later, in his new birth, he is of God and in this form receives divine nature. Just as man in nature is illuminated by the sidereal light that he may know nature, so he is illuminated by the Holy Ghost that he may know God in his essence. For no one can know God unless he is of divine nature. (I, 12: 326; Paracelsus 1951, 44)

And indeed, it is this similarity to God that enables man to become a creator of things, even more powerful than the upper and lower firmaments:

Now, it is no matter for astonishment that man accomplishes such things, for if it be true, as the scripture says, that ye are gods, we shall certainly be superior to the stars. [. . .] The wise man rules Nature, not Nature the wise man. For the same reason we can accomplish more than the stars. [. . .] The will of man extends over the depth of the sea and the height of the firmament. (*Erklärung der Gantzen Astronomey*; Paracelsus 1894, 2:300)

Creation, the establishment of wondrous things, happens through magic and Paracelsus in his writings introduced magic according to the three tiers of the Agrippian model, from *magia naturalis* through planetary, astrological magic up to mystical rebirth: "He who imitates the image of God will conquer the stars" (*Astronomia magna*, I,12:41–42; Paracelsus 1951, 155–56). This is simply the doctrine of Man's deification through white magic, as proposed by Agrippa in his most beautiful passage on *exaltatio*:

Therefore our mind being pure and divine, inflamed with a religious love, adorned with hope, directly by faith, placed in the height and top of the human soul, doth attract the truth and suddenly comprehend it, and beholdeth all the stations, grounds, causes and sciences of things [. . .] as it were in a certain glass of eternity. (3.6; Agrippa 1997, 455)

Previously, I have pointed out that for Agrippa the idea of deification was connected with alchemy in the form of spiritual transmutation (cf. *De occulta* 3.36). In the above passage, the phrase “glass of eternity” seems to refer to other magical arts: if it meant a mirror, then one can associate it with “catoptrics,” Artephius’ *ars sintrillia*; if it meant a crystal, one can think of Paracelsus’ “beryl,” or Dee’s “shew-stone.”

The main significance of the use of beryls or crystals was, of course, that by their help one could contact the spirit world, could practice angel magic, which for both Agrippa and Paracelsus was the highest kind of occult art. The former wrote of divine angelic names:

Therefore sacred words [i.e. names] have not their power in magical operations, from themselves, but from the occult divine powers working in them in the minds of those who by faith adhere to them; [. . .] who have ears purged by faith, and by most pure conversation and invocation of the divine names are made the habitation of God, and capable of the divine influences. Whosoever therefore useth rightly these words or names of God with that purity of mind, shall both obtain and do many wonderful things. (3.11; Agrippa 1997, 476)

To which Paracelsus added with his usual lofty imagery:

He who inherits God’s wisdom walks on water without wetting his feet; for in the true art inherited from God, man is like an angel. But what will wet an angel? Nothing. Similarly, nothing will wet the wise man. God is powerful and He wills it that His power be revealed to men and to angels in the wisdom of the arts. He wills it that the world and the earth be like Heaven. (*De fundamento scientiarum sapientiaeque*, I,13:306; Paracelsus 1951, 163)

Once again we have arrived at Dee’s most ambitious magical program: he aspired for this state of *exaltatio* in order to understand fully the work of creation and become God’s partner. His whole scientific program was subordinated to this goal, and this is why he was experimenting with astrological catoptrics as well as with the monad, extracted and transmuted from talismanic magic into sacred geometry and alchemy.

It would be a mistake, however, to limit Dee's magic to sources of hermetic neoplatonism such as Ficino, Agrippa, or Paracelsus. What makes his esoteric experiments fascinating is the ease of syncretism with which he freely exploited quite distinct traditions from medieval Baconian magic through Old Testament traditions to some semi-scientific, semi-popular practices of dubious origin.

A good point of departure is the technique of Artephius (*ars sintrillia*), which operated with glittering mirrors in order to bring the viewer into a trance where logic became suspended. The ancient and venerable nature of this practice was proved in the Bible, where we read about Joseph hiding a silver chalice in Benjamin's pouch saying, "Is not this it in which my lord drinketh, and whereby indeed he divineth?" (Genesis 44:5). It should be noted, however, that such divination in the Bible is usually both condemnable and condemned: "And he made his son pass through the fire, and observed times, and used enchantments, and dealt with familiar spirits and wizards: he wrought much wickedness in the sight of the Lord . . ." (2 Kings 20:21).

Dee seems to have tendentiously overlooked such warnings, both in the Bible and in his much admired Paracelsus, where he could read in the *Astronomia magna*: "Spirits often teach those persons who deal with them to perform certain ceremonies, to speak certain words and names in which there is no meaning. [. . .] On the whole, all these spirits surpass each other in deception and lies" (quoted by Hartman 1891, 149).

In the second book of Moses we learn that the priestly garment made for Aaron contained a golden breastplate with twelve shining jewels, symbolizing the twelve tribes of Israel. This shining breastplate could also be used for purposes of divination (helping the gazing prophet to fall into a trance) and it is in this sense that medieval lapidaries refer to this locus.¹⁴ Paracelsus also spoke about a particular way of divination by using shining surfaces. He calls it *ars beryllistica*, which aims at gaining visions from diamonds, mirrors and other glossy materials, such as black coal:

VISIONS. This species sees in crystals, mirrors, polished surfaces, and the like, things that are hidden, secret, present or future, which are present just as though they appeared in bodily presence. (Paracelsus 1894, 2:296; also 1:171)

The most important difference between *catoptromantia* and *crystallo-mantia* was that in the former the operator—after proper preparations and sufficient fasting—did not want to conjure spirits in the mirror;

rather he expected visions relating to the future. In scrying, the magus definitely aimed at calling spiritual beings (angels or the spirits of already dead persons), hoping to gain information, not necessarily about the future. In both cases the use of mediums was common.¹⁵

It seems that Dee possessed instruments for both kinds of magic: a shining black obsidian mirror may have been used to practice *ars sintrillia* or *catoptromantia*, that is, divination from mirrors (this mirror presently is in the British Museum, donated by the eighteenth-century eccentric aristocrat Horace Walpole), while his much exploited crystal ball served the purposes of scrying.¹⁶ What becomes perplexing for the cultural historian is that Dee, acquainted with the most complex magical theories and techniques, finally ended up practicing this crudest form of divination and, having pursued it till the last days of his life, lost no faith in it at all.

Crystallomantia, or scrying, was relatively neglected in the works of Renaissance humanists, although some mentions can be found in the works of Trithemius and others, usually in contexts reciting the anti-magical condemnations of medieval authorities and encyclopedias, as in John of Salisbury's *Policraticus* or Gregorius Reisch's *Margarita philosophica nova*.¹⁷ It seems that by the sixteenth century, crystallomantia became most widespread in popular culture as a common form of magic. We have two groups of sources to document such practices. Humanist literature, on the one hand, relates us anecdotes of such magical habits. Nearest to Dee's scrying practice is, for example, Cardano's story about the conjuration of a scryer boy who saw angels in the crystal by the help of Saint Helena.¹⁸ Another type of source material for the popular usage of the crystal ball (or *beryl*, or *sphera*) is the protocols of witchcraft trials and ecclesiastical visitations. In such processes a routine question of the interrogation was "Have you told anything from crystal, glass, or mirror to people?"¹⁹

Needless to say, scrying was strictly damned by both secular and ecclesiastical law. In England law court processes took place in 1467, 1534, and 1549, and the 1541 statute against conjuration and witchcraft definitely prohibited it (Whitby 1985, 29–30). Since scrying was mostly used for finding lost or stolen property, the temptation to overlook the law was considerate. Although such practices were strictly private, almost all astrologers and alchemists can be suspected of having exercised it. Another Elizabethan astrologer and magus, Simon Forman, kept a journal not unlike Dee's, and he noted about the year 1584: "a reasonable, good, and quiet yere; but I had certain braulles and sclauders fell out against me aboute detecting of one that had stollen certain thinges, whereby I was like to have

bin spoiled." Although it appears he was dissociating himself from scrying at this point, by 1588 he openly admitted that he "began to practise necromancy and to call angells and spirits" (Forman 1849, 17).

It is worth noting that sixteenth- and seventeenth-century manuscript literature abounds in secret diaries, notes, and copies of "grimoires" revealing the widespread magical practices of the day—most of which were rooted in the medieval Solomonic art. Journals of actual divination are nevertheless more of a rarity: interested amateurs seemingly did not get much beyond collecting and copying magical materials, prayers, incantations, and books of rituals that, at least theoretically, provided equipment to lead the readers to success in contacting the spirit world.²⁰ This body of literature has recently been much discussed among historians,²¹ and it was Stephen Clucas who has undertaken most work in recovering possible source materials of this kind for Dee's angel magic. In his (unfortunately still forthcoming) essay on "John Dee's angelic conversations and the *ars notoria*," he examines the relationship of Renaissance magic and medieval theurgy and comes to the conclusion that medieval ceremonial magic influenced more strongly the actual practices of Renaissance divination than hitherto imagined. Concentrating on Dee's spiritual diaries, he has convincingly shown that the rituals described in the various books of *ars notoria*, *ars Solomonis*, and *liber juratus* closely correspond to Dee's actual practices as described below. What is decisive in his proposition is that although this medieval literature was strictly illicit and those who had such books would not have spoken about them publicly, one of these collections crops up in Dee's library catalogue. Dee possessed a fourteenth-century copy of the *Liber Juratus*, and the surviving copy has preserved his handwriting (R&W DM70).²²

Although Clucas has meticulously verified the influence of medieval theurgy on Dee, he has somewhat tendentiously neglected the impact of Renaissance publications of "high magic" that Dee also carefully studied. He himself cites Dee's glosses from the spiritual diaries among which there are fewer references to spurious, medieval theurgic works than citations of distinguished humanists such as Ficino, Reuchlin, and Agrippa.²³ One should note that in one of his copies of Agrippa's *De occulta philosophia* Dee could read Pietro d'Abano's treatise on the elements of magic in which the picture of a magic seal (see Figure 7.4) has striking visual similarity to Dee's Golden Talisman.²⁴

This fact should be a reminder to us not to try to explain Dee's magic, yet again, from one single type of source material. It is obvious that his, too, was a syncretic mind and had enough venerable examples

FIGURE 7.4 Pietro d' Abano's magic seal from Agrippa's 1550 edition of *De occulta philosophia* (Basel, 1550), 568. Herzog August Bibliothek, Wolfenbüttel [Na 146].

before him not to be afraid of amalgamating various traditions. No doubt, by the time of the angelic conversations he had become disappointed with most of the sciences for which he had had such an enthusiasm earlier. His former studies of the hermetic magi, however, clearly manifest themselves in his late writings, too.

This will become even more plausible if we consider the long overlap during which Dee was equally occupied with scholarly pursuits (producing the *Mathematicall Praeface* and the *General and Rare Memorials*) and mystical revelations (he started praying to God for illumination in 1569). He definitely undertook extensive and practical use of the crystal, making it a habitual action, from 1579. Already before that, on March 10, 1575, he had a chance to demonstrate "his glass" to the Queen's Majesty (Dee 1851, 17).

The first well-documented scrying session with the help of a medium, Barnabas Saul, took place on December 22, 1581 (MS Sloane 3188, fol. 8; Dee 1996, 1.6). Prior to this, Dee may have increased his interest in this area of magic during his continental journey in 1578, when he visited some German courts with the purpose of consulting medical doctors about the queen's condition. During this journey he met Leonhard Thurneysser, the famous physician, alchemist, and interpreter of Paracelsus, in Frankfurt on the Oder (Dee 1998, 4). He might have taken the meeting as an omen, since in exactly those years the learned doctor came under attack of accusations of conjuration and crystal-magic. A year later Franz Joel, a doctor from Greifswald, published a book about witches and black magic in which he openly attacked Thurneysser as a stubborn sorcerer whose source of knowledge—especially foreign languages, including Chaldeus, Hebrew, and Sanskrit—was his daemon, appearing in his "shewstone" (Kopp 1886, 1:117). Thurneysser had to write a passionate apology, very much in the manner of Dee's own "Digression Apologetical" of the *Mathematicall Praeface* in which Dee compared the accusations against him to the attacks against his predecessors in the occult and mechanical sciences from Socrates and Apuleius, to Pico della Mirandola and Trithemius (Dee 1975, Aij^v).

As previously mentioned, Dee pursued angel magic until his death. During these years he had three steady scryers. He worked longest with Edward Kelly, whom he took on his journey to the East-Central European courts. Over the long years of common magical practice they developed a rather elaborate ritual with special circumstances and requisites that is now called Enochian magic. In the following subchapter I shall briefly summarize the practice of the "Enochian evocations."

The Choreography of the Scrying Sessions

Although there are no coherent descriptions of the scrying rituals in Dee's diaries, it is nevertheless possible to reconstruct the choreography they used. First, Christopher Whitby devoted the larger part of his Ph.D.

dissertation to the reconstruction and analysis of the “actions” (Whitby 1988/1981, 1:116–57). Later on, Geoffrey James published a selection of Dee’s magical diaries in which he thematically rearranged the entries (cf. Dee 1994, 1–13, 179–91), then recently Stephen Clucas compared Dee’s practices to the rituals of medieval theurgy (200?), while Deborah Harkness has also reconstructed the sessions, referring to the setting, the requisites, the angels, and Dee’s audience (1999, 9–60). On the basis of the above studies one can summarize the rituals of Dee’s ceremonial magic as follows.

The sessions needed two basic actors: the magus and the scryer. The magus performed the conjurations, chants and prayers which prepared the evocation of angels and spirits from the shew-stone. It was the scryer who gazed at the ball, and the apparitions spoke via his tongue. The most important requisite, thus, was the crystal ball. There are various accounts about the Doctor’s different scrying instruments, and some of them have even been preserved in distinguished collections. Nicholas Clulee reproduces two items preserved in the British Museum, Dee’s crystal ball and his obsidian speculum (1988, illustrations 8.1 and 8.2). The story of the descent of these magical instruments is complicated and their provenance in fact is dubious. Theodore Besterman summed up their origin in his book on crystal gazing as follows: on November 21, 1582, in his diary Dee himself refers to his great crystal ball as something that had been brought to him by his angels and looked “as big as an egg: most bryght, clere, and glorious” (cf. Dee 1581–1583, f59). Throughout his writings, the Doctor referred to this crystal as “the shew-stone,” or simply “the stone,” but he also called it the “diaphanous globe” (58r), the “first sanctified stone” and the “holy stone” (see Casaubon’s summary in Dee 1659, #47). From his writings it is difficult to decide how many stones Dee had. The two items now in the British Museum certainly passed from hand to hand as belonging to the Doctor. The crystal ball had been included in the Cottonian Collection and was acquired by the Museum in 1700. It was described as a globe “of solid pink tinted glass, size and form of a full-grown orange” or as “a polished crystal” or as “a smoky ball” and has generally been considered as Dee’s principal crystal ball.²⁵

The obsidian mirror turned up in the collection of the writer, aristocrat, and father of the Gothic horror novel Horace Walpole. At his neogothic castle, Strawberry Hill, he collected all kinds of paraphernalia from the Middle Ages that belonged to mysterious magical practices. Thus, with delight he acquired a black obsidian mirror, probably of Mexican origin, which again was believed to have belonged to Doctor

Dee. Walpole described the item as follows: "Among other odd things he [the Lord Frederick Campbell] produced a round piece of shining black marble in leathern case, as big as the crown of a hat, and asked me what that could possibly be; I screamed out, 'Oh, Lord, I am the only man in England that can tell you! it is Dr. Dee's black stone.'" Later on, in 1842, the item was put up at the Strawberry Hill sale with the following description: "A singularly interesting and curious relic of the superstitions of our ancestors—the celebrated speculum of kennel coal, highly polished, in a leathern case. It is remarkable for having been used to deceive the mob, by the celebrated Dr. Dee, the conjuror, in the reign of Queen Elizabeth" (Walpole's letter and the auction catalogue quoted by Besterman 1965, 21). Although Dee in his own writings never specifies the obsidian mirror, he indeed may have had such a piece, since his most appreciated Paracelsus spoke at length about visions that could be gained by methods of "beryllistica" from shining black pieces of coal or other similar materials.²⁶

In case of the tandem of Doctor Dee and Edward Kelly, the magus acted also as a scribe, meticulously recording the actions. Here follows the description of preparations preceding their very first common session:

He [Kelly] then settled him self to the Action: and on his knees at my desk (setting the Stone before him) fell to prayer and entreaty, &c. In the mean space, I in my Oratory did pray, and make motion to god and his good Creatures for the furthering of this Action. And within one quarter of an hour (or less) he had sight of one in the stone. (Mortlake, March 10, 1582—Dee 1996, 1.8; 1998, 28)

And here is an example of the preliminary prayers:

PRAYER. O beginning and fountain of all wisdom, gird up thy loines in mercy, and shadow our weaknesse; be merciful unto us, and forgive us our trespasses: for those that rise up saying there is no God, have risen up against us, saying, Let us confound them: Our strength is not, neither are our bones full of marrow. Help therefore O eternal God of mercy. . . . (Cracow, April 14, 1584; Dee 1659, 82)

Another very important prayer is included in the collection titled *Fundamenta invocationum* (Dee 1588), called "The Fundamental Obesance." Its tone and vocabulary are characteristic for Dee's magical diction:

O, IEHOVAH ZEBAOTH, I John Dee (your unworthy servant) most earnestly invoke and call upon your divine power, wisdom and goodness. I humbly and faithfully seek your favour and assistance to me in all my

deeds, words, and thoughts, and in the promoting, procuring, and mingling of your praise, honour, and glory. Through these, your twelve mystical Names: ORO, IBAH, AOZPI, MOR, DIAL, HCTGA, OIP, TEAA, PDOCE, MPH, ARSI, GAIOL, I conjure and pray most zealously to your divine and omnipotent majesty, that all your angelic spirits (whose mystical names are contained in this book, and whose offices are herein briefly noted) might be called from any and all parts of the universe, or at any time in my life, through the special domination and controlling power of your holy names (which are also in this book). Let them come most quickly to me. Let them appear visibly, friendly, and peacefully to me. Let them remain visible according to my will. Let them vanish from me and from my sight when I so request. Let them give reverence and obedience before you and your 12 mystical Names. I command that they happily satisfy me in all things and at all times in my life, by accomplishing each and every one of my petitions. [...] According to your united ministry and office O God. AMEN. Through You, Jesu Christe, AMEN. (Dee 1994, 120)

Not only the prayers, but the chaste life of the magicians, fasting, and concentrated piety were to ensure the success of the magical operations. As Uriel warned them, “There must be Conjunction of myndes in prayer, betwyxt you two, to God continually” (March 10, 1582; Dee 1996, 1.9; 1998, 29).

Although magical primers often suggest special requisites, such as the Magus wearing a crown and a sword or a wand, there is no trace of such tools in Dee’s records. On the other hand, they needed other instruments, the exact form and nature of which were dictated by the angels. The primary tool, naturally, was the crystal ball, but already during the early sessions Dee and his scryer received instructions to create a tablet as well as the special sigil of God, called *Æmeth* (Whitby 1988, 1: 118–24; cf. Figure 7.5).

FIGURE 7.5 Dee’s *Sigillum dei*, or AEMETH. Based on Dee 1581–1583 [Sloane 3188], f. 30^r; recreated by Clay Holden, see <www.dnai.com/~cholden>.

You must use a foure-square Table, two cubits square: Where uppon must be set *Sigillum Dei*, which is allready perfected in a boke of thyne. (March 10, 1582; Dee 1996, 1.19; 1998, 30)

From the context it becomes clear, that the phrase “a book of thine” meant a certain book, called *Soyga*, probably a manuscript of such theurgic divination that has been identified as one of Dee’s sources in developing his Enochian magic. Uriel claimed that the book of *Soyga* “was revealed to Adam in Paradise by the good angels of God” (Dee 1998, 28) and obviously Dee’s ambition was to receive the same privilege through his actions.

Uriel’s further directions included conditions, such as that

The seal is to be made of perfect wax. We have no respect of cullours. This seal must be nine ynches in diameter: the roundness must be 27 ynches, and somewhat more. The Thicknes of it must be of an ynoch and half a quarter, and a figure of a crosse must be on the back side of it. [. . .] The Table is to be made of sweet wood: and to be of two cubits high with 4 feete: with four feet of the former seals under the four feet. [. . .] Under the Table did seme likewise red sylk to lye foursquare: somewhat broader than the Table, hanging down. [. . .] Uppon this uppermost silk, did seme to be set the stone with the frame: right over and uppon the principal seal. (Dee 1996, 1.10; 1998, 30)

Not only were the instructions very detailed, but Dee also commemorated the exact circumstances of the actions:

Note, all the tables before were by E.T. [Edward Talbot, alias E. Kelly] letter for letter noted out of the stone standing before him all the while: and the 7 Tables following wer[e] written by me as he repeated them orderly out of the stone. (April 28, 1582; Dee 1996, 3.10; 1998, 40)

We furthermore learn that twelve banners or flags were also needed, each embroidered with a name of God, and, then, all this furniture was arranged in the form of “a temple” where Enochian evocation could be practiced. Geoffrey James suggests that the sessions may have been outdoors (Dee 1994, 181) but from the spiritual diaries one can identify in fact a variety of locations, most of them in the studies of their various dwelling places. The temple was constructed in the following manner: the place of working was enclosed by a magical circle, which was called “*Terra*”; the banners were propped at the circle’s edge; a red silk rug was placed in the centre of the circle; four small waxen tablets were arranged

in a square pattern in the centre of the silk rug; the table was balanced upon the wax tablets; the large wax tablet was placed on the center of the table. Then a silk tablecloth was draped over the table, covering the large wax tablet; the crystal was laid on the top of the tablecloth, balanced on the wax tablet (cf. Figure 7.6).

An extremely important part of the actions was the magus' obligation to record all the happenings, including the prayers, the conjurations, and a detailed description of the apparitions as well as the conversations with the spirits.

Performed upon the prayers, the conjurations were of several types, such as the "heptarchic conjurations," which consisted of the attributes of Kings and Princes; in fact, Dee devoted a whole book to describing and identifying the names of these angelic hierarchies (*De heptarchia mystica*, cf. Dee 1588). Another type of conjuration was the "Angelic Keys," which were dictated in the Enochian language and were later translated by Dee into English. His book *48 claves angelicae* (cf. Dee 1584) contained these sacred and powerful texts.

At this point it is necessary to examine the nature of the angelic language. In the 1970s an Australian linguist, Donald Laycock subjected it to the most thorough examination and distinguished two layers in it. The specimen of the *lingua adamica* that was communicated through

FIGURE 7.6 The "Holy Table" and its arrangement. Based on Casaubon's edition of Dee 1659, *77 and Dee 1581–1583 [Sloane 3188]; see <www.dnai.com/~cholden>.

Kelly during the first scrying sessions (known as the *Liber Logaeth*) is rich in repetition, rhyme, alliteration and other patterns characteristic of poetry and magical charms. From this Laycock has concluded that Kelly must have been in trance, “speaking in tongues,” when receiving these messages. As opposed to this, the Enochian language received later (*48 claves angelicae*) appears more like a real language, generated from set elements. In Dee’s diaries there is a translation provided for these texts, which would allow speculation about its grammar. We also know that these texts were dictated to Kelly letter by letter, as opposed to the earlier trance-like flow of speech. As Laycock suggests, ‘this is exactly the type of text produced if one generates a string of letters on some random pattern’ (op. cit., 40). Although the Enochian language appears to be very strange, it is not entirely impossible to reconstruct its morphology and syntax. Interestingly, according to Laycock, there is nothing strikingly un-English about the grammar, and he was able to compile an extensive dictionary of more than 2400 words, together with phonology and alphabet.

As for the latter, Laycock has noted that the script may have had a common origin with Pantheus’ Enochian alphabet published in his alchemical handbook, *Voarchadumia* (1530, 14–15). As is well known, the British Library copy of this book belonged to Dee and preserves his extensive marginal notes. In spite of this, Laycock has reasoned that Dee’s Enochian alphabet bears no relation to that in Pantheus’ book although the latter may have provided the idea.²⁷ About the transcendental validity of the angelic language, he sceptically suggested that the angels’ ‘limitations are those of Kelly; their occasional sublimities, those of Dee. If the true voice of God comes through the shewstone at all, it is certainly as through a glass darkly’ (Laycock 1994, 64).

The highest type of conjurations consisted of the “Invitations to the Angels of the Four Quarters” (cf. the *Tabula bonorum angelorum* and the *Fundamenta invocationum* in Dee 1588). These rituals were given by the spirit world during the sessions in Prague and Trebona, and these books contain detailed invocations to all classes of angels. The book starts with “the Great Table” from which the angels of this book have been derived—this is a table of alphabetical characters from which the names could be generated through various cabalistical permutations (cf. Figure 7.7). This table was reformed by the Archangel Raphael on April 20, 1587. The book also contains “the great circle of the quarters,” the circle consisting of four triads with the twelve names of God. These names were extracted “from the four lines of the holy spirit, which govern all

creatures on the earth (both visible and invisible). They are carried upon twelve banners” (Dee 1994, 119). The following chapters contain invocations to the twenty-four seniors—one call to the six seniors of each hemisphere—then come the angels of medicine (again according to quarters), then the angels of precious stones, the angels of transformation, the angels of the four elements, of natural substances, of transportation, of the mechanical arts, and, finally, of secret discovery. The collection of conjurations is preceded by a special prayer, “The Fundamental Obesance,” as quoted above.

I think that nothing shows more emblematically the dramatic changes in Dee’s intellectual career than his attitude toward the mechanical arts. He had always been deeply preoccupied with *magia naturalis*, that is, the creating of machines and instruments. As we remember, in his youth he himself constructed a movable toy, a “scarab,” which was used in a school drama performance in Cambridge (Dee 1851, 6). Later, he became a passionate collector of mechanical, astronomical, and maritime instruments. He devoted almost poetically elevated passages to this art in his *Mathematicall Praeface*, including an eager rejection of those who called these mechanical experiments sorcery:

And for these, and such like marveilous Actes and Feates, Naturally, Mathematically, and Mechanically, wrought and contriued: ought any

honest Student, and modest Christian Philosopher, be counted, & called a Coniurer? (Dee 1975, Ai^v)

It is ironic to see that at the age of sixty-five he was still craving for accomplishments in mechanics, but he hoped for success only from the angels of the mechanical arts by means of conjuration. He invoked the angels as follows:

This is the invitation to the four good angels of the East,
who are skilled and powerful in the Mechanical Arts:

O YOU FOUR HOLY & TRUTHFUL MINISTERS of omnipotent God, our Creator, CNBR, NBRC, BRCN, and RCNB, who are in the Eastern part of the world, and who hast by our God been charged and committed with His ministry to practice, impart, teach, and communicate perfect skill in all arts mechanical, to the praise, honour, and glory of our God. I, John Dee, the baptized and maked slave of our Creator, faithfully, prudently, and powerfully desiring to be devout, do humbly require and vehemently petition from all of you, named above, through the omnipotent wisdom of the same, our God and Creator, and through this holy and mystical Name, HCNBR, that at whatever time in the future of my entire life, that I would call you by name or invoke any, each, or all of you through this name of God, HCNBR, that you immediately come to me and appear to me, benignly, peacefully, personally, and visibly, and that you be friendly and favourable to me, and that you discharge, implement, and make perfect immediately, truly, plentifully, manifestly, and perfectly any and all of my petitions concerning the Arts Mechanical as well as other mechanical conclusions and experiments. Through this mystical name of God, HCNBR, AMEN. (Dee 1994, 168)

From the above prayer it can also be clearly seen that the angelic names were generated through simple permutations of groups of letters.

In order to proceed with the account of Dee's ritual magic, mention needs to be made of the orders of angels, who were the most important agencies of this type of theurgy. The question of angelology, as it developed from the speculations of Pseudo-Dionysius through the scholastic philosophers to the Renaissance theologians and white or black magicians, is an extremely difficult subject.²⁸ Apart from the writings of medieval theologians on angelology—with which he was also familiar²⁹—Dee could rely on a number of Renaissance authors whose works he kept in his library. Agrippa's *De occulta philosophia* was a primary source, where in chapter 3.24 he would find the names of spirits and that how they related

to the planets and the zodiac, and the ranks of good and evil spirits. Similarly, in Trithemius' treatise *De septem secundeis* he found information about the planetary angels governing history. The Doctor had no fewer than three copies of this work and there is no doubt that he consulted it thoroughly.³⁰ Paracelsus, then, provided another tradition of interpreting angels, associating them with elemental spirits. All these could support the ambitions of the scholar concerning the feasibility and safe Christian framework of contacting the spirit world. And, beyond these learned sources, there was also the secret medieval lore, the Solomonic *ars notoria*, which heavily relied on angel magic composed of rituals and cabalistic manipulations with the Hebrew angelic names.³¹

It is also true that innumerable sources warned against the dangers of angel magic, especially that evil spirits could take the form of benevolent daemons and thus deceive even the pious practitioner. It is also true, that such passages could be found even in the writings of Agrippa and Paracelsus, but, as I have already mentioned, Dee seems to have not been bothered by these caveats. His confidence and trust in his angels could never be shaken.³²

James set up the following typology of the angelic hierarchies (Dee 1994, 183–87). The evocations were used to summon three interrelated hierarchies of angels. First was “the Heptarchical Royalty” which were believed to govern “all earthly actions, & disperse of the will of the Creator.” These angels were related to the seven planets and the seven days of the week. In second rank there were “the Angels of the Aires” which ruled the various countries of the world. One conjured them “to subvert whole countries without armies, to get the favour of all the human princes, & to know the secret treasure of the waters, and the unknown caves of the earth.” These angels were primarily related to the twelve houses of the zodiac. The third rank of angels were “of the Four Quarters.” They were believed to have been “put onto the earth so that the Devil's envious will might be bridled, the determinations of God fulfilled, and his creatures kept and preserved.” Conjuring them was expected to result in obtaining various semi-divine powers. They were related to the four elements and the four compass points. As James notes, this complex angelic society covered all planetary, zodiacal, and elemental operations and aimed at controlling hundreds of named and thousands of unnamed angelic creatures (in Dee 1994, 183).

Although compared with other types Dee's magic was of rather puritanical character and used very sparingly incantations, fumigations, candles, and such elaborate rituals (Clulee 1988, 206), the importance of

talismans, which also were to secure the success of the actions, should not be underestimated. Dee's great wax seal, the *Sigillum Dei*, has already been mentioned; next to this, the most important talisman was based on a vision that Edward Kelly saw in Cracow, on June 20, 1584:

Δ. It is first to be noted, that this morning (early) to E.K. lying in his bed, and awake, appeared a Vision, in manner as followeth: One standing by his beds head, who patted him on the head gently, to make him the more vigilant. He seemed to be cloathed with feathers, strangely wreathed about him all over, &c.

There appeared to him [E.K.] four very fair Castles, standing in the four parts of the world: out of which he heard the sound of a Trumpet. [. . .] Out of every Gate then issued one Trumpeter, whose Trumpets were of strange form, wreathed, and growing bigger and bigger toward the end. [. . .] After the Trumpeter followed three Ensign bearers. After them six ancient men, with white beards and staves in their hands. [. . .] The four houses are the 4 Angels of the Earth, which are the 4 Overseers, and Watch-towers, that the eternal God in his providence hath placed against the usurping blasphemy, misuse, and stealth of the wicked and great enemy, the Devil. [. . .] In each of these Houses, the Chief Watchman, is a mighty Prince, a mighty Angel of the Lord: which hath under him 5 Princes. The seals and authorities of these Houses, are confirmed in the beginning of the Wold. Unto every one of them, be 4 characters, (Tokens of the presence of the Son of God: by whom all things were made in creation). (Dee 1659, 168–70)

The vision had an interesting aftermath: Kelly had another visitation, this time by a spirit which identified himself as Ave, and who helped them to interpret the vision of the four castles. For example, he called their attention to the number of creatures that passed out of the four gates: “‘The number 16 is a perfect number, consisting of 1.3.6.1 and 5.’ He said furthermore, ‘God the father is a standing pillar’ ” (168). The result of the interpretation was the creation of a complex talisman (see Figure 7.8), a golden disc version of which survives in the British Museum today.

One should not forget about the fact that the spiritual diaries are not only philosophical and mystical papers abounding in visions, prophecies, and theoretical speculations about the Enochian language, but they are also rich and vivid historical documents revealing events as well as the general way of life of wandering humanists who in great number tried to secure noble patronage for themselves, all over the courts of the continent. Since these microhistorical aspects have been explored by Wayne

FIGURE 7.8 The "Golden Talisman." Based on Casaubon's edition of Dee 1659, *79. Author's copy.

Shumaker (1982); in two of Deborah Harkness' essays (1996 and 1997) and I have also presented a typology of the contents of the angelic conversations elsewhere (2002, 2004, and 200?), I shall now turn to examine Dee's theology and religion. Quite obviously, this is the framework in which one can attempt a general evaluation of Dee's angel magic, assessing what was realized of the Doctor's original goals during the twenty-year-long project, and paying particular attention to how the practice of scrying became integrated into Dee's ideology.

DEE'S RELIGION AND THEOLOGY

The Theological Framework of His Vision

Thus we see, that the heavenly contemplation in this Science is no common ascending, nor for every mans pitch, neither is it to be gotten of them whiche are carried upward with one winge only, but is familer to very few, namely to them whiche have seriously reduced them selves to Unitie. [...] Seacret and Caelestiall is this Adepted Philosophy, wherein whosoever desireth to have true knowledge, the same must be contemplative and solitary, free from common tumult. The Spirit of GOD doth breath where it lifteth, illumineth where he wills, and whome he protecteth & shadoweth with his divine grace, he leadeth

into all knowledge of truth. Let his therefore whiche shall receive such knowledge, give thanks to the Lord GOD; & let him be answerable to that his knowledge in the deeds of Charity & in Christian lyfe, that GOD may be glorified in such Science, & the Worker of good works receive the reward of mercy, even eternall felicity in the kingdom of heaven, Amen. (Tymme 1963, 25–26)

The above passage is from Thomas Tymme's preface to his planned English translation of Dee's *Monas*, which, unfortunately, he never completed. The quotation refers to the science of alchemy and it is clear that Tymme believes it should be discussed within a theological setting. For Tymme, as for many Renaissance scholars the ultimate purpose of alchemy was to purify the soul and, by liberating it from base matter, to transmute it to higher intellectual reality. This theological interpretation was in perfect harmony with Dee's own doctrines, which, as we have seen, strived for a synthesis between the dignified ambition of man to learn all the secrets of Nature on the one hand, and on the other a concurrent and humble attitude in which he continued regarding himself as part of a divine plan and hierarchy. As Tymme asked with deep conviction: "do not all things flow from Unity through the goodness of One?" (17).

Because of this faith, it is impossible to interpret Dee's natural philosophy without taking into consideration a whole wide framework of metaphysics, theology, and occult symbolism. Furthermore, we also have to realize that in the end this theological and ideological constitution in fact wholly absorbed the scientific foundations.

Dee's ideology can be examined from two angles. One is the nature of his general doctrinal opinion. In this respect a comparison between his scholarly works and his spiritual diaries may be helpful. Second are his denominational attitudes, that is, his association with the religious struggles of the Reformation. The latter problem is particularly interesting, since some historians have emphasized his strong Protestantism, while others have spoken of his universalist, interconfessionalist religion. A peculiar case is that of Frances Yates, who in her *Astreae* (1975) presented Dee as a Protestant patriot, while in *The Rosicrucian Enlightenment* (1972) she established the image of the universalist, Rosicrucian Dee. Finally, in *The Occult Philosophy* (1979) we find both arguments amalgamated.

In relation to the present investigation of *exaltatio*, the first question is more essential. However, in respect to Dee's management of the unresolvable tensions and paradoxes of magical ambitions that inevitably seem to have accompanied the aspiration for *exaltatio*, the second aspect

is equally significant, not simply for the purpose of examining the individual conscience, but because this provides a way to examine the social strategies by which the magus tried to accomplish his self-fashioning, seek patronage, and justify himself in the eyes of the other members of his community.

I believe that previous analyses of Dee's major works have already revealed the seemingly constant, hardly altering contours of Dee's theology. It centered on his deep admiration for the work of Creation and its Maker, and he never seems to have been shaken in his belief that man was privileged to become finally a partner of God, sharing his knowledge and his creative energies.

Within this constant, general theological frame, Dee's concrete programs and projects working towards the realization of *exaltatio* changed from time to time, in evolving from scientific investigations to magic and hermeticism to the practice of scrying, as I have shown above. Thinking about Dee's theology underlying the angelic conversations, one cannot fail to recall his speculations related to language philosophy and the questions of the *lingua adamica*. Thomas Tymme, in his preface to the *Monas hieroglyphica*, also referred to the angelic tongue in a theological context:

Adam, before his fall, was by God endowed with such excellent knowledge in naturall philosophie, that is to say, with the understanding of the secrets of nature & the naturall reasons of all things, that he gave to all the Creatures of God their proper names. [. . .] And albeit the perfection of that knowledge was much weakened by his fall, yet had he so much light thereof, that he was the first founder and inventor of Arte. (1963, 11)

The passage continues with references to Adam's posterity and the heritage of knowledge bequeathed by the primordial ancestor:

For his posterity building upon that first foundation & by experience and advantage of his Invention, & perfecting that which was but rude in the beginning, erected two Tables of Stone, wherein they engraved their naturall Philosophie not in letters (which were not then known) but in Hieroglyphicall characters, to the end that the presage, concerning the general Deluge to come [. . .] that if it were possible they might prevent the perill. (12)

The iconography of this pseudepigraphical myth shows parallels with that of the Bible (for example, the two stones, such as the ones

containing the Laws of Moses), but as though Adam here were not the Biblical father, more like the demiurge of the *Corpus hermeticum* whose archetypal knowledge is thought to have been preserved in a hieroglyphical ur-writing. No doubt, Dee felt himself entitled to acquire this hieroglyphical language; at the time of the *Monas* he thought that it could be generated through his magic diagram, while later on he put the stress on a more direct learning method, the angelic conversations. For him, like for Tymme, Adam was the perfect model and measure whom the magus wanted to emulate, and the key to making man the partner of God was the angelic language.

Dee's past as a humanist scholar and a bibliophile is underscored by the fact, that, even in this later mystical period, he was thinking in terms of books, texts, and writing. These traditional media remained for him equally as important as the new type of medium, the human scryer. There was a period during the time of the angelic conversations when Dee would call only one type of writing *books*, namely his own journals of the scrying séances. The most fascinating episode in this respect is the one discovered by C. H. Josten in a portion of the spiritual diaries not published by Casaubon.³³ Dee and Kelly, while staying in Prague, at a scrying session of April 10, 1586, were met by a spirit who identified himself as follows: "I am the Spirit of Wisdom. I have instructed you in the knowledge of Christ, which is the science of all things" (Dee 1965, 248). Then he commanded the Englishmen to burn all the *books* so far dictated to them by the angels, and to throw into the fireplace Kelly's small box in which he kept his *lapis philosophorum*. Here follows Dee's list of the journals to be eliminated:

I sundered the books, or rather those folio-volumes which were either bound or decently sewn together [. . .] so they were 28 in all (namely four times seven). And they contained (as in a continued narrative) all the things which, from the first hour of our (namely EK's and JD's) conjunctions until the present hour, had been revealed and shown to us by God's faithful angels and by God Himself. And in one of those 28 volumes there were 48 individual books, most mystical and more valuable than the value of all things in the whole world might be accounted. For in them the admirable divine wisdom and power were contained which, at a time determined by God, we must use to His honour and glory. There was another volume which was ancillary to those 48 individual books; its title was '48 Claves Angelicae' and it was written entirely in the angelic language. [. . .] Another volume contained that wisdom and science, with which Enoch (by

God's will) was imbued; where there was also something agreeing with the testimony of the Apostle Judas. In that book there were contained all sacred books, full and perfect, all those books, I say, which, after and before the incarnation of Christ, had been written by the Spirit of Truth. (Dee 1965, 249–50)

Most of the books mentioned by Dee are in fact identifiable among the surviving spiritual diaries.³⁴ They contained either the rules, grammar, and vocabulary of the angelic language, or the magic invocations to contact the angels, or specific pieces of information provided by the angels, some of them already translated into English, some still to be deciphered. It is obvious that the Doctor had not the slightest doubt about their authenticity. More surprising is that the Englishmen were willing to obey the spiritual command and indeed burned these most valuable texts. The session was witnessed by Francesco Pucci, too, who could see how Dee cited the sacrifice of Abraham and, taking spiritual consolation from the Biblical story, threw the folios into the fire (Dee 1965, 251). The climax of the situation was Kelly's obligation to annihilate his magic powder and Dee gave a very dramatic account of the sufferings of his companion. The session was brought to an end by the following promise of "The Voice":

Later on make a prayer before Me, invoking the name of the Father in the name of Jesus, his Son. And be aware that, as these things were put in the fire, in the same way you will receive them again. (254)

This magic episode and the promise thereof may have reminded Dee of the wondrous rebirth of Guillaume Postel, because he noted on the margin: "A *restitution* of the things burned and committed to the fire is promised" (ibid.).

This is where the journal fragment found by Josten ends and we cannot help but agree with the editor that from a twentieth-century viewpoint it is very difficult to judge either Dee's seeming credulity, or Kelly's possible motivations in interpreting the strict commands. On the other hand, the fragment enlightens a hitherto obscure part of the Casaubon edition, from which we learn that on April 29, Dee and Kelly became aware of a gardener-like figure in the yard of their house in Prague. The small gardener lit a fire resembling a strange pillar. They both hurried into the garden, but the mysterious character by that time was gone. The fire was also extinguished but under an almond tree they found three of the previously consumed books. The person then returned

again and brought back all the perished books (Dee 1659, 418–19). The journal does not mention the restitution of Kelly's powder, but during the séance of April 18, 1587, he held it in his hand, so the black bag must have been returned, too (Dee 1659, *9).³⁵

The miracle of the books, performed by God and the Spirit of Wisdom, appears to be the climax of Dee's religious experience. Next to this his explorations of the *lingua adamica* and the prophetic visions communicated by the angels should be mentioned. The most important layer of the angelic conversations consists of those pieces of information that were meant as direct instructions for learning the primordial language. These messages communicated names of angels as well as ritualistic expressions in the Enochian language, all being of cabalistic nature, each letter having numeric equivalents, too. Dee's *idée fixée* was that the comprehension of these numerical relations would lead to the ultimate enlightenment. Interestingly, the mathematician did not entirely disappear from the obsessed enthusiast as seen when he caught the angels in an arithmetic miscalculation. Kelly was certainly a far less able mathematician than his master, but his (or the angel's) wit was more than a match for Dee's suspicion:

NALVAGE ANGEL: . . . Pray. . .

Δ. We prayed. There is an error in the last, not in the Number, but in the Letter. I will first go through the Letters, and after come to the Numbers. How many words have you received this day?

Δ. Thirteen, where of Iaida was said to be the last of the call.

NALVAGE: . . . They be more worth than the Kingdom of Poland. Be patient, for these things are wonderful.

N (The number must needs go to) the sixth, descending 309.

A The 7th ascending 360.

O The 9th ascending 1000.

O The 13th ascending 1050.

V The 17th ascending 2004. It is Vooan. It may be sounded Vaoan.

Adde those last Numbers.

Δ. Vooan is spoken with them that fall, but Vaoan with them that are, and are glorified. The devils have lost the dignity of their sounds.

Δ. They make 4723.

NALVAGE . . . *It is called the Mystical roote in the highest ascendent of transmutation.*

Δ. These phrases are dark; when it shall please God they may be made plain.

NALVAGE . . . *It is the square of the Philosophers work.*

Δ. You said it was a roote.

NALVAGE . . . *So it is a roote square. (Dee 1659, 80)*

After this somewhat humorous quotation it is worth returning to a passage that sums up more theoretical information about the strength of numbers and the cabalistical ur-language. At the session held in Cracow on April 21, 1584, it was Archangel Gabriel himself who joined Nalvage to deliver the teachings to Dee and his scribe:

GABRIEL: . . . Every Letter signifieth the member of the substance whereof it speaketh. Every word signifieth the quiddity of the substance. The Letters are separated, and in confusion: and therefore, are by numbers gathered together [. . .].

E.K. Whether is this Language known in any part of the World or no? if it be, where and to whom? (Dee 1659, 92).

This introduction is followed by what I have already quoted about Adam's privilege in his innocence as being able to speak a common language with God. The angelic diction here really reaches the poetical elevation of Pico's *De hominis dignitate*. Then we learn about the corruption of the wicked demon, Coronzon, who caused man to lose his honorific status. Being expelled from Paradise, man had to reinvent a new language that still contained fragments of the original angelic tongue: "he began to learn of necessity the Language in which he uttered and delivered to his posterity, the nearest knowledge he had of God his Creatures" (ibid.). The following linguistic explications are really amazing:

GABRIEL: And from his own self divided his speech into three parts, twelve, three, and seven: the number whereof remaineth, but the true forms and pronounciations want; and therefore is not of that force that it was in his own dignity, much lesse to be compared with this that we deliver which Adam verily spake in innocency, and was never uttered nor disclosed to man since till now. (Dee 1659, 92)

Step by step, a complex myth unfolds concerning the history of the angelic language. After the Fall Adam spoke a degenerated form of it, which became

ur-Hebrew. One of Adam's descendants, Enoch, however, was selected by the Lord to become a seer, who was given the knowledge of the old Adamic language. As Dee noted, "Let us show unto Enoch the use of the earth. And lo, Enoch was wise and full of the spirit of wisdom" (1659, 174).

The angels then told Dee about Enoch's prayer to God in which the Renaissance philosopher could recognize the archetype of his own desire for exaltation up to God:

Oh Lord, is there any who is mortal that can measure the heavens?
How, therefore can the heavens enter into man's Imagination? [. . .]
Behold, Lord, how shall I ascend into the heavens? The air will not
carry me, but resisteth my folly. I fall down, for I am of the earth.
(1659, 196–97)

This difficulty could be overcome by the help of angel magic, which was to be performed through the holy tables, donated by God. The operation was expected to achieve even quasi-immortality:

Behold, I offer these Tables unto thee. I require nothing but thee,
through thee, and for thy honour and glory. *Yet I hope that I shall be
satisfied and shall not die* (as thou hast promised) until thou gather the
clouds together, and judge all things. When in a moment I shall be
changed and dwell with thee for ever. (1659, 197; emphasis mine)

According to the Enochian mythology in Dee's interpretation, after fifty days of enragement "the Lord appeared unto Enoch and was mercifull unto him, opened his eyes, that he might see and judge the earth" (Dee 1659, 174). And Enoch then decided to put down his experiences in a sacred book that he titled: LET THOSE THAT FEAR GOD AND ARE WORTHY—READ.

Unfortunately Enoch's teachings became corrupted as the holy language was distorted and forged by the devil. The memory of Enoch washed away and the mystical figures and their use—the gift of God delivered unto Enoch and unto the faithful—became replaced by the signs and tokens of the devil. "These signs they call Characters [and] as the painter imitates the gestures of man, so doth the Devil imitate the substance and things created and made by God" (ibid.). As a result of Satan's machinations and the unfaithfulness of mankind, this Enochian magic was entirely forgotten and replaced by black magic. But the archangel Raphael, sent by God, now assured Dee and Kelly that they had been selected to be the recipients of this restitute knowledge:

And so Raphael descended, and he was full of the power and spirit of God. And he delivered a Doctrine, but simple, plain, full of strength and the power of the holy Ghost. [. . .] It is this self-same Art which is delivered unto you as an infallible doctrine. For now it hath pleased God to deliver this Doctrine again out of darkness and to fulfill his promise with thee for the Books of Enoch. (Dee 1659, 77)

No wonder that taking Enoch's mythology seriously as a supernatural parallel of all human sciences, Dee became obsessed by the wish to learn and practice the Enochian language, that "tounge of power." The fruits that were bestowed upon Enoch were now offered to him. At least this is what he must have understood from the promises of the Lord, transmitted to him through the angels and interpreted by his scriber, Edward Kelly. What he hoped to achieve was access to the mysteries of creation; as the angel promised, "I give you the understanding of many thousand secrets, wherein you are yet but children" and the ultimate guarantee conjured up the possibility of true *exaltatio*: "therefore you may do anything" (Dee 1994, 11).

I firmly believe that a plausible interpretation of Dee's angel magic must approach this curious phenomenon from the direction of the *lingua admica*, the search for the perfect language. Furthermore, when placing Dee's "scientific" program in a wider context, we see how Dee's visions conjure up a symbolic "world empire," consisting of knowledge (embodied by his library), wisdom (as communicated to him by the angels), and faith (represented by a reformed Christianity, a universalist and inter-confessionalist religion).

The majority of visions included in the diaries appear to be verbalized versions of large scale images related to the divine cosmic order and the world of angels sustaining it. The following quotation is of particular importance because it contains a conceptual explanation about the nature of visions:

There are two kind of visions, the one by infusion of will and descending, the other by infusion by permission and ascending. The first is of the image of the Will of God descending into the body, and adjoynd to the soul of man, whose nature is to distinguish things of his own likenesse, but shut up in prison in the body, wanteth that power; and therefore being illuminated by spiritual presence, inwardly, seeth now in part, as he shall hereafter do in the whole. But note, that every vision is according to the soul of man in power: and so is received of him that seeth. (Dee 1659, 88)

The above description also connects the idea of visions to the idea of exaltation, the ultimate end of every form of magic. As I have already quoted, on June 20, 1584, they received perhaps the most elaborate vision in Cracow, the one that became the basis for the Golden Talisman. Next to this visual semiotic compound, one also finds in the diaries a verbal interpretation of this revelation where Dee offers angelological explanations:

I expound the Vision. The 4 houses are the 4 Angels of the Earth, which are the 4 Overseers, and Watch-Towers, that the eternal God in his providence hath placed, against the usurping blasphemy, misuse, and stealth of the wicked and great enemy, the Devil. [. . .] In each of these houses the Chief Watchman is a mighty Prince, a mighty Angel of the Lord: which hath under him 5 Princes. [. . .] Ensignes, upon the Image whereof, is death: whereon the Redemption of mankind is established, and with the which he shall come to judge the Earth. (1659, 170)

In fact most of their sessions contained elements of visions, since the angels usually contacted them in the form of visual apparitions. On April 15, 1587, during their stay in Trebona, Arthur became the communicator of a notable set of visions:

My first begotten son (namely Arthur) was assigned to the Ministry of seeing and hearing. [. . .] Whereupon, Wednesday morning I brought the Childe to the holy Table, and set before him the Stone in the frame (my first sanctified Stone) and caused him on his knees, to say the foresaid Prayer. [. . .] There appeared to him (as he judged) divers little square figures, with pricks, and divers other figures and lines, which caused him with his own hand to imitate upon a paper with pen and ink.

ARTHUR: "Two old men with black beards, and with golden crowns upon their heads, do appear. One is now gone: this holdeth his hand before him like a Maid. Now in the place of those square marks I see two lions, the one very exactly, and gaping. About the upper brim of the Stone they appear: and the lions' feet be waxing greater and greater. . . . (Dee 1659, *4–5)

From the diaries it also becomes clear that Dee embedded the visions in a perfectly balanced rhetorical framework. He was aware that the images communicated by the spirits were to be taken as parables and enigmas and he repeatedly asked the spirits for their interpretation. For example, on April 17, 1584, in Cracow they received a very complicated vision featuring a great whale, a naked man, a cave of lions, and cedar trees. The Doctor's inquiry concerning the meanings of the vision resulted in the following allegorical explanation:

GABRIEL: The naked man is Dee, the Childe is Kelly, the Prince is the Devil, the Hill is the World, the waters are the bosom of God, the 4 beasts are the 4 Elements, the 12 Trees are the 12 parts of the Heavens, &c. The rest are not to be spoken. . . . (Dee 1659, 104)

A considerable portion of the angelic communications offers obscure historical prognostications in the Enochian style of prophecy. The predictions foretell the coming of a new age in which Dee and Kelly would have an important role since they had been chosen by God to perform certain rituals in connection with the shift to the new epoch. Dee could hardly have been more explicit than when terrifying Emperor Rudolph with God's message about the Turks: "If you will hear me and believe me, you shall triumph. If you will not hear me, the Lord, the God that made Heaven and Earth putteth his foot against your breast, and will throw you headlong down from your seat" (1659, 231). Other strange prophecies related to the fate of England as well as to the future of Christianity in Europe:

After dinner, as E.K. was alone, there appeared unto him little creatures of a cubit high: and they came to the Still where he had the spirit of Wine distilling over out of a *Retorto*: And one of them (whose name they expressed Ben) said that it was in vain so to hope for the best spirit of the Wine. [. . .] He told of England, and said, That about July or November her Majesty should from heaven be destroyed; and that about the same time the King of Spain should dye. And that this present Pope at his Mass should be deprived of life before two years come to an end. And that another Pope, who should be *Decimus quintus* of his name; And that he would begin to reform things, but that shortly he should of the Cardinals be stoned to death. . . . (April 18, 1587; 1659, *12)

Prophecies were usually combined with visions, since the information derived from angels or spirits who appeared in the stone under special circumstances. The following excerpt shows general historical prophecies mixed with personal promises directed this time to Prince Łaski:

May 22, 1585, Niepolonice.

E.K.: "I see a great Hill of fire, a very great Mountain, and it is as if it did hang in the aire: for I see the aire under it, and I see the Sun shine on it. The Mountain fire flameth not. Now the little boy that appeared last day, standeth on the top of this Mountain."

PUER: "God hath spoken unto you, and hath gathered you together, and lo, you are become a strong sword, with the which the Nations shall be cut down, and the God of Hosts shall stretch forth his hands; And behold, you are come, and now is the time you Satan shall reap. But Satan striveth fore against you; Behold Lasky thou art become rich; But have faith: for it overcometh riches, and shall beautifie and strengthen thee. [. . .] I have brought thee unto Steven [Bathory, the Polish king] and I will give him thee into thy hands. . . . (1659, 402)

A particularly complex set of visions can be found in the *Praefatio Latina* (Dee 1965), Dee's Latin translations of some of their actions in Prague during which the Holy Spirit in sessions divided into four acts revealed a variety of forecasts as well as commandments.³⁶ Dee introduced the revelations with the following words: "When the three of us were seated (I ready to write, Edward Kelly sitting opposite at the same table; Francesco Pucci sitting on a bench along the wall of the oratory), there descended from on high, with some sort of spiritual sound, a voice, near to the face of E.K. [. . .] Let us now lend then our ear to the words of the Holy Spirit which are very full of the highest consolation" (Dee 1965, 241). The voice then proceeded with consolation and warnings:

Lo and behold, raise yourselves and consider: Thus speaks He who is the Comforter, Whose candle is always there to delight His people, Who has covered the sons of Sion and their garments with joy. [. . .] Behold, I am the garment of Nature and that Mother who produces the fruits of heaven and earth. And behold, Sion is shattered to pieces by the hands of disobedient sons. Yet lo and behold, o you nations and people of the earth, o you sons of sin and defenders of darkness, I am now a widow. . . . (ibid.)

Some of the advice seemed to contain astrological overtones:

Direct your eyes upwards to the stars and tell the people: Look, I understand, His letter is the end of the word which means prescience of God, in the obedience of creatures, in the fullness of time. (Dee 1965, 242)

Subsequently the attentive and the sons of peace were offered an elevated summary of the struggle between the light and darkness and how mankind recurrently had broken the covenant with God and how finally the act of salvation had been fulfilled through Christ's sacrifice. In this nar-

rative there can be felt an interesting, populist tone that might have urged Casaubon to accuse Dee of anabaptism:

Yet, you faithful ones and sons of peace, o you who serve your Sempiternal Father, you shall today learn from me:

At the beginning of the Faith, a promise of God was made *from out of Heaven* as from the place and from the foundations of Him who sends out the rays, and the abundance of His truth. [. . .] When angels brought the glad tidings of peace and consolation to the face of the earth, they did not take it to Jerusalem, nor to the Temple, nor the Holy of Holies, but they took it to the fields and amongst poor shepherds. [. . .] The Saviour of the world Himself (in whom you are saved and exalted by the honour of election) was immediately subjected to tyranny of the world and to the perversity of the powers of darkness. (Dee 1965, 243)

This account is amplified into an almost revolutionary apocalypticism in the following acts of the session, when the holy spirit seems to encourage a rather individual and radical understanding of church membership, too:

Therefore the God of heaven and earth appears to you; to you who are shepherds, placed outside the polluted city; to you who desire to find the star and seek the visitation of Him Who will be coming to you. You will return to the Temple, armed with the scourge and the power of God, and you will eject those who justify themselves. [. . .] Submit yourselves to the Church to the extent you are of the Church. 1965, 244)

The prophecy propagates such an approval of universalist toleration that the Papal Nuncio may have justly abhorred it and one can only fear what might have happened to the Englishmen had they listened to Pucci's invitations to go to Rome and test their views in front of the Holy See:

I shall therefore not stand trial in your courts, nor shall I acknowledge that you are judges. But I shall preach penitence to you. Whosoever wishes to be wise may look neither to the right nor to the left; neither towards this man who is called catholic, nor towards that one who is called a heretic; but may he look up to the God of heaven and earth and to his Son, Jesus Christ. . . . (1965, 245)

Visions and prophecies of this kind lead historians and interpreters (especially Frances Yates) to see Dee as the propagator of a new, universalist Christian church, which aimed at a position above and beyond the rivalling denominations.

Humanism, Religion, and Denomination

If Dee's theology was stable, his denominational sympathies—as the previously quoted visions showed—had much less permanence. His ambivalence seems to be connected with his self-fashioning and his secular ambitions, too.³⁷ His early career was characterized by a deeply religious, but denominationally neutral, interconfessionalist attitude, a hallmark of many humanists. To understand better Dee's "scholarly religiousness," one needs to address some general questions of Renaissance heterodoxy.

If one examines the particular doctrinal beliefs of the humanists, one can see neither uniformity nor a consequent attachment to one set of religious dogmas. One reason for this flexibility may be found in their scholarly self-assuredness, according to which they were inclined to think that narrowly defined rules and beliefs were for the general populace but not for the select few of intellectuals. One should not forget, however, about the special social standing of the humanists, namely that their ideological experimentations were in close connection with their self-fashioning, secular ambitions, as they maneuvered among the unpredictable circumstances of the patronage system.

Another motivation behind their syncretism could be an effort to merge pagan philosophy with Christian theology. These two aspects resulted in a general, nondenominational religiousness, which has been called interconfessionalism by modern historians. The use of the term goes back as far as Jakob Burckhardt. He observed how Renaissance individualism led to a total aesthetization of morals and even life itself:

These intellectual giants, these representatives of the Renaissance, show, in respect to religion, a quality which is common in youthful natures. Distinguishing keenly between good and evil, yet they are conscious of no sin. Every disturbance of their inward harmony they feel themselves able to make good out of the plastic resources of their own nature, and therefore they feel no repentance. The need of salvation thus becomes felt more and more dimly, while the ambitions and the intellectual activity of the present either shut out altogether every thought of a world to come, or else caused it to assume a poetic instead of a dogmatic form.³⁸

Burckhardt's uncompromising classification—either a pagan sceptic or a Platonist poet—was refined by Paul Oskar Kristeller's pioneering examinations of humanism. As he wrote:

The view that the humanist movement was essentially pagan or anti-Christian cannot be sustained. [...] The opposite view, namely that Renaissance humanism was in its origin a religious movement, or even a religious reaction against certain antireligious tendencies in the Middle Ages, seems to me equally wrong and exaggerated. I am convinced that humanism was in its core neither religious nor anti-religious, but a literary and scholarly orientation, that could be and, in many cases, was pursued without any explicit discourse on religious topics by individuals who otherwise might be fervent or nominal members of one of the Christian churches. (Kristeller 1961, 74–75)

In this context it becomes understandable that the keen and witty humanists preferred the philological authenticity of an ancient text to its conformity to the dogmas of one or another denomination. This is why it becomes difficult to determine the denominational affiliations of many sixteenth-century scholars; even if we know that, their writings often reflect a more general, supra- or interconfessional character. It cannot be by chance that in the time of the early Reformation it was the humanists who pioneered manufacturing bold and often fantastic plans to reunite the split Christian world; they also proposed plans for universal, and unified religions that would reconcile Christians, Jews, and Muslims. Some of these plans were fabricated on the basis of intellectual rationalism, such as Thomas More's *Utopia*; others thought of religion as a pragmatically necessary ingredient of a well-working society—like Machiavelli in the *Discorsi*; and others were dreaming of a magical religion bringing about the universal harmony of the world.

Among these enthusiasts one can mention Francesco Giorgi, a Minorite Franciscan monk (1460–1540), who wrote the *De harmonia mundi totius* in 1525 and proposed the ultimate final concordance of the various “true dogmas.” In this work he brought together the biblical prophets, Hermes Trismegistus, Plato, Aristotle, Saint John, Saint Paul, and the Church Fathers in order to assemble a mystical and pantheistic world picture. His last work, *In Sacram Scripturam problemata* (1536), employed cabalistic methods in Christian exegesis.³⁹

Another such enthusiast was the already discussed Guillaume Postel who in 1547 met Mother Johanna in the Venetian *Ospedaletto di Santo Giovanni e Paolo* and he identified her as the Venetian Virgin and the Angelic Pope “in whose body the spirit of God had descended and the living Christ lived within her person.” From his communion with Mother Johanna, whose “little son” he became, Postel developed the doctrine of

the "Restitution of All Things," supposing that "God willed that all Reasonable Creatures be united into one sheepfold; that there be a General Pardon for all with no exceptions."⁴⁰ These religious ideas became interestingly mixed with magical concepts in Postel's thought, especially those derived from Jewish cabala and Judaism.

It seems that at least in the second half of his life, Dee also became such a universalist enthusiast, a conviction which pulled him very far from the Henrician Protestantism of his early years. Interestingly, although his career as a tutor at the court of Edward VI cannot be imagined without a clear reformed standpoint, his denomination cannot be determined from the existing historical sources (Clulee 1988, 34). Nevertheless, it is improbable that in 1553 he would have received the rectory at Upton without being a faithful Protestant (Roberts and Watson 1990, 75). In spite of all this, and the fact that his patron, the Earl of Northumberland, was sent to the scaffold, he survived the shift to Catholicism under Bloody Mary. Even in 1555 when he was arrested under the charge of witchcraft, the Privy Council released him and entrusted him to the care of Bishop Bonner. Soon he addressed the bishop as his "singularis amicus," and was in the position to turn to the queen with a proposition to collect the stock of the dissolved monastic libraries and set up a new royal collection (*Supplication to Queen Mary*, 1556⁴¹). As Roberts and Watson suggested, his own ambition to establish a large private library may have been rooted in the fact that his plea to Mary was not appreciated.

The accession of Elizabeth in 1558 facilitated Dee's return to his original denomination and this began the period when he seemed to have been emotionally drawn to Protestantism. This attachment, however, had more of a patriotic character than a theological one. Frances Yates gave a detailed analysis of the protestant imperial ideology that characterized the rising empire of Elizabeth (cf. Yates's *Astrea*, 1975) in whose creation Dee enthusiastically cooperated. This imperial ideology was motivated not only by the drive for territorial expansion, but was also fuelled by a religious ambition to counterbalance the European Catholic powers by a Protestant league gathered under the Tudor banner. The Virgin Queen thus became a quasi-religious symbol, signifying imperial reform and a purified religion, in fact embodying a new national mythology that reached back to the legendary King Arthur.⁴² The literary creators of this mythology were (among others) Philip Sidney and Edmund Spenser, while its historical documentation was fabricated by William Camden, but John Dee also contributed to the geographical and historical expansionist projects (Yates 1979, 95–109; Sherman 1995, 148–201). His outstand-

ing work in this field was the *General and Rare Memorials Pertayning to the Perfect Art of Navigation* (1577), in which he delineated those territories which Elizabeth could claim because of her descentance from Arthur. The monumental title page of the book, designed by Dee, showed the Queen sailing on a ship called “Europa,” suggesting that she could be the ideal navigator of international Protestantism (Figure 7.9; cf. Yates 1979, 85). A Greek phrase in the middle of the page—Βριτανικον Ιερογλυφικον—intertextually referred to Dee’s magical opus, the *Monas hieroglyphica*, too, suggesting that his political message in this work would not be entirely different from his general, scientific-religious vision. The links between the two works are emphasized by other iconographical elements: the alchemical symbols of Sun and Moon on the *General and Rare Memorials*, as well as the inclusion of the tetragrammaton, JHWH.

While in the 1570s Dee seems to have been under the influence of Protestant ideology and nationalistic politics, at the same time, his imagination was more and more taken by a contrary intellectual trend:

FIGURE 7.9 Frontispiece of Dee’s *General and Rare Memorials* . . . (London, 1577). see <<http://www.johndee.org/charlotte/images/title.gif>>.

nondenominational interconfessionalism. As I have suggested, the rise of this permissive religious attitude can be associated with those philological investigations of the humanists which recognized the (proto)types of Christianity in some of the pagan religions. Thus they concluded that—as opposed to the denominational differences—the really important thing among the religions was their common roots, the general intuitions. Concerning the fifteenth and sixteenth centuries, of course, we cannot yet speak of tolerance in the modern sense nor an abstract Deism that would freely take off from Christianity. Nevertheless, from the time of the Florentine neoplatonists onward it became customary to mix different religious ideas in a syncretic manner. Humanist syncretism was fostered by the scholarly attitude, and its methods of using historical and literary investigations. In the following I shall look at some specific features of this humanist interconfessionalism in relation to magic, as described by Charles Zika and Paola Zambelli.⁴³

In his essay “Reuchlin and Erasmus: Humanism and Occult Philosophy” (1976–1977) Zika has developed a model of intellectual evolution that helps us to understand the above demonstrated “mystical mutations” of humanist thought.⁴⁴ In order to show the different intellectual avenues along which the humanists could proceed, Zika analyzed Erasmus’ ambiguous attitude toward Johannes Reuchlin.

As is well known, Reuchlin employed humanist methods to enlighten certain Old Testament loci by also studying Judaic theology. This method can be compared to Ficino’s strategy of explaining Christian theology using Plato and other pagan Platonici. Neither of these methods was entirely safe: Ficino had to face the accusations of practicing pagan magic; Reuchlin was charged with practicing Judaism. From this general situation developed the notorious Reuchlin affair that lasted from 1507 almost until Reuchlin’s death in 1522, concluding with a papal condemnation of Reuchlin in Rome, 1520.

In 1507, Johannes Pfefferkorn, a convert, aided by the Dominicans of Cologne, initiated a confiscation and burning of all Jewish books because they were false, written to oppose Christians, and were offensive to Jesus, Maria, and the Apostles. He also claimed that these books kept the Jews ignorant of the truth, hindering their conversion to Christianity. Prompted by complaints from influential Jewish circles, Emperor Maximilian I halted the confiscations and ordered his high chancellor, the Archbishop of Mainz, to appoint a committee to make recommendations. The two persons appointed were Jakob Hoogstraeten, grand inquisitor of Cologne, and Johannes Reuchlin, humanist, renowned

Hebraist and professor of law. Hoogstraeten reaffirmed Pfefferkorn's opinion, while Ruchlin opposed it, expressing his position in a legally and theologically brilliant essay *Recommendation whether to Confiscate, Destroy and Burn all Jewish Books*. Since Hoogstraeten's expert opinion was so different from his own,⁴⁵ Reuchlin decided to seek the support of the humanist community through publicity and developed his report into a sarcastic pamphlet.⁴⁶

In this, now called *Augenspiegel*, Reuchlin firmly defended the valuable achievements of Hebrew culture, and as a learned humanist and jurist he pointed out the legal background that granted Jews a free practice of their religion and the use of their sacred books. He classified Jewish books in four categories out of which he condemned to fire only one, those abusing the figure of Christ. The Talmud as well as the books of the cabala were among the ones to be preserved. He suggested that cabalistic books should be translated into Latin and Hebrew exegesis should be studied by Christian theologians.⁴⁷

Reuchlin's answer did not pacify those who sought the downfall of Jewish culture, and the debate continued after 1510. This "Kulturkampf" culminated in the 1517 *Epistolarum virorum obscurorum*, which is remembered by scholars as a battle between modern humanists and conservative, retrograde Dominicans.⁴⁸ Careful research, however, shows that the frontlines were not entirely between humanists and monks. It was not a unified group of humanists who sided with Reuchlin, but rather a marginalized trend of heterodox theologian-philosophers, who were following Pico della Mirandola in his enthusiasm for the Jewish cabala. Defenders of Reuchlin included Pietro Galatino, a Franciscan theologian and Hebraist, and Giorgio Bensigno, a monk from Florence, student of Ficino then Savonarola. As J. Overfield suggested, this debate was not so much about humanism as it was about anti-Semitism. This conclusion, however, is also problematic. By today, historians feel compelled to speak about anti-Judaism, the ground of which was religious-theological discrimination, not racism, as in the case of anti-Semitism.⁴⁹

If we return to the model of Zika, we also see a more complex and complicated set of likes and dislikes.⁵⁰ Let us take Erasmus, whose opinion suffered certain alterations during the long years of the "causa Reuchlini."

It was Reuchlin who first contacted Erasmus, sending him a copy of the *Augenspiegel*, and asking for solidarity.⁵¹ Erasmus enthusiastically answered and indeed made repeated efforts to promote the case of Reuchlin.⁵² When they finally met in person, Erasmus sent the following

report to Jakob Wimpfeling: "I had the chance of an affectionate meeting with Reuchlin, a man whom I not only respect as a scholar of distinction but like quite particularly for a rare kind of courtesy and personal charm."⁵³

In the meantime Reuchlin became more and more absorbed in Hebrew studies and finally he published his major work on the Jewish (and Christianized) cabala. In 1517 he sent a few copies of his *De arte cabalistica* to Erasmus, authorizing him to distribute them among his English friends. While it is not clear what Erasmus personally thought of this study of the cabala, from his correspondence we can learn about an enthusiastic reception in England. It turns out that Erasmus left a copy—meant for John Fisher, Bishop of Rochester—with Thomas More, asking him to forward it. But More became so interested that first he wanted to read it. Then he passed it to John Colet, the famous humanist, who summarized his opinion in a letter to Erasmus as follows:

My dear Erasmus, of books and knowledge there is no end. Nothing can be better, in view of this brief life of ours, than we should live a holy and pure life and use our best endeavours every day to become pure and enlightened and perfect. Those things are promised us by Reuchlin's Pythagorical and Cabalistic philosophy.⁵⁴

Two months later Erasmus wrote an enthusiastic letter to Reuchlin, in which—although not mentioning *De arte cabalistica*—he addressed his friend with great reverence and on the other hand used rather vulgar expressions about Pfefferkorn, who still had not stopped his crusade against the Hebraist scholar.⁵⁵

And then things suddenly started changing. Pfefferkorn continued with his attacks, fully aided by Hoogstraeten and the Dominicans. Reuchlin's case was proceeded to Rome for further inquisitorial investigation. Worst of all, the case seemed to have been contaminated with that of Luther who was just about to upset the whole Christian world. Erasmus found himself implied in both cases, especially because some letters he had written to Reuchlin (including the one mentioned above, in which he had called Pfefferkorn a ghetto criminal and an ape Christian) were printed in a pirate edition and the Rotterdam humanist had to apologize. From that time on, he started dissociating himself from Reuchlin. First he wrote to Prince Albert of Brandenburg:

The first point I must make is this: that I have never had any connection either with Reuchlin's business or with the case of Luther. Cabbala

and Talmud, whatever they may be, have never appealed to me. The venomous conflicts between Reuchlin and the supporters of Jakob Hoogstraten I have always found extremely offensive.⁵⁶

Then he added some wry remarks about Reuchlin in the foreword to the authorized collection of his correspondence:

I am no 'Reuchlinist.' I belong to no man's party, and detest these factious labels. I am a Christian, and I know what 'Christian' means. I will not tolerate 'Erasmists,' and 'Reuchlinists' is not a word I know. Between me and Reuchlin nothing has passed but the civilities of ordinary friendship, and to become his champion is a thing I have never undertaken, nor does he feel the need of it.⁵⁷

Zika argues that Erasmus showed no anti-Semitism by this opinion, rather that he saw in the cabala and the other secret sciences dangerous Judaizing tendencies that would contradict and subvert the clear, rationalist standpoint of his own humanism. He promoted a reform of Christianity that would see the religious rituals purified, freed of obscure gestures and speculations, and he saw in the hermeticist-cabalist fashion just such a muddled, murky practice and thought.⁵⁸

The ceremoniality increasingly present in his religious attitude brought him into the company of other magical hermetists of the early 1500s, such as Lodovico Lazzarelli, Trithemius, and Agrippa. It was not only spiritual kinship, since these people also had various personal relations, forming almost a coherent group of intellectuals. Agrippa even lectured on Reuchlin's *De verbo mirifico* at the University of Dole in 1509.⁵⁹

Zika's conclusion is that hermetic magic, although it started its career using a methodology borrowed from humanism, soon diverted from it, already in the works of Ficino. The magical renaissance of the early sixteenth century proved to be undigestable for a philologist-humanists of northern Christianity, such as Erasmus. Paola Zambelli's thorough article on early sixteenth-century humanism, theology, and magic (1970) unintentionally corroborates this view. Although Zambelli has meticulously proved the parallels and interconnectedness between the works of Erasmus and Agrippa, not mentioning here the fact that their intellectual circle of friends largely overlapped, it remains that while Agrippa openly admired Erasmus and his achievement, this admiration was not reciprocal: the name of the younger magus-hermetist does not feature in the works or correspondence of the old humanist.

Reuchlin attached a preface to his famous book on the cabala (*De arte cabalistica*, 1517), addressing Pope Leo X who was the son of Lorenzo de' Medici, il Magnifico. He praised in it the importance of the Florentine Academy and pointed out the differences between the philosophy represented by the academicians as opposed to other trends of classical humanism, represented, for example, by Petrarch:

[Lorenzo de' Medici's] birth seems heaven-sent. Petrarch, Phileph, and Aretino brought the arts of oratory and fine speech to the "youth of Florence," so that there could be no disputing that her people wrote more lucidly and more accurately than any other nation. But it was your father who added to Florence's store of learning—wisdom that probes into the past, wisdom that lay hidden until his day in books and memorials of past times. (Reuchlin 1983, 37)

These mysteries, according to Reuchlin, had been hidden in the works of Apollonius of Tyana, Plato, Plotinus, Iamblichus, Orpheus, and, above all, Pythagoras and the Jewish cabala. Reuchlin also acknowledged the formative influence of the Florentine neoplatonist circle on his own intellectual development:

So I set out for Italy with the first Duke of Swabia, whose private secretary I was. I spoke enthusiastically to my Duke about the Medicis . . . Your father sowed the seeds of ancient philosophy in his children. With his son they will grow to reach the roof tops; in your reign we shall reap the harvest in every language—Greek, Latin, Hebrew, Arabic, Chaldaic, and Chaldean. (ibid., 39)

This inventory makes it clear that the more he came under the influence of these works and Eastern languages, the more he defined himself less as a humanist and more as a hermetist. As Zika said, "the rhetorician-scholar gave way to a mystical philosopher, the eloquent humanist to the traditionalist representative of preclassical religion and magic" (1976–1977, 245).

A similar tendency can clearly be seen in the intellectual evolution of John Dee, too. But this pattern has to be completed by one more aspect, namely the comparison between the early modern mystical enthusiasts and the representatives of the Reformation. The common ground was

that both groups grew from the humanists with the intention of reforming and revitalizing Christianity. But while the reformers from Luther and Calvin to the radical anti-Trinitarians were attached by very strong ties to their own communities and they always acted as their spokesmen opposing other well-defined groups, the enthusiasts awaited the elimination of all doctrinal differences and sought a universal syncretic religion. This project also involved plans for mystical societies but their creators were true heirs of the humanists in that they never seriously thought of turning their fantastic plans into practice. We may find the germs of secret societies—such as the infamous Rosicrucians—in their works, but we never find a mass movement nor highly organized groups associated with them as we do with the more established trends of the Reformation.

It is interesting to notice, however, that these individualistic enthusiasts were always irritating those who were in possession of the power technologies. This is why they could not find peace either in their own community or among their rivals. Each large denomination produced its own enthusiasts. Postel and Bruno among the Catholics, Weigel and Khunrath among the Lutherans, Servet among the Unitarians—many of them converted and reconverted several times like Francesco Pucci, and almost as many of them finished on the stake like Servet or Bruno.

Why did they provoke so much hostility? More than one argument can be given in explanation. The individualism radiating from the enthusiastic magical-esoteric thoughts, and especially their universalism, violated the particular interests of various groups and communities. Furthermore, the secrecy and their discourse veiled in dark allegories and mysteries evoked a danger of secret conspiracy. These people could not find temporary shelter anywhere but in the secluded courts of aristocratic patrons, in the circles of extravagant intellectuals or hopeful sponsors who could be convinced of the benefits of such plans and who eventually could finance the publication of the fantastic projects.⁶⁰

Dee, being totally engaged in his angel magic, became one of those enthusiasts who wandered in various parts of the Continent and preached their mystical-occult message, never becoming exhausted in seeking the patronage of attentive and sensitive benefactors. It should be stressed, though, that their camp can hardly be defined as having a homogeneous and shared ideological platform.

Interestingly, while Dee had personal contacts with many of those contemporary enthusiasts—Postel, Bruno, Pucci, Khunrath—and in his library accumulated heterodox works, in his own writings one finds very few references to these intellectual challenges. A possible explanation is

that all enthusiasts thought of themselves as elect, thus they did not need either sources or proofs for illumination. The truth was revealed to them in a direct way. Dee seemingly developed such a conviction, since his spiritual diaries contain significantly fewer citations, references, and glosses than do his earlier, scholarly works. He wanted to become a prophet, an important herald of the great and general reformation in the context of which denominational differences appeared petty and insignificant. Dee's angels seemed very tolerant in this respect. A characteristic episode occurred when one of the spirits burst out against the Jesuit friars who in Prague were not willing to absolve the Protestant Kelly:

Whosoever wishes to be wise may look neither to the right nor to the left; neither towards this man who is called a catholic, nor towards that one who is called a heretic; but may he look up to the God of heaven and earth and to his Son, Jesus Christ. Behold, the courtesan will be justified! But the hypocrite will be cast off and trodden under foot. (Dee 1965, 245)

After this apocalyptic treat (the iconography of which abounds in Enochian images such as "being trodden under foot"), the session concludes with an explicit elaboration of *exaltatio* which is drawn in a dramatic choreography by Kelly, Dee, Pucci, and The Voice:

K[elly]: The seer may then foretell when the time is to come that will be after the harvest and the harvesters. [Dee's gloss in the margin: 'Apocalypse, chapter 14D']

Δ: 'He who writes down and records the words of the Highest, may he in the fulness of time, show forth their strength, through the strength and support of Him Who has exalted him.'

Fr[ancesco] P[ucci]: 'May he who has been called as a speaker abound in good works, so that he may be distinguished before his hearers and exalted in Him Who sent him.'

[The Voice]: 'So then, whoever neglects his vocation may be ejected, and his place may be occupied by another. But to him who does the will of Him Who is teaching (which is the will of the Creator of all things) abundant grace will be granted.' (1965, 247)

A possible motivation behind interconfessionalism was the influence of the pagan-hellenistic Platonist philosophy, which the enthusiasts tried to amalgamate with the doctrines of Christianity. These neoplatonists and crypto-hermetists were often condemned by the radical reformers,

such as we can see in the writings of the anti-Trinitarian Johann Sommer, who condemned Platonists as follows:

For them the views of Plato seemed similar to that of Christians; so it is no wonder that deceived by the likeness of notions they did so many horrible things, although originally they did not want more than to grasp everything in rational categories and to describe the way of incarnation, the birth of Christ, his genealogy from the Father, etc. (*Refutatio scripti Petri Carolii*, 18, quoted by Szczucki 1980, 101)

This quotation clearly shows how far a professional theologian—even if belonging to the most radical branch of the Reformation—and a universalist enthusiast for whom the denominationally codified dogmas were of little importance could be from each other. But even this ideological division was not clear and stable in the Renaissance. Let us think of John Dee, who, when returning to England, sent Sommer's work to the Archbishop of Canterbury for refutation, because he found its anti-Trinitarianism a wicked and harmful doctrine:

I exhibited to the Archbishop of Canterb. two books of blasphemy against Christ and the Holy Ghost &c., desiring him to cause them to be confuted. One was Christian Franken, printed anno 1585, in Poland. The other was of one Somerus against one Carolius printed in Ingolstadt anno 1582 in octavo. (October 13, 1592; cf. Dee 1998, 257)⁶¹

From this we can conclude that the tolerance of the humanists and the radical reformers were manifest in rather divergent areas and the patience for each other could be seen only in exceptional cases among the early modern intellectuals (such as Servet, Sebastian Franck, or Valentin Weigel).

The role of interconfessionalism and its relation to humanism on the one hand and to the Reformation on the other was an interesting chapter in the history of early modern culture, but one should also remember that by the seventeenth century this situation had changed. The revolutionarized information exchange through the general use of inexpensively printed books, changes in the university curricula, and such projects as Alsted's monumental *Encyclopaedia* made possible at least a temporary coexistence of nonaristocratic, middle-class, patrician communities or even church officials on the one hand and universalist enthusiasts on the other. Some of them could well coordinate their esoteric interests with sober activities such as church administration or regular

teaching. Good examples are the Protestant Johann Valentin Andreae, occult adviser of the Princes of Wolfenbüttel and respected leader of the local Lutheran community, or the Catholic Athanasius Kircher, who was a Jesuit, taught all over Europe, and organized schools and museums, while living in his own fantastic transcendental dreamworld.

It is a fascinating story through which alternative humanism unfolds from the time of Ficino to the late seventeenth century, the world of van Helmonts, Kirchers, Jerome Drexels, Thomas Vaughans. And somewhere in the middle of this process we find Dee, emerging in the camp of Renaissance enthusiasts, wholly occupied with his angelic conversations. It seems that his chiliasm and his Enochian prophecy and magic tied him to those visionaries who, growing out from the humanist tradition, did not join the official camps of the Reformation but rather started preaching a more mystical, alternative reform. The eastern fringes of Central Europe—Poland, Silesia, Hungary, and Transylvania—played an important role in these projects. Many of the enthusiasts found temporary shelter in the courts far away from the centers of the European great powers. At the same time, these states—in a constant political and ideological flux—seemed to be stimulating missionary targets. Robert Evans has called attention to the missionary character of Dee's Central European journeys and he has pointed out the similarities between Elizabeth and Rudolf II, which—in Dee's eyes—predestined both of them to be the recipients of his mystical message:

An important item on the agenda was provided by the mystical and occult aspects of sovereignty. The apotheosis of the ruling families was accomplished in verse and image, ceremonial masque and heroic portrait. [. . .] The seriousness of the preoccupation can be seen not only in Rudolfine Prague, but in Elizabethan England, where the queen was surrounded by a similar mass of allegorical apostrophizing from scholars like Dee and poets like Spenser. Both the unmarried Emperor and the Virgin Queen were widely regarded as figures prophetic of significant change in their own day, as symbols of a lost equilibrium when they were dead. (1973, 275)

It is this lure of East-Central Europe that leads us to the question of the social context of Dee's intellectual activities, that is, the examination of the interpretive community of his messages. In my last chapter I shall investigate this aspect through the filter of Dee's Central European experience, then through the editorial strategy Meric Casaubon exercised when sixty years later he decided to publish the Doctor's spiritual diaries conceived mostly in those faraway parts of the Continent.

Dee and the Interpretive Community

The previous chapter approached Dee's intellectual output as an individual effort seeking the unattainable, as a lifelong series of recurrent attempts to reach out from the mundane and material world and penetrate the sphere of the mysterious Other. As we have seen, his last initiative was to the world of angels.

This whole enterprise, however, has a hitherto largely unexplored social aspect. Namely, that those who strived for intimacy with the Other were not confining their activity to individual philosophical-theological-scientific speculations and experiments; on the contrary, they inevitably fell into the focus of public attention. Partly because they themselves had missionary messages that they wanted to share with their community and this public role became a corner stone of their self-fashioning strategy, and partly because they became increasingly alien and irritating to those who were less able to reach out for bridges between this and the transcendental world. Thus the seeker of the Other *became* the threatening Other for the community whose members and especially whose ideological leaders felt compelled to handle the problem by working out power technologies to contain the alien elements in their social microcosms.

While I will examine these power technologies in the second subchapter, in the first subchapter I shall look at Dee's career in Central Europe, which became for him a region of inspiration as well as a possible testing ground in which to pour out the mystical lesson gained through his intimation with angels.

“EASTWARD HO!” DEE, PATRONAGE,
AND CENTRAL EUROPE

The Lure of East-Central Europe

As we have seen, among Dee's readings one of his first strongly decisive mystical inspirations, Trithemius' *Steganographia*, is associated with Central Europe. A young Hungarian nobleman helped the penniless Doctor copy the work, and what is more, he even invited Dee to Hungary to instruct him in the occult arts: “Now I stand at the curtesye of a noble man of Hungarie who hath promised me leave thereto, after he shall perceyve that I may remayne by him longer (with the leave of my Prince) to pleasure him also with such pointes of science, as at my handes he requireth.”¹ Who this Hungarian nobleman was, extending the first invitation for Dee to visit East-Central Europe, we do not know for sure. But it is interesting to speculate on a plausible identity, especially since although the Doctor apparently did not accept his offer, it would become a longstanding inspiration. It might have propelled him to visit Maximilian's coronation in Pozsony (Pressburg, today's Bratislava in Slovakia) in the fall of 1563, and he may have remembered this encounter twenty years later when he decided to follow the Count Albert Laski to his Polish estates, thus choosing East-Central Europe as the principal setting of his angelic conversations.

One of the possible candidates would be Johannes Sambucus (János Zsámboky), the famous Hungarian humanist, bibliophile, and emblemist who had an impressive international network of acquaintances and—just like Dee—possessed an outstandingly large and valuable private library.² In 1563 he visited his publisher, Plantin, in Antwerp and there or somewhere else coinciding with Dee's continental journey in 1562 and 1563 they could have met. He was also present at the coronation in Pozsony, which occasion may have offered a chance for reunion. In spite of the possibilities, we have no evidence that the two scholars ever met, although Dee possessed some of Sambucus' books in his collection (R&W 720, 793, 964, 1170). Sambucus' candidacy for Dee's “Hungarian nobleman” is nevertheless weak for the following obvious reason: Sambucus was a renowned scholar but not a nobleman. Dee, sensitive to social hierarchy, would probably not have made such a mistake in his correspondence to Cecil; furthermore, it is unlikely that Sambucus would have wanted to study the occult arts from anyone.

Another more likely candidate might be Boldizsár Batthyány (Balthasar Batthyany), whom Robert Evans rediscovered for English readers (1973, 120; 1975, 35–37). A brief introduction to his career provides an interesting Central European parallel to the activities of Dee or that of some noblemen of alternative thinking such as the “Wizard” Earl of Northumberland in England.

Batthyány (1530–1590) developed one of the most brilliant noble courts in the vicinity of the Hungarian capital, Pozsony, in West Hungary. His career started in the Habsburg court of Vienna, then, in the 1560s, he spent a few years in Italy and France, finally becoming a page to King Francis and Mary Stuart. From a letter written to his parents we know that in 1560 he witnessed the outbreak of the first Huguenot war in Amboise.³ According to historical sources he spent over two years in France and he seems to have made acquaintances among local Protestant families as well as refugees from the Low Countries. Among those one can mention the printer-publisher family, the Wechels, and the famous botanist Carolus Clusius (Charles de l’Ecluse) who escaped from Flanders in 1561. Wechel’s son-in-law, Jean Aubri, became Batthyány’s bookseller for many subsequent years and Clusius spent an important period of his career at Batthyány’s Hungarian court working on his opus on the flora of Hungary.⁴

Although there is no historical proof, it is not impossible that in 1562 and 1563 the Hungarian magnate made a journey from Paris to the Netherlands and in the circle of Willem Silvius he could have easily come across the English Doctor. His later patronage of Clusius makes it plausible that he would also have invited Dee to Hungary. This possibility is even more plausible if we think of Batthyány’s notable interest in alchemy and the occult arts.

Batthyány’s humanist circle at his court in Németújvár (today’s Güssing in Eastern Austria) developed in the 1570s and was centered around his significant library. Unfortunately this collection has dispersed, and unlike Dee’s library, we do not have even its catalogue. The only documentation concerning Batthyány’s books are the valuable set of receipts issued by the magnate’s bookseller, Jean Aubri, which also contain detailed lists of the purchased items. From these it becomes clear that Batthyány’s interest was not of the usual humanist-theological sort but, similar to Dee’s, was more centered on natural philosophy, the esoteric lore, history, and literature. Next to Hermes Trismegistus, Raymundus Lullus, and Paracelsus we find contemporary editions of Rabelais, Machiavelli, Castiglione, and Jean Bodin.⁵

Batthyány also patronized a number of humanists, Hungarians and foreigners alike. One of his main advisors was Elias Corvinus, a humanist from Pozsony and Vienna whose sixty-one letters to his patron survive from the years between 1557 and 1587. It is obvious that Corvinus acted as a go-between connecting the court of Németújvár with the humanists of Pozsony, as well as the Imperial Court in Vienna. From this correspondence the following names attract the attention of the Dee scholar: Hugo Blotius, the chief librarian of the Habsburgs; Paul Fabritius, royal astronomer in Vienna; Crato von Kraftheim, imperial physician; and a number of local and wandering alchemists. From Corvinus' letters we learn that in the 1570s Batthyány ordered more and more books on alchemy and occult philosophy. Representative titles include "Theatrum diabolorum," "Coelum philosophorum," "Dialogi de alchimia," and Gerhard Dorn's *Lapis metaphysicae, Chemicum artificiae*. The most expensive book commissioned by the Hungarian was Paracelsus' *Disputatio de medicina nova*. In 1574 Batthyány entrusted Corvinus with finding some more Paracelsica. In 1577 he bought the hermetic *Pimander* and Tomás Jordán's book on the plague. Interestingly, Jordán of Transylvania, a Hungarian wandering humanist and medical doctor, had met Conrad Gessner, the Swiss polymath, just a few months before Dee visited the professor in Zurich. Their inscriptions in Gessner's *album amicorum* almost follow each other.⁶ Other occult items in Batthyány's book orders are Martin Ruland's alchemical lexicon, Porta's *Magia naturalis*, and Chasseneux's *Catalogus gloriae mundi*, the same work that Albert Laski exchanged with Dee for a Bible in Poland (R&W 226).

We also learn from the correspondence that from 1572 there was an alchemical laboratory in Németújvár. While at that time Corvinus lived in Vienna, the magnate was experimenting by himself and regularly reported his progress to his advisor (Barlay 1986, 209–11). This happened at the same time as another Englishman, and what is more, Dee's own disciple, turned up in Pozsony. The famous visitor was young Philip Sidney who, together with Edward Dyer, had studied chemistry with Dee around 1570.⁷

The promising nineteen-year-old aristocrat and poet came to Hungary in 1573 as part of a three-year-long grand tour sponsored by his patron, Sir Francis Walsingham. Since Walsingham was the father of the British secret service, he also entrusted Sidney to write reports to him on what he experienced in the various European countries. As historians have verified, Sidney indeed was to observe the Turkish wars and the state of the Hungarian fortifications.⁸ However, we should not forget the poet's memorable remark about Hungarian heroic poetry in his *Defence of Poesy*:

In Hungary I have seen in the manner at all feasts, and other such meetings, to have songs of their ancestors' valour, which that right soldierlike nation think one of the chiefest kindlers of brave courage. (quoted from Abrams 1986, 516)

This is yet another mysterious reference to Hungary and the Hungarians, but again there is no exact proof as to where Sidney might have seen such feasts and meetings embellished with the performance of heroic songs. One strong possibility is Batthyány's court in Németújvár, which was just a short ride from either Vienna or from Pozsony. Sidney's host in Pozsony was the town physician, Georg Purkircher, a prominent member of Batthyány's humanist circle.⁹ In Vienna a number of humanists could call the Englishman's attention to Batthyány, but we should not forget that earlier in Frankfurt Sidney had lodged in the house of Andreas Wechel, a close acquaintance of the Hungarian nobleman. And, finally, we cannot exclude the possibility that Batthyány's name turned up in the conversations between Sidney and Dee when the young traveler was being prepared by his older tutor for the continental grand tour.

It is interesting to follow the story of Sidney's European journeys since several of his meetings and episodes look forward to John Dee's later mission. After having traveled in Italy for almost a year, the poet turned up in Vienna again in August 1574 and stayed in the house of Michael Lingelsheim, imperial councillor. During the fall, from there he took a journey to Cracow, wanting to visit the Valois king, Henry, but by the time he got there, Henry had already resigned and returned to Paris. Sidney left the Polish capital disappointed by the political anarchy. On the other hand, he spent a few pleasant days in Silesian Wrocław (Breslau) where he visited Andreas Dudith, the Hungarian-born humanist and politician who in a few years time would sceptically comment on Dee's performances at the Polish and imperial courts. In Dudith's house Sidney met another protagonist of Dee's future stay in Prague: Crato von Kraftheim, the imperial physician (Gömöri 1991, 30). On his way back to Vienna Sidney also stopped in Brno where he enjoyed the hospitality of Tomás Jordán, the doctor who had visited Conrad Gessner in Zurich a few months before Dee and who later became imperial physician to Rudolf II.

Three years later Sidney came to Central Europe for the second time. In March 1577, Queen Elizabeth sent him to the Palatinate and to Prague, officially to express her sympathies in regard to the deaths of the Elector Palatine and Emperor Maximilian, but he also had a clandestine assignment: to tap the opinion of Central European princes concerning

a Protestant league.¹⁰ Traveling via Brussels, Heidelberg, and Nurnberg, Sidney and his escort arrived in Prague for Easter Week and during his stay he had two audiences with Rudolf II. Beside political activities he also had time to visit the ancient city and its surroundings: the star-shaped hunting lodge, the Hvezda, even found its way into the *New Arcadia*.¹¹

Perhaps the most interesting episode was Sidney's meeting with the English Catholic exile, Edmund Campion, who at that time had a residence in the Prague convent of the Jesuits. Campion had been Sidney's instructor in rhetoric during his studies at Oxford, but in the meantime had become an arch-enemy in the eyes of Puritan English politicians. Now the Protestant youth decided to visit his old master secretly. Sidney had to be cautious in undertaking such a visit, since several members of his delegation were spying on him. Thus we learn about the meeting only from Campion's correspondence. This suggests that Sidney was seriously tempted to convert to Catholicism. Although the English poet is remembered as an ardent Protestant and a patriot, in the tolerant and cosmopolitan atmosphere of Rudolphine Prague he may have come into the lure of the old religion. His crypto-Catholic attitude becomes the more interesting if we recall John Dee—another Protestant-patriot—and his similar enchantment a decade later, when, in spite of his Protestantism, he attended confession and took the holy communion both in Cracow and Prague.¹²

The last episode of Sidney's East-Central European travels relating to Dee's upcoming mission is his probable meeting with Count Albert Laski. According to Anthony Wood's *Athenae Oxoniensis*, in 1577 while staying in Frankfurt, Sidney received two letters from Poland containing invitations for him to take the Polish throne. Zantuan (1968, 6–7) suggests that the only person in the position to put forward such a fantastic plan was Albert Laski. Whether this story is true or not, it is a fact that in the fall of 1573 Sidney had met Laski in Venice and when the Polish Palatine came to London in May 1583, he was not only well received at the court of Elizabeth, but Sidney was nominated to be his personal escort.

There is no doubt that young Philip Sidney consulted John Dee on the circumstances of Vienna and Pozsony before his first trip to Central-Europe in 1572 and 1573. Later on, it was Sidney who had a lot to tell his old master about his experiences there and it is also most probable that Sidney was the mastermind behind Laski's getting acquainted with Dee. They first met on the thirteenth day of Laski's stay in England, in Leicester's house in Greenwich (May 13, 1583; Dee 1842, 20). Five days later Laski visited Dee's Mortlake home and, as we know, he soon became a participant of the angelic conversations.

In what way was their meeting a congenial affiliation? Each of them represented for the other an aspect of the mysterious Other, an embodiment of their secret desires. For Dee, Laski meant a piece of East-Central Europe, a kind of Promised Land from where Hungarian noblemen popped up to help him learn the arcane teaching of the *Steganographia* and where splendid royal courts, such as that at the coronation of Maximilian II, might have guaranteed secure patronage, fame, high social status, as well as attentive ears to his most sacred angelic messages. For Laski, Dee was the embodiment of the hermetic magus, somebody who could personally experience and testify about the magical *exaltatio*, a scientifically-based *unio mystica* with the deity, the Platonic Other where the souls crave to return from the material world. Nor should one forget that Dee and Kelly were practicing alchemists whose experiments might eventually yield the amount of gold frighteningly absent from Laski's bankrupt treasury.

Who was this extravagant Pole, whom the monographs on Dee describe as a fairy-tale personality rather than a real historical character and whom even Robert Evans' book treats rather passinglly? Laski (sometimes called Alasco but his original Polish name was Olbracht Łaski, 1530–1605) came from a leading aristocratic family; one of his uncles was Cardinal Jan Łaski, an outstanding politician and patron in the time of the Polish Renaissance. His father, Hieronim Łaski, Palatine of Sieradz, visited England in 1527 as a Polish envoy and made a very good impression on Henry VIII and on Cardinal Wolsey (Zins 1974, 55). Yet another Jan Łaski (1499–1560), younger brother of Hieronim, became one of the instrumental supporters of the Reformation in England, previously having started his career as a humanist and a personal acquaintance and follower of Erasmus. This Jan had met several Englishmen during his studies in Italy and followed the invitation of Leonard Coxe to the British Isles, soon claiming that his family's descent was in fact from the English nobility. From 1548 he lived permanently in England and earned the appreciation of the leaders of the English Reformation, such as Archbishop Thomas Cranmer.¹³

Albert Laski recalled the stature of his father, Hieronim, and was one of the most colorful specimens of Polish Renaissance personalities: a magnate, a mercenary, a learned humanist, a patron of writers, and a publisher of books, at the same time a ruthless politician. In many ways he can be compared to Dee's possible "Hungarian nobleman," Boldizsár Baththyány, or to the Doctor's later Czech patron, Vilém Rožmberk.¹⁴ Laski was in fact born in Upper Hungary, in the city of Késmárk, which

at that time was a family dominion. This town is several time mentioned in Dee's Central-European diaries, and this is where Laski was running an alchemical laboratory and where one of his alchemists, the Silesian-German Adam Schröter, translated Paracelsus' *Archidoxae magica*. The work was published in Cracow in 1569 and was dedicated "Illustri ac Magnifico Domino Alberto a Lasko, Palatino Siradiensi etc." The lengthy introductory essay by Schröter not only paid tribute to Laski as patron (also eloquently praising his father, Hieronimus), it further testified to the magnate's genuine interest in the occult arts.

It would be interesting to know if Dee ever received a copy of this Cracow *Archidoxae* edition, but since he lived in Laski's household, one can hardly imagine he did not at least see it. Although the English Doctor had known the text from the editions he had possessed since the 1570s, he must have been pleased to read Schröter's introduction in which Hermes Trismegistus was mentioned as someone who had learned medicine directly from the angels and Enoch was remembered for his particularly long life gifted by God. Schröter called Paracelsus a direct descendant of Trismegistus and Enoch, and finally directly referred to magical *exaltatio*: "The essence of the whole work is to teach in general how it is possible to prepare an appropriate medicine against any kind of illness and finally to reach *exaltatio*; by the help of which the human body miraculously and from all illnesses and future accidents for a long time can be liberated and immunely preserved."¹⁵

The exact nature of Laski's mission is not known. Polish historians suggest that as a notorious "king-maker," he might have had in mind the establishment of an alliance against the Catholic king, Stephen Bathory.¹⁶ As we know, nothing significant came out of this obscure political commission; on the other hand, he witnessed in Oxford the debate of Giordano Bruno with the local professors and had many other interesting cultural encounters. Finally, he returned to Poland with two Englishmen in his retinue, both parties having exalted hopes about the alchemical and magical experiments to come.

The Lure of Dee and Kelly for Eastern Europe

Among intellectuals traveling in the late-Renaissance in East-Central Europe—such as Carolus Clusius, Francesco Pucci, Jacobus Palaeologus, Christian Francken, and others—John Dee and Edward Kelly have always aroused a great deal of interest in the eyes of Eastern European

historians of humanism and science. There is more than one reason for this. First of all, one should think of the high prestige of Dee in English science historical scholarship.¹⁷ Furthermore, one should remember the amazingly voluminous autobiographical documents, especially the intriguing spiritual diaries of Dee, that document his Eastern European sojourns. Until the early 1980s Eastern European scholars interpreted Dee's visits as a major impetus from the West facilitating the development of natural science in the east-central part of the continent¹⁸ and they found confirmation for this in the works of their western colleagues.¹⁹ As I have described earlier, since the 1980s John Dee's image as an Elizabethan intellectual has undergone several phases of metamorphosis. Debates concerning the Yates thesis have also eroded his reputation as an outstanding natural scientist and the previously established link between hermeticism, magic, and the advancement of learning. In this context, when we reevaluate Dee's Eastern European mission, we have to put the following questions for consideration: What brought the English travelers to such remote places of Europe? What message or mission did they convey to their hosts? In what way did this influence Eastern European intellectual life? Did they get anything in return from Eastern Europe?

There are three groups of sources relating to Dee's eventful East-Central European journeys. First, there are external references (hearsay, humanist correspondence, and reports of agents) that are quite scarce. Secondly, we have Dee's "public" private diaries that show a busy humanist with a tight itinerary, traveling constantly and meeting a great number of people; however, little is revealed about the exact nature of his contacts and the contents of his conversations. (No doubt, he was fully occupied with continual efforts to secure patronage for himself and his family.) Third, most exhaustive are his spiritual diaries, the journals of the angelic conferences, which, of course, are the most intimate of all the documents and deal not only with the séances and Dee's prophetic visions but also provide complex insights into the everyday life of the two wandering prophets and their relatives.

Since recent biographical writings²⁰ throw ample light on these domestic aspects, I shall only briefly refer to some characteristic features and episodes which are specifically connected to the questions I have posed above.

I think in the previous subchapter I have given a detailed enough assessment of Dee's possible motivations in accepting Count Laski's invitation and trying his fortunes at the courts of East-Central Europe. He clearly felt dissatisfied in regard to his advancement in England; he clearly had an urge to share his angelic messages with attentive and at the same

time powerful persons; he clearly had idealistic hopes about the status and prestige of the occult arts at the Central European courts; and he must have had enough self-confidence to think that a scholar-prophet like himself would be warmly welcomed in those courts.

In spite of the contrary opinion of some historians, I shall argue that he was not entirely mistaken in his expectations and that his five years spent in Central Europe should not be considered a complete failure. At first sight, though, the diaries seem to prove that the adventures on the far side of the Continent again failed to yield the desired results. On the debit side can be mentioned that Laski's support soon dried up and Dee was no more successful in Prague. Rudolf did not take to him and he was not the least inclined to give Dee the title of "Royal Mathematicien." Back in Cracow, Dee met King Bathory three times, but the ruler remained suspicious of his mission. The worst events followed only after that: as a result of the machinations of the papal nuncio, Dee was temporarily expelled from the Habsburg lands, but fortunately the Czech magnate, Count Rožmberk, provided shelter for him and his kin.

On the credit side one should take into consideration that in spite of all their eccentricity the Englishmen were nowhere kicked out or simply chased away. On the contrary, they enjoyed royal and aristocratic patronage and most of their expenses were covered for half a decade. When Dee returned to England, he traveled like a prince. He had three coaches with twelve Hungarian horses. In the Habsburg territories twenty-four soldiers escorted him with the passport of the Emperor, and in German lands they also had three or four bodyguards. It is true that most of these expenses were covered by loans, but back in England, Dee duly cashed them with his queen. According to the *Compendious Rehearsal* (Dee 1851, 34), the Doctor requested Elizabeth to compensate him for expenses and losses to the value of 2306 pound sterlings!

During their continental sojourn, the Englishmen enjoyed the two quietest years in Trebona (Třeboň), on the Rožmberk estate. However, neither financial success nor an intellectual environment comparable to Dee's former private academy in Mortlake, England, can be documented there. Was the little cultivated Eastern European society too unsophisticated to sympathize with Dee's mission or were the Englishmen simply too eccentric? If we look at the independent documents on the intellectual atmosphere of Rudolfine Prague, or even the local aristocratic center of Trebona, we cannot help feeling that the second explanation is more likely.

It also appears that Dee's strategy to attract his potential patrons misfired. What is more, his apocalyptic and highly idiosyncratic message

was frightening. On introducing himself he promised to reveal, on the basis of the angelic conversations, the greatest secrets of the world but the contents of his séances did not in fact radically differ from the prophecies of widespread contemporary apocalyptic literature. No doubt, he knew well about the Book of Enoch and he had an effective choreography to perform the updated version of the prophecies. However, a pathetic as well as ironic feature of his argument was that while he communicated the angelic messages to king and emperor, he bluntly threatened them in the name of the celestial powers unless they followed his directions. Because of this, each audition involved high dramatic suspense, combined with the atmosphere of tragicomedy. Nevertheless, their detailed descriptions in Dee's spiritual journals reveal important information to the psychoanalyst as well as to the historian of mentalities, revealing not only Dee's excentric personality, but also the characteristics of the interpretive community to whom the messages were directed.

The English Doctor had his first important royal audience in Central Europe at the Prague court of Rudolf II. He appeared before the Emperor on September 3, 1584, after elaborate preparations, and the audition lasted a full hour (Dee 1659, 230–31). At the beginning of the conversation Dee reviewed his major work, the *Monas hieroglyphica*, and pointed out that it had been dedicated to Rudolf's father, Maximilian II. After Dee's introductory remarks the emperor admitted that he had difficulties in following the Doctor's train of thought. Changing the topic, Dee then explained how he had become disappointed in earthly sciences and how he had turned to angelic metaphysics. The openly magical program, already quoted above (Dee 1659, 321), definitely horrified the emperor. On top of this, Dee poured out to him his missionary program:

It pleased God to send me his Light; and his holy Angels, for these two years and a half, have used to inform me: yea, they have brought me a Stone of that value that no earthly Kingdom is of that worthinesse as to be compared to the vertue and dignity thereof, etc.

The Angel of the Lord hath appeared to me, and rebuketh you for your sins. If you will hear me, and believe me, you shall Triumph: if you will not hear me, The Lord, the God that made Heaven and Earth, putteth his foot against your breast, and will throw you headlong down from your seat.

Moreover, the Lord hath made his Covenant with me:[. . .] If you will forsake your wickednesse, and turn unto him, your Seat shall be the greatest that ever was: and the Devil shall become your prisoner:

Which Devil, I did conjecture, to be the Great Turk. This my Commission, is from God. (Dee 1659, 231)

Hearing these prophecies Rudolf could hardly maintain his quietness. He assured Dee that he would consider his message carefully and dismissed the Doctor. Dee, in spite of all his efforts, could never again obtain an audience with the emperor, which fact contributed to his decision to move to Cracow and try his fortune with King Stephen Bathory.

Albert Laski introduced him to the king on April 17, 1585, Wednesday. The first meeting was short and formal; Bathory postponed the detailed discussion until after Easter (Dee 1659, 397). From this time on, the spirits inserted pronouncements concerning Bathory in their messages. For example on April 24: "Stephen, lift up thy head amongst the stars of Heaven; for the spirit of God is with thee, [. . .] but the Lord will reprehend thee for thy sins" (Dee 1659, 398). Then, on May 20,

I greatly thirst after Steven, for the course of things are at hand,
Behold, I will bless him, that he may leave blessing unto thee,
Behold, I will place thee unto him, as his right leg, and he shall
stand.[. . .]
Therefore and with speed go before Steven. (401)

A curious episode took place on May 22. Kelly was conversing with a spirit called Puer, and the demon asked in what language to scold Bathory. Laski, present at the séance, requested Hungarian. Puer/Kelly, however, skilfully avoided the task:

Hungarian is hateful unto me; For it is full of iniquity; Neither will I speak unto him my self that he shall (yet) hear me. I will open my mouth in Latin for thy sake: and if he become obedient, I will also appear unto him my self and unto you all, [. . .] but to overcome him by Miracles it needeth not, for by him the people are not edified, but by my words he shall understand, that I touch him, although Satan stand by him.

But go thou [Albert Laski] unto him, and speak unto him liberally, when he hath heard me, if he receive me, my blessing is upon him of necessity. (402)²¹

A day later (May 23) Bathory sent for Dee and Laski. He received them in the dining hall; he was sitting next to the southern window opening to the new garden, and addressed them in Latin:

Egit mecum Dominus Palatinus, ut vos audirem de rebus istis magnis
& raris loquente . . . — The Palatine has told me that I should listen
[to] what you have to say about great and rare things. (402)²²

Dee answered with a lengthy theological explication in which he argued that prophecies did not become invalid in the time of the New Testament and quoted the Scriptures to prove the validity of divine revelation. At the end of his speech he repeated to Stephen the offer he had made to Rudolf:

Et paeteritarum nostrorum Actionum libros 24, paratus sum videndos
exhibere—I am ready to exhibit at your Majesty's request the 24 books
of our former actions; some of those have been written in Latin and
Greek, the others in English. (Dee 1659, 404)

The king's answer is not incorporated in the diary; instead, Dee's thanksgiving is included for having been led to the Polish court. A few days later, on May 27, another audience was granted in the king's private chamber. During this the Englishmen set up a session of angelic conference and a spirit through Kelly's mouth spoke to the king as follows:

Listen carefully, Stephen. Who nurtured you from the cradle? Is it not that King of Glory. By whose grace all power is subjected in heaven and earth? Did he not raise you with his powerful arm, from an ordinary soldier to a greater one, and so to the greatest kingdom? Why, then, did you introduce such a dark cloud, full of so much fog and ingratitude, between your God and your soul? (Dee 1659, 405; Dee 1998, 181)

It is interesting to ponder how the king felt at such speeches. As a devout Catholic he probably deeply believed in the existence of spirits and must have appreciated that he was chosen as a recipient of a sacred message. On the other hand, he must have also been perplexed at how little informed the supernatural being was in calling him an ordinary soldier. It is true that he did not inherit the Polish throne but was elected to it; however, prior to that he had been the Prince of Transylvania and had come from one of the most distinguished Hungarian aristocratic families.

A day later, at a private session a "Green Man," called Ilimese, strictly commanded Dee to scold the king severely at their upcoming meeting:

Thus saith the Lord: thou must answer Stephen according to the hardness of his hart: Answer him thus, "Lo, King, the God of Heaven and Earth hath placed me before thee, and hath shewed unto thee his will.

[. . .] Behold (O King), I can make the Philosophers Stone. Bear thou therefore the charge, and give me a name within thy court that I may have access unto thee! and yearly maintainance of thee for us both. (Dee 1659, 407)

Whether the spirits were indeed worrying about Dee's material needs or whether that Kelly just wanted to make sure that patronage would not be forgotten is hard to tell. But it is even more puzzling as to why Dee avoided these formulas referring to their possible settlement in Cracow at their next—and last—audition with King Stephen. That happened on June 4, and the diary-entry relating the meeting is extremely short. We learn only that the king, Laski, and Dee participated in it, there was no spiritual conference, and the Doctor plainly reconfirmed his honesty in delivering the divine message to Bathory:

Ecce (O Rex) Deus Coeli & Terrae, me ante oculos Vestros posuit: the King of Heaven & Earth has led me in front of your eyes and has revealed his will. As for me, [God] has brought me up from my youth in his fear and led me to desire true Wisdom. By the help of which I have arrived at the comprehension of the secrets of Nature, (ecce) in nomine Dei. (Dee 1659, 408)

In fact, Dee repeated nothing of the message of Ilimese, the Green Man. Needless to say, the outcome of the final audience was similar to that of the Prague scenario, and since Bathory offered no position to the Englishmen, Dee and Kelly returned to Prague.

Two more episodes in the spiritual diaries describe Dee's search for patronage. One is an interlude in Prague when Dee learned that at the imperial court he had been exposed to wicked gossips, even plotting, which aimed at driving him out of the capital. The charge at the table of the apostolic Nuncio *inter alia* was that Dee did not hesitate

to offer to the Emperor [. . .] an apparition of blessed spirits (which they, however, call and believe to be evil ones) with the aid of certain magical characters. [. . .] Also [it was said] that the Imperial Majesty had purposely recoiled from that [offer] lest he should burden his conscience with scruples or cause some danger to his soul. [. . .] They believe in fact that the dealings [of Mr. Dee] with the Emperor might rather have originated from another, more important matter. I am indeed of the opinion [comments the secretary who prepared this memo for the Emperor] that they prefer one philosophers' stone to ten visions of angels.²³

This quotation may explain why at other times Dee desperately tried to convince both Rudolf and King Bathory that he was able to produce the philosophers' stone (Dee 1659, 243, and also as quoted from 407). There was evidently a fatal discrepancy between the Doctor's intention and his clients' expectations. In spite of all this, the continental mission cannot be considered altogether a failure.

From this time on Dee and his sayer did not have access to royal circles. On the other hand, they developed a strong association with Francesco Pucci, the heretic and apostate who also took part in many of their séances.²⁴ It is noteworthy that after their first meeting in Cracow, Pucci seems to have followed Dee to Prague; later on they met in Erfurt during Dee's temporary exile, and, finally, the Italian forced himself on them as company in Trebona. His presence is associated with the most mystically significant episode of Dee's years on the Continent: the miracle of the books in Prague (see above, pp. 219–20).

In Dee's opinion Pucci was a mean character whose intrigues contributed to the expulsion of Dee and his associates from the territory of the Habsburg empire in May 1586 (cf. Dee 1569, 428). The Italian nevertheless must have been a very strong character because the Doctor could not easily free himself from his influence. As is well known, Pucci converted several times to and from Catholicism and tried various Reformed denominations, including a brief encounter with anti-Trinitarianism. At the time of his meeting with Dee and Kelly, he was taking one of his swings back to the Popish religion and was seeking protection from the papal nuncios. The new administrator, Bishop Filippo Sega, who arrived in Prague in April 1586, probably through Pucci's information, soon became alarmed by the obscure revelations of the Englishmen and thought that their content should be examined by the Catholic authorities in Rome. Although Pucci recommended the journey to Italy, Dee in time realized that no success and appreciation would be waiting for him at the seat of the Holy Inquisition. His position worsened enough in Prague since he had to leave the Habsburg lands at short notice.

The Doctor then temporarily moved to Germany until his new patron, Count Rožmberk, secured for him permission to return and stay in Trebona. The company spent two years there and the last Eastern European chapters of the spiritual diary contain magical sessions held in the Rožmberk castle. During the Trebona period the angels suggested important corrections to the system of evocations (cf. Dee 1994, Appendices A–C), and it was there that the Englishmen got supernatural instruction to carry out the infamous wife-swapping project (Dee 1659, *19–21 [new numbering]).

After a few years of break, Dee continued writing his private diary. These entries show the Doctor increasingly socializing from 1586 on. Traveling envoys, merchants, and scholars; English, French, and German visitors; and a few local characters are mentioned.

When contrasting the spiritual and the private diaries, we see two sides of Dee emerging. The latter was an active, versatile, prestigious humanist on the move while the former was an isolated monomaniac who had lost contact with reality and turned toward some obscure, inner dreamworld. This double nature, in fact, can be detected in the spiritual diaries themselves. It is surprising to see how few characters are mentioned on the several hundred pages of the angelic records: Dee, Kelly, Laski, and the two rulers; next to them a few royal administrators (like Dr. Jacob Kurtz), Ambassador de San Clemente, and the heretic Pucci are named; in addition, Dee meticulously registered the names of their landlords and pages. This illustrates that even these obscure and emotional journals can be occasionally used as enlightening social documents.

We learn, for example, that their journey from England to Poland lasted several months, beginning on September 21, 1583 and ending only on February 3, 1584, in Lasko Town where they were lodged "in the Provost his fair house by the Church" (Dee 1659, 62).

The description of their quarters in Prague, in the house of Tadeáš Hájek, the famous astronomer and alchemist, is even more dramatic:

August 1–9, 1584. On Wednesday the first day of August, at afternoon (hora 3) we entered on our journey toward Prague, in the Kingdom of Beame [sic!], whither we came on Thursday seven-night after, by 3 of the clock, that is exactly in eight days. We came by coach. I, E.K. and his brother, and Edmond Hilton, so that we came to Prague Augusti 9 by the new calendar.

August 15. Wednesday. We began on the day of the Assumption of the blessed Virgin Mary: in the excellent little stove or study of Dr. Hageck his house lent me, by Bethlehem in old Prague: which study seemed in times past (anno 1518) to have been the study of some student or skilful of the Holy Stone. A name was in divers places of the study, noted in letters of gold and silver, *Simon Baccalaureus Pragensis*. And among other things manifold written very fairly in the study (and very many hieroglyphical notes philosophical, in birds, fishes, fruits, leaves and six vessels, as for the philosopher's works), these verses were over the door:

Immortal honour, and equal glory, are owed to the one
By whose wit this wall is adorned with colour.

And of the philosopher's work (on the south side of the study) in three
lines uppermost was this written:

This art is precious, delicate and rare.
Our learning is a boy's game and the toil of women.
All you sons of this art, understand that none may reap the fruits
of our elixir except by the introduction of the elementall stone,
and if he seeks another path he will never find the way
nor attain the goal.

(Dee 1659, 212; Dee 1998, 134–35)

From many of the entries one can reconstruct the structure of households, even learn the names of some of the servants (cf. Harkness 1997). This is how a certain Emericus, probably a Hungarian, became eternalized, having come from Laski's estate of Késmárk (then Hungary, today in Slovakia) with some errands (Dee 1659, 91). The following lively account reveals the semiotics of the display of power in early modern Poland:

Remember that on Saturday, after noon, the Chancelour came to Cracow, with 60 coaches in his company and train: he bringing in a close Coach (covered with red) the Lord Samuel S. Boroskie Prisoner, whom he took Friday night before, at his sisters house, being separated from his Souldiers and servants, &c. (May 7, 1584; Dee 1659, 118)

We also learn that, in spite of his Protestant denomination, Dee attended Catholic services in Cracow and even took communion at Easter. Preceding this, he was convinced by the angels that "The Bread that was ministered by Christ unto his Disciples, was not a figure of his body, but his true body. So the Minister using the office and person of Christ in office, pronouncing the words, doth also give unto the people not Bread, but the true body" (Dee 1659, 372). It led him to accept, at least temporarily, the Catholic doctrine and he decided on admitting his sins before a confessor who was none other than the famous neoplatonic philosopher and commentator of the hermetic texts Hannibal Rosselli:²⁵

April 19, 1585. I took ghostly counsel of Dr. Hannibal, the great divine, that had now set out some of his commentaries upon Pymander, Hermetis Trismegisti.

April 20, 1585. Saturday. I received the Communion at the Bernardines, where that Doctor is a Professor. (Dee 1659, 397; Dee 1998, 178)

The mention of Doctor Rosselli reminds us that he is practically the only humanist scholar who is named in the spiritual diaries, and the Italian's commentaries on Hermes Trismegistus' *Pymander* is almost the only book that Dee mentions by title beyond his own writings.²⁶ All this is surprising from a man who possessed the largest private library in contemporary England and who was carrying an impressive five-hundred-volume traveling library with him. To this Roberts and Watson ironically remark: "there is little reference to books in the conversations with angels—no doubt because one does not question angels about matters which are already dealt with in print" (1990, 54).

Roberts and Watson (1990, 53–54) have clarified that in the hastily selected but still huge traveling library Dee had unevenly selected works from his comprehensive collection. He preferred his hermetic books and beloved Paracelsica, and works on alchemy (perhaps at Kelly's suggestion), and he also took a sizable part of his Hebrew collection, which might indicate his growing or ongoing interest in the cabala.²⁷

Compared with his previous continental journeys the Doctor indeed seems to have bothered much less with acquiring books and manuscripts. It is still notable, however, that even in the most difficult moments of his life he could never be entirely dispassionate about precious textual pieces. For example, during his travels in Central Europe he often asked his spirits whether to take his books or not on a certain leg of the journey (e.g., Dee 1659, 243).

The bibliophile Dee is shown by his generous present of a fifteenth-century Greek manuscript of Boëtius' *De consolatione philosophiae* in which he inscribed a laborious dedication addressing the rector of the Jagellonian University, Martin of Silesia.²⁸ Sometime in Poland he also presented Kelly with an 1555 Estienne Bible (R&W 1099) and in exchange received from Laski a 1564 Venice folio of "Catalogus gloriae mundi Chassenei" (R&W 226).

Dee also bought two manuscripts. He acquired a medieval library list in Erfurt, during his most desperate weeks of exile—he probably planned to identify his own manuscripts at home by the help of this manual (R&W DM24). On his way back to England, he bought another manuscript in Lübeck. This is a connoisseur's piece: George Ripley's magnificently illustrated alchemical scroll.²⁹

Dee also recorded his most important moves to gain or enhance patronage. He included in the spiritual diaries his letters to Emperor Rudolf as well as his writings to his queen:

May 11, 1586. Sunday. I came to Leipzig, and was at Peter Hans Swartz his house lodged. I found Laurence Overton, an English merchant. [. . .] There I also found a corteous gentleman called Mr. Francis Evers, the Lord Evers his son of the north. [. . .] I cannot omit to pass without memory the copy of one letter which I wrote to the Queen of England, her Secretary, the Right Honourable Sir Francis Walsingham, as followeth: "Right Honourable Sir, I am forced to be brief. That which England suspected was also here, for these two years, almost (secretly) in doubt, in question, in consultation Imperial and Royal, by honourable espies, fawning about me, and by other discoursed upon, pried and peered into. The Apostolic Nuncio, after his year's suit unto me to be acquainted with me [. . .] is gone to Rome with a flea in his ear, that disquieteth him, and terrifieth the whole state Romish and Jesuitical. Secretly they threaten us violent death . . . Sir, I trust I shall have justice for my house, library, goods and revenues, &c. [. . .] No human reason can limit or determine God his marvellous means of proceeding with us. He hath made of Saul (E.K.) a Paul. The Almighty bless her Majesty, both in this world and eternally: John Dee." (Dee 1998, 196)

The excited and not too coherent diction of his letter can be explained by his desperation: his trip to Leipzig was during a time of exile when his and his family's fate was most uncertain. Obviously, the Doctor mobilized all his energy to consolidate their state, political and financial alike. But the above letter also indicates that as opposed to Deacon's suspicion (1968), it was not he who was spying, but rather he who became the prey of the spies of Rome.

Two years prior to this letter Dee had given a totally different account of his audience with Rudolf. At that time he had still been optimistic about his future career as "Imperial Mathematicien" and gave a very vivid description of the choreography of auditions in the Emperor's private chamber:

September 3, 1584. Hereupon I went straight up to the Castle: and in the Ritter-Stove or guard-chamber I stayed a little. In the mean space I sent Emericus to see what was of the clock: and the Chamberlain (Octavius Spinola) spied him out of the Emperor's chamber window,

and called him, who came up to me, and by that time was the Chamberlain come out to me; and by Emericus he understood that I was the man the Emperor waited for.

He came to me very courteously, *hora tertia exacte a meridie*, told me of the Emperor's desire to see me and to speak with me. So he returned to the Emperor into the privy chamber, and came out again for me, and led me by the skirt of the gown through the dining-chamber, into the privy-chamber, where the Emperor sat at a table, with a great chest and standish of silver before him, my Monas and letters by him, &c. I came toward him with due reverence of three cursies, who showed me a gracious and cheerful countenance. (Dee 1998, 142)

As we know, the audience brought rather bleak results; however, the lack of imperial grace was not enough to curb the Doctor's ambitions.

These, almost randomly selected examples corroborate my feeling that Dee lived an almost schizophrenic double life in East-Central Europe. The psychotic and visionary loner on the one hand can be contrasted with the vivid and exuberant scholar-magus who maintained his contacts and sought new acquaintances. One must be careful then when trying to answer the previously posed questions: did East-Central Europe gain anything from the Dee mission and did Dee and Kelly get anything in return?

The balance is actually more even than it looks at first sight. While at home Dee collected books, organized a private academy, managed geographical expeditions, and suggested a reform of the calendar, he did little of this sort in Eastern Europe. He did not even practice the occult art in that complex, esoteric-humanist form as he had previously at home. His message for Eastern Europe was a mystical, religious lesson, but without the innovative dogmatics of the radical reformers who temporarily camped in Poland or in Hungary (the Sozzinis, Palaeologus, or Francken). In fact, Dee was abhorred by the vistas of sceptical anti-Trinitarianism.

The Eastern European historian becomes most intrigued by learning about Dee's contacts with Christian Francken, the infamous heretic who, probably for the first time in European intellectual history, reached as far as systematic philosophical atheism.³⁰ In July 1587, probably in Trebona, Dee received two books from Francken. He took them back to England (being probably one of the first intellectuals to import anti-Trinitarianism to Britain), but as we have seen, he sent them to the archbishop of Canterbury to be theologically refuted (see above, p. 239).

One might say that Dee's religious eclecticism converged with the denomination of his patrons: at the Elizabethan court he appeared as a nationalist Anglican, near the Catholic Stephen Bathory he confessed and took the holy communion, in Habsburg Prague he also professed Catholicism, writing that "Luther, Calvin wilfully, obstinately erring; the Pope is not Antichrist; and *Ecclesia nostra Mater*" (Dee 1659, 411–12). On top of this interconfessionalist heterodoxy he developed a strong chiliasm, an inclination for Enochian prophecy with an apocalyptic imagery. While John Dee of England had been a follower of Roger Bacon and Trithemius, the wandering prophet of Eastern Europe is more an intellectual relative of the late Guillaume Postel, the similarly universalist Francesco Pucci, or Bruno and Campanella, the enthusiasts. All this, however, had relatively little effect on the Polish or Hungarian intelligentsia who had more affinity for religious controversies than for philosophical mysticism.

This ambiguous, slightly disappointing picture emerges from the external sources as well. Dee's name is not an important issue either in secret service reports or in the correspondence of the papal nuncios; he is not mentioned in the royal annals of the Polish court after his audiences with King Stephen, and he received only passing mentions in the correspondence of the outstanding scientist-humanists of the Prague imperial court, such as Crato von Kraftheim or Tadeáš Hájek (Hagecius) whose house sheltered the Doctor in the Bohemian capital (Dee 1659, 212).

It seems that Dee received the most extensive treatment in the letters exchanged between Hájek and his Silesian friend in Breslau (Wrocław), the Hungarian-born humanist Andreas Dudith. Unfortunately Hájek's letters are not extant, but we have Dudith's answers whose two mentions are of great interest. Dudith, who had hosted Philip Sidney in his Wrocław home in 1574 and otherwise had various contacts with English politicians and scholars, wrote rather lengthily about the English Doctor on December 20, 1585, not long after he had relocated from Poland to Prague. In this letter Dudith mentioned Dee with great reverence and asked Hájek to inquire from the Doctor if he could recommend to him a resident mathematician to whom he was willing to offer a respectable salary. Dudith also wrote to Pucci, the "Florentine patrician and nobleman" whom he seems also to have esteemed highly, and asked him the same, that is, to suggest a mathematician to satisfy his personal needs.³¹

There is no record whether along their several journeys between Prague and Cracow the Englishmen ever stopped in Wrocław to meet Dudith, whose esteem seems to have waned by 1587 when on January

3 he again mentioned Dee in his letter to Hájek. The reference reflects a great deal of uncertainty and ends with a sarcastic remark: "I have heard a lot about the English all which seem perplexing and little credible to me. Since some people ascertain that he speaks with the angels, I do not know whom to believe."³² Then he mentions that apparently the spirits returned mere coal in lieu of the treasures Dee had collected for them, and even this coal burned into ashes.³³

The above quotations corroborate Shumaker's wry remark: "Few of the persons admitted to the séances were deeply impressed, and some were frankly sceptical" (1982, 48). On the contrary, a more than enthusiastic remark can be found about Dee in the materials deriving from Václav Budovec, noted Lutheran leader in Prague, also an intellectual quite sensitive to certain kinds of mysticism. As we know from Robert Evans, he knew Dee personally and in a later recollection remembered as follows:

A learned and renowned Englishman whose name was Doctor Dee came to Prague to see the Emperor Rudolf II and was at first well received by him; he predicted that a miraculous reformation would presently come about in the Christian world and would prove the ruin not only of the city of Constantinople but of Rome also. These predictions he did not cease to spread among the populace.³⁴

Recently Deborah Harkness commented on this passage, suggesting that "Dee was not only intent merely on contacting angels, nor in keeping detailed diaries of those conversations. He was determined to communicate and discuss his concerns about the natural world and its future with the angels, his associates in the conversations, and, as Budovec reminds us, with a broad popular audience" (1999, 11). There is no reason to have doubts about Dee's ambition to spread his message to the largest possible audience; however, Harkness neglects the fact that Budovec's account dates from 1616, a time when the Rosicrucian excitement and an upsurge of magical interest aggravated the Lutheran community all over Central Europe. His recollection of Dee and the Doctor's impact on Prague twenty years earlier must be seen from this special vantage point.

By 1616 Dee was long dead and his fame as a scholar started transsubstantiating into a legendary lore, the clear signs of which we find in seventeenth and eighteenth-century Central Europe. Let us start from the late 1580s, when Dee was staying in Trebona on the Rožmberk estate. According to his private diary he led a most active social life, regularly meeting with the Count Rožmberk as well as numerous local

and international intellectuals, including an amazingly large number of Englishmen.³⁵

As we know, the Rožmberks, Vilém and Peter Vok, had splendid courts and residences in Southern Bohemia, which were not only centers of significant local power, but also places of learning and pilgrimage destinations for wandering humanists and scientists. In their castle of Krumlov they accumulated a ten-thousand-volume library, one of the largest collections in contemporary Central Europe. In neighboring Trebona an alchemical laboratory was functioning for many years, and Vilém Rožmberk was as interested in Paracelsus and his work as was Laski the Pole and the Hungarian Batthyány. Vilém even employed humanist-chemists to translate Paracelsica into Czech, as several ornate manuscripts still testify in the State Archives of Třeboň Castle and elsewhere (Evans 1973, 212–13).³⁶

The archives in Trebona have preserved a large body of complex correspondence between Vilém Rožmberk, his managers, and many passersby who were seeking patronage and/or refuge on his estates and in his laboratory.³⁷ In this heap of material there is surprisingly little to be found about the activities of Dee and Kelly. Apart from a two-page manuscript, which seems to be a copy of some fragments of Dee's diary from 1583 through 1587,³⁸ there is only one letter (from Doctor Carl Wideman to Vilém Rožmberk) that explicitly refers to Kelly's alchemical experiments,²⁸³ and there is no mention of Dee at all. As it turns out, Vilém—in cooperation with Emperor Rudolf—had large-scale projects for not only laboratory alchemy but also for metallurgy and mining. Hence a great number of experts were busy with various undertakings (Adam of Hradec, Václav Vřesovic, Peter Hlavsa, Daniel Prandtner, the above mentioned Carl Wideman, Melchior Horning, and others—see Evans 1973, 216), but Dee must have had only a marginal share in this work, if any. Although he visited Kaiser Rudolf Stadt (Rudolfovo), the center of the new metallurgical experiments, in December 1588 (Dee 1998, 238), his only purpose there was to oversee the making of his coaches, being prepared for the return journey to England that started on March 11, 1589.

My suggestion is that while Dee and Kelly seem to have had little impact on their Eastern European contemporaries, they left behind an image that soon grew into inflated legends. Evans mentions many households from the Czech lands where manuscripts of their works have been preserved, and there is also one seventeenth-century example from Hungary.⁴⁰ Furthermore, I have already mentioned Budovec's story that depicts Dee as an important prophet-philosopher of the late Renaissance, almost as somebody who was preparing the way for the Rosicrucians.

This Rosicrucian image may have been grounded when Dee stayed in Bremen on his return journey and met the mystical adept of Hamburg, Heinrich Khunrath. Perhaps the English Doctor suggested that his colleague visit Vilém Rožmberk because in 1591 he was Vilém's court physician and by 1598 he received Rudolf's special copyright privileges for his works (Evans 1973, 214; Szulakowska 2000, 79). From Bremen Dee also corresponded with his old patron and friend, Moritz, the Landgrave of Hesse-Kassel, one of the chief patrons of the occult arts in contemporary Germany.

I argue that the transformation of natural philosophy and science during the late Renaissance also produced an epistemological vacuum that temporarily was filled by various magical applications. This explains the great popularity, even prestige, of magic during the sixteenth and the first half of the seventeenth centuries, and also the readiness of patrons to support such experiments. The development of such complex and intellectually ambitious alchemical patronage was most characteristic of the German *kulturkreis* of Central Europe, as seen in Emperor Rudolf's Prague or in some of the German princely courts which all had strong connections with their local universities and always had a supply of learned enthusiasts (Heidelberg, Kassel, Weikersheim, Wolfenbüttel, Helmstedt).⁴¹ Dee evidently wanted to capitalize on this trend and market his own mysticism in such a cultural milieu. Alternatively, his dignified stature, when remembered a decade or so later, could be associated with the aims of the Rosicrucians.

The Dee type of intellectuals with their occult and chiliastic visions were primarily loners; however, their attitude logically culminated in the emergence of secret societies, working for the reformation of the world. Although according to the historical sources Dee never had any direct link with any organized secret society, let alone the Rosicrucians, he has been associated with them both in modern scholarship as well as by writers in the early modern period. Frances Yates argued that his *Monas* and his activities in Central Europe fostered the genesis of the Rosicrucian manifestos published in and around 1616.⁴² As is known, these documents—growing out of a distinctively Lutheran-Pietist ideological foundation—promised the general reformation of the world through the aid of a secret society, the members of which would pursue politics, science, and religion for the purpose of saving mankind.

Some researchers of Rosicrucianism have found the archetype of this program in the *Naometria* of a certain Simon Studion, which was a prophetic-apocalyptic work, propagating the alliance of the Lily (France),

the Lion (England), and the Nymph (the Palatinate of Württemberg) on common religious grounds (Lutheran Evangelicalism).⁴³ According to Yates the tone of the work is similar to that of Dee's prophecies in the East-Central European angelic conferences, and she suggested that Studion and Dee's patrons in this region formed a homogeneous intellectual circle.⁴⁴ The forging of a homogeneous intellectual society was undoubtedly a gross simplification by Yates, and Urszula Szulakowska's recent book offers very good evidence concerning just how divided even the closest Lutheran mystical circles were if one scrutinizes such previously undistinguished Pietists as Andreae, Arndt, Khunrath, or their enthusiast idol, Valentin Weigel (2000, 82–86; 145–52).

It is also true, on the other hand, that Dee indeed had personal contacts with a number of the patrons and scholars associated with the genesis of Rosicrucianism, and the following facts perhaps corroborate what I have just suggested, namely that in the 1610s Dee's image may have been used in a symbolic sense when the intellectual pedigree of Rosicrucianism had to be assembled.

1. It is a fact that Dee indeed dreamed of a general religious and political reform of a unified Europe—which he of course imagined to be united under a British banner just as Postel had earlier propagated a French-coordinated continental integration. It is also noteworthy that Dee in his *Monas hieroglyphica* offered a mystical-scientific method for the enhancement of the human intellect by which the reforms could be accomplished.
2. Undoubtedly, the *Monas* exercised quite a strong impact on certain trends of seventeenth-century intellectual history. It was republished in Lazarus Zetzner's famous compendium, the *Theatrum chemicum* (1602 and subsequent editions), which was used in all corners of the Continent. Even Carlos Gilly, a scholar definitely sceptical about Dee's direct influence on the Rosicrucians, admits that Dee's diagram of the hieroglyphic monad could be one of the archetypes of Adam Haslmayr's "character cabalisticus" included in the German Rosicrucian's *Consideratio Figurae Ergon et Parergon Fratrum RC* (unpublished manuscript of 1626; cf. Gilly 1995, 35). Gilly also sees a possible cross-influence between Dee's monad and Philippus à Gabella's alchemical treatise on vitriol, published in his *Secretoris philosophiae consideratio brevis, nunc primum una cum Confessione Fraternitatis RC in lucem*

edita (Kassel, 1615; cf. Gilly 1995, 73). Finally, Gilly concludes as follows: "Dee, with many others, belonged to that alchemist-hermeticist tradition from which the alchemists and theosophists of the seventeenth century learnt a lot" (1995, 74).

3. According to the above, we should reconsider the fact that—although Rosicrucianism cannot be equated with Christian cabala (as Yates 1972, 89, superficially suggested)—a mystical natural philosophy based on number symbolism, such as that of Dee, strongly featured in the thinking of the Rosicrucians, too. As we know, also from Gilly, in 1619 an eccentric enthusiast Philip Ziegler, turned up in Nurnberg and called himself the king of the Rosicrucians ("Origines Philippus von Gottes Gnaden erwählter und gekrönter König von Jerusalem, Siloh, Joseph und David, der Brüder des Rosenkreutzes Oberster und unüberwindlichster Zepter des Königs in Sion"). This Ziegler in a later, strongly numerological work mentioned Dee and called him—as a member of the Rosicrucians—his spiritual brother ("Joh. Dee Londinensis Anglus de Fratribus RC;" cf. Gilly 1988, 83).

Dee's impact on the seventeenth-century German courts was recently reassessed by Bruce T. Moran (1991, 92–100), who introduced his chapter on "The Rosicrucian Connection" as follows:

There existed a natural language which linked the books of nature, man, and Scripture. Attempts at its reconstruction marked the efforts of Renaissance Neoplatonists like Pico, Ficino, Reuchlin and Agrippa, and defined many parts of Paracelsian literature as well. Among them all, however, it was John Dee's *Monas hieroglyphica* which became the best known exercise in pursuing the real meaning of nature by means of a natural creative language—in this case a language reduced to a universal symbol reflecting the unity of the world. Dee's influence, may, in fact, have been partially responsible for one of the most interesting episodes in the search for a natural language. In this instance, the idea of a language of nature filtered through traditions of Christian cabalism and Paracelsian prophetic mysticism to appear finally in the early seventeenth century in treatises describing the brotherhood of the Rosy Cross. (1991, 92–93)

4. Finally, one should recall how easily Rosicrucianism found its way back to England. In part it was due to the works of another

loner, Robert Fludd, which nevertheless had their influence in Germany as well as on the early scientific societies of England. Fludd's views promoted the English translations of the Rosicrucian manifestos in the mid-seventeenth century by Thomas Vaughan.⁴⁵

The most recent data concerning Dee's "Rosicrucianism" derive from the research of Roberts and Watson and Urszula Szulakowska. According to these, in 1618 "ex bibliopolio Frobenio" in Hamburg Roger Bacon's *Epistolae de secretis operibus et naturae et de nullitate magiae* was published in John Dee's edition. The editorial work had of course been done decades earlier, as I have hinted above (cf. p. 194). The German publisher must have acquired Dee's old manuscript and was careful enough to print the text together with the English Doctor's notes and marginalia. The title page straightforwardly identifies Dee as the editor of the text: "Opera Johannis Dee Londinensis e pluribus castigata [...] cum notis quibusdam partim ipsius Johannis Dee, partim edentis" (Roberts and Watson 1990, 62). The preface is dedicated to the Rosicrucian Brothers and sums up the complicated textual history: the edition is based on the 1594 Oxford edition that they could obtain only by borrowing the private copy of an acquaintance.

But who could be the editor(s) and whose copy were they using? According to Roberts and Watson, the editors must have been the assistants of Dee's last years, John Pontois and Patrick Saunders. The former many times visited Germany and Silesia and had contacts with the Paracelsist Johannes Montanus in Strigau whose name is mentioned in the preface. Saunders, in 1619 wrote an inscription in the *album amicorum* of a Rosicrucian from Lübeck, Joachim Morsius. That year Morsius traveled in England and his album also preserves the inscriptions of Ben Jonson and William Camden, together with Cornelius Drebbel, chief mechanician of James I, and János Bánfihunyadi who under the name of Johannes Banfi Hunyades was a researcher in London's Gresham College.⁴⁶ According to the hypothesis put forward by Roberts and Watson, Morsius visited Saunders while he was in London because he wanted to get acquainted with the disciple of the famous Doctor Dee.⁴⁷

William Sherman continued to trace this line; he observed that in the Hamburg edition (for the title page see Figure 8.1) not only were Dee's marginalia carefully printed, but these were acknowledged by the Doctor's monogram. According to Sherman "the reproduction of his reading notes implies that Dee was also valued as an interpreter" (Sherman 1995, 43). Interestingly, although Frances Yates does not seem to have

FIGURE 8.1 *Epistolae Fratris Rogerii Baconis, De secretis [...] naturae [...] Ioanni Dee ad sensum integrum restituta* (Hamburg: Frobenius, 1618), title page. Herzog August Bibliothek, Wolfenbüttel [107 Phys. /4/].

noticed this Hamburg edition, she was aware of Gabriel Naudé's reference to Dee's Bacon. According to the French mathematician and Rosicrucian writer,

If we had the book which John Dee, citizen of London and a very learned philosopher and mathematician, says that he composed in defence of Roger Bacon in which he shows that all that is said about his marvellous works should be ascribed to nature and mathematics, rather than to a commerce with demons, which he never had, I protest that I would speak no more about him. . . . (Yates 1972, 110)⁴⁸

Another interesting reference to Dee from the time of rising Rosicrucianism was unearthed by Urszula Szulakowska. While reading Khunrath, that ambiguous and mysterious Pietist-enthusiast, she noticed that the German alchemical theologian considered Dee one of his principal mentors. In the dedication of his *Quaestiones Tres Per-Utiles* (Leipzig, 1607), he referred to Dee as "Londinensem [...] hoc est, Sapientiae Sincerioris Gazophylacem magnum; Angliae Hermetem" (Szulakowska

2000, 79). The same terms are repeated in Khunrath's *Amphitheatrum Aeternae Sapientiae*—an esoteric work that Evans called “the most grandiose even of that magniloquent age” (1973, 214).

Tracing the changing reputation of Dee, Sherman's remark seems to be a good interim conclusion: “Less than twenty years after his death, Dee's textual remains were generating competing portraits—the cabalist magician and the Baconian mathematician—in relation to a group whose own affiliations to occult philosophy and mainstream science were being contested” (1995, 43).

Although Dee's image was greatly damaged in England by Casaubon's 1659 publication of the *True and Faithful Relations . . .*, this book in English had no major effect on the Continent where, especially in Central Europe, Dee's mythical reputation continued to grow (sometimes through curious mutations) well into the eighteenth century. A good example is Hungary, where in 1774 the first systematic chronicler of Hungarian science, István Wesszprémi, remembered a grandiose program related to Dee's visit in 1563. As he wrote,

[In 1584] Laski invited Kelly and Dee to Hungary, who were pleased to accept the offer, especially Dee who had had practised his craft of alchemy in Hungary already earlier in 1563 for a long time and to the great admiration of a number of people. [. . .] The chemical college was opened in Laski's castle in 1584 where the landlord received a thorough instruction in the chemical arts and he tortured the mineral world day and night with fire, however, at the end flunked as it usually happens. . . .⁴⁹

The quality of this unfounded hearsay can be compared to the seventeenth-century English rumors about Dee's raising the dead and other such nonsense;⁵⁰ its contents are somewhat surprisingly different. While it was not uncommon in contemporary Hungary that decent scholars and humanists were accused of sorcery and the black arts,⁵¹ it is surprising that Dee, whose angel magic in fact had some kinship with those charges, did not inspire any Faustian legends in this part of Europe. It seems that here the image associated with the writer of the *Monas hieroglyphica* continued to be more appealing and this may be the reason why in eighteenth-century Vienna a hermetic treatise on *exaltatio* could be published under his name.

In 1794 the following curious work appeared in the Habsburg capital: *Das Büchlein der Venus*, which was included in a larger work offering

old magical literature for the lovers of secret sciences (*Handschriften für Freunde geheimer Wissenschaften*, Wien: Blumauer). The "Book of Venus," a manual of invocations for calling forth various spirits, listed John Dee as author. Its Latin original was relatively widespread in Germany: there are three surviving manuscripts, one in Erlangen, one in Munich, and one in the Warburg Library in London.⁵² The origin of this text is obscure, but there is no likelihood of Dee's authorship. Rather it seems to be a German work, reaching back to the tradition of ceremonial magic described by Kieckheffer (1997). As Jörg Martin (1989) suggests, it may have happened that the text became associated with the name of Dee in the seventeenth century, due to the reputation established during his East-Central European travels.

It is equally interesting to ask why this work was translated into German in the Vienna of the Enlightenment, and why it was important for the editor to emphasize Dee's authorship. Perhaps it was because the antiquarian works of Weszprémi and others revived the interest in the English Doctor, or perhaps because the intellectual atmosphere that produced Mozart's *The Magic Flute* was ripe for such publications. Regardless, it is clear that the interpretive community never ceased to be interested in Dee, partly because his obscure, admirable, and disquieting figure continued to have an attracting, frightening appeal of the Other for the populace, partly because his desire for the unattainable *exaltatio* was all too well-known to most people, even centuries after his death.

These seventeenth- and eighteenth-century examples of Dee's reception provide the missing links that connect the mystical truths behind his hieroglyphic diagram and the burning anxieties of the angelic conferences with the romantic revival of the nineteenth century and with those modern novels, paintings, films, and operas that I mentioned in the introduction.

MERIC CASAUBON AND THE POLITICS OF INTERPRETATION

Magician, Heretic, and Witch

John Dee's intentions in his magical operations and the angelic conversations were entirely pious: he was striving toward a mystical union with God. Looking at Dee's reception, however, we see that neither his contemporaries nor following generations were unanimous in appreciating such piety. On the contrary, in his life and later, he was recurrently

labeled a conjuror, a witch, or an arch-heretic. He wrote several apologies in which he compared himself to such victims, as Socrates, Apuleius of Megara, Giovanni Pico della Mirandola, or Johannes Trithemius.⁵³ In fact these charges crop up paradigmatically in the intellectual and social atmosphere of the early modern period and the representatives of the magical-hermetic tradition received them almost without exception. To understand the nature of these charges and the mechanism of power politics behind them, one has to look at the relationship between pious, white magic as opposed to wicked, diabolical or black sorcery, and their connections to witchcraft and heresy.

It is interesting to note that the actual proofs and documents of black magic are extremely scarce. The philosophers interested in magic always emphasized their devout aspirations, which were primarily to praise the Creator by demonstrating a human dignity that would corroborate the notion of man having been created after the true image of God. The most eminent way to prove this was to accomplish *exaltatio*, the magus elevating himself into the divine spheres, to the side of the Supreme Being.

Significantly, most of the information about black magic, such as harmful operations, devil worship, or pacts with the infernal forces, derives either from—more or rather less well-founded—denunciations, from public or legal accusations, or from literary works. Most notable of the latter type is the Faust legend and the various theatrical and narrative fictions based on it. I have never come across an authentic first-person account (let alone in the most private diary form) from the early modern period admitting the intentional practice of black magical operations. On the other hand, none of the great magi who did their best to manifest their most pious aims with magic could escape charges of sorcery, heresy, even witchcraft.

Cornelius Agrippa, for example, was often accused of black magic—and a famous black magical handbook was even written under his name (“The Fourth Book” of Agrippa’s *De Occulta Philosophia*, which was also attributed to Pietro d’ Abano).⁵⁴ He was not able to waive the suspicions, in spite of his repeated efforts to prove that his magic was totally dependent on religion. For example, in Chapter 3:36, titled “De homine, quomodo creatus ad imaginem Dei,” Agrippa explicated the doctrine of the magic dignity of man in a strictly Christian context: “Notwithstanding the true image of God is his Word. The wisdom, life, light and truth existing by himself, of which image man’s soul is the image . . .” (Agrippa 1997, 579).

Paracelsus, one of Dee’s important models, received similar charges from even such a learned man as Conrad Gessner, the encyclopedist:

"Once a pupil of Theophrastus and his private assistant reported strange tales concerning the latter's intercourse with demons . . ." (quoted by Jung 1983, 119). One wonders what the motivation was for those often extreme charges and if they showed any characteristic pattern at all. My answer to the latter question is "yes," and I suggest that the overall problem can and should be researched with the help of historical anthropology and historical social psychology.

As it may have become clear by now, magic, even in its most pious, Christian form, represented a sort of heterodoxy that posed a challenge, the threat of subversion against the existing ideological system. The defensive nature of orthodoxy is excellently described by J. Neusner: "a convention, well-established in a variety of studies, is that one group's holy man is another group's magician: 'what I do is a miracle, but what you do is magic' " (1989, 4–5).

As I see it, the orthodox defense system included the following steps. First, the threatening challenge had to be clearly and unhesitantly labeled as something very dangerous in order that it could be separated and isolated from the healthy body of the community. The labels had to be reminiscent of a most contagious epidemic so that no one would even think of experimenting with it. As such, the most severely regarded threats were *heresy* on the one hand (usually identified with Arianism or Anabaptism), and *witchcraft* on the other. Since witchcraft was usually treated as a subgenre of black magic, the circle was closed; the feedback to magic provided that the white magician could be labeled as a black sorcerer.

Second, the isolated phenomenon had to be either radically expurgated or radically understood and so familiarized. After this could follow its neutralization and, if necessary, appropriation. During this process the labels and charges were used symbolically rather than literally. This technology was to assure the community that no wicked diabolism could be ultimately effective against God's merciful providence. So if the people were careful and watchful enough, the danger, after all, was not that great.

In the following subchapter I shall trace the social and ideological mechanisms through which the interpretive community—represented by Dee's posthumous publisher, the *Späthumanist* Meric Casaubon—tried to understand (and thus familiarize and neutralize) Dee's encounter with the Other. His strategy led to the identification of the English Doctor as someone who had become possessed. That is, he came to represent the Other as something to be frightened of, something that had to be separated and isolated from the community. This was accomplished by labeling him a "heretic" and a "witch"; however, the follow-

ing step was to demystify his magic by explaining his angelic conferences as delusion and madness.

To understand the procedure I shall refer to the mechanisms of “inventing” madness in order to contain and appropriate transgression—as they have been described by Michel Foucault (*Madness and Civilization*) and Stephen Greenblatt (*Renaissance Self-Fashioning*). Especially pertinent to my argument is the way the latter demonstrates the handling of the Other through self-fashioning within the contexts of early modern societies. His inventory of these “handling mechanisms” offers a good introduction to this topic:

—Self-fashioning involves submission to an absolute power or authority situated at least partially outside the self—God, a sacred book, an institution such as church, court, colonial or military administration.

—Self-fashioning is achieved in relation to something perceived as alien, strange, or hostile. This threatening Other—heretic, savage, witch, adulteress, traitor, Antichrist—must be discovered or invented in order to be attacked and destroyed.

—The alien is perceived by the authority either as that which is unformed or chaotic (the absence of order) or that which is false or negative (the demonic parody of order). Since accounts of the former tend inevitably to organize and thematize it, the chaotic constantly slides into the demonic, and consequently the alien is always constructed as a distorted image of the authority.

—One man’s authority is another man’s alien.

—When one authority or alien is destroyed, another takes its place.

—There is always more than one authority and more than one alien in existence at a given time.

—Self-fashioning is always, though not exclusively, in language.

—The power generated to attack the alien in the name of the authority is produced in excess and threatens the authority it sets out to defend. Hence [this process] always involves some experience of threat, some undermining, some loss of self. (Greenblatt 1980, 9)

Meric Casaubon’s lengthy Preface clearly illustrates the above postulated phases of isolation, familiarization, and neutralization of the danger; represented by Dee.

Casaubon (1599–1671), son of Isaac Casaubon one of Renaissance Europe’s great scholars, was himself an erudite scholar whose criticisms of

the new science inspired Thomas Sprat's *History of the Royal Society*. One of his most famous works is *Of Credulity and Incredulity in Things Natural, Civil, and Divine* (1668), in which he examines arguments for and against a belief in witches and other occult phenomena, sharing the view that Christians must believe in them or else depart with all beliefs in the supernatural. His views must have been formed by his encounter with the diaries of John Dee.

Casaubon's Politics

Casaubon says in the Preface that his patron invited him to publish Doctor Dee's newly recovered magical journals with the intention of saving Christian souls from such delusions and since "it is very possible that every Reader will not at the first be so well able of himself to make that good use of this sad Story as is aimed at, my chieftest aim in this Preface is to help such" (Dee 1659, Preface, *2⁵⁵).

Casaubon, above all, posed two questions in connection with the angelic conversations: 1. if spirits existed at all; and 2. if yes, what sort of spirits were Dee's instructors. After having given a humanist-like survey of classical and contemporary literature on apparitions and spirits, Casaubon concluded that it was undoubtedly demons that appeared before the Doctor and his medium, Kelly. His rhetoric is remarkable: in the initial passages he writes in a sceptical-ironical tone, but later he leads the reader step-by-step in the belief concerning the existence of spirits: "I cannot satisfie my self how any Learned man, sober and rational, can entertain such an opinion that there be no *Divels* nor *Spirits*, &c." (*18). At the same time—citing Luther and William Perkins—he elaborately asserts that the spirits having appeared to Dee could not be but wicked ones, in fact devils. And his judgment is that the person who associated himself with devils of necessity becomes a witch. He describes this act as "pawning his Soul [to Satan], such is the power of this kind of Spiritual delusion" (*34).

From the theme of witchcraft he turns to the question of heresy and identifies Dee's delusion with Anabaptism. In the Preface he several times mentions that Dee's personal characteristics, such as his enthusiasm and philosophical independence, facilitated the swelling of heresy in his mind:

Some men come into the world with *Cabalistical Brains*; their heads are full of mysteries; they see nothing, they read nothing, but their brain

is on work to pick somewhat out of it that is not ordinary. [. . .] Reason and Sense that other men go by, they think the acorns that the old world fed upon; fools and children may be content with them but they see into things by another *Light*. They commonly give good respect unto the *Scriptures* (till they come to profest *Anabaptists*) because they believe them the Word of God and not of men; but they reserve unto themselves the Interpretation. . . . (*23–24)

So far goes the identification and isolation of the alien Other. The case, having now been identified with the most dangerous supernatural transgressions, seems frightening enough to discourage imitation. But what is hyperbolically inflated on the one hand has to be familiarized and demystified on the other in order to corroborate the feeling in the community that the threat is controllable. It can be contained. Casaubon reaches this aim by rationalizing and explaining Dee's case on theological as well as on psychological grounds and in this respect his argumentation is no less remarkable.

He definitely rules out that the spiritual diaries could be produced by imposture or fraud:

We intended thereby to justifie what is here printed against any suspicion of forgery. [. . .] By *Truth and Sincerity*, intending not only Dr. Dee's fidelity in relating what he himself believed, but also the *reality* of those things that he speaks of, according to his relation: his only (but great and dreadful) error being, that he mistook false lying Spirits for Angels of Light, the Divil of Hell for the God of Heaven. (*26)

On the contrary, Casaubon attributed the Doctor's enthusiasm to a colossal epistemological misinterpretation, a mistake resulting from the deficiency of his character, but by no means being simple fantasy:

We will easily grant that a distempered brain may see, yea, and hear strange things, and entertain them with all possible confidence, as real things, and yet all but fancy, without any real sound or Apparition. But these sights and Apparitions that Dr. Dee gives here an account, are quite another nature; [. . .] I say, and not without the intervention and operation of Spirits, as will easily appear to any man by the particulars. [. . .] These things could not be the operation of a distempered Fancy, will be a sufficient evidence to any rational man. (*26)

After having confirmed the reality of the spiritual conversations, Casaubon applies a rather flat, demystifying, and certainly firmly orthodox critique

of Dee's attitude toward his apparitions. First, he discredits the reality of the program of Renaissance neoplatonist magi concerning the *exaltatio* of man: "it is against all Reason as well as Religion to believe that a creature so much inferior to God, by nature as man is, should see every thing as He seeth and think as He thinks" (*32). Second, he identifies the desire for *exaltatio* with simple pride, *hybris*: "his own deceitful heart it may be suggested unto him, *that he might glorify God*; but certainly, that himself might become a *glorious man* in the world, and be admired" (*32). Third, he treats this hubris as a very natural thing, not to be surprised at: "if *Pride* and *Curiosity* were enough to undoe our first Parent [. . .] should we wonder if it had the same event in Dr. Dee, though otherwise, as he doth appear to us, innocent, and well qualified" (*32).

This argumentation was perfectly in line with Casaubon's wider philosophical outlook, which represented learned but orthodox conservatism identifying sadducism (the denial of spirits) and atheism as the main threatening drives against the church, traditional values, and "good learning." In his other works, such as the *Treatise Concerning Enthusiasme* (1655) and *Of Credulity and Incredulity* (1670), he always clearly pinpointed the enemies: atheism and scepticism on the one hand and enthusiasm and pride on the other.⁵⁶ Dee obviously fell in the latter category, together with his compatriot, the also "enthusiastic" Robert Fludd, of whom Casaubon wrote as follows:

Robert Fludd, with whom such professions of zeal for the glory of God are very frequent and ordinary: and to that end to set out his glory in its greatest lustre, doth propose unto us the consideration of the Philosophers Stone, applying all or most mysteries of the Scripture to it; so that in very truth, his zeal was more for the Philosophers Stone, then God; or the Philosophers Stone, a God of his own making, for which he was so zealous.⁵⁷

It is characteristic that Casaubon never questioned either Dee's high intellectual abilities or his good intentions; however, he also argued that Dee's mistakes were comparable to the faults of witches, magicians, and heretics, especially the Anabaptist enthusiasts. Through their example, he demonstrates that a strong trust in prayer is "of much more danger and delusion, than many do believe" (*53). Casaubon's motivations in judging Dee became obvious from the Preface: from within an orthodox community—let it be the community of humanists, university scholars, or believers of a set of religious dogmas—nonconformist behavior and

dissenting ways of thinking cannot be classified positively. His argumentation is a fine blend of correct psychological observations, sound philosophical analyses, and a clearly ideologically motivated appropriation of the unorthodox Other. All this becomes crystal clear when he rounds out his Preface by giving the reasons why he decided to publish these documents and explains the moral teaching of John Dee's example:

Several good uses that may be made of this book:

The first is against Atheists, and such as do not believe that there be any Divels or Spirits. [. . .] I do not know what can be more convincing than this sad story. This is a great point and a great ground of Religion: for if there be Spirits indeed, so wicked and malicious, so studious and so industrious, to delude men, and to do mischief, which is their end, all which is so fully represented in this Relation, then certainly must it follow, that there is a great overruling Power, that takes care of the Earth and of the Inhabitants of it. [. . .] England might have been over-run with Anabaptism long before this: God be thanked that it was not then, and God keep it from still. . . . (*50)

In the last place all men may take warning by this example, how they put themselves out of the protection of the Almighty God, either by presumptuous unlawful wishes, or by seeking not unto Divels only, directly (which Dr. Dee certainly never did, but abhorred the thought of it in his heart) but unto them that was next relation unto Divels, as Witches, Wizzardes, Conjurers, Astrologers, Fortune-tellers, and the like, yea, all books of that subject, which I doubt [= fear], were a great occasion of Dr. Dee's delusion. (*54)

Interestingly enough, Casaubon did not deal in depth with the role of Kelly in the angelic conferences and this has long intrigued scholars. The first historian who offered a serious analysis of *The True & Faithful Relations* was Wayne Shumaker and he came to the conclusion that "Kelly was evidently not a man worthy of reliance" (1982, 26). In spite of the refined argumentation of his study, Shumaker treated Kelly all along as a simple fraud and interpreted his relationship with Dee as a ruthless manipulator to his victim.⁵⁸ His analysis overlooked the possibility of that psychological and micro-social situation that Geoffrey James expounded: "Kelly was forced to stay with Dee because the money that the doctor gave him supported Kelly's wife and brother. It was Dee, not Kelly, who was gaining the benefit from the magical ceremonies, for it sated his lust for 'radical truths.'"⁵⁹ Biographical data, indeed, suggest nothing venerable about the character of Kelly; however, the fraud theory

is weakened by numerous episodes when he seems to have worked against his own interests in cooperation with his master. On several occasions it was he who tried to convince Dee of the wicked and unfaithful nature of the spiritual beings who appeared in the crystal. He also pointed out mistakes the supernatural informants were making. One of the most often quoted episodes is when after a session devoted to some geographical questions, Kelly

came speedily out of his study, and brought in his hand one volume of Cornelius Agrippa his works, and in one chapter of that book he read the names of countries and provinces collected out of Ptolemaeus. Whereupon he inferred that our spiritual instructors were coseners to give us a description of the world, taken out of other books: and therefore he would have no more to do with them. (May 24, 1584; Dee 1998, 127)

Dee's faith in the spirits, just as on other occasions, remained unshakable:

I am very glad that you have a book of your own wherein these geographical names are expressed. Whereby you may perceive how your reason is marvellously confounded by your wilful fantasy: for so much as, wherein you would find fault in our spiritual instructors' doings, therein they have done that which I requested them, as appeareth: and that to the intent of known countries we might understand which angels had the government. [. . .] This is too gross your error. (ibid.)

Again, it is rather difficult to understand Kelly's motivations with the proposal of the infamous matrimonial cross-matching on the basis of dishonest cheating (cf. Dee 1659, *20–21. [new numbering]). Eventually he caused more trouble for himself than whatever he gained from the action.

I believe that the extraordinary and strained psychotic symbiosis in which the two men and their families spent their days invites a complex combination of arguments. We cannot help feeling that Kelly either must have believed, at least to some extent, in the prophecies he was communicating, or, if he pretended and invented, he successfully deceived himself as well. In an atmosphere in which, as Shumaker characterizes, "images and phrases stored up from the Bible, the often overheated pulpit oratory of the period, occultist reading, and dream imagery" (1982, 31) constituted the sources of every day as well as scholarly discourse, Dee's naive logic and Kelly's behavior are equally perplexing, but at the same time understandable.

To comprehend this milieu, it is enough to remember the extraordinary situation when Edward Alleyn, leading actor of the Elizabethan age, once so perfectly identified himself with Doctor Faustus that at the appearance of the stage devils he stopped the performance and together with the whole audience spent the rest of the evening in fervent prayers.⁶⁰

At this point I would like to draw some conclusions from what I have so far said concerning the hermeneutical practices of the interpretive community in relation to Dee's magic. To begin with, it seems that against all the efforts of Renaissance magi and/or modern historians, we still do not possess any guaranteed means to distinguish clearly between high and low/popular magic, or between white and black practices. Because of the theological implications, even the most pious magic can be interpreted as heresy and hubris inspired by Satan. Dee's angel magic is a good example of how complex and ambiguous is this phenomenon of intellectual history.

Dee was often unjustly accused of sorcery and Anabaptist dissent. At the same time, he indeed was an interconfessionalist, and the fact that sometimes even Kelly thought the angels to be malevolent and deceiving shows that certain principles, intentions, and practices are indistinguishable. In the previous chapters, I have repeatedly arrived at the recognition that magic is in itself contradictory and paradoxical in nature—consider the tensions behind Pico's relation to astrology, Agrippa's recognition of Simon Magus, Paracelsus' Faustian rebellion, or Dee's realization of the ambiguity of catoptrics: from "optical science" to scrying.

The greatest merit of Casaubon's Preface is that while he tried to describe in an exact, scholarly way the possible motivations and psychological conditions of Dee, quite intuitively he discovered that mechanism that made occultism one of the important catalyzers of Western culture. His characterization of Dee's "enthusiasm" (quoted above) highlighted the drive for seeking "The Light" and the ambition "to reserve unto themselves the *Interpretation* . . ." (emphasis mine, Preface, *24). Seeking the light and practicing freedom of interpretation are those things that produce the most elevating and at the same time the most dangerous things. Because

that for divers years he had been earnest unto God in prayer for Wisdom; that is as he interprets himself, That he might understand the secrets of Nature that had not been revealed unto men hitherto; to the

end, as he professeth, and his own deceitful heart it may be suggested unto him, That he might glorify God; but certainly, that himself might become a glorious man in the world. . . . (Preface, *32)

Casaubon's words reveal that double perspective through which we cannot help seeing the shadows of some dark forces behind even the purest ambitions of the white magus. On the other hand, as in the case of Marlowe's Faustus, even in the worst manifestations of hubris and fatal decisions, we can behold the charisma of heroic individualism and tragic greatness.

In looking at Dee's thought, works, ideology, and symbolic expression, I argue that those historians who offer their interpretation in relation to other systems of culture and civilization (such as science or religion), no matter how many useful details they discover and explain, still miss the ultimate target. These efforts unavoidably end up with setting up typologies, separating white and black magic, identifying them with period styles, and finally forging grand narratives. And on the way they fail to address the fascinating question: what provides that inner dynamism of magic that it could be invariably compelling, independent of epoch, even after the great Scientific Revolution of the seventeenth century?

I have been trying to approach magic by always concentrating on its paradoxical character, the vehicle of which has been the program of *exaltatio*, which balanced ambition, power politics, and self-fashioning against an openness of mind and yearning for the highest and the infinite. Such an approach to magic leads us to our present age where it has influenced fields from cultural anthropology (parapsychology, modern mysticism, New Age and Enochian magic), through philosophy (Rudolf Steiner, René Guénon, Manly P. Hall), to great modern artists who have sought inspiration from magic in a variety of ways (W. B. Yeats, Marcel Duchamps, Vassily Kandinsky, Leonora Carrington, Derek Jarman, Umberto Eco) and whose works invite ever new interpretations.

9

Conclusion: Dee and Renaissance Symbolism

Until now I have been trying to inquire into the ideology of John Dee through the works that he absorbed (“input”) and through the texts in which he gave a symbolic expression to the “radicall truthes” he was seeking (“output”). I have also looked at his reception by examining the reactions of the interpretive community. In the last passages of the previous chapter I mentioned the long and complex tradition of magic, which is still lively and productive in our own age, inspiring new works as well as interpretations. As I hinted in the introduction, Dee’s works and his symbolically elaborated figure has been present in all cultural epochs since the seventeenth century, and his image continues to be an intellectual inspiration as well as a literary and artistic theme. He may be recognized in such classical theatrical heroes as Shakespeare’s Prospero or Ben Jonson’s Subtle, and he returns in twentieth-century novels (Meyrink’s *The Angel of the West Window*, Eco’s *Foucault’s Pendulum*, and Ackroyd’s *The House of Doctor Dee*), plays, paintings, even operas. To discuss all this would require another book, and I am sure somebody is already working on it.

As an epilogue to this monograph, I would like to look at a single stanza of a sixteenth-century poetical work, the literary symbolism of which shows a crucial parallel to that program Dee tried to express in his mystical-natural philosophy. I am thinking of a microcosmic unit of Edmund Spenser’s *The Faerie Queene*, a particular poetical vision that I see as an image twinned with the hieroglyphic monad. If I interpreted Dee’s cosmogram as a condensed mandalaic symbol of all transcendental

experience, so I could call Spenser's "House of Alma" an artistic experiment attempting to speak the *lingua adamica*.

It is interesting to notice that while in the time of the great Renaissance epistemological paradigm shift the natural scientist still spoke a language heavily mixed with rhetorical elements and allegorical narration, poetry, the natural medium of myths, fables, and allegories in turn developed an ambition to include scientific theses, and cosmic schemes. This is what happens in Spenser's much disputed cryptic stanza describing the House of Alma. As is well known, Spenser's epic poem is an allegorical work, meaning that each and all of its elements have to be translated from picture language to a plane of abstract meanings. Alma herself is the soul, and her house is the body, a place of harmony and temperance. (The episode takes place in Book Two, which is devoted to the virtue of Temperance.) This allegorical castle is described by Spenser as follows:

The frame thereof seemd partly circulare,
And part triangulare, O worke diuine;
The two the first and last proportions are,
The one imperfect, mortall, foeminine;
Th' other immortall, perfect, masculine,
And twixt them both a quadrate was the base,
Proportioned equally by seven and nine;
Nine was the circle set in heauens place,
All which compacted made a goodly diapase.
(FQ II.ix.22; quoted from Spenser 1980, 251)

This stanza is surrounded by a fairly transparent allegorical narration concerning Goddess Alma's harmonious and self-controlled nature. However, the design of the very house has perplexed readers since it was first written. Some suggest that the description refers simply to the basic proportions and dimensions of the human body; others argue that what we have here is a revelatory word-emblem that refers to the dualism of the macro- and microcosms, the correspondences of the Great Chain of Being, and that, similarly to Dee's monad, it contains mystical number symbolism based on the neoplatonic philosophy. In both cases this symbolism can be boiled down to the contrast of One and Two, referring to this existence and the Other, in terms of a threatening abyss that these mystical cosmograms can bridge in a revelatory way.

The mystical, neoplatonic interpretation was established by Sir Kenelm Digby (1603–1665), probably the best of Spenser's early critics. In 1628

he wrote a letter to Sir Edward Stradling (published in 1643) in which he tried to document what he had stated in another of his treatises:

[Spenser] had a solide and deepe insight in Theologie, Philosophy (especially the Platonike) and the Mathematicall sciences, and in what others depend of these three. [. . .] Tis evident that the Authors intention in this Canto is to describe the bodie of a man inform'd with a rationall soul, and in prosecution of that designe he sets down particularly the severall parts of the one and of the other—as they make one perfect compound.¹

In his detailed analysis Digby spoke about the four elements, the three Paracelsian qualities, the nine angelic hierarchies, the seven planets, concluding that of all God's works Man is the noblest and the most perfect—he is a little world, and himself a god ("O worke diuine!"). Thus Spenser can be found as "a constant disciple of Platoes School" as he speaks about the perfect harmony of the created universe (cf. the phrase "diapase" referring to the eight-scale musical system, the *diapaisson*), demonstrating this harmony in the human microcosm, for "in Nature there is not to be found a more compleat and more exact Concordance of all parts, than that which is betweene the compaction and conjunction of the Body and Soul of Man" (Spenser 1971, 157).

If we compare the two hermeneutical traditions, that is, the one which identifies Alma's House simply with the physical dimensions of the human body and the one which associates it with the Platonic universalism, we see that they are not exclusive to each other. The common denominator between the two concepts is the recognition of certain dialectical opposites in this created world (body/soul, man/cosmos, mutability/eternity); however, they still claim the unity of the whole system. This unity is provided by the unifying plan of the Creator and can be comprehended through the overall present analogies, and correspondences of the universe. As Spenser's contemporary Sir Richard Barckley put into words in his *A Discourse of the Felicitie of Man* (1598),

The great God of Nature hath tyed together all his creations with some meane things that agree and participate with the extremities, and hath composed the intelligible, ethereall, and elementarie world, by indissoluble meanes and boundes [. . .] between brute beastes, and those of a spirituall essence and understanding, which are the Angels, he hath placed man, which combineth heauen and this elementarie world. (quoted by Patrides 1973, 435)

The above description as well as Spenser's stanza naturally call to mind the much discussed concept of the premodern world model about the macro- and microcosms which have been often explained by the metaphors "the scale of nature" or "the Great Chain of Being" (see the introduction of this book).

This metaphorical-allegorical world picture was well known in Elizabethan England and could serve various ideological standpoints. The macrocosm-microcosm analogy could function as a didactic allegory trying to explain the structure of the universe in a simplified model. One should read Henry Peachem's emblem in his *Minerva Brittana* (1610) this way:

Heare what's the reason why a man we call
 A little world? and what the wisest ment
 By this new name? two lights Celestiall
 Are in his head, as in the Element:
 Eke as the wearied Sunne at night is spent,
 So seemeth but the life of man a day,
 At morn hee's borne, at night he flits away.
 [. . .]
 Of Earth, Fire, Water, Man thus framed is,
 Of Elements the threefold Qualities.

(Quoted from Hollander and Kermode 1973;
 cf. Figure 2.6)

In a more complicated approach Sir Walter Raleigh in his *The History of the World* (1614) used a fairly conventional biblical framework when discussing the relationship between man and cosmos:

Man, thus compounded and formed by God, was an abstract or model, or brief story of the universal, in whom God concluded the creation and work of the world, and whom he made the last and most excellent of his creatures, being internally endued with a divine understanding. [. . .] And whereas God created three sorts of living natures, to wit, angelical, rational, and brutal; giving to angels an intellectual, and to beasts a sensual nature, he vouchsafed unto man both the intellectual of angels, the sensitive of beasts, and the proper rational belonging unto man, and therefore saith Gregory Nazianzen: 'Man is the bond and chain which tieth together both natures.' And because in the little frame of man's body there is a representation of the universal, and (by allusion) a kind of participation of all the parts thereof, therefore was man called microcosmos, or the little world. (1.2.5; quoted from Hollander and Kermode 1973, 324–25)

Although Raleigh's text is basically orthodox, we can feel in it a touch of mysticism, reminding us of the Platonic doctrine of *exaltatio*, namely the notion that man can leave his place in the Chain of Being and can try to elevate himself to the supernatural spheres. As I have mentioned above, Ernst Cassirer (1963) considered this notion the greatest intellectual innovation of the Renaissance as opposed to the Middle Ages. I have already analyzed Ficino's views and Pico's oration on this theme, but even in such a popular version of neoplatonism like Castiglione's *The Courtier* (1528), the thesis is clear. Sir Thomas Hoby's translation appeared in 1561 and exercised considerable influence on the poetry of Spenser. A quotation from Book Four:

Think now of the shape of man, which may be called a little world, in whom every parcel of his body is seen to be necessarily framed by art and not by hap, and then the form altogether most beautiful. (Abrams 1986, 1011)

[. . .] Man of nature endowed with reason, placed, as it were, in the middle between these two extremities, may, through his choice inclining to sense or reaching to understanding, come nigh to the covering, sometime of the one, sometime of the other part. (1007)

One of the more learned exponents of this view among Spenser's contemporaries was John Dee. As we have seen, he accepted the neoplatonic view of man's special faculties and flexible nature and also incorporated into his system the possibility of magical operations. In the *Mathematical Preface* Dee described "anthropographie," the study of man's microcosm as one of the highest degrees among the "artes mathematicall":

[Anthropographie] is an Art restored, and of my preferment to your Service. I pray you, thinke of it, as of one of the chief pointes, of Human knowledge. Although it be, but now, first confirmed, with this new name: yet the matter, hath from the beginning, ben in consideration of all perfect Philosophers. Anthropographie is the description of the Number, Measure, Waight, Figure, Situation, and colour of euery diuerse thing, containyd in the perfect body of MAN. [. . .] If the description of the heuenly part of the world, had a peculiar Art, called *Astronomie*: if the description of the earthly Globe hath his peculiar arte, called *Geographie*, if the matching of both hath his peculiar Arte, called *Cosmographie*: which is the description of the whole and universall frame of the world: Why should not the description of Him who is the Lesse World: and from the beginning, called *Microcosmus*, [. . .] who also participateth with Spirites, and Angels: and is made to the Image

and similitude of God: haue his peculiar Art and be called the *Arte of Artes*. (Dee 1975, c.iii)

To strengthen his standpoint, Dee referred to Pythagoras, to Durer's *De symmetriae humani corporis*, to Vitruvius's anthropomorphic theory of architecture, and, last but not least, to Agrippa's *De occulta philosophia*. From his argumentation it is quite clear that he understood the macrocosm-microcosm analogy not merely as a metaphor which explains certain correspondences in nature, but rather as a mystical symbol which in itself contains something of the ultimate essence of the world and its creator.

As we have also seen, to grasp this metaphysical essence, Dee himself constructed his magical-mystical emblem, the hieroglyphic monad. By the early seventeenth-century such magical emblems and diagrams became fairly common in hermetic and alchemical literature throughout the process which—due to the development of printing and book publishing—can be termed as the period of the popularization of secret sciences. The large visual dictionaries of late Renaissance magic, such as the works of Robert Fludd and Athanasius Kircher, could rely on Dee's monad as an important forerunner of their hermetic semiotics.

The previously reviewed examples demonstrate three ways of interpretation of the macrocosm-microcosm analogy: the didactic-conventional, the religious-mystical, and the philosophical-metaphysical. Spenser's description of the House of Alma, no doubt, belongs to the last category. The question, however, remains: how deeply philosophical was it, and how essential was this emblematic image in the context of the poet's art and world picture? To answer this question let me digress to what E. H. Gombrich wrote about the complementary classes of symbolic images, with a special reference to the ontological and epistemological questions of Renaissance iconography.

According to his crucial study (Gombrich 1972, 123–99), there are three sources of images, namely: *experience* (representation of an object), *convention* (representation of an idea—allegory), and *expression* (private symbolism—the artist's conscious or unconscious mind). The first case is simple and unambiguous: the representation is imitation, the copy of something already physically existing—it is nothing other than primary reception, or sensation. The second two classes contain images which are the products of the intellect; they are transformed or transmitted representations of physical and/or mental sensations.

According to their function, these mental images can be ascribed to three traditions. As Gombrich says, "Our attitude toward the image is

bound up with our whole idea about the universe" (125). The three traditions are the following: *didactic* (metaphor, the Aristotelian tradition), *revelative* (symbolic-intuitive, the Platonic tradition), *magical* (powerful esoteric signs, the hermetic tradition).

The didactic metaphor is the *expression* of an idea, the product of intellectual activity. Its function is decorative and entertaining, it has to improve the poverty of the language, and it possesses a certain explanatory, illustrative power in order to make discursive speech clearer. The Platonic tradition, however, attributed a different power to the symbolic image. For the neoplatonist the image was a *revelation* of something higher, that is, a metaphysical truth which could not be expressed by discursive speech. Consequently the image was not considered the product of rational thinking, but of a momentary intuition which all of a sudden could enlighten the observer.

This process is not unlike the technique of the gnostic philosopher who tried to capture Divine Wisdom in visual revelations. Of the gnostic's knowledge Plotinus said, "It must be not thought that in the Intelligible World the gods and the blessed see propositions: everything expressed there is a beautiful image" (*Enneads* 5.8, quoted by Gombrich 1972, 158).²

Spenser himself tried to create such a Platonic-revelatory imagery in his *Four Hymnes*, when describing earthly and heavenly beauty and love. His allegory of Wisdom-Sophia runs as follows:

There in his bosome Sapience doth sit,
The soueraine dearling of the Deity,
Clad like a Queene in royall robes, most fit
For so great powre and peerelesse maiesty.
("An Hymne of Heavenly Beavtie";
Fowre Hymnes, IV. 183–86;
quoted from Spenser 1970, 598)

An extreme case of the revelatory image is the esoteric sign which has magic power. It does not only symbolize the intuitively perceptible truth but it is a *representation* of the idea (deity or demon) itself. This is how the medals of zodiacal decans have healing power in Ficino's *De vita coelitus comparanda*, this is how Faustus can compel Mephistophilis to appear in his magic circle, and this is how Dee and Kelly could call angels by the help of their "great seal." Or as the seventeenth-century popular imagination suggested, they could even raise the dead practicing their abominable art in cemeteries (Figures 9.1 and 9.2).³

Spenser's description of Alma's House is undoubtedly a symbolic image, in fact a word-emblem, as defined by Peter Daly (1998, 83–113), but the question remains whether it is the expression, the revelation, or the representation of its idea. In my opinion this problem cannot be solved by trying to assume the author's perspective, as neither Spenser's actual readings nor his intellectual preoccupations, even less his authorial intention, can be reconstructed in its entire authenticity from our present-day situation. Gombrich classified symbolic images according to the in-

tention of their creators. But we can approach the problem from the other direction, from the reader's viewpoint. And then we shall ask if Alma's Castle *can be interpreted* as a didactic or rather as a revelatory image; to be more precise, we can ask if the wider context of Spenser's art allows this or that type of interpretation.

I am inclined to say that Alma's Castle is a revelatory word-emblem, under the influence of the hermetic way of thinking and, what is more, is inspired perhaps directly by Dee's monad. Before the actual interpretation, I intend to argue that Spenser's artistic world and what we know about the author's intellectual horizon *do not exclude* the possibility of such a reading. And this is the border not to be crossed, the boundary limiting the ambition of the literary critic. Because every great work of art has such a paradoxical nature that it needs commentary, still no commentary can fully exhaust the work's meaning.

It is a commonplace in English literary history to label Spenser as a neoplatonist,⁴ but scholars also have found more specific and more radical occult elements in his works. Fowler (1964) demonstrated the presence of an esoteric number symbolism throughout *The Faerie Queene*, and Røstvig (1969) used Francesco Giorgi's *De harmonia mundi totius* to interpret the eclogues of *The Shepheards Calender*. Spenser's biography also contains elements which hint at the sources through which he could have developed an interest in the occult arts. His acquaintance with Dee is only indirectly corroborated from the correspondence of Gabriel Harvey,⁵ but his friendship with Sidney is well known, as is known Sidney's various contacts with the Doctor. It has also been suggested that behind the philosophy of the *Areopagus*—among others—the ideas of Dee might be detected (French 1972, 135–59).

Hopper (1940, 966) and Fowler (1964, 265–84) suggested that Alma's House should be read in relation to Dee's hieroglyphic monad. I am ready to join this view, adding that although no direct formal correspondences can be found between the monad and Alma's House, the idea of the anthropomorphic castle can easily be seen as a verbally constructed, concise esoterical image.

Fowler's analysis of Spenser's number symbolism is too complicated, requiring such complex mathematical apparatus that the literary critic becomes sceptical about whether even a *poeta doctus* could afford to handle them while in the process of constructing a large, several thousand line poem. I believe that when interpreting poetry, it is more convenient to look for the framework or reminiscences of certain philosophical ideas than the scientific tenets themselves. I agree with Fowler (and Kenelm Digby) who claim that Spenser was a poet interested in and

influenced by the hermetic philosophy, but I also think that one should differentiate between the doctrines of a system of thought and the product of artistic creation.

I have found it very instructive that Frances Yates established an intellectual link between the threefold structure of Alma's emblematic house and the threefold world model of Giorgi and Agrippa (1979, 97–98). However, unlike in her usually imaginative cross-interpretations of texts and illustrations, in this case she said: "The actual figure which Spenser is here describing is difficult to determine." Following her path I am going to add to the existing interpretations a few illuminating iconographical parallels (for a more detailed version of this reading, see Szőnyi 1984).

In the 1578 French edition of Giorgi's *Harmonia mundi* one finds an explanatory diagram, showing the three spheres of the world—angelical, celestial, elemental—arranged into three circles. The large circles accommodate smaller circles, of which each further three are separated from each other by altogether four horizontal lines. Thus each world-sphere is associated with the numbers 1, 3 (and 9), and 4—corresponding to the geometric figures of circle, triangle, and square.⁶ One finds similar numerological-geometrical speculations in Charles de Bouelles' already cited work (see, for example, Figure 2.2), an imaginatively illustrated book that was available to English intellectuals and was in Dee's library (R&W 311).

If we try to arrange geometrically Spenser's description—"partly circular, part triangular, twixt them both a quadrat was the base"—the greatest problem is caused by the word *twixt* which, according to *The Oxford Dictionary of English Etymology*, has a double meaning: "between" or "in the midst of two," "in the center of the two." When saying "partly circular, part triangular," Spenser also does not specify which is inside and which is outside. Taking all this into consideration, we can construct at least three different arrangements:

The frame thereof seemed patly circular,
And part triangulare, O worke diuine;
And twixt them both a quadraque was the base . . .

All three figures can be associated with some features of the organic world model (correspondences, analogies, number symbolism) and all three have numerous representations in early modern occult iconography. According to the (a) version the divine mind (triangle = Holy Trinity) embraces the whole of the world which consists of celestial (circle = planets and the Zodiac) and elemental (square = the four elements and qualities) spheres. Their proportions are seven and nine, the former meaning the sum of heavenly and earthly things ($3 + 4$), the latter the multiplication of the Holy Ternary. The House of Temperance thus includes equally the whole universe and the human microcosm because man's body consists of the four elements and the four body liquids (humors). The compound of these constitutes his nature and psychology.

One should also remember the notion that the human organism is neither independent of the workings of nature nor of the cosmos. It depends on the influences of the stars and the planets which transmit the heavenly energies. The human organs are the receptors of those celestial influences and thus can be symbolized by a circle. The triangle may stand for the human intellect, as an image of God. As Augustinus wrote, "Numerus ternarius ad animam pertinet, quaternarius ad corpus." According to Plato there are three souls, the vegetative, the sensitive, and the rational—the same as three persons in the Trinity.

A seventeenth-century engraving from Tobias Schütz's *Harmonia macrocosmi cum microcosmi* enlightens the above. The human figure (microcosm) is standing in a circle of the universe. He is chained to a female figure above him who represents Nature but another chain leads up to the Will of God. The picture is bordered by the portraits of Trismegistus and Paracelsus, associated with the geometrical shapes of quadrat and triangle, also referring to Paracelsus' revolution in changing the four elements for the three essentials.⁷ The four elements and the Paracelsian qualities are represented by a square and a triangle on the title page of a 1582 Basel edition of Paracelsus. These elements are, however encircled by the celestial sphere, thus illustrating arrangement (c) for which we shall see further examples below (see Figure 9.3). The ideology of this diagram is encapsulated in the aphorism: "Omnia ab uno—ad unam omnia."

The (b) reading is a variant of the previous interpretation, except that here the geometrical shapes are not inside each other, rather on top of one another. Thus this arrangement is more analogous to the Great Chain of Being or Giorgi's diagram. Another esoteric visual illustration to this arrangement can be found in a late seventeenth-century edition of Jakob

FIGURE 9.3 The four elements and the Paracelsian qualities in a celestial circle. Philippi Aureoli Theophrasti Paracelsi Utriusque Medicinae doctoris celeberrimi, centum quindecim curationes experimentamque... (Basel: Johannes Lertout, 1582). Wrocław University Library, "Na Piasku" [334.358].

Boehme (Figure 9.4). This esoteric emblem is abstract, clear, and compact. Its first level of meaning refers to the alchemical transmutation: Luna and Mercury unite in order to meet in Sol. The basis of the transmutation is the elemental world (quadrat at the bottom of the picture).

FIGURE 9.4 Jakob Boehme, *Signatura rerum*, title page (Amsterdam, 1682). Herzog August Bibliothek, Wolfenbüttel [K3 Helmst. 8o].

The middle is the sphere of Mercury (a circle divided into eight slices, representing balanced harmony). As Spenser wrote, “all which compacted made a goodly diapase.” The goal of the transmutation is signified by a triangle. Boehme’s diagram at the same time is more than a simple alchemical emblem. The transmutation is taking place in a cosmic framework—instead of the alembic we see the circle of the Zodiac—and there is also a hint of a religious-spiritual layer of meaning. Similar to Dee, Boehme’s illustrator also combined the signs of the cross, of Luna and Sol, deriving “the philosophers’ Mercury” (☿). At the bottom of the picture we see the shape of the heavenly Jerusalem—its shape is a square with twelve gates on its walls, and with the Lamb in the middle. This, and the inscription in the left hand corner—*Signatura rerum*—remind the interpreter that here we deal not only with a natural phenomenon but an occult program in which the purification of nature is identical with the transmutation of the human soul. To put it simply, the goal is the *exaltatio*.⁸

While Boehme’s pictorial vision is fusing naturalistic and abstract elements into a symbolic whole, an interesting diagram of Charles de

Bouelles offers a pure and curious geometric scheme to relate square, circle, and triangle to the human intellect. In his *De intellectu* one finds a small figure in which a square embraces two symmetrical semicircles, while the diagonals of the quadrat also constitute four triangles. The inscriptions in the two halves designated by the semicircles point to “Mundus” and “Intellectus,” suggesting the unity of the two, in harmony with the sense of Spenser’s poem (Figure 9.5).⁹

The (c) interpretation is suggested by Kenelm Digby’s reading. According to him,

Mans soul is a circle, whose circumference is limited by the true center of it, which is onely God. [. . .] By the Triangular Figure he very aptly designs the body: as for the Circle is of all other figures the most perfect and most capatious: so the Triangle is the most imperfect, and includes least space. It is the first and lowest of all figures. [. . .] Mans Body hath all the properties of imperfect matter. And—as the feminine sex is imperfect and receives perfection from the masculine: so doth the Body from the Soul, which to it is in lieu of a male. (quoted in Spenser 1971, 152–55)

Here Digby alludes to the lines “The one imperfect, mortall, foeminine; / Th’ other immortall, perfect, masculine,” and according to his interpretation the perfect soul contains the imperfect body which consists of the four elements. In the occult-esoterical tradition we can easily find iconographical representations of this arrangement, too. While the former two

FIGURE 9.5 Mundus and Intellectus in Charles de Bouelles’ symbolic geometry. *Liber de intellectu* (Paris, 1510), 86^v. Herzog August Bibliothek, Wolfenbüttel [E 391 Helmst 2o].

have a kinship primarily with hermetic cosmologies, the last is related to alchemical discourse.

According to this, the geometrical bodies placed in each other represent a development from chaos to perfection (square—triangle—circle). Such a diagram can be found in Samuel Norton's *Mercurius redivivus* (first edition 1630; cf. Figure 9.6). The drawing shows the Tree of Life with a venomous toad among the roots while at the top of the tree, among red and white roses, there is a crown, a symbol of unity. Alongside the circles and triangles we find triples significant for both alchemy and spiritual transmutation: white—black—red, Jupiter—Mars—Venus, water—earth—fire, spirit—soul—body, heaven—sun—male, earth—moon—female. In the square there are Mercury and Anthropos—both of them are seeking purification, and transmutation by the help of Christ.

One of the most interesting variants of arrangement (c) can be found in Michael Maier's *Atalanta fugiens*. This most famous alchemical emblem book was designed by such a German scholar-mystic who at one time had also been Rudolf II's physician and later on became instrumental

FIGURE 9.6 Samuel Norton, *Mercurius redivivus*. In *Dreyfaches Hermetisches Kleeblatt, vigilantem de Monte Cubiti* (Nürnberg, 1667), 354. Herzog August Bibliothek, Wolfenbüttel [Xfilm 1:568].

in the development of Rosicrucian literature (Figure 9.7). On the picture an alchemist is shown in the posture of a *geometer* who is constructing a diagram of transmutation in accordance with the motto:

Make a circle from a man and a woman, out of this a square, out of this a triangle.

Make a circle, and you will have the Philosophers' Stone.

(Emblem 21; translated by H. M. E. de Jong; from de Jong 1969, 166)

As it can be seen, the adept is already completing the final, outer circle. The last line of the attached epigram underlines the significance of the project: "If such a great thing is not immediately clear in your mind / Then know, that you will understand everything, if you understand the theory of Geometry" (de Jong 1969, 167). One cannot help immediately recalling Dee's *Mathematicall Praeface*:

There is (gentle Reader) nothing (the word of God onely set apart) which so much beautifieth and adorneth the soule and minde of man, as doth the knowledge of good artes and sciences: as the knowledge of naturall and moral Philosophie. [. . .] Many other artes also there are

Fac ex mare & fœmina circulum, inde quadrangulum, hinc triangulum, fac circulum & habebis lap. Philosophorum.

EPIGRAMMA XXI.

Fœmina mâsque unus fiant tibi circulus, ex quo
Surgat, habens aequum forma quadrata latas.
Hinc Trigonum ducas, omni qui parte rotundam
In spheram redeat: Tum LAPIS ortus erit.
Sive tanta tua non mox venit obvia menti,
Dogma Geometrae capis, amne scies,

FIGURE 9.7 Alchemy and geometry. Michael Maier, *Atalanta fugiens* (Oppenheim, 1618), 93. Herzog August Bibliothek, Wolfenbüttel [196 Quod (1)].

which beautifie the minde of man: but of all other none do more garnishe & beautifie it, then those artes which are called Mathematicall. Unto the knowledge of which no man can attaine, without the perfecte knowledge and instruction of the principles, groundes, and Elementes of Geometrie. . . . (Dee 1570, ¶.ii)

Maier's emblem has been interpreted by many. Jung primarily analyzed its alchemical contents (1980, 126), while Heninger pointed out its cosmic significance (1977, 189–90). According to the latter the geometric transmutation reflects the harmony as well as the tension between idea and realization. The same dichotomy was expressed by Robert Fludd, too. On his esoteric diagram the two circles and the inserted triangle between them represents on the one hand how God contains the idea of the world and on the other the perfect, harmonious relationship between God and the world (Figure 9.8).

The basis of all these concepts and, furthermore, that of the whole occult world picture, was a Platonic dualism postulating a divide between the perfect, eternal ideas and the changing, mutable material realm. According to the platonists, humans live in a world which is always in the process of becoming something; still it has no absolute existence. In this constant change the program of *exaltatio* could provide some fair prospect. I cannot describe this perspective better than Heninger has already done:

Nevertheless, this constant change can itself be a source of hope. Perhaps it conceals a pattern, a cosmic scheme, a sacred plan, and the constant change is the efficient means whereby the divine will is realized. Perhaps the objects of this world are arranged hierarchically and

FIGURE 9.8 The idea of the world in God. Robert Fludd, *Utriusque cosmi . . . historia* (Oppenheim, 1617–1619), 1:20. Somogyi Library, Szeged [E.d. 1049].

aspire to the perfection of the ideas from which they receive their forms, so that by change the lower transmute toward the higher. There is even the optimistic hope that man, placed midway on the *scala intellectualis*, will ascend to consort with superior creatures, with saints and angels, rather than descending to grovel with beasts, and he will fulfill the claim of Genesis that he is created in the image of the deity.” (1977, 190–91)

This hope nurtured the idea of the Great Chain of Being and the sacred narrative of the Genesis gave a goal to humankind, which had always been among the thoughts of mystical philosophers and which became openly searched for from the time of the Renaissance. This was the program that inspired Spenser to compose the poetical Alma's House and this urged Doctor Dee to fashion the hieroglyphic monad.

From this perspective it becomes negligible if we read Alma's House according to the (a), (b), or (c) variants. More important will be, however, to realize that the poet was bound neither by the disciplinary rigor of philosophers nor by the logic of rational and discursive thinking. In his artistic freedom he could most efficiently express the paradox nature of dualism, the dichotomy in unity which is most manifest in the nature of man. Let us remember that the Canto describing Alma's House begins with the following lines:

Of all Gods workes, which do this world adorne,
 There is no one more faire and excellent,
 Then mans body both for powre and forme,
 Whiles it is kept in sober gouernment;
 But none then it, more fowle and indecent,
 Distempered through misrule and passions bace:
 It growes a Monster, and incontinent
 Doth loose his dignitie and natiue grace.
 Behold, who list, both one and other in this place.
 (FQ II.ix.1)

This recognition drives the monumental engine of *The Faerie Queene*, from the first lines to the *Mutability Cantos*. I would argue that this poetical strength and insight keeps the poem among the greatly appealing treasures of our culture even today. We still value and *use* this poem in spite of the fact that its ideological basis has been eroded while the pedant or “enthusiastic” exponents of this ideology—the doctors and philosophers—have also been forgotten or, at best, reduced to the subject matter of doctoral dissertations written on “strangely neglected topics.”¹⁰

John Dee seems to be a spectacular exception. Although his works, one by one, have been disproved of being cornerstones of early modern science or intellectual history, his personality, his thought, and his visions continue to invite scholarly interpretations and artistic deliberations. It seems that his meticulous and painstaking self-fashioning has been so successful that it has much outlived the person whose advancement it was to serve.

I hope to have convincingly shown that cultural symbolization inextricably intertwined with the occult philosophy not only until the time of the Scientific Revolution but that it still keeps on to being active. I also hope that John Dee has well served to demonstrate the workings of intellectual syncretism so characteristic for the epistemological techniques of many early modern Europeans. Since these techniques have not disappeared even after the Cartesian turn, we ought to examine the history of esoterism with the best scholarly means at our disposal.

At the conclusion of this book, I remind my reader once again that while until recently, magically-minded intellectuals like John Dee were examined from the perspective of science history, today we should rather be inclined to assess them in their own right, as representatives of an integral and alternative system of thought. Such an approach to Renaissance magic (and also to modern occultism) may hopefully yield an ever more refined understanding.

Notes

1. PRINCIPLES AND DEMARCATATIONS

1. David Fenton was kind enough to supply me with the following list of contemporary works featuring John Dee the Magus: Simon Rees's *The Devil's Looking Glass* (1985); Ian Sinclair's parapsychological guidebook to London *Lights Out for Territory: Nine Excursions in the Secret History of London* (1997); Stephen Lowe's play *The Alchemical Wedding*; the opera by John Harle and David Pountney *Angel Magick*; Hana Maria Pravda's filmscript and Derek Jarman's films (*Angelic Conversations*, *Jubilee*) as well as many of Jarman's paintings.

2. Cf. the historiographical summary in Malcolm B. Hamilton, *The Sociology of Religion: Theoretical and Comparative Perspectives* (London: Routledge, 1994), chapter 2.

3. Among the various trends of postmodern critique against historicism in cultural and literary theory, I have been influenced by the early Foucault, primarily *The Order of Things: An Archeology of the Human Sciences* (New York: Vintage, 1973); Clifford Geertz's interpretive anthropology in *The Interpretation of Cultures* (New York: Basic Books, 1973) and *Local Knowledge* (New York: Basic Books, 1983); and Hayden White's highly challenging approach to the literary-rhetorical engines of historical discourse in *Metahistory: The Historical Imagination in Nineteenth-Century Europe* (Baltimore: Johns Hopkins University Press, 1973), *Tropics of Discourse: Essays in Cultural Criticism* (Baltimore: Johns Hopkins, 1978), and *The Content of the Form* (Baltimore: Johns Hopkins, 1987). Beyond these works, a few influential contributions in literary criticism should be mentioned, such as Frank Lentricchia's *After the New Criticism* and Stephen Greenblatt's *Renaissance Self-Fashioning* (both by the University of Chicago Press, 1980). These works sharpened my attention to follow the debate about new historicism over the past fifteen years, and what I found problematic in this "subjective materialist" approach (as I call it) to the theory of interpretation, I tried to correct from the works of the new hermeneuticists (Gadamer, Ricoeur, Jauss, Iser). No matter how deeply influenced I have become by post-structuralism, I am still deeply indebted to the great generation of intellectual and art historians who belonged to the Warburg school, such as Gombrich, Kristeller, Panofsky, Walker, Wind, and Frances Yates. Works representing different approaches in the history of science will be referred to at appropriate points of my discussion.

4. Here I cannot resist the temptation—following the footsteps of Clulee (1988) and Sherman (1995)—to summarize the historiography of Dee studies, as I see it. As for

the Doctor's biography, see the concise and accurate "Annals" in Roberts and Watson 1990, 77–78. Recently Edward Fenton (in Dee 1998) has offered an ordered selection of Dee's diaries with comments which also provide a full account of Dee's life, though only from 1577. Less comprehensive but detailed surveys about the various parts of his career can be found in the significant body of scholarly literature dealing with diverse aspects of his work.

5. See the so-called hermeticism debate. Pro Yates: Burke 1974; Copenhaver 1978; Debus 1978; Metaxopulos 1982; Tannier 1984. Against Yates: Garin 1977; McGurie 1977; Rosen 1970; Rossi 1975; Schmitt 1978; Trinkaus 1970; Vickers 1979; Vickers 1984 [Introduction]; Westman 1977. Particularly balanced later views: Clulee 1988, 128–29; Copenhaver 1990; Curry 1985; and, most recently, Hanegraaff 2001.

6. The medieval contexts have recently been explored by Stephen Clucas in his articles mapping Dee's interest in the manuscript literature of the Solomonic art (1998; 200?).

7. A typical example of this sort of argumentation can be found in J. L. Heilbronn's introductory essay to the *Propaedeumata Aphoristica* (Dee 1978, 12). Lynn Thorndike's opinion is exceptional for the period of its composition: "[Dee's] attempted experiments with angels were in accord with his attributing greater operations to soul than body and with his semi-spiritual view of nature" (1924–1958, 6: 392).

8. Cf. the essays in the following recent collections: Bergier 1988; Buck 1992; Lindberg and Westman 1990; Merkel and Debus 1988; Neusner 1989; Porter and Teich 1992.

9. Raman Selden, *A Reader's Guide to Contemporary Literary Theory* (Lexington: The University Press of Kentucky, 1985), 4–5.

10. I must add that many colleagues were in fact sympathetic to my personal dilemmas concerning methodology and doctrines. For example, Richard Helgerson and Michael O'Connell at the Huntington Library greatly helped me to reorientate myself among the changing issues of American cultural and literary theory.

11. Norman Rabkin, *Shakespeare and the Problem of Meaning* (Chicago: University of Chicago Press, 1981), 1.

2. MYSTICISM, OCCULTISM, MAGIC EXALTATION

1. Cf. Hankiss 1998. As is well known, it was Ernst Cassirer who first launched an extensive study of these symbolic systems (*The Philosophy of Symbolic Forms*, 1996 [1953]).

2. An interesting, inspired account of the loss of Eden and man's ambition for self-deification is *Das verlorene Paradies* by Edgar Dacqué (München and Berlin: Oldenbourg, 1940). Among the more scholarly books I have used with profit for understanding this mytho-psychic phenomenon and its cultural sublimation, I should mention here Frick 1973; Trinkaus 1970; and Wind 1968.

3. *Phaedo* 69d. I am quoting Wind's wording here (1968, 4) as opposed to Hugh Tredennick's translation in Plato 1963, 52.

4. Porphyry, *Life of Plotinus*, 10 (quoted in Wind 1968, 5).
5. Cf. Jurii Lotman, *Universe of the Mind: A Semiotic Theory of Culture* (London: Tauris, 1990). A post-structuralist reception of Lotman has been offered by Attila Kiss in *The Semiotics of Revenge. Subjectivity and Abjection in English Renaissance Tragedy* (Szeged: JATEPress, 1995, Papers in English and American Studies 5).
6. *Comment. in Somnium Scipionis*, I, 14, 15. See a detailed analysis in Lovejoy 1960, 63. An English publication of the text is found in Macrobius, *Commentary on the Dream of Scipio*, tr. and intr. William Harris Stahl (New York: Columbia University Press, 1966, 1990, Records of Civilization 48).
7. Cf. *Enneads* 3.2–3, 4.8, 5.2, 6.6, and Aristotle's *Metaphysics*, esp. Books 7 and 12 on matter, essence, and cosmos.
8. Heninger's anthology *The Cosmographical Glass* (1977) is a beautifully illustrated, useful primer to monitor this evolution of visual imagination.
9. References to Roberts and Watson's catalogue (1990) will appear in the following format throughout this volume: R&W 311, 583, 689, 871, 2031, B227, B302. Dee's copy of the 1510 edition of *De intellectu* is R&W 311. On Bouelles see Thorndike 1923–1958, 6:38–43.
10. Ficino, *De christiana religione*, chapter 14 (in Ficino 1576, 19). I am quoting Yates's translation (1964, 119). See also Sears Jayne's commentary on Ficino's sources, pointing out the roots of his argumentation in Aquinas and other medieval authorities (Jayne 1985, 5–7).
11. Vickers (1984) is a useful anthology of essays treating these developments. It should be noted, however, that the editor's own study in this volume—"Analogy Versus Identity: The Rejection of Occult Symbolism, 1580–1680"—argues for an oversimplified typology and has been criticised by post-structuralist intellectual historians.
12. A classical critical edition of the *Tabula smaragdina* is Ruska 1926. I am quoting the text from its sixteenth century English translation: Bacon 1992, 16.
13. *De mundi sphaera, sive cosmographia* (Paris: Vascosanus, 1555), 2r. Dee in fact had three copies of this book: R&W 66, 326, B305a.
14. Detailed analyses of this diagram can be found in Godwin 1979a, 46, and Heninger 1977, 152. For further readings on the micro/macrocosm theory, see Corvin-Krasinski 1960; Garin 1983, 49–56; Hall 1972, 55–69; Müller-Jahncke 1985, 135–44; Schipperges 1962.
15. *Thesaurus linguae latinae. Editus iussu et auctoritate consilii ab academiis societatibusque diversarum nationum electi*. Leipzig: Teubner, 1931–1953 (9 Vols.), 5: col. 1156–57 ("*exaltatio, -onis ab exaltare*").
16. I am citing the following Bible editions: Vulgata 1983 and KJV 1994.
17. As appears in English in British Library MS Sloane 3641, fol. 8. Edited for the web by Adam Maclean, <www.levity.com/alcemy/maryprof.html>. Latin and German versions can be found in the *Auriferae artis* (1572); Arnaldus de Villa Nova's *Opus aureum* (1604); and in the sixth volume of the *Theatrum chemicum* (1661).

18. "Ripley's Treatise of Mercury and the Philosopher's Stone" in *Aurifontina Chymica: or, a collection of fourteen small treatises concerning the first matter of philosophers* . . . (London, 1680), edited by Adam Maclean <www.levity.com/alchemy/ripmerc.html>.

3. THE SOURCES OF RENAISSANCE MAGIC

1. Cambridge, Trinity College, MS 0.4.20; Oxford, Bodleian, MS Ashmole 1142 fols. 1–74. See the List of References for Dee 1583 and 1990.

2. See, for example, Yates 1969, 11: "If the catalogue were published with a good subject index, scholars would be able to know at a glance what Dee had on subjects which interested him." This wish was fulfilled by Roberts and Watson (cf. Dee 1990) with not only a good subject index but also a straightforward numbering of the inventory which makes references to Dee's library plain and easy.

3. One of the most accurate descriptions of this cultural evolution was offered by Paul Oskar Kristeller (1956; 1961). See also, among other works, Gilmore 1952; Vasoli 1968; 1976; 1996; Rabil (ed.) 1988; Klaniczay, Kushner, and Stegmann (eds.) 1988.

4. Arnaldo Della Torre, *Storia dell'Accademia Platonica di Firenze* (Firenze, 1902); P. O. Kristeller, "Lay Religious Traditions and Florentine Neoplatonism," in Kristeller 1956, 99–122; August Buck, "Die humanistischen Akademien in Italien" in Fritz Hartmann and Rudolf Vierhaus (eds.), *Der Akademiegedanke im 17. und 18. Jahrhundert* (Brehmen-Wolfenbüttel: Jacobi Verlag, 1977); Michele Maylender, *Storia delle Accademie d'Italia*, 5 vols., 1926–1930 (Bologna: Arnaldo Forni, 1977); Cesare Vasoli, "Cultura e 'mitologia' nel principato (considerazioni sulla 'Accademia fiorentina')" in Vasoli 1980.

5. Ficino 1576, 1537; quoted among others by Yates 1964, 13.

6. Although the Yates thesis was grounded in the Bruno book, she summarized her views in a condensed and programmatic essay in which she openly established the causal relationship between magic and the Scientific Revolution ("The Hermetic Tradition in Renaissance Science," 1968). She planned to document this relationship in her book on the Rosicrucian Enlightenment (1972), while in her last book she once again restated her concepts in relation to some specific motifs of English Renaissance cultural history (*The Occult Philosophy in the Elizabethan Age*, 1979).

7. Lactantius, *Div. inst.* (I.vi, II.xv, IV.iv, IV.ix); Augustinus, *De civ. Dei* (VIII.xxiii, XVIII.xxix); Yates 1964, who in chapter 1 reviews the various opinions of early Christian writers on the hermetic texts; cf. also Copenhagen 1992 (xliii–xlvi).

8. Cf. James M. Robinson (ed.), *The Nag Hammadi Library in English* (San Francisco: Harper and Row, 1988); Jean-Pierre Mahé, *Hermès en haute-Egypte*, Vol. 1: *Les Textes Hermétiques de Nag Hammadi et leurs parallèles Grecs et Latins*; Vol. 2: *Le Fragment du Discours parfait et les Définitions Hermétiques Arméniennes* (Québec: Presses de l'Université Laval, 1978–1982, Bibliothèque Copte de Nag Hammadi 3, 7). The Hungarian Egyptologist, László Kákósy has also contributed important clues to the relation of hermeticism and Egypt, as testified by the Nag Hammadi lore. See Kákósy, "Gnosis und ägyptische Religion," in *Le origini dell' gnosticismo* (Leiden: Brill, 1967), 238–47, and his monograph: *Fény és kósz. A kopt gnóosztikus kódexek* (Budapest: Gondolat, 1984).

9. Cf. Thorndike 1923–1958, 2:214–29.
10. Cf. Copenhaver 1992, lxvii. See also Thorndike 1923–1958, 219, 221; Emma J. and Ludwig Edelstein, *Asclepius: A Collection and Interpretation of the Testimonies* (Baltimore: Johns Hopkins University Press, 1945); Loris Sturlese, “Saints et magiciens: Albert le Grand en face d’Hermès Trismégiste,” *Archives de philosophie* 43 (1980): 615–34; and various chapters in Peter Dronke, ed., *A History of Twelfth-Century Philosophy* (Cambridge: Cambridge University Press, 1988).
11. Scott 1924–1936, 1:51–81; see also Nock 1945–1954, 2:275–95; Festugière 1950–1954, 2:18–27; Copenhaver 1992, 213–14.
12. On the magic of the *Asclepius*, and especially sections 23–24 and 37–38, see Grese 1988, 48 ff. and Josef Kroll, *Die Lehren des Hermes Trismegistus* (Münster: Universitätsverlag, 1913; 1928).
13. On the Renaissance myths of the Golden Age and their relationship with the culture of early modern England, see Levin 1969 and Mebane 1989.
14. *Isaaci Casauboni . . . Exercitationes XVI. Ad Cardinalis Baronii Prolegomena in Annales*, London, 1614. The sections referring to the *Hermetica* are *Exercit. I.10* (pp. 70 ff.). Of Casaubon’s opinion on Hermes, see Grafton 1983.
15. He had Ficino’s “Anthologia esoterica” in an 1516 Venice edition (R&W, 256) which contained the *Asclepius* and the first fourteen treatises of the *Corpus hermeticum* under the collective title, *Poemander*. He also had a Greek manuscript of the *Corpus hermeticum* (R&W, DM20) which is now in the Landesbibliothek Kassel (2° MS Chem. I.), bearing Dee’s signature from 1567 and his extensive marginalias. Furthermore, he possessed an 1500 Paris edition (B&W, 1282), a hitherto unidentified edition, possibly the 1505 Estienne edition with Lazzarelli’s *Crater hermetis* (see Roberts and Watson 1990, 99) and the 1554 Greco-Latin Turnebus editio (R&W, 388).
16. Cf. Allen 1984, and 1994; Copenhaver 1988, and 1990.
17. One has to begin again with Ficino’s *Anthologia esoterica* which offered a selection of Plotinus, Porphyry, Iamblichus, Proclus, Psellus, and Synesius. Apart from this valuable collection, Dee had Ficino’s edition of Plotinus in a 1540 publication (R&W, 108). He also had Iamblichus (R&W, 410, B177) and many volumes with the works of Porphyry and Proclus (cf. the index in Roberts and Watson 1990, 224).
18. Cf., for example, Plato, *Republic* 365a, 366a, 378a; *Meno* 99c–d; *Timaeus* 71c–72d; and Plotinus, *Enneads*, II.9.14.
19. On Ficino’s self-declared and actual indebtedness to Plotinus in *De vita* see Kaske’s “Introduction” in Ficino 1989, 25 ff. See also Copenhaver 1988, 80–84.
20. On Plotinus’ relation to magic see Armstrong 1995, 207–10; also Dodds 1951, Appendix 2; P. Merlan, “Plotinus and Magic,” *Isis* 44 (1953): 341–38; and A. H. Armstrong, “Was Plotinus a Magician?” *Phronesis* 1.1 (1955): 73–79. On Porphyry’s *Life*, see R. Harder, “Zur Biographie Plotins,” in Harder, *Kleine Schriften* (Munich: Beck, 1960), 275–95.
21. A. C. Lloyd quotes Bidez’s *La vie de l’Emperor Julien* (Paris, 1930), p.2., in Armstrong 1995, 277.

22. Thomas Taylor's translation in Ronan's edition (Iamblichus 1989), 62.
23. Brussels: Maurice Lambertin, 1928, 139–51 [text: 148–51].
24. Copenhaver collated two printed editions (Ficino, *Index eorum* . . . Venice, 1497, and the 1576 Basel *Opera*) and two manuscripts (Laurentianus Plut. 82.15, and Laurentianus Stroz. 97). See Copenhaver 1988, 103.
25. In Iamblichus 1989, 150. The text is based on É. des Places' edition, *Oracles Chaldaïques* (Paris: Les Belles Lettres, 1971), 219.14–220.32.
26. Ficino's attachment to this theme will be discussed later. For the relationship between Ficino and Proclus' locus, see Copenhaver 1988, 95 n. 8–9.
27. One should note that Iamblichus' other English translator, Alexander Wilder, renders the phrase "Hermaic opinions" as "Hermetic doctrines."
28. A recent exhibition in Florence, *Marsilio Ficino e il ritorno di Ermete Trismegisto* has once again reconfirmed the great effect of Hermes Trismegistus on Ficino's thought. See the scholarly publication of the catalogue, Gentile and Gilly (eds.) 2001.
29. Originally published as *Index eorum quae hoc in libro habentur. Iamblichus de mysteriis* . . . (Venice, 1497, and subsequent editions), cf. Kristeller 1937–1945, cxxxiv–v.
30. Chronologically listing some of those authors: Dee possessed Isidore of Seville's *De natura rerum* (R&W M94a) and *Etymologiae* (R&W 1375); Rabanus Maurus' *De natura* and *De mystica* (R&W 231); John of Salisbury (R&W 1269); William of Auvergne, *Opera* (R&W 219); a long list of works by Albertus Magnus, e.g. *De divinatione* (R&W M117e), *Summa naturalium* (R&W 183, B193, M155) and the pseudo-Albertian *Magia naturalis et vera*; many works by Thomas Aquinas (R&W 92, 1272, 1421, B279, M6, etc.) and Roger Bacon (see note 31 below); the *Conciliator controversiarum* by Pietro d'Abano (R&W 81); Robert Holcot's *Questiones* . . . (R&W M78); *De imagine mundi* by Pierre d'Ailly (R&W 272); and, last but not least, Jean Gerson's *De probationes spirituum*, including his famous treatise "De artibus magicis ac magorum maleficiis" (R&W 1553, B162).
31. Since up to the late sixteenth century there were few printed editions of Bacon, Dee mostly possessed manuscripts. Among others were his *Annotationes super Aristotelem de secretis secretorum* (R&W M56), *De commendacione utilitatis astronomiae* (R&W CM36w), *Breve breviarium & De pincipiis naturae* (R&W DM166), *Opus maius* (R&W M149), and *De speculis comburentibus* (R&W BM31), but he had in print Bacon's *De secretis operibus artis et naturae* (Paris, 1542; R&W 616) and the pseudo-Baconian *Speculum alchimiae* (Nurnberg, 1541; R&W 1433).
32. On Joachim and the Reformation, see Reeves 1976 and Williams 1980.
33. I primarily mean Kieckhefer's own books, *Magic in the Middle Ages* (1989) and *Forbidden Rites* (1997). Cf. furthermore the recent collection of essays on medieval divinatory literature (*Conjuring Spirits. Texts and Traditions of Medieval Ritual Magic*, ed. Claire Fanger, 1998) which also features an essay by Kieckhefer. Here I would like to mention some PhD theses by a new generation of young scholars who have devoted themselves to various aspects and classifications of medieval magic and most probably will rewrite its history quite radically: Frank Klaassen has completed an extensive study on English magical manuscripts between 1300 and 1600; Sophie Page has studied magic at St. Augustine's Canterbury in the late Middle Ages and Benedek Láng has surveyed the

diffusion of magical literature in East-Central Europe. A common and notable feature of these investigations is that they turn their attention toward the pragmatics of magic, that is the use and readership of magical texts in the Middle Ages.

34. Clucas 200?, n. 164. The manuscript is Sloane 313, a fourteenth-century copy of the *Liber Juratus*, here attributed to Honorius Magister Thebarum (R&W DM70). Roberts and Watson have identified Dee's handwriting in the manuscript and they have also found an inscription, stating that the text had been in the possession of Ben Jonson, too.

35. There has been a continuous scholarly debate about the use of the term *popular*. By employing the term *underground*, I refer to a mixed register of culture which was practiced by intellectuals, often *déclassée*, expelled clerics, and rebel scholars who were not content with dealing only with canonical materials and often became attracted to ideas and practices of spurious origin. Cf. Kieckheffer's expression, "clerical underworld" (1989, 151ff.), or William Eamon who speaks about an "intellectual proletariat" in his *Science and the Secrets of Nature: Books of Secrets in Medieval and Early Modern Culture* (Princeton: Princeton University Press, 1994), 69.

36. Thorndike 1923–1958, 2:220f. The greatest recent project to trace the survival of Hermes in the Middle Ages is Polo Lucentini and Vittoria Perrone Compagni's *I testi e i codici di Ermete nel Medioevo* (Florence: Polistampa, 2001). See also Lucentini, "L'Ermesismo magico nel sec. XIII," in *Sic itur ad astra: Studien zur mittelalterlichen, insbesondere arabischen, Wissenschaftsgeschichte. Festschrift für Paul Kunitzsch zum 70. Geburtstag* (eds. Menso Folkerts and Richard Lorch, Wiesbaden: Harrassowitz Verlag, 2000), 409–450; and Antonella Sannio, "Ermete, mago e alchimista nelle biblioteche di Guilelmo d'Alvernia e Ruggero Bacone," *Studi medievali* 4.1 (2000): 151–209. On William of Auvergne's distinctions see also Steven P. Marrone, "William of Auvergne on Magic in Natural Philosophy and Theology," in Jan A. Aertsen, Andreas Speer (eds.), *Was ist Philosophie im Mittelalter?* (Berlin, New York: de Gruyter, 1998, *Miscellanea mediaeval* 26), 741–8; and on the *Speculum astronomiae* (attributed to Albertus Magnus) see the critical edition of Paola Zambelli: *The Speculum Astronomiae and Its Enigma: Astrology, Theology, and Science in Albertus Magnus and his Contemporaries* (Boston: Kluwer, 1992). This whole complex intellectual historical development (and its historiography) is usefully summarized in Benedek Láng's Ph.D. dissertation: *Readers of Magic Texts and Handbooks in Central Europe (15th Century)* (Budapest: Central European University, 2003), Chapter One.

37. Sloane 313, late fourteenth century, quoted by Thorndike 1923–1958, 2: 281, 285.

38. See David Pingree's suggestions about the composite nature of magic in the *Picatrix* (1980, 1–15; also 1981 and 1986) and Nicholas Clulee's discussion (1988, 130–32).

39. The most important codices are as follows: CORPUS HERMETICUM: Laurentianus 71, 33 (14th c.); Parisinus Graec. 1220 (mid-14th c.); Vaticanus Graec. 237 (14th c.); Bodley 3388 (15th c.); ASCLEPIUS: Bruxellensis 10054 (early 11th c.); Monacensis 621 (12th c.); Vaticanus 3385 (12th c.). A full list and description can be found in Scott 1924, 1:20–22, 49–50.

40. The original Arabic text with a German translation was published by Ritter and Plessner 1962; the Latin by Compagni 1975, then by Pingree 1986. Surviving manuscripts

are: Paris, Bibliothèque Nationale (MS Par.lat. 10272, 15th c.); Biblioteca Nazionale, Firenze (Magl. XX, 20, dated 1536); British Museum (Sloane 1305, 17th c.). The manuscripts are described by Thorndike 1924–1958, 2:822–24. Some important studies on the *Picatrix*: include Pingree 1980, 1981 and 1986; Clulee 1988, 130–32; Garin 1983, 46–55; Müller-Jahncke 1985, 31, 51; Yates 1964, 49–57, 70–82.

41. Cf. Ritter and Plessner's edition (1962). The cited passage is my translation.

42. Quoted by Yates 1964, 52–53 (from the British Library manuscript [Sloane 1305, 52rff.]).

43. In the Arabic text the name of the city is al-Ašmūnain (Ritter and Plessner 1962, 254–55). For commentaries on this passage, see Garin 1983, 52; Yates 1964, 54.

4. FLORENTINE NEOPLATONISM AND CHRISTIAN MAGIC

1. On Ficino's neoplatonism, cf. the following basic works: Ficino 1985 (introduction by Searse Jayne); Ficino 1989 (introduction by Carol V. Kaske and John R. Clark.); Allen 1984; Copenhaver 1988a, 274–85; Dress 1929; Garin 1961; Kristeller 1943; Kuczyńska 1970; Marcel 1958 and 1964–1970; Saitta 1954; Schmidt-Biggemann 1998, 408–16.

2. Cf. Ficino 1576, 530–73. The best authoritative edition is Ficino 1989. On the history of the publication and reception of *De vita*, see Kristeller 1937, 1:ixiv–ixvi. Discussions of Ficino's astral magic can be found in Bullard 1990; Copenhaver 1988a, 274–85; Kaske 1982; Moore 1982; Tarabochia-Canavero 1977 and 1997; Zambelli 1972; Zanier 1977; and, of course, in the introduction and notes of Ficino 1989.

3. Cf. Ficino 1944, chapter 7.4.

4. Cf. *Asclepius* 24a and 37–38, as well as Plotius, *Enneád* 4.3.11. On Ficino's indebtedness to Hermes Trismegistus, see the catalogue of the recent exhibition in Firenze, Gentile and Gilly (eds.) 2001.

5. *The Individual and the Cosmos* . . . , 1963 (1927).

6. On Ficino's commentary of the Platonic charioteer, see Allen 1981 and 1984.

7. *In convivium Platonis de amore*, 1475. Ficino himself translated it into Italian, too (*Sopra lo Amore di Platone*), but it was published only in an posthumous edition in 1544. Beside Ficino's 1576 *Opera*, I used Sears Jayne's Latin-English critical edition (Ficino 1944), which was republished in a revised edition in 1985.

8. Cf. Copenhaver 1986 and 1988a; Allen 1994; and the documents of the hermeticism debate mentioned in my introduction.

9. For general introductions to magic, see "Magic" in *The Encyclopedia of Religion*, ed. Mircea Eliade (New York: Macmillan, 1987), 9: 81–112; "Occultism" in *Encyclopedia Britannica* (Chicago: The University of Chicago Press, 1991), Macropedia, 15th edition, 25: 76–98; "Magie" in *Encyclopaedia Universalis* (Paris: Editeur à Paris, 1992), 14: 255–62. See also Butler 1980; Flint 1991; Seligmann 1971; Spence 1960.

10. In outlining the cabala, I have used the following works: Blau 1944; Goetschel 1985; Halevi 1979; MacGregor Mathers 1991; Scholem 1974 and 1980; Secret 1985.

11. On Christian cabala, see the detailed introductions in Scholem 1974 and Goetschel 1985; also recently Schmidt-Biggemann 1998, 188–205.

12. Scholem 1974, 213–14. The transliteration of Hebrew words greatly varies in English reference books. No matter from where the information is taken, throughout my book I follow Scholem's transliteration conventions.

13. Ricius was a Jewish convert who became professor of Greek and Hebrew at the University of Pavia in 1521. "The Gate of Light" is a shortened translation of Abraham Gikatilia's treatise on the names of God and the sefirah. On his system see Heninger (1977, 88 including a reproduction of the elaborate title page of Ricius' work) and Schmidt-Biggemann 1998, 175–79, 272–85; also his "Christian Kabbala" (in Coudert 1999, 99–102).

14. Cesare d' Evoli, *De divinis attributis, quae sephiroth ab hebraeis nuncupata* (Venice: Franciscus Zilettus, 1573), 8^v. Cf. R&W 489.

15. On the nature of this esoterism and on warnings explaining the dangers of becoming exposed to the secret teachings, see Goetschel 1985, chapter 3.

16. On the magical power of words, see Tambiah 1968; on the language philosophy of the cabala, cf. Idel 1989.

17. As Pico writes, he with great pains acquired the translated Hebrew books and in them he could find not only the testimonies of the Jewish faith but also great Christian truths: "Pope Sixtus the Fourth took the greatest pains and interest in seeing that these books should be translated into the Latin tongue for a public service to our faith. [. . .] When I had purchased these books at no small cost to myself, when I had read them through with the greatest diligence, I saw in them not so much as Mosaic as the Christian religion" (sections 35–36; Pico 1948, 252).

18. On the rise of Christian cabala, cf. Blau 1944; Gundersheimer 1963; Secret 1985; Spitz 1963; and Yates 1979. About Pico's interest in the cabala, see Garin 1961 and Yates 1964. Some further characteristics of Christian cabala, for example, its relation to hermeticism, have been treated in Charles Zika's articles on Reuchlin (1976 and 1976–1977).

19. The critical edition of the *Theses* is Pico 1973. See also Bohdan Kieszkowski's thorough introduction to this publication.

20. Critical edition by Eugenio Garin (Pico 1942). In the following discussion I am quoting the English edition of Cassirer and Kristeller (Pico 1948). On the *Oratio* see the recent evaluation of Schmidt-Biggemann 1998, 269–72.

21. Critical edition by Garin (Pico 1946); commentary in Garin 1983, 83–113.

5. OCCULT PHILOSOPHY, SYMBOLISM, AND SCIENCE

1. London, Public Record Office, SP Domestic XXVII.63. Dated from Antwerp, 16 February 1563. Published by R. W. Grey in Dee 1854, 1–16. While the original publication is indecisive for the year of writing, Clulee mentions 1562 (1988, 303) but Roberts and Watson checked the manuscript and list it under 1563 in their "Annals of Dee's Life" (1990, 76 and 190).

2. Frances Yates (1964, 140–46) and the Warburg scholars (cf. Secret 1985, 157–58) of course emphasized the Neoplatonic influence on his work. Recent Dee scholars, such as Clulee (1988, 123, 127) put the stress on the medieval heritage. A new monograph that aims at balancing the two extremes is Brann 1999. After decades of studying Trithemius, the author offers an analysis of the controversy over occult studies in the monastic culture of early modern Europe.

3. See Shumaker 1982, 91–132; also Baron 1978, 23–39; Brann 1977; Glidden 1987; and Müller-Jahncke 1985, 61 ff.

4. Trithemius to Arnold Bostius, quoted by Brann, 1999, 85. The letter was published in several Renaissance works, such as in Trithemius' own *Poligraphiae Libri VI* (Basel: Furter, 1518), 100 ff.; furthermore in Johann Weyer's *De praestigiis daemonum* (Basel: Oporinus, 1566), 150 ff.; in J. Boissard's *De divinatione et magicis praestigiis* (Paris, 1616); and in Athanasius Kircher's *Polygraphia nova* (Roma: Varesi, 1663), "Appendix apologetica," 1–2. Cited by Thorndike 1923–1958, 4: 524, and Brann 1999, 274.

5. Cf. Brann 1999, 89; Heninger 1977, 84–86, 103–04, 170–71; Thorndike 1923–1958, 5: 535, 837; 6:438–43; and Joseph M. Victor, *Charles de Bouelles, 1479–1533: An Intellectual Biography* (Geneva: Droz, 1978).

6. Bovillus to Ganay, 8 March, 1509 (?), published in Bovillus, *Liber de intellectu . . .* (Paris: de Hallewin, 1510), 172', facsimile (Stuttgart: Friedrich Frommann, 1970). I am summarizing this letter from the quotations of Brann and Thorndike.

7. *De verbo mirifico* (1494) and *De arte cabalistica* (1500, 1517).

8. The great-grandfather of Maximilian II to whom Dee dedicated the *Monas hieroglyphica* in 1564.

9. *De septem secundeis, id est, intelligentiis, sive spiritibus orbes post Deum moventibus libellus sive Chronologia mystica*. The first reliable Latin edition was published in 1567 (Cologne: Birckmann), subsequently in the 1600 edition of Trithemius' *Poligraphia*. Thorndike (6: 441) mentions a 1522 Latin edition from Nurnberg; however Brann does not know about it. On the other hand the latter cites two German adaptations: Nurnberg 1522, and Speyer 1529 (1999, 325).

10. On the intellectual kinship of Trithemius and Agrippa, see Brann 1999, 152–61; Müller-Jahncke 1991, 29–39; and Zambelli 1976, 88–103.

11. I have consulted the following editions of *De occulta philosophia*: Agrippa 1550, 1967, and 1970. For the English quotations I am using the new edition of James Freake's 1651 translation, edited and annotated by Donald Tyson (Agrippa 1997).

12. "The Brahmin" is mentioned by Philostratos and Hieronymus and might have lived in the first century A.D. His activities are otherwise unknown (cf. Magyar 1990, 172).

13. Cf. Boethius, *Consolation of Philosophy*, 3.9; also Plato, *Timaeus*, 31e, as elements of order 53b.

14. Cf. my chapters on the *Corpus hermeticum* and the *Picatrix*, above.

15. According to Donald Tyson this man may have been Abbot Trithemius, whom the young Agrippa visited and consulted on matters of magic (Agrippa 1997, 534).

16. Geber (perhaps the Arab Abu abdullah Jaber ben Hayyam), was supposed to be an eighth- or ninth-century alchemist. His most famous work in Latin translation, *Summa perfectionis magisterii*, was very popular throughout the Middle Ages and the Renaissance (cf. Berthelot 1893; Stillmann 1960, 176–81, 276–86).

17. This “Fourth Book” was published in English in the seventeenth century. Its contents are discussed with extensive quotations in Waite 1961, 77–89, 324–25.

18. Dee in fact possessed several different copies of *De occulta philosophia*: beside the authoritative 1550 Basel edition (R&W 742), he had the very rare *editio princeps* of 1531 (R&W 1271) and the 1559 Marburg edition that also contained the Fourth Book (R&W 743).

19. See, for example, Webster’s fine differentiation between the natural philosophy of Agrippa and Paracelsus in his *From Paracelsus to Newton* (1982).

20. “Henrici Cor. Agrippae censura, sive Retractatio de Magia, ex sua declamatione de Vanitate scientiarum, & excellentia verbi Dei,” see Agrippa 1550, 505.

21. The idea of Mannerism as an independent stylistic period was put forward by the art historian Max Dvorak (“Greco and Mannerism,” 1920). One of the important inspirations for studying Mannerism came from the Hungarian-born cultural historian Arnold Hauser; see his *The Social History of Art* (1951; Book One, Chapters 5–7; in Hauser 1985, 97–172) and his monumental *The Origins of Modern Art and Literature: The Development of Mannerism since the Crisis of the Renaissance* (1964, English edition, Hauser 1986). The critical appraisal of the debate can be found in Klaniczay 1977; see also E. Battisti *L’antirinascimento* (1962, Milano: Garzanti, 1989); Claude-Gilbert Dubois, *Le Manierisme* (Paris: Presses universitaires de France, 1979); Gerard Gillespie, “Renaissance, Mannerism, Baroque,” in G. Hofmeister, ed., *German Baroque Literature, The European Perspective* (New York: Frederick Ungar, 1983), 3–24; Hiram Haydn, *The Counter Renaissance* (New York: Scribner, 1950); James V. Mirollo, *Mannerism and Renaissance Poetry* (New Haven and London: Yale, 1984); Caroline Patey, *Manierismo* (Milano: Editrice Bibliografica, 1996).

22. I have used the 1530 Antwerp edition of *De incertitudine . . .* and its 1575 English translation. As for the comparison between *De occulta philosophia* and *De incertitudine*, my reading has been greatly influenced by Keefer 1988.

23. The modernized quotation is from Keefer 1988, 634. Here Keefer notes on the relationship between Agrippa’s “intellectus passibilis” and Ficino’s terminology when he states that gods are immortal and active, men mortal and passive, while demons are immortal but passive (cf. *In convivium platonis de amore*, 6.3; Ficino 1944, 80, 185).

24. “But blessed are your eyes, for they see: and your ears, for they hear” (Matthew 13:16) and “Nevertheless when it shall turn to the Lord, the veil shall be taken away” (2 Corinthians 3:16).

25. Cf. Wisdom 7:17–21, as quoted in my introductory chapter.

26. See also Yates 1964, 131. As opposed to this hypothesis, Nauert 1965, 106–11, pointed out that official church authorities and the theologians of the Sorbonne immediately condemned *De incertitudine . . .*, a fact which leads Keefer (1988, 618) to rule out the possibility that Agrippa wrote his work with the intention to provide a safety valve for the tensions around him.

27. For a comparison between Agrippa and Marlowe's Faustus, see Keefer 1991, 182.
28. Cf. *The Praise of Folly*, sections 66–67 and the notes to these passages in Erasmus 1971, 204–08. On Erasmus and Agrippa, see again Yates 1979, 44. Agrippa's satire is analyzed by Bowen 1972 and Korkowski 1976.
29. Nauert 1965, 110. Cf. *Opus epistolarum Erasmi*, ed. P. S. Allen and H. W. Garrod (Oxford, 1906–1911), 10: 203, 209–11. On the personal relationship of Agrippa and Erasmus, see also Zambelli 1969.
30. On Erasmus and magic, see also below, p. 232–36.
31. On Simon Magus and gnosticism, see Beyschlag 1975; Grant 1966; Kákósy 1984, 18–21; Keefer 1988; Thorndike 1923–1958, 1:17. Sources: the apocryphal *Acts of Peter* (*Actus Petri cum Simone* 28–32, in R. A. Lipsius and M. Bonnet, eds., *Acta apostolorum apocrypha* [3 vols.], 1891–1903 [reprint Hildesheim, 1959]), and some Patristic authors (Irenaeus, *Adversus haereses* I. 23.2–4; Pseudo-Clementine, *Recognitiones* II. 6.7.12; Eusebius, *Historia ecclesiastica* II. 1.13–4; Hippolytus, *Refutationes* VI. 20.3). See also Karl Pieper, *Die Simon Magus Perikope (Apg 8, 5–24): Eine Beitrag zur Quellenfrage in der Apostelgeschichte* (Münster: Aschendorff, 1911, Neutestamentliche Abhandlungen 3.5).
32. According to Trithemius, who personally met the historical Faustus, this charlatan wrote the name of Simon on his visiting card (Brann 1999, 64–65). Frank Baron, writing about the historical Faustus, also mentions Melanchton, and how he associated Faustus with Simon Magus (1978, 75, 86).
33. For an extensive treatment of this phenomenon, see Fehér 1995.
34. Examples and interpretations abound in most standard handbooks of science history. The full-value inclusion of magic in the history of science took place in the 1960s and 1970s, and details were discussed in the so-called hermeticism debate referred to above.
35. For the influence of Paracelsus on Western intellectual thought, see Debus 1965 and 1977; Pagel 1958; Webster 1976 and 1982.
36. In order to orientate in the huge and complex literature on Paracelsus, cf. the bibliographies of Sudhoff 1958 [1527–1893]; Weimann 1963 [1932–1960] and Dilg-Frank 1984 [1961–1982], and Peter Dilg and Hartmut Rudolph's recent collection of essays on the new directions of Paracelsus research (1993). The collected works of Paracelsus were first time published by Johannes Huser in ten volumes (Paracelsus 1589–1591); the definitive twenty-volume critical edition was prepared by Karl Sudhoff, Wilhelm Matthiessen, and Kurt Goldammer (Paracelsus 1922–1925; 1923; 1928–1933; 1955–1973). Throughout this chapter, wherever possible, I shall quote the following English translations of Paracelsus: 1894, 1951, and 1975. Among the voluminous literature on Paracelsus I have profited from the fundamental studies of Jung (1942), Walter Pagel (1958; 1985) and Will-Erich Peuckert (1976); also from Ambrose 1992; Boas 1962; Goldammer 1953, 1967, and 1979; Kämmerer 1971; Koyré 1971, Ch. 3; Müller-Jahncke 1985; Webster 1982; and Weeks 1997. See also the recent collections of essays: Dilg and Rudolph (eds.) 1995; and Zimmermann (ed.) 1995.
37. *Die Neun Bücher der Archidoxen*, Paracelsus 1589–1591, 6:1–98; Paracelsus 1894, 2:3–81; Paracelsus 1928–1933, 3:91–200. Dee had the following German editions: R&W 1475, 1494, 2263 (all from 1570); R&W 1474 (from 1572); R&W 1492 (from 1574).

He also had the following Latin versions: R&W 1502 (from 1570) and R&W 2221 (from 1575).

38. *Archidoxis magica*, Paracelsus 1589–1591, 10A: 67–138; Paracelsus 1928–1933, 14: 437–99. Turner's English translation has been republished in a facsimile edition: Paracelsus 1975.

39. German editions are R&W 1463 (from 1571); R&W 1474 and 2267 (from 1572). Latin editions are R&W 2233 (from 1570) and R&W 2221 (from 1575).

40. *Astronomia Magna*, Paracelsus 1589–1591, 10: 1–397; Paracelsus 1928–1933, 12: 1–144. Recent studies on the *Astronomia magna* are John D. North, "Macrocosm and Microcosm in Paracelsus" (in Dilg and Rudolph 1995, 41–58); Ute Gause's "Aspekte der theologischen Anthropologie des Paracelsus" (in Dilg and Rudolph 1995, 59–70); Wolf-Dieter Müller-Jahncke, "Makrokosmos und Mikrokosmos bei Paracelsus" (in Zimmermann 1995, 59–66); and Hartmut Rudolph, "Prädestination und 'seliges Leben.' Ein Beitrag zur Verhältnisbestimmung von Weltbild und Theologie bei Paracelsus" (in Zimmermann 1995, 85–98).

41. It would be profitable to compare Paracelsus' theology to the spiritual wing of the early Reformation. He admittedly was for a while under the influence of the reformed mystic, Sebastian Franck, but the idea of mystical rebirth was not alien from Caspar Schwenckfeld and Valentin Weigel, either. The necessity of further research in this direction has been pointed out to me by Bálint Keserű. To my knowledge the only extensive comparative study among the mentioned mystics is Koyré 1971. See also the recent article of Horst Pfefferl, "Die Rezeption des paracelsischen Schrifttums bei Valentin Weigel" (in Dilg and Rudolph 1995, 151–68).

42. I am employing here the standard notation referring to Paracelsus' *Sämtliche Werke*. The Roman numerals indicate the section (I=*Medizinische, naturwissenschaftliche und philosophische Schriften*; II=*Die theologischen und religionsphilosophischen Schriften*), the Arabic numerals refer to the volume and page number in that section (cf. Paracelsus 1922–1925, 1923, 1928–1933, 1955–1973).

43. In his seventeenth-century portraits, Paracelsus is usually shown holding a sword, on the handle of which the word Azoth is inscribed. According to some broadsheets, Azoth was an *elixir vitae*, a secret medicine Paracelsus had discovered and kept in the handle of his sword. The term appears already in early alchemical literature (Zozimos, Olympiodorus) and is called by the name of Hermes, or *spiritus animatus*, the philosopher's stone. Others think it refers to the beginning and the end: Zeus and Theos (Jacobi in Paracelsus 1951, 248).

44. "Of Characters" (Paracelsus 1975, 43–44).

45. In the terminology of Paracelsus the sidereal body (or ethereal body, *astrum*) is the refined upper layer of the physical body which consists of air and fire and receives the occult influences of the stars. The sidereal body provides man with sidereal knowledge, that is, the knowledge of occult sympathies (cf. Jacobi in Paracelsus 1951, 262; and Müller-Jahncke 1985, 76–77).

46. Cf. Jung [1942] 1983, 130; Walker 1958a, 119, and 1972. On Adam Kadmon see Schmidt-Biggemann 1998, 217–25; on the *prisca theologia*, see Schmidt-Biggemann 1998, 91 ff.

47. *Astronomia magna*, I,12:292; quoted by Müller-Jahncke 1985, 69. In respect of the *prisca theologia* one should think again of the spiritualistic trends of the German Reformation. I have already mentioned Sebastian Franck who had some influence on Paracelsus (Dee also had several works by Franck—R&W 1175, 2180–82), while both of them contributed to the mystical philosophy of Valentin Weigel (1533–88) who interestingly fused Reformation theology and esoteric Neoplatonism. In his *Der gülden Griff* (printed only in 1613) he claimed that for the microcosmic man, the church would be unnecessary because he himself was the temple. “Every man can be a deified Christ if he leaves the old Adam behind,” he added. Cf. Koyré 1971, Ch. 4.1–2; Zeller 1979, 105–24; Szulakowska 2000, 80–101; also Wilhelm Kühlmann, “Paracelsismus und Häresie. Zwei Briefe der Söhne Valentin Weigels aus dem Jahre 1596,” *Wolfenbüttler Barocknachrichten* 18 (1991): 24–33; Horst Pfefferl, “Valentin Weigel und Paracelsus,” in *Paracelsus und sein dämonenglaubiges Jahrhundert* (Wien: Verband der Wissenschaftlichen Gesellschaften Österreichs, 1988, Salzburger Beiträge zur Paracelsusforschung, 26), 77–95.

48. “. . . das gestirn in der eusseren welt und das gestirn in der kleinen welt haben ir constellation oder confluenz mit einander, und ist ein lauf und ein wirkung nach ort irer conjunction” (I:12, 48).

49. These three phases naturally correspond with the main stages of the alchemical transmutation: *solutio* (*prima materia*)—*separatio*—*conjunctio* (*exaltatio*). Cf. Nicholl 1980, 38–40; and the chapter “Paracelsus’ dreifaches Mensch” in Schmidt-Biggemann 1998, 286–96.

50. On his views on women see Ambrose 1992, and Jacobi in Paracelsus 1951, 23–27.

51. Cf. *De fundamento scientiarum sapientiae* (I, 13:287–335).

52. *De religione perpetua*, II, 1:100–01. Quoted in Paracelsus 1951, 134, and in a slightly different translation in Jung 1983, 130.

53. Cited by Jung 1983, 117. I did not find this statement in Agrippa’s preface to *De incertitudine* . . . , but it can be found in the translators’ prefaces of both early modern English editions. The quoted text is from the 1651 English publication of *De occulta* . . . where it concludes the paratext “The Life of Henry Cornelius Agrippa, Knight” (Agrippa 1997, xlix).

54. Biblical scholarship defines the *apocrypha* as sacred books whose belonging to the canon is uncertain or has been finally denied by the authorities; *pseudepigrapha* denotes the body of works which were falsely attributed to ideal figures featured in the Old and New Testaments. Modern scholarship states that by now the terms do not imply anything spurious; the use of the term is simply inherited from earlier scholars, that is, traditional (cf. Charlesworth 1983, xxiv–vi).

55. An English translation of *1 Enoch*, edited by E. Isaac with critical apparatus, has been published in Charlesworth 1983, 5–12. Here one finds full bibliographical details of the surviving manuscripts, too.

56. Agrippa in one of his writings called Hermes Trismegistus the incarnation of Enoch. Cf. Agrippa’s *In praelectione Hermetis Trismegisti*, published in Garin 1955, 122–23.

57. Quoted by Brann 1999, 65. On Mercurio see P. O. Kristeller, “Marsilio Ficino e Lodovico Lazzarelli,” *Annali della R. Scuola Normale Superiore di Pisa* 2.7 (1938): 237–62; also Kristeller 1956, 228, 249.

58. Thorndike 5:438. Lazzarelli’s treatise has been published by E. Garin (cf. Lazzarelli 1955). On Lazzarelli see Kristeller 1956, 221–57; Secret 1985, 74–77; and Walker 1958, 64–72.

59. In Chapter 3.36 Agrippa extensively quoted Lazzarelli’s *Crater hermetis* to prove the possibility of deification: “God gave man reason that like deities / He might bring forth gods with capacity . . .” (Agrippa 1997, 582). As Keefer notes: “Some Renaissance humanists did find a principle of coherence in the *Hermetica*, and that this principle was a religious one, is suggested by Lodovico Lazzarelli: ‘Christianus ego sum [. . .] et hermeticum simul esse non pudet’ ” (1988, 625).

60. Surprisingly, Postel has been discussed in Dee scholarship as little as Paracelsus. Peter French briefly mentioned him; Yates and Heilbronn (1978) neglected him entirely. Clulee did not pay much attention to him either although, as we shall soon observe, he did highlight a few crucial connections. Harkness (1999) often mentions Postel in passing but this is only the beginning of the full recognition of his influence on Dee’s thought.

61. My following summary is based on Nicéron, Johan Peter, *Nachrichten von den Begebenheiten und Schriften berühmter Gelehrten mit einige Zusätzen* (Halle: Chr. Peter Francken, 1753); Bouwsma 1957; Kuntz 1981 and Secret 1985, 151–218.

62. Nicéron, 348.

6. THE IDEOLOGY AND OCCULT SYMBOLISM OF DEE’S NATURAL PHILOSOPHY

1. These trends appeared no earlier than the late sixteenth century, as an offspring of the cross-fertilization of neoaristotelism and some versions of the radical Reformation, for example, anti-Trinitarianism.

2. “Her Majestie very graciously took me to her service, at Whitehall before her Coronation . . .” (Dee 1851, 12). “Before her Majesties coronation I wrote at large [. . .] what in my judgement the ancient astrologers would determine of the election day of such a tyme, as was appointed for her Majestie to be crowned, A. 1558” (21).

3. For the intellectual horizon of these people, see de Smet 1970, 13–29; also Dee’s remarks in the Preface of the *Propaedeumata* and in 1851, 5, 58–59; 1570, biiiijr.

4. The *Propaedeumata* and the *Monas* are series of aphorisms, prefixed by longer prefaces. The *Mathematicall Praeface* is sui generis an introduction, while his last printed work, the *General and Rare Momorials* . . . , is a chapter from a larger unpublished manuscript.

5. The original Latin uses the word *Gamaea* for the stone. This characteristic terminology, meaning “talisman,” refers to Paracelsus.

6. On his Paracelsica see p. 133; on his getting acquainted with Trithemius’ *Steganographia*, see p. 105–06.

7. For the annals of Dee's life, see Roberts and Watson 1990, 75–79.
8. London, BL, Cotton Vitellius C.VII, art. 1. f 7v. Quoted by C. H. Josten in Dee 1964, 89.
9. Dee's work was republished in Lazarus Zetzner's *Theatrum chemicum* (Ursel, 1602, and several subsequent editions), and Carlos Gilly, the well-known historian of the Rosicrucians—otherwise rather sceptical about Dee's influence on the movement—admits that Dee's diagram could have inspired Adam Haslmayr's "character Cabalisticus" in his unpublished *Consideration Figuræ Ergon et Parergon Fratrum RC* (1626) as well as Philippus à Gabella's studies on vitriol (published in his *Secretoris Philosophiæ Consideration Brevis, nunc primum una cum Confessione Fraternitatis RC in lucem edita*, Kassel, 1615). Cf. Gilly 1995, 35, 73. Later, Dee's monad also turned up in Athanasius Kircher's works and in some of the illustrated editions of Boehme.
10. Basel 1556, 102. See also the comments of Harkness on Valeriano and hieroglyphics, 1999, 84–85. On the Renaissance interest in hieroglyphics, see for example Wittkower's "Hieroglyphics in the Renaissance," in Wittkower 1977, 113–28, and other pertinent studies on Horapollo. On the early modern symbolic interpretations of Horapollo and hieroglyphics, see the classic studies of Giehlow 1915 and Volkmann 1962. On the relationship of literary emblematics and hieroglyphics, see Daly 1998, 1727, and Daniel Russel 1988, 227–43.
11. "The Preface," p. 38 [unnumbered] of Dee 1659; quoted by Walton 1976, 116.
12. Clulee 1988, 127. Dee's library catalogue lists (among others) the following books on pythagorean and cabalistical topics: "Hierocles in pythagorica," Basel, 1543 (R&W 1022, B148); "Sphaera pithagorica" (R&W CM36h); "Georgio Veneti harmonia mundi totius," Paris, 1545 (R&W 221); "Archangelus Burgonovetus in cabalistarum dogmata ex Joh. Picus Mirandola collecta expositio," Venice, 1559 (R&W 997); "Johannes Reuchlin De verbo mirifico," Cologne, 1532 (R&W 1043); "Raymundi Lulli opusculum de auditu cabalistico," Venice, 1518 (R&W 2104). On Pythagorean number symbolism, see Heninger 1974 and 1977; and Koenigsberger 1979; on the symbolism of the cabala, see Blau 1944; Halevi 1979; Scholem 1974 and 1980.
13. On Ficino's "Anthologia esoterica" see above, pp. 66–7, 81.
14. This linguistic interpretation of the monad was first suggested by Walton 1975 and Clulee 1988, recently further developed by Eco 1995, 185–90; myself (Szőnyi 1997 and 2001); and Harkness 1999, 82 ff.
15. Håkansson's book was published just when I completed my manuscript. Thus, apart from two pieces of valuable information, I have not been able to use his study in depth. Cf. Håkansson 2001, 213, where he refers to Dee's marginalia in Synesius' *De insomniis*, pointing out the connection between his concept of the adept and the hermetic man: "Mens adepta. Vide Hermetis Pimander cap. 4. de Monade" (*Index eorum*, fol. 45v).
16. Since I had no chance to study the *Index eorum* in the Folger Library, for this information I thank Håkan Håkansson who recently examined the volume (cf. Håkansson 2001, 285).
17. 3.21; Ficino 1989, 355–57 (emphasis mine). See also Allen's analysis of the same topic in Ficino's *De numero fatali* (Allen 1994, 91–97, and 109).

18. Baldassare Castiglione—Sir Thomas Hoby, *The Courtier* (1561), Book IV: Love. Quoted from Abrams 1986, 1: 1006.

19. See also his *Erklärung der Gantzen Astronomey* (Paracelsus 1589–1591, 10:398–434 = 1928–1933, I, 12:447–77; also translated into English by Waite in Paracelsus 1894, 2:282–317). Dee had an 1567 German edition (R&W 1461) in which he could read: “The magus can transfer the powers of a whole celestial field into a small stone, which is called gamaheus” (Paracelsus 1894, 2:300). On Paracelsus’ influence on Dee’s chemical experiments, cf. Szulakowska 1999.

20. Eco 1995, 187. Some important works relating to the early modern quest for the universal language are Alessandro Bausani, *Geheim und Universalsprachen: Entwicklung und Typologie* (Stuttgart: Kohlhammer, 1970); Arno Borst, *Der Turmbau von Babel. Geschichte der Meinungen über Ursprung und Vielfalt der Sprachen und Völker*, 4 vols (Stuttgart: Hiersemann, 1957–1963); Joscelyn Godwin, *Athanasius Kircher. A Renaissance Man and the Quest for Lost Knowledge* (1979b); James Knowlson, *Universal Language Schemes in England and France 1600–1800* (Toronto: University of Toronto Press, 1975); Wilhelm Schmidt-Biggemann, *Topica universalis: Eine Modellgeschichte humanistischer und barocker Wissenschaft* (1983); Gerhard F. Strasser, *Lingua universalis. Kryptographie und Theorie der Universalsprachen im 16. und 17. Jahrhundert* (Wiesbaden: Harrassowitz, 1988, Wolfenbütteler Forschungen 38); Marina Yaguello, *Les Fous du langage: Des langues imaginaires et de leurs inventeurs* (Paris: Éditions du Seuil, 1984). As far as I am informed, the latest publication on the *lingua adamica* is the collection of essays edited by Alison Coudert (*The Language of Adam / Die Sprache Adams*, 1999) which has a useful paper by Wilhelm Schmidt-Biggemann on the “Christian Kabbala: Joseph Gikatilia, Johannes Reuchlin, Paulus Riccius, and Jakob Böhme” (Coudert 1999, 81–122) and one by Marion Leathers Kuntz on Guillaume Postel’s combining the idea of the Original Language with his program of *restitutio omnium* (123–50). It is surprising, though, that there is only one passing mention of John Dee in the whole volume.

21. R&W 868. See the editors note: “Dee’s copy is RCP Library; it is heavily annotated by Dee, throughout” (Roberts and Watson 1990, 94).

22. “Neque spectare solum, sed etiam animo reputare” (3.19; Ficino 1989, 346–477).

23. Quoted by Nicholl 1980, 48, from Roger Bacon [attrib.], *The Mirror of Alchimy*, London, 1597, 16. Dee, not surprisingly, possessed four copies of the Latin version of this tract: R&W 1433, DM2, DM6, DM81.

24. Facsimile edition: Dee 1975 with Allen Debus’ critical introduction. See also Kenneth J. Knoespel’s new historicist approach (1987) and the appropriate chapters in Clulee 1988 (143–77). Shorter interpretations can be found in the cited works of French 1972; Harkness 1999; Heilbron 1987; Rowse 1972; Webster 1982; Yates 1972, 1979.

25. This shift is examined in the essays collected in Vickers 1984, including the editor’s lengthy introduction: “Analogy Versus Identity: The Rejection of Occult Symbolism.” The consequences of this paradigm shift in mathematics have been analyzed in Fehér 1995, 1–26.

26. *Von der französischen Krankheit 3 Bücher* (Paracelsus 1922–1925, 7:202; Paracelsus 1951, 55–56). Dee had this treatise in an 1553 Frankfurt edition (R&W 1473).

7. ILLUMINATION AND ANGEL MAGIC

1. It is a great pity that Whitby's Ph.D. dissertation of 1981 (reprinted by Garland in 1988) is practically unattainable. His article of 1985 laid the foundations for a unified view of early modern science, medieval ceremonial magic, and Renaissance angelology.

2. London, BL, MS Sloane 3188, fol. 5; Dee 1988, 6; Dee 1996, 1.2. Since I had access to Whitby's 1988 publication of the early spiritual diaries (Dee 1988) only for a limited time and I had little time to spend with the original manuscript in London, I am citing these texts from the selections of Geoffrey Jones (Dee 1994) and Edward Fenton (1998), and, wherever I can, from Clay Holden's transliterated internet edition (1996). Here Holden has rendered Dee's text into three PDF files. I am referring to the internet loci by a double number: the first refers to the file corresponding to Dee's *Mysteriorum Liber* Primus, Secundus, and Tertius; the second indicates the screen/page number in Acrobat Reader.

3. Cf. Dee 1851, 53, 69–84; interpretations of Dee's apologies include Pickering 1986; Szőnyi 1991.

4. Cf. Genesis 1:26–27, 2:19.

5. On the medieval and Renaissance reception of Enoch and Dee's awareness of this literature, see above p. 147 ff.

6. Dee 1659, 170; I thank Giulio Gelibter who called my attention to this textual parallel.

7. Cf. studies on medieval optics such as Lindberg 1976; Szulakowska 1995 and 2000; and on Dee's interest in optics, see Clulee 1988, 46–59; Harkness 1999, 63–78; Szulakowska 2000, 29–30, 35–40.

8. On spiritual alchemy see Jung 1980 and 1983; Merkur 1990; Roob 1997; Waite 1888; Zadražník 1997.

9. Secret (1990, 50) quotes the 1546 Paris edition from pages 90–91.

10. Hamburg, 1618, then republished in the fifth volume of Lazarus Zetzner's *Theatrum Chemicum* (Strassburg, 1602–1661). The second volume of this collection also reprinted Dee's *Monas hieroglyphica*. Although this volume was first published in 1602, the Doctor did not seem to have taken notice of the continuation of his fame.

11. Cf. Bacon 1659. This publication was listed in Cooper's *Catalogue of Chymicall Books* (Cooper 1987, 9; No. 18).

12. London: T. Walkey (cf. under "Sources," Cooper 1987, 42; No. 145).

13. See the chapters on them, above, and also on the *Monas*, in relation to Ficino.

14. Exodus 28:15–31; cf. Evans 1976, 29, 36, 72–73; Wallis Budge 1961, 215, 270, 327–28; Whitby 1985, 27; 1988, 1:63–75.

15. For description of catoptronic practices, see Martino Delrio's *Disquisitionum magicarum libri sex* (Lyons, 1608), 283; Jules Boulenger, *Opusculorum systema* (Lyons, 1621), 2:199–200; for comments, see Pierre Janet, *Sur la divination par les miroirs et les hallucinations subconscientes* (Bulletin de l'Université de Lyon, 1987 July).

16. On Dee's various shew-stones and some doubts concerning Dee's obsidian mirror, cf. Harkness 1999, 29–31; Whitby 1988, 1:137–41. The “Walpole-story” unfolds from the correspondence of the eccentric earl (see *The Letters of Horace Walpole*, ed. Paget Toynbee, Oxford: Clarendon, 1904, 8:22–23); see also Hugh Tait, “‘The Devil’s Looking-Glass’; the Magical Speculum of Doctor Dee.” In Warren Hunting Smith (ed.), *Horace Walpole. Writer, Politician and Connoisseur* (New Haven, Ct.: Yale University Press, 1967), 195–212.

17. John of Salisbury in Migne, *Patrologia Latina* CIXC, 408; Reisch, *Margarita philosophica nova* (Strassburg, 1512), 23; cited by Gansiniec 1954, 8. As we have seen, Dee had Reisch’s 1504 Strassbourg edition (R&W 1385).

18. In Cardano, *De rerum varietate*, Lyon, 1663, cited by Gansiniec 1954, 12. For other anecdotes see also Johann Wier, *De praestigiis daemonum* (Cologne, 1566), 139; Joachim Camerarius, *Praefatio super Plutarchi* (Basel, 1566), 323; Thomas Naogeorgius (=Kirchmeyer), *Regnum papisticum* (Basel, 1559), 166.

19. Examples by Gansiniec 1954, 11 ff. In my native city of Szeged, even as late as in 1730, witchcraft prosecutors would ask: “Wie hast du aus Kristall, aus Glas, Spiegeln den Menschen gewahrsagt?” Cf. János Reizner, *Szeged története* (Szeged, 1900), 4:390.

20. Some of the notable manuscript collections of ceremonial magic from Renaissance England are London, BL, MS Bodley 951 (*Ars notoria*, fifteenth century); London, BL, MS Harleian 181 (*Ars notoria*, sixteenth/seventeenth century; Solomon’s *Book of Vertues*); London, BL, MS Royal 17.A.XLII (*Liber Sacer* and *Cephar Raziel*—in English, fifteenth/sixteenth century); London, BL, MS Sloane 313 (Honorius Magister Thebarum’s *Liber juratus*); London, BL, MS Sloane 384 (*Liber Salomonis Raziel*, sixteenth/seventeenth century); and Oxford, Bodleian, MS Ashmole 1515 (*Ars notoria*, Latin and English, sixteenth century).

Collections related to Dee’s contemporaries include London, BL, MS Additional 36674 (“The Book of Dr. Cajus”: scrying experiments of Humphrey Gilbert and John Davies, glossed by Gabriel Harvey—also contains Dee’s *De heptarchia mystica*, Forman’s “An excellent booke of the arte of Magicke,” and some standard texts of magic, for example, Pietro d’Abano and Agrippa’s “Fourth Book”); and London, BL, MS Sloane 3851 (magical tracts collected by Arthur Gauntlet and Anonymous “Invocations to call a spirit into a chrystall Stone”). References to these collections can be found in Clucas 200?; Clulee 1988, Whitby 1985 and 1988; 1:75–94.

21. Clucas 200?; Fanger 1998; Kieckhefer 1989, 1997.

22. Clucas 200?, n. 164 (the MS is Sloane 313).

23. In n. 166 Clucas quotes Dee 1581–1583 [*Lib. Myst.*], fol. 12 verso: “De Sigillo Emeth vide Reuchlini Cabalisticæ Lib 3 et Agrippa[m] Lib. 3 cap.11.” Further glosses of Dee mention Agrippa (1.11); the *Elementis magicis* of Pietro d’Abano (1.25, 2.29); the *Arbatel* (1.26); and again Agrippa (“which was in my oratorie almost under my wyndow,” 1.26).

24. See Abano’s seal in Agrippa 1550, 568, on Dee’s Golden Talisman below, 214–5.

25. Besterman 1965, 19. See also Whitby 1988, 1: 137–41; and Harkness 1999, 29–31.

26. Once again, for Paracelsus on shining coal and beryls, see the *Erklärung der gantzen Astronomie*, I, 12:463–66, 478–79, 506. See also Gerhard Dorn, *Dictionarium Theophrasti Paracelsi* (Frankfurt, 1583), 24 (“Beryllus est speculum ex crystallo superstitione consecratum ab auguristis”) and Martin Ruland’s *Lexicon alchemiae* (Prague, 1612, 101), which followed the above definition: “BERILLUS is a Crystal Mirror superstitiously consecrated to auguries”; “BERILLISTICA is the art of perceiving visions in the Berillus” (Ruland 1984, 70).

27. See Laycock 1994, 28–29. On Pantheus and Dee see Clulee 1988, 97, 127, 235; Håkansson 2001, 227–28; and Harkness 1999, 88–99; 167, 171, 181, 204.

28. Recent works on angelology and angel magic include Bussagli 1995; James 1995; Rosa 1992; and Scazzoso 1967.

29. Cf. Harkness’ analysis of Dee’s use of Pompilius Azalus (*De omnibus rebus naturalibus*). Dee’s annotated copy is the Venice edition of 1544 (R&W 134; Harkness 1999).

30. R&W 678, 969, 1884. The first survives in the Cambridge University Library with his annotations. He seems to have bought it in 1563, at the same time he became acquainted with a manuscript of the *Steganographia* (Roberts and Watson 1990, 92).

31. Cf. Clucas 2003; Kieckhefer 1997; Waite 1961. On Dee’s angels see Harkness 1999, 46–51; Jones 1995, 82–101; Whitby 1988, 1:117–18.

32. See above, p. 200, and also below, p. 274.

33. See Dee 1586, “Praefatio Latina in Actionem Primum ex 7 . . .” (Oxford, Bodleian, MS Ashmole 1790, art. 1. fols. 1–9), published by C. H. Josten in Dee 1965.

34. Cf. Dee 1583a, 1583–1587, 1584, 1585.

35. One should note that the numbering of the volume restarts after p. 448. Page numbers from this section at the end of the volume are marked by an asterisk (*).

36. This is the same journal from which I previously summarized the “miracle of the books.”

37. These aspects have been highlighted in recent monographs on Dee, especially Clulee’s chapter titled “The Vagaries of Patronage,” and Sherman 1995. Dee’s example is by no means unique among sixteenth-century intellectuals. About his spiritual relative, Guillaume Postel, the biographer Bouwsma had to remark more than once: “The relationship between Postel and the [left-wing Protestant] Basel group provides a nice illustration of the complexity of religious alliances in the sixteenth century” (1957, 10 and passim).

38. Burckhardt 1995, 323.

39. Cf. Kraye 1988, 310–6; Secret 1985, 126–40; Vasoli 1976, 131–403; Walker 1958, 112–19; Yates 1979, 29–36, 127–33.

40. Paris, BN, MS fonds franç. 2115, fol 105^v, quoted by Marion Kuntz 1981, 78.

41. The full text was published in Dee 1851, then in Roberts and Watson 1990, 194–95. For information on Dee’s early career, see French 1972, 34–35, 41–42; Clulee 1988, 32–34; Sherman 1995, 36–38.

42. An important analysis of the social-religious context behind the cult of the Virgin Queen was developed by Keith Thomas (1971). See also the recent works of Hackett 1996, especially the chapters “The Meanings of Virginité” (pp. 72–94) and

“Patronage, Prayers and Pilgrimages” (128–63); and Levin 1994, 10–39 (“Elizabeth as a Sacred Monarch”).

43. Zambelli 1970, 1976; Zika 1976–1977.

44. Zika’s much more detailed Ph.D. dissertation (University of Melburn, 1974) has recently been published in German: *Reuchlin und die okkulte Tradition der Renaissance* (Sigmaringen: Thorbecke, 1998, Pforzheimer Reuchlinschriften 6).

45. *Consultatio venerandi ac benedocti Iacobi Hochstraten haereticæ pravitatis magistri contra immundos libros Iudaeorum*. The piece was published only in 1516 in Johannes Pfefferkorn’s *Defensio Joannis Pepericorni contra famosas et criminales Obscurorum virorum epistolas* (Cologne: Quentel); cf. Peterse 1995, 152.

46. *Doctor Johannes Reuchlins Augenspiegel* (Tübingen: Thomas Anshelm, 1511). Cf. the new English edition of his *Recommendations*, Reuchlin 2000.

47. On the Reuchlin affair, see Max Brod, *Johannes Reuchlin und sein Kampf* (1965, Wiesbaden: Fourier, 1989); Frank Geerk, *Die Geburt der Zukunft: Reuchlin, Erasmus und Paracelsus als wegweisende Humanisten* (Karlsruhe: von Loeper Literaturverlag, Ariadne Buchdienst, 1996); Hajo Holborn (ed.), *On the Eve of the Reformation: Letters of Obscure Men* (New York: Harper and Row, 1964); J. Overfield, “A New Look at the Reuchlin Affair,” *Studies in Medieval and Renaissance History* 8 (1971): 167–207; Peterse 1995; and the introduction in Reuchlin 2000.

48. Zika 1976–1977, 223–24. As I am going to show, the case is not so simple. Recently Hans Peterse has also argued and called for a historiographical revaluation (1995, 5–7).

49. Peterse clearly makes this differentiation (1995, 2n. 3) and Elisheva Carlebach—as opposed to earlier historians—also uses the term *anti-Judaism* (in Reuchlin 2000, 20).

50. These were also neglected by another, much quoted article by Gundersheimer 1963. He, too, decided that Erasmus was simply an anti-Semite.

51. Reuchlin to Erasmus, Frankfurt, 1514 April Fair (Ep290, in Erasmus 1974–1994, 2:285–86).

52. For example, in letters to Cardinal Raffaele Riario (London, May 15, 1515, Ep333 in Erasmus 1974–1994, 3:90–91) and to Cardinal Domenico Grimaldi (London, May 1515, Ep335, *op. cit.*, 3:98).

53. Frankfurt, April 1515 (Ep326B, Erasmus 1974–1994, 3:76–77).

54. John Colet to Erasmus (London, June 1517, Ep593, Erasmus 1974–1994, 4:398).

55. Erasmus to Reuchlin (Louvain, November 15, 1517, Ep713, *op. cit.*, 4:203–04).

56. Erasmus to Albert of Brandenburg (Louvain, October 19, 1519, Ep1033, *op. cit.*, 7:110).

57. Erasmus to the Reader (Louvain, October/November 1519, Ep1041, *op. cit.*, 7:129); originally published in Erasmus’ *Familiarum quolloquiorum formulae* (Louvain: Martens, 1519).

58. Cf. my further and more detailed investigation of Erasmus’ attitude to Reuchlin, “Erasmus, Reuchlin, and the Magical Renaissance,” in Marcell Sebök (ed.), *The Republic of Letters* (Budapest: Collegium Budapest publications, forthcoming).

59. Tyson in Agrippa 1997, xviii. The story is told by Henry Morley who wrote a life of Agrippa in the nineteenth century, parts of which were republished in Agrippa 1898. The section concerning Agrippa and Reuchlin is pp. 228–55, especially 252–55. See also Zambelli 1970, 38.

60. For the intellectual atmosphere of these Mannerist courts see Evans 1973; Fučíková 1997; Hauser 1986; Klaniczay 1977; Trevor-Roper 1976; etc.

61. See also Dee 1842, 42; Dee 1998, 257. The books were identified by a Hungarian scholar, Róbert Dán (1979, 225–30): Christian Francken, *Praecipuarum enumeratio causarum* (Cracow: Aleksy Rodecki, 1584) and Johannes Sommer, *Refutatio scripti Petri Carolii editi Wittenbergae* (Cracow: Aleksy Rodecki, 1582). The latter has been found in the Library of Lambeth Palace where, next to the preface dated 1572, Dee remarked: “Quo anno apparuit illa admirabilis stella . . .” Cf. Roberts and Watson 1990, 157 (R&W D20 and D9).

8. DEE AND THE INTERPRETIVE COMMUNITY

1. Dee 1854, 10–11.

2. On Sambucus, cf. Hans Gerstinger, *Aus dem Tagebuch des kaiserlichen Hofhistoriographen Johannes Sambucus 1531–1584 : Cod. Vind. Lat. 9039* (Graz: Böhlau, 1965); Holger Homann, *Studien zur Emblematis des 16. Jahrhunderts Sebastian Brant, Andrea Alciati, Johannes Sambucus, Mathias Holzward, Nicolaus Taurellus* (Utrecht: Haentjens Dekker and Gumbert, 1971); István Monok (ed.), *Die Bibliothek Sambucus: Katalog; nach der Abschrift von Pál Gulyás* (Szeged: Scriptum, 1992).

3. A summary of his career—based on various Hungarian scholarly and archival sources—can be found in my book, Szőnyi 1998, 66–69.

4. Caroli Clusii *Atrebatibus Rariorum aliquot stirpium, per Pannoniam, Austriam, & vicinas quasdam provincias obseruatorum historia: quatuor libris expressa*. Antuerpiae: Ex officina Christophori Plantini, 1583.

5. A full and analytical list of the receipts is given by Béla Iványi, *A magyar könyvkultúra múltjából*. Ed. Bálint Keserű (Szeged: JATE, 1983, Adattár XVI–XVII. századi szellemi mozgalmaink történetéhez 11), 389–437. See also the works of Evans cited above and Barlay 1979 and 1986.

6. Jordán's inscription is dated October 1, 1562, as visitor 163 while Dee's name appears as visitor 175 on April 23, 1563 (see Durling 1965, 139–41). On Jordán see also Evans 1973, 207–08.

7. See Thomas Moffer's contemporary biography of Sidney (1940, 75). Also French 1972, 126–58, and Yewbrey 1981.

8. See Gál 1969; Gömöri 1991; Osborn 1972.

9. On Purkircher, see Birnbaum 1985, 306–07, and Osborn 1972, 103.

10. For the details of Sidney's diplomatic mission, see Duncan-Jones 1991, 120–31.

11. The house in the forest where after the threatening prophecy Basilius and his daughters take refuge is modeled on the Hvezda: it is star-shaped and is painted yellow

while inside is filled with mythological-emblematic paintings. Cf. Katona 1998, 178 ff.; and Martin Stejskal, "The Hvezda Summer residence," in Zadrobílek 1997, 271–74.

12. Cf. Dee 1659, 397; Dee 1965, 237–38.

13. English sources and reference works to John à Lasco are cited by Zins 1974, 118–26.

14. On Laski, cf. Żelewski 1973, 18.2: 246–50; on his contacts with English and European humanists, cf. Evans 1973, 212–29; Szőnyi 1998, 49 ff.; and Zantuan 1968.

15. "ARGUMENTUM autem totius operis est, docere in genere, quomodo quaelibet cuiusque morbi appropriata medicina, debeat et possit praeparari, et ad summum *exaltari*: ita ut corpus humanum per eam quasi miraculosè, certò tamen ab omni morbo, futurisque accidentibus, ad longissimam usque aetatem liberetur, et immune conservetur" (Paracelsus 1569, "Argumentum").

16. Żelewski 1973, 18.2: 248; Zins 1974, 177; on the general English-Polish relations in the later sixteenth century, see also J. Jasnowski, "England and Poland in the XVIth and XVIIth Centuries," *Polish Science and Learning* 48.7 (1948): 15–19.

17. See F. R. Johnson (1937); E. G. R. Taylor (1930); and emphatically Frances Yates (1964, 1969, 1972) and Peter French (1972).

18. Apart from the already mentioned Zantuan 1968 and Zins 1974, from Hungarian scholarship, see Dán 1979; Klaniczay 1973, 254, 268–69; Schultheiss and Tardy 1972; Szőnyi 1980.

19. Particularly Evans 1973; French 1972; and Yates 1972. See, however, the much less enthusiastic opinion of Firpo 1952.

20. Cf. Deborah Harkness (1996, 1997, 1999); Michael Wilding (1999a, 1999b); and Benjamin Woolley 2001.

21. Shumaker ironically comments on Kelly's being alert to avoid the request of Laski (1982, 49).

22. The Latin quotations of Casaubon's edition have been partly given in English translation by Fenton (Dee 1998, 181 ff.)

23. *Prefatio Latina*, Dee 1965, 228–29. Bracketed insertions are both by Josten and me.

24. On Pucci, see Evans 1973, 102–05; Harkness 1999, 58–9. Also Elie Barnavi, *La périple de Francesco Pucci. Utopie, hérésie et vérité religieuse dans la Renaissance tardive* (Paris: Hachette, 1988); Mario Biagioni, "Prospettive di ricerca su Francesco Pucci," *Rivista Storica Italiana* 107.1 (1995): 133–53; Miriam Eliav-Feldon, "Secret Societies, Utopias, and Peace Plans: The Case of Francesco Pucci," *Journal of Medieval and Renaissance Studies* 14 (1984): 139–58; L. Firpo and R. Piattoli (eds.), *Francesco Pucci, Lettere* (Florence, 1955); Lech Szczucki, *W kręgu myślicieli heretyckich* (Warsaw, 1972), 256–65.

25. On Rosselli, see Czerkowski 1967.

26. Except for the discussion on Trithemius which had still happened at one of the early séances back in England (Dee 1659, 13).

27. Harkness 1999, 190–04, pinpoints the close relationship of Dee's chiliastic visions to contemporary Jewish and cabalistic literature.

28. Cracow, Jagiellonian Library, MS 620. Cf. Zins 1974, 274. The Latin dedication is partially quoted by Roberts and Watson 1990, 117. According to them, in this dedication Dee used his most elaborate and self-conscious presentation italic hand (26).

29. R&W DM91. On the Ripley scrolls, see Stanton J. Linden, "Reading the Ripley Scrolls: Iconographic Patterns in Renaissance Alchemy," in György E. Szőnyi (ed.), *Iconography East & West* (Leiden: Brill, 1996, Eymbola & Emblemata 7), 236–50; also Linden 1996, 193–224.

30. In his treatise, entitled *Disputatio inter theologum et philosophum de incertitudine religionis Christianae* (cc. 1591). Cf. Firpo 1952; Szczucki 197; and Bálint Keserű's unpublished Ph.D. thesis.

31. On Dee: "Est ni fallor, adhuc isthic D. Dee, Anglus, Mathematicus insignis; et ut audio, hospes videtur est. Illius consuetudo et familiaria colloquia multum iuvare, et promonere istas veras cognitiones et studia potuerunt. Aiunt eum visiones, nescio quas, h[. . .] observo te; libere et candide (ut tenus est mos) significes mihi quid tu de his rebus sentias; qui sanar[. . .] har[. . .] cognitione, prudentia, iudicio, et rerum usu magno praeditus, unus olim optime de his rebus iudicare potes. Est in eorum contubernio; aut certo ipsis notus Anglis, qui cum Dee versam[. . .]; Franciscus Puccius nobilis et patricius Florentinus: ad eum scribo. Rogo, ut ei inclusas hic litteras certo reddi cures, et responsum expectas. Iam a multis annis, ne[. . .] meminisse credo, diligenter, per amicos, aliquem Mathematicum quaeso; non elementarium, sed qui maiores progressus servi[. . .]; nec tamen adhuc reperire quenq[. . .] potui. [. . .] Quoniam frustra id spero; observo te, ne evitato cum ipso Dee consilio, aliquem mihi reperiatis, qui mecum vivere velit. Tractabo eum humaniter, et salarium annuum de vera voluntate illi constituam." Prague /Ostrejov Astronomical Library, MS Akc. 1949/594, fol. 130. The Prague manuscript is the photocopy of the Wrocław University Library MS R 247, an eighteenth-century copy by Samuel Benjamin Klose, which was annihilated during World War II. The original Dudith manuscript had been taken to Germany where it was lost. I thank this information to the librarians of the "Na Piasku" Library in Wrocław, and to Michał Pober for obtaining me a photocopy of the Dudith-Hájek correspondence from Prague.

32. "De Anglis multa audiivi; illud unum mihi et stupendum videtur et parum credibile: quod aliqui certo affirmant eos colloquia cum angelis nescio quibus miscere" (MS cit., fol. 136). Through other channels, Stephen Clucas (in 200?, n. 258) also quotes this passage, which was first referred to by the Polish Renaissance historian Henryk Barycz. See his "W poszukiwaniu kamienia filozo-ficznego, czyli traktat o Michale Sędziwoju," in Barycz, *Z epoki renesansu, reformacji i baroku* (Warsaw: PIW, 1971), 600 ff.

33. "Sed si chrysopoenam adamantem ut scribis, puto atros esse, illos genios, qui pro thesauris carbones illis dabunt: quin etiam carbones ipsos absument, et cineres relinquent" (MS cit., fol. 136).

34. Evans' translation (1973, 224) from Budovec's *Circulus horologi Lunaris et Solaris* (Hanau, 1616), 245.

35. Only from 1588 alone the *Private Diary* mentions the following British visitors in Trebona: Edmond Cooper, Edward Dyer, Francis Garland, John Hammond, Edward Rowles, Thomas Southwell, Mr. Swift and Mr. Stale, and Mr. Yong (Dee 1998, 232–38).

36. Apart from Evans' groundbreaking study, see also the recent Czech literature on the subject, for example, the following articles in Fučíková 1997: Paula Findlen, "Cabinets, Collecting and Natural Philosophy," 209–20; György E. Szónyi, "Scientific and Magical Humanism at the Court of Rudolf II," 223–31; the English summaries in Zadrobílek 1997: Vladimír Kuncitř, "Alchemy in the Czech Lands," 276–79; Luboš Antonín, "Magia Naturalis and the Aristocratic Society of Bohemia and Moravia in the Seventeenth and Eighteenth Centuries," 310–13; and the papers in Konečný 1998: Václav Bužek, "Zwischen dem rudolfinischen Prag und den Höfen der Magnaten mit dem Wappen der fünfblättrigen Rose," 75–81; Jürgen Müller, "Arcana Imperii," 184–92. See also Jan Sviták's 1980–89 trilogy; Petr Vágner, *Theatrum Chemicum: Kapitoly z dějin alchymie* (Prague: Paseka, 1995); Václav Bužek (ed.), *Dvory velmožů s erbem ruže* (Prague: Mladá Fronta); etc.

37. The correspondence is collected in State Archive Třeboň, MS Rosenberka 25.I–II.

38. Třeboň, MS Rosenberka 25.I.38; cf. Cotton, Appendix LXVI, which was Casaubon's source for Dee 1659.

39. Třeboň, MS Rosenberka 25.I.28.

40. See Evans 1979, 354–58; the Hungarian manuscript can be found in Budapest, Széchenyi Library (OSZK), 239 quart. Germ., 48 (cf. Evans 1973, 226).

41. On the magical contexts of some German courts, cf. Yates 1972; Evans 1973; and recently Moran 1991; Jost Weyer, *Graf Wolfgang II von Hohenlohe und die Alchemie. Alchemistische Studien in Sloss Weikersheim, 1587–1610* (Sigmaringen: Jan Thorbecke, 1992); and Debra L. Stoudt, "'Proba tum est per me': The Heidelberg Electors as Practicioners and Patrons of the Medical and Magical Arts," *Cauda Pavonis* 14.1 (1995): 12–18.

42. Yates 1972, 46–7 argued for textual interrelatedness between the *Monas hieroglyphica* and the *Confessio fraternitatis*. On the Rosicrucian literature, see Arnold 1955; Bugaj 1991; Frick 1973; Gilly 1988 and 1995; Gorceix 1970; Hocke 1959; Janssen 1988; Montgomery 1973; Peuckert 1956; Schick 1980.

43. The manuscript of *Naometria* can be found in Stuttgart, Württemberg Landesbibliothek, Cod. theol. 4.23.34. It is reviewed by Yates 1972, 33–34; its relation to the Rosicrucians had been asserted by A. E. Waite, *Brotherhood of the Rosy Cross* (London, 1924), 639 ff. The idea goes back to an eighteenth-century theologian of Württemberg, Ludwig Melchior Fischlin (cf. Gilly 1995, 21). Gilly himself considers Studion's *Naometria* not a direct source of the Rosicrucian manifestos, rather as a typologically related work belonging to the literature of late sixteenth-century chiliasmus (Gilly 1988, 70 ff.).

44. Yates mentioned the following persons who, in some way, could indeed be associated with each other: Christian of Anhalt, the mastermind of the Elector Palatine Frederick; the elector himself; Moritz, Landgrave of Hesse-Kassel; Vilém Rožmberk; and a number of humanists-scholars already mentioned: Andreae, Bruno, Croll, Dee, and Khunrath (1972, 30–40). Since the publication of *The Rosicrucian Enlightenment*, most of Dame Frances' propositions have been rejected by historians as artificially forged links; however, my analysis will suggest that the supposition of certain intellectual influences perhaps is not so fantastic and unfounded.

45. Cf. F. N. Pryce's facsimile edition (1923) and Yates modern edition of the text (1972, 235–60). On the impact of the manifestos in England, see also Maclean 1988.

46. The Dutch-born inventor Drebbel was James I's alchemist before he took employment with Rudolf II in Prague in 1610; cf. Evans 1973, 189–90; Szőnyi 1995, 116; Robert Grudin, "Rudolf II of Prague and Cornelius Drebbel: Shakespearean Archetype?" *The Huntington Library Quarterly* 54 (1991): 181–205; and Roy Strong, *Henry, Prince of Wales, and England's Lost Renaissance* (London: Thames and Hudson, 1986), 216. On Banfi Hunyades, see George Gömöri, "New Information on János Bánfihunyadi's Life," *Ambix* 24 (1977): 170–74; and John H. Appleby, "Arthur Dee and Johannes Banfi Hunyades: Further Information on their Alchemical and Professional Activities," *Ambix* 24 (1977): 96–109.

47. They cite a German book on Morsius where this traveller is called "an Idealbild eines Rosenkreutzers" (Heinrich Schneider, *Joachim Morsius und sein Kreis*, Lübeck, 1929, 101—cf. Roberts and Watson 1990, 63).

48. Naudé obviously refers to Dee's lost work *Speculum unitatis, sive Apologia pro Fratre Rogerio Bacchone Anglo* (cf. the preface to the *Propaedeumata Aphoristica*, Dee 1978, 116).

49. Johannes Dee potissimum, qui ante iam anno 1563 in Hungaria artem transmutandi metalla, non sine multorum admiratione diu multumque agitavit, immo Maximiliano quoque Imp. et Reg. Hungariae Monadem suam, hieroglyphice, mathematice, magice, cabbalistiche, anagogice explicatam, Antverpia anno 1564 impressam, inscripsit et Posonii obtulit. Anno 1584 in Castello Laszkyano Collegium alchemisticum asperitur in aurea hac arte Laszkyus fidelissime insituitur, regnum minerale vario igne diu satis torquetur, et tandem miser novissime omnium turpiter, ut fieri adsolet, delutidur (Weszprémi 1960, 186–87).

50. Cf. Johnson's the *Alchemist* (2.6.20 and 4.1.85–91); Samuel Butler's *Hudibras* (2.3.235–38); and John Weever's *Ancient Funerall Monuments*, which has a horrifying story about Kelly's violating sepulchres (London: Thomas Harper, 1631, 45–46). Comments on these are in Szőnyi 1991.

51. Among others, subject to such accusations were Albert Molnár Szenci, famous humanist, dictionary writer, translator of the Psalmody, and Bible aditor; also Johann Heinrich Bisterfeld, German humanist and diplomat, who for some time taught and served in Transylvania (cf. Szőnyi 1991, n. 21–23).

52. London, Warburg MS FBH 510; Erlangen MS 854; Munich, Bayerische Staatsbibliothek, Cod. Lat. 27005. See Jörg Martin, *Johannes Dee: 'De tuba Veneris.' Eine magische Handschrift des 16. Jahrhunderts. Edition, Übersetzung und Kommentar*, M.A. thesis, University of Bonn, 1989 (copy in the Bodleian Library, Oxford). French 1972, 84, also mentions the Warburg manuscript; however, he does not seem to be aware of the fact that Dee could not be its author.

53. Cf. his apologies in the *Mathematicall Praeface* (Dee 1975, A2^v); in his *A Letter Containing a Most Briefe Discourse Apologeticall* (1592); or the *A Letter Nine yeeres Since; To the Kings most excellent maiestie* which he even published as a broadside in 1604. His posthumous editor, Meric Casaubon, also felt compelled to reproduce some parts of these apologies (Dee 1659, *56–64). Evaluation of the charges against Dee can be found in Pickering 1986 and Szőnyi 1991.

54. Cf. Dee 1998, 35n. 9; and Waite 1961, 77–89.

55. The Preface has no printed page numbers. Following it, with the table of contents, the numbering starts with p. 1. Page references to the Preface, marked by asterisks, are my calculations.

56. A detailed analysis of the *Treatise Concerning Enthusiasme* is offered by Heyd, “*Be Sober and Reasonable*” (1995), in the chapter “Meric Casaubon and Henry Moore” (72–92). It is surprising, though, that Heyd makes no mention of Casaubon’s programmatic Preface to Dee’s diary.

57. Casaubon 1669, 21, reprinted in Casaubon 1976. On his philosophical views and cultural policy, see Paul J. Korshin’s introduction in Casaubon 1970, and David G. Lougee’s introduction in Casaubon 1976.

58. It may be noted that Clucas 200? severely criticizes Shumaker’s study, primarily condemning its patronizing tone: “he allows his impatience with the ‘unreliable prophecies’ to interfere with his historical account of Dee’s thought” (text corresponding to n. 37).

59. Dee 1994, xxv; see also Bassnett 1990 for a corroboration of this view.

60. Several versions of this anecdote survive, for example, in William Prynne’s *Histriomastix* (1633) and in a book published by Vautrollier, an Huguenot bookseller of Blackfriars. Cf. Philip Henderson, *Christopher Marlowe* (New York: Harper and Row, 1974), 135; and Anthony Burgess, *Shakespeare* (Hammondsworth: Penguin, 1970), 103.

9. CONCLUSION: DEE AND RENAISSANCE SYMBOLISM

1. *A Discourse Concerning Edmund Spenser*, MS about 1628, quoted from Spenser 1971, 150–52.

2. I have further developed Gombrich’s typology in order to turn it into a semiotics of occult symbolism in my following studies: “Semiotics and Hermeneutics of Iconographical Systems,” in Jeff Bernard, Gloria Withalm, and Karl Müller (eds.), *Bildsprache, Visualisierung, Diagrammatik* (Akten zweier internationaler Symposien 1) *Semiotische Berichte* 19.1–4 (1995 [1996]): 283–313; and “The Powerful Image: Towards a Typology of Occult Symbolism,” in Gy. E. Szőnyi (ed.), *Iconography East & West* (Leiden: J. Brill, 1996, *Symbola & Emblemata* 7), 250–63. See also Szulakowska 2000, 1–12.

3. For the background of the necromantic legend spread about Kelly (and Dee) by John Weever, see my article, Szőnyi 1991 (and Casaubon’s Preface, in Dee 1659, *55).

4. Cf. Robert Ellrodt, *Neoplatonism in the Poetry of Spenser* (Geneva, 1960); A. Fowler, “Emanations of Glory: Neoplatonic Order in Spenser’s *The Faerie Queene*,” in Kennedy and Reither (eds.), *A Theatre for Spenserians* (Toronto, 1973); E. Bieman, “Neoplatonism: The Ghost of Spenser’s Fiction,” in David A. Richardson (ed.), *Spenser: Classical, Medieval, Renaissance, and Modern* (Cleveland, 1977); and D. Burchmore, “Neoplatonic Cosmology in Spenser’s Legend of Friendship,” in *Spenser at Kalamazoo* (Cleveland, 1981). See also the article “Neoplatonism” in *The Spenser Encyclopedia* (Toronto, 1990).

5. “Would to God in Heaven I had awhile [. . .] the mystical and supermetaphysical philosophy of Doctor Dee”—Harvey to Spenser, in Harvey, *Letter Book 1573–1580*,

(London, 1884), 71. See my article on Dee and hermeticism in *The Spenser Encyclopedia* (1990, 211, 358–59), and for a detailed analysis, see Szőnyi 1984, 369–84.

6. Francesco Giorgi, *L' Harmonie du monde* (Paris, 1578). The diagram is reproduced in Yates 1979, Fig. 4.

7. Tobias Schütz's illustration is reproduced and commented in Debus 1978, 28.

8. On the historiography and development of the seventeenth-century illustrations to Boehme's works, see Christoph Greissmar, *Das Auge Gottes: Bilder zu Jakob Böhme* (Wiesbaden: Harrassowitz, 1993, Wolfenbütteler Arbeiten zur Barockforschung 23).

9. The corresponding text reads: "Humanus anunus & mundus: unum & orbem complet & quadratum. Huius quadrati centrum & punctum intersectionis dyametrorum est intellectus. Unde sit ut iterum intellectus: deprehendat esse utriusque nature oppositio" (Bouelles 1510, 86v).

10. It cannot be by chance that Wayne Shumaker entitled his work dealing with Dee's angelic conferences and similar early modern topics *Renaissance Curiosa* (1982).

Bibliographies

Including abbreviations.

Manuscripts of Dee's works are listed in the first section of the bibliography, other cited manuscripts are listed in the Index under the heading "MSS, cited."

JOHN DEE'S WORKS

1) In the Order He Wrote Them

1556. "A Supplication to Queen Mary . . . for the Recovery and Preservation of Ancient Writers and Monuments." London, BL, MS Cotton Vitellius C. VII. fol. 310 [published in Dee 1851, 46–47; Dee 1990, 194–95].
1558. *Propaedeumata Aphoristica . . . de praestantioribus quibusdam naturae virtutibus*. London: Henry Sutton [second edition, London: Reginald Wolfe, 1568; modern edition by Wayne Shumaker in Dee 1978].
1564. *Monas hieroglyphica*. Antwerp: Willem Sylvius [further editions: Frankfurt, 1591; in Lazarus Zetzner's *Theatrum chemicum*, Strassburg, 1622, 2:191–230; modern edition by C. H. Josten in Dee 1964].
1570. *Mathematicall Praeface* [to *The Elements of Geometry of Euclid of Megara*, tr. Henry Billingsley]. London: John Daye [facsimile edition and introduction by Allen G. Debus, New York: Science History Publications, 1975].
- 1570–1590s. *Private diaries*. Inscriptions in Joannes Stadius' *Ephemerides novae* (Cologne, 1570) and in Antonius Maginus' *Ephemerides coelestium motuum* (Venice, 1582); copied by Ashmole (Oxford, Bodleian, MSS Ashmole 423, 487, 488) and published in Dee 1842 and 1998.
1573. *Parallaticae commentationis praxeosque nucleus quidam*. London: John Daye.
1577. *General and Rare Memorials Pertayning to the Perfect Art of Navigation*. London: John Daye [facsimile: "The English Experience" 62, Amsterdam and New York: Theatrum Orbis Terrarum, 1968].

1578. *Her Majesties title Royall* (in 12 Velam skins of parchment, faire written for her Majestis use . . . —cf. Dee 1851, 25, No. 3).
- 1581–1583. “Mysteriorum libri” [angelic conversations in Mortlake]. London, BL, MSS Sloane 3188, 3677.
1582. “A Playne Discourse . . . concerning y needful reformation of y vulgar kallender.” Oxford, Bodleian, MS Ashmole 1789, fols. 1–40 [and several other copies].
1583. “Catalogus librorum bibliothecae (externae) Mortlacensis. . .” Cambridge; Trinity College, MS 0.4.20; Oxford, Bodleian, MS Ashmole 1142, fols. 1–74 [facsimile reprint in Dee 1990].
- 1583a. “Liber mysteriorum, sextus et sanctus” [Book of Enoch]. London, BL, MSS Sloane 3189, 2599.
- 1583–1587. “Mysteriorum libri” [angelic conversations from Mortlake, Poland, and Bohemia]. London, BL, MS Cotton Appendix XLVI [published by Meric Casaubon in Dee 1659].
1584. “48 claves angelicae.” London, BL, MSS Sloane 3191, art. 1.; 3678, art 1 [extracts published by Geoffrey James in Dee 1984 and 1994].
1585. “Liber scientia auxilii, & victoriae.” London, BL, MSS Sloane 3191, art 2.; 3678, art 2 [extracts published by Geoffrey James in Dee 1984 and 1994].
1586. “Praefatio Latina in Actionem Primum ex 7. . .” Oxford, Bodleian, MS Ashmole 1790, art. 1, fols. 1–9 [published by C. H. Josten in Dee 1965].
1588. “De heptarchia mystica; Tabula bonorum angelorum; Fundamenta invocationum.” London, BL, MS Sloane 3191 arts. 3–5, 3678 arts. 3–5 [published by Robert Turner in Dee 1983 and extracts in Dee 1994].
1592. “The Compendious Rehearsall of John Dee . . . made unto the two Honorable Commissioners. . .” London, BL, MS Cotton Vitellius C. VII, fols. 7–13; Oxford, Bodleian, MS Ashmole 1788, fols. 7–34 [published in Dee 1851, 1–45].
- 1595–1601. Diary. See Dee 1880.
1597. “THALATTOKPATIA BPETTANIKH, sive de imperii brytannici Jurisdictione in mari. . .” London, BL, MS Harley 249, fols. 95–105; MS Royal 7 C. XVI, fols. 158–65.
1599. *A Letter Containing a Most Briefe Discourse Apologeticall. . . 1592*. London: Peter Short [rpt. London, 1603; facsimile in *The English Experience*, 502, Amsterdam and New York, 1973].
1604. *A Letter Nine yeeres Since, Containing a Most Briefe Discourse Apologeticall. . . ; To the Kings most excellent maiestie; To the Honorable Assemblie of the Commons in the Present Parliament*. Broadside, London: Peter Short.
- 1607–1608. “Alchemical notes.” Oxford, Bodleian, MS Ashmole 1486, art. 5.

2) Editions After Dee’s Death

1659. *A True and Faithful Relation of What Passed between Dr. John Dee [. . .] and Some Spirits. . .* Ed. Meric Casaubon. London: T. Garthwait (rpt. Glasgow: Golden Dragon Press / Antonin Publishing Co., 1974).

1841. "Letter to Lord Burghley, October 3, 1574"; "Directions to Arthur Pitt and Charles Jackman for a voyage to Cathay, May 15–17, 1580." In James O. Halliwell-Philips, ed. *A Collection of Letters Illustrative of the Progress of Science in England*. London.
1842. *The Private Diary and Catalogue of His Library of Manuscripts of Dr. John Dee* [Diary 1540s–1590s]. Ed. James O. Halliwell. Manchester: Camden Society, vol 19 [rpt. New York, 1968].
1843. "Letter to Elizabeth I, November 10, 1588." In Henry Ellis, ed. *Original Letters of Eminent Literary Men of the Sixteenth, Seventeenth, and Eighteenth Centuries*. London: Camden Society Publications, 23, 33–39.
1851. *Autobiographical Tracts* [The Compendious Rehearsal . . . (1592); "A Supplication to Queen Mary . . . for the Recovery and Preservation of Ancient Writers and Monuments" (January 15, 1556); "A Necessary Advertisement" (from the *General and Rare Memorials*, 1577); "A Letter Containing a most briefe discourse apologetical" (1592)]. Ed. James Crossley. Manchester: Chetham Society Publications, vol. 24.
1854. "Letter to Sir William Cecil, February 16, 1563." Ed. R. W. Grey. Philobiblon Society. *Bibliographical and Historical Miscellanies* 1.12: 1–16.
1880. *Diary, for the Years 1595–1601, of Dr. John Dee, Warden of Manchester from 1595–1608*. Ed. John E. Bailey. Privately printed.
1921. *A List of Manuscripts Formerly Owned by Dr. John Dee*. Ed. M. R. James. Oxford: OUP.
1964. "A Translation of John Dee's *Monas hieroglyphica*, with an Introduction and Annotations." Tr. and ed. C.H. Josten [with facsimile of the original], *Ambix* 12: 112–221.
1965. C. H. Josten, "An Unknown Chapter in the Life of John Dee ['Praefatio Latina in Actionem Primum ex 7 . . .].'" *Journal of the Warburg and Courtauld Institutes* 28: 233–57.
1975. *The Mathematicall Preface to the Elements of Geometry of Euclid of Megara*. Ed. Allen G. Debus. New York: Science History Publications.
1978. *John Dee on Astronomy. "Propaedeumata Aphoristica" (1558 and 1568). Latin and English*. Ed. and tr. Wayne Shumaker. Intro. J. L. Heilbron. Berkeley: University of California Press.
1983. *The Heptarchia Mystica of John Dee* ["De heptarchia mystica," "Tabula bonorum angelorum," "Fundamenta invocationum," 1588]. Ed. Robert Turner. Tr. Christopher Upton. Edinburgh: Magnum Opus Hermetic Sourceworks 17 [second enlarged edition: Wellingborough, 1986].
1988. *Misteriorum libri*, 22 December 1581–23 May 1583. In Christopher Whitby, *John Dee's Actions with Spirits*. New York: Garland, 2:1–408.
1990. *John Dee's Library Catalogues* [with facsimiles]. Eds. Julian Roberts and G. Watson. London: The Bibliographical Society.
1994. *The Enochian Magick of Dr. John Dee* [extracts: "Mysteriorum libri," 1583–1607; "48 claves angelicae," 1584; "Liber scientia auxilii & victoriae," 1585]. Ed. and tr. Geoffrey James. St. Paul, Min.: Llewellyn Publications [first edition 1984].

1996. *Mysteriorum libri, 1581–1583*. In Clay Holden, ed. *The John Dee Publication Project*. 20 August 2002. <www.dnai.com/~cholden/>.
1998. *The Diaries of John Dee*. Ed. Edward Fenton. Charlbury, Oxfordshire: Day Books.

SOURCES AND THEIR MODERN EDITIONS

- Abrams, M. H. (general editor). 1986. *The Norton Anthology of English Literature*. Fifth Edition. New York: Norton.
- Agrippa, H. C.[von Nettesheim]. 1530. *De incertitudine & vanitate omnium scientiarum*. Antwerp; □ 1550. *De occulta philosophia Lib. III, Item, Spurius Liber de Caeremoniis Magicis qui Quartus Agrippae habetur. Quibus accesserunt, Heptameron Petri de Abano, etc.* Basel: Godefroy et Beringer; □ 1575. *Of the Vanitie and vncertaintie of Artes and Sciences*. Tr. James Sanford. London: Henry Bynnemann; □ 1651. *Three Books of Occult Philosophy*. Tr. James Freake. London: Gregory Moule; □ 1898. *Three Books of Occult Philosophy*. Ed. Willis F. Whitehead, including some parts of Henry Morley's *Life of Agrippa*. Chicago: Hahn and Whitehead; □ 1955. In *praelectione Hermetis Trismegisti*. PREFACE

Geoffrey James

THE ENOCHIAN EVOCATION is based on the magical diaries & work-books of Doctor John Dee, the famous Elizabethan scientist and magus. These manuscripts document the ceremonies that Dee performed with Edward Kelly, who, gazing into a crystal stone, claimed to see and hear angels. According to Kelly, these beings desired to re-establish the true art of Magic, which had been lost due to Man's wickedness and ignorance. The true magical art (they claimed) would bequeath superhuman powers upon its practitioners, change the political structure of Europe, and herald the coming of the Apocalypse.

Dee believed that this research was of great benefit to Mankind and far more important than his more mundane studies. Dee explained his dissatisfaction with worldly knowledge:

*I have from my youth up, desired and prayed unto God for pure and sound wisdom and understanding of truths natural and artificial, so that God's wisdom, goodness, and power bestowed in the frame of the world might be brought in some bountiful measure under the talent of my capacity. . . So for many years and in many places, far and near, I have sought and studied many books in sundry languages, and have conferred with sundry men, and have laboured with my own reasonable discourse, to find some inkling, gleam, or beam of those radical truths. But after all my endeavours I could find no other way to attain such wisdom but by the Extraordinary Gift, and not by any vulgar school, doctrine, or human invention.**

Dee felt that only through the practice of magic would he be able to learn those 'radical truths.' Like Luther, Dee rejected the necessity of the church as an intermediary to God. But Dee carried this doctrine one step further, believing that holy revelations

* From Dee's Preface to Sloane Ms. 3188.

could be obtained by practicing the magic of the ancient Hebrews:

I had read in books and records how Enoch enjoyed God's favor and conversation, and how God was familiar with Moses, and how good angels were sent to Abraham, Isaac, Jacob, Joshua, Gideon, Esdras, Daniel, Tobias, and sundry others, to instruct them, inform them and help them in worldly and domestic affairs, and even sometimes to satisfy their desires, doubts, and questions of God's secrets. Furthermore, I considered the Shewstone which the high priests did use, by God's own ordering, wherein they had lights and judgements in their great doubts. I considered, too, that God did not refuse to instruct the prophets and seers to give answers to the common people concerning economics, as Samuel did for Saul; and so did Solomon the wise, immediately after attaining his wonderful wisdom through God. Therefore I was sufficiently taught and confirmed that I would never attain wisdom by man's hand or by human power, but only from God, directly or indirectly.†

Realizing the heretical aspects of these beliefs at a time when magic was perceived as questionable at best and at worst diabolic, Dee was vehement in his rejection of the 'black arts':

I have always had a great regard and care to beware of the filthy abuse of such as willingly or wittingly invoke or consult with spiritual creatures of the damned sort: angels of darkness, forgers, patrons of lies and untruths. Instead I have flown unto God through hearty prayer, full oft and in sundry manners.‡

Dee discovered that he was unable to perceive spirits on his own, and so was forced to employ skryers or crystal gazers. The most prolific of Dee's skryers was Edward Kelly, a man of mediocre education whose main interest was alchemy. Kelly originally asked to work with Dee because Kelly believed that with divine aide they might discover the philosopher's stone that would transmute lead into gold. Dee was hesitant at first, but when they performed a simple ceremony, it was far more successful than anything Dee had ever experienced:

† *Ibidem*

‡ *Ibidem*

*Thereupon I brought forth to him my stone in the frame (which was given me of a friend) and I said unto him, that I was credibly informed that to it (after a sort) were answerable various good Angels . . . He then settled himself to the Action: and on his knees at my desk, setting the stone before him, fell to prayer and entreaty. In the mean space, I in my oratory did pray and make motion to God & his good Creatures for the furthering of this Action. And within a quarter of an hour (or less) he had sight of one in the stone.**

Kelly's skrying was destined to produce what is perhaps the most unusual magical literature of the Renaissance.

Was Kelly a charlatan who fabricated visions out of his own imagination? Historians have traditionally cast Kelly as a *fraud who deluded his pious master*†, but the evidence perhaps does not justify this judgement. It is true that Kelly accepted £50 per year for his services to Dee‡ but such annuities were the basis for survival in Elizabethan times. Far from encouraging Dee, Kelly eventually began to question the angelic nature of the spirits, and frequently tried to extricate himself from Dee's employ*. Kelly might, of course, have been applying reverse psychology, but there is little reason why he should have bothered to do so, as Dee was already determined to continue the experimentation. If Kelly had been trying to plunder Dee's money, why would Kelly have tried to convince Dee that the spirits were devils?

It is difficult to account for the serious stylistic differences between Kelly's usual writing style and the utterances that he attributed to the spirits. Kelly was an uninspired writer; the following excerpt is representative of his prowess:

*The heavenly cope hath in him nature's fower
Two hidden, but the rest to sight appear:
Wherein the sperms of all the bodies lower
Most secrett are, yett spring forth once a yeare...§*

* Sloane MS. 3188; Passages marked March 10, 1582.

† Francis Yates, *Gordiano Bruno and the Hermetic Tradition*, London: 1964, p. 149.

‡ Meric Casaubon, ed., *A True and Faithful Relation of What passed for many Yeers Between Dr. John Dee . . . and some Spirits*, London: 1659, pg. 28. (Facsimile republished by Askin, London: 1974.)

* *Ibidem*, pgs. 20, 91, 153, 169 & 171.

§ A. E. Waite, ed., *The Alchemical Writings of Edward Kelly*, Weiser, New York: 1973, p. liii.

Contrast those stilted and awkward lines with the Call of the Thirty Aires:

*The work of man and his pomp,
let them be defaced:
His buyldings
Let them become caves for the beasts of the field:
Confownd her understanding with darkness.
For why?
It repenteth me I made Man.*

It seems impossible that this powerful passage could have been written by the same hand, or that Kelly's own writing skill could have produced such passages of eldritch beauty as:

*Can the wings of the windes understand your voyces of wonder?...
Stronger are your fete than the barren stone:
And mightier are your voices than the manifold windes....*

Admittedly, stylistic differences are subtle gauges of authorship. But more concrete evidence against Kelly fabricating all his visions lies in the complexity of the Angelical (Enochian) keys. Could Kelly, whose single linguistic accomplishment was mastery of schoolboy Latin and even whose English was laced with colloquialisms, have devised an entire language, with its own unique grammar and syntax? It took Tolkien, a professor of philology, years to fabricate the Elvish tongue that figures so largely in his work; if Kelly fabricated the keys, he would have had to do so in a matter of days.

In short, if Kelly was the conscious author of all his 'visions', then he possessed a far greater literary competence than he ever exhibited elsewhere. However, the subconscious mind is often capable of feats that are impossible to the conscious mind. Could Kelly have hallucinated the visions? It has been suggested that Dee may have propelled Kelly into a state of artificial psychosis with their ceremonies.† Kelly may also have had multiple personalities, for the spirits talk in biblical dialects quite different from Kelly's normal speech.

† Peter French, *John Dee, The World of the Elizabethian Magus*, London: Routledge & Kegan Paul, 1972, pg. 114.

Kelly was having trouble distinguishing between his own thoughts and those of the 'spirits'. He complained of :

...a great stir and moving in his brains, very sensible and distinct, as of a creature of human shape and lineaments going up and down, to and fro in his brains and within his skull.†

Dee was forcing Kelly to perform ceremonies on an almost daily basis, and for hours at a stretch. Reflecting this stress, Kelly's temper became extremely volatile as shown by this event that Dee recorded:

*Suddenly E. K. fell into such a rage that...much ado I, Emericus, and his brother had to stop or hold him...At length we let him go in his doublet and hose, without a cap or hat on his head: and into the street he hastened with his brother's rapier drawn... The rage and fury was so great in words and gesture as might plainly prove that the wicked enemy sought either E. K. his own destroying himself, or of me, or of his brother.**

Kelly's behaviour was so bizarre that Dee was afraid that Kelly was possessed by the devil, one of the time's standard diagnoses for insanity. Dee had recently discovered that Kelly was performing black magic independent of their work together. This horrified Dee so much that he noted the event in Latin, even in his own private diary:

Horrenda & multiplicia heresium, & blasphemiarum dogmata, quibus illi hostes Jesu Christi illum imbuerant...illisque malis Angelis renunciare, & omnes illorum fraudes deteger... Conversio E. K. ad Deum, abdicatis omnibus Diabolicis experimentis.‡

The 'horrible heresies' that the 'evil angels' had revealed to Kelly were, in the context of the time, insane. They questioned the entire fabric on which the culture was built. Dee recorded these heresies in his diary:

† Casaubon, *op. cit.*, p. 328.

* *Ibidem*, p. 230.

‡ *Ibidem*, p. 164: Manifold horrible heresies and blasphemous doctrines, in which they eat the host of Jesus Christ ... but he was led to put aside these evil angels and all their frauds. . . I spoke with E. K. about God, telling him to give over all his Diabolical experiments.

They would have persuaded (Kelly):

—*That Jesus was not God.*

—*That no prayer ought to be made to Jesus.*

—*That there is no sin.*

—*That man's soul doth go from one body to another childes quickening*

—*That as many men and women as are now, have always been.*

—*That the generation of mankind from Adam and Eve, is not an History, but a writing which has another sense.**

Kelly could not have entertained such notions without being profoundly disturbed by their implications, and his conversion back to orthodoxy indicates his remorse and guilt. There is little question that Kelly was exhibiting signs of extreme stress and possible psychosis while working with Dee.

Kelly's participation in private magical ceremonies raises the tantalizing possibility that he might have had access to magical texts of which Dee was not aware, and that may have served as source material for the *Enochian Evocation*. Although Israël Regardie states that *there is absolutely no trace of any part of the Enochian magical system or Angelical language in Europe*.†; that view-point is not entirely justified. While it is true that the Angelical keys are very different from, for example, the bastardized Arabic and Greek in various Solomonian grimoires, elements of the *Enochian Evocation* are similar and in some cases almost identical to other Renaissance magical texts.

Both the *Arbatel*‡ and the *Heptameron** are arranged like Book Two of the *Enochian Evocation*, with conjurations addressed to the rulers of each day of the week. The sigil of Æmeth, also in Book Two, is apparently based upon an earlier sigil that appears in the *Sworn Book of Honourius*,§ a manuscript that antedated Kelly by almost 300 years. Of course, the entire methodology for devising spirit sigils out of magical squares of numbers and or letters was described in detail by Cornelius Agrippa c. 1533.**

* *loc. cit.*

** *De Occulta Philosophia*, Sine loco, 1533.

Renaissance Europe did contain books of evocation magic attributed to Enoch. The very year the keys were dictated, Reginald Scot complained:

Conjurors carrie about at this daie, bookes intituled under the names of Adam, Abel, Tobie, & Enoch; which Enoch they repute the most divine fellow in such matters.*

Could Kelly have been utilizing such a book to assist him in his private ceremonies, or to provide the material that Dee so incessantly demanded? Kelly was certainly guilty of some plagiarism, although it may have been subconscious, for it was Kelly rather than Dee, who discovered the plagiarism and reported it to Dee:

(Kelly) came speedily out of his Study, and brought in his hand one volume of Cornelius Agrippa his works... whereupon he inferred, that our spiritual Instructors were Cosenors to give us a description of the world, taken out of other Books...†

Dee, somewhat surprised, replied: *I am very glad that you have a Book of your own, wherein these Geographical names are expressed‡.* Dee's ignorance of the exact contents of the library that Kelly kept in his study is extremely suspicious.

If Kelly was plagiarizing some as-yet undiscovered manuscript, it may have been Gnostic in origin, as significant parallels exist between the Angelical keys and certain Gnostic texts. For example, a typical incantation from the *Pistis Sophia*: ZAMA ZAMA OZZA RACHAMA OZAI* is not Angelical, but the overuse of the 'Z' phoneme is characteristic of Angelical, and the repetition of the word ZAMA echoes the refrain ZACAR CA ZAMRAN that permeates the keys. Another linguistic similarity is the Gnostic name for the demiurge IALDABAOth,§ quite close to the Angelical IAD BALTOH for 'God of Righteousness.'

The Gnostics tended to treat Enoch as a special personage, because he was the first mortal to speak with God after the fall,

* Reginald Scot, *The Discovery of Witchcraft*, London: William Brome, 1584, Book xv, Chapter xxxi.

† Casaubon, *op. cit.*, p. 158.

‡ *Ibidem*.

* G. R. S. Mead, *Fragments of a Faith Forgotten*, New York: University Books, 1960, p. 462.

§ *Ibidem*, p. 188.

and so the first to attain the gnosis that they sought§. The Gnostics attributed works of magic to Enoch, such as *the two great Books of IEOU, which Enoch wrote when I spoke with him from the Tree of Knowledge, which were in the paradise of Adam**. The word IEOU suggests that the books contained conjurations with words much like those of the *Pistis Sophia* or the Angelical keys; the legendary origin of the Books in the garden of Eden recalls the claim that the Angelical language was that *which Adam verily spake in innocence*.

Like many Gnostic texts, the Angelical keys emphasize the opening of 'gates' into various mystical realms. The *Book of the Great Logos*, a Gnostic text associated with the Books of IEOU, contains the following passage:

The guardians of the Gates of the treasure will open them, and they will pass upwards and ever inwards through the following spaces, and the powers rejoicing and giving them their mysteries, seals, and names of power: the Orders of the Three Amens...Within each treasure is a Door or Gate, and without three Gates; each of the outer gates has three guardians.†

Compare the above passage with the following from Kelly's scrying:

Every table hath his key, every key openeth his gate, and every gate being opened, giveth knowledge of himself, of the entrance, and the mysteries of those things whereof he is an enclosure. Within these Palaces you shall find things that are of power...for every Palace is above his City and every City is above his Entrance.‡

Both Gnostic and Angelical magic place emphasis on the number 49. For example, the *Pistis Sophia* states that *the reflection of the supernal projections, powers, or co-partners of the Sophia [when] looked at from without, make an ordering into forty-nine,** while the apoc-

§ Vide: *The Secrets of Enoch*, published in *The Lost Books of the Bible*, Cleveland: Forum Books, 1963.

* Mead, *op. cit.*, p. 487.

† *Ibidem*, p. 258 & 541.

‡ Casaubon, *op. cit.*, p. 88.

* Mead, *op. cit.*, p. 471.

ryphal *Books of the Savior* state that *no mystery is higher than the mysteries ye seek after, save only the mystery of the Seven Voices and the Nine-and-Forty Powers and Numbers*.^{*} These 49 powers recall the 49 good angels or even the Angelical keys themselves, which Kelly's spirits described as:

49 voyces , or callings, which are the Natural Keys, to open...Gates of understanding...you shall have knowledge to move every Gate, and to call out as many as you please...and wisely open unto you the secrets of their Cities...†

The possibility that Kelly did plagiarize large portions of the *Enochian Evocation* would do much to explain the presence of the Angelical language in his scrying, as well as the stylistic variations in his work. However, the similarity between Kelly's scrying and Gnostic magic, while undeniable, is not sufficiently strong to build a direct textual connection.

A serious objection to the theory that Kelly plagiarized visions is the way that the keys were revealed. The first five keys were dictated, letter by letter, backwards, while the rest were dictated forwards, without any significant errors. The bulk of the keys (over 1000 words) were dictated on a single day during a single session. Most of the English glosses were dictated on a single day, well after the Angelical, yet they match their Angelical counterparts almost perfectly. Kelly would have had to be capable of extraordinary feats of mnemonic virtuosity, if he utilized another magical text as source material for the keys.

A final possibility deserves discussion—was Kelly ever actually in contact with supernatural entities? In fact, the Dee-Kelly ceremonies contain some evidence that would seem to indicate the presence of the supernatural during some of the ceremonies.

One standard test for the presence of the supernatural is precognition of future events. This took place at least twice during the Dee-Kelly workings; the spirits predicted the Spanish armada and the execution of Mary Queen of Scots well before those events could have been known.^{*} However, the 'spirits' predicted other events that never took place.

^{*} *Ibidem*, pgs. 516 & 523.

[†] Casaubon, *op. cit.*, p. 77.

^{*} Donald C. Laycock, *The Complete Enochian Dictionary*, London: Askin, 1978, p. 38

Another classic test for the presence of the supernatural is the speaking of a tongue with which the possessed is not familiar. During one ceremony, Kelly began repeating Greek words, but he soon became frustrated and interrupted with: *Unless you speak some language that I can understand, I will express no more of this Ghybbrish*§. Curiously, the Greek translates into a warning to Dee not to trust Kelly.

But the Angelical language itself forms a more startling example of 'speaking in tongues', because it exhibits characteristics that would seem to indicate that it was designed to be a non-spoken language. As Da Vinci had pointed out nearly 100 years before the keys were dictated, spirits would be unable to make audible sounds on their own, due to a lack of vocal chords with which to vibrate the air*.

Thus any 'language' that spirits would 'speak' would be radically different from a language intended for use by human beings. Onomatopœiæ would be totally lacking. Contractions would be used to create new concepts, rather than to smooth out pronunciation. Many words would feature strings of consonants rather than an easily-pronounced intermixes of vowels and consonants. The letter arrangement would appear somewhat random and more like a Cabbala than a spoken tongue. And finally, the system of numbers would not be based on 10, since along with a lack of vocal chords, non-material entities would have little use for fingers.

The Angelical language exhibits most of these characteristics. There are no onomatopœiæ in Angelical. Angelical contractions such as TELOCVOVIM and JADOIASMOMA are conceptually convenient, but have not been edited for easier pronunciation. Many Angelical words feature unpronounceable strings of consonants. Angelical letter arrangements appear to be random†, and the language is stated to be the source language for Hebrew and thus Cabbala is implied. Finally, Angelical numbers are incomprehensible using any known base or numbering scheme*.

§ Casaubon, *op. cit.*, p. 27.

* Jean Paul Richter, tr., *The Notebooks of Leonardo Da Vinci*, New York: Dover Publications, 1970, Vol. II, p. 307.

† Laycock, *op. cit.*, p. 40.

* *Ibidem*, p. 44.

The compiler of the Enochian dictionary, on the other hand, asserts that the Angelical language is English-like both in word order and in pronunciation. Since the exact character of the Angelical language is essential to an understanding of *The Enochian Evocation*, Laycock's theory must be examined in some detail.

Laycock gives an example where English is the only language that matches the Angelical§. But the keys include many other passages where the Angelical phrasing makes for extremely awkward English. For example, NISO CRIP IP NIDALI is glossed as *Come away, but not your noises*. Since this is addressed to the *Thunderers of Judgement and Wrath*, what is probably meant by NISO CRIP IP NIDALI is *leave wherever you are and come here, but don't make thundering noises*. The Angelical language expresses the concept much more succinctly than is possible in English. Again, the Angelical word TELOCVOVIM is glossed as *him that is fahn* [fallen], but is actually a contraction of TELOCH (death) and VOVIM (dragon), literally 'death-dragon'—a reference to Satan's transformation during his fall. Words like TELOCVOVIM are much more Germanic than English-like. In short, the Angelical language is no more English-like than any other non-English language; the fact that there are some matches is not significant.

Laycock states that the Angelical language has English pronunciations. Unfortunately, Kelly never, as the spirits' 'mouthpiece', pronounced the Angelical words. Kelly dictated letter by letter from a table that he saw in the crystal, as shown from Kelly's description that Dee recorded:

[The angel] hath a rod or wand in his hand...it is of Gold...He standeth upon his round table of Christal or rather Mother of Pearl: There appear an infinite number of letters on the same, as thick as can stand by another...He standeth and pointeth with his rod to the letters of his Table, as if he made some account or reckoning*.

Furthermore, if Angelical letter arrangement has random characteristics, as Laycock claims, then the English-like pronunciation cannot be an inherent quality of the language itself. Far more likely is that Dee assigned pronunciations to the Angelical because

§ *Ibidem*, p. 43.

* Casaubon, *op. cit.*, p. 73.

he wished to speak the keys in a ceremony, and, being English, adapted them as well as he could to his native tongue. Indeed, outside of few minor suggestions, the spirits seem unconcerned with pronunciation. The Angelical language in its basic form makes few concessions to the human vocal chord.

Of course, one must keep in mind that Kelly might have plagiarized the keys; in any case, whoever or whatever devised the keys made a viable attempt to simulate a 'language' designed for non-material beings.

The final and most dramatic evidence for the presence of the supernatural is a telekinetic phenomenon that Dee himself witnessed and described:

There appeared a great flame of fire in the principal Stone....Suddenly one seemed to come in at the fourth window of the Chappel... the stone was heaved up a handful high and set down again. The one at the window seemed... with spread-abroad arms to come to E. K., at which sight, he shrinked back somewhat, and then that Creature took up between both his hands the stone and frame of gold, and mounted up away as he came E. K. caught at it, but he could not touch it ...E. K. was in a great fear and trembling and had tremorem cordis for a while. But I was very glad and well pleased.*

Although it is true that this event could easily be reproduced using modern techniques of prestidigitation, stage magic in the 16th century was much too crude to produce such an illusion†. If Kelly had some trick of making a crystal rise and fly out a window, he could have made far more than £50 a year performing this feat for the public. Kelly's reaction to the event is revealing; Dee apparently listened to his heart and noticed tremors, a condition that Kelly would have found difficult to simulate. Kelly seems genuinely affected, but the cold and clinical Dee declared that he was *glad and well pleased*. The event proved to Dee, beyond the shadow of all doubt, that they were in contact with supernatural powers.

* *Ibidem*, Second page 19.

† *Vide*, Scot, *op. cit.*, Book XIII, Chapter XXXIV, for a description of the primitive stage illusions of the 16th Century.

Was Kelly a charlatan, a psychotic, a plagiarist, or a true skryer? The distinction was non-existent in Kelly's own mind, because differentiating between these states required a well-defined sense of reality. There is no simple explanation for Kelly's actions. He believed in the spirits, yet he fabricated and plagiarized. He exhibited the signs of psychosis, yet manifested extraordinary linguistic and telekinetic phenomena. Forced on an almost daily basis into abnormal psychological and hypnotic states, plagued by the constant fear of damnation, convinced to let his life be controlled by 'angels' that were either manifestations of his diseased subconscious or of strange otherworldly presences—all these served to blur Kelly's perception of reality.

It is ironic that Kelly is so often viewed as victimizing Dee. Kelly was forced to stay with Dee because the money that the doctor gave him supported Kelly's wife and brother. When Kelly tried to leave, Dee would coerce him to remain by playing on his guilt and fear. It was Dee, not Kelly, who was gaining the benefit from the magical ceremonies, for it sated his lust for 'radical truths'.

A single incident epitomizes the difference between the attitudes of the two men. The spirits demanded that Dee and Kelly have sexual relations with each other's wives. Whether the suggestion came from Kelly's subconscious or from some other source is not important; what is important is the reactions of the two men.

Kelly was appalled and, in a rare lucid moment, insisted that Dee include a written protest in his magical diaries:

*I, Edward Kelly, by good and provident determination and consideration in these former Actions, that is to say, appearances, shewes made, and voyces uttered...have from the beginning thereof (which at large by the records appeareth) not only doubted and disliked their insinuations and doctrine but also at diverse and sundry times...sought to depart from the exercises thereof...they manifestly [have] urged and commanded in the name of God a Doctrine Damnable and contrary to the Laws of God.**

* Casaubon, *op. cit.*, Second page 17.

Dee had his own doubts, and for the first time calls the spirits 'apparitions'†. But Dee was not willing to admit that the 'radical truths' might have had a less than divine origin, and, against all the protests of Kelly and the two wives (who 'disliked utterly this last doctrine'), Dee drew up an elaborate contract that included the following stipulation:

this doctrine and doings should unto no mortal man be disclosed, but among us onely the above-named four to be kept most secret... we all and every four of us do request...that the sudden and immediate death may light and fall onto the discloser and on him or her to whom the same doctrine or doing any manner of way shall be disclosed or known.*

Thus the hypocritical Dee was willing to pretend that he was following the commandments of God, but asked for death for anyone who found out about it.

The ceremonies continued for some time, possibly pushing Kelly beyond the limits of sanity. After splitting with Dee, he foolishly proclaimed (and perhaps believed himself) that he had indeed discovered the Philosopher's Stone. Finally, in another manic rage, he murdered a man and was imprisoned for the rest of his life. When finally given the opportunity to escape from his tower prison, he fell (or jumped?) to his death§.

Dee felt no guilt for any of his magical experiments, and continually protested his own innocence of any wrongdoing:

The great losses and damages which I have sustained do not grieve my heart so much as the rash, lewd, fond, and most untrue fables and reports of me and my philosophical studies... The works of my hands and the words of my mouth bear lively witness to the thoughts of my heart and inclination of my mind§§.

Even in the last years of his life, Dee was willing to stand trial for Witchcraft, convinced that even the repressive courts under

§ A.E. Waite, *Alchemists Through the Ages*, New York, Steiner, 1970, p. 158

§§ Casaubon, *op cit*, Dee's Apology to the Archbishop of Canterbury.

James the First would acquit him.*

Dee's quest was a spiritual one and his sincere intention was to bring God's wisdom to Mankind. Dee tried to extend the power of Man beyond the threshold of science. While Dee's fanaticism and blind faith in the reality of Kelly's skrying caused others to suffer, one must admit that Dee himself did not escape unscathed. Once the news of his magical practices had become public knowledge, his house and belongings were partially destroyed by a mob of ignorant peasants. And despite the spirits' promises of vast treasures, Dee died in abject poverty, still practicing magic to the end of his days.†

The Enochian Evocation reveals those magical arts, those 'radical truths' for which Doctor John Dee, the foremost scientist and magus of his time, risked his reputation, the virtue of his wife, the sanity of his friend, and the salvation of his own soul.

BOOK ONE

THE MAGICK OF ENOCH

CHAPTER I.

THE FALL OF MAN

§1. *The Garden of Eden.*

MAN, IN HIS CREATION, BEING MADE AN INNOCENT, WAS also authorized and made partaker of the Power and Spirit of God. He not only knew all things under Creation and spoke of them properly—naming them as they were—but was also a partaker of the presence and society of Angels, a speaker of the mysteries of God, and spoke even with God Himself. So in that innocence, the power of his partaking with God and His good Angels was exalted, and so became holy in the sight of God.

§2. *The Casting Out of Adam.*

But Coronzon (for so is the name of that mighty devil), envying man's felicity, and perceiving that the substance of man's lesser part was frail and unperfect in respect to his purer essence, began to assail man, and so prevailed. By offending so, man became accursed in the sight of God, and so lost both the Garden of Felicity and the judgement of his understanding, but not utterly the favor of God. But he was driven forth (as your scriptures record) unto the Earth which was covered with brambles. Adam received punishment for his offence, in that he was turned out into the earth, and so did Adam, accursed, bring all misery and wretchedness into the world. But in the same instant when Adam was expelled, the Lord gave unto the world her

time, and placed over her Angelic Keepers, Watchmen, and Princes.

§3. *The Origin of Hebrew.*

¶ Being as dumb, and not able to speak, Adam began to learn (through necessity) the language which thou callest Hebrew but not in the form which is now Hebrew amongst you. Adam uttered and delivered to his posterity the nearest knowledge that he had of God and His Creatures. From his own self, he divided this speech into three parts: twelve, three, and seven. This division yet remaineth, but the true forms and pronunciations are lost. Therefore Hebrew is not of that force that it was in its original dignity; much less is it to be compared with this language that we deliver, which Adam verily spake in innocence and which has never been uttered nor disclosed to man since, until now. In this language, the power of God must work and wisdom in her true kind must be delivered.

CHAPTER IJ.
THE WISDOM OF ENOCH.

§1. *The Lord & Enoch.*

WHEN THE LORD APPEARED UNTO ENOCH AND WAS merciful unto him and opened up his eyes so that he might see and judge the earth, which was unknown unto his parents by reason of their fall. For the Lord said: *Let us show unto Enoch the use of the earth.* And lo, Enoch was wise and full of the spirit of wisdom.

§2. *The Prayer of Enoch.*

¶ Thrice a day did Enoch talk with God, and this was his prayer:

CAN THE VESSEL OF FEAR, FRAGILITY, OR THAT WHICH IS OF A determined proportion, lift up himself, heave up his hands, and gather the sun into his bosom? Lord, it cannot be. Lord, my imperfection is great. Lord, I am less than sand. Lord, thy good Angels and Creatures excel me by far, for our proportion is not alike and our senses agreeth not.

¶ Notwithstanding I am comforted. For we all have one God, all one beginning from thee, and all respect thee as Creator. Therefore I will call upon thy name and in thee I will become mighty. Thou shalt light me, and I will become a Seer. I will see thy Creatures and will magnify thee amongst them.

¶ Those that come into thee have the same gate, and through that same gate descend those that thou sendest. Behold, I will offer my house, my labour, my heart and soul, if it will please thy Angels to dwell with me and I with them—to rejoice with me that I might rejoice with them—to minister unto me that I might magnify thy name.

¶ Then, lo, these Tables (which I have provided and prepared according to thy will) I offer unto thee and unto thy holy Angels, desiring them through thy holy Names. As thou art their light and comfort, so they will be my light and comfort. Lord, they prescribe no laws unto thee, thus it is not meet that I prescribe laws unto them. What it pleases them to offer unto me, I will receive. Behold, Oh Lord, if I shall call them in thy name, be it unto me in mercy, as unto the servant of the Highest. Let them manifest unto me, howsoever I shall call them and at whatever time.

¶ Oh Lord, is there any who is mortal that can measure the heavens? How, therefore, can the heavens enter into man's Imagination? Thy Creatures are the glory of thy countenance and thereby thou glorifiest all things: but this glory excelleth and is far above my understanding. It is great wisdom to speak with Kings according to one's understanding, but to command Kings is not wisdom unless it come from thee.

¶ Behold, Lord, how shall I ascend into the heavens? The air will not carry me, but resisteth my folly. I fall down, for I am of the earth. Therefore, oh thou very light and true comfort, that canst command the Heavens: Behold, I offer these Tables unto thee. Command them as it pleaseth thee. Oh you Ministers and true lights of understanding, who govern this earthly frame and the elements wherein we live: Do for me as for the servant of the Lord. For unto me it has pleased the Lord to talk of you.

¶ Behold, Lord, thou hast appointed me 50 times. Thrice 50 times I will lift up my hands unto thee. Be it unto me as it pleaseth thee and thy holy Ministers. I require nothing but thee, through thee, and for thy honor and glory. Yet I hope that I shall be satisfied and shall not die (as thou hast promised) until thou gatherest the clouds together to judge all things. And in that moment I shall be changed and dwell with thee forever.

§3. *The Book of Enoch.*

¶ And at the end of the 50 days, there appeared unto Enoch that which is not now to be manifested nor spoken of. Enoch enjoyed the fruit of God, his promise, and received the benefit of his faith. Here may the wise learn wisdom; for what doth man do that is not corruptible? ¶ And Enoch said unto the Lord: *Let there be remembrance of thy mercy, and let those that love thee taste of this after me. Oh let not thy mercy be forgotten.* And the Lord was pleased. So after 50 days, Enoch wrote, and this was the title of his books: LET THOSE THAT FEAR GOD AND ARE WORTHY
—READ.

CHAPTER III
THE FALL OF ENOCH'S MAGICK.

§1. *The Unworthy Read Enoch's Book.*

UT BEHOLD, THE PEOPLE WAXED WICKED & BECAME unrighteous, and the spirit of the Lord was far off and gone away from them. So that those that were unworthy began to read. And the kings of the earth said thus against the Lord: *What is it that we cannot do, & who is he that can resist us?*

§2. *The Lord Sends Wicked Spirits.*

And the Lord was vexed, and he sent in amongst them 150 lions, spirits of wickedness, error, and deceit. And they appeared unto the kings of the earth, for the Lord had put them between those that are wicked and his good Angels. And these spirits began to counterfeit the doings of God and His power, for they had power given to them to do so. And the memory of Enoch washed away.

§3. *Enoch's Magick Forgotten.*

The knowledge of mystical figures and their use is the gift of God delivered unto Enoch and (by Enoch's request) unto the faithful, that they might have the true use of God's Creatures, and of the earth whereon they dwell. So hath the Devil delivered unto the wicked the signs and tokens of his error and hatred towards God, so that they, in using them, might consent in their will and so become partakers with him in his reward, which is eternal damnation. These signs they call Characters—a lamentable thing—for by these many souls have perished. For the doings of the Ægyptians seem, but are not so. The doings of the Lord are, and continue to be. But, as the painter imitates the gestures of man, so doth the Devil imitate the substance and things created and made by God.

§4. *Concerning Satan.*

¶ Where are the monuments that Satan hath built? Hath he not built a fort on the whole earth? Hath he not victory over the Saints? Dwelleth he not in the temple of the Highest? Triumpheth he not in the cities of the world? But without comfort are his victories and without pleasure are his dwelling places, for he knoweth that his time is at hand. He that now hath freedom shall become bound. He unto whom the whole world is a garden, there shall not be one foot left. Therefore are all his pleasures vanity, all his triumphs smoke, and his authority nothing but a meer shadow.

CHAPTER IV.

THE REESTABLISHMENT OF ENOCH'S WISDOM.

§1. *The Lord is Displeased With Man.*

THE GODHEAD, KEEPING IN HIS ALMIGHTY BOSOM THE image and form of all things, looked down upon the earth, and said: *Let us now go down amongst the sons of men.* But he saw that all things grew contrary to their creation and nature, either keeping their dignities and secret virtue shut up in obscurity, or else riotously perishing through imbecility and ignorance.

So then he said: *Behold, I delight not in the World. The Elements are defiled. The sons of men are wicked, their bodies are become dung-hills, and the inward parts (which are the secret chambers of their hearts) are become the dens and dungeons of the damned. Therefore, I will draw my spirit from amongst them, and they shall become more drunken, and their ignorance shall become such as never was before...no, not since the fall of the heavens! For, Lo, the time is come, and he that is the Son of the Unrighteousness liveth. Unto him shall be given strength and power. The kings of the earth shall become mad, yea, even raging mad, yea, even unto the third madness in the depth of their own imagination. But I will build my temple in the woods and in the desert places and will become a serpent in the wilderness.*

§2. *The Lord Relenteth.*

Lo, the Thunder spake, and the earth became misty and full of fog, so that the soul of man might sleep in its own confusion. The second Thunder spake, and there arose spirits, such as are for Soothsayers, Witches, Charmers, and Seducers. They have entered into the holy places and have taken up their seats in man. Woe be unto the earth, for she is corrupted. Woe be unto the earth, for she is surrendered to her adversary. Woe be unto the

earth, for she is delivered into the hands of her enemy. Yea, woe be unto the sons of man, for their vessels are poisoned. But even then said the Lord: *I will be known in the wilderness and will Triumph in my weakness.*

§3. *The Lord Sends Raphaël to Dee & Kelly.*

And lo, he called you. And you became drunken and foolish with the spirit of God. The Lord said: *Descend, for he calleth.* And so Raphaël (who had brought up your prayer) descended, and he was full of the power and spirit of God. And he delivered a Doctrine—neither painted nor carved nor imagined by man—but simple, plain, full of strength and the power of the Holy Ghost. This doctrine began, as man did, nakedly from the earth, but is yet the image of perfection. It is this self-same Art which is delivered unto you as an infallible doctrine. For now it hath pleased God to deliver this Doctrine again out of darkness and to fulfil his promise with thee for the Books of Enoch. And to thee he sayeth as he said to Enoch: *Let those that are worthy understand this, by thee, that it be one witness of my promise towards thee.*

CHAPTER V.
THE NATURE OF THIS WISDOM.

§1. *To whom this Wisdom is to be Spoken.*

HIS WISDOM IS NOT TO BE SPOKEN OF IN ANY OTHER thing, neither is it to be talked of with man's imagination. For this work is the gift of God, which is all power, and so doth He open it in a tongue of power, to the intent that the proportions may agree in themselves. For it is written, Wisdom sitteth upon a hill, and beholdeth the four winds, and girdeth herself together as the brightness of the morning. But she is visited by only a few, and dwelleth alone as though she were a widow.

§2. *Concerning the Tables of Enoch.*

WE instruct and inform you, according to this Doctrine delivered, that which is contained in the 49 Tables. In 49 voyces, or callings, which are the Natural Keyes to open those (not 49 but 48, for One is not to be opened) Gates of understanding. You shall have knowledge to move every Gate, and to call out as many as you please, or shall be thought necessary. They can very well, righteously, and wisely open unto you the secrets of their Cities, and make you understand perfectly that which is contained in the Tables. Through this knowledge you shall easily be able to judge, not as the world doth, but perfectly: of the world, of all things contained within the compass of Nature, and of all things which are subject to an end.

§3. *Concerning the Angelic Calls or Keys.*

Unto this Doctrine belongeth the perfect knowledge, and remembrance of the mystical Creatures. In these keys which we deliver, are the mysteries and secret beings and effects of all things moving, and moved within the world. These calls touch all parts of the World. The World may be dealt with, and her

parts; therefore you may do anything. These calls are the keys into the Gates and Cities of wisdom, which cannot be opened, but with visible apparition. This is according to the former instructions and is to be had by the calling of every Table.

¶ These are the holy and mystical Calls delivered, which followeth in practice for the moving of the Tables that control the Kings and Ministers of government. Their utterance is of force, and moveth them to visible apparition. Moved and appeared, they are forced (by the Covenant of God delivered by his spirit) to render obedient and faithful society. They will open the mysteries of their creation, as far as shall be necessary: and give you understanding of many thousand secrets, wherein you are yet but children. For every Table hath his key, every key openeth his gate, and every gate being opened, giveth knowledge of himself, of the entrance, and of the mysteries of those things whereof he is an enclosure. Within these Palaces you shall find things that are of power. For every Palace is above his City and every City above his entrance.

¶ In these keys which we deliver, are the mysteries and secret beings and effects of all things moving, and moved within the world. In this is the life of MOTION, in whom all tongues of the world are moved, for there is neither speech nor silence that was or shall be to the end of the world.

§4. *Concerning the Primæval Language.*

¶ Thus you see the necessity of this tongue, the excellency of it, and why it is preferred before that which you call Hebrew. For it is written that every lesser consenteth to its greater. Our wisdom shall prove Rhetoric. In this language, every letter signifieth the member of the substance whereof it speaketh. Every word signifieth the essence of the substance. The letters are separated, and in confusion: and therefore, are by numbers gathered together, which also signify a number. For as every greater containeth his lesser, so are secret and unknown forms of things

knit up in their parents. Being known in number, they are easily distinguished, so that herein we teach places to be numbered, letters to be elected from the numbered, and proper words from the letters, which signify substantially the thing that is spoken of in the center of the Creator.

§ Even as the mind of man is moved at an ordered speech, and is easily persuaded in things that are true, so are the creatures of God stirred up in themselves when they hear the words with which they were nursed and brought forth. For nothing moveth, that is not persuaded: neither can anything be persuaded that is unknown. Without this language, the Creatures of God understand you not. You are not of their Cities; you are become enemies, because you are separated by ignorance from Him that governeth the City.

§5. *Concerning the 91 Earthly Princes.*

§ The Call of the Thirty Aires summons the 91 Princes and spiritual Governors unto whom the earth is delivered as a portion. They bring in and depose kings and all governments upon the earth, and they vary the natures of things with the variation of every moment. Unto them, the providence of the æternal judgement is already opened. They are governed by the 12 angels of the 12 Tribes, which are, in turn, governed by the 7 that stand before the presence of God.

§ Let him that can see, look up. Let him that can hear, attend, for this is wisdom. They are all spirits of the Air, not rejected, but dignified. They dwell and have their habitation in the air, in diverse and sundry places, for their mansions are not alike, nor are their powers equal. Understand, therefore, that from the fire to the earth, there are 30 places or abidings, one above and beneath another, wherein these Creatures have their abode, for a time.

§6. *Concerning the Great Table of the Quarters.*

THE GREAT TABLE OF THE QUARTERS CONTAINETH THE FOLLOW-
 ing: ¶ 1. All human knowledge. ¶ 2. Out of it springeth Physic.
 ¶ 3. The knowledge of all elemental Creatures amongst you, how
 many kinds there are, and for what use they were created, those
 that live in the air, those that live in the waters, those that dwell
 in the earth, and those of the fire (which is the secret life of all
 things). ¶ 4. The knowledge, finding, and use of metals, the
 virtues of them, the congelations and virtues of stones. ¶ 5. The
 conjoining and knitting together of natures. The destruction of
 all nature and of things that may perish. ¶ 6. Moving from place
 to place, as, in this country or that country at your pleasure.
 ¶ 7. The knowledge of all mechanical crafts. ¶ 8. The transmu-
 tation of form, but not essence. ¶ 9. The knowledge of the secrets
 of men.

CHAPTER VI
GENERAL CONSIDERATIONS OF THIS ART.

§1. *Art Thou Worthy to Read ?*

THUS SAITH THE MESSENGERS OF THE GOD OF WISDOM:
Is your worthiness such that you merit such great mercy ? Are your vessels cleansed and made apt to receive and hold the sweet liquor of pure understanding ? Be not proud of the gifts of God, but become humble. Do not justify yourself in respect that this is the word of God delivered unto you for your own selves. The more you receive, be the more thankful. The more you be in the strength of God, the more use you the pureness of humility.

You called for Wisdom, and God hath opened unto you his Judgement. He hath delivered unto you the keys that you may enter. But be humble. Enter not of presumption, but of permission. Go not in rashly, but be brought in willingly. For many have ascended, but few have entered. Therefore be diligent that you may enter in, not as spoilers, but as such as deserve entertainment in the name and through the power of the Highest. For great are the mercies of God unto such as have faith.

§2. *Deal not with Wicked Spirits.*

As long as thou dealest with wicked spirits, the Lord will keep back his hands and thou keepest back the Lord. If thou wilt be the minister of God, if thou wilt go forward in His work, if thou wilt see the happy times that are to come, thou must abstain from evil. Thou must sweep thy house clean. Thou must put on thy best garments and must become humble and meek.

Let not thy life be a scandle to the will of the Lord, and to the greatness of his works. For the power that is within thy soul is of great force and the ability to perform those things that proceed with power. This is the cause that the wicked ones

obey thee, for they fear themselves when they see the seal of thy Creation. Remember that there is a continual fight between us and Satan, wherein we vanquish by patience. The Devil is the father of carping, so doth he subtly infect the Seer's imagination, mingling imperfect forms with my utterance. Water is not received without air, neither the word of God without blasphemous insinuation. The son of God never did convert all, neither did all that did hear him, believe. Therefore, where the power of God is, is also Satan.

§3. *Concerning the Book, Vestments, & Days.*

¶ The book consisteth first of the invocation of the names of God, and second of the invocation of the Angels, by the names of God. Their offices are manifest. ¶ Four days after your book is made, you must only call upon those names of God or of the God of Hosts, in those names. And 14 days after, you shall (in some convenient place) call the Angels by petition and by the name of God unto which they are obedient. ¶ On the fifteenth day, you shall cloth yourselves in vestures made of white linen and so have the apparition, use, and practice of the Creatures. ¶ For this Art is not a labour of years, nor many days.

§4. *Conclusion.*

¶ Thus hath God kept promise with you, and hath delivered you the keys to his storehouses, wherein you shall find (if you enter wisely, humbly, and patiently) treasures worth more than the frames of the heavens. Therefore, examine your books. Confer one place with another, and learn to be perfect for the practice and entrance.

¶ Thinkest thou that we speak anything that is not true? Then thou shalt never know the mysteries of all the things that have been spoken. If you love together and dwell together, and in one God, then God will be merciful unto you, bless you, comfort you, and strengthen you unto the end. More would I say but words profit not. God be amongst you.

BOOK TWO

THE MYSTICAL HEPTARCHY

OF THE DIVINE CREATION ITSELF
TO BE READ BY THE FAITHFUL

CHAPTER I.

OF THE TITLE & GENERAL CONTENTS
OF THIS BOOK WITH SOME
NEEDFUL TESTIMONIES

PRINCE BRALGES

BWARE OF WAVERING AND BLOT OUT SUSPICION, for we are God's creatures that have reigned, do reign, and shall reign forever. Behold, our mysteries shall be known unto you, preserving the secrets of Him that reigneth forever and whose name is great forever.

KING CARMARA

Open your eyes and you shall see from the highest to the lowest and the peace of God shall be upon you. Come, gradually we repeat the work of God. There is one God and one are his works.

DEE

Note that this Book of Creation speaks firstly of the mighty works of God and secondly of the kings that perform these great works. Very many came upon the curved surface of the transparent globe and said: *We are prepared to serve our God.*

KING CARMARA

This work shall have relation to time present and present use, to mysteries far exceeding it, and finally to a purpose and intent whereby the majesty and name of God shall and may, and, of

force, must appear with the apparition of his wonders and marvels yet unheard of. So say I.

DEE

¶ As Michaël and Uriel at the beginning of these revealed mysteries were present and gave authority to Carmara to order the whole Heptarchical Revelation; so at the conclusion, they appeared again, and Raphael with them; and Michaël concluded the second book of this particular revelation Heptarchical with these words following:

MICHAËL

¶ Merciful is our God and glorious is his name, which chooseth his creatures according to his own secret judgement. This Art is the first part of a threefold Art joining Man with the knowledge of the world, the government of his creatures, and the sight of his majesty. This is (O I say unto you) that which is strength, medicine, and mercy to those that fear him. Amen.

KING CARMARA

¶ Thou hast a work of three proportions in essence, and of seven in form, which is (of itself) divided by a number sevenfold: of the course, estate, and determination of things above, things near, and things below, which of itself, is pure, perfect, and without blemish. ¶ Oh God, how easy is this first understanding! Thou hast been told perfectly, plainly, and absolutely, not only of the condition, dignities, and estate of all things that God hath framed, but also, thou wast delivered the most perfect form and use of them. ¶ Even as God is just, His judgements true, His mercies unspeakable, so are we the true messengers of God.

MICHAËL

¶ Now you touch the world and the doings upon Earth. Now we show unto you the lower world and the governors that work and rule under God. By them you will have power to work such things as shall be to God's glory, and the profit of your country and the knowledge of his Creatures. They proceed from

one God, one knowledge, and one operation. Come, my sons, behold these tables. Herein lie the names, that work under God upon the earth, not of the wicked, but of the Angels of light. The whole government doth consist in the hands of 49, (in God his Power, Strength, Mercy, and Justice) whose names are here evident, excellent, and glorious. Mark these tables, mark them, record them to your comfort. This is the first knowledge. Herein shall you find wisdom. Halleluiah. Mighty and Omnipotent art thou, O God, God, God, amongst thy creatures. Thou fillest all things with thy excellent foresight. Thy glory be amongst us forever. Amen.

URIEL

☩ The fountain of wisdom is opened. Nature shall be known. The earth with her secrets shall be disclosed. The elements with their power shall be divulged.

☩ Behold, I teach! There are 49 Angels, glorious and excellent, appointed for the government of all earthly actions. These 49 do work and dispose the will of the Creator, being limited from the beginning in strength, power, and glory. These shall be subject unto you, in the name and by invoking upon the name of God, who doth lighten, dispose, and comfort you.

RING CARMARA

☩ What doth heaven behold or the earth contain that is not or may be subdued, formed, and made by these? What learning grounded upon wisdom with the excellencies in nature cannot they manifest?

☩ One in Heaven they know.

☩ One & all in Man they know.

☩ One & all in Earth they know.

☩ Measure Heaven by a part (my meaning is by those few). Let God be glorified, his name praised, for his creation will be taken and his creatures well used.

Bu

URIEL

¶ He that standeth in the midst of the globe signifieth Nature. Whereupon, in the first point, is the use and practice of this work. That is to say, concerning the first part, for it is said: The book containeth three kinds of knowledge:

- ¶ The knowledge of God truly.
- ¶ The number & doings of His Angels perfectly.
- ¶ The beginning & ending of Nature substantially.

CHAPTER II
OF JOHN DEE & HIS INTEREST TO
EXERCISE THE DOCTRINE HEPTARCHICAL

URIEL

HIS, YOUR ERA, IS THE LAST AGE, WHICH WILL BE revealed unto you. The mysteries of God have a time. The Sons of Light and their Sons are subject unto my commandment. This is a mystery. I have spoken of it; note it thoroughly. They are my servants. By them thou shalt work marvels.

PRINCE HAGONEL

There are kings false and unjust, whose power I have subverted and destroyed. So shalt thou.

The second assembly were the governors of the Earth, whose glory (if they be good) the weapons we have taught thee will augment, and, consequently (if they be evil) will pervert.

PRINCE BORNOGO

I am Bornogo. What thou desirest shall be fulfilled. Glory to God.

PRINCE BEFATES

Behold, Behold, Lo Behold, my mighty power consisteth in this. Learn wisdom by my words. This is wrought for thy erudition, what I instruct thee from God. Look to thy charge truly. Thou art yet dead. Thou shalt be revived. But Oh, bless God truly. The blessing that God giveth me I will bestow upon thee by permission. O how mighty is our God, which walked on the waters, which sealed me with His name, whose glory is without end. Thou hast written me, but yet dost not know me. Use me,

in the Name of God; I shall, at the time appointed, be ready. I will manifest the works of the seas and the miracles of the deep shall be known.

KING CARMARA

Behold, thou desirest and art sick with desire. I am the disposer though not the composer of God's medicines. Thou desirest to be comforted and strengthened in thy labours. I minister unto thee the Strength of God. What I say is not of myself. Neither that which is said to me, is of themselves; but is said of Him which liveth forever. These mysteries hath God lastly, and of His great mercies granted unto thee. I have answered thy doubting mind. Thou shalt be gluried, yea filled, yea thou shalt swell and be puffed up with the perfect knowledge of God's mysteries in His mercies. Abuse them not. Be faithful; use mercy. God shall enrich thee. Banish Wrath—it was the first and the greatest commandment. I reign by Him and live by Him which reigneth and liveth forever.

I have showed thee perfectly. Behold I teach again. O how merciful is God, that revealeth such great secrets to flesh and blood! Thou has 42 letters. Thy tables last, contain so many.

When thou wilt work for anything pertaining to the estate of a good king, thou must first call upon him which is their prince. Secondly, the ministers of his power are six.

In outward sense my words are true. I speak now of the use of one of the first that I speak of, or manifested yesterday. Said I not and showed I not the Government of princes, for as it is a mystery to a further matter, so it is a purpose to a present use. If it rules worldly princes, how much more shall it work with the Princes of Creation? Thou desirest use; I teach thee use. And yet the Art is to the further understanding of all sciences that are past, present, and yet to come. Fruits hath further virtue, but only in the eating. Gold has further condition, property and quality, than in melting or in common use. Kings

there are in Nature, with Nature, and above Nature. Thou art dignified in this knowledge.

¶ Last of all, thy ring, which was appointed thee, with the lamen comprehending the form of thy own name, which is to be made in perfect gold, as is aforesaid.

¶ Thou shalt be comforted. But respect the world, whereunto thou art provided; and for what end; and that in what time. Serve God truly; serve Him justly. Great care is to be had with those that meddle with Prince's affairs. Much more consideration with whom thou shalt meddle or use any practice. But God hath shadowed thee from destruction. He preserveth His faithful, and shaddoweth the just with a shield of honour. None shall enter into the knowledge of these mysteries with thee, but this worker*. Thy estate with the Prince (now reigning)† shall shortly be amended, her favour increased, with the good will of diverse that are now deceivers. Thy hand shall shortly be their help; and thou shalt do wonderful and many benefits (to the augmenting of God's Glory) for thy country. Finally, God doth enrich thee with knowledge and of thyself hath given thee understanding of these worldly vanities. He is merciful and his good creatures neither have, do, nor will forget thee. God bless you both; whose Mercy, Goodness, and Grace I pronounce and utter upon you.

KING BOBOGEL

¶ I have said: *Dee, Dee, Dee* at length, but not too late‡.

KING CARMARA

¶ Lo, thus thou seest the glory of God's creatures; whom thou mayest use with the consideration of the day, their King, their Prince and his Character. The King and Prince govern for the whole day; the rest according to the sixth part of the day. Use

* *i. e.* Kelly

† *i. e.* Queen Elizabeth

‡ Dee's note: King Bobogel said this of my attaining to such mysteries as the ministers under him made show of.

them to the glory, praise, and honour of Him which created them, to the laude and praise of His Majesty.

KING BYNEFOR

✠ Write this reverently. Note it with submission. What I speak hath not been revealed; no not in the last times of the second last world. Thou shalt work marvels marvelously by my workmanship in the highest.

KING BNASPOL

✠ Unto my Prince (my subject) are delivered the keys of the mysteries of the Earth. All those are Angels that govern under him. Use them; they are and shall be at thy commandment.

KING BNASPEN

✠ By me thou shalt cast out the power of wicked spirits. By me thou shalt know the doings and practices of evil men, and more than may be spoken or uttered to man.

KING CARMARA

✠ Oh, how great is the sickness and corruption of man who barely has faith in God or in His good Angels? You maketh all the earthly things that have the corruption of the earth within them. Our God, our God, He is our God. It is true we are His Angels and it is also true that we are His servants. I ask for that power. I speak, and that which I speak is the shadow of truth, justice, and perfection.

☞ BEHOLD: (Holding up the measuring rod.)

☞ HERE: (Pointing to the end of the rod.)

☞ AND HERE: (Pointing to the middle of it.)

✠ I bear a power and virtue that is beyond measure. Nothing is obscure which is received through him. ✠ One thing is yet wanting; a meet receptacle. There is yet wanting a stone. One there is most excellent; hid in the secret part of the depths in the uttermost part of the Roman possession. Lo, the right hand of God is upon thee. Thou shalt prevail with it, with Kings and with all Creatures of the world; whose beauty (in virtue) shall be

more worth than the Kingdoms of the Earth. Go towards it and take it up. Keep it secret. Let no mortal hand touch it but thine own.

IL

¶ Thy character must have the names of the six angels (written in the midst of the Sigillum Æmeth) graven upon the other side in a circle, in the midst where must the stone be (which was also brought). Wherein thou shalt at all times behold (privately to thyself) the state of God's people, through the whole world.

RAPHIÆL

¶ Go and thou shalt receive. Tarry and thou shalt receive. Sleep and thou shalt see. But watch, and thine eyes shall be fully opened. One thing which is the ground and element of thy desire is already perfected. Out of seven thou hast been instructed (of the lesser part) most perfectly. ¶ All those before spoken of are subject to thy call. Of friendship at any time thou mayest see them and know what thou wilt. Every one (to be short) shall at all times and seasons, show thee direction in anything. ¶ One thing, I answer thee for all offices. Thou hast in subjection all offices. Use them when it pleaseth thee and as thy instruction hath been.

URIEL

¶ The Lord saith: *I have hardened the heart of one of you. Yea, I have hardened him, as the flint, and burnt him together with the ashes of a cedar, to the intent he may be proved just in my work, and great the strength of my glory. Neither shall his mind consent to the wickedness of iniquity, for from iniquity I have chosen him to be a first earthly witness of my dignity.**

DEE

¶ Uriel came in again and another with him and jointly they did say together: *Glorify God forever.* And now Uriel stood behind and the other sat down in the chair with a sword in his right hand. All his head glittered like the sun; the hair of his head was

* Apparently Uriel is refering to Kelly.

long. He had wings and all his lower parts seemed to be with feathers. He had a robe over his body and a great light in his left hand. He said: *We are blessed from the beginning and blessed be the name of God forever†.*

¶ An innumerable company of angels were about him. And Uriel didst lean on the square table. Then he that sat on the chair said to them:

Go forward, God hath blessed thee.

I will be thy Guide.

Thou shalt attain unto thy Searching,

The world begins with thy doings.

Praise God.

*The Angels under my power shall be
at thy commandment.*

Thou shalt see me.

I will be seen of thee.

I will direct thy Living & Conversation.

¶ Now Michael thrust out his right Arm with the sword. I bade the Skryer to look. Then the sword did seem to cleave in two. And a great fire flamed out of it vehemently. Then he took a ring out of the flames of his sword and gave it to Uriel and said: *The Strength of God is unspeakable. Praise be to God for ever & ever.* And Uriel did make curtsy to him. Then Michael did say the following:

MICHAEL

¶ After this sort must be the ring. Note it. I will reveal thee this ring, which was never revealed since the death of Solomon, with whom I was present. I was present with him in strength and mercy. Lo, this it is. This it is wherewith all miracles and divine works and wonders were wrought by Solomon. This it is which I have revealed unto thee. This it is which Philosophie dreameth of. This it is which the Angels scarce know. This it

† Dee's note: This was Michael and his manner of apparition.

is and blessed by his name, yea his name be blessed forever. There are kings false and unjust, whose power thou mayest subvert & destroy.

DEE

Then he laid the ring down upon the Table and said: Note. I noted the manner of the ring in all points. After that he threw the ring down upon the table and it seemed to fall through the table. And then he said the following:

MICHÆL

So shall it do at thy commandments. Without this ring thou shalt do nothing. Blessed be his Name that compasseth all things. Wonders are in him and his Name is wonderful. His Name worketh wonders from generation to generation.

DEE

Then Michæl brought in the seal which he showed the other day and opened his sword and had the Skryer read. And he read AEMETH. Then the sword closed up again and Michæl said the following:

MICHÆL

This I do open unto thee because thou marvest at the Sigil of God. This is the name of the Seal which be blessed forever. This is the seal itself. This is holy. This is pure. This is forever. Amen. As truly as I was with Solomon, so truly will I be with thee. I was with Solomon in all his works and wonders. Use me, in the Name of God, for all occasions.

THE SIGIL OF ÆMETH

CHAPTER IIJ
SOME REMEMBRANCES OF THE FURNITURE
& CIRCUMSTANCES NECESSARY IN THE
EXERCISE HEPTARCHICAL

KING CARMARA

FIRST CAST THINE EYES UNTO THE GENERAL PRINCE Governor or Angel that is principal in this world. Then place my name that thou hast already. Then the name of him that was showed thee yesterday (with the short coat*). Then his power, with the rest of his six perfect ministers. With these three thou shalt work to a good end. All the rest thou may use to God's glory for every one of them shall minister to thy necessities. ¶ Moreover, when thou invokest, thy feet must be placed upon these tables which thou seest written last, comprehending 42 letters and names. But with this consideration: that the character (which is the first of the 7 in the former book) be placed upon the top of the table, which thou wast and art and shall be commanded to have and use. ¶ Last of all the ring which was appointed thee, with the lamen comprehending the form of thy own name; which is to be made in perfect gold as is aforesaid.

¶ Even as God is just, his judgements true, his mercies unspeakable; so are we the true messengers of God and our words are true in His mercy forever. Glory, Oh Glory be to thou, Oh most high God. ¶ Lo, thus thou seest the Glory of God's creatures; whom thou mayest use with the consideration of the day, their

* Prince Hagonel

King, their Prince, and his character. The King and Prince govern for the whole day; the rest according to the six parts of the day. Use them to the glory, praise, and honour of Him, which created them, to the laude and praise of His majesty. The characters of the Kings are in the Globe; and the characters of the Princes are in the Heptagon.

PRINCE HAGONEL

☞ The Sons of Light and their Sons are subject to my commandment. This is a mystery. I have spoken of it. Note it thoroughly. They are my servants. By them thou shalt work marvels. My time is yet to come. The operations of the earth are subject to my power. I am the first of twelve. My seal is called 'Barces' & here it is. In his name with my name by my character and the rest of my ministers are these things brought to pass.

☞ These that lie here are Witches, Enchanters, Deceivers, and Blasphemers. And finally all they that offer Nature with abuse and dishonour Him which reigneth forever. ☞ The second assembly were the governors of the earth, whose glory, if they be good, the weapons which we have brought thee will augment, and consequently (if they be evil) will pervert. ☞ The third assembly are those which taste of God's mysteries and drink of the juice of Nature, and whose minds are divided, some with eyes looking towards heaven, the rest to the center of the earth. Where God's glory is not, there neither are the good, nor goodness.

☞ It is wrought (I say) it is wrought (for thy understanding) by the seven of the seven, which were the sons of aternity, whose names thou hast written and recorded to God's glory.

PRINCE BUTMONO

☞ Mark this*: All spirits inhabiting within the earth where their habitation is of force, not of will, are subject to the power here

* Dee's note: Prince Butmono said this, but the office is under King Bnaspol, whose Prince is Blisdon. The mystery of this I know not yet, for Blisdon will be found to be the proper minister of King Bnaspol.

within my seal: with this you shall govern; with this you shall unlock; with this (in his Name who reigneth) you shall discover the entrance.

KING CARMARA

Secondly, the ministers of his power are six, whose names contain seven letters apiece. So thy tables do manifest. By whom in generality, or by any one of them in particularity, thou shalt work for any intent or purpose. As concerning the letters particularly, they do concern the names of 42, which 42 in generally, or one of them, do and can work the destruction, hinderance, or annoyance of the estate, condition, or degree (as well for a body of government) of any wicked or ill-living prince.

Venito Bobogel, Rex et Princeps Nobilitatis; Venito cum Ministris; Venito (inquam) venito cum Satellitibus tuis, minutus†.

[Come Bobogel, Noble Prince & King. Come with your ministers. Come, yea, come with your satellites.]

KING BOBOGEL

*Veni Principes & Principum, qui sunt Aquarum Principes; Ego sum Rex Potens et mirabilis in Aquis; cuius potestas est aquarum viceribus.**

[Come, O thou who are Princes of the waters. I am the King, powerful and wonderous in the waters, whose power is over the waters.]

KING CARMARA

Venito veni (inquam) Adepto. Veni Rex. O Rex, Rex, Rex Aquarum. Venito, Venito, (inquam). Magna est tua. Major autem mea potestas. Vitam dedit Deum omnibus creaturis.

[Come, I say, come at this time. Come, O King, King, King of the waters. Your power is great but my power is greater. God gave life to all creatures.]

KING CARMARA

Veni Ignis, Veni vita mortalium (inquam) ventio. Adesdum. Regnat Deus, O Venite. Nam unus illo. Regnat, et est vita viventium.

† Dee's note: This I note for the form of calling.

* Dee's note: This is King Bobogel's call to his Prince.

[Come, O fire, which is the life of all mortal things. Come at this time. God Reigns. O come, for he is one. He reigns and is the life of all living things.]

KING CARMARA

¶ *Venite, ubi nulla quies sed stridor dentium. Venite vos, qui sub meæ estis potestate.*

[Come, where there is nothing of him but the gnashing of teeth. Come, all of you who are under my power.]

¶ Behold, every one of these princes must have his peculiar table.

URIEL

¶ Thy character must have the names of the seven Angels (written in the midst of the Sigil of Æmeth) graven upon the other side in a circle. In the midst whereof must the stone be, which was also brought, wherein thou shalt at all times behold (private to thyself) the state of God's people through the whole earth.

¶ The four feet of the table must have 4 hollow things of sweet wood, whereupon they must stand. Within the hollow spheres thy seals may be kept unperished. One month is all for the use thereof. The silks must be of diverse colours, the most changeable that can be gotten, for who is able to behold the Glory of the Seat of God?

DEE

¶ The character or lamen for me was noted that it should contain some token of my name. And now in this accounted the true character of dignification, I perceive no peculiar mark or letters of my name.

URIEL

¶ The form in every corner considereth your name.

DEE

¶ You mean there to be a certain shadow of Delta†?

URIEL

¶ Well.

† Dee used a delta (triangle) to represent his name.

DEE

¶ What is the use of these tables ? From what ground are they framed or divided ?

URIEL

¶ They are the ensignias of the creation wherewith all they were created by God: known only by their acquaintance and the manner of their doings.

DEE

¶ Have I rightly applied the days to the Kings ?

URIEL

¶ The days are rightly applied to the Kings.

DEE

¶ The characters and words, annexed to the Kings' names in the outer circumference of the great circle or globe: how are they to be used ?

URIEL

¶ They are to be painted on sweet wood and so to be held in thy hand as thou shalt have cause to use them.

IL*

¶ The Sigil of Æmeth is to be set in the middle of the table.
 ¶ Grace, Mercy, and Peace be unto the lively branches of his flourishing kingdoms. And strong art thou in their glory which dost unknot the secret part of thy lively workmanship; and that before the weak understanding of men. Herein is thy power and magnificence opened unto Man. And why ? Because thy divinity and secret power is here shut up in the third and fourth number; from the first and fundamental is of all your most holy works. For if thou (O God) be wonderful and incomprehensible in thine own substance, it must needs follow that thy works are likewise incomprehensible. But lo, they shall now believe, because they see that which heretofore they could scarcely believe. Strong is

* Dee's note: IL is the first of the seven Sons of Light. IL is the always adherent minister to King Baligon and his name is expressed in his character.

the influence of thy supercelestial power, and mighty is the force of thy arm which overcometh all things. Let all power therefore rest in thee. Amen.

✠ Leave out the letter 'B' of the seven names of the Kings and seven princes and place them in a table divided by 12 and 7, the seven spaces being uppermost. And therein write in the upper line, the letters of the King, with the letters of his prince following just after his name. And so of the six others and their princes. And read them on the right hand, from the upper part to the lowest. And thou shalt find, then, the composition of this table.

✠ Therein they are all comprehended, saving certain letters which are not to be put in here. By reason that the Kings and Princes do spring from God, and not God from the Kings and Princes. Which excellency is comprehended and is also manifest in that third and fourth number round about the sides (of this square table) is every letter of the 14 names of the seven kings and princes.

✠ Hereafter shall you perceive that the glory of this table surmounteth the glory of the sun. All things also that appertain unto it are already proscribed by your former instruction.

✠ God is the beginning of all things, but not after one sort, nor to every one alike. But there are three manners of working with His name: ☿ 1: in respect of dignification; ♀ 2: in respect of conciliation; ☿ 3: in respect to the end & determined operation.

✠ Now as to what and would you wear your characters, &c. But how do I teach? The character is an instrument applicable only to dignification. But there is no dignification but that which doth proceed and hath his perfect composition centrally in the square number of 3 & 4, the center whereof and shall be equal to the greatest. Hereby you may gather not only to what end, the blessed character (wherewith thou shalt be dignified) is prepared, but also the name of all other characters.

✠ The table is the instrument of conciliation, and so are proper to every King and Prince, according to their order.

¶ Now as to the last, concerning the end and determination. It only consisteth in the mercy of God and the characters of these books. Set down the Kings and their Princes in a table, as thou knowest them, with their letters backward (excepting their "B's") from the right hand to the left. Let Bobogel be the first and Bornogo his prince, &c.†

DEE

¶ So on my character or lamen of dignification are all the names of the seven kings and all the seven princes, perfect as in the great table, the "B's" only being the first letter common to them all, kept back, but in memory.

MICHAEL

¶ I will now speak concerning the Sigil of Æmeth, called also the Sigil of God. I will show thee in the mighty hand and strength of God, what His mysteries are, the true circle of Æternity, comprehending all virtue, the whole and sacred trinity. Oh holy be he; Oh holy be he; Oh holy be he. Amen. ¶ Now what wilt thou?

DEE

¶ I would full fain proceed according to the matter in hand.

MICHAEL

¶ Divide this outward circle into 40 equal parts, whose greatest numbers are four. See that thou do it presently.

DEE

¶ I did so dividing it first into four parts and then every one of them by ten. ¶ Michael then called out by name *Semi-el*. One came in and knelt down and great fire came out of his mouth.

MICHAEL

¶ To this one named *Semi-el*, are the mysteries of this table known. ¶ Oh God, thou hast said and thou livest forever.

† Dee's note: It may appear that Butmono is Prince to Bynepor and Blidon Prince to King Buaspel.

DEE

¶ Semiel then stood up, and flaming fire came out of his mouth and then he said as followeth: *Mighty lord: what wouldst thou with the tables?*

MICHAEL

¶ It is the will of God that thou fetch them hither.

SEMIEL

¶ I am his tables. Behold, these are his tables. Lo, where they are.

DEE

¶ There came in 40 white creatures, all in white silk long robes, and they were like children. And all of them, falling on their knees, said: *Thou only art holy among the highest. Oh God, thy Name be blessed forever.*

¶ Michael then stood up out of his chair and, by & by, all his legs seemed to be like two pillars of brass, and he was as high as half-way up to heaven. And, by and by, his sword was all on fire. And he shook and drew his sword over the heads of all these 40 and they fell down. Then Michael spake to Semiel with a thundering voice:

MICHAEL

¶ Declare the mysteries of the Living God; our God; of One that liveth forever!

SEMIEL

¶ I am ready.

DEE

¶ Michael shook over them with his sword and they all fell down (and Uriel also) on their knees. And commonly at the striking with the sword, flaming fire like lightning, did flash.

MICHAEL

¶ Note: Here is a mystery.

DEE

¶ Then stept forth one of the 40 from the rest and opened his breast, which was covered with silk, and there appeared on it a

great 'T' all of gold. And over the 'T' stood the number '4'. The
40 all cried: *It liveth and multiplieth forever; blessed be his Name.*
Then that creature did shut up his bosom and vanished away
like fire.

MICHAEL

Place that in the first place. It is the name of God.

DEE

Then there seemed a great clap of Thunder*. . . The chair was
brought in again and I asked what it meant.

URIEL

This is a seat of perfection, from which things shall be showed
unto thee, which thou hast long desired.

DEE

Then was a square table brought into the stone and I demanded
what that table betokened.

URIEL

A mystery not yet to be known. These two shall remain in
the same stone to the sight of all undefiled creatures. You must
use a four-square table, two cubits square, whereupon must be
set the Sigil of God. This seal is not to be looked upon without
great reverence and devotion. This seal is to be made of perfect
wax. The seal must be 9 inches in diameter. The roundness must
be 27 inches or somewhat more. The thickness of it must be an
inch and a half to an inch and a quarter. And a figure of a cross
must be on the backside of it made thus:

* Dee's note: And so forth. And note that the whole second book is
nothing else but the Mysteries most marvelous of the Sigil of God, sometimes
called the Sigil of Aemeth, wherein here I did leave but a little excerpt. Note
further that almost all the third book was of the seven ensignias of creation
whereof mention was before made.

¶ The table is to be made of sweet wood and of two cubits high, with four feet with four of the former seals under the four feet.

¶ Under the table did seem to be laid red silks two yards square. And over the seal did seem likewise red silk to lie four square, broader than the table, hanging down with four tassels at the four corners thereof. Upon this uppermost red silk did seem the stone with the frame to be set, right over and upon the principal seals, saving that the red silk was between the one and the other.

¶ There appeared the first table covered with a cloth of silk of changeable colour, red and green, with a white cloth under it hanging very low.

CHAPTER IV
SOME NOTICE OF THE PECULIAR FORMS & ATTIRE
WHEREIN THE KINGS, PRINCES
& MINISTERS HEPTARCHICAL APPEARED
& SOME OF THEIR ACTIONS
& GESTURES AT THEIR APPEARANCE

KING CARMARA

HIS KING (BEING CALLED FIRST BY URIEL) APPEARED as a man, very well proportioned and clad in a long purple robe with a triple crown of gold upon his head.

At his first coming he had seven spirits (like men) waiting on him, which afterwards declared themselves to be the seven Princes Heptarchical.

Uriel delivered unto this King (at his first appearing) a rod, or straight little round staff of gold, divided into three equal distinctions, whereof two were dark or black and the third bright red. This rod he kept still in his hand.

This king only was the orderer or disposer of all the doctrine, which I term Heptarchical, and the first practitioner thereof, calling the seven Princes and after that the seven Kings, and and by giving instruction for use and practice of the whole doctrine Heptarchical. For the first purpose and fruit to be enjoyed by me, of the two other, there was only mention made.

King CARMARA said: *This is the sign of the work* and there appeared the letters 'C' and 'B' reversed on a white flag with a woman standing by, whose arms did not appear. On the other

side of the flag appeared the coat of arms of England as on the old flag:

PRINCE HAGONEL

¶ Note that all the Princes seemed to be men, and to have red robes, but this Prince had a robe that was shorter than the others.

¶ All the princes had circlets of gold on their heads rather than crowns or coronets. This Prince held in the palm of his right hand a round ring with a point or prick in the midst, hanging also over his middle fingers, which he affirmed to be his seal and said that the name of it was Barces:

¶ All the princes held up together a seven-pointed star that seemed to be of copper:

THE SUBJECTS AND SERVANTS TO PRINCE HAGONEL

¶ The Sons of Light and their Sons are said to be subject unto the commandment of HAGONEL and are his servants. Their names are all given in the sigil of Æmeth:

The Seven Sons of Light:

- | | |
|---------|------------|
| 1. I | 5. HECO A |
| 2. IH | 6. BEIGIA |
| 3. ISR | 7. STIMCUL |
| 4. DMAL | |

The Seven Sons of the Sons:

- | | |
|------------|------------|
| 1. E or IL | 5. ROCLE |
| 2. AN | 6. HAGONEL |
| 3. AVE | 7. ILEMESE |
| 4. LIBA | |

THE SONS OF LIGHT

✠The seven Sons of Light appeared like seven young men, all with bright countenance, apparelled in white, with white silk on their heads. Every one seemed to have a metallic ball in his hand, the first of gold, the second of silver, the third of copper, the fourth of tin, the fifth of iron, the sixth tossed between his two hands a round thing of quicksilver, the last had a ball of lead. The first had on his breast a round tablet of gold and on it written a great 'I'. And the second, on his golden tablet, had his name also written. And every one orderly coming forth, showed their names upon their golden tablets. At their departing they made curtsy and mounted up to Heaven.

THE SONS OF THE SONS OF LIGHT

✠The Sons of the Sons of Light appeared like seven little children, like boys covered all with purple, with hanging sleeves, like the sleeves on priests' or scholars' gowns. Their heads were attired all after the former manner with purple silk. They had three-cornered tablets on their breasts, and these tablets seemed to be very green and on them the letters of their names were written. The first had two letters made thus of an 'E' and an 'L' or 'E-L'. They made reverences to Michæl (who had called them) and so mounted up to heavenwards.

THE 42 MINISTERS OF PRINCE HAGONEL

✠At the call of King CARMARA (during the second handling of this Heptarchical doctrine), when he said *Come, repeat the works of God*, there appeared Prince HAGONEL, and after that followed 42, who said *We are prepared to serve our God*. Each of these

had somewhat in their hands as they stood in this order, and Hagonel seemed to embrace the company:

¶ Six of these seemed more glorious than the rest and their coats were longer; they had circlets of gold around their heads and held in their hands perfect crowns of gold. The second six had three quarters of crowns in their hands. The third six had robes or clothes in their hands. All the rest seemed to have balls of gold, which they tossed from one to another, but at the catching they seemed empty windballs, for they grasped them by closing their hands, as if they were not solid but empty like a blown bladder. The first six made curtsy to Prince HAGONEL, the second six made curtsy to the first, and the third to the second. And they all, with Prince HAGONEL, made curtsy to King CARMARA.

¶ Each of the 42 stood upon a table, and upon every table was but a single letter. The first minister of the first six did go away and in his table appeared the letter 'O' and so of the rest. But the third six cowered down and was loath to show their tables, but at length did. The third row went off, lamenting, being commanded by the Prince. All departed in fire, falling into the globe. The fifth row, too, did sink into the Globe, every one in a sundry fire by himself. The sixth row fell with smoke down into the globe. Thus was revealed the following table:

O	E	S	N	G	L	E
A	V	Z	N	I	L	N
Y	L	L	M	A	F	S
N	R	S	O	G	O	O
N	R	R	C	P	R	N
L	A	B	D	G	R	E

King CARMARA said: Remember how they stood when they were secondly disposed unto thee. They stood first in six rows, and next they were turned into seven. I speak of the greater number and not of the lesser, for in speaking of the greater I have comprehended the lesser*.

*Dee's note: There are but 6 names that are in subjection to the Prince. The first seven next him are these which held the fair and beautiful crowns. The first seven are called by those names that thou seest: Oes . . . &c.
This diversity of reckoning by 6 and 7, I cannot yet reconcile.

THE SEAL OF AVE*

KING BOBOGEL

§ He appeared in a black velvet coat; and his hose was close round hose with velvet upperstocks, overlayed with gold lace. On his head was a velvet hat or cap with a black feather in it. A cape was hanging on one of his shoulders, and his purse was hanging about his neck. Hung upon his girdle was a rapier. His beard was long, and he had bloomers and slippers. And he said, *I wear these robes not in respect of myself, but of my Government.*†

PRINCE BONORGO

§ He appeared in a red robe with a gold circlet on his head; he shewed his seal and said : *This it is.*

THE 42 MINISTERS

§ Seven of the ministers are apparelled like BOBOGEL the king; sagely and gravely; all the rest are almost ruffian or boisterous. Some are like to be men and women; for in the forepart they seemed women, and in the back part men, by their apparel. And they were the last 7. They danced, leapt, and kissed. They came afterwards into a circle, the sage and the rest; but the sages

* A seal for each of the Sons of the Sons of Light appears at the top margin of each page where the description of each set of King, Prince and 42 Ministers begins.

† The above described robes would have been considered extremely rich and elegant in Dee's time.

stood all together. The first of the sages lifted up his hand aloft and said: *Let us follow the Will of God; Our God is truly Noble and Eternal.* He plucked up his right foot and under it appeared an 'L'. And the rest in like manner appeared their letters or names.

1. The first seven grew all together in a flame of fire and so sunk down into the transparent fiery globe of the new world.
2. The second seven fell down like dross of Metal.
3. The third seven clasped together and fell down in a thick smoke.
4. The fourth seven joined together and vanished like drops of water.
5. The fifth seven fell down like a storm of hail.
6. The last vanished away.

At another time, they came (being called by King CARMARA) all 42 bringing a round table over their heads flat-wise; and they laid it down and stood about it the letters being as before.

L	E	E	N	A	R	B
L	N	A	N	A	E	B
R	O	E	M	N	A	B
L	E	A	O	R	I	B
N	E	I	C	I	A	B
A	O	I	D	I	A	B

THE SEAL OF LIBA

KING BABALEL

He appeared with a crown of gold on his head; with a long robe whitish of colour; his left arm's sleeve was very white; and his right arm sleeve was black. He seemed to stand upon water. His name was written on his forehead: BABALEL.

PRINCE BEFAFES

Prince Befafes appeared in a long red robe, with a circlet of gold on his head. He had a golden girdle, and on it was written BEFAFES. He opened his bosom and appeared lean; and seemed to have feathers under his robes. His seal or character was thus:

THE 42 MINISTERS

Of his 42 ministers, the first seven had circlets of gold on their heads, and the King BABALEL called Befafes saying: *Come Prince of the Seven Princes, who are Princes over the waters.* Every one of the 42 had a letter on his forehead. They were seven in a row; and six downward. But of the first seven, the letters became to be between their feet; and the water seemeth continually to pass over these letters. The first seven took the water and threw it upwards and it became clouds. The second threw it upwards and it became snow, &c. The 42 dived into the water and so vanished away. And BABALEL and Befafes also were suddenly gone. Their names and characters appeared to be these, which follow in the squares.

E	I	L	O	M	F	O
N	E	O	T	P	T	A
S	A	G	A	C	I	Y
O	N	E	D	P	O	N
N	O	O	N	M	A	N
E	T	E	V	L	G	L

THE SEAL OF ROCLE

KING BYNEPOR

King BYNEPOR appeared as a King, with his Prince next after him; and after the prince, 42 ministers.

PRINCE BUTMONO

Prince Butmono appeared in a red robe, with a golden circle on his head. His seal is this:

THE 42 MINISTERS

They appeared like Ghosts and Smokes without all form, having every one of them a little glittering spark of fire in the midst of them. The first seven are red as blood. The second seven are not so red. The third seven are like whitish smoke. These three sevens had the sparks greater than the rest. The fourth, fifth, and sixth seven are of diverse colors. All had a fiery spark in their middle. Every spark had a letter in it as followeth:

B	B	A	R	N	F	L
B	B	A	I	G	A	O
B	B	A	L	P	A	E
B	B	A	N	I	F	G
B	B	O	S	N	I	A
B	B	A	S	N	O	D

THE SEAL OF AN

KING BNASPOL

King BNASPOL appeared in a red robe, and a crown on his head. His prince followed him and after him his ministers.

PRINCE BLISDON

Prince Blisdon appeared in a robe of many colours and on his head a circlet of gold.* This is his character or seal:

THE 42 MINISTERS

The 42 seemed to stand about in a little hill round. The hill was of clay. Behind this company seemed to stand an innumerable multitude of ugly people, afar off. Those which stood afar off are spirits of perdition, which keep the earth with her treasures for him, &c. These which seem to stand about the little hill seemed to have in the palms of their hands, letters in order, as here followeth:

E	L	G	N	S	E	B
N	L	I	N	Z	V	B
S	F	A	M	L	L	B
O	O	G	O	S	R	S
N	R	P	C	R	R	B
e	r	g	d	b	a	b

* Dee: Perhaps the red colour was most, and so seemed generally to be red as the other their robes were.

THE SEAL OF HAGONEL

KING BNAPSSEN

King BNAPSSEN appeared as a king with a crown on his head.

PRINCE BRORGES

Prince Brorges appeared in his red apparel; and he opened his clothes and there did four mighty and most terrible and ghastly flames of fire out of his sides; which no mortal eye could abide to look upon any long while. And in marvelous raging fire the word 'BRORGES' did appear tossed to and fro of the mighty flames. His seal or character is this:

THE 42 MINISTERS

The 42 appeared holding a round table. They toss it in fiery flames. In the table were the letters of their names as followeth:

B	A	N	S	S	Z	E
B	Y	A	P	A	R	E
B	N	A	M	G	E	N
B	N	V	A	G	E	S
B	L	B	O	P	O	O
B	A	B	E	P	E	N

THE SEAL OF EL

KING BALIGON

King BALIGON is the same mighty king who is here first described by the name of CARMARA, and yet otherwise among the Angels called MARMARA. But the 'M' is not to be expressed. Therefore he appeared in a long purple gown and on his head a triple crown of gold, with a measuring rod of gold in his hand, divided into three equal parts; in the form of a well proportioned man.

PRINCE BAGANOL

He appeared not by that name yet.†

THE 42 MINISTERS

Note that the king himself is governor over these. The 42 ministers appeared like bright people. And besides them all the air swarmed with creatures. Their letters were on their foreheads. They stood in a circle. They took their letter from their foreheads and set them in a circle.

A	O	A	Y	N	N	A
L	B	B	N	A	A	V
I	O	A	E	S	P	M
G	G	L	P	P	S	A
O	E	E	O	O	E	Z
N	L	L	R	L	N	A

† Probably Prince Hagonel under a pseudonym similar to Baligon (a.k.a. Carmara).

THE SEAL OF ILEMESÉ

KING BLUMAZA

§ He appeared not yet by that name.

PRINCE BRALGES

§ Prince Bralges appeared in a red robe with a circlet on his head. And he was the last of the seven which hold the Heptagonon, all the rest being set down; who seemed now to extend their hands towards another, as though they played, being now rid of their work. This is the seal of his government:

THE 42 MINISTERS

§ The powers under his subjection are invisible. They appeared like little white smokes without any form. All the world seemed to be in brightness.

CHAPTER V

THE ORATION TO GOD TO BE SPOKEN EVERY DAY, THREE TIMES SUCCESSIVELY

ALMIGHTY, ÆTERNAL, THE TRUE AND LIVING GOD: O King of Glory, O Lord of Hosts, O Thou, the Creator of Heaven and Earth, and of all things visible and invisible: Now, (even now, at length,) among other Thy manifold mercies used, and to be used toward me, Thy simple servant, JOHN DEE, I most humbly beseech Thee, in this my present petition to have mercy upon me, to have pity upon me, to have compassion upon me. I, faithfully and sincerely, of long time, have sought among men, in Earth, and also by prayer (full oft and pitifully) have made suit unto Thy Divine Majesty for the obtaining of some convenient portion of True Knowledge and Understanding of Thy laws and ordinances, established in the natures and properties of Thy Creatures: By which Knowledge, Thy Divine Wisdom, Power and Goodness, (on Thy Creatures bestowed and to them imparted), being to me made and allure me, (for the same) incessantly to pronounce Thy praises, to render unto Thee, most hearty thanks, to advance Thy true honour, and to win unto Thy Name, some of Thy due Majestic Glory, among all people, and forever. And, whereas, it hath pleased Thee (O God) of Thy infinite Goodness, by Thy faithful and holy Spiritual Messengers, to deliver unto me, long since (through the eye and ear of E. K.) an orderly form, and manner of exercise Heptarchical: How, (to Thy Honour and Glory, and the Comfort of my own poor soul, and of others, Thy faithful servants,) I may, at all times, use very many of Thy

good Angels, their counsels and helps; according to the properties of such their functions, and offices, as to them, by Thy Divine Power, Wisdom and Goodness, is assigned, and limited: (Which orderly form, and manner of exercise, until even now, I never found opportunity and extreme necessity, to apply myself unto,) Therefore, I thy poor, and simple servant, do most humbly, heartily, and faithfully beseech Thy Divine Majesty, most lovingly and fatherly to favour: and by Thy Divine Beck to further this my present industry and endeavour to exercise myself, according to the foresaid orderly forme and manner: And, now, (at length, but not too late) for Thy dearly beloved Son IESUS CHRIST His sake, (O Heavenly Father) to grant also unto me, this blessing and portion of Thy heavenly Graces: That Thou wilt forthwith, enable me, make me apt and acceptable, (in body, soul, and spirit) to enjoy always the holy and friendly conversation, with the sensible, plain, full, and perfect help, in word and deed, of Thy Mighty, Wise, and Good Spiritual Messengers and Ministers generally: and, namely, of Blessed Michael, Blessed Gabriel, Blessed Raphael, and Blessed Uriel; and also especially, of all those, which do appertain unto the Heptarchical Mystery, theurgically, (as yet) and very briefly unto me declared: under the method of Seven Mighty Kings, and their Seven Faithful and Princely Ministers, with their subjects and servants, to them belonging. And in this Thy great Mercy and Grace, on me bestowed, and to me confirmed, (O Almighty God,) Thou shalt, (to the great comfort of Thy faithful servants,) approve, to Thy very enemies, and mine, the truth and certainty of Thy manifold, most merciful promises, heretofore, made unto me: And that Thou art the True and Almighty God, Creator of Heaven and Earth, (upon whom I do call and in whom I put all my trust,) and Thy Ministers, to be the true, and faithful Angels of light: which have, hitherto, principally, and according to Thy

Divine providence dealt with us: And, also, I, thy poor and simple servant, shall then, In and By Thee, be better able to serve Thee, according to Thy well pleasing: to Thy Honour and Glory: Yea, even in these most miserable, and lamentable days. Grant, Oh grant, O our Heavenly Father, grant this, (I pray Thee,) for Thy only begotten Son IESUS CHRIST, His sake: Amen, Amen, Amen.

THE TABLE OF THE 49 GOOD ANGELS

CHAPTER VI
THE DEVOUT AND PIOUS INVITATIONS
TO THE GOOD HEPTARCHICAL ANGELS

§I: *The General & Common Exordium & Conclusion Appertaining to the Seven Heptarchical Kings Inviting.*

PUISSANT AND NOBLE KING, N*, AND BY WHAT Name elssoever thou art called, or mayest truly and duly be called: To Whose peculiar Government, Charge, Disposition, and Kingly Office doth appertain the . . . †

. . . Therefore, In the Name of the King of Kings, the Lord of Hosts, the Almighty GOD, Creator of Heaven and Earth and of all things visible and invisible: O right Noble King, N‡., Come now, and appear, with thy Prince and his ministers and subjects, to my perfect, and sensible eye's judgement: in a goodly and friendly manner, to my comfort and help, for the advancing of the Honour and Glory of our Almighty GOD, by my service: as much as by Thy Wisdom and Power, in thy proper Kingly Office, and Government, I may be helped and enabled unto: Amen. COME, O right Noble King, N*, I say COME. Amen.

✠ Glory be to the Father, to the Sonne, and to the Holy Ghost, as it was in the beginning, is now and ever shall be, world without end, Amen.

* Insert the name of the King of the day here.

† Insert the office of the King, as given in Chapter Seven.

‡ Insert the name of the King here.

§2: *The General & Common Exordium & Conclusion appertaining to the Seven Heptarchical Princes Inviting.*

SO NOBLE PRINCE, N**, AND BY WHAT NAME ELSSOEVER THOU art called, or mayest truly, and dueely be called. To whose peculiar Government, Charge, Disposition, Office, and Princely Dignity doth appertain the . . . ††

. . . Therefore, In the Name of Almighty GOD, the King of Kings, And for His Honour, and Glory, to be advanced by my faithful service, I require thee, O Noble Prince, N††., to COME presently, and to show thyself, to my perfect and sensible eye's judgement, with thy Ministers, servants and subjects; to my comfort, and help, in Wisdom, and Power, according to the property of thy noble office: COME, O Noble Prince, N**, I say COME, Amen.

Our Father who art in heaven, hallowed be Thy Name. Thy kingdom come. Thy will be done on Earth, as it is in Heaven. Give us this day our daily bread. And forgive us our trespasses, as we forgive those who trespass against us. And lead us not into temptation, but deliver us from evil: For Thine is the kingdom, and the power, and the glory, for ever and ever, Amen.

** Insert the name of the Prince here.

†† Insert the office of the Prince as given in Chapter Seven.

††† Insert the name of the Prince here.

** Insert the name of the Prince here.

CHAPTER VIJ
SOME RECITAL & CONTESTATION OF THE
PECULIAR OFFICES, WORDS, & DEEDS OF THE
SEVEN HEPTARCHICAL KINGS & PRINCES
(in their peculiar days to be used).

SONDAYE

THE OFFICES OF KING BOBOGEL

* . . . the distributing, giving, and bestowing of wisdom and science. The teaching of true philosophy, true understanding of all learning, grounded on wisdom, with the excellencies in Nature. And of many other great mysteries, marvelously available and necessary to the advancing of the glory of our God and Creator. And who said to me in respect of these mysteries attaining: "Dec, Dec, at length but not too late" . . .

THE OFFICES OF PRINCE BORNOGO

. . . the altering of the corruption of Nature in perfection; the knowledge of metals; and generally the princely ministering to the right noble and mighty King Bobogel in his government and distributing, giving, and bestowing of Wisdom, Science, and True Philosophy, and true understanding of all learning, grounded upon wisdom; and of other very many his peculiar royal properties. And who said unto me: *What thou desirest in me shall be fulfilled...*

MONDAYE

THE OFFICES OF KING CARMARA

. . . who, in this Heptarchical Doctrine, at Blessed Uriel, his hand, didst receive the golden rod of government and measuring, and the chair of dignity and doctrine, And didst appear first to us, adorned with a triple diadem, in a long purple robe. Who saidst

*I have used the clipsis (. . . .) to indicate the beginning and end to the passage. The passages are inserted into the general exordiums given in Chapter Six.

to me at Mortlake: *I minister the strength of God unto thee.* Likewise who saidest: *these mysteries hath God, lastly, and of his great mercies, granted unto thee. Thou shalt be glutted, yea filled, yea thou shalt swell and be puffed up, with perfect knowledge of God's mysteries in his mercies.* And who saidst: *This Art is to be the further understanding of all sciences that are past, present, and yet to come.* And immediately thou didst say unto me: *Kings there are in Nature, with Nature, and above Nature. Thou art dignified.* And who saidst, concerning the use of the tables: *This is but the first step. Neither shalt thou practice them in vain.* And, saidst thou generally of God's mercies and graces on me decreed and bestowed:— *Whatsoever thou shalt speak, do, or work shall be profitable and acceptable and in the end shall be good. . .*

THE OFFICES OF PRINCE HAGONEL

... To whose commandment the Sons of Light and their Sons are subject and are thy servants. To whose power the operation of the earth is subject. Who are the first of the twelve and whose seal is called 'Barces'. At whose commandment are the Kings, Noblemen, and Princes of Nature, who are Primus and Quartus Hagonel. Who by the seven of the seven (which are the sons of Æternity) dost work marvels amongst the people of the earth. And who hast said unto me that I also, by the same, thy servants should work marvels. Oh Noble Hagonel, who art minister to the triple crowned King CARMARA, and, notwithstanding art Prince of these 42 Angels, whose names and characters are here presented.

THE OFFICES OF KING BLUMAZA§

THE OFFICES OF PRINCE BRALGES

... who saidst the creatures living in thy dominion are subject to thine own power. Whose subject are invisible and which (to my Seer) appeared like little smokes, without any form, and

§ A blank space is given in the manuscript apparently for some future insertion. Evidently BLUMAZA and BRALGES are alternate Entities for Monday.

whose seal of government is:

☞ Who saidst: *Behold, I am come. I will teach the names without numbers, the creatures subject unto me shall be known unto you. . .*

TUESDAYE

THE OFFICES OF KING BABALEL

. . . who art King in waters, mighty and wonderful in waters; whose power is in the bowels of the waters; whose royal person with the noble Prince Befafes and his 42 ministers, the triple-crowned King CARMARA hath me use to the glory, praise, and honour of him which created you all to the laud and praise of his Majesty . . .

THE OFFICES OF PRINCE BEFAFES

. . . who are Prince of the seas; thy power is upon the waters; thou drowndest Pharaoh and hast destroyed the wicked; thy name was known to Moses; thou livedst in Israel; who hast measured the waters; who wast with King Solomon; and also long after that with Scotus* but not known to him by thy true name, for he called thee Mares. And since thou wast with none; except when thou preservest me through the mercy of God from the power of the wicked; and wast with me in extremity. Thou wast with me thoroughly. Who, of the Ægyptians has been called OBELISON, in respect of thy pleasant deliverance. And by that name to be known and of me noted in record to be the noble and courteous OBELISON; whose noble ministers 42 are of very great power, dignity, and authority. As some in the measuring of the motions of the waters and saltiness of the seas; in giving good success in battles; reducing ships and all manner of vessels that float upon the seas. To some, all the fishes and monsters of the seas, yea, all that live therein are well known; and, generally, are the distributors of God's judgements upon the

* Possibly Duns Scotus, the scholastic philosopher.

waters that cover the earth. Others do beautify Nature in her composition. The rest are distributors and deliverers of treasures and unknown substances of the seas. Thou, Oh noble Prince BEAFES, hadst me use the name of God . . .

WEDDENSDAYE

THE OFFICES OF KING BNASPOL

. . . to whom the earth with her bowels and secrets whatsoever are delivered and hast said to me heretofore what thou art, there I may know. Thou art great, but (as thou truly didst confess) He in whom thou art, is greater than thou. . .

THE OFFICES OF PRINCE BLISDON

. . . unto whom the keys of the mysteries of the earth are delivered. Whose 42 ministers are Angels that govern under thee. All which thy mighty King BNASPOL bade me use and affirmed that they are and shall be at my commandment . . .

THURSDAYE

THE OFFICES OF KING BYNEPOR

. . . upon the distribution of participation of whose exalted most especial and glorified power resteth only and dependeth, the general state of condition of all things. Whose sanctification, glory, and renown, although it had beginning, yet can it not either have ending. He that measureth said and thou wast the End of his workmanship. Thou art like him and of him; yet not as partaking or adherent, but distinct in one degree. When he came thou was magnified by his coming; and are sanctified, world without end.

The highest life,

The best life,

The least life is measured in your hands.

§ Notwithstanding, thou art not of thyself; neither is thy power thine own. Magnified be His Name. Thou art in all; and all hast some being by thee; yet thy power is nothing in respect of His power which hath sent thee. Thou beginnest new worlds, new people, new kings, and new knowledge of a new government; and hast said to me: *thou shalt work marvelously, marvelously by my workmanship in the Highest . . .*

THE OFFICES OF PRINCE BUTMONO

. . . who are life and breath in living creatures. All things live by thee, the image of One excepted. All the kinds of beasts of the earth dost thou endue with life. Thy seal is their glory. Of God, thou art sanctified; and thou rejoyceth the living, the end and beginning of all beasts thou knowest; and by sufferance, thou disposest them . . .

FRYDAYE

THE OFFICES OF KING BALIGON

. . . who canst distribute and bestow at pleasure all and whatsoever can be wrought in ærial actions; who hast the government of thyself perfect as a mystery known unto thyself. Who didst advertise me of this stone and holy receptical; both needful to be had; and also didst direct me to the taking of it; being presently and in a few minutes of time brought to my sight (from the secret of the depths, where it was hid, in the uttermost part of the Roman possession); which stone, thou warnest me that no mortal hand but mine own should touch and saidst unto me: *Thou shalt prevail with it, with Kings, and with all the creatures of the world, whose beauty in virtue shall be more worth than the kingdoms of the earth.* For the which purposes here rehearsed and other; partly now to be exercised and enjoyed; and partly hereafter

more abundantly (as the Lord God of Hosts shall dispose); and also because thou thyself art governor of the 42, thy mighty, faithful and obedient ministers† . . .

THE OFFICES OF PRINCE BAGENOL§

SATERDAYE

THE OFFICES OF KING BNAPSEN

. . . who saidst unto me that by thee I shall cast out the power of all wicked spirits; and that by thee I shall or may know the doings and practises of evil men; and more than may be spoken or uttered to man . . .

THE OFFICES OF PRINCE BRORGES

. . . who, being the Prince, chief minister and governor under the right puissant King BNAPSEN didst (to my Seer) appear in a most terrible manner, with fiery flaming streams and saidst: *I am the Gate of Death. And through the Glory of God I smite the houses of the impious . . .*

† Dee gives two rather lengthy notes, one in English, the other in Latin. The English note merely repeats instruction as to the mounting of the stone on the Sigil of Æmeth, and states, once more, that 'wherein thou shalt at all times behold (privately to thyself) the state of God's people through the whole earth.'

The Latin note translates as follows:—See also the sayings of Ephodius where, concerning Adamanta, in which diverse signs are given for responding to God. See Epiphanius concerning precious stones and their meaning. See his writings concerning the Unim and Thunimim. See the book received at Trebonæ. It is written in the books of Epiphanius that the vision that appeared to Moses on the mountain, the laws that were given were expressed in sapphires.

§ None are given.

BOOK THREE

THE FORTY-EIGHT ANGELIC KEYS

*Received at Diverse Times from April 13th to July 13th
At Cracow, Poland
out of the pure mercy of our God to whom alone
we offer all praise, honour, and glory, Amen.*

* 1.35 & 1.43: Either Enochian should be OD or English should be 'which'

† The circumflex in Dee's Enochian is actually a brevis in Sl. MS. 3191 and should be pronounced as a short vowel.

‡ 1.46: This is the only time in the keys that ERM is glossed as 'with'; this is a probable copying error. ERM is perhaps 'with the ark', with IADNAH as 'knowledge'; see 30.180: IADNAMAD for 'undefiled knowledge'.

* 1.52 to 1.59: Lacuna in Sl. MS. 3191; Dee's English entered as marginalia. The root column gives a probable reconstruction of the Enochian text.

I.53	OD		and
I.54	GONO	<i>gono</i>	faith
I.55	IADPIL	<i>Iădpil</i>	to him
I.56	DS	<i>Ds</i>	that
I.57	HOM	<i>hom</i>	liveth
I.58	OD		and
I.59	TOH	<i>tôh</i>	triumpheth,
I.60	SOBA	<i>Soba</i>	whose
I.61	IAOD		beginning
I.62	IPAM	<i>Ipam</i>	is not
I.63	OD		nor
I.64	UL	<i>Lu</i>	ende*
I.65	IPAMIS	<i>Ipâmis</i>	can not be,
I.66	DS	<i>Ds</i>	which
I.67	LOHOLO	<i>lôhôlo</i>	shyneth
I.68	VEP	<i>vep</i>	as a flame
I.69	ZOMD	<i>zomd</i>	in the myddst
I.70	POAMAL	<i>Poamal</i>	of your pallace
I.71	OD	<i>od</i>	and
I.72	SONE	<i>begpa</i>	rayngneth
I.73	AÄI	<i>ääl</i>	amongst you
I.74	TA	<i>ta</i>	as
I.75	PIAP	<i>piap</i>	the ballance
I.76	BALTOH	<i>piamos</i>	of righteousness,
I.77	OD	<i>od</i>	and
I.78	VAOAN	<i>vaoan</i>	truth:
I.79	ZACAR	<i>ZACARe</i>	Move
I.80	CA	<i>c-a</i>	therfore,
I.81	OD	<i>od</i>	and
I.82	ZAMRAN	<i>ZAMRAN</i>	shew yourselves:
I.83	ODO	<i>odo</i>	open
I.84	CICLE	<i>cicle</i>	the Mysteries
I.85	QAA	<i>Qaa</i>	of your Creation:

* I.64: Dee made a copying error here. Royal Appendix clearly shows *UL* rather than *LU*. This is a curious error, because the 'L' prefix in Enochian means 'first', more or less an opposite to the 'end' that is intended. (See 5.46: *ULS* for 'end'.)

1.86	ZORGE	<i>zorge,</i>	Be friendly unto me:
1.87	LAP	<i>lap</i>	for
1.88	ZIRDO	<i>zirdo</i>	I am*
1.89	NOCO	<i>noco</i>	the servant
1.90	MAD	<i>MAD</i>	of the same your God:
1.91	HOATH	<i>Hoath</i>	the true Worshipper
1.92	IAIDA	<i>Jaida.</i>	of the Highest.

THE SECOND KEY

2.1	ADGT	<i>Adgt</i>	Can
2.2	UPAAH	<i>v-pa-âh</i>	the wings
2.3	ZONG	<i>zongom</i>	of the windes†
2.4	OM		
2.5	FAAIP	<i>fa-â-ip</i>	understand
2.6	SALD	<i>sald</i>	your voyces of wonder
2.7	VIV	<i>vi-iv</i>	O you the second‡
2.8	L	<i>L</i>	of the first,
2.9	SOBAM	<i>sobam</i>	Whome
2.10	IALPRG	<i>Iâl-prg</i>	the burning flames
2.11	IZAZAZ	<i>I-zâ-zaz</i>	have framed
2.12	PIADPH	<i>pi-âdph</i>	within the depths of my Jaws,
2.13	CASARMA	<i>Cas-arma</i>	whome
2.14	ABRAMG	<i>abramg</i>	I have prepared
2.15	TA	<i>ta</i>	as
2.16	TALHO	<i>talho</i>	Cupps
2.17	PARACLEDA	<i>parâclêda</i>	for a wedding
2.18	Q	<i>Q-ta</i>	or
2.19	TA		as
2.20	LORSLQ	<i>lors-l-q</i>	the flowres

* 1.88: Possible copying error. ZIR appears as 'I am' in 2.53, 3.4 & 4.46, while ZIRDO appears as 'I am' only in this passage in Royal Appendix. If so the ZIRDO error was repeated in most of the later calls. Note that DONOCO would be linguistically similar to CNOQUO in 21.35, 17.34, & 18.38. The correct passage may be ZIR DONOCO or ZIR CNOQUO rather than ZIRDO NOCO.

† 2.3 to 2.6: A little confusion here in Dee's matching. OM should be 'understand' (see 7.53, 10.54, 16.19, & 30.113). Thus ZONG is 'of the winds', FAAIP is 'your voices', and SALD is 'of wonder'.

‡ 2.7: Is Dee's double 'i' in vi-iv an error or a variation? See 4.13, 5.33, 6.34, & 16.2 for VIV as 'second'.

2.21	TURBS	<i>turbs</i>	in their beawty
2.22	OUGE	<i>öoge</i>	for the Chamber
2.23	BALTOH	<i>Baltoh</i>	of righteousnes
2.24	GIUI	<i>Giui</i>	Stronger
2.25	CHIS	<i>chis</i>	are
2.26	LUSD	<i>Lusd</i>	your fete
2.27	ORRI	<i>orri</i>	then the barren stone:
2.28	OD	<i>Od</i>	And
2.29	MICALP	<i>micalp</i>	myghtier
2.30	CHIS	<i>chís</i>	are
2.31	BIA	<i>bia</i>	your voices
2.32	OZONGON	<i>ózôngon</i>	then the manifold windes.
2.33	LAP	<i>Lap</i>	For
2.34	NOAN	<i>noán</i>	you are become
2.35	TROF	<i>trof</i>	a buylding
2.36	CORS	<i>cors</i>	such
2.37	TA	<i>ta</i>	as
2.38	GE	<i>ge,</i>	is not
2.39	OQ	<i>o-q</i>	but
2.40	MANIN	<i>manin</i>	in the mynde
2.41	IAIDON	<i>Ja-í-don:</i>	of the all powerfull.
2.42	TORZU	<i>Torzu</i>	Arrise
2.43	GOHEL	<i>góhel</i>	sayeth the First
2.44	ZACAR	<i>ZACAR</i>	Move
2.45	CA	<i>ca</i>	therefore
2.46	CNOQOD	<i>c-nó-qod,</i>	unto his Servants:
2.47	ZAMRAN	<i>ZAMRAN</i>	Shew yourselves
2.48	MICALZO	<i>micalzo</i>	in powre:
2.49	OD	<i>od</i>	And
2.50	OZAZM	<i>ozazm</i>	make me
2.51	VRELP	<i>vrelp</i>	a strong Seething:‡
2.52	LAP	<i>Lap</i>	for
2.53	ZIR	<i>zir</i>	I am
2.54	IOIAD	<i>Ioiad.</i>	of him that liveth forever.

* 2.51: The English 'Seething' is often modernized into 'Seer' or 'Seer of Things'. More likely 'Seething' is a gerund of 'to seeth'; See the Oxford English Dictionary entry on 'Seething'.

THE THIRD KEY

3.1	MICMA	<i>Micma</i>	Behold
3.2	GOHO	<i>gohó</i>	sayeth
3.3	IAD	<i>Piad</i>	your God,
3.4	ZIR	<i>zir</i>	I am
3.5	COMSELH	<i>cómselh</i>	a Circle
3.6	AZIEN	<i>azien</i>	on Whose hands
3.7	BIAB	<i>biab</i>	stand
3.8	OS	<i>Os</i>	12
3.9	LONDOH	<i>Lón-doh</i>	Kingdoms.
3.10	NORZ	<i>Norz</i>	Six
3.11	CHIS	<i>chis</i>	are
3.12	OTHIL	<i>óthil</i>	the seats
3.13	GIGIPAH	<i>Gigípah</i>	of living breath,
3.14	UNDL	<i>und-l</i>	the rest
3.15	CHIS	<i>chis</i>	are
3.16	TA	<i>tá</i>	as
3.17	PUIM	<i>pû-im</i>	sharp sickles:
3.18	Q	<i>Q</i>	or
3.19	MOSPLEH	<i>mos-pleh</i>	the horns
3.20	TELOCH	<i>teloch</i>	of death
3.21	QUIN	<i>Qui-i-n</i>	wherein
3.22	TOLTORG	<i>tol Morg</i>	the Creatures of the earth
3.23	CHIS	<i>chis</i>	are,
3.24	ICHISGE	<i>i-chis-ge</i>	to are not*,
3.25	M	<i>m</i>	Except
3.26	OZIEN	<i>ozíen</i>	myne own hand,
3.27	DS	<i>dst</i>	which§
3.28	BRGDA	<i>brgda</i>	slepe
3.29	OD	<i>od</i>	and
3.30	TORZUL	<i>torzul</i>	shall ryse.
3.31	ILI	<i>í-lí</i>	In the first

* 3.24: The English is a bit confused here. ICHISGE probably means- 'I am not'.

§ 3.27: 'T' in 'dst' probably accidental, although 'dst' as 'which' appears at 4.28. Ds is glossed as 'which' everywhere else.

3.32	EOL	<i>E-ól</i>	I made you
3.33	BALZARG	<i>balzarg</i>	stuards
3.34	OD	<i>od</i>	and
3.35	AALA	<i>áála</i>	placed you
3.36	THILN	<i>Thiln</i>	in seats
3.37	OS	<i>os</i>	I2
3.38	NETAAB	<i>ne-tâ-ab,</i>	of government,
3.39	DLUGA	<i>dluga</i>	giving
3.40	VOMZARG	<i>vomsarg</i>	unto every one of you
3.41	LONSA	<i>Lonsa</i>	powre
3.42	CAPIMALI	<i>Cap-mi-áli</i>	successively*
3.43	VORS	<i>vors</i>	over
3.44	CLA	<i>cla</i>	456,
3.45	HOMIL	<i>homil</i>	the true ages
3.46	COCASB	<i>cocasb</i>	of tyme,
3.47	FAFEN	<i>fafen</i>	to the intent that,
3.48	IZIZOP	<i>izizop</i>	from your highest vessells
3.49	OD	<i>od</i>	and
3.50	MIINOAG	<i>miinôag</i>	the Corners
3.51	DE	<i>de</i>	of
3.52	GNETAAB	<i>gne-táab</i>	your governments,
3.53	VAUN	<i>vaun</i>	you might work
3.54	NANÆEL	<i>na-ná-ê-el</i>	my powre:
3.55	PANPIR	<i>panpir</i>	powring downe
3.56	MALPIRGI	<i>Malpirgi</i>	the fires of life and encrease,
3.57	PILD	<i>caósg</i>	continually
3.58	CAOSG	<i>Pild</i>	on the earth
3.59	NOAN	<i>noan</i>	Thus you are become
3.60	UNALAH	<i>vnalah</i>	the skirts
3.61	BALT	<i>balt</i>	of Justice
3.62	OD	<i>od</i>	and
3.63	VOOAN	<i>vooán</i>	Truth.
3.64	DOOIAP	<i>do-ó-í-ap</i>	In the name
3.65	MAD	<i>MAD</i>	of the same. your God
3.66	GOHOLOR	<i>Gohólor</i>	Lift up,

* 3.42; CAPIMALI rather than CAPMIALI; see 30.122. Also see 4.30 for root CAPIM-.

3.67	GOHUS	<i>gohús</i>	I say,
3.68	AMIRAN	<i>amiran</i>	yourselves.
3.69	MICMA	<i>Micma,</i>	Behold
3.70	IEHUSOZ	<i>Iehúsoz</i>	his mercies
3.71	CACACOM	<i>ca-cá-com</i>	florish
3.72	OD	<i>od</i>	and
3.73	DOOAIN	<i>do-o-â-in</i>	Name
3.74	NOAR	<i>noar</i>	is become
3.75	MICAOLZ	<i>mi-cá-olz</i>	mighty
3.76	AAIOM	<i>a-aí-om</i>	amongst us
3.77	CASARMG	<i>Casáring</i>	In whom
3.78	GOHIA	<i>gohia</i>	we say
3.79	ZACAR	<i>ZACAR</i>	Move*,
3.80	UNIGLAG	<i>vníglag</i>	Descend
3.81	OD	<i>od</i>	and
3.82	IMUAMAR	<i>Im-uâ-mar</i>	apply yourselves unto us
3.83	PUGO	<i>pugo</i>	as unto
3.84	PLAPLI	<i>plapli</i>	partakers
3.85	ANANÆL	<i>anánæł</i>	of the secret wisdom
3.86	QAAN	<i>Qáan.</i>	of your Creation.

THE FOURTH KEY

4.1	OTHIL	<i>Othíl</i>	I have set
4.2	LASDI	<i>lasdi</i>	my fete
4.3	BABAGE	<i>babâge</i>	in the Sowth
4.4	OD	<i>od</i>	and
4.5	DORPHA	<i>dorpha</i>	have looked about me
4.6	GOHOL	<i>Gohól</i>	sayng,
4.7	GCHISGE	<i>G-chisge</i>	are not
4.8	AVAVAGO	<i>avávâgo</i>	the Thunders of encrease
4.9	CORMP	<i>Cormp</i>	numbred
4.10	PD	<i>pd</i>	33,
4.11	DS	<i>dsonf</i>	which
4.12	S●NF		rayne
4.13	VIV	<i>viv-di-v</i>	in the second
4.14	DIU		Angle,

* 3.79: Alternate pronunciation given as *zod-a-car*.

4.15	CASARMI	<i>Casármí</i>	under whom
4.16	OALI	<i>Oali</i>	I have placed
4.17	MAPM	<i>Mapm</i>	9639
4.18	SORAM	<i>Sobam</i>	Whome
4.19	AG	<i>ag</i>	None
4.20	CORMPO	<i>cormpó</i>	hath yet numbred,
4.21	CRIP	<i>c-rp-l</i>	but*
4.22	L		one,
4.23	CASARMG	<i>Casarmg</i>	in whome
4.24	CROODZI	<i>croódzi</i>	the second beginning of things
4.25	CHIS	<i>chis</i>	are
4.26	OD	<i>od</i>	and
4.27	UGEK	<i>ugeg</i>	wax strong
4.28	DS	<i>dst</i>	which
4.29	T		also
4.30	CAPIMAI I	<i>capimáli</i>	successively
4.31	CHIS	<i>chis</i>	are
4.32	CAPIMAON	<i>Capimaon</i>	the number of time:
4.33	OD	<i>od</i>	and
4.34	LONSHIN	<i>lonshin</i>	their powres
4.35	CHIS	<i>chis</i>	are
4.36	TA	<i>ta</i>	as
4.37	LO	<i>Lo</i>	the first
4.38	CLA	<i>Cla</i>	456:
4.39	TORZU	<i>Torgú</i>	Arise,
4.40	NOR	<i>Nor</i>	you sonns
4.41	QUASAH	<i>quasáhi</i>	of pleasure,
4.42	OD	<i>od</i>	and
4.43	F	<i>F</i>	viset
4.44	CAOSGA	<i>caósga</i>	the earth:
4.45	BAGLE	<i>Bagle</i>	for
4.46	ZIR	<i>Zirenáiad</i>	I am†
4.47	ENAY		the Lord
4.48	IAD		your God,

* 4.21: CRIP for 'but'; see 10.84.

† 4.46 to 4.48: *Zirenaiad* may be a contraction: ZIR-ENAY-IAD or 'I am' - 'Lord' - 'God'.

4.49 DS	<i>Dsi</i>	which
4.50 I		is,
4.51 OD	<i>od</i>	and
4.52 APILA	<i>Apila</i>	liveth.
4.53 DOOAIP	<i>Do-ó-â-io</i>	In the name
4.54 QAAL	<i>Q-â-al</i>	of the Creator
4.55 ZACAR	<i>ZACAR</i>	Move,
4.56 OD	<i>od</i>	and
4.57 ZAMRAN	<i>ZAMRAN</i>	shew yourselves
4.58 OBELISONG	<i>Obelisong</i>	as pleasant deliverers
4.59 RESTEL	<i>rest-el</i>	That you may praise him
4.60 AAI	<i>aaf</i>	amongst*
4.61 NOR	<i>Nor-mô-lap</i>	the sonnes†
4.62 MOLAP		of men.

THE FIFTH KEY

5.1 SAPH	<i>Sapáh</i>	The mighty sounds
5.2 ZIMII	<i>zímii</i>	have entered*
5.3 D	<i>du-i-v</i>	into the third
5.4 DIV		angle,
5.5 OD	<i>od</i>	and
5.6 NOAS	<i>noas</i>	are become
5.7 TA	<i>ta</i>	as
5.8 QANIS	<i>qa-a-nis</i>	olives
5.9 ADROCH	<i>adroch</i>	in the olive mount
5.10 DORPHAL	<i>dorphal</i>	looking with gladnes
5.11 CAOSG	<i>ca-ósg</i>	upon the earth
5.12 OD	<i>od</i>	and
5.13 FAONTS	<i>faonts</i>	dwelling
5.14 PERIPSOL	<i>péripsol</i>	in the brightnes of the heavens
5.15 TA	<i>tablior</i>	as
5.16 BLIOR		continuall comfortors,
5.17 CASARM	<i>Casarm</i>	unto whom
5.18 AMIPZI	<i>amipzi</i>	I fastened

* 4.60: Copying error by Dee. AII for 'amongst'; see 1.73; 7.52, 7.6 &c.

† 4.61 to 4.62: MOLAP for 'of men', because NOR is 'sons'; see 4.40.

* 5.2 to 5.3: D for third; see 6.36, 7.33, 17.2. DIV for 'angle'; see 4.14, 6.3

5.19 NAZ	<i>nazarth</i>	pillers§
5.20 ARTH		of gladnes
5.21 AF	<i>af</i>	19
5.22 OD	<i>od</i>	and
5.23 DLUGAR	<i>dlugar</i>	gave them
5.24 ZIZOP	<i>zizop</i>	vessels
5.25 ZLIDA	<i>z-lida</i>	to water
5.26 CAOSGI	<i>caósgi</i>	the earth
5.27 TOLTORGI	<i>toltórgi</i>	with her creatures,
5.28 OD	<i>od</i>	and
5.29 ZCHIS	<i>z-chis</i>	they are
5.30 ESIASCH	<i>esíasch</i>	the brothers
5.31 L	<i>L</i>	of the first
5.32 OD	<i>taviu</i>	and*
5.33 VIV		second
5.34 OD	<i>od</i>	and
5.35 IAOD	<i>íáod</i>	the beginning
5.36 THILD	<i>thild</i>	of their own seats
5.37 DS	<i>ds</i>	which
5.38 PERAL		are garnished†
5.39 HUBAR	<i>hubar</i>	with continually burning lamps
5.40 PEOAL	<i>Peóal</i>	69636
5.41 SOBA	<i>soba</i>	whose
5.42 CORMFA	<i>cormfa</i>	numbers
5.43 CHIS	<i>chis</i>	are
5.44 TA	<i>ta</i>	as
5.45 LA	<i>la</i>	the first
5.46 ULS	<i>vls</i>	the endes
5.47 OD	<i>od</i>	and
5.48 QCOCASB	<i>Q-có-casb</i>	the contents of tyme.
5.49 CA	<i>Ca</i>	Therefore
5.50 NIIS	<i>niis</i>	Come you
5.51 OD	<i>od</i>	and

§ 5.19: NAZ as 'pillars'; see 8.7 NAZ- root for 'pillars'.

* 5.32: OD for 'and'; *ta* probably a copying error.

† 5.38 to 5.39: Lacuna in Sl. MS. 3191. Dec wrote the English as marginalia. See Royal Appendix (or *True Relation*) on July 5, 1584, the spirit Nalvage instructs that the word PERAL be added. Dec evidently neglected to do so when compiling Sl. MS. 3191.

5.52	DARBS	<i>Darbs</i>	obey
5.53	QAAS	<i>Q-á-as</i>	your creation,
5.54	F	<i>Feth-ar-zi</i>	viset us*
5.55	ETHARZI		in peace
5.56	OD	<i>od</i>	and
5.57	BLIOR	<i>blióra</i>	comfort
5.58	IAIAL	<i>ia-ial</i>	Conclude us
5.59	EDNAS	<i>ed-nas</i>	as reccivers
5.60	CICLES	<i>cicles</i>	of your mysteries:
5.61	BAGLE	<i>Bágle</i>	for why?
5.62	IAD	<i>Geiad</i>	Our Lord and Mr.
5.63	I	<i>i-L</i>	is
5.64	L		all one.

THE SIXTH KEY

6.1	GAH	<i>Gah</i>	The spirits
6.2	S	<i>s</i>	of ye 4th
6.3	DIU	<i>díu</i>	Angle
6.4	CHIS	<i>chis</i>	are
6.5	EM	<i>em</i>	Nine,
6.6	MICAOLZ	<i>micálzo</i>	Mighty*
6.7	PILZIN	<i>pilzin</i>	in the firmaments of waters,
6.8	SOBAM	<i>sobam</i>	Whome
6.9	EL	<i>El</i>	the first
6.10	HARG	<i>harg</i>	hath planted
6.11	MIR	<i>mir</i>	a torment
6.12	BABALON	<i>babálon</i>	to the wicked
6.13	OD	<i>od</i>	and
6.14	OBLOC	<i>obloc</i>	a garland
6.15	SAMVELG	<i>samvelg</i>	to the righteous
6.16	DLUGAR	<i>dlugar</i>	giving unto them
6.17	MALPRG	<i>marprg</i>	fyrie darts
6.18	AR	<i>arcaósgi</i>	to vanne
6.19	CAOSGI		the earth
6.20	OD	<i>od</i>	and

* 5.54: F for 'visit'; see 4.43, 6.25.

* 6.6: MICAOLZ for 'mighty'; see 3.74, 18.2, 30.6.

6.21	ACAM	<i>Acám</i>	7699
6.22	CANAL	<i>canal</i>	continually Workmen
6.23	SOBA	<i>sobólzar</i>	whose†
6.24	ELZAP		courses
6.25	F	<i>f-bliard</i>	viset
6.26	BLIARD		with comfort
6.27	CAOSG	<i>caosgi</i>	the earth
6.28	OD	<i>od</i>	and
6.29	CHIS	<i>chis</i>	are
6.30	ANETAB	<i>anétab</i>	in government
6.31	OD	<i>od</i>	and
6.32	MAIM	<i>miam</i>	continuance
6.33	TA	<i>ta</i>	as
6.34	VIV	<i>viv</i>	the second
6.35	OD	<i>od</i>	and
6.36	D	<i>d</i>	the third
6.37	DARSAR	<i>Darsar</i>	Wherefore
6.38	SOLPETH	<i>sol-peth</i>	hearken unto
6.39	BIEN	<i>bien</i>	my voice
6.40	BRITA	<i>Brita</i>	I have talked of you
6.41	OD	<i>od</i>	and
6.42	ZACAM	<i>zácám</i>	I move you
6.43	GMICALZO	<i>g-micálzo</i>	in power and presence,
6.44	SOBA	<i>sob-há-atl</i>	whose
6.45	HAATH		works
6.46	TRIAN	<i>trían</i>	shall be
6.47	LUIAHE	<i>Lu-íá-he</i>	a song of honor
6.48	OD	<i>odecrin</i>	and
6.49	ECRIN		the praise
6.50	MAD	<i>MAD</i>	of your God
6.51	QAAON	<i>Q-a-a-on</i>	in your Creation.

THE SEVENTH KEY

7.1	RAAS	<i>Raas</i>	The East
7.2	I	<i>isálman</i>	is

† 6.23 to 6.24: SOBA for 'whose'; see 1.30, 1.60, 5.41, 7.27, &c. ELZAP for 'courses'; see 30.62.

7.3	SALMAN		a howse
7.4	PARADIZ	<i>paradiz</i>	of virgins§
7.5	ÆCRIMI	<i>oécrîmi</i>	singing praises
7.6	AAI	<i>aa</i>	amongst*
7.7	IALPIRGAH	<i>ial-pîrgah</i>	the flames of the first glory,†
7.8	QUIIN	<i>qui-in</i>	wherein
7.9	ENAY	<i>enay</i>	the Lord
7.10	BUTMON	<i>butmon</i>	hath opened his mouth
7.11	OD	<i>od</i>	and
7.12	INOAS	<i>inóas</i>	they are become
7.13	NI	<i>ni</i>	28
7.14	PARADIAL	<i>paradial</i>	Living dwellings
7.15	CASARMG	<i>casarmg</i>	in whom
7.16	UGEAR	<i>vgéar</i>	the strength of men
7.17	CHIRLAN	<i>chirlan</i>	rejoyceth
7.18	OD	<i>od</i>	and
7.19	ZONAC	<i>zonac</i>	they are appareled
7.20	LUCIFTIAN	<i>Luciftian</i>	with ornaments of brightnes
7.21	CORS	<i>cors</i>	such
7.22	TA	<i>ta</i>	as
7.23	VAUL	<i>vaul</i>	work
7.24	ZIRN	<i>zirn</i>	wonders
7.25	TOL	<i>tol-hâ-mi</i>	on all
7.26	HAMI		creatures
7.27	SOBA	<i>soba</i>	Whose
7.28	LONDOH	<i>londéh</i>	Kingdoms

7.58	UGEG	<i>ugégi</i>	waxeth strong
7.59	BIGLIAD	<i>Bighîad</i>	in our Comforter.

THE EIGHTH KEY

8.1	BAZME	<i>Bazmêlo</i>	The Midday
8.2	LO		the first‡
8.3	I	<i>i</i>	is
8.4	TA	<i>ta</i>	as
8.5	PIRIPSON	<i>pirîpson</i>	the third heaven
8.6	OLN	<i>oln</i>	made
8.7	NAZ	<i>nazâvâbh</i>	of Hiacynth Pillers
8.8	AVABH		
8.9	OX	<i>ox</i>	26
8.10	CASARMG	<i>casarmg</i>	in whome

* 7.39 to 7.40: OTHIL for 'seats'; see 3.12. RIT for 'Mercy'; see 7.44.

† 7.50: Alternate pronunciation: *Omicaolzod*.

‡ 8.2: LO as 'first'; see 4.37.

8.11	URAN	<i>Vrán</i>	the Elders
8.12	CHIS	<i>chis</i>	are
8.13	UGEG	<i>vgeg</i>	become strong
8.14	DS	<i>dsa-brang</i>	which
8.15	ABRAMG		I have prepared§
8.16	BALTOHA	<i>baltôha</i>	for my own righteousness
8.17	GOHO	<i>gohó</i>	sayth
8.18	IAD	<i>î-ad</i>	the Lord
8.19	SOBA	<i>soba</i>	whose
8.20	MIAM	<i>miam</i>	long contynuançe*
8.21	TRIAN	<i>trian</i>	shall be
8.22	TA	<i>ta</i>	as
8.23	LOICIS	<i>lól-cis</i>	bucklers
8.24	ABAI	<i>Abaiuônin</i>	to the stowping
8.25	VOVIN		Dragons†
8.26	OD	<i>od</i>	and
8.27	AZIAGIER	<i>azidgier</i>	like unto the harvest
8.28	RIOR	<i>rior</i>	of a wyddow.
8.29	IRGIL	<i>Irgil</i>	How many
8.30	CHIS	<i>chis</i>	are
8.31	DA	<i>da</i>	there
8.32	DS	<i>ds</i>	which
8.33	PAAOX	<i>pá-â-ox</i>	remayn
8.34	BUSD	<i>busd</i>	in the glorie
8.35	CAOSGO	<i>caósgo</i>	of the earth
8.36	DS	<i>ds</i>	which
8.37	CHIS	<i>chis</i>	are
8.38	OD	<i>odípuran</i>	and
8.39	IPURAN		shall not see
8.40	TELOCH	<i>téloah</i>	death‡
8.41	CACARG	<i>cacarg</i>	untyll

§ 8.15: ABRAMG for 'I have prepared'; see 2.14, 11.33.

* 8.20: MIAM for 'long continuance'; see 6.32, 7.30, 7.42. MIAM a '3663'; see 12.61. Dee's error makes the Enochian gibberish.

† 8.25: VOVIN is the stem for 'dragon'; see 8.46 and note to 30.133. The entire passage is idiomatic in Enochian; what is probably meant is 'The Lord will be a shield against threatening dragons [devils]'.

‡ 8.40: TELOCH for 'death'; see 3.20, 11.19 and note on 30.133.

8.42	O	O	this

14.25	IUMD		is called†
14.26	AAI	<i>aai</i>	amongst you
14.27	BALTIM	<i>Baltim</i>	Furye, or Extreme Justice
14.28	ZACAR	<i>ZACAR</i>	Move
14.29	OD	<i>od</i>	and
14.30	ZAMRAN	<i>ZAMRAN</i>	shew yourselves
14.31	ODO	<i>odo</i>	open
14.32	CICLE	<i>cicle</i>	the mysteries
14.33	QAA	<i>Qäa,</i>	of your Creation
14.34	ZORGE	<i>Zorge,</i>	Be friendly unto me
14.35	LAP	<i>Lap</i>	for
14.36	ZIRDO	<i>zirdo</i>	I am
14.37	NOCO	<i>Noco</i>	the servant
14.38	MAD	<i>MAD,</i>	of the same your God
14.39	HOATH	<i>hoath</i>	the true worshipper
14.40	IAIDA	<i>Iaïda.</i>	of the Highest.

THE FIFTEENTH KEY

15.1	ILS	<i>IlS</i>	O thow
15.2	TABAAM	<i>tabâam</i>	the governor
15.3	L	<i>Liálprt</i>	of the first

† 14.25: IUMD for 'is called'; see 13.23, 18.19.

15.4	IALPRT		flame*
15.5	CASARMAN	<i>casarman</i>	under whose
15.6	UPAAH	<i>vpaâhi</i>	wyngs
15.7	CHIS	<i>chis</i>	are
15.8	DARG	<i>darg</i>	6739
15.9	DS	<i>dsôâdo</i>	which
15.10	OADO		weave
15.11	CAOSGI	<i>caôsgi</i>	the earth
15.12	ORSCOR	<i>orscor</i>	with drynes
15.13	DS	<i>ds</i>	which
15.14	OMAX	<i>ômax</i>	knowest
15.15	MONASCI	<i>monasci</i>	of the great name
15.16	BÆOVIB	<i>Bæôuib</i>	Righteousnes§
15.17	OD	<i>od</i>	and
15.18	EMETGIS	<i>emetgis</i>	the scale
15.19	IAIADIX	<i>iaîâdix</i>	of Honor
15.20	ZACAR	<i>ZACAR</i>	Move
15.21	OD	<i>od</i>	and
15.22	ZAMRAN	<i>ZAMRAN,</i>	shew yourselves
15.23	ODO	<i>odo</i>	open
15.24	CICLE	<i>cicle</i>	the mysteries
15.25	QAA	<i>Qâa</i>	of your Creation
15.26	ZORGE	<i>zorge,</i>	Be friendly unto me
15.27	LAP	<i>Lap</i>	for
15.28	ZIRDO	<i>zirdo</i>	I am
15.29	NOCO	<i>Noco</i>	the servant
15.30	MAD	<i>MAD,</i>	of the same your God
15.31	HOATH	<i>hoath</i>	the true worshipper
15.32	IAIDA	<i>Iaida.</i>	of the Highest.

THE SIXTEENTH KEY

16.1	ILS	<i>IlS</i>	Oh thow
16.2	VIV	<i>viuîâlp̄rt</i>	second
16.3	IALPRT		flame

* 15.4: IALPRT for 'flame'; see 16.3, 17.3; IALPRT only appears in contraction forms, but see also 18.5 & 2.10; IALPRG for 'burning flame'.

§ 15.16: Why not BALTOH for 'righteousness'? (See 1.76, 2.23, 9.67.) Could *Bæuuib* be a proper noun?

16.4	SALMAN	<i>salman</i>	the house
16.5	BALT	<i>balt</i>	of Justice
16.6	DS	<i>ds</i>	which
16.7	BRIN		hast
16.8	ACROODZI	<i>acroódzi</i>	thy beginning
16.9	BUSD	<i>busd</i>	in glory:
16.10	OD	<i>od</i>	and
16.11	BLIORAX	<i>bliôrax</i>	shalt comfort
16.12	BALIT	<i>balit</i>	the iust:
16.13	DS	<i>dsinsi</i>	which
16.14	INSI		walkest
16.15	CAOSG	<i>caosg</i>	on the earth
16.16	LUSDAN	<i>lUSDAN</i>	with feete
16.17	EMOD	<i>Emod</i>	876
16.18	DS	<i>dsom</i>	that
16.19	OM		understand*
16.20	OD	<i>od</i>	and
16.21	TIIOB	<i>tliob</i>	separate
16.22	IIAMI		creatures:†
16.23	DRILPA	<i>drilpa</i>	great
16.24	GEH	<i>geh</i>	art
16.25	ILS	<i>yls</i>	thow
16.26	MADZILODARP	<i>Madzilodarp</i>	in the God of stretch-forth-and-conquer.
16.27	ZACAR	<i>ZACAR</i>	Move
16.28	OD	<i>od</i>	and
16.29	ZAMRAN	<i>ZAMRAN</i>	shew yourselves
16.30	ODO	<i>odo</i>	Open
16.31	CICLE	<i>cicle</i>	the mysteries
16.32	QAA	<i>Qāa</i>	of your Creation
16.33	ZORGE	<i>zorge,</i>	Be friendly unto me
16.34	IAP	<i>Lap</i>	for
16.35	ZIRDO	<i>zirdo</i>	I am
16.36	NOCO	<i>Noco</i>	the servant
16.37	MAD	<i>Mad</i>	of the same your God

* 16.19: OM for 'understand' or 'know'; see 2.4, 10.54, 30.113.

† 16.22: HAM- stem for 'creatures'; see 7.25, 14.12.

16.38	HOATH	<i>hoath</i>	the true worshipper
16.39	IAIDA	<i>Iaída.</i>	of the Highest.

THE SEVENTEENTH KEY

17.1	ILS	<i>Il̄s</i>	O thow
17.2	D	<i>dialprt</i>	third
17.3	IALPRT		flame
17.4	SOBA	<i>soba</i>	whose
17.5	UPAAH	<i>vp̄aah</i>	wyngs
17.6	CHIS	<i>chis</i>	are
17.7	NANBA	<i>nanba</i>	thorns
17.8	ZIXLAY	<i>zixlay</i>	to styꝛ up
17.9	DODSIH	<i>dodsih</i>	vexation:
17.10	OD	<i>od</i>	and
17.11	BRIN	<i>brint</i>	hast
17.12	FAXS	<i>Faxs</i>	7336
17.13	HUBARO	<i>hubáro</i>	lamps living
17.14	TUSTAX	<i>tustax</i>	going
17.15	YLSI	<i>ylsi,</i>	before the
17.16	SOBA	<i>sobaíad</i>	whose
17.17	IAD		God
17.18	I	<i>i</i>	is
17.19	VONPOVNPH	<i>vónpôvnph</i>	Wrath in Angre*
17.20	ALDON	<i>Aldon</i>	Gyrd up
17.21	DAXIL	<i>daxil</i>	thy loynes
17.22	OD	<i>od</i>	and
17.23	TOATAR	<i>toátar:</i>	harken
17.24	ZACAR	<i>ZACAR</i>	Move
17.25	OD	<i>od</i>	and
17.26	ZAMRAN	<i>ZAMRAN</i>	shew yourselves
17.27	ODO	<i>odo</i>	Open
17.28	CICLE	<i>cicle</i>	the mysteries
17.29	QAA	<i>Qúa,</i>	of your Creation
17.30	ZORGE	<i>zorge,</i>	Be friendely unto me

* 17.19: Contraction of VONPHO-VONPH or 'of wrath'-'wrath'. This appears to be a peculiar kind of emphatic redundancy.

17.31	LAP	<i>Lap</i>	for
17.32	ZIRDO	<i>zirdo</i>	I am
17.33	NOCO	<i>Noco</i>	the servant
17.34	MAD	<i>Mad</i>	of the same your God
17.35	HOATH	<i>hoath</i>	the true worshipper
17.36	IAIDA	<i>Iaïda</i>	of the Highest.

THE EIGHTEENTH KEY

18.1	ILS	<i>IlS</i>	O thow
18.2	MICAOLZ	<i>Micaólz</i>	mighty
18.3	OLPIRT	<i>Olprit</i>	light
18.4	OD		and
18.5	IALPRG	<i>ialprg</i>	burning flame
18.6	BLIORS	<i>Bliors</i>	of comfort
18.7	DS	<i>ds</i>	which
18.8	ODO	<i>odo</i>	openest
18.9	BUSDIR	<i>Busdir</i>	the glory
18.10	OIAD	<i>oiad</i>	of God
18.11	OVOARS	<i>ouôars</i>	to the center
18.12	CAOSGO	<i>caósgo</i>	of the erth
18.13	CASARMG	<i>Casarmg</i>	In whome
18.14	LAIAD	<i>Laiad</i>	the secrets of truth
18.15	ERAN	<i>erán</i>	6332
18.16	BRINTS	<i>brints</i>	have
18.17	CASASAM	<i>casásam</i>	their abiding
18.18	DS	<i>ds</i>	which
18.19	IUMD	<i>ivmd</i>	is called
18.20	ACLONDOH	<i>á-q-lo adóhi</i>	in thy Kingdome
18.21	MOZ	<i>MOZ</i>	IOYE
18.22	OD	<i>od</i>	and
18.23	MAOFFAS	<i>maóffas</i>	not to be measured
18.24	BOLP	<i>Bolp</i>	Be thow
18.25	COMO	<i>comobliort</i>	a wyndow
18.26	BLIORT		of comfort
18.27	PAMBT	<i>pambt</i>	vnto me.
18.28	ZACAR	<i>ZACAR</i>	Move
18.29	OD	<i>od</i>	and

18.30 ZAMRAN	ZAMRAN	shew yourselves
18.31 ODO	odo	Open
18.32 CICLE	cicle	the mysteries
18.33 QAA	Qāa,	of your Creation
18.34 ZORGE	zorge	Be friendly unto me
18.35 LAP	Lap	for
18.36 ZIRDO	zirdo	I am
18.37 NOCO	Noco	the servant
18.38 MAD	MAD	of the same your God
18.39 HOATH	Hoath	the true worshipper
18.40 IAIDA	Iaīda.	of the Highest.

THE KEY OF THE THIRTY AYRES

30.1	MADRIAX	<i>Madríax</i>	Oh you heavens
30.2	DS	<i>dspraf</i>	which
30.3	PRAF		dwell
30.4	LIL	<i>LIL</i>	in the first Ayre, [*]
30.5	CHIS	<i>chis</i>	are
30.6	MICAOLZ	<i>Micaólz</i>	Mightie
30.7	SAANIR	<i>saánir</i>	in the partes
30.8	CAOSGO	<i>Caós go</i>	of the Erth,
30.9	OD	<i>od</i>	and
30.10	FISIS	<i>físis</i>	execute
30.11	BALZIZRAS	<i>balzizras</i>	the Judgement
30.12	IAIDA	<i>Iaida</i>	of the highest
30.13	NONCA	<i>nonca</i>	to you
30.14	GOHULIM	<i>gohúlim</i>	it is sayd,
30.15	MICMA	<i>Micma</i>	Beholde
30.16	ADOIAN	<i>adoían</i>	the face
30.17	MAD	<i>MAD</i>	of your God,
30.18	IAOD	<i>Jáod</i>	the begynning
30.19	BLIORB	<i>bliorb</i>	of comfort:
30.20	SOBA	<i>sabaoóóña</i>	whose
30.21	OOAONA		eyes§
30.22	CHIS	<i>chis</i>	are
30.23	LUCIFTIAS	<i>Lucíftías</i>	the brightnes
30.24	PERIPSOL	<i>perípsol</i>	of the heavens;
30.25	DS	<i>ds</i>	which
30.26	ABRAASSA	<i>abraássa</i>	provided
30.27	NONCF	<i>noncf</i>	you
30.28	NETAÁIB	<i>netááib</i>	for the government
30.29	CAOSGO	<i>Caósgí</i>	of the Erth,*
30.30	OD	<i>od</i>	and

* The name of the ayre being invoked is inserted here. The ayres are listed in the margin of Sl. Ms. 3191 as well as on the preceeding figure. A more detailed description of the ayres and the beings attributed to each ayre is given in Book Four of this volume.

§ 30.21: OOAONA for 'eyes'; see 13.6.

* 30.29: CAOSGO for 'of the earth'; see 8.35, 8.63, 9.32, 14.13, 30.8. CAOSGIB, 'the earth'; see 4.44, 5.26.

III] DIAGRAM OF THE 30 AYRES]

30.31	TILB	<i>tilb</i>	her
30.32	ADPHAHT	<i>adphaht</i>	unspeakable
30.33	DAMPLOZ	<i>dámploz</i>	varietie
30.34	T00AT	<i>tó0at</i>	furnishing
30.35	NONCF	<i>noncf</i>	you
30.36	GMICALZ	<i>gmicalzôma</i>	with a powr
30.37	OM		understanding*
30.38	LRASD	<i>Lrásd</i>	to dispose
30.39	TOFGLO	<i>tófglo</i>	all things
30.40	MARB	<i>marb</i>	according
30.41	YARRY	<i>yárry</i>	to the providence
30.42	IDOIGO	<i>IDOIGO</i>	of him that sitteth on the holy Throne
30.43	OD	<i>od</i>	and
30.44	TORZULP	<i>torzulp</i>	rose up
30.45	IAODAF	<i>iáodaf</i>	in the begynning
30.46	GOHOL	<i>gohól</i>	saying,
30.47	CAOSGI	<i>Caósga</i>	The Earth
30.48	TABAORD	<i>tabaord</i>	Let her be governed
30.49	SAANIR	<i>saánir</i>	by her parts
30.50	OD	<i>od</i>	and
30.51	CHRISTEOS	<i>christéós</i>	Let there be
30.52	YRPOIL	<i>yrpóil</i>	Division
30.53	TIOBL	<i>tíóbl</i>	in her,
30.54	BUSDIR	<i>Busdir</i>	that the glory
30.55	TILB	<i>tilb</i>	of hir
30.56	NOALN	<i>noaln</i>	may be
30.57	PAID	<i>paid</i>	allwayes
30.58	ORSBA	<i>orsba</i>	drunken
30.59	OD	<i>od</i>	and
30.60	DODRMNI	<i>dodrmni</i>	vexed
30.61	ZYLNA	<i>zylna</i>	in itself:
30.62	ELZAP	<i>Ealzáptilb</i>	Her course,
30.63	TILB†		

* 30.37: OM for 'understanding'; see 2.4, 10.54, 16.19.

† 30.63: TILB for 'of her'; see 30.55. Could TILB be another suffix (like TOX) signifying possession?

30.64	PARMGI	<i>parmgi</i>	let it ronne
30.65	PERIPSAX	<i>perípsax</i>	with the heavens:
30.66	OD	<i>od</i>	and
30.67	TA	<i>ta</i>	as
30.68	QURLST	<i>qurlst</i>	a handmayd
30.69	BOOAPIS	<i>booapiS</i>	let her serve them:
30.70	L	<i>Lnibm</i>	One
30.71	NIMB		season
30.72	OUCHO	<i>ovcho</i>	Let it confownd
30.73	SYMP	<i>symp,</i>	another:
30.74	OD	<i>od</i>	And
30.75	CHRISTEOS	<i>Christéos</i>	let there be
30.76	AG	<i>Agtoltorn</i>	no
30.77	TOLTORN		Creature*
30.78	MIRC	<i>mirc</i>	uppon
30.79	Q	<i>Q</i>	or
30.80	TIOBL	<i>tióbl</i>	within her
30.81	LEL	<i>Lel,</i>	the same:
30.82	TOL	<i>Ton</i>	All
30.83	PAOMBD	<i>paombd</i>	her members
30.84	DILZMO	<i>dilzmo</i>	let them differ
30.85	ASPIAN	<i>aspian,</i>	in their qualities:
30.86	OD	<i>Od</i>	And
30.87	CHRISTEOS	<i>christêos</i>	let there be
30.88	AG	<i>ag</i>	no
30.89	L	<i>L</i>	one
30.90	TOLTORN	<i>tortorn</i>	Creature
30.91	PARACH	<i>parach</i>	æquall
30.92	ASYMP	<i>asymp,</i>	with another
30.93	CORDZIZ	<i>Cordziz</i>	The reasonable Creatures of
			Erth or Men
30.94	DODPAL	<i>dodpal</i>	let them vex
30.95	OD	<i>od</i>	and
30.96	FIFALZ	<i>fffalz</i>	weede out
30.97	L	<i>Lsmnad,</i>	one
30.98	SMNAD		another:

* 30.77: TOLTORN for 'creatures'; see 30.90.

30.99	OD	<i>od</i>	And
30.100	FARGT	<i>fargt</i>	the dwelling places,
30.101	BAMS	<i>bams</i>	let them forget
30.102	OMAOAS	<i>omaóas,</i>	their names:
30.103	CONISBRA	<i>Conisbra</i>	The work of man
30.104	OD	<i>od</i>	and
30.105	AVAVOX	<i>auáuox</i>	his pomp,
30.106	TONUG	<i>tonug,</i>	let them be defaced:
30.107	ORSCA	<i>Orscatbl</i>	His buyldings
30.108	TLB		
30.109	NOASMI	<i>noâsmi</i>	let them become
30.110	TABGES	<i>tabges,</i>	Caves
30.111	LEVITHMONG	<i>Levithmong</i>	for the beasts of the feild:
30.112	UNCHI	<i>unchi</i>	Confownd
30.113	OM	<i>omptilb</i>	her understanding
30.114	TILB*		
30.115	ORS	<i>ors.</i>	with darknes.
30.116	BAGLE	<i>Bagle</i>	For why?
30.117	MOOOAH	<i>Moóóáh</i>	It repenteth me
30.118	OL	<i>olcórdziz.</i>	I made§
30.119	CORDZIZ		Man.
30.120	L	<i>L</i>	One
30.121	CAPIMAO	<i>capímao</i>	while
30.122	IXOMAXIP	<i>ixomaxip</i>	let her be known,
30.123	OD	<i>od</i>	and
30.124	CA	<i>cacócasb</i>	another
30.125	CAPIMAO		while†
30.126	GOSAA	<i>gosáa.</i>	a stranger:
30.127	BAGLEN	<i>Baglen</i>	Bycause
30.128	PI	<i>píi</i>	she
30.129	I		is
30.130	TIANTA	<i>tianta</i>	the bed
30.131	ABABALOND	<i>abábálonð</i>	of an Harlot,

* 30.114: The English would be better rendered as 'the understanding of her'; see note on 30.63.

§ 30.118: Possibly a contraction--if so, a word is missing. OL is 'I' (first person singular), while CORDZIZ is 'men'. Perhaps the 'made' is somehow understood?

† 30.125: The English probably should be 'time'; see 4.32.

30.132	OD	<i>od</i>	and
30.133	FAORGT	<i>faórgt</i>	the dwelling place
30.134	TELOCVOVIM	<i>telocvovim.</i>	of him that is fahn:*
30.135	MADRIIAX	<i>Mádríiax</i>	O you heavens,
30.136	TORZU	<i>torzu</i>	arrise,
30.137	OADRIAX	<i>oádríax</i>	the lower heavens
30.138	OROCHA	<i>orócha</i>	underneath you,
30.139	ABOAPRI	<i>abóápri.</i>	Let them serve you:
30.140	TABAORI	<i>Tabáóri</i>	Govern
30.141	PRIAZ	<i>priáz</i>	those
30.142	AR	<i>artabas.</i>	that†
30.143	TABAORI		govern:
30.144	ADRPAN	<i>Adrpan</i>	Cast down
30.144	ADRPAN		Cast down
30.145	CORS	<i>corsta</i>	such
30.146	TA		as
30.147	DOBIX	<i>dobix.</i>	fall:
30.148	YOLCAM	<i>Yolcam</i>	Bring forth

† 30.181: Contraction IAD-NAMAD or 'God'-'knowledge'.

BOOK FOUR

EARTHLY KNOWLEDGE, AID & VICTORY

WHEN THE MOST HIGH DIVIDED TO THE NATIONS THEIR inheritance, when he separated the sons of Adam, he set the bounds of the people according to the number of the children of Israël*. **¶** And had a wall great and high, and had twelve gates, and at the gates twelve angels, and names written thereon, which are the names of the twelve tribes of the children of Israël†.

* Deuteronomy, Chapter 32.

† Revelation, Chapter 21.

[NB. The following captions are to be read for the numbered columns following:—ED.]

1. | Part of the Earth as imposed by Man.
2. | Part of the Earth as imposed by God.
3. | Divinely ordained Symetric Characters.
4. | Ordered Sphere of good & noble Ayres.
5. | Number of Good Ministers ordered in 3 parts.
6. | Total of all good Ministers.
7. | Angelic Kings Ruling the 30 orders and also the 12 tribes.
8. | Tribes of the people of Israël Dispersed.
9. | Quarter of the Earth to which the dispersed tribes are assigned.

CHAPTER III THE GREAT CIRCLE OF THE QUARTERS

✠ The four triads are the Names of God extracted from the four lines of the holy spirit, which govern all creatures on the earth (both visible and invisible). They are carried upon twelve banners.

CHAPTER IV
THE FUNDAMENTAL OBESANCE

This is the fundamental obesance to God, and the conjuration for obtaining the benign ministry of the good angels.

IEOVAHZEBAOTH, I, JOHN DEE (YOUR UNWORTHY servant) most earnestly invoke and call upon your divine power, wisdom, and goodness. I humbly and faithfully seek your favour and assistance to me in all my deeds, words, and thoughts, and in the promoting, procuring, and mingling of your praise, honour, and glory. Through these, your twelve mystical Names: ORO, IBAH, AOZPI, MOR, DIAL, HCTGA, OIP, TEAA, PDOCE, MPH, ARSL, GAIOL, I conjure and pray most zealously to your divine and omnipotent majesty, that all your angelic spirits (whose mystical names are contained in this book, and whose offices are herein briefly noted) might be called from any and all parts of the universe, or at any time in my life, through the special domination and controlling power of your holy Names (which are also in this book). Let them come most quickly to me. Let them appear visibly, friendly, and peaceably to me. Let them remain visible according to my will. Let them vanish from me and from my sight when I so request. Let them give reverence and obedience before you and your 12 mystical Names. I command that they happily satisfy me in all things and at all times in my life, by accomplishing each and every one of my petitions—if not by one means, then by another—goodly, virtuously, and perfectly, with an excellent and thorough completeness, according to their virtues and powers, both general and unique, and by Your united ministry and office

O God . AMEN.

Through you, Jesu Christe,

AMEN

CHAPTER V
THE TWENTY FOUR SENIORS

✠ These are the twenty-four Seniors (mentioned in the Apocalypse of Saint John) whose names are compiled from the lines of the Father, the Son, and the Holy Ghost. The duty of these Good Angels is to impart knowledge and judgement in human affairs.

QUARTER	GOD NAME	SENIORS
East	BATAIVA or BATAIVH	Abioro or Habioro Aaoxaif Htmorda Haozpi or Ahaozpi Hipotga Autotar
South	ICZHHCA or ICZHHCL	Aidrom or Laidrom Aczinor Lzinopo Lhctga or Allhctga Lhiansa Acmbicu
West	RAAGIOS or RAAGIOL	Srahpm or Lsrahpm Saiinou Laoaxrp Lgaiol or Slgaiol Ligdisa Soaiznt
North	ELDPRNA or EDLPRNA	Ætpio or Aætpio Adocoet Alndvod Apdoce or Aapdoce Arinnaq Anodoin

¶ *This is the invitation to the six seniors of the East:*

YOU SIX SENIORS OF THE EAST, POWERFUL AND FAITHFUL to the omnipotent God of our ministry, in the name of the same God (one and three), I say to you, ABIORO or HABIORO, AAOZAI, HTMORDA, HAOZPI or AHAOZPI, HIPOTGA, AUTOTAR, through the divine Name by which you are particularly bound, the angelic Name BATAIVA or BATAIVH, I, John Dee, a faithful servant of the omnipotent God, amicably, earnestly, and confidently demand and beseech you to appear placidly, affably, and favourably before me, immediately and without delay, and henceforth at any time I wish, through all the remaining journey of my life, I beseech all of you, some of you, or whichever of you I name, united or divided, to grant all my petitions, and especially grant me Knowledge and Judgement in human affairs, and in all other things that are assigned to your Office and Ministry and that are accomplished by you, one and many. I command you to appear, to perform, and to complete, goodly, plainly, intelligibly, and perfectly, according to your Virtue, Power, and Office, and according to the capacity of your Ministry, entrusted and committed to you by the omnipotent God

AMEN

Through the sacred Name of God
BATAIVA or BATAIVH

§ This is the invitation of the four good angels of the East, who are learned and powerful in Transformation:

YOU FOUR GOOD AND TRUE ANGELS OF GOD (OUR CREATOR), ABMO or ABAMO, NACO or NAOCO, OCNM or OCANM, SHAL or SHIAL, who rule in the Eastern part of the world, who received of God in your creation the singular strength, true knowledge, and perfect absolute power of Transformation as your duty and office, that you might impart and make manifest unto men (as preordained by the same, our God) this true knowledge and perfect power, to the praise, honour, and glory of God. Therefore, I, John Dee, the devoted servant of the same, our God and Creator, truly, diligently, and faithfully desiring to praise, honour, and glorify in God, do vehemently demand and confidently beseech you, one and all, to bring to pass and amplify amongst men this your aforementioned true knowledge, through these mystical Names of God (pre-eminently and predominantly peculiar to you): AIAOAI and OIIIT. I, John Dee, demand that you appear benignly, placidly, and visibly to me, at whatever moment in time I should choose, for all the remaining time of my life, and moreover I demand that you deign to be friendly and favourable unto me. I, John Dee, demand that you (one and all), immediately and without delay, perfectly accomplish, manifestly discharge, plainly complete, and plentifully make perfect each and every one of my petitions, by whatever means necessary, that concern or respect your skill, knowledge and power of Transformations, no matter when I shall require it of you, through these Names of our God, here rehearsed: AIAOAI and OIIIT.

¶ This is the invitation of the four good angels of the West, who are learned and powerful in Transformation:

YOU FOUR GOOD AND TRUE ANGELS OF GOD (OUR CREATOR), PACO or PALCO, NDZN or NDAZN, IPO or IDPO, XRNH or XRINH, who rule in the Western part of the world, who received of God in your creation the singular strength, true knowledge, and perfect absolute power of Transformation as your duty and office, that you might impart and make manifest unto men (as preordained by the same, our God) this true knowledge and perfect power, to the praise, honour, and glory of God. Therefore, I, John Dee, the devoted servant of the same, our God and Creator, truly, diligently, and faithfully desiring to praise, honour, and glorify in God, do vehemently demand and confidently beseech you, one and all, to bring to pass and amplify amongst men this your aforementioned true knowledge, through these mystical Names of God (pre-eminently and predominately peculiar to you): MALADI and OLAAD. I, John Dee, demand that you appear benignly, placidly, and visibly to me, at whatever moment in time I should choose, for all the remaining time of my life, and moreover I demand that you deign to be friendly and favourable unto me. I, John Dee, demand that you (one and all), immediately and without delay, perfectly accomplish, manifestly discharge, plainly complete, and plentifully make perfect each and every one of my petitions, by whatever means necessary, that concern or respect your skill, knowledge and power of Transformations, no matter when I shall require it of you, through these Names of our God, here rehearsed: MALADI and OLAAD.

CHAPTER XIII
THE ANGELS OF SECRET DISCOVERY

✠ These are the names of the sixteen good angels who are skilled and powerful in the discovering the secrets of all men.

QUARTER	GOD NAME	ANGELS	LETTER OF THE CROSS
East	HXGZD	XGZD GZDX ZDXG DXGZ	A
South	HIAOM	IAOM AOM OMIA MIAO	S
West	PNLRX	NLRX LRXN RXNL XNLR	I
North	PZIZA	ZIZA IZAZ ZAZI AZIZ	R

¶ This is the invitation to the four good angels of the East, who are skilled and powerful in the discovery of the secrets of men.

YOU FOUR WISE & TRUTHFUL ANGELS OF THE OMNIPOTENT God, and ministers of our Creator: O you, XGZD, GZDX, ZDXG, and DXGZ, who dwell in the Eastern part of the world, and whom the same, our God, hath assigned and bestowed the great and special office of discovering and understanding the secrets of men of whatver degree, state or condition. I, John Dee, theu devoted servant of the same God, a careful investigator, but by no means curious of the secret endeavors, acts, and events of any type of man (good or evil) unless it might be necessary for the good of the Christian Republic for me to see, understand, and discover, do humbly require and vehemently petition from you, one and all, through our omniscient God and through this mystical Name HXGZD, that, at whatever time of my future life that I should call or invoke any or all of you through the Name of God, HXGZD, that you come to me immediately, benignly, and peacefully, and that you appear to me personally and visibly, and that you discharge, implement, and make perfect, truthfully, plentifully, and perfectly, all of my petitions (to be done by one, any, or all of you) concerning the secrets of any men, regardless of state and condition.

Through this holy and mystical Name of God

[Vide page 181, **Q**IJ., number 6.]

APPENDICES

APPEND X A

THE PRACTICE OF ENOCHIAN EVOCATION

HERE ARE NO DESCRIPTIONS IN DEE'S EXTANT DIARIES OF actual Enochian evocation rituals, a fact that has led some scholars to conclude that he never attempted the magic. The existence, however, of artifacts such as the wax sigils of Æmeth in the British museum indicate that Dee, at the very least, constructed some of the requisite furniture. In addition, Dee compiled Sloane MS. 3191 (the primary source for *The Enochian Evocation*) to be a working collection of conjurations for use in magical ceremonies. Although it is possible that Dee never went through with the experiments, it is far more likely that he recorded the events in a separate diary that has not survived. Dee was a rabid diarist, and kept at least three concurrent diaries during the period that he was working with Kelly, each diary covering a different aspect of his life. It would be well in character for Dee to initiate a special diary for the practice of the 'radical truths' that he had sought for so many years.

There are many clues that assist in uncovering the operative portions of this arcane branch of magical lore. Sloane MS. 3191, for example, delineates the portions of Enochian evocation that Dee thought were most essential. Other clues are scattered throughout the surviving diaries. Dee describes many scrying sessions, and it is unlikely that the Enochian rituals differed very greatly from those he practiced with his scryers. In addition, many passages from the scrying sessions contain hints and instructions concerning Enochian evocation. Another valuable source of information is the body of magical literature that was available to Dee and Kelly. The effect of Agrippa, for example, upon Dee's philosophical outlook is obvious, and many aspects of Enochian evocation are dependant upon the world-view of

the renaissance Magi. Also, Kelly's involvement in black magic indicates influence from other magical texts. When all these sources of information are gathered together, a coherent picture emerges of the practice of Enochian evocation.

This appendix discusses:

1. The personnel & apparel required for the rituals.
2. The furniture and construction of the temple.
3. The book of prayers & conjurations.
4. The Angelic hierarchies
5. The talismans for the Angelic hierarchies.
6. The scheduling of the ceremonies.

¶ I. PERSONNEL

ENOCHIAN rituals were practiced by two people, a Magus and Scryer. The Magus chanted the conjurations, compelling the Angels (by the power of the Names of God) to appear within the crystal stone. The Scryer gazed into the crystal and related his visions. The Magus doubled as scribe, recording the visions and the results of the ceremony.

Both Scryer and Magus were expected to lead holy lives (at least while practicing the magic), to cultivate piety and humility, and to abstain from the practice of black magic. During the ceremonies, both were dressed in white linen robes, and the magus wore a magical ring with a gold seal (as shown in Book Two). Other renaissance magical texts recommend that the Magus wear a crown and carry a magical wand and or sword, but none of these are mentioned in Dee's work.

¶ II. FURNITURE

BEFORE practicing Enochian evocation, the Magus and Scryer located or constructed the following items:

1. A crystal ball. This was handled only by the magus or the scryer. Dee's was rather small, about two inches in diameter.
2. A circular wax tablet, 9 inches in diameter and 1.5 inches thick, inscribed on the front with the sigil of Æmeth and on the back with a cross. These designs are shown in Book Two. The center of the front was hollowed out slightly, so that

the crystal ball could easily be placed on top of the Sigil.

3. Four wax tablets, about 4 inches in diameter, similarly inscribed.
4. A red silk 'rug', two yards square.
5. A red and green (or multi-coloured) tablecloth, about 1.5 yards square, with tassels at each corner.
6. A table constructed of 'sweet wood' [cedar?] a yard (two cubits) square, with yard long legs. Each leg terminated with a hollow cylinder, slightly more than 4 inches on the inside diameter and about 0.5 inches thick. The basic structure of this table is shown in Book Two; because of its low profile, two wooden stools were probably also necessary. A set of elaborate sigils were to be painted in yellow oils on the top surface of the table. The arrangement of these sigils is too complex to be reproduced in this volume, but can be found in *The True Relation* between the Preface and the first book, on the page labeled 'The Holy Table'.
7. Twelve banners or flags each embroidered with a Name of God as shown in Book Five.

This furniture was arranged into a temple where Enochian evocation could be practiced. This may have been intended to be in the open air rather than within a building, as there are no descriptions of candles or torches. Furthermore, the magical circle specifies 'Terra' [Earth], which may or may not have been intended symbolically.

The temple was constructed in the following manner:

1. The place of working was enclosed by a circle as shown in Book Five, Chapter Three. The banners were propped at the circle's edge.
2. The red silk rug was laid in the center of the circle.
3. The four small wax tablets were arranged in a square pattern in the center of the silk rug, 1 yard square.
4. The table was balanced upon the wax tablets, so that the hollow cylinders at the end of the table legs overlapped them.
5. The large wax tablet was placed on the center of the table.
6. The silk tablecloth was draped over the table, covering the large wax tablet, so that the tassels dangled almost to the floor.

7. The crystal was laid on the top of the tablecloth, balanced on the indentation in the wax tablet.

¶ III. THE MAGICAL BOOK

THE MAGUS was required to have a book in which prayers and conjurations were recorded for use within the temple. For the complete practice of Enochian evocation, it probably would have had the following contents:

§1. PRAYERS

THE ORATION TO GOD—as shown in Book Two, Chapter Five.

THE PRAYER OF ENOCH—as shown in Book One, Chapter Two.

THE FUNDAMENTAL OBESANCE—as shown in Book Five, Chapter Four.

§2. CONJURATIONS

THE HEPTARCHIC CONJURATIONS—formed by inserting the specific attributes of each King and Prince (as shown in Book Two, Chapter Seven) with the generalized conjuration (as shown in Book Two, Chapter Six).

THE ANGELICAL KEYS—as shown in Book Three. These were to be written in both Angelical and English. Note that the last key was to be repeated 30 times, with the third word altered to indicate the Aire being worked. In Sloane MS. 3191, the the various Aires are listed in the margin. The individual names of the Aires are given in Book Four, Column Four.

THE INVITATIONS TO THE ANGELS OF THE QUARTERS—as shown in Book Five, Chapters Five through Thirteen.

The ordering of Dee's workbooks suggests that he intended a certain cross-semination of the earlier (Heptarchic) and later (Angelical) systems. In any case, the magical book is described in Dee's diaries as consisting *first of the invocation of the Names of God and second of the invocation of the Angels, by the Names of God*—an ordering is preserved in the contents above.

Note that, unlike other renaissance magical systems, Enochian evocation does not include a 'Dismissal' or 'Licence to Depart', a conjuration designed to send a spirit back to its dwelling place. Dee evidently felt this to be unnecessary, although most renaissance Magi would have considered this omission dangerous.

IV. THE ANGELS

ENOCHIAN evocation was believed to summon three interrelated hierarchies of angels:

1. THE HEPTARCHICAL ROYALTY—who were believed to govern *all earthly actions, & disperse of the will of the Creator*. One conjured them to obtain *knowledge of God truly, the number and doings of His Angels perfectly and the beginning and ending of Nature substantially*. These Angels were based upon the 7 planets and the 7 days of the week.
2. THE ANGELS OF THE AIRES—who were believed to rule over the various countries of the earth. One conjured them to *subvert whole countries without armies, to get the favour of all the (human) Princes, & to know the secret treasure of the waters, and the unknown caves of the earth*. These Angels were based on the 12 houses of the Zodiac and the 30 Aires, which were evidently subdivisions of the 'vault of stars' in which the 'fixed stars' were believed to reside.
3. THE ANGELS OF THE QUARTERS—who were believed to have been *put onto the earth so that the Devil's envious will might be bridled, the determinations of God fulfilled, and his creatures kept and preserved*. One conjured them to obtain a variety of semi-divine powers and capabilities. These Angels were based upon the 4 Elements and the 4 compass points.

Thus Enochian evocation consisted of a complete panoply of magical art, covering planetary, zodiacal, and elemental operations and reputed to control hundreds of named and thousands of unnamed Angelic creatures. Because of the complexity of these Angelic hierarchies, I shall discuss each in detail.

§1. THE HEPTARCHICAL ROYALTY

THE HEPTARCHICAL Royalty are described in Book Two, Chapter Four, and were believed to rule over the days of the week and the planets. The relationship of the primary Heptarchical hierarchy is shown in the following figure:

KING CARMARA

PRINCE HAGONEL

Sons of Light	I	Ih	Isr	Dmal	Hecoa	Beigia	Stimcul
Sons of the Sons of Light	EL	An	Ave	Liba	Rocle	Hagonel	Ilemese
Kings	BALIGON BNASPOL BOBOGEL BABALEL BYNEPOR BNAPSEN BLUMAZA						
Princes	BAGANOL BLISDON BORNOGO BEAFES BUTMONO BRORGES BRALGES						
The Table of the 42 Ministers	AOAYNNL	ELGNSEB	LEENARB	EILOMFO	BBARNFL	BANSSZE	OESNGLE
	LBENAAY	NLINZVB	LNANAEB	NEOTPTA	BBAIGAO	BYAPARE	AVZNILN
	IOAESPM	SFAMLLB	ROEMNAB	SAGACIY	BBALPAE	BNAMGEN	YLLMAIS
	GGLPPSA	OOGOSRS	LEAORIB	ONEDPON	BBANIFG	BNVAGES	NRSOGOO
	OEEOOEZ	NRPCRRB	NEICIAB	NOONMAN	BBOSNIA	BLBOPOO	NRRCPRN
	NLLRLNA	ergdbab	AOIDIAB	ETEVLGL	BBASNOD	BABEPEN	LABDGRE
	(Fri.)	(Wed.)	(Sun.)	(Tues.)	(Thurs.)	(Sat.)	(Mon.)

Note that the 'Son of the Sons' HAGONEL had a different sigil than PRINCE HAGONEL and thus was a different angelic personage.

The names of the 42 ministers were generated from the each table by starting with each letter and continuing rightwards to the end of the table, then looping around to the beginning. This made six sets of seven ministers per day, each set ruling for four hours [beginning at midnight]. For example, the 42 ministers for Prince BAGANOL (Friday) are

12AM— 4AM	<i>Aoaynnl</i>	<i>Oaynnla</i>	<i>Aynnlao</i>	<i>Ynnlaoa</i>	<i>Nnlaoay</i>	<i>Nlaoayn</i>	<i>Laoaynn</i>
4AM— 8AM	<i>Lbbnaav</i>	<i>Bbnaavl</i>	<i>Bnaavlb</i>	<i>Naavlbh</i>	<i>Aavlbhn</i>	<i>Avlbhna</i>	<i>Vlbhnaa</i>
8AM—12PM	<i>Ioæspm</i>	<i>Oæspmi</i>	<i>Aespmio</i>	<i>Espmioa</i>	<i>Spmioæ</i>	<i>PmioæS</i>	<i>Mioæsp</i>
12PM— 4PM	<i>Gglppsa</i>	<i>GlppsaG</i>	<i>LppsaGG</i>	<i>PpsaGgl</i>	<i>Psagglp</i>	<i>Sagglpp</i>	<i>Agglpps</i>
4PM— 8PM	<i>Oeeoez</i>	<i>Eeeoez</i>	<i>Eoezoe</i>	<i>Oeezoe</i>	<i>Oezoeo</i>	<i>Ezoeoe</i>	<i>Zoeoeo</i>
8PM—12AM	<i>Nllrlna</i>	<i>Lrlrlan</i>	<i>Lrlnanl</i>	<i>Rlnanll</i>	<i>Lnanllr</i>	<i>Nanllrl</i>	<i>Anllrln</i>

The Heptarchical Royalty also included a set of 49 planetary angels, of whom 14 were the Kings and Princes for the days. The 'Table of the 49 Good Angels' at the close of Book Two shows the primary planetary attribution of each of these entities. Curiously, the planetary attributions of the Kings were the only ones that matched the traditional linking of the days of the week with the planets. By extrapolation, it is likely that each angel had a double attribution as follows:

SUNDAY		MONDAY	
BOBOGEL	Sol of Sol	BLUMAZA	Luna of Luna
BORNOGO	Sol of Venus	BRALGES	Luna of Saturn
Bablibo	Sol of Luna	Baspalo	Luna of Mercury
Buscnab	Sol of Saturn	Belmara	Luna of Jupiter
Bariges	Sol of Mercury	Bragiop	Luna of Mars
Barnafa	Sol of Jupiter	Brisfli	Luna of Sol
Bonefon	Sol of Mars	Basledf	Luna of Venus
TUESDAY		WEDNESDAY	
BABALEL	Mars of Mars	BNASPOL	Mercury of Mrcry
BEFAFES	Mars of Sol	BLISDON	Mercury of Jupitr
Bapnido	Mars of Venus	Bazpama	Mercury of Mars

Blingef	Jupiter of Luna	Benpagi	Venus of Jupiter
Bartiro	Jupiter of Saturn	Bermale	Venus of Mars
Baldago	Jupiter of Merc.	Bagnole	Venus of Sol

SATURDAY

BNAPSEN	Saturn of Saturn
BRORGES	Saturn of Mercury
Balccor	Saturn of Jupiter
Blintom	Saturn of Mars
Branglo	Saturn of Sol
Bmamgal	Saturn of Venus
Bamnode	Saturn of Luna

§2. THE ANGELS OF THE AIRES

THE 91 PRINCIPAL Angels of the Aires are listed in tabular form in Book Four.

COLUMN ONE gives the name of the country over which each Angel rules. These are based on Ptolemy's Geography.

COLUMN TWO gives the name of each Angel, which is the same as the name of the part of the Earth as imposed by God.

COLUMN THREE gives the sigil for each Angel. These are derived from the Great Table of the Quarters, by connecting the letters that spell the Angel's name. Note that 'PARAOAN' is an 'overlay' using letters belonging to other Angels, (beginning with the 'P' in PARZIBA) and that 'LEXARPH', 'COMANAN', and 'TABITOM' are generated from the central cross. 'LEXARPH' uses the 'L' at the bottom right corner of the Western quarter. These sigils are not given in Sloane MS. 3191, but are included here for completeness. Note also that a sigil is given in the table for an entity LAXDIZI, which is not in the 91 Aires.

COLUMN FOUR gives the Aire in which the Angel dwells. These are evidently similar to the layers of Heaven described in Gnostic texts. The order LIL is the highest and TEX is the lowest; note that the Holy Land is governed by LIL.

COLUMN FIVE gives the number of servitor Angels (ministers) that are controlled by each Angel.

COLUMN SIX gives the total of all the Angels ruling in each Aire.

COLUMN SEVEN gives the names of the Angelic Kings that rule over each Angel. There is one King per sign of the Zodiac:

1. OLPAGED for Scorpio, 2. ZIRACAH for Aquarius, 3. HONONOL for Leo, 4. ZARNAAH for Gemini, 5. GEBABAL for Libra, 6. ZURCHOL for Pisces, 7. ALPUDUS for Cancer, 8. CADDAMP for Sagittarius, 9. ZARZILG for Virgo, 10. LAVAVOTH for Aries, 11. ZINGGEN for Capricorn & 12. ARFALOG for Taurus.

COLUMN EIGHT gives the tribe of Israël that corresponds to the Angelic King and each sign of the Zodiac.

COLUMN NINE gives the compass points that should be faced when invoking each angel.

§3. THE ANGELS OF THE QUARTERS

THE ANGELS of the Quarters are listed in detail at the beginning of Chapters Five through Thirteen of Book Five. A cursory examination of the crosses on the tables accompanying each 'Invitation' [conjunction] reveals how these names are generated. Many of the Angels have dual names—presumably both are correct, as both are used in the invitations.

The names of the cacodemons in Chapters Six through Nine are generated by taking a letter from the central cross of the Great Table, and combining it with the first two letters of each Angel's name. For example, the cacodemon X CZ is formed by taking the 'X' in EXARP and combining it with the 'CZ' in CZNS or CZONS. These cacodemons are the only vestige of black magic in Dee's evocation system, other than the stipulation that the word VAOAN in the first Angelical key is to be altered to VOOAN when conjuring evil spirits.

¶ V. TALISMANS

THE USE of various talismans were considered necessary for the practice of evocation magic in general, and were probably used for Enochian evocation as well. Only one Enochian talisman has survived: a beautiful gold disk in the British Museum. *A True Relation* shows an engraving of his disk on page preceding THE HOLY TABLE; the talisman commemorates a vision that Kelly had of the Angels of the Quarters:

A Vision. The sign of the love of God toward his faithful. Four sumptuous and belligerent Castles, out of the which sounded Trumpets thrice.

✠ *The sign of Majesty, the Cloth of the passage was cast forth.*

✠ *In the East, the cloth red; after the new smitten blood*

✠ *In the South, the cloth white, Lilly-colour*

✠ *In the West a cloth, the skins of many Dragons, green; garlic bladed.*

✠ *In the North, the cloth, Hair-coloured, Bilbery juyce.*

The Trumpets sound once. The gates open. The four Castles are moved. There issueth 4 Trumpeters, whose Trumpets are a Pyramis, six cones, wreathed. There followeth out of every Castle 3, holding up their Banners displayed, with ensigne, the Names of God. There follow Seniors six, alike from the four Gates: After them cometh from every part a King: whose Princes are five, gardant, and holding up his train. Next issueth the Crosse of 4 angels, of the Majesty of Creation in God attended upon everyone, with 4: a white Cloud, 4 Crosses, bearing the witnesses of the Covenant of God, with the Prince gone out before; which were confirmed, everyone, with ten Angels, visible in countenance; After every Crosses, attendeth 16 Angels, dispositors of the will of those, that govern the Castles. They proceed. And, in and about the middle of the Court, the Ensigns keep their standings, opposite to the middle of the Gate: The rest pause. The 24 Senators meet: They seem to consult. It vanisheth.

Although the use for the gold disk is not known, it may have been worn as a protective amulet during the Enochian evocation ritual

The Magus was definitely required to construct a talisman for each group of Angels that he wished to conjure. These were made of 'sweet wood', with the characters 'painted' upon them. The talismans were *held in the hand as thou shalt have cause to use them*, implying that the Magus held them during the prayers. During the conjurations, however, *thy feet must be placed upon these tables*, indicating that the Magus' dominance over the Angels was signified by his standing upon the Talisman.

Although none of these talismans appear to have survived, the talismanic methods of Agrippa can be applied to devise probable reconstructions of these important ceremonial objects.

§1. TALISMANS FOR THE HEPTARCHICAL ROYALTY

ALTHOUGH this hierarchy includes several hundred entities, only the prince of each day and the SONS OF THE SONS OF LIGHT actually have their own 'signatures' or sigils. Evidently this means that a single talisman was to be constructed for each day, with an extra one for King CARMARA and Prince HAGONEL. The following sample represents a speculative reconstruction of the talisman for the conjuration of the Angels of Friday:

§2. TALISMANS FOR THE ANGELS OF THE AIRES

EACH OF THE 91 Princes has his [or her] own signature, which clearly implies that 91 separate talismans were to be constructed. The Angelic Kings of the Zodiac have no signatures, which indicates that their name alone (like the magical Names of God) carried the requisite power to invoke their influence. The following sample represents a speculative reconstruction of the talisman for the conjuration of PASCOMB, the Earthly Guardian of Syria:

§3. TALISMANS FOR THE ANGELS OF THE QUARTERS

NONE OF THE Angels of the Quarters have their own signatures, a fact that would seem to indicate the relatively exalted status of

these entities. The following sample represents a speculative reconstruction of the talisman for the conjuration of the Angels of Transformation that dwell in the West:

§4. ENOCHIAN LETTERS

IT IS POSSIBLE that, rather than Roman letters, the 'Enochian' alphabet was to be used to draw up the talismans (although no Enochian letters appear in Sloane ms. 3191). There are several versions of this magical alphabet in Dee's diaries; the following version appears to be a script rendition, as it is much easier to write with a quill pen than the sigil-like letters that appear later in Dee's notes.

¶ VI. THE CEREMONIES

AFTER THE FURNITURE, book, and talisman had been prepared, the following schedule was to be kept:

1. FIRST FOUR DAYS—prayers were fervently spoken three times daily.
2. NEXT FOURTEEN DAYS—while continuing with the prayers, conjurations were added to the agenda.
3. THE FIFTEENTH DAY—at this point the prayers and conjurations were believed to become effective, and the Angels were supposed to appear within the crystal.

Once the Angels had appeared, it was no longer considered necessary to go through the entire repertory to conjure them. Once successfully conjured, the Angels were to remain obedient to the Magus for the remainder of his life.

It is probable that some cross-semination might have been intended, for example, using the first 18 Keys as preliminary conjurations to summoning the Angels of the Quarters. Dee also tended to punctuate his scrying sessions with readings from the Bible; *Psalm* 33 is mentioned specifically.

APPENDIX B
TRANSLATOR'S NOTES

The Story of the Manuscripts

THE SURVIVAL OF THE MAGICAL MANUSCRIPTS OF JOHN DEE was an accident, or more accurately, a series of accidents and coincidences that rival in strangeness the subject matter that the manuscripts contain.

Even while they were being written, certain of the most essential manuscripts were almost destroyed. Although the incident and the motivations behind it are not mentioned in any of the extant diaries, Dee describes their reappearance:

I espied . . . a sheet of faire white paper lying tossed to and fro in the wind. I rose and went up to it and there I found three of my Books lying, which were so diligently burnt the tenth day of April last. The three books were: 1. Enoch his Book, 2. The 48 Claves Angelicæ, 3. Liber Scientia terrestris auxilii & victoriæ.[Additional manuscripts were then discovered to be:] in the back of the furnace . . . the hole which was not greater than the thickness of a brick.†*

Perhaps to prevent further mishaps, Dee later secreted a number of the more important manuscripts in the false bottom of a cedar chest, *whose lock and hinges [were] extraordinarily neat*, where they remained hidden for over 50 years. The chest was sold at the auction following Dee's death to one Mr. John Woodall, and eventually found its way into a furniture shop in Adle Street on London. A Mr. Jones, confectioner, bought it for his wife, and for twenty years the chest with its secret treasure remained in her boudoir. Then one day, upon moving the chest, Mrs. Jones *heard some loose thing rattle it, toward the right hand end, under the box or till*. Her husband pried open the bottom, revealing *a private drawer, which being drawn out, therein were found diverse books*

* Casaubon, *op. cit.*, p. 418.

† *Ibidem*, p. 419.

*in manuscript and papers, together with a little box, and therein a chaplet of olive beads, and a cross of wood hanging at the end of them.**

Ignorant of the value of the papers, they allowed *their servant maid to waste about one half of them under pies, and other like uses but later kept the rest more safe.* Four years later, Mrs. Jones was forced to flee the great fire of London and, *though the chest perished in the flames, because not easily to be removed, yet the books were taken out and carried with the rest of her goods.* She later remarried a Mr. Wale, who identified the manuscripts and transferred them to Elias Ashmole, a respected scholar, for transcription and preservation.†

Elias Ashmole also preserved a number of Dee's diaries (December 22, 1581 to May 23, 1583) that were in the library of one Samuel Story. Yet another 17th Century scholar, Meric Casaubon discovered [and published in the *True Relation*] additional diaries from April 20, 1583 to May 23, 1587 in the library of Sir Thomas Cotton, who had inherited them from his father, Sir Robert Cotton, one of Dee's contemporaries. Casaubon also located a very rare fragment of Dee's diaries from late in his life (March 20, 1607 to September 7, 1607), which had been *underground, God knows how long.*‡

The preservation of Dee's manuscripts by Ashmole & Casaubon illustrates that the importance of Dee's manuscripts was already recognized within 50 years of his death. These manuscripts have had an enormous effect upon the development of occultism in Great Britain and the United States. An interesting fragment, included at the back of Sloane MS.3677 (Ashmole's copy of Sloane MS. 3188), describes the finding of treasure using magical names from the Enochian system. From internal references and style of handwriting, we know that this fragment dates from the mid-17th Century, indicating that the Enochian magical system was maintained in practical use after Dee's death. It is possible that elements of the system may have been introduced into the Rosicrucian teachings by Ashmole; in any case magicians of later centuries have constructed elaborate additions to Dee's original system.

* *Vide*, Ashmole's preface to Sloane MS. 3677.

† *Ibidem.*

‡ *Vide* Casaubon's Preface to the *True Relation*.

APPENDIX C
GENERAL METHOD OF TRANSLATION
& TRANSCRIPTION

THE ENTIRE CORPUS of Dee's magical work is far too large to present in a single volume. The *Enochian Evocation* is intended to present the essential core of Dee's evocation system arranged in a fashion similar to other renaissance evocation texts. It was transcribed, translated and edited according to the following procedure:

1. Manuscripts copies were obtained in microfilm from the British Library.
2. The various manuscripts were cross-compared to differentiate between essential and non-essential portions. The first level of cross-comparison was performed at this time.
3. The textual material from the essential portions of the manuscripts was transcribed.
4. Latin portions were translated.
5. The resulting corpus was subjected to further cross-comparison and linguistic analysis, and arranged to resemble a typical evocation text of the renaissance.
6. The text was edited for consistancy and clarity.
7. The various sigils and figures for the text were carefully traced and restored from microfilm prints of the source manuscripts.
8. To clarify discrepancies, I traveled to London and examined Sloane ms. 3191 personally at the British Library.
9. The resulting material was brought to completion and published by Heptangle Books.

Notes on Book One

BOOK ONE consists of excerpts from four of Dee's diaries, all contained in Cotton Appendix XLVI and published in the *True Relation*:

Mensis Mysticus Saobaticus Pars primus ejusdem, op. cit. 73-114

Libri Mystici Apertorii Cracoviensis Sabbatici, op. cit., 115-152

Libri Semptimi Apertorii Cracoviensis Mystici Sabbatici, op. cit., 153-202

Libri Cracoviensis Mysticus Apertorius Præteria Præmium Madimianum, op. cit., 203-212

The intent of Book One is to provide the pseudo-history of the magic as related by Kelly's angels, as well as hints as to its purpose and practice. Nearly every renaissance magical text contains such a 'pedigree', which is entirely lacking in Sloane MS. 3191.

Notes on Book Two

BOOK TWO consists primarily of *De Heptarchia Mystica*, which is contained in Sloane MS. 3191, 32[ro] to 51[ro]. The sigil of Æmeth, the ring of Solomon, and the table are from *Mysteriorum Liber Primus* in Sloane MS. 3188. The first three chapters of *De Heptarchia Mystica* (as presented in MS. 3191) contain cross-references to dates in Sloane MS. 3188; these have been omitted as unnecessary. Sloane MS. 3677 and Sloane MS. 3678 (Elias Ashmole's copies of MSS. 3188 and 3199 respectively) were also used for additional readings.

Notes on Book Three

BOOK THREE is based upon the 49 *Claves Angelicæ*, contained in Sloane MS. 3191, 1[ro] to 13[ro]. Because so many versions of the Angelical Keys have been published in the past, I have taken a different approach in the present volume.

The first column of Book Three contains a cross-reference number for each Angelical word, showing the key that it is in, as well as its numerical position in that key. The second column shows a corrected version of the Enochian, the result of extensive cross-comparison and linguistic analysis. Corrections based upon NN

Cotton Appendix XLVI have been incorporated, as well as simple corrections based on common-sense grammatical rules. Variants from Sloane MS. 3191 reading have been documented in footnotes, except where the correction was sufficiently obvious. § Presumably an even more self-consistent version of the keys could be generated with further cross analysis. Column 2 represents what I believe to be the logical limit of amendment; further corrections would deviate too greatly from the keys as dictated by Kelly.

Column 3 contains an exact transcription of the Angelical version of the keys in Sloane MS. 3191; the pronunciation marks are Dee's own. Column 4 contains an exact transcription of the English version of the keys in Sloane MS. 3191; the punctuation and spelling is Dee's own. Lacunæ in the text are described in the footnotes. Note that Sloane MS. 3191 shows the Angelical left to right, with the English written above. I have returned the format to that used in Cotton Appendix XLVI—a downwardly enumerated matched list.

Additional readings for Book Three were taken from Sloane MS. 3678 (Ashmole's copy of Sloane MS. 3191) and the following books from Sloane MS. 3188:

Mensis Mysticus Saebaticus Pars primus ejusdem, Casaubon, *op. cit.*
pgs. 73-114

Libri Mystici Apertorii Cracoviensis Sabbatici, *ibid.*, pgs. 115-152.

Libri Semptimi Apertorii Cracoviensis Mystici Sabbatici, *ibid.*, 153-202

Libri Cracoviensis Mysticus Apertorius Præteria Præmium Madiminum, *ibid.*, pgs., 203-212.

Notes on Book Four

BOOK FOUR is the first part of the *Liber Scientiæ Auxilii et Victoriæ Terrestris*, contained in Sloane MS. 3191, 14[ro] to 31[ro]. The biblical quotes at the beginning refer obviously to the figure showing the ordering of the tribes of Israël. In Sloane MS. 3191, this figure appears on 31[ro]. I have redrawn it with English captions and inserted it next to the quotes that refer to it. The large table of sigils at the end of Book Four is actually [57vo] & 58[ro] in Sloane MS. 3191; since the sigils refer directly to the

§ An early version of the corrected keys appeared in *Gnostica Magazine* Number 47, September 1978.

third and fourth columns of the lists in Book Four, I have included it here as a bridge into Book Five. These sigils are overlays to the GREAT TABLE in Book Five.

Notes on Book Five

BOOK FIVE is taken from the remainder of *Liber Scientia* following *De Heptarchia Mystica* in Sloane MS. 3191, 52[ro] to [80 vo]. The GREAT TABLE (not to be confused with the 'Great Table' published in the preface to the *True Relation*) proposed some interesting transcription problems. Sloane MS. 3191 contains three variants (if you include the sigils shown in Book Four), while two additional variants are given in Cotton Appendix XLVI. Within all the variant tables are corrections, slashed letters, and amendations, indicating a series of changes. The problem lies in that the final version (which wasn't completed until 1587, three years after the original table was dictated) does not match the names of the angels as given in Sloane MS. 3191. I have therefore chosen to give two versions of the table, the first matching the angels, and the second representing the final corrections made in 1587. The intermediary versions I have omitted as unessential. The ambitious scholar is free to retrofit the angelic names to the 'corrected' table, as it is sufficiently obvious how each name is generated from the table.* It should be noted that my presentation of this table as two separate versions departs significantly from the Golden Dawn tradition of including all the variant letters in each square. I judged this approach as unsatisfactory, because every other 'magic square' in renaissance magic contains only one element per square, and because many of the letters included in the G. D. version are clearly scratched out in the original manuscript. The tables in the present volume represent what I believe to be an accurate portrayal of what Dee and Kelly intended. The breakdown of Book Five into individual chapters is not in Sloane MS. 3191, but the material lends itself well to this approach, as there are distinct sets of tables and conjurations.

* *Vide* Israel Regardie, *How to Make and Use Talismans*, New York: Weiser, 1972.

APPENDIX D

BIBLIOGRAPHY

§1. *Manuscripts*

The Sloane and Cotton collections are in the British Library. The Bodleian and Ashmolean collections are at Oxford.

SLOANE MS. 3191.

This manuscript is the only book of ceremonial magic extant in Dee's handwriting. It consists of three separate 'books,' each detailing a different aspect of Dee's angelic magical system. The books are:—

49 *Claves Angelicae Anno 1584 Cracoviæ (Liber 18)* which contains Dee's transcription of the Angelical Keys (often called the *Enochian Keys* or *Enochian Calls*).

Liber Scientiæ Auxilii et Victoriæ Terrestris which contains a complex system of magic based upon the Great Table (often called *The Table of Watchtowers*). It is entirely in Latin, and related to the *Call of the Thirty Aires*.

De Heptarchia Mystica which describes a complete system of planetary magic, along with excerpts from the various scrying sessions.

SLOANE MS. 3188.

This manuscript contains Dee's earliest scrying sessions. It contains six individual 'books,' which are:—

Mysteriorum Liber Primus covering December 22, 1581 to March 15, 1582, and containing a ceremony with Saul (Dee's first

scryer) and the first ceremonies with Edward Talbot, in which the table and Solomon's ring are described.

Mysteriorum Liber Secundus covering March 6, 1582 to March 11, 1582, and containing the first elements of the Heptarchic system, the spirits of the Sigil of Æmeth, and the first suggestion that an antediluvian language would be delivered to Dee. The title page is missing, but can be inferred from textual references in Sloane MS. 3677.

Mysteriorum Liber Tertius covering April 28, 1582 to May 4, 1582, and containing numerous sigils related but apparently not essential to the Heptarchic system, as well as the names of the 49 good angels.

Quartus Liber Mysteriorum covering November 15, 1583 to November 21, 1583, and containing the remainder of the Heptarchic system; this book is the first to record the name of Edward Kelly as the scryer.

Liber Mysteriorum Quintus covering March 23, 1583 to April 18, 1583, and containing the tables later transcribed by Kelly into Sloane MS. 3189.

Quinti Libri Mysteriorum Appendix covering April 20, 1583 to May 23, 1583, and containing the famous *Enochian* letters, as well as information concerning the construction of the *Great Table*.

COTTON APPENDIX XLVI, PARTS 1 & 2.

This manuscript is occasionally referred to as Royal Appendix XLVI, or Sloane MS. 5007. It contains thirteen 'books,' which are:

Liber Mysteriorum (et Sancti) parallelus Novalisque covering May 28,

1583 to July 4, 1583, and containing the tail end of the Hepharchic system and the only recorded incident of Kelly speaking Greek.

Liber Peregrinationis Prime Videlicet A Mortlaco Angelicæ Ad Craconiæ Poloniæ covering September 21, 1583 to March 13, 1584, and containing the journey from Mortlack to Cracow Poland and various political speculations.

Mensis Mysticus Saobaticus Pars primus ejusdem covering April 10, 1584 to April 30, 1584, and containing the dictations of the first four calls (backwards).

Libri Mystici Apertorii Cracoviensis Sabbatici covering May 7, 1584 to May 22, 1584, and containing the remainder of the call (except for the call of the Thirty aires) in the Angelical tongue, and the spirits of the Thirty aires.

Libri Septimi Cracoviensis Mystici Sabbatici covering May 23, 1584 to July 12, 1584, and containing the geographic locations of the spirits of the Thirty aires, the *Great Table* or *Watchtowers*, and the first third of the *Call of the Thirty Aires*.

Libri Cracoviensis Mysticus Apertorius Præterea Præmium Madimianum covering July 12, 1584 to August 15, 1584, and containing the remainder of the *Call of the Thirty Aires*, as well as the names of the Thirty aires.

Mysteriorum Pragensium Liber Primus Cæsareusque covering August 15, 1584 to October 8, 1584, and containing an attempt to convince the Holy Roman Emperor of the canonical nature of the visions.

Mysteriorum Pragensium Confirmatio covering December 20, 1584 to March 20, 1585, and containing mostly political speculation.

Mysteriorum Cracoveinsium Stephanicorum Mysteria Stephanica covering April 12, 1585 to June 6, 1585, and containing an alchemical formula and a letter from Dee's wife to the spirits.

Unica Action, quæ Pucciana vocetor covering August 6, 1585 to September 6, 1585, and containing religious visions obviously meant to impress the Papal Nuncio who was then attending the ceremonies.

Liber Resurrectionis Pragæ, Pactum seu Fœdus Sabbatismi covering fragments from April 30, 1586 to January 21, 1587, and containing further ceremonies with the Papal Nuncio.

Actio Tertia Trebonæ Generalis covering April 4, 1587 to May 23, 1587, and containing a complex series of corrections to the *Watch-towers* and the infamous wife-swapping episode.

Jesus, Omnipotens sempiterne & une Deus covering March 20, 1607 to September 7, 1607 and containing the last records of Dee's magical experiments.

§2. *Related Manuscripts.*

The following manuscripts are of general interest to the scholar of Dee's magical system:

SLOANE MS. 3677—Elias Ashmole's copy of Sloane MS. 3188.

SLOANE MS. 3678—Elias Ashmole's copy of Sloane MS. 3191.

SLOANE MS. 3189, *Liber Mysteriorum Sextus and Sanctus* or *The Book of Enoch revealed to John Dee by the Angels* which contains 49 double-sided tables of (apparently) random letters. It is in Edward Kelly's handwriting.

SLOANE MS. 2599—Copy of Sloane MS. 3189, possibly by Ashmole.

SLOANE MS. 78—contains fragments of Sloane MS. 3189.

SLOANE MS. 2575—contains fragments of Sloane MS. 3189.

§3. *More Related Manuscripts.*

I have not personally examined or researched the following manuscripts, but I include their references as points for future study. Some of the catalogue numbers may be out of date.

SLOANE MS. 307—A collection of Enochian material from other manuscripts.

SLOANE MS. 3190—A copy of the *True Relation* with notes.

BODELEIAN MS. 8465aa (Black Catalogue 580)—*Collation of his printed actions with spirits with the original MSS.* (Ashmole).

BODELEIAN MS. 8460* (Black Catalogue 1788, p 38, 65)—*Papers concerning the actions* (Ashmole).

BODELEIAN MS. 8461* (Black Catalogue 1790, 1-28, 34 &c.)—*Papers concerning the actions* (Ashmole).

BODELEIAN MS. 8462* *Papers concerning the actions* (Ashmole).

BODELEIAN MS. 487 *Notes from his fifth book of Mysteries* (Ashmole).

ASHMOLE MS. 580—Ashmole's copy of *True Relation* with notes and cross references.

ASHMOLE MS. 1788—Various papers relating to the action, compiled by Ashmole.

ASHMOLE MS. 1790—Ashmole's observations and recollections concerning Dee's magical work.

§4. *Published Works.*

The following published works also contributed to the writing of this volume:—

Meric Casaubon, ed., *A True and Faithful Relation of what passed for many Yeers Between Dr. John Dee and Some Spirits*: London, 1659; Republished by Askin: London, 1974. The published version of Cotton Appendix XLVI Parts 1 & 2.

Aleister Crowley, *The Equinox*, Weiser: New York, 1972, Vol. vii, pages 228 to 243 presents some scattered pieces of Sloane MS. 3191 with Golden Dawn elaborations. Volume vii, pages 100-128 presents a 'self-pronouncing' interpretation of the Keys.

John Dee, *The Hieroglyphic Monad*, Weiser: New York, 1975; Dee's early philosophical-magical speculations.

John Dee, *The Mathematicall Praeface to the Elements of Geometrie of Euclid of Megara*, Science History Publications: New York, 1975; John Dee's most influential work, but only marginally concerned with magic.

Peter J. French, *John Dee, The World of an Elizabethian Magus*, Routledge and Kegan Paul: London, 1972; A definitive look at Dee's life, including an excellent bibliography of manuscripts and published works about Dee.

James Orchard Halliwell, ed., *The Private Diary of Dr. John Dee*, AMS Press: London, 1968; Another of Dee's diaries, along with a catalogue of the books and manuscripts in his collection prior to its partial destruction.

Donald C. Laycock, *The Complete Enochian Dictionary*, Askin: London, 1978; Contains an accurate transcription of the

Angelical Keys in Sloane MS. 3191, but without pronunciation marks or lacunæ. The English rendering has been modernized. The dictionary also references Crowley's 'phonetic' Angelical. It includes an excellent bibliography of recent minor publications dealing with Enochian matters.

Isræl Regardie, ed., *The Golden Dawn*, Llewellyn Publications: St. Paul, 1971; Book Nine contains an overview of the baroque Golden Dawn 'Enochian' magic, loosely based on Dee's original system. A version of the Keys is also included.

Leo Vinci, *GMICALZOMA! An Enochian Dictionary*, Regency Press: London & New York, 1976; An exhaustive early dictionary.

A. E. Waite, ed., *The Alchemical Writings of Edward Kelly*, Weiser: New York, 1975; provides a contrast to Kelly's work with Dee.

of Dr. John Dee

The Most Powerful System of Magick
in Its Original Unexpurgated Form

Geoffrey James

About the Editor/Translator

Geoffrey James' experience with the history of magick dates back to his college years, when he studied medieval and Renaissance literature. Geoffrey received a degree in English *magna cum laude* from the University of California, Irvine, where he was the Rhodes Scholarship candidate and was elected *Phi Beta Kappa*. After graduating, he moved into the computer industry where he has advised Fortune 500 companies on emerging technology. He has traveled worldwide, written numerous books and articles, spoken at major industry conferences, and taught university extension courses. Today, when not traveling, Geoffrey lives and writes in a hexagonal house on a boulder-strewn hilltop in the New England woods. His current interests include Taoism, Chi Kung, Tai Chi, and the spiritual revolution in corporate America.

TABLE OF CONTENTS

<i>Preface to the Llewellyn Edition</i>	xi
<i>Preface</i>	xij
BOOK ONE: THE MAGICK OF ENOCH	
CHAPTER I. The Fall of Man	1
CHAPTER II. The Wisdom of Enoch	3
CHAPTER III. The Fall of Enoch's Magick	6
CHAPTER IV. The Reestablishment of Enoch's Wisdom	8
CHAPTER V. The Nature of This Wisdom	10
CHAPTER VI. General Considerations of This Art	14
BOOK TWO: THE MYSTICAL HEPTARCHY	
CHAPTER I. Of the Title & General Contents of This Book with Some Needful Testimonies	17
CHAPTER II. Of John Dee & His Interest to Exercise the Doctrine Heptarchical	21
CHAPTER III. Some Remembrances of the Furniture & Circumstances Necessary in the Exercise Heptarchical	29
CHAPTER IV. Some Notice of the Peculiar Forms & Attire Wherein the Kings, Princes & Ministers Heptarchical Appeared & Some of Their Actions & Gestures at Their Appearance	39
CHAPTER V. The Oration to God to Be Spoken Every Day, Three Times Successively	53
CHAPTER VI. The Devout and Pious Invitations to the Good Heptarchical Angels	57
CHAPTER VII. Some Recital & Contestation of the Peculiar Offices, Words, & Deeds of the Seven Heptarchical Kings & Princes	59
BOOK THREE: THE FORTY-EIGHT ANGELIC KEYS	65

behind the scenes, preserving the great man's work for posterity. Such tantalizing speculation is unlikely to be confirmed, however. It is interesting to note, in this regard, that a form of Enochian lettering appears in certain editions of Mackey's *Masonic Encyclopedia*. It is, however, unlike Dee's Enochian alphabet.

I'm often asked the question: "Are the Enochian angels real?" Usually I pawn the questioner off with an evasive remark like: "Doctor Dee certainly thought that they were." This is pure editorial cowardice on my part and I believe I owe the reader the questionable benefit of my own opinion on the subject.

As I best understand it, Enochian angels are unlikely to be "real" in the sense of being composed out of atoms, particle waves, or quantifiable material. On the other hand, I believe that angels may represent aspects of the human consciousness that all of us share. In that way, they exist in collective unconscious, which is, in some ways at least, more "real" than the physical world.

Another question I'm also asked is: "Have you ever tried Enochian magic?" This question I will leave unanswered. I shall, however, mention that I remember feeling uneasy when I was working on the original material. I had a quite distinct sensation that somebody was looking over my shoulder, a sensation that tickled the hairs on the back of my neck. Other Enochian scholars have related similar experiences.

It's an undeniable fact that curious things happen to people who are interested in this arcane subject. This edition is a result of such an event. Nancy J. Mostad, Acquisitions and Development Manager at Llewellyn, dreamed about Enochian magic and was given a copy of my book, just a few days before I contacted her. But for this possibly fortuitous dream, you might not be holding this book in your hands.

GEOFFREY JAMES

Bavaria, Germany
July 1993

PREFACE

Geoffrey James

THE ENOCHIAN EVOCATION is based on the magical diaries & workbooks of Doctor John Dee, the famous Elizabethan scientist and magus. These manuscripts document the ceremonies that Dee performed with Edward Kelly, who, gazing into a crystal stone, claimed to see and hear angels. According to Kelly, these beings desired to re-establish the true art of Magic, which had been lost due to Man's wickedness and ignorance. The true magical art (they claimed) would bequeath superhuman powers upon its practitioners, change the political structure of Europe, and herald the coming of the Apocalypse.

Dee believed that this research was of great benefit to Mankind and far more important than his more mundane studies. Dee explained his dissatisfaction with worldly knowledge:

*I have from my youth up, desired and prayed unto God for pure and sound wisdom and understanding of truths natural and artificial, so that God's wisdom, goodness, and power bestowed in the frame of the world might be brought in some bountiful measure under the talent of my capacity. . . So for many years and in many places, far and near, I have sought and studied many books in sundry languages, and have conferred with sundry men, and have laboured with my own reasonable discourse, to find some inkling, gleam, or beam of those radical truths. But after all my endeavours I could find no other way to attain such wisdom but by the Extraordinary Gift, and not by any vulgar school, doctrine, or human invention.**

Dee felt that only through the practice of magic would he be able to learn those 'radical truths.' Like Luther, Dee rejected the necessity of the church as an intermediary to God. But Dee carried this doctrine one step further, believing that holy revelations

* From Dee's Preface to Sloane MS. 3188.

xij

2A

could be obtained by practicing the magic of the ancient Hebrews:

I had read in books and records how Enoch enjoyed God's favor and conversation, and how God was familiar with Moses, and how good angels were sent to Abraham, Isaac, Jacob, Joshua, Gideon, Esdras, Daniel, Tobias, and sundry others, to instruct them, inform them and help them in worldly and domestic affairs, and even sometimes to satisfy their desires, doubts, and questions of God's secrets. Furthermore, I considered the Shewstone which the high priests did use, by God's own ordering, wherein they had lights and judgements in their great doubts. I considered, too, that God did not refuse to instruct the prophets and seers to give answers to the common people concerning economics, as Samuel did for Saul; and so did Solomon the wise, immediately after attaining his wonderful wisdom through God. Therefore I was sufficiently taught and confirmed that I would never attain wisdom by man's hand or by human power, but only from God, directly or indirectly.†

Realizing the heretical aspects of these beliefs at a time when magic was perceived as questionable at best and at worst diabolic, Dee was vehement in his rejection of the 'black arts':

I have always had a great regard and care to beware of the filthy abuse of such as willingly or wittingly invoke or consult with spiritual creatures of the damned sort: angels of darkness, forgers, patrons of lies and untruths. Instead I have flown unto God through hearty prayer, full oft and in sundry manners.‡

Dee discovered that he was unable to perceive spirits on his own, and so was forced to employ skryers or crystal gazers. The most prolific of Dee's skryers was Edward Kelly, a man of mediocre education whose main interest was alchemy. Kelly originally asked to work with Dee because Kelly believed that with divine aide they might discover the philosopher's stone that would transmute lead into gold. Dee was hesitant at first, but when they performed a simple ceremony, it was far more successful than anything Dee had ever experienced:

† *Ibidem*

‡ *Ibidem*

*Thereupon I brought forth to him my stone in the frame (which was given me of a friend) and I said unto him, that I was credibly informed that to it (after a sort) were answerable various good Angels . . . He then settled himself to the Action: and on his knees at my desk, setting the stone before him, fell to prayer and entreaty. In the mean space, I in my oratory did pray and make motion to God & his good Creatures for the furthering of this Action. And within a quarter of an hour (or less) he had sight of one in the stone.**

Kelly's skrying was destined to produce what is perhaps the most unusual magical literature of the Renaissance.

Was Kelly a charlatan who fabricated visions out of his own imagination? Historians have traditionally cast Kelly as a fraud who deluded his pious master†, but the evidence perhaps does not justify this judgement. It is true that Kelly accepted £50 per year for his services to Dee‡ but such annuities were the basis for survival in Elizabethan times. Far from encouraging Dee, Kelly eventually began to question the angelic nature of the spirits, and frequently tried to extricate himself from Dee's employ*. Kelly might, of course, have been applying reverse psychology, but there is little reason why he should have bothered to do so, as Dee was already determined to continue the experimentation. If Kelly had been trying to plunder Dee's money, why would Kelly have tried to convince Dee that the spirits were devils?

It is difficult to account for the serious stylistic differences between Kelly's usual writing style and the utterances that he attributed to the spirits. Kelly was an uninspired writer; the following excerpt is representative of his prowess:

*The heavenly cope hath in him nature's fower
Two hidden, but the rest to sight appear:
Wherein the sperms of all the bodies lower
Most secrett are, yett spring forth once a yeare...§*

* Sloane MS. 3188; Passages marked March 10, 1582.

† Francis Yates, *Gordiano Bruno and the Hermetic Tradition*, London: 1964, p. 149.

‡ Meric Casaubon, ed., *A True and Faithful Relation of What passed for many Yeers Between Dr. John Dee . . . and some Spirits*, London: 1659, pg. 28. (Facsimile republished by Askin, London: 1974.)

* *Ibidem*, pgs. 20, 91, 153, 169 & 171.

§ A. E. Waite, ed., *The Alchemical Writings of Edward Kelly*, Weiser, New York: 1973, p. liii.

Contrast those stilted and awkward lines with the Call of the Thirty Aires:

*The work of man and his pomp,
let them be defaced:
His buyldings
Let them become caves for the beasts of the fielde:
Confownd her understanding with darkness.
For why?
It repenteth me I made Man.*

It seems impossible that this powerful passage could have been written by the same hand, or that Kelly's own writing skill could have produced such passages of eldritch beauty as:

*Can the wings of the windes understand your voyces of wonder?...
Stronger are your fete than the barren stone:
And mightier are your voices than the manifold windes....*

Admittedly, stylistic differences are subtle gauges of authorship. But more concrete evidence against Kelly fabricating all his visions lies in the complexity of the Angelical (Enochian) keys. Could Kelly, whose single linguistic accomplishment was mastery of schoolboy Latin and even whose English was laced with colloquialisms, have devised an entire language, with its own unique grammar and syntax? It took Tolkien, a professor of philology, years to fabricate the Elvish tongue that figures so largely in his work; if Kelly fabricated the keys, he would have had to do so in a matter of days.

In short, if Kelly was the conscious author of all his 'visions', then he possessed a far greater literary competence than he ever exhibited elsewhere. However, the subconscious mind is often capable of feats that are impossible to the conscious mind. Could Kelly have hallucinated the visions? It has been suggested that Dee may have propelled Kelly into a state of artificial psychosis with their ceremonies.† Kelly may also have had multiple personalities, for the spirits talk in biblical dialects quite different from Kelly's normal speech.

† Peter French, *John Dee, The World of the Elizabethan Magus*, London: Routledge & Kegan Paul, 1972, pg. 114.

Kelly was having trouble distinguishing between his own thoughts and those of the 'spirits'. He complained of:

...a great stir and moving in his brains, very sensible and distinct, as of a creature of human shape and lineaments going up and down, to and fro in his brains and within his skull.†

Dee was forcing Kelly to perform ceremonies on an almost daily basis, and for hours at a stretch. Reflecting this stress, Kelly's temper became extremely volatile as shown by this event that Dee recorded:

*Suddenly E. K. fell into such a rage that...much ado I, Emericus, and his brother had to stop or hold him...At length we let him go in his doublet and hose, without a cap or hat on his head: and into the street he hastened with his brother's rapier drawn... The rage and fury was so great in words and gesture as might plainly prove that the wicked enemy sought either E. K. his own destroying himself, or of me, or of his brother.**

Kelly's behaviour was so bizarre that Dee was afraid that Kelly was possessed by the devil, one of the time's standard diagnoses for insanity. Dee had recently discovered that Kelly was performing black magic independent of their work together. This horrified Dee so much that he noted the event in Latin, even in his own private diary:

Horrenda & multiplicia heresium, & blasphemiarum dogmata, quibus illi hostes Jesu Christi illum imbuerant...illisque malis Angelis renunciare, & omnes illorum fraudes deteger... Conversio E. K. ad Deum, abdicatis omnibus Diabolicis experimentis.‡

The 'horrible heresies' that the 'evil angels' had revealed to Kelly were, in the context of the time, insane. They questioned the entire fabric on which the culture was built. Dee recorded these heresies in his diary:

† Casaubon, *op. cit.*, p. 328.

* *Ibidem*, p. 230.

‡ *Ibidem*, p. 164: Manifold horrible heresies and blasphemous doctrines, in which they eat the host of Jesus Christ ... but he was led to put aside these evil angels and all their frauds... I spoke with E. K. about God, telling him to give over all his Diabolical experiments.

They would have persuaded (Kelly):

—That Jesus was not God.

—That no prayer ought to be made to Jesus.

—That there is no sin.

—That man's soul doth go from one body to another child's quickening

—That as many men and women as are now, have always been.

—That the generation of mankind from Adam and Eve, is not an History, but a writing which has another sense.*

Kelly could not have entertained such notions without being profoundly disturbed by their implications, and his conversion back to orthodoxy indicates his remorse and guilt. There is little question that Kelly was exhibiting signs of extreme stress and possible psychosis while working with Dee.

Kelly's participation in private magical ceremonies raises the tantalizing possibility that he might have had access to magical texts of which Dee was not aware, and that may have served as source material for the *Enochian Evocation*. Although Israel Regardie states that there is absolutely no trace of any part of the *Enochian magical system or Angelical language in Europe*†; that viewpoint is not entirely justified. While it is true that the Angelical keys are very different from, for example, the bastardized Arabic and Greek in various Solomonic grimoires, elements of the *Enochian Evocation* are similar and in some cases almost identical to other Renaissance magical texts.

Both the *Arbatel*‡ and the *Heptameron*§ are arranged like Book Two of the *Enochian Evocation*, with conjurations addressed to the rulers of each day of the week. The sigil of Æmeth, also in Book Two, is apparently based upon an earlier sigil that appears in the *Sworn Book of Honourius*¶, a manuscript that antedated Kelly by almost 300 years. Of course, the entire methodology for devising spirit sigils out of magical squares of numbers and or letters was described in detail by Cornelius Agrippa c. 1533.**

Renaissance Europe did contain books of evocation magic attributed to Enoch. The very year the keys were dictated, Reginald Scot complained:

Conjurors carrie about at this daie, bookes intituled under the names of Adam, Abel, Tobie, & Enoch; which Enoch they repute the most divine fellow in such matters.*

Could Kelly have been utilizing such a book to assist him in his private ceremonies, or to provide the material that Dee so incessantly demanded? Kelly was certainly guilty of some plagiarism, although it may have been subconscious, for it was Kelly rather than Dee, who discovered the plagiarism and reported it to Dee:

(Kelly) came speedily out of his Study, and brought in his hand one volume of Cornelius Agrippa his works... whereupon he inferred, that our spiritual Instructors were Cosenors to give us a description of the world, taken out of other Books...†

Dee, somewhat surprised, replied: *I am very glad that you have a Book of your own, wherein these Geographical names are expressed†.* Dee's ignorance of the exact contents of the library that Kelly kept in his study is extremely suspicious.

If Kelly was plagiarizing some as-yet undiscovered manuscript, it may have been Gnostic in origin, as significant parallels exist between the Angelical keys and certain Gnostic texts. For example, a typical incantation from the *Pistis Sophia*: ZAMA ZAMA OZZA RACHAMA OZAT‡ is not Angelical, but the overuse of the 'Z' phoneme is characteristic of Angelical, and the repetition of the word ZAMA echoes the refrain ZACAR CA ZAMRAN that permeates the keys. Another linguistic similarity is the Gnostic name for the demiurge IALDABAOth,§ quite close to the Angelical IAD BALTOH for 'God of Righteousness.'

The Gnostics tended to treat Enoch as a special personage, because he was the first mortal to speak with God after the fall,

* Reginald Scot, *The Discovery of Witchcraft*, London: William Brome, 1584, Book xv, Chapter xxxi.

† Casaubon, *op. cit.*, p. 158.

‡ *Ibidem*.

§ G. R. S. Mead, *Fragments of a Faith Forgotten*, New York: University Books, 1960, p. 462.

§ *Ibidem*, p. 188.

and so the first to attain the gnosis that they sought[§]. The Gnostics attributed works of magic to Enoch, such as the two great Books of IEOU, which Enoch wrote when I spoke with him from the Tree of Knowledge, which were in the paradise of Adam*. The word IEOU suggests that the books contained conjurations with words much like those of the Pistis Sophia or the Angelical keys; the legendary origin of the Books in the garden of Eden recalls the claim that the Angelical language was that which Adam verily spake in innocence.

Like many Gnostic texts, the Angelical keys emphasize the opening of 'gates' into various mystical realms. The Book of the Great Logos, a Gnostic text associated with the Books of IEOU, contains the following passage:

The guardians of the Gates of the treasure will open them, and they will pass upwards and ever inwards through the following spaces, and the powers rejoicing and giving them their mysteries, seals, and names of power: the Orders of the Three Amens...Within each treasure is a Door or Gate, and without three Gates; each of the outer gates has three guardians.†

Compare the above passage with the following from Kelly's scrying:

Every table hath his key, every key openeth his gate, and every gate being opened, giveth knowledge of himself, of the entrance, and the mysteries of those things whereof he is an enclosure. Within these Palaces you shall find things that are of power...for every Palace is above his City and every City is above his Entrance.‡

Both Gnostic and Angelical magic place emphasis on the number 49. For example, the Pistis Sophia states that the reflection of the supernal projections, powers, or co-partners of the Sophia [when] looked at from without, make an ordering into forty-nine,§ while the apoc-

§ Mead, *op. cit.*, p. 471.

ryphal Books of the Savior state that no mystery is higher than the mysteries ye seek after, save only the mystery of the Seven Voices and the Nine-and-Forty Powers and Numbers.* These 49 powers recall the 49 good angels or even the Angelical keys themselves, which Kelly's spirits described as:

49 voyces, or callings, which are the Natural Keys, to open...Gates of understanding...you shall have knowledge to move every Gate, and to call out as many as you please...and wisely open unto you the secrets of their Cities...†

The possibility that Kelly did plagiarize large portions of the Enochian Evocation would do much to explain the presence of the Angelical language in his scrying, as well as the stylistic variations in his work. However, the similarity between Kelly's scrying and Gnostic magic, while undeniable, is not sufficiently strong to build a direct textual connection.

A serious objection to the theory that Kelly plagiarized visions is the way that the keys were revealed. The first five keys were dictated, letter by letter, backwards, while the rest were dictated forwards, without any significant errors. The bulk of the keys (over 1000 words) were dictated on a single day during a single session. Most of the English glosses were dictated on a single day, well after the Angelical, yet they match their Angelical counterparts almost perfectly. Kelly would have had to be capable of extraordinary feats of mnemonic virtuosity, if he utilized another magical text as source material for the keys.

A final possibility deserves discussion—was Kelly ever actually in contact with supernatural entities? In fact, the Dee-Kelly ceremonies contain some evidence that would seem to indicate the presence of the supernatural during some of the ceremonies.

One standard test for the presence of the supernatural is precognition of future events. This took place at least twice during the Dee-Kelly workings; the spirits predicted the Spanish armada and the execution of Mary Queen of Scots well before those events could have been known.¶ However, the 'spirits' predicted other events that never took place.

* *Ibidem*, pgs. 516 & 523.

† Casaubon, *op. cit.*, p. 77.

¶ Donald C. Laycock, *The Complete Enochian Dictionary*, London: Askin, 1978, p. 38

Another classic test for the presence of the supernatural is the speaking of a tongue with which the possessed is not familiar. During one ceremony, Kelly began repeating Greek words, but he soon became frustrated and interrupted with: *Unless you speak some language that I can understand, I will express no more of this Ghybbrish*§. Curiously, the Greek translates into a warning to Dee not to trust Kelly.

But the Angelical language itself forms a more startling example of 'speaking in tongues', because it exhibits characteristics that would seem to indicate that it was designed to be a non-spoken language. As Da Vinci had pointed out nearly 100 years before the keys were dictated, spirits would be unable to make audible sounds on their own, due to a lack of vocal chords with which to vibrate the air*.

Thus any 'language' that spirits would 'speak' would be radically different from a language intended for use by human beings. Onomatopœiæ would be totally lacking. Contractions would be used to create new concepts, rather than to smooth out pronunciation. Many words would feature strings of consonants rather than an easily-pronounced intermixes of vowels and consonants. The letter arrangement would appear somewhat random and more like a Cabbala than a spoken tongue. And finally, the system of numbers would not be based on 10, since along with a lack of vocal chords, non-material entities would have little use for fingers.

The Angelical language exhibits most of these characteristics. There are no onomatopœiæ in Angelical. Angelical contractions such as TELOCVOVIM and JADOIASMOMA are conceptually convenient, but have not been edited for easier pronunciation. Many Angelical words feature unpronounceable strings of consonants. Angelical letter arrangements appear to be random†, and the language is stated to be the source language for Hebrew and thus Cabbala is implied. Finally, Angelical numbers are incomprehensible using any known base or numbering scheme‡.

§ Casaubon, *op. cit.*, p. 27.

* Jean Paul Richter, tr., *The Notebooks of Leonardo Da Vinci*, New York: Dover Publications, 1970, Vol. II, p. 307.

† Laycock, *op. cit.*, p. 40.

‡ *Ibidem*, p. 44.

The compiler of the Enochian dictionary, on the other hand, asserts that the Angelical language is English-like both in word order and in pronunciation. Since the exact character of the Angelical language is essential to an understanding of *The Enochian Evocation*, Laycock's theory must be examined in some detail.

Laycock gives an example where English is the only language that matches the Angelical§. But the keys include many other passages where the Angelical phrasing makes for extremely awkward English. For example, NIISO CRIP IP NIDALI is glossed as *Come awaye, but not your noyses*. Since this is addressed to the *Thunderers of Judgement and Wrath*, what is probably meant by NIISO CRIP IP NIDALI is *leave wherever you are and come here, but don't make thundering noises*. The Angelical language expresses the concept much more succinctly than is possible in English. Again, the Angelical word TELOCVOVIM is glossed as *him that is saln* [fallen], but is actually a contraction of TELOCH (death) and VOVIN (dragon), literally 'death-dragon'—a reference to Satan's transformation during his fall. Words like TELOCVOVIM are much more Germanic than English-like. In short, the Angelical language is no more English-like than any other non-English language; the fact that there are some matches is not significant.

Laycock states that the Angelical language has English pronunciations. Unfortunately, Kelly never, as the spirits' 'mouthpiece', pronounced the Angelical words. Kelly dictated letter by letter from a table that he saw in the crystal, as shown from Kelly's description that Dee recorded:

[The angel] hath a rod or wand in his hand...it is of Gold...He standeth upon his round table of Christal or rather Mother of Pearl: There appear an infinite number of letters on the same, as thick as can stand by another...He standeth and pointeth with his rod to the letters of his Table, as if he made some account or reckoning*.

Furthermore, if Angelical letter arrangement has random characteristics, as Laycock claims, then the English-like pronunciation cannot be an inherent quality of the language itself. Far more likely is that Dee assigned pronunciations to the Angelical because

§ *Ibidem*, p. 43.

* Casaubon, *op. cit.*, p. 73.

he wished to speak the keys in a ceremony, and, being English, adapted them as well as he could to his native tongue. Indeed, outside of few minor suggestions, the spirits seem unconcerned with pronunciation. The Angelical language in its basic form makes few concessions to the human vocal chord.

Of course, one must keep in mind that Kelly might have plagiarized the keys; in any case, whoever or whatever devised the keys made a viable attempt to simulate a 'language' designed for non-material beings.

The final and most dramatic evidence for the presence of the supernatural is a telekinetic phenomenon that Dee himself witnessed and described:

There appeared a great flame of fire in the principal Stone....Suddenly one seemed to come in at the fourth window of the Chappel... the stone was heaved up a handfull high and set down again. The one at the window seemed... with spread-abroad arms to come to E. K., at which sight, he shrinked back somewhat, and then that Creature took up between both his hands the stone and frame of gold, and mounted up away as he came E. K. caught at it, but he could not touch it...E. K. was in a great fear and trembling and had tremorem cordis for a while. But I was very glad and well pleased.*

Although it is true that this event could easily be reproduced using modern techniques of prestidigitation, stage magic in the 16th century was much too crude to produce such an illusion†. If Kelly had some trick of making a crystal rise and fly out a window, he could have made far more than £50 a year performing this feat for the public. Kelly's reaction to the event is revealing; Dee apparently listened to his heart and noticed tremors, a condition that Kelly would have found difficult to simulate. Kelly seems genuinely affected, but the cold and clinical Dee declared that he was *glad and well pleased*. The event proved to Dee, beyond the shadow of all doubt, that they were in contact with supernatural powers.

* *Ibidem*, Second page 19.

† *Vide*, Scot, *op. cit.*, Book XIII, Chapter XXXIV, for a description of the primitive stage illusions of the 16th Century.

Was Kelly a charlatan, a psychotic, a plagiarist, or a true skryer? The distinction was non-existent in Kelly's own mind, because differentiating between these states required a well-defined sense of reality. There is no simple explanation for Kelly's actions. He believed in the spirits, yet he fabricated and plagiarized. He exhibited the signs of psychosis, yet manifested extraordinary linguistic and telekinetic phenomena. Forced on an almost daily basis into abnormal psychological and hypnotic states, plagued by the constant fear of damnation, convinced to let his life be controlled by 'angels' that were either manifestations of his diseased subconscious or of strange otherworldly presences—all these served to blur Kelly's perception of reality.

It is ironic that Kelly is so often viewed as victimizing Dee. Kelly was forced to stay with Dee because the money that the doctor gave him supported Kelly's wife and brother. When Kelly tried to leave, Dee would coerce him to remain by playing on his guilt and fear. It was Dee, not Kelly, who was gaining the benefit from the magical ceremonies, for it sated his lust for 'radical truths'.

A single incident epitomizes the difference between the attitudes of the two men. The spirits demanded that Dee and Kelly have sexual relations with each other's wives. Whether the suggestion came from Kelly's subconscious or from some other source is not important; what is important is the reactions of the two men.

Kelly was appalled and, in a rare lucid moment, insisted that Dee include a written protest in his magical diaries:

*I, Edward Kelly, by good and provident determination and consideration in these former Actions, that is to say, appearances, shews made, and voyces uttered...have from the beginning thereof (which at large by the records appeareth) not only doubted and disliked their insinuations and doctrine but also at diverse and sundry times... sought to depart from the exercises thereof...they manifestly [have] urged and commanded in the name of God a Doctrine Damnable and contrary to the Laws of God.**

* Casaubon, *op. cit.*, Second page 17.

Dee had his own doubts, and for the first time calls the spirits 'apparitions'.[†] But Dee was not willing to admit that the 'radical truths' might have had a less than divine origin, and, against all the protests of Kelly and the two wives (who 'disliked utterly this last doctrine'), Dee drew up an elaborate contract that included the following stipulation:

this doctrine and doings should unto no mortal man be disclosed, but among us onely the above-named four to be kept most secret... we all and every four of us do request...that the sudden and immediate death may light and fall onto the discloser and on him or her to whom the same doctrine or doing any manner of way shall be disclosed or known.*

Thus the hypocritical Dee was willing to pretend that he was following the commandments of God, but asked for death for anyone who found out about it.

The ceremonies continued for some time, possibly pushing Kelly beyond the limits of sanity. After splitting with Dee, he foolishly proclaimed (and perhaps believed himself) that he had indeed discovered the Philosopher's Stone. Finally, in another manic rage, he murdered a man and was imprisoned for the rest of his life. When finally given the opportunity to escape from his tower prison, he fell (or jumped?) to his death§.

Dee felt no guilt for any of his magical experiments, and continually protested his own innocence of any wrongdoing:

The great losses and damages which I have sustained do not grieve my heart so much as the rash, lewd, fond, and most untrue fables and reports of me and my philosophical studies... The works of my hands and the words of my mouth bear lively witness to the thoughts of my heart and inclination of my mind§§.

Even in the last years of his life, Dee was willing to stand trial for Witchcraft, convinced that even the repressive courts under

[†] *Ibidem*, Second page 13.

§ A.E. Waite, *Alchemists Through the Ages*, New York, Steiner, 1970, p. 158

§§ Casaubon, *op cit*, Dee's Apology to the Archbishop of Canterbury.

James the First would acquit him.*

Dee's quest was a spiritual one and his sincere intention was to bring God's wisdom to Mankind. Dee tried to extend the power of Man beyond the threshold of science. While Dee's fanaticism and blind faith in the reality of Kelly's skrying caused others to suffer, one must admit that Dee himself did not escape unscathed. Once the news of his magical practices had become public knowledge, his house and belongings were partially destroyed by a mob of ignorant peasants. And despite the spirits' promises of vast treasures, Dee died in abject poverty, still practicing magic to the end of his days.†

The Enochian Evocation reveals those magical arts, those 'radical truths' for which Doctor John Dee, the foremost scientist and magus of his time, risked his reputation, the virtue of his wife, the sanity of his friend, and the salvation of his own soul.

THE GOLDEN TALISMAN
[Vide: APPENDIX A, ¶ V., p. 187-88.]

BOOK ONE THE MAGICK OF ENOCH

CHAPTER I.

THE FALL OF MAN

§1. The Garden of Eden.

MAN, IN HIS CREATION, BEING MADE AN INNOCENT, WAS also authorized and made partaker of the Power and Spirit of God. He not only knew all things under Creation and spoke of them properly—naming them as they were—but was also a partaker of the presence and society of Angels, a speaker of the mysteries of God, and spoke even with God Himself. So in that innocence, the power of his partaking with God and His good Angels was exalted, and so became holy in the sight of God.

§2. The Casting Out of Adam.

But Coronzon (for so is the name of that mighty devil), envying man's felicity, and perceiving that the substance of man's lesser part was frail and imperfect in respect to his purer essence, began to assail man, and so prevailed. By offending so, man became accursed in the sight of God, and so lost both the Garden of Felicity and the judgement of his understanding, but not utterly the favor of God. But he was driven forth (as your scriptures record) unto the Earth which was covered with brambles. Adam received punishment for his offence, in that he was turned out into the earth, and so did Adam, accursed, bring all misery and wretchedness into the world. But in the same instant when Adam was expelled, the Lord gave unto the world her

time, and placed over her Angelic Keepers, Watchmen, and Princes.

§3. *The Origin of Hebrew.*

Being as dumb, and not able to speak, Adam began to learn (through necessity) the language which thou callest Hebrew but not in the form which is now Hebrew amongst you. Adam uttered and delivered to his posterity the nearest knowledge that he had of God and His Creatures. From his own self, he divided this speech into three parts: twelve, three, and seven. This division yet remaineth, but the true forms and pronunciations are lost. Therefore Hebrew is not of that force that it was in its original dignity; much less is it to be compared with this language that we deliver, which Adam verily spake in innocence and which has never been uttered nor disclosed to man since, until now. In this language, the power of God must work and wisdom in her true kind must be delivered.

THE WISDOM OF ENOCH.

§1. *The Lord & Enoch.*

WHEN THE LORD APPEARED UNTO ENOCH AND WAS merciful unto him and opened up his eyes so that he might see and judge the earth, which was unknown unto his parents by reason of their fall. For the Lord said: *Let us show unto Enoch the use of the earth.* And lo, Enoch was wise and full of the spirit of wisdom.

§2. *The Prayer of Enoch.*

Thrice a day did Enoch talk with God, and this was his prayer:

CAN THE VESSEL OF FEAR, FRAGILITY, OR THAT WHICH IS OF A determined proportion, lift up himself, heave up his hands, and gather the sun into his bosom? Lord, it cannot be. Lord, my imperfection is great. Lord, I am less than sand. Lord, thy good Angels and Creatures excel me by far, for our proportion is not alike and our senses agreeth not.

Notwithstanding I am comforted. For we all have one God, all one beginning from thee, and all respect thee as Creator. Therefore I will call upon thy name and in thee I will become mighty. Thou shalt light me, and I will become a Seer. I will see thy Creatures and will magnify thee amongst them.

Those that come into thee have the same gate, and through that same gate descend those that thou sendest. Behold, I will offer my house, my labour, my heart and soul, if it will please thy Angels to dwell with me and I with them—to rejoice with me that I might rejoice with them—to minister unto me that I might magnify thy name.

§ Then, lo, these Tables (which I have provided and prepared according to thy will) I offer unto thee and unto thy holy Angels, desiring them through thy holy Names. As thou art their light and comfort, so they will be my light and comfort. Lord, they prescribe no laws unto thee, thus it is not meet that I prescribe laws unto them. What it pleases them to offer unto me, I will receive. Behold, Oh Lord, if I shall call them in thy name, be it unto me in mercy, as unto the servant of the Highest. Let them manifest unto me, howsoever I shall call them and at whatever time.

§ Oh Lord, is there any who is mortal that can measure the heavens? How, therefore, can the heavens enter into man's Imagination? Thy Creatures are the glory of thy countenance and thereby thou glorifiest all things; but this glory excelleth and is far above my understanding. It is great wisdom to speak with Kings according to one's understanding, but to command Kings is not wisdom unless it come from thee.

§ Behold, Lord, how shall I ascend into the heavens? The air will not carry me, but resisteth my folly. I fall down, for I am of the earth. Therefore, oh thou very light and true comfort, that canst command the Heavens: Behold, I offer these Tables unto thee. Command them as it pleaseth thee. Oh you Ministers and true lights of understanding, who govern this earthly frame and the elements wherein we live: Do for me as for the servant of the Lord. For unto me it has pleased the Lord to talk of you.

§ Behold, Lord, thou hast appointed me 50 times. Thrice 50 times I will lift up my hands unto thee. Be it unto me as it pleaseth thee and thy holy Ministers. I require nothing but thee, through thee, and for thy honor and glory. Yet I hope that I shall be satisfied and shall not die (as thou hast promised) until thou gatherest the clouds together to judge all things. And in that moment I shall be changed and dwell with thee forever.

§3. *The Book of Enoch.*

§ And at the end of the 50 days, there appeared unto Enoch that which is not now to be manifested nor spoken of. Enoch enjoyed the fruit of God, his promise, and received the benefit of his faith. Here may the wise learn wisdom; for what doth man do that is not corruptible? § And Enoch said unto the Lord: *Let there by remembrance of thy mercy, and let those that love thee taste of this after me. Oh let not thy mercy be forgotten.* And the Lord was pleased. So after 50 days, Enoch wrote, and this was the title of his books: **LET THOSE THAT FEAR GOD AND ARE WORTHY** —READ.

CHAPTER III

THE FALL OF ENOCH'S MAGICK.

§1. *The Unworthy Read Enoch's Book.*

BUT BEHOLD, THE PEOPLE WAXED WICKED & BECAME unrighteous, and the spirit of the Lord was far off and gone away from them. So that those that were unworthy began to read. And the kings of the earth said thus against the Lord: *What is it that we cannot do, & who is he that can resist us?*

§2. *The Lord Sends Wicked Spirits.*

And the Lord was vexed, and he sent in amongst them 150 lions, spirits of wickedness, error, and deceit. And they appeared unto the kings of the earth, for the Lord had put them between those that are wicked and his good Angels. And these spirits began to counterfeit the doings of God and His power, for they had power given to them to do so. And the memory of Enoch washed away.

§3. *Enoch's Magick Forgotten.*

The knowledge of mystical figures and their use is the gift of God delivered unto Enoch and (by Enoch's request) unto the faithful, that they might have the true use of God's Creatures, and of the earth whereon they dwell. So hath the Devil delivered unto the wicked the signs and tokens of his error and hatred towards God, so that they, in using them, might consent in their will and so become partakers with him in his reward, which is æternal damnation. These signs they call Characters—a lamentable thing—for by these many souls have perished. For the doings of the Ægyptians seem, but are not so. The doings of the Lord are, and continue to be. But, as the painter imitates the gestures of man, so doth the Devil imitate the substance and things created and made by God.

§4. *Concerning Satan.*

Where are the monuments that Satan hath built? Hath he not built a fort on the whole earth? Hath he not victory over the Saints? Dwelleth he not in the temple of the Highest? Triumpheth he not in the cities of the world? But without comfort are his victories and without pleasure are his dwelling places, for he knoweth that his time is at hand. He that now hath freedom shall become bound. He unto whom the whole world is a garden, there shall not be one foot left. Therefore are all his pleasures vanity, all his triumphs smoke, and his authority nothing but a meer shadow.

CHAPTER IV.

THE REESTABLISHMENT OF ENOCH'S WISDOM.

§1. *The Lord is Displeased With Man.*

THE GODHEAD, KEEPING IN HIS ALMIGHTY BOSOM THE image and form of all things, looked down upon the earth, and said: *Let us now go down amongst the sons of men.* But he saw that all things grew contrary to their creation and nature, either keeping their dignities and secret virtue shut up in obscurity, or else riotously perishing through imbecility and ignorance.

§§ So then he said: *Behold, I delight not in the World. The Elements are defiled. The sons of men are wicked, their bodies are become dung-hills, and the inward parts (which are the secret chambers of their hearts) are become the dens and dungeons of the damned. Therefore, I will draw my spirit from amongst them, and they shall become more drunken, and their ignorance shall become such as never was before...no, not since the fall of the heavens! For, Lo, the time is come, and he that is the Son of the Unrighteousness liveth. Unto him shall be given strength and power. The kings of the earth shall become mad, yea, even raging mad, yea, even unto the third madness in the depth of their own imagination. But I will build my temple in the woods and in the desert places and will become a serpent in the wilderness.*

§2. *The Lord Relenteth.*

§§ Lo, the Thunder spake, and the earth became misty and full of fog, so that the soul of man might sleep in its own confusion. The second Thunder spake, and there arose spirits, such as are for Soothsayers, Witches, Charmers, and Seducers. They have entered into the holy places and have taken up their seats in man. §§ Woe be unto the earth, for she is corrupted. Woe be unto the earth, for she is surrendered to her adversary. Woe be unto the

earth, for she is delivered into the hands of her enemy. Yea, woe be unto the sons of man, for their vessels are poisoned. But even then said the Lord: *I will be known in the wilderness and will Triumph in my weakness.*

§3. *The Lord Sends Raphael to Dee & Kelly.*

§§ And lo, he called you. And you became drunken and foolish with the spirit of God. The Lord said: *Descend, for he calleth.* And so Raphael (who had brought up your prayer) descended, and he was full of the power and spirit of God. And he delivered a Doctrine—neither painted nor carved nor imagined by man—but simple, plain, full of strength and the power of the Holy Ghost. This doctrine began, as man did, nakedly from the earth, but is yet the image of perfection. It is this self-same Art which is delivered unto you as an infallible doctrine. For now it hath pleased God to deliver this Doctrine again out of darkness and to fulfil his promise with thee for the Books of Enoch. And to thee he sayeth as he said to Enoch: *Let those that are worthy understand this, by thee, that it be one witness of my promise towards thee.*

CHAPTER V.
THE NATURE OF THIS WISDOM.

§1. *To whom this Wisdom is to be Spoken.*

THIS WISDOM IS NOT TO BE SPOKEN OF IN ANY OTHER thing, neither is it to be talked of with man's imagination. For this work is the gift of God, which is all power, and so doth He open it in a tongue of power, to the intent that the proportions may agree in themselves. For it is written, Wisdom sitteth upon a hill, and beholdeth the four winds, and girdeth herself together as the brightness of the morning. But she is visited by only a few, and dwelleth alone as though she were a widow.

§2. *Concerning the Tables of Enoch.*

WE instruct and inform you, according to this Doctrine delivered, that which is contained in the 49 Tables. In 49 voyces, or callings, which are the Natural Keyes to open those (not 49 but 48, for One is not to be opened) Gates of understanding. You shall have knowledge to move every Gate, and to call out as many as you please, or shall be thought necessary. They can very well, righteously, and wisely open unto you the secrets of their Cities, and make you understand perfectly that which is contained in the Tables. Through this knowledge you shall easily be able to judge, not as the world doth, but perfectly: of the world, of all things contained within the compass of Nature, and of all things which are subject to an end.

§3. *Concerning the Angelic Calls or Keys.*

Unto this Doctrine belongeth the perfect knowledge, and remembrance of the mystical Creatures. In these keys which we deliver, are the mysteries and secret beings and effects of all things moving, and moved within the world. These calls touch all parts of the World. The World may be dealt with, and her

parts; therefore you may do anything. These calls are the keys into the Gates and Cities of wisdom, which cannot be opened, but with visible apparition. This is according to the former instructions and is to be had by the calling of every Table.

These are the holy and mystical Calls delivered, which followeth in practice for the moving of the Tables that control the Kings and Ministers of government. Their utterance is of force, and moveth them to visible apparition. Moved and appeared, they are forced (by the Covenant of God delivered by his spirit) to render obedient and faithful society. They will open the mysteries of their creation, as far as shall be necessary: and give you understanding of many thousand secrets, wherein you are yet but children. For every Table hath his key, every key openeth his gate, and every gate being opened, giveth knowledge of himself, of the entrance, and of the mysteries of those things whereof he is an enclosure. Within these Palaces you shall find things that are of power. For every Palace is above his City and every City above his entrance.

In these keys which we deliver, are the mysteries and secret beings and effects of all things moving, and moved within the world. In this is the life of MOTION, in whom all tongues of the world are moved, for there is neither speech nor silence that was or shall be to the end of the world.

§4. *Concerning the Primæval Language.*

Thus you see the necessity of this tongue, the excellency of it, and why it is preferred before that which you call Hebrew. For it is written that every lesser consenteth to its greater. Our wisdom shall prove Rhetoric. In this language, every letter signifieth the member of the substance whereof it speaketh. Every word signifieth the essence of the substance. The letters are separated, and in confusion: and therefore, are by numbers gathered together, which also signify a number. For as every greater containeth his lesser, so are secret and unknown forms of things

knit up in their parents. Being known in number, they are easily distinguished, so that herein we teach places to be numbered, letters to be elected from the numbered, and proper words from the letters, which signify substantially the thing that is spoken of in the center of the Creator.

¶ Even as the mind of man is moved at an ordered speech, and is easily persuaded in things that are true, so are the creatures of God stirred up in themselves when they hear the words with which they were nursed and brought forth. For nothing moveth, that is not persuaded; neither can anything be persuaded that is unknown. Without this language, the Creatures of God understand you not. You are not of their Cities; you are become enemies, because you are separated by ignorance from Him that governeth the City.

§5. *Concerning the 91 Earthly Princes.*

¶ The Call of the Thirty Aires summons the 91 Princes and spiritual Governors unto whom the earth is delivered as a portion. They bring in and depose kings and all governments upon the earth, and they vary the natures of things with the variation of every moment. Unto them, the providence of the æternal judgement is already opened. They are governed by the 12 angels of the 12 Tribes, which are, in turn, governed by the 7 that stand before the presence of God.

¶ Let him that can see, look up. Let him that can hear, attend, for this is wisdom. They are all spirits of the Air, not rejected, but dignified. They dwell and have their habitation in the air, in diverse and sundry places, for their mansions are not alike, nor are their powers equal. Understand, therefore, that from the fire to the earth, there are 30 places or abidings, one above and beneath another, wherein these Creatures have their abode, for a time.

§6. *Concerning the Great Table of the Quarters.*

¶ THE GREAT TABLE OF THE QUARTERS CONTAINETH THE FOLLOWING: ¶ 1. All human knowledge. ¶ 2. Out of it springeth Physic. ¶ 3. The knowledge of all elemental Creatures amongst you, how many kinds there are, and for what use they were created, those that live in the air, those that live in the waters, those that dwell in the earth, and those of the fire (which is the secret life of all things). ¶ 4. The knowledge, finding, and use of metals, the virtues of them, the congelations and virtues of stones. ¶ 5. The conjoining and knitting together of natures. The destruction of all nature and of things that may perish. ¶ 6. Moving from place to place, as, in this country or that country at your pleasure. ¶ 7. The knowledge of all mechanical crafts. ¶ 8. The transmutation of form, but not essence. ¶ 9. The knowledge of the secrets of men.

CHAPTER VI

GENERAL CONSIDERATIONS OF THIS ART.

§1. *Art Thou Worthy to Read?*

THUS SAITH THE MESSENGERS OF THE GOD OF WISDOM:
 ¶Is your worthiness such that you merit such great mercy? Are your vessels cleansed and made apt to receive and hold the sweet liquor of pure understanding? ¶Be not proud of the gifts of God, but become humble. Do not justify yourself in respect that this is the word of God delivered unto you for your own selves. The more you receive, be the more thankful. The more you be in the strength of God, the more use you the pureness of humility.

¶You called for Wisdom, and God hath opened unto you his Judgement. He hath delivered unto you the keys that you may enter. But be humble. Enter not of presumption, but of permission. Go not in rashly, but be brought in willingly. For many have ascended, but few have entered. Therefore be diligent that you may enter in, not as spoilers, but as such as deserve entertainment in the name and through the power of the Highest. For great are the mercies of God unto such as have faith.

§2. *Deal not with Wicked Spirits.*

¶As long as thou dealest with wicked spirits, the Lord will keep back his hands and thou keepest back the Lord. If thou wilt be the minister of God, if thou wilt go forward in His work, if thou wilt see the happy times that are to come, thou must abstain from evil. Thou must sweep thy house clean. Thou must put on thy best garments and must become humble and meek.

¶Let not thy life be a scandle to the will of the Lord, and to the greatness of his works. For the power that is within thy soul is of great force and the ability to perform those things that proceed with power. This is the cause that the wicked ones

obey thee, for they fear themselves when they see the seal of thy Creation. Remember that there is a continual fight between us and Satan, wherein we vanquish by patience. The Devil is the father of carping, so doth he subtly infect the Seer's imagination, mingling unperfect forms with my utterance. Water is not received without air, neither the word of God without blasphemous insinuation. The son of God never did convert all, neither did all that did hear him, believe. Therefore, where the power of God is, is also Satan.

§3. *Concerning the Book, Vestments, & Days.*

¶The book consisteth first of the invocation of the names of God, and second of the invocation of the Angels, by the names of God. Their offices are manifest. ¶Four days after your book is made, you must only call upon those names of God or of the God of Hosts, in those names. And 14 days after, you shall (in some convenient place) call the Angels by petition and by the name of God unto which they are obedient. ¶On the fifteenth day, you shall cloth yourselves in vestures made of white linen and so have the apparition, use, and practice of the Creatures. ¶For this Art is not a labour of years, nor many days.

§4. *Conclusion.*

¶Thus hath God kept promise with you, and hath delivered you the keys to his storehouses, wherein you shall find (if you enter wisely, humbly, and patiently) treasures worth more than the frames of the heavens. Therefore, examine your books. Confer one place with another, and learn to be perfect for the practice and entrance.

¶Thinkest thou that we speak anything that is not true? Then thou shalt never know the mysteries of all the things that have been spoken. If you love together and dwell together, and in one God, then God will be merciful unto you, bless you, comfort you, and strengthen you unto the end. More would I say but words profit not. God be amongst you.

BOOK TWO
THE MYSTICAL HEPTARCHY
OF THE DIVINE CREATION ITSELF
TO BE READ BY THE FAITHFUL

CHAPTER I.

OF THE TITLE & GENERAL CONTENTS
OF THIS BOOK WITH SOME
NEEDFUL TESTIMONIES

PRINCE BRALGES

BEWARE OF WAVERING AND BLOT OUT SUSPICION, for we are God's creatures that have reigned, do reign, and shall reign forever. Behold, our mysteries shall be known unto you, preserving the secrets of Him that reigneth forever and whose name is great forever.

KING CARMARA

Open your eyes and you shall see from the highest to the lowest and the peace of God shall be upon you. Come, gradually we repeat the work of God. There is one God and one are his works.

DEE

Note that this Book of Creation speaks firstly of the mighty works of God and secondly of the kings that perform these great works. Very many came upon the curved surface of the transparent globe and said: *We are prepared to serve our God.*

KING CARMARA

This work shall have relation to time present and present use, to mysteries far exceeding it, and finally to a purpose and intent whereby the majesty and name of God shall and may, and, of

force, must appear with the apparition of his wonders and marvels yet unheard of. So say I.

DEE

¶ As Michaël and Uriel at the beginning of these revealed mysteries were present and gave authority to Carmara to order the whole Heptarchical Revelation; so at the conclusion, they appeared again, and Raphaël with them; and Michaël concluded the second book of this particular revelation Heptarchical with these words following:

MICHAEL

¶ Merciful is our God and glorious is his name, which chooseth his creatures according to his own secret judgement. This Art is the first part of a threefold Art joining Man with the knowledge of the world, the government of his creatures, and the sight of his majesty. This is (O I say unto you) that which is strength, medicine, and mercy to those that fear him. Amen.

KING CARMARA

¶ Thou hast a work of three proportions in essence, and of seven in form, which is (of itself) divided by a number sevenfold: of the course, estate, and determination of things above, things near, and things below, which of itself, is pure, perfect, and without blemish. ¶ Oh God, how easy is this first understanding! Thou hast been told perfectly, plainly, and absolutely, not only of the condition, dignities, and estate of all things that God hath framed, but also, thou wast delivered the most perfect form and use of them. ¶ Even as God is just, His judgements true, His mercies unspeakable, so are we the true messengers of God.

MICHAEL

¶ Now you touch the world and the doings upon Earth. Now we show unto you the lower world and the governors that work and rule under God. By them you will have power to work such things as shall be to God's glory, and the profit of your country and the knowledge of his Creatures. They proceed from

one God, one knowledge, and one operation. Come, my sons, behold these tables. Herein lie the names, that work under God upon the earth, not of the wicked, but of the Angels of light. The whole government doth consist in the hands of 49, (in God his Power, Strength, Mercy, and Justice) whose names are here evident, excellent, and glorious. Mark these tables, mark them, record them to your comfort. This is the first knowledge. Herein shall you find wisdom. Halleluiah. Mighty and Omnipotent art thou, O God, God, God, amongst thy creatures. Thou fillest all things with thy excellent foresight. Thy glory be amongst us forever. Amen.

URIEL

¶ The fountain of wisdom is opened. Nature shall be known. The earth with her secrets shall be disclosed. The elements with their power shall be divulged.

¶ Behold, I teach! There are 49 Angels, glorious and excellent, appointed for the government of all earthly actions. These 49 do work and dispose the will of the Creator, being limited from the beginning in strength, power, and glory. These shall be subject unto you, in the name and by invoking upon the name of God, who doth lighten, dispose, and comfort you.

KING CARMARA

¶ What doth heaven behold or the earth contain that is not or may be subdued, formed, and made by these? What learning grounded upon wisdom with the excellencies in nature cannot they manifest?

¶ One in Heaven they know.

¶ One & all in Man they know.

¶ One & all in Earth they know.

¶ Measure Heaven by a part (my meaning is by those few). Let God be glorified, his name praised, for his creation will be taken and his creatures well used.

Bb

URIEL

¶ He that standeth in the midst of the globe signifieth Nature. Whereupon, in the first point, is the use and practice of this work. That is to say, concerning the first part, for it is said: The book containeth three kinds of knowledge:

- ¶ The knowledge of God truly.
- ¶ The number & doings of His Angels perfectly.
- ¶ The beginning & ending of Nature substantially.

CHAPTER IJ

OF JOHN DEE & HIS INTEREST TO
EXERCISE THE DOCTRINE HEPTARCHICAL

URIEL

HIS, YOUR ERA, IS THE LAST AGE, WHICH WILL BE revealed unto you. The mysteries of God have a time. The Sons of Light and their Sons are subject unto my commandment. This is a mystery. I have spoken of it; note it thoroughly. They are my servants. By them thou shalt work marvels.

PRINCE HAGONEL

¶ There are kings false and unjust, whose power I have subverted and destroyed. So shalt thou.

¶ The second assembly were the governors of the Earth, whose glory (if they be good) the weapons we have taught thee will augment, and, consequently (if they be evil) will pervert.

PRINCE BORNOGO

¶ I am Bornogo. What thou desirest shall be fulfilled. Glory to God.

PRINCE BEFAFES

¶ Behold, Behold, Lo Behold, my mighty power consisteth in this. Learn wisdom by my words. This is wrought for thy erudition, what I instruct thee from God. Look to thy charge truly. Thou art yet dead. Thou shalt be revived. But Oh, bless God truly. The blessing that God giveth me I will bestow upon thee by permission. O how mighty is our God, which walked on the waters, which sealed me with His name, whose glory is without end. Thou hast written me, but yet dost not know me. Use me,

in the Name of God; I shall, at the time appointed, be ready. I will manifest the works of the seas and the miracles of the deep shall be known.

KING CARMARA

Behold, thou desirest and art sick with desire. I am the disposer though not the composer of God's medicines. Thou desirest to be comforted and strengthened in thy labours. I minister unto thee the Strength of God. What I say is not of myself. Neither that which is said to me, is of themselves; but is said of Him which liveth forever. These mysteries hath God lastly, and of His great mercies granted unto thee. I have answered thy doubting mind. Thou shalt be glutted, yea filled, yea thou shalt swell and be puffed up with the perfect knowledge of God's mysteries in His mercies. Abuse them not. Be faithful; use mercy. God shall enrich thee. Banish Wrath—It was the first and the greatest commandment. I reign by Him and live by Him which reigneth and liveth forever.

I have showed thee perfectly. Behold I teach again. O how merciful is God, that revealeth such great secrets to flesh and blood! Thou has 42 letters. Thy tables last, contain so many.

When thou wilt work for anything pertaining to the estate of a good king, thou must first call upon him which is their prince. Secondly, the ministers of his power are six.

In outward sense my words are true. I speak now of the use of one of the first that I speak of, or manifested yesterday. Said I not and showed I not the Government of princes, for as it is a mystery to a further matter, so it is a purpose to a present use. If it rules worldly princes, how much more shall it work with the Princes of Creation? Thou desirest use; I teach thee use. And yet the Art is to the further understanding of all sciences that are past, present, and yet to come. Fruits hath further virtue, but only in the eating. Gold has further condition, property and quality, than in melting or in common use. Kings

there are in Nature, with Nature, and above Nature. Thou art dignified in this knowledge.

Last of all, thy ring, which was appointed thee, with the lamen comprehending the form of thy own name, which is to be made in perfect gold, as is aforesaid.

Thou shalt be comforted. But respect the world, whereunto thou art provided; and for what end; and that in what time. Serve God truly; serve Him justly. Great care is to be had with those that meddle with Prince's affairs. Much more consideration with whom thou shalt meddle or use any practice. But God hath shadowed thee from destruction. He preserveth His faithful, and shaddoweth the just with a shield of honour. None shall enter into the knowledge of these mysteries with thee, but this worker*. Thy estate with the Prince (now reigning)† shall shortly be amended, her favour increased, with the good will of diverse that are now deceivers. Thy hand shall shortly be their help; and thou shalt do wonderful and many benefits (to the augmenting of God's Glory) for thy country. Finally, God doth enrich thee with knowledge and of thyself hath given thee understanding of these worldly vanities. He is merciful and his good creatures neither have, do, nor will forget thee. God bless you both; whose Mercy, Goodness, and Grace I pronounce and utter upon you.

KING BOBOGEL

I have said: *Dee, Dee, Dee* at length, but not too late‡.

KING CARMARA

Lo, thus thou seest the glory of God's creatures; whom thou mayest use with the consideration of the day, their King, their Prince and his Character. The King and Prince govern for the whole day; the rest according to the sixth part of the day. Use

* i. e. Kelly

† i. e. Queen Elizabeth

‡ Dec's note: King Bobogel said this of my attaining to such mysteries as the ministers under him made show of.

them to the glory, praise, and honour of Him which created them, to the laude and praise of His Majesty.

KING BYNEPOR

¶ Write this reverently. Note it with submission. What I speak hath not been revealed; no not in the last times of the second last world. Thou shalt work marvels marvelously by my workmanship in the highest.

KING BNASPOL

¶ Unto my Prince (my subject) are delivered the keys of the mysteries of the Earth. All those are Angels that govern under him. Use them; they are and shall be at thy commandment.

KING BNASPEN

¶ By me thou shalt cast out the power of wicked spirits. By me thou shalt know the doings and practices of evil men, and more than may be spoken or uttered to man.

KING CARMARA

¶ Oh, how great is the sickness and corruption of man who barely has faith in God or in His good Angels? You maketh all the earthly things that have the corruption of the earth within them. Our God, our God, He is our God. It is true we are His Angels and it is also true that we are His servants. I ask for that power. I speak, and that which I speak is the shadow of truth, justice, and perfection.

¶ BEHOLD: (Holding up the measuring rod.)

¶ HERE: (Pointing to the end of the rod.)

¶ AND HERE: (Pointing to the middle of it.)

¶ I bear a power and virtue that is beyond measure. Nothing is obscure which is received through him. ¶ One thing is yet wanting; a meet receptacle. There is yet wanting a stone. One there is most excellent; hid in the secret part of the depths in the uttermost part of the Roman possession. Lo, the right hand of God is upon thee. Thou shalt prevail with it, with Kings and with all Creatures of the world; whose beauty (in virtue) shall be

more worth than the Kingdoms of the Earth. Go towards it and take it up. Keep it secret. Let no mortal hand touch it but thine own.

II.

¶ Thy character must have the names of the six angels (written in the midst of the Sigillum Æmeth) graven upon the other side in a circle, in the midst where must the stone be (which was also brought). Wherein thou shalt at all times behold (privately to thyself) the state of God's people, through the whole world.

RAPHÆL

¶ Go and thou shalt receive. Tarry and thou shalt receive. Sleep and thou shalt see. But watch, and thine eyes shall be fully opened. One thing which is the ground and element of thy desire is already perfected. Out of seven thou hast been instructed (of the lesser part) most perfectly. ¶ All those before spoken of are subject to thy call. Of friendship at any time thou mayest see them and know what thou wilt. Every one (to be short) shall at all times and seasons, show thee direction in anything. ¶ One thing, I answer thee for all offices. Thou hast in subjection all offices. Use them when it pleaseth thee and as thy instruction hath been.

URIEL

¶ The Lord saith: *I have hardened the heart of one of you. Yea, I have hardened him, as the flint, and burnt him together with the ashes of a cedar, to the intent he may be proved just in my work, and great the strength of my glory. Neither shall his mind consent to the wickedness of iniquity, for from iniquity I have chosen him to be a first earthly witness of my dignity.**

DEE

¶ Uriel came in again and another with him and jointly they did say together: *Glorify God forever.* And now Uriel stood behind and the other sat down in the chair with a sword in his right hand. All his head glittered like the sun; the hair of his head was

* Apparently Uriel is referring to Kelly.

long. He had wings and all his lower parts seemed to be with feathers. He had a robe over his body and a great light in his left hand. He said: *We are blessed from the beginning and blessed be the name of God forever†.*

¶ An innumerable company of angels were about him. And Uriel didst lean on the square table. Then he that sat on the chair said to them:

Go forward, God hath blessed thee.

I will be thy Guide.

Thou shalt attain unto thy Searching,

The world begins with thy doings.

Praise God.

*The Angels under my power shall be
at thy commandment.*

Thou shalt see me.

I will be seen of thee.

I will direct thy Living & Conversation.

¶ Now Michaël thrust out his right Arm with the sword. I bade the Skryer to look. Then the sword did seem to cleave in two. And a great fire flamed out of it vehemently. Then he took a ring out of the flames of his sword and gave it to Uriel and said: *The Strength of God is unspeakable. Praise be to God for ever & ever.* And Uriel did make curtsy to him. Then Michaël did say the following:

MICHAEL

¶ After this sort must be the ring. Note it. I will reveal thee this ring, which was never revealed since the death of Solomon, with whom I was present. I was present with him in strength and mercy. Lo, this it is. This it is wherewith all miracles and divine works and wonders were wrought by Solomon. This it is which I have revealed unto thee. This it is which Philosophie dreameth of. This it is which the Angels scarce know. This it

† Dee's note: This was Michaël and his manner of apparition.

is and blessed by his name, yea his name be blessed forever. There are kings false and unjust, whose power thou mayest subvert & destroy.

DEE

¶ Then he laid the ring down upon the Table and said: Note. I noted the manner of the ring in all points. After that he threw the ring down upon the table and it seemed to fall through the table. And then he said the following:

MICHAEL

¶ So shall it do at thy commandments. Without this ring thou shalt do nothing. Blessed be his Name that compasseth all things. Wonders are in him and his Name is wonderful. His Name worketh wonders from generation to generation.

DEE

¶ Then Michaël brought in the seal which he showed the other day and opened his sword and had the Skryer read. And he read ÆMETH. Then the sword closed up again and Michaël said the following:

MICHAEL

¶ This I do open unto thee because thou marvest at the Sigil of God. This is the name of the Seal which be blessed forever. This is the seal itself. This is holy. This is pure. This is forever. Amen. ¶ As truly as I was with Solomon, so truly will I be with thee. I was with Solomon in all his works and wonders. Use me, in the Name of God, for all occasions.

THE SIGIL OF ÆMETH

CHAPTER IIJ

SOME REMEMBRANCES OF THE FURNITURE
& CIRCUMSTANCES NECESSARY IN THE
EXERCISE HEPTARCHICAL

KING CARMARA

FIRST CAST THINE EYES UNTO THE GENERAL PRINCE Governor or Angel that is principal in this world. Then place my name that thou hast already. Then the name of him that was showed thee yesterday (with the short coat*). Then his power, with the rest of his six perfect ministers. With these three thou shalt work to a good end. All the rest thou may use to God's glory for every one of them shall minister to thy necessities. Moreover, when thou invokest, thy feet must be placed upon these tables which thou seest written last, comprehending 42 letters and names. But with this consideration: that the character (which is the first of the 7 in the former book) be placed upon the top of the table, which thou wast and art and shall be commanded to have and use. Last of all the ring which was appointed thee, with the lamen comprehending the form of thy own name; which is to be made in perfect gold as is aforesaid.

Even as God is just, his judgements true, his mercies unspeakable; so are we the true messengers of God and our words are true in His mercy forever. Glory, Oh Glory be to thou, Oh most high God. Lo, thus thou seest the Glory of God's creatures; whom thou mayest use with the consideration of the day, their

* Prince Hagonel

King, their Prince, and his character. The King and Prince govern for the whole day; the rest according to the six parts of the day. Use them to the glory, praise, and honour of Him, which created them, to the laude and praise of His majesty. The characters of the Kings are in the Globe; and the characters of the Princes are in the Heptagon.

PRINCE HAGONEL

¶The Sons of Light and their Sons are subject to my commandment. This is a mystery. I have spoken of it. Note it thoroughly. They are my servants. By them thou shalt work marvels. My time is yet to come. The operations of the earth are subject to my power. I am the first of twelve. My seal is called 'Barces' & here it is. In his name with my name by my character and the rest of my ministers are these things brought to pass.

¶These that lie here are Witches, Enchanters, Deceivers, and Blasphemers. And finally all they that offer Nature with abuse and dishonour Him which reigneth forever. ¶The second assembly were the governors of the earth, whose glory, if they be good, the weapons which we have brought thee will augment, and consequently (if they be evil) will pervert. ¶The third assembly are those which taste of God's mysteries and drink of the juice of Nature, and whose minds are divided, some with eyes looking towards heaven, the rest to the center of the earth. Where God's glory is not, there neither are the good, nor goodness.

¶It is wrought (I say) it is wrought (for thy understanding) by the seven of the seven, which were the sons of æternity, whose names thou hast written and recorded to God's glory.

PRINCE BUTMONO

¶Mark this*: All spirits inhabiting within the earth where their habitation is of force, not of will, are subject to the power here

* Dee's note: Prince Butmono said this, but the office is under King Bnaspol, whose Prince is Blisdon. The mystery of this I know not yet, for Blisdon will be found to be the proper minister of King Bnaspol.

within my seal: with this you shall govern; with this you shall unlock; with this (in his Name who reigneth) you shall discover the entrance.

KING CARMARA

¶Secondly, the ministers of his power are six, whose names contain seven letters apiece. So thy tables do manifest. By whom in generality, or by any one of them in particularity, thou shalt work for any intent or purpose. As concerning the letters particularly, they do concern the names of 42, which 42 in generally, or one of them, do and can work the destruction, hinderance, or annoyance of the estate, condition, or degree (as well for a body of government) of any wicked or ill-living prince.

¶*Venito Bobogel, Rex et Princeps Nobilitatis; Venito cum Ministris; Venito (inquam) venito cum Satellitibus tuis, minutus†.*

[Come Bobogel, Noble Prince & King. Come with your ministers. Come, yea, come with your satellites.]

KING BOBOGEL

¶*Veni Princeps & Principum, qui sunt Aquarum Principes; Ego sum Rex Potens et mirabilis in Aquis; cuius potestas est aquarum viceribus.**
[Come, O thou who are Princes of the waters. I am the King, powerful and wonderous in the waters, whose power is over the waters.]

KING CARMARA

¶*Venito veni (inquam) Adesto. Veni Rex. O Rex, Rex, Rex Aquarum. Venito, Venito, (inquam). Magna est tua. Major autem mea potestas. Vitam dedit Deum omnibus creaturis.*

[Come, I say, come at this time. Come, O King, King, King of the waters. Your power is great but my power is greater. God gave life to all creatures.]

KING CARMARA

¶*Veni Ignis, Veni vita mortalium (inquam) ventio. Adesdum. Regnat Deus, O Venite. Nam unus illo. Regnat, et est vita viventium.*

† Dee's note: This I note for the form of calling.

* Dee's note: This is King Bobogel's call to his Prince.

[Come, O fire, which is the life of all mortal things. Come at this time. God Reigns. O come, for he is one. He reigns and is the life of all living things.]

KING CARMARA

¶ *Venite, ubi nulla quies sed stridor dentium. Venite vos, qui sub meæ estis potestate.*

[Come, where there is nothing of him but the gnashing of teeth. Come, all of you who are under my power.]

¶ Behold, every one of these princes must have his peculiar table.

URIEL

¶ Thy character must have the names of the seven Angels (written in the midst of the Sigil of Æmeth) graven upon the other side in a circle. In the midst whereof must the stone be, which was also brought, wherein thou shalt at all times behold (private to thyself) the state of God's people through the whole earth.

¶ The four feet of the table must have 4 hollow things of sweet wood, whereupon they must stand. Within the hollow spheres thy seals may be kept unperished. One month is all for the use thereof. The silks must be of diverse colours, the most changeable that can be gotten, for who is able to behold the Glory of the Seat of God?

DEE

¶ The character or lamen for me was noted that it should contain some token of my name. And now in this accounted the true character of dignification, I perceive no peculiar mark or letters of my name.

URIEL

¶ The form in every corner considereth your name.

DEE

¶ You mean there to be a certain shadow of Delta†?

URIEL

¶ Well.

† Dee used a delta (triangle) to represent his name.

DEE

¶ What is the use of these tables? From what ground are they framed or divided?

URIEL

¶ They are the ensignias of the creation wherewith all they were created by God: known only by their acquaintance and the manner of their doings.

DEE

¶ Have I rightly applied the days to the Kings?

URIEL

¶ The days are rightly applied to the Kings.

DEE

¶ The characters and words, annexed to the Kings' names in the outer circumference of the great circle or globe: how are they to be used?

URIEL

¶ They are to be painted on sweet wood and so to be held in thy hand as thou shalt have cause to use them.

IL*

¶ The Sigil of Æmeth is to be set in the middle of the table. ¶ Grace, Mercy, and Peace be unto the lively branches of his flourishing kingdoms. And strong art thou in their glory which dost unknit the secret part of thy lively workmanship; and that before the weak understanding of men. Herein is thy power and magnificence opened unto Man. And why? Because thy divinity and secret power is here shut up in the third and fourth number; from the first and fundamental is of all your most holy works. For if thou (O God) be wonderful and incomprehensible in thine own substance, it must needs follow that thy works are likewise incomprehensible. But lo, they shall now believe, because they see that which heretofore they could scarcely believe. Strong is

* Dee's note: IL is the first of the seven Sons of Light. IL is the always adherent minister to King Baligon and his name is expressed in his character.

the influence of thy supercelestial power, and mighty is the force of thy arm which overcometh all things. Let all power therefore rest in thee. Amen.

¶ Leave out the letter 'B' of the seven names of the Kings and seven princes and place them in a table divided by 12 and 7, the seven spaces being uppermost. And therein write in the upper line, the letters of the King, with the letters of his prince following just after his name. And so of the six others and their princes. And read them on the right hand, from the upper part to the lowest. And thou shalt find, then, the composition of this table. ¶ Therein they are all comprehended, saving certain letters which are not to be put in here. By reason that the Kings and Princes do spring from God, and not God from the Kings and Princes. Which excellency is comprehended and is also manifest in that third and fourth number round about the sides (of this square table) is every letter of the 14 names of the seven kings and princes. ¶ Hereafter shall you perceive that the glory of this table surmounteth the glory of the sun. All things also that appertain unto it are already proscribed by your former instruction.

¶ God is the beginning of all things, but not after one sort, nor to every one alike. But there are three manners of working with His name: ¶ 1: in respect of dignification; ¶ 2: in respect of conciliation; ¶ 3: in respect to the end & determined operation. ¶ Now as to what and would you wear your characters, &c. But how do I teach? The character is an instrument applicable only to dignification. But there is no dignification but that which doth proceed and hath his perfect composition centrally in the square number of 3 & 4, the center whereof and shall be equal to the greatest. Hereby you may gather not only to what end, the blessed character (wherewith thou shalt be dignified) is prepared, but also the name of all other characters.

¶ The table is the instrument of conciliation, and so are proper to every King and Prince, according to their order.

¶ Now as to the last, concerning the end and determination. It only consisteth in the mercy of God and the characters of these books. Set down the Kings and their Princes in a table, as thou knowest them, with their letters backward (excepting their "B's") from the right hand to the left. Let Bobogel be the first and Bornogo his prince, &c.†

DEE

¶ So on my character or lamen of dignification are all the names of the seven kings and all the seven princes, perfect as in the great table, the "B's" only being the first letter common to them all, kept back, but in memory.

MICHAEL

¶ I will now speak concerning the Sigil of Æmeth, called also the Sigil of God. I will show thee in the mighty hand and strength of God, what His mysteries are, the true circle of Æternity, comprehending all virtue, the whole and sacred trinity. Oh holy be he; Oh holy be he; Oh holy be he. Amen. ¶ Now what wilt thou?

DEE

¶ I would full fain proceed according to the matter in hand.

MICHAEL

¶ Divide this outward circle into 40 equal parts, whose greatest numbers are four. See that thou do it presently.

DEE

¶ I did so dividing it first into four parts and then every one of them by ten. ¶ Michael then called out by name *Semiel*. One came in and knelt down and great fire came out of his mouth.

MICHAEL

¶ To this one named *Semiel*, are the mysteries of this table known. ¶ Oh God, thou hast said and thou livest forever.

† Dee's note: It may appear that Butmono is Prince to Bynepor and Blidon Prince to King Bnaspol.

Cc

DEE

¶ Semiel then stood up, and flaming fire came out of his mouth and then he said as followeth: *Mighty lord: what wouldst thou with the tables?*

MICHAEL

¶ It is the will of God that thou fetch them hither.

SEMIEL

¶ I am his tables. Behold, these are his tables. Lo, where they are.

DEE

¶ There came in 40 white creatures, all in white silk long robes, and they were like children. And all of them, falling on their knees, said: *Thou only art holy among the highest: Oh God, thy Name be blessed forever.*

¶ Michael then stood up out of his chair and, by & by, all his legs seemed to be like two pillars of brass, and he was as high as half-way up to heaven. And, by and by, his sword was all on fire. And he shook and drew his sword over the heads of all these 40 and they fell down. Then Michael spake to Semiel with a thundering voice:

MICHAEL

¶ Declare the mysteries of the Living God; our God; of One that liveth forever!

SEMIEL

¶ I am ready.

DEE

¶ Michael shook over them with his sword and they all fell down (and Uriel also) on their knees. And commonly at the striking with the sword, flaming fire like lightning, did flash.

MICHAEL

¶ Note: Here is a mystery.

DEE

¶ Then stept forth one of the 40 from the rest and opened his breast, which was covered with silk, and there appeared on it a

great 'T' all of gold. And over the 'T' stood the number '4'. The 40 all cried: *It liveth and multiplieth forever; blessed be his Name.* Then that creature did shut up his bosom and vanished away like fire.

MICHAEL

¶ Place that in the first place. It is the name of God.

DEE

¶ Then there seemed a great clap of Thunder*. . . The chair was brought in again and I asked what it meant.

URIEL

¶ This is a seat of perfection, from which things shall be showed unto thee, which thou hast long desired.

DEE

¶ Then was a square table brought into the stone and I demanded what that table betokened.

URIEL

¶ A mystery not yet to be known. These two shall remain in the same stone to the sight of all undefiled creatures. ¶ You must use a four-square table, two cubits square, whereupon must be set the Sigil of God. This seal is not to be looked upon without great reverence and devotion. This seal is to be made of perfect wax. The seal must be 9 inches in diameter. The roundness must be 27 inches or somewhat more. The thickness of it must be an inch and a half to an inch and a quarter. And a figure of a cross must be on the backside of it made thus:

* Dee's note: And so forth. And note that the whole second book is nothing else but the Mysteries most marvelous of the Sigil of God, sometimes called the Sigil of Ameth, wherein here I did leave but a little excerpt. Note further that almost all the third book was of the seven ensigns of creation whereof mention was before made.

¶ The table is to be made of sweet wood and of two cubits high, with four feet with four of the former seals under the four feet. ¶ Under the table did seem to be laid red silks two yards square. And over the seal did seem likewise red silk to lie four square, broader than the table, hanging down with four tassels at the four corners thereof. Upon this uppermost red silk did seem the stone with the frame to be set, right over and upon the principal seals, saving that the red silk was between the one and the other. ¶ There appeared the first table covered with a cloth of silk of changeable colour, red and green, with a white cloth under it hanging very low.

CHAPTER IV

SOME NOTICE OF THE PECULIAR FORMS & ATTIRE
WHEREIN THE KINGS, PRINCES
& MINISTERS HEPTARCHICAL APPEARED
& SOME OF THEIR ACTIONS
& GESTURES AT THEIR APPEARANCE

KING CARMARA

HIS KING (BEING CALLED FIRST BY URIEL) APPEARED as a man, very well proportioned and clad in a long purple robe with a triple crown of gold upon his head.

¶ At his first coming he had seven spirits (like men) waiting on him, which afterwards declared themselves to be the seven Princes Heptarchical.

¶ Uriel delivered unto this King (at his first appearing) a rod, or straight little round staff of gold, divided into three equal distinctions, whereof two were dark or black and the third bright red. This rod he kept still in his hand.

¶ This king only was the orderer or disposer of all the doctrine, which I term Heptarchical, and the first practitioner thereof, calling the seven Princes and after that the seven Kings, and and by giving instruction for use and practice of the whole doctrine Heptarchical. For the first purpose and fruit to be enjoyed by me, of the two other, there was only mention made.

¶ King CARMARA said: *This is the sign of the work* and there appeared the letters 'C' and 'B' reversed on a white flag with a woman standing by, whose arms did not appear. On the other

side of the flag appeared the coat of arms of England as on the old flag:

PRINCE HAGONEL

¶Note that all the Princes seemed to be men, and to have red robes, but this Prince had a robe that was shorter than the others. ¶All the princes had circlets of gold on their heads rather than crowns or coronets. This Prince held in the palm of his right hand a round ring with a point or prick in the midst, hanging also over his middle fingers, which he affirmed to be his seal and said that the name of it was Barces:

¶All the princes held up together a seven-pointed star that seemed to be of copper:

THE SUBJECTS AND SERVANTS TO PRINCE HAGONEL

¶The Sons of Light and their Sons are said to be subject unto the commandment of HAGONEL and are his servants. Their names are all given in the sigil of Æmeth:

The Seven Sons of Light:

- | | |
|---------|------------|
| 1. I | 5. HECOA |
| 2. IH | 6. BEIGIA |
| 3. ISR | 7. STIMCUL |
| 4. DMAL | |

The Seven Sons of the Sons:

- | | |
|------------|-------------|
| 1. E or IL | 5. ROCLE |
| 2. AN | 6. HAGONEL |
| 3. AVE | 7. ILEMESSE |
| 4. LIBA | |

THE SONS OF LIGHT

¶The seven Sons of Light appeared like seven young men, all with bright countenance, apparelled in white, with white silk on their heads. Every one seemed to have a metallic ball in his hand, the first of gold, the second of silver, the third of copper, the fourth of tin, the fifth of iron, the sixth tossed between his two hands a round thing of quicksilver, the last had a ball of lead. The first had on his breast a round tablet of gold and on it written a great 'I'. And the second, on his golden tablet, had his name also written. And every one orderly coming forth, showed their names upon their golden tablets. At their departing they made curtsy and mounted up to Heaven.

THE SONS OF THE SONS OF LIGHT

¶The Sons of the Sons of Light appeared like seven little children, like boys covered all with purple, with hanging sleeves, like the sleeves on priests' or scholars' gowns. Their heads were attired all after the former manner with purple silk. They had three-cornered tablets on their breasts, and these tablets seemed to be very green and on them the letters of their names were written. The first had two letters made thus of an 'E' and an 'L' or 'E-'. They made reverences to Michael (who had called them) and so mounted up to heavenwards.

THE 42 MINISTERS OF PRINCE HAGONEL

¶At the call of King CARMARA (during the second handling of this Heptarchical doctrine), when he said *Come, repeat the works of God*, there appeared Prince HAGONEL, and after that followed 42, who said *We are prepared to serve our God*. Each of these

had somewhat in their hands as they stood in this order, and Hagonel seemed to embrace the company:

¶ Six of these seemed more glorious than the rest and their coats were longer; they had circlets of gold around their heads and held in their hands perfect crowns of gold. The second six had three quarters of crowns in their hands. The third six had robes or clothes in their hands. All the rest seemed to have balls of gold, which they tossed from one to another, but at the catching they seemed empty windballs, for they grasped them by closing their hands, as if they were not solid but empty like a blown bladder. The first six made curtsy to Prince HAGONEL, the second six made curtsy to the first, and the third to the second. And they all, with Prince HAGONEL, made curtsy to King CARMARA. ¶ Each of the 42 stood upon a table, and upon every table was but a single letter. The first minister of the first six did go away and in his table appeared the letter 'O' and so of the rest. But the third six cowered down and was loath to show their tables, but at length did. The third row went off, lamenting, being commanded by the Prince. All departed in fire, falling into the globe. The fifth row, too, did sink into the Globe, every one in a sundry fire by himself. The sixth row fell with smoke down into the globe. Thus was revealed the following table:

O	E	S	N	G	L	E
A	V	Z	N	I	L	N
Y	L	L	M	A	F	S
N	R	S	O	G	O	O
N	R	R	C	P	R	N
L	A	B	D	G	R	E

¶ King CARMARA said: Remember how they stood when they were secondly disposed unto thee. They stood first in six rows, and next they were turned into seven. I speak of the greater number and not of the lesser, for in speaking of the greater I have comprehended the lesser*.

* Dee's note: There are but 6 names that are in subjection to the Prince. The first seven next him are these which held the fair and beautiful crowns. The first seven are called by those names that thou seest: Oes . . . &c. This diversity of reckoning by 6 and 7, I cannot yet reconcile.

THE SEAL OF AUE*

KING BOBOGEL

¶ He appeared in a black velvet coat; and his hose was close round hose with velvet upperstocks, overlayed with gold lace. On his head was a velvet hat or cap with a black feather in it. A cape was hanging on one of his shoulders, and his purse was hanging about his neck. Hung upon his girdle was a rapier. His beard was long, and he had bloomers and slippers. And he said, *I wear these robes not in respect of myself, but of my Government.*†

PRINCE BONORGO

¶ He appeared in a red robe with a gold circlet on his head; he shewed his seal and said: *This it is.*

THE 42 MINISTERS

¶ Seven of the ministers are apparelled like BOBOGEL the king; sagely and gravely; all the rest are almost ruffian or boisterous. Some are like to be men and women; for in the forepart they seemed women, and in the back part men, by their apparel. And they were the last 7. They danced, leapt, and kissed. They came afterwards into a circle, the sage and the rest; but the sages

* A seal for each of the Sons of the Sons of Light appears at the top margin of each page where the description of each set of King, Prince and 42 Ministers begins.

† The above described robes would have been considered extremely rich and elegant in Dee's time.

stood all together. The first of the sages lifted up his hand aloft and said: *Let us follow the Will of God; Our God is truly Noble and Eternal.* He plucked up his right foot and under it appeared an 'L'. And the rest in like manner appeared their letters or names.

1. The first seven grew all together in a flame of fire and so sunk down into the transparent fiery globe of the new world.
2. The second seven fell down like dross of Metal.
3. The third seven clasped together and fell down in a thick smoke.
4. The fourth seven joined together and vanished like drops of water.
5. The fifth seven fell down like a storm of hail.
6. The last vanished away.

¶ At another time, they came (being called by King CARMARA) all 42 bringing a round table over their heads flat-wise; and they laid it down and stood about it the letters being as before.

L	E	E	N	A	R	B
L	N	A	N	A	E	B
R	O	E	M	N	A	B
L	E	A	O	R	I	B
N	E	I	C	I	A	B
A	O	I	D	I	A	B

THE SEAL OF LIBA

KING BABALEL

He appeared with a crown of gold on his head; with a long robe whitish of colour; his left arm's sleeve was very white; and his right arm sleeve was black. He seemed to stand upon water. His name was written on his forehead: BABALEL.

PRINCE BEFAFES

Prince Befafes appeared in a long red robe, with a circlet of gold on his head. He had a golden girdle, and on it was written BEFAFES. He opened his bosom and appeared lean; and seemed to have feathers under his robes. His seal or character was thus:

THE 42 MINISTERS

Of his 42 ministers, the first seven had circlets of gold on their heads, and the King BABALEL called Befafes saying: *Come Prince of the Seven Princes, who are Princes over the waters.* Every one of the 42 had a letter on his forehead. They were seven in a row; and six downward. But of the first seven, the letters became to be between their feet; and the water seemeth continually to pass over these letters. The first seven took the water and threw it upwards and it became clouds. The second threw it upwards and it became snow, &c. The 42 dived into the water and so vanished away. And BABALEL and Befafes also were suddenly gone. Their names and characters appeared to be these, which follow in the squares.

E	I	L	O	M	F	O
N	E	O	T	P	T	A
S	A	G	A	C	I	Y
O	N	E	D	P	O	N
N	O	O	N	M	A	N
E	T	E	V	L	G	L

THE SEAL OF ROCLE

KING BYNEPOR

§ King BYNEPOR appeared as a King, with his Prince next after him; and after the prince, 42 ministers.

PRINCE BUTMONO

SSPrince Butmono appeared in a red robe, with a golden circle on his head. His seal is this:

THE 42 MINISTERS

¶ They appeared like Ghosts and Smokes without all form, having every one of them a little glittering spark of fire in the midst of them. The first seven are red as blood. The second seven are not so red. The third seven are like whitish smoke. These three sevens had the sparks greater than the rest. The fourth, fifth, and sixth seven are of diverse colors. All had a fiery spark in their middle. Every spark had a letter in it as followeth:

BBARNFL
BB AIGAO
BBALPAE
BBANIFG
BBOSNIA
BBASNOD

THE SEAL OF AN

KING BNASPOL

King BNASPOL appeared in a red robe, and a crown on his head. His prince followed him and after him his ministers.

PRINCE BLISDON

Prince Blisdon appeared in a robe of many colours and on his head a circlet of gold.* This is his character or seal:

THE 42 MINISTERS

§ The 42 seemed to stand about in a little hill round. The hill was of clay. Behind this company seemed to stand an innumerable multitude of ugly people, afar off. Those which stood afar off are spirits of perdition, which keep the earth with her treasures for him, &c. These which seem to stand about the little hill seemed to have in the palms of their hands, letters in order, as here followeth:

ELGNSEB
NLINZVB
SFAMLLB
OOGOSRS
NRPCRRB
e r g d b a b

* Dee: Perhaps the red colour was most, and so seemed generally to be red as the other their robes were.

THE SEAL OF HAGONEL

KING BNAPSEN

King BNAPSEN appeared as a king with a crown on his head.

PRINCE BRORGES

Prince Brorges appeared in his red apparel; and he opened his clothes and there did four mighty and most terrible and ghastly flames of fire out of his sides; which no mortal eye could abide to look upon any long while. And in marvelous raging fire the word 'BRORGES' did appear tossed to and fro of the mighty flames. His seal or character is this:

THE 42 MINISTERS

The 42 appeared holding a round table. They toss it in fiery flames. In the table were the letters of their names as followeth:

B	A	N	S	S	Z	E
B	Y	A	P	A	R	E
B	N	A	M	G	E	N
B	N	V	A	G	E	S
B	L	B	O	P	O	O
B	A	B	E	P	E	N

THE SEAL OF EL

KING BALIGON

King BALIGON is the same mighty king who is here first described by the name of CARMARA, and yet otherwise among the Angels called MARMARA. But the 'M' is not to be expressed. Therefore he appeared in a long purple gown and on his head a triple crown of gold, with a measuring rod of gold in his hand, divided into three equal parts; in the form of a well proportioned man.

PRINCE BAGANOL

He appeared not by that name yet.†

THE 42 MINISTERS

Note that the king himself is governor over these. The 42 ministers appeared like bright people. And besides them all the air swarmed with creatures. Their letters were on their foreheads. They stood in a circle. They took their letter from their foreheads and set them in a circle.

A	O	A	Y	N	N	A
L	B	B	N	A	A	V
I	O	A	E	S	P	M
G	G	L	P	P	S	A
O	E	E	O	O	E	Z
N	L	L	R	L	N	A

† Probably Prince Hagonel under a pseudonym similar to Baligon (a.k.a. Carmara).

THE SEAL OF ILESESE

KING BLUMAZA

¶ He appeared not yet by that name.

PRINCE BRALGES

¶ Prince Bralges appeared in a red robe with a circlet on his head. And he was the last of the seven which hold the Heptagonon, all the rest being set down; who seemed now to extend their hands towards another, as though they played, being now rid of their work. This is the seal of his government:

THE 42 MINISTERS

¶ The powers under his subjection are invisible. They appeared like little white smokes without any form. All the world seemed to be in brightness.

CHAPTER V

THE ORATION TO GOD
TO BE SPOKEN EVERY DAY,
THREE TIMES SUCCESSIVELY

ALMIGHTY, ÆTERNAL, THE TRUE AND LIVING GOD:
O King of Glory, O Lord of Hosts, O Thou, the
Creator of Heaven and Earth, and of all things vis-
ible and invisible: Now, (even now, at length,) among other Thy manifold mercies used, and to be used toward me, Thy simple servant, JOHN DEE, I most humbly beseech Thee, in this my present petition to have mercy upon me, to have pity upon me, to have compassion upon me. I, faithfully and sincerely, of long time, have sought among men, in Earth, and also by prayer (full oft and pitifully) have made suit unto Thy Divine Majesty for the obtaining of some convenient portion of True Knowledge and Understanding of Thy laws and ordinances, established in the natures and properties of Thy Creatures: By which Knowledge, Thy Divine Wisdom, Power and Goodness, (on Thy Creatures bestowed and to them imparted), being to me made and allure me, (for the same) incessantly to pronounce Thy praises, to render unto Thee, most hearty thanks, to advance Thy true honour, and to win unto Thy Name, some of Thy due Majestic Glory, among all people, and forever. And, whereas, it hath pleased Thee (O God) of Thy infinite Goodness, by Thy faithful and holy Spiritual Messengers, to deliver unto me, long since (through the eye and ear of E. K.) an orderly form, and manner of exercise Heptarchical: How, (to Thy Honour and Glory, and the Comfort of my own poor soul, and of others, Thy faithful servants,) I may, at all times, use very many of Thy

good Angels, their counsels and helps; according to the properties of such their functions, and offices, as to them, by Thy Divine Power, Wisdom and Goodness, is assigned, and limited: (Which orderly form, and manner of exercise, until even now, I never found opportunity and extreme necessity, to apply myself unto,) Therefore, I thy poor, and simple servant, do most humbly, heartily, and faithfully beseech Thy Divine Majesty, most lovingly and fatherly to favour: and by Thy Divine Beck to further this my present industry and endeavour to exercise myself, according to the foresaid orderly forme and manner: And, now, (at length, but not too late) for Thy dearly beloved Son IESUS CHRIST His sake, (O Heavenly Father) to grant also unto me, this blessing and portion of Thy heavenly Graces: That Thou wilt forthwith, enable me, make me apt and acceptable, (in body, soul, and spirit) to enjoy always the holy and friendly conversation, with the sensible, plain, full, and perfect help, in word and deed, of Thy Mighty, Wise, and Good Spiritual Messengers and Ministers generally: and, namely, of Blessed Michael, Blessed Gabriel, Blessed Raphael, and Blessed Uriel; and also especially, of all those, which do appertain unto the Heptarchical Mystery, theurgically, (as yet) and very briefly unto me declared: under the method of Seven Mighty Kings, and their Seven Faithful and Princely Ministers, with their subjects and servants, to them belonging. And in this Thy great Mercy and Grace, on me bestowed, and to me confirmed, (O Almighty God,) Thou shalt, (to the great comfort of Thy faithful servants,) approve, to Thy very enemies, and mine, the truth and certainty of Thy manifold, most merciful promises, heretofore, made unto me: And that Thou art the True and Almighty God, Creator of Heaven and Earth, (upon whom I do call and in whom I put all my trust,) and Thy Ministers, to be the true, and faithful Angels of light: which have, hitherto, principally, and according to Thy

Divine providence dealt with us: And, also, I, thy poor and simple servant, shall then, In and By Thee, be better able to serve Thee, according to Thy well pleasing: to Thy Honour and Glory: Yea, even in these most miserable, and lamentable days. Grant, Oh grant, O our Heavenly Father, grant this, (I pray Thee,) for Thy only begotten Son IESUS CHRIST, His sake: Amen, Amen, Amen.

THE TABLE OF THE 49 GOOD ANGELS

CHAPTER VI

THE DEVOUT AND PIOUS INVITATIONS
TO THE GOOD HEPTARCHICAL ANGELS

§1: The General & Common Exordium & Conclusion Appertaining to the Seven Heptarchical Kings Inviting.

PUISSANT AND NOBLE KING, N*, AND BY WHAT Name elssover thou are called, or mayest trucly and duely be called: To Whose peculiar Government, Charge, Disposition, and Kingly Office doth appertain the...†

... Therefore, In the Name of the King of Kings, the Lord of Hosts, the Almighty GOD, Creator of Heaven and Earth and of all things visible and invisible: O right Noble King, N‡, Come now, and appear, with thy Prince and his ministers and subjects, to my perfect, and sensible eye's judgement: in a goodly and friendly manner, to my comfort and help, for the advancing of the Honour and Glory of our Almighty GOD, by my service: as much as by Thy Wisdom and Power, in thy proper Kingly Office, and Government, I may be helped and enabled unto: Amen. COME, O right Noble King, N‡, I say COME. Amen.

§2: Glory be to the Father, to the Sonne, and to the Holy Ghost, as it was in the beginning, is now and ever shall be, world without end, Amen.

* Insert the name of the King of the day here.

† Insert the office of the King, as given in Chapter Seven.

‡ Insert the name of the King here.

§ Insert the name of the King.

§2: *The General & Common Exordium & Conclusion appertaining to the Seven Heptarchical Princes Inviting.*

§§O NOBLE PRINCE, N**, AND BY WHAT NAME ELSSOEVER THOU art called, or mayest truly, and duely be called. To whose peculiar Government, Charge, Disposition, Office, and Princely Dignity doth appertain the . . . ††

. . . Therefore, In the Name of Almighty God, the King of Kings, And for His Honour, and Glory, to be advanced by my faithful service, I require thee, O Noble Prince, N††, to COME presently, and to show thyself, to my perfect and sensible eye's judgement, with thy Ministers, servants and subjects; to my comfort, and help, in Wisdom, and Power, according to the property of thy noble office: COME, O Noble Prince, N**, I say COME, Amen.

§§Our Father who art in heaven, hallowed be Thy Name. Thy kingdom come. Thy will be done on Earth, as it is in Heaven. Give us this day our daily bread. And forgive us our trespasses, as we forgive those who trespass against us. And lead us not into temptation, but deliver us from evil: For Thine is the kingdom, and the power, and the glory, for ever and ever, Amen.

** Insert the name of the Prince here.

†† Insert the office of the Prince as given in Chapter Seven.

†† Insert the name of the Prince here.

§§ Insert the name of the Prince here.

CHAPTER VII

SOME RECITAL & CONTESTATION OF THE PECULIAR OFFICES, WORDS, & DEEDS OF THE SEVEN HEPTARCHICAL KINGS & PRINCES

(in their peculiar days to be used).

SONDAYE

THE OFFICES OF KING BOBOGEL

* . . . the distributing, giving, and bestowing of wisdom and science. The teaching of true philosophy, true understanding of all learning, grounded on wisdom, with the excellencies in Nature. And of many other great mysteries, marvelously available and necessary to the advancing of the glory of our God and Creator. And who said to me in respect of these mysteries attaining: "Dee, Dee, Dee, at length but not too late" . . .

THE OFFICES OF PRINCE BORNOGO

. . . the altering of the corruption of Nature in perfection; the knowledge of metals; and generally the princely ministering to the right noble and mighty King Bobogel in his government and distributing, giving, and bestowing of Wisdom, Science, and True Philosophy, and true understanding of all learning, grounded upon wisdom; and of other very many his peculiar royal properties. And who said unto me: *What thou desirest in me shall be fulfilled...*

MONDAYE

THE OFFICES OF KING CARMARA

. . . who, in this Heptarchical Doctrine, at Blessed Uriel, his hand, didst receive the golden rod of government and measuring, and the chair of dignity and doctrine, And didst appear first to us, adorned with a triple diadem, in a long purple robe. Who saidst

* I have used the elipsis (. . . .) to indicate the beginning and end to the passage. The passages are inserted into the general exordiums given in Chapter Six.

to me at Mortlake: *I minister the strength of God unto thee. Likewise who saidst: these mysteries hath God, lastly, and of his great mercies, granted unto thee. Thou shalt be glutted, yea filled, yea thou shalt swell and be puffed up, with perfect knowledge of God's mysteries in his mercies. And who saidst: This Art is to be the further understanding of all sciences that are past, present, and yet to come. And immediately thou didst say unto me: Kings there are in Nature, with Nature, and above Nature. Thou art dignified. And who saidst, concerning the use of the tables: This is but the first step. Neither shalt thou practice them in vain. And, saidst thou generally of God's mercies and graces on me decreed and bestowed:—Whatsoever thou shalt speak, do, or work shall be profitable and acceptable and in the end shall be good. . .*

THE OFFICES OF PRINCE HAGONEL

... To whose commandment the Sons of Light and their Sons are subject and are thy servants. To whose power the operation of the earth is subject. Who are the first of the twelve and whose seal is called 'Barces'. At whose commandment are the Kings, Noblemen, and Princes of Nature, who are Primus and Quartus Hagonel. Who by the seven of the seven (which are the sons of Æternity) dost work marvels amongst the people of the earth. And who hast said unto me that I also, by the same, thy servants should work marvels. Oh Noble Hagonel, who art minister to the triple crowned King CARMARA, and, notwithstanding art Prince of these 42 Angels, whose names and characters are here presented.

THE OFFICES OF KING BLUMAZA§

THE OFFICES OF PRINCE BRALGES

... who saidst the creatures living in thy dominion are subject to thine own power. Whose subject are invisible and which (to my Seer) appeared like little smokes, without any form, and

§ A blank space is given in the manuscript apparently for some future insertion. Evidently BLUMAZA and BRALGES are alternate Entities for Monday.

whose seal of government is:

§ Who saidst: Behold, I am come. I will teach the names without numbers, the creatures subject unto me shall be known unto you. . .

TUESDAYE

THE OFFICES OF KING BARALEL

... who art King in waters, mighty and wonderful in waters; whose power is in the bowels of the waters; whose royal person with the noble Prince Befafes and his 42 ministers, the triple-crowned King CARMARA hath me use to the glory, praise, and honour of him which created you all to the laud and praise of his Majesty . . .

THE OFFICES OF PRINCE BEFAFES

... who are Prince of the seas; thy power is upon the waters; thou drowndest Pharaoh and hast destroyed the wicked; thy name was known to Moses; thou livedst in Israel; who hast measured the waters; who wast with King Solomon; and also long after that with Scotus* but not known to him by thy true name, for he called thee Mares. And since thou wast with none; except when thou preservest me through the mercy of God from the power of the wicked; and wast with me in extremity. Thou wast with me thoroughly. Who, of the Ægyptians has been called OBELISON, in respect of thy pleasant deliverance. And by that name to be known and of me noted in record to be the noble and courteous OBELISON; whose noble ministers 42 are of very great power, dignity, and authority. As some in the measuring of the motions of the waters and saltiness of the seas; in giving good success in battles; reducing ships and all manner of vessels that float upon the seas. To some, all the fishes and monsters of the seas, yea, all that live therein are well known; and, generally, are the distributors of God's judgements upon the

* Possibly Duns Scotus, the scholastic philosopher.

waters that cover the earth. Others do beautify Nature in her composition. The rest are distributors and deliverers of treasures and unknown substances of the seas. Thou, Oh noble Prince BEAFES, hadst me use the name of God...

WEDDENS DAYE

THE OFFICES OF KING BNASPOL

... to whom the earth with her bowels and secrets whatsoever are delivered and hast said to me heretofore what thou art, there I may know. Thou art great, but (as thou truly didst confess) He in whom thou art, is greater than thou...

THE OFFICES OF PRINCE BLISDON

... unto whom the keys of the mysteries of the earth are delivered. Whose 42 ministers are Angels that govern under thee. All which thy mighty King BNASPOL bade me use and affirmed that they are and shall be at my commandment...

THURSDAYE

THE OFFICES OF KING BYNEPOR

... upon the distribution of participation of whose exalted most especial and glorified power resteth only and dependeth, the general state of condition of all things. Whose sanctification, glory, and renown, although it had beginning, yet can it not either have ending. He that measureth said and thou wast the End of his workmanship. Thou art like him and of him; yet not as partaking or adherent, but distinct in one degree. When he came thou was magnified by his coming; and are sanctified, world without end.

The highest life,

The best life,

The least life is measured in your hands.

Notwithstanding, thou art not of thyself; neither is thy power thine own. Magnified be His Name. Thou art in all; and all hast some being by thee; yet thy power is nothing in respect of His power which hath sent thee. Thou beginnest new worlds, new people, new kings, and new knowledge of a new government; and hast said to me: *thou shalt work marvelously, marvelously by my workmanship in the Highest...*

THE OFFICES OF PRINCE BUTMONO

... who are life and breath in living creatures. All things live by thee, the image of One excepted. All the kinds of beasts of the earth dost thou endue with life. Thy seal is their glory. Of God, thou art sanctified; and thou rejoicest the living, the end and beginning of all beasts thou knowest; and by sufferance, thou disposest them...

FRYDAYE

THE OFFICES OF KING BALIGON

... who canst distribute and bestow at pleasure all and whatsoever can be wrought in ærial actions; who hast the government of thyself perfect as a mystery known unto thyself. Who didst advertise me of this stone and holy receptical; both needful to be had; and also didst direct me to the taking of it; being presently and in a few minutes of time brought to my sight (from the secret of the depths, where it was hid, in the uttermost part of the Roman possession); which stone, thou warnest me that no mortal hand but mine own should touch and saidst unto me: *Thou shalt prevail with it, with Kings, and with all the creatures of the world, whose beauty in virtue shall be more worth than the kingdoms of the earth.* For the which purposes here rehearsed and other; partly now to be exercised and enjoyed; and partly hereafter

more abundantly (as the Lord God of Hosts shall dispose); and also because thou thyself art governor of the 42, thy mighty, faithful and obedient ministers† . . .

THE OFFICES OF PRINCE BAGENOL§

SATERDAYE

THE OFFICES OF KING BNAPSEN

. . . who saidst unto me that by thee I shall cast out the power of all wicked spirits; and that by thee I shall or may know the doings and practises of evil men; and more than may be spoken or uttered to man . . .

THE OFFICES OF PRINCE BRORGES

. . . who, being the Prince, chief minister and governor under the right puissant King BNAPSEN didst (to my Seer) appear in a most terrible manner, with fiery flaming streams and saidst: *I am the Gate of Death. And through the Glory of God I smite the houses of the impious . . .*

† Dee gives two rather lengthy notes, one in English, the other in Latin. The English note merely repeats instruction as to the mounting of the stone on the Sigil of Æmeth, and states, once more, that 'wherein thou shalt at all times behold (privately to thyself) the state of God's people through the whole earth.'

The Latin note translates as follows:—See also the sayings of Ephodius where, concerning Adamanta, in which diverse signs are given for responding to God. See Epiphanius concerning precious stones and their meaning. See his writings concerning the Unim and Thumminim. See the book received at Trebonæ. It is written in the books of Epiphanius that the vision that appeared to Moses on the mountain, the laws that were given were expressed in sapphires.

§ None are given.

BOOK THREE

THE FORTY-EIGHT
ANGELIC KEYS

*Received at Diverse Times from April 13th to July 13th
At Cracow, Poland*

*out of the pure mercy of our God to whom alone
we offer all praise, honour, and glory, Amen.*

THE FIRST KEY

I.1	OL	Ol	I
I.2	SONF	sonf	raygne
I.3	VORSG	vorsg,	over you
I.4	GOHO	gohô	sayeth
I.5	IAD	Iad	the God
I.6	BALT	balt	of Justice
I.7	LANSH	lansh	in powre exalted
I.8	CALZ	calz	above the firmaments
I.9	VONPHO	vonpho,	of wrath:
I.10	SOBRA	sobra	in Whose
I.11	ZOL	z-ol	hands
I.12	ROR	ror	the Sonne
I.13	I	i	is
I.14	TA	ta	as
I.15	NAZPSAD	nazpsad	a sword,
I.16	OD		and*
I.17	GRAA	Graa	the Moon
I.18	TA	ta	as
I.19	MALPRG	Malprg	a through-thrusting fire
I.20	DS	ds	which
I.21	HOLQ	hol-q	measurcth

* I.16: OD for 'and' missing in Sloane MS. 3191.

1.22 QAA	<i>Qa-a</i>	your garments
1.23 NOTHOA	<i>nothôa</i>	in the mydst
1.24 ZIMZ	<i>zimz</i>	of my vestures,
1.25 OD	<i>Od</i>	and
1.26 COMMAH	<i>commah</i>	trussed you together
1.27 TA	<i>ta</i>	as
1.28 NOBLOH	<i>nobloh</i>	the palms
1.29 ZIEN	<i>zien:</i>	of my hands:
1.30 SOBA	<i>Soba</i>	Whose
1.31 THIL	<i>thil</i>	seats
1.32 GNONP	<i>gnonp</i>	I garnished
1.33 PRGE	<i>prge</i>	with the fire
1.34 ALDI	<i>aldi</i>	of gathering
1.35 DS	<i>Ds</i>	and*
1.36 URBS	<i>urbs</i>	beautified
1.37 OBOLEH	<i>ôbôleh</i>	your garments†
1.38 GRSAM	<i>grsam:</i>	with admiration,
1.39 CASARM	<i>Casarm</i>	to whom
1.40 OHORELA	<i>ohorêla</i>	I made a law
1.41 CABA	<i>cabá</i>	to govern
1.42 PIR	<i>pir</i>	the holy ones,
1.43 DS	<i>Ds</i>	and
1.44 ZONRENSG	<i>zonrensg</i>	delivered you
1.45 CAB	<i>cab</i>	a rod
1.46 ERM	<i>erm</i>	with‡
1.47 IADNAH	<i>Jadnah:</i>	the ark of knowledge.
1.48 PILAH	<i>Pilah</i>	Moreover
1.49 FARZM	<i>farzm</i>	you lifted up your voyces
1.50 OD		and
1.51 ZNRZA	<i>znrza</i>	sware
1.52 ADNA	<i>adna</i>	obedience*

* 1.35 & 1.43: Either Enochian should be OD or English should be 'which'

† The circumflex in Dee's Enochian is actually a brevis in Sl. MS. 3191 and should be pronounced as a short vowel.

‡ 1.46: This is the only time in the keys that ERM is glossed as 'with'; this is a probable copying error. ERM is perhaps 'with the ark', with IADNAH as 'knowledge'; see 30.180: IADNAMAD for 'undefiled knowledge'.

* 1.52 to 1.59: Lacuna in Sl. MS. 3191; Dee's English entered as marginalia. The root column gives a probable reconstruction of the Enochian text.

1.53 OD		and
1.54 GONO	<i>gono</i>	faith
1.55 IADPIL	<i>Iădpil</i>	to him
1.56 DS	<i>Ds</i>	that
1.57 HOM	<i>hom</i>	liveth
1.58 OD		and
1.59 TOH	<i>tôh</i>	triumpheth,
1.60 SOBA	<i>Soba</i>	whose
1.61 IAOD		beginning
1.62 IPAM	<i>Ipam</i>	is not
1.63 OD		nor
1.64 UL	<i>Lu</i>	ende*
1.65 IPAMIS	<i>Ipâmis</i>	can not be,
1.66 DS	<i>Ds</i>	which
1.67 LOHOLO	<i>lôhôlo</i>	shyneth
1.68 VEP	<i>vep</i>	as a flame
1.69 ZOMD	<i>zomd</i>	in the myddst
1.70 POAMAL	<i>Poamal</i>	of your pallace
1.71 OD	<i>od</i>	and
1.72 SONF	<i>bogpa</i>	rayngneth
1.73 AAI	<i>aâl</i>	amongst you
1.74 TA	<i>ta</i>	as
1.75 PIAP	<i>piap</i>	the ballance
1.76 BALTOH	<i>pîamos</i>	of righteousness,
1.77 OD	<i>od</i>	and
1.78 VAOAN	<i>vaoan</i>	truth:
1.79 ZACAR	<i>ZACARe</i>	Move
1.80 CA	<i>c-a</i>	therfore,
1.81 OD	<i>od</i>	and
1.82 ZAMRAN	<i>ZAMRAN</i>	shew yourselves:
1.83 ODO	<i>odo</i>	open
1.84 CICLE	<i>cicle</i>	the Mysteries
1.85 QAA	<i>Qaa</i>	of your Creation:

* 1.64: Dee made a copying error here. Royal Appendix clearly shows UL rather than LU. This is a curious error, because the 'l' prefix in Enochian means 'first', more or less an opposite to the 'end' that is intended. (See 5.46: ULs for 'end'.)

EE

1.86 ZORGE	<i>zorge,</i>	Be friendly unto me:
1.87 LAP	<i>lap</i>	for
1.88 ZIRDO	<i>zirdo</i>	I am*
1.89 NOCO	<i>noco</i>	the servant
1.90 MAD	<i>MAD</i>	of the same your God:
1.91 HOATH	<i>Hoath</i>	the true Worshipper
1.92 IAIDA	<i>Jaida.</i>	of the Highest.

THE SECOND KEY

2.1 ADGT	<i>Adgt</i>	Can
2.2 UPAAH	<i>v-pa-âh</i>	the wings
2.3 ZONG	<i>zongom</i>	of the windes†
2.4 OM		
2.5 FAAIP	<i>fa-d-ip</i>	understand
2.6 SALD	<i>sald</i>	your voyces of wonder
2.7 VIV	<i>vi-iv</i>	O you the second‡
2.8 L	<i>L</i>	of the first,
2.9 SOBAM	<i>sobam</i>	Whome
2.10 IALPRG	<i>lâl-prg</i>	the burning flames
2.11 IZAZAZ	<i>I-zâ-zaz</i>	have framed
2.12 PIADPH	<i>pi-âdph</i>	within the depths of my Jaws,
2.13 CASARMA	<i>Cas-arma</i>	whome
2.14 ABRAMG	<i>abramg</i>	I have prepared
2.15 TA	<i>ta</i>	as
2.16 TALHO	<i>talho</i>	Cupps
2.17 PARACLEDA	<i>parâclêda</i>	for a wedding
2.18 Q	<i>Q-ta</i>	or
2.19 TA		as
2.20 LORSLQ	<i>lors-l-q</i>	the flowres

* 1.88: Possible copying error. ZIR appears as 'I am' in 2.53, 3.4 & 4.46, while ZIRDO appears as 'I am' only in this passage in Royal Appendix. If so the ZIRDO error was repeated in most of the later calls. Note that DONOCO would be linguistically similar to CNOQUO in 21.35, 17.34, & 18.38. The correct passage may be ZIR DONOCO or ZIR CNOQUO rather than ZIRDO NOCO.

† 2.3 to 2.6: A little confusion here in Dee's matching. OM should be 'understand' (see 7.53, 10.54, 16.19, & 30.113). Thus ZONG is 'of the winds', FAAIP is 'your voices', and SALD is 'of wonder'.

‡ 2.7: Is Dee's double 'i' in vi-iv an error or a variation? See 4.13, 5.33, 6.34, & 16.2 for VIV as 'second'.

2.21 TURBS	<i>turbs</i>	in their beawty
2.22 OOGH	<i>ooge</i>	for the Chamber
2.23 BALTOH	<i>Baltoh</i>	of righteousnes
2.24 GIUI	<i>Giui</i>	Stronger
2.25 CHIS	<i>chis</i>	are
2.26 LUSD	<i>Lusd</i>	your fete
2.27 ORRI	<i>orri</i>	then the barren stone:
2.28 OD	<i>Od</i>	And
2.29 MICALP	<i>micalp</i>	myghtier
2.30 CHIS	<i>chis</i>	are
2.31 BIA	<i>bia</i>	your voices
2.32 OZONGON	<i>ôzôngon</i>	then the manifold windes.
2.33 LAP	<i>Lap</i>	For
2.34 NOAN	<i>nodn</i>	you are become
2.35 TROF	<i>trof</i>	a buylding
2.36 CORS	<i>cors</i>	such
2.37 TA	<i>ta</i>	as
2.38 GE	<i>ge,</i>	is not
2.39 OQ	<i>o-q</i>	but
2.40 MANIN	<i>manin</i>	in the mynde
2.41 IAIDON	<i>Ja-i-don:</i>	of the all powerfull.
2.42 TORZU	<i>Torzu</i>	Arriſe
2.43 GOHEL	<i>gôhel</i>	sayeth the First
2.44 ZACAR	<i>ZACAR</i>	Move
2.45 CA	<i>ca</i>	therefore
2.46 CNOQOD	<i>c-nô-qod,</i>	unto his Servants:
2.47 ZAMRAN	<i>ZAMRAN</i>	Shew yourselves
2.48 MICALZO	<i>micalzo</i>	in powre:
2.49 OD	<i>od</i>	And
2.50 OZAZM	<i>ozazm</i>	make me
2.51 VRELP	<i>vrelp</i>	a strong Seething:*
2.52 LAP	<i>Lap</i>	for
2.53 ZIR	<i>zir</i>	I am
2.54 IOIAD	<i>Ioiað.</i>	of him that liveth forever.

* 2.51: The English 'Seething' is often modernized into 'Seer' or 'Seer of Things'. More likely 'Seething' is a gerund of 'to seeth'; See the Oxford English Dictionary entry on 'Seething'.

THE THIRD KEY

3.1	MICMA	<i>Micma</i>	Behold
3.2	GOHO	<i>gohó</i>	sayeth
3.3	IAD	<i>Piad</i>	your God,
3.4	ZIR	<i>zir</i>	I am
3.5	COMSELH	<i>cómselh</i>	a Circle
3.6	AZIEN	<i>azien</i>	on Whose hands
3.7	BIAB	<i>biab</i>	stand
3.8	OS	<i>Os</i>	12
3.9	LONDOH	<i>Lón-doh</i>	Kingdoms.
3.10	NORZ	<i>Norz</i>	Six
3.11	CHIS	<i>chis</i>	are
3.12	OTHIL	<i>óthil</i>	the seats
3.13	GIGIPAH	<i>Gigipah</i>	of living breath,
3.14	UNDL	<i>und-l</i>	the rest
3.15	CHIS	<i>chis</i>	are
3.16	TA	<i>tá</i>	as
3.17	PUIM	<i>pú-im</i>	sharp sickles:
3.18	Q	<i>Q</i>	or
3.19	MOSPLEH	<i>mos-pleh</i>	the horns
3.20	TELOCH	<i>teloch</i>	of death
3.21	QUIN	<i>Qui-i-n</i>	wherein
3.22	TOLTORG	<i>toltorg</i>	the Creatures of the earth
3.23	CHIS	<i>chis</i>	are,
3.24	ICHISGE	<i>i-chis-ge</i>	to are not*,
3.25	M	<i>m</i>	Except
3.26	OZIEN	<i>ozien</i>	myne own hand,
3.27	DS	<i>dst</i>	which§
3.28	BRGDA	<i>brgda</i>	slepe
3.29	OD	<i>od</i>	and
3.30	TORZUL	<i>torzul</i>	shall ryse.
3.31	ILI	<i>i-li</i>	In the first

* 3.24: The English is a bit confsed here. ICHISGE probably means-
'I am not'.

§ 3.27: 'T' in 'dst' probably accidental, although 'dst' as 'which' appears
at 4.28. Ds is glossed as 'which' everywhere else.

3.32	EOL	<i>E-ól</i>	I made you
3.33	BALZARG	<i>balzarg</i>	stuards
3.34	OD	<i>od</i>	and
3.35	AALA	<i>áála</i>	placed you
3.36	THILN	<i>Thiln</i>	in seats
3.37	OS	<i>os</i>	12
3.38	NETAAB	<i>ne-tá-ab,</i>	of government,
3.39	DLUGA	<i>dluga</i>	giving
3.40	VOMZARG	<i>vomsarg</i>	unto every one of you
3.41	LONSA	<i>Lonsa</i>	powre
3.42	CAPIMALI	<i>Cap-mi-áli</i>	successively*
3.43	VORS	<i>vors</i>	over
3.44	CLA	<i>cla</i>	456,
3.45	HOMIL	<i>homil</i>	the true ages
3.46	COCASB	<i>cocasb</i>	of tyme,
3.47	FAFEN	<i>fafen</i>	to the intent that,
3.48	IZIZOP	<i>izizop</i>	from your highest vessells
3.49	OD	<i>od</i>	and
3.50	MIINOAG	<i>miinóag</i>	the Corners
3.51	DE	<i>de</i>	of
3.52	GNETAAB	<i>gne-táab</i>	your governments,
3.53	VAUN	<i>vauu</i>	you might work
3.54	NANÆEL	<i>na-ná-é-el</i>	my powre:
3.55	PANPIR	<i>panpir</i>	powring downe
3.56	MALPIRGI	<i>Malpirgi</i>	the fires of life and encrease,
3.57	PILD	<i>caósg</i>	continually
3.58	CAOSG	<i>Pild</i>	on the earth
3.59	NOAN	<i>noan</i>	Thus you are become
3.60	UNALAH	<i>vnalah</i>	the skirts
3.61	BALT	<i>balt</i>	of Justice
3.62	OD	<i>od</i>	and
3.63	VOOAN	<i>voodn</i>	Truth.
3.64	DOOIAP	<i>do-ó-i-ap</i>	In the name
3.65	MAD	<i>MAD</i>	of the same. your God
3.66	GOHOLOR	<i>Gohólor</i>	Lift up,

* 3.42: CAPIMALI rather than CAPMIALI; see 30.122. Also see 4.30 for
root CAPIM-.

3.67	GOHUS	<i>gohús</i>	I say,
3.68	AMIRAN	<i>amiran</i>	yourselves.
3.69	MICMA	<i>Micma</i> ,	Behold
3.70	IEHUSOZ	<i>Iehúsoz</i>	his mercies
3.71	CACACOM	<i>ca-cá-com</i>	florish
3.72	OD	<i>od</i>	and
3.73	DOOAIN	<i>do-o-â-in</i>	Name
3.74	NOAR	<i>noar</i>	is become
3.75	MICAOLZ	<i>mi-cá-olz</i>	mighty
3.76	AAIOM	<i>a-âi-om</i>	amongst us
3.77	CASARMG	<i>Casármg</i>	In whom
3.78	GOHIA	<i>gohia</i>	we say
3.79	ZACAR	<i>ZACAR</i>	Move*,
3.80	UNIGLAG	<i>vniglag</i>	Descend
3.81	OD	<i>od</i>	and
3.82	IMUAMAR	<i>Im-uâ-mar</i>	apply yourselves unto us
3.83	PUGO	<i>pugo</i>	as unto
3.84	PLAPLI	<i>plapli</i>	partakers
3.85	ANANÆL	<i>anānæl</i>	of the secret wisdom
3.86	QAAN	<i>Qāan</i> .	of your Creation.

THE FOURTH KEY

4.1	OTHIL	<i>Othil</i>	I have set
4.2	LASDI	<i>lasdi</i>	my fete
4.3	BABAGE	<i>babāge</i>	in the Sowth
4.4	OD	<i>od</i>	and
4.5	DORPHA	<i>dorpha</i>	have loket abowt me
4.6	GOHOL	<i>Gohól</i>	sayng,
4.7	GCHISGE	<i>G-chisge</i>	are not
4.8	AVAVAGO	<i>avávago</i>	the Thunders of encrease
4.9	CORMP	<i>Cormp</i>	numbred
4.10	PD	<i>pd</i>	33,
4.11	DS	<i>dsonf</i>	which
4.12	SONF		rayne
4.13	VIV	<i>viv-di-v</i>	in the second
4.14	DIU		Angle,

* 3.79: Alternate pronunciation given as *zod-a-car*.

4.15	CASARMI	<i>Casármí</i>	under whom
4.16	OALI	<i>Oali</i>	I have placed
4.17	MAPM	<i>Mapm</i>	9639
4.18	SOBAM	<i>Sobam</i>	Whome
4.19	AG	<i>ag</i>	None
4.20	CORMPO	<i>cormpó</i>	hath yet numbred,
4.21	CRIP	<i>c-rp-l</i>	but*
4.22	L		one,
4.23	CASARMG	<i>Casármg</i>	in whome
4.24	CROODZI	<i>croódzi</i>	the second beginning of things
4.25	CHIS	<i>chis</i>	are
4.26	OD	<i>od</i>	and
4.27	UGEK	<i>vgeg</i>	wax strong
4.28	DS	<i>dst</i>	which
4.29	T		allso
4.30	CAPIMAJI	<i>capimáli</i>	successively
4.31	CHIS	<i>chis</i>	are
4.32	CAPIMAON	<i>Capimaon</i>	the number of time:
4.33	OD	<i>od</i>	and
4.34	LONSHIN	<i>lonshin</i>	their powres
4.35	CHIS	<i>chis</i>	are
4.36	TA	<i>ta</i>	as
4.37	LO	<i>Lo</i>	the first
4.38	CLA	<i>Cla</i>	456:
4.39	TORZU	<i>Torgú</i>	Arrise,
4.40	NOR	<i>Nor</i>	you sonns
4.41	QUASAH	<i>quasáhi</i>	of pleasure,
4.42	OD	<i>od</i>	and
4.43	F	<i>F</i>	viset
4.44	CAOSGA	<i>caósge</i>	the earth:
4.45	BAGLE	<i>Bagle</i>	for
4.46	ZIR	<i>Zirendiad</i>	I am†
4.47	ENAY		the Lord
4.48	IAD		your God,

* 4.21: CRIP for 'but'; see 10.84.

† 4.46 to 4.48: *Zirendiad* may be a contraction: ZIR-ENAY-IAD or 'I am' -'Lord'-'God'.

4.49 DS	Dsi	which
4.50 I		is,
4.51 OD	od	and
4.52 APILA	Apila	liveth.
4.53 DOOAIP	Do-ô-â-io	In the name
4.54 QAAL	Q-â-al	of the Creator
4.55 ZACAR	ZACAR	Move,
4.56 OD	od	and
4.57 ZAMRAN	ZAMRAN	shew yourselves
4.58 OBELISONG	Obelisong	as pleasant deliverers
4.59 RESTEL	rest-el	That you may praise him
4.60 AAI	aaf	amongst*
4.61 NOR	Nor-mô-lap	the sonnes†
4.62 MOLAP		of men.

THE FIFTH KEY

5.1 SAPAH	Sapdh	The mighty sounds
5.2 ZIMII	zimii	have entered‡
5.3 D	du-i-v	into the third
5.4 DIV		angle,
5.5 OD	od	and
5.6 NOAS	noas	are become
5.7 TA	ta	as
5.8 QANIS	qa-a-nis	olives
5.9 ADROCH	adroch	in the olive mount
5.10 DORPHAL	dorphal	looking with gladnes
5.11 CAOSG	ca-ôsg	upon the earth
5.12 OD	od	and
5.13 FAONTS	faonts	dwelling
5.14 PERIPSOL	péripsol	in the brightnes of the heavens
5.15 TA	tablior	as
5.16 BLIOR		continuall comfortors,
5.17 CASARM	Casarm	unto whom
5.18 AMIPZI	amipzi	I fastened

* 4.60: Copying error by Dee. AAI for 'amongst'; see 1.73; 7.52, 7.6 &c.

† 4.61 to 4.62: MOLAP for 'of men', because NOR is 'sons'; see 4.40.

‡ 5.2 to 5.3: D for third; see 6.36, 7.33, 17.2. DIV for 'angle'; see 4.14, 6.3

5.19 NAZ	nazarth	pillers§
5.20 ARTH		of gladnes
5.21 AF	af	19
5.22 OD	od	and
5.23 DLUGAR	dlugar	gave them
5.24 ZIZOP	zizop	vessels
5.25 ZLIDA	z-lida	to water
5.26 CAOSGI	caôsgi	the earth
5.27 TOLTORGI	toltôrgi	with her creatures,
5.28 OD	od	and
5.29 ZCHIS	z-chis	they are
5.30 ESLASCH	eslasch	the brothers
5.31 L	L	of the first
5.32 OD	taviu	and*
5.33 VIV		second
5.34 OD	od	and
5.35 IAOD	iaod	the beginning
5.36 THILD	thild	of their own seats
5.37 DS	ds	which
5.38 PERAL		are garnished†
5.39 HUBAR	hubar	with continually burning lamps
5.40 PEOAL	Peôal	69636
5.41 SOBA	soba	whose
5.42 CORMFA	cormfa	numbers
5.43 CHIS	chis	are
5.44 TA	ta	as
5.45 LA	la	the first
5.46 ULS	vls	the endes
5.47 OD	od	and
5.48 QCOCASB	Q-cô-casb	the contents of tyme.
5.49 CA	Ca	Therefore
5.50 NIIS	niis	Come you
5.51 OD	od	and

§ 5.19: NAZ as 'pillars'; see 8.7 NAZ- root for 'pillars'.

* 5.32: OD for 'and'; ta probably a copying error.

† 5.38 to 5.39: Lacuna in SL MS. 3191. Dee wrote the English as marginalia. See Royal Appendix (or True Relation) on July 5, 1584, the spirit Nalvage instructs that the word PERAL be added. Dee evidently neglected to do so when compiling SL MS. 3191.

5.52	DARBS	<i>Darbs</i>	obey
5.53	QAAS	<i>Q-á-as</i>	your creation,
5.54	F	<i>Feth-ar-zi</i>	viset us*
5.55	ETHARZI		in peace
5.56	OD	<i>od</i>	and
5.57	BLIOR	<i>blióra</i>	comfort
5.58	IAIAL	<i>ia-ial</i>	Conclude us
5.59	EDNAS	<i>ed-nas</i>	as receivers
5.60	CICLES	<i>cicles</i>	of your mysteries:
5.61	BAGLE	<i>Bágle</i>	for why?
5.62	IAD	<i>Geiad</i>	Our Lord and Mr.
5.63	I	<i>i-L</i>	is
5.64	L		all one.

THE SIXTH KEY

6.1	GAH	<i>Gah</i>	The spirits
6.2	S	<i>s</i>	of ye 4th
6.3	DIU	<i>diu</i>	Angle
6.4	CHIS	<i>chis</i>	are
6.5	EM	<i>em</i>	Nine,
6.6	MICAOLZ	<i>micálzo</i>	Mighty*
6.7	PILZIN	<i>pilzin</i>	in the firmaments of waters,
6.8	SOBAM	<i>sobam</i>	Whome
6.9	EL	<i>El</i>	the first
6.10	HARG	<i>harg</i>	hath planted
6.11	MIR	<i>mir</i>	a torment
6.12	BABALON	<i>babálon</i>	to the wicked
6.13	OD	<i>od</i>	and
6.14	OBLOC	<i>obloc</i>	a garland
6.15	SAMVELG	<i>samvelg</i>	to the righteous
6.16	DLUGAR	<i>dlugar</i>	giving unto them
6.17	MALPRG	<i>marprg</i>	fyrie darts
6.18	AR	<i>arcaósgí</i>	to vanne
6.19	CAOSGI		the earth
6.20	OD	<i>od</i>	and

* 5.54: F for 'visit'; see 4.43, 6.25.

* 6.6: MICAOLZ for 'mighty'; see 3.74, 18.2, 30.6.

6.21	ACAM	<i>Acám</i>	7699
6.22	CANAL	<i>canal</i>	continual Workmen
6.23	SOBA	<i>sobólzar</i>	whose†
6.24	ELZAP		courses
6.25	F	<i>f-bliard</i>	viset
6.26	BLIARD		with comfort
6.27	CAOSG	<i>caosgi</i>	the earth
6.28	OD	<i>od</i>	and
6.29	CHIS	<i>chis</i>	are
6.30	ANETAB	<i>anétab</i>	in government
6.31	OD	<i>od</i>	and
6.32	MAIM	<i>miam</i>	continuanee
6.33	TA	<i>ta</i>	as
6.34	VIV	<i>viv</i>	the second
6.35	OD	<i>od</i>	and
6.36	D	<i>d</i>	the third
6.37	DARSAR	<i>Darsar</i>	Wherefore
6.38	SOLPETH	<i>sol-peth</i>	hearken unto
6.39	BIEN	<i>bien</i>	my voyce
6.40	BRITA	<i>Brita</i>	I have talked of you
6.41	OD	<i>od</i>	and
6.42	ZACAM	<i>zácam</i>	I move you
6.43	GMICALZO	<i>g-micálzo</i>	in power and presence,
6.44	SOBA	<i>sob-há-ath</i>	whose
6.45	HAATH		works
6.46	TRIAN	<i>trían</i>	shall be
6.47	LUIAHE	<i>Lu-id-he</i>	a song of honor
6.48	OD	<i>odecrin</i>	and
6.49	ECRIN		the praise
6.50	MAD	<i>MAD</i>	of your God
6.51	QAAON	<i>Q-a-a-on</i>	in your Creation.

THE SEVENTH KEY

7.1	RAAS	<i>Raas</i>	The East
7.2	I	<i>isálman</i>	is

† 6.23 to 6.24: SOBA for 'whose'; see 1.30, 1.60, 5.41, 7.27, &c. ELZAP for 'courses'; see 30.62.

7.3	SALMAN		a howse
7.4	PARADIZ	<i>paradiz</i>	of virgins§
7.5	ÆCRIMI	<i>œcrimi</i>	singing praises
7.6	AAI	<i>aao</i>	amongst*
7.7	IALPIRGAH	<i>ial-pîrgah</i>	the flames of the first glory,†
7.8	QUIN	<i>qui-in</i>	wherein
7.9	ENAY	<i>enay</i>	the Lord
7.10	BUTMON	<i>butmon</i>	hath opened his mouth
7.11	OD	<i>od</i>	and
7.12	INOAS	<i>inôas</i>	they are become
7.13	NI	<i>ni</i>	28
7.14	PARADIAL	<i>paradial</i>	Living dwellings
7.15	CASARMG	<i>casarmg</i>	in whom
7.16	UGEAR	<i>vgear</i>	the strength of men
7.17	CHIRLAN	<i>chirlan</i>	rejoyceth
7.18	OD	<i>od</i>	and
7.19	ZONAC	<i>zonac</i>	they are apparcled
7.20	LUCIFTIAN	<i>Luciftian</i>	with ornaments of brightnes
7.21	CORS	<i>cors</i>	such
7.22	TA	<i>ta</i>	as
7.23	VAUL	<i>vaul</i>	work
7.24	ZIRN	<i>zirn</i>	wonders
7.25	TOL	<i>tol-hâ-mi</i>	on all
7.26	HAMI		creatures
7.27	SOBA	<i>soba</i>	Whose
7.28	LONDOH	<i>londôh</i>	Kingdoms
7.29	OD	<i>od</i>	and
7.30	MIAM	<i>miam</i>	continuance
7.31	CHIS	<i>chis</i>	are
7.32	TA	<i>tad</i>	as
7.33	D		the third
7.34	OD	<i>o</i>	and
7.35	ES	<i>dés</i>	fourth
7.36	UMADEA	<i>vmâdêa</i>	strong towres
7.37	OD	<i>od</i>	and

§ 7.4: Alternate pronunciation 'paradizod'.

* 7.6: AAI for 'amongst'; see 1.73, 7.52, 12.22, 13.25, &c.

† 7.7: Contraction of IALPRG-GAH or 'burning flame'-'spirit'.

7.38	PIBLIAR	<i>piblîar</i>	places of comfort
7.39	OTHIL	<i>Othîlrit</i>	The seats*
7.40	RIT		of mercy
7.41	OD	<i>od</i>	and
7.42	MIAM	<i>miam</i>	continuance.
7.43	CNOQUOL	<i>Cnoquol</i>	O you Servants
7.44	RIT	<i>Rit</i>	of Mercy,
7.45	ZACAR	<i>ZACAR,</i>	Move,
7.46	ZAMRAN	<i>ZAMRAN</i>	Appeare,
7.47	ÆCRIMI	<i>œcrimi</i>	sing praises
7.48	QAADAH	<i>q-a-dah</i>	unto the Creator:
7.49	OD	<i>od</i>	And
7.50	OMICAOLZ	<i>omicaolz</i>	be mighty†
7.51	AAIOM	<i>aaïom</i>	amongst us
7.52	BAGLE	<i>Bagle</i>	For
7.53	PAPBOR	<i>papnor</i>	to this remembrance
7.54	IDLUGAM	<i>idlûgam</i>	is given
7.55	LONSHI	<i>lonshi</i>	powre
7.56	OD	<i>od</i>	and
7.57	UMPLIF	<i>vmplif</i>	our strength
7.58	UGEK	<i>vgêgi</i>	waxeth strong
7.59	BIGLIAD	<i>Bigliad</i>	in our Comforter.

THE EIGHTH KEY

8.1	BAZME	<i>Bazmêlo</i>	The Midday
8.2	LO		the first‡
8.3	I	<i>i</i>	is
8.4	TA	<i>ta</i>	as
8.5	PIRIPSON	<i>pirîpson</i>	the third heaven
8.6	OLN	<i>oln</i>	made
8.7	NAZ	<i>nazâvâbh</i>	of Hiacynth Pillers
8.8	AVABH		
8.9	OX	<i>ox</i>	26
8.10	CASARMG	<i>casarmg</i>	in whome

* 7.39 to 7.40: OTHIL for 'seats'; see 3.12. RIT for 'Mercy'; see 7.44.

† 7.50: Alternate pronunciation: Omicaolzod.

‡ 8.2: LO as 'first'; see 4.37.

8.11	URAN	<i>Vrán</i>	the Elders
8.12	CHIS	<i>chis</i>	are
8.13	UGEg	<i>vgeg</i>	become strong
8.14	Ds	<i>dsa-bramg</i>	which
8.15	ABRAMG		I have prepared§
8.16	BALTOHA	<i>baltōha</i>	for my own righteousness
8.17	GOHO	<i>gohó</i>	sayth
8.18	IAD	<i>i-ad</i>	the Lord
8.19	SOBA	<i>soba</i>	whose
8.20	MIAM	<i>miam</i>	long continuance*
8.21	TRIAN	<i>trian</i>	shall be
8.22	TA	<i>ta</i>	as
8.23	LOLCIS	<i>lól-cis</i>	bucklers
8.24	ABAI	<i>Abaiuónin</i>	to the stowping
8.25	VOVIN		Dragons†
8.26	OD	<i>od</i>	and
8.27	AZIAGIER	<i>aziágier</i>	like unto the harvest
8.28	RIOR	<i>rior</i>	of a wyddow.
8.29	IRGIL	<i>Irgil</i>	How many
8.30	CHIS	<i>chis</i>	are
8.31	DA	<i>da</i>	there
8.32	Ds	<i>ds</i>	which
8.33	PAAOX	<i>pá-á-ox</i>	remayn
8.34	BUSD	<i>busd</i>	in the glorie
8.35	CAOSGO	<i>caósgo</i>	of the earth
8.36	Ds	<i>ds</i>	which
8.37	CHIS	<i>chis</i>	are
8.38	OD	<i>odíptiran</i>	and
8.39	IPURAN		shall not see
8.40	TELOCH	<i>téloáh</i>	death‡
8.41	CACARG	<i>cacarg</i>	untyll

§ 8.15: ABRAMG for 'I have prepared'; see 2.14, 11.33.

* 8.20: MIAM for 'long continuance'; see 6.32, 7.30, 7.42. MIAM as '3663'; see 12.61. Dee's error makes the Enochian gibberish.

† 8.25: VOVIN is the stem for 'dragon'; see 8.46 and note to 30.133. The entire passage is idiomatic in Enochian; what is probably meant is 'The Lord will be a shield against threatening dragons [devils]'.

‡ 8.40: TELOCH for 'death'; see 3.20, 11.19 and note on 30.133.

8.42	O	<i>O</i>	this
8.43	SALMAN	<i>isáلمان</i>	howse
8.44	LONCHO	<i>loncho</i>	fall
8.45	OD	<i>od</i>	and
8.46	VOVINA	<i>Vouína</i>	the Dragon
8.47	CARBAF	<i>carbaf</i>	synck.
8.48	NIISO	<i>Niiso</i>	Come away,
8.49	BAGLE	<i>Bagle</i>	for
8.50	AVAVAGO	<i>aváuágo</i>	the Thunders
8.51	GOHON	<i>gohón</i>	have spoken:
8.52	NIISO	<i>Niiso</i>	Come away,
8.53	BAGLE	<i>bagle</i>	for
8.54	MOMAO	<i>mómáo</i>	the Crownes
8.55	SIAION	<i>siáíon</i>	of the Temple
8.56	OD	<i>od</i>	and
8.57	MABZA	<i>mábza</i>	the coat
8.58	IADOIASMOMAR		

Jad-oiás-mómar

			of him that is, was, and shall
			be crowned*
8.59	POILP	<i>poilp</i>	are divided†
8.60	NIIS	<i>Niis</i>	Come
8.61	ZAMRAN	<i>ZAMARN</i>	Appeare
8.62	CIAOFI	<i>ciaofi</i>	to the terror
8.63	CAOSGO	<i>caósgo</i>	of the earth
8.64	OD	<i>od</i>	and
8.65	BLIORS	<i>bliors</i>	to our comfort
8.66	OD	<i>od</i>	and
8.67	CORSI	<i>corsi</i>	of such
8.68	TA	<i>ta</i>	as
8.69	ABRAMIG	<i>a-brámig</i>	are prepared.

THE NINTH KEY

9.1	MICAOI	<i>Mi-cá-óli</i>	A mighty
9.2	BRANSg	<i>bransg</i>	garde

* 8.58: Contraction of IAD-I-AS-MOMAR or 'God'-is-'was'-'crowned'. See 8.54 for MOMA- root.

9.3	PURGEI	<i>prgel</i>	of fire
9.4	NAPTA	<i>napta</i>	with two-edged swords
9.5	IAPOR	<i>ialpor</i>	flaming
9.6	DS	<i>ds</i>	(which
9.7	BRIN	<i>brin</i>	have
9.8	EFAFAFE	<i>efáfáfe</i>	viols§
9.9	P	<i>p</i>	:8:
9.10	VONPHO	<i>vonpho</i>	of wrath
9.11	OLANI	<i>oláni</i>	for two tymes
9.12	OD	<i>od</i>	and
9.13	OBZA	<i>obza</i>	a half:
9.14	SOBA	<i>sobca</i>	whose*
9.15	UPAAH	<i>vpáah</i>	wings
9.16	CHIS	<i>chis</i>	are
9.17	TATAN	<i>tatan</i>	of wormwood,
9.18	OD	<i>od</i>	and
9.19	TRANAN	<i>tranant</i>	of the marrow
9.20	BALYE	<i>balye</i>	of salt,)
9.21	ALAR	<i>alar</i>	have settled
9.22	LUSDA	<i>lusda</i>	their feete
9.23	SOBOLN	<i>sobóln</i>	in the West,

10.78	MADRID	<i>madrid</i>	her iniquitie
10.79	I	<i>i</i>	is
10.80	ZIROP	<i>ziróp</i>	was
10.81	CHISO	<i>chiso</i>	and shal be
10.82	DRILPA	<i>drilpa</i>	great.
10.83	NIISO	<i>Niiso</i>	Come away
10.84	CRIP	<i>crip</i>	but
10.85	IP	<i>ip</i>	not
10.86	NIDALI	<i>niddáli</i>	your noyses.

THE ELEVENTH KEY

11.1	OXIAYAL	<i>Oxiayal</i>	The mighty seat
11.2	HOLDO	<i>holdo</i>	groaned

† 10.56: English missing in SL MS. 3191; Laycock gives MATORB as 'echoing'.

11.3	OD	<i>od</i>	and
11.4	ZIROM	<i>zirom</i>	they were
11.5	O	<i>O</i>	:5:
11.6	CORAXO	<i>coráxo</i>	thunders
11.7	DS	<i>ds</i>	which
11.8	ZILDAR	<i>zildar</i>	flew
11.9	RAASY	<i>raásy</i>	into the East
11.10	OD	<i>od</i>	and
11.11	VABZIR	<i>vabzir</i>	the Egle
11.12	CAMLIAX	<i>camliax</i>	spake
11.13	OD	<i>od</i>	and
11.14	BAHAL	<i>báhal</i>	cryed with a lowde voyce
11.15	NIISO	<i>Niiso</i>	Come away
11.16	OD		and†
11.17	ALDON		they gathered them together in
11.18	SALMAN	<i>salman</i>	the house
11.19	TELOCH	<i>telóch</i>	of death
11.20	CASARMAN	<i>Ca-sár-man</i>	of whome
11.21	HOLQ	<i>hol-q</i>	it is measured
11.22	OD	<i>od</i>	and
11.23	T	<i>ti</i>	it
11.24	I		is
11.25	TA	<i>ta</i>	as
11.26	ZCHIS	<i>z-chis</i>	they are
11.27	SOBA	<i>soba</i>	whose
11.28	CORMF	<i>cormf</i>	number
11.29	I	<i>i</i>	is
11.30	GA	<i>ga</i>	31.
11.31	NIISO	<i>Niisa</i>	Come away
11.32	BAGLE	<i>Bagle</i>	For
11.33	ABRAMG	<i>abramg</i>	I have prepared
11.34	NONCP	<i>noncp</i>	for you
11.35	ZACAR	<i>ZACARe</i>	Move†

† 11.16 to 11.17: Lacuna in SL MS. 3191. The Enochian is missing and the English is in the margin. Missing word probably has ALDO- stem; see 9.30, 17.21.

† 11.35: ZACARE possible alternate spelling for ZACAR? ZACAR appears 14 times in the opus; ZACARE twice; see 1.79.

11.36	CA	ca	therfore
11.37	OD	od	and
11.38	ZAMRAN	ZAMRAN	shew your selves
11.39	ODO	odo	open
11.40	CICLE	cicle	the Mysteries
11.41	QAA	Qad	of your Creation
11.42	ZORGE	Zorge	Be friendly unto me
11.43	LAP	lap	for
11.44	ZIRDO	zirdo	I am
11.45	NOCO	noco	the servant
11.46	MAD	Mad	of the same your God
11.47	HOATH	Hoath	the true worshipper
11.48	LAIDA	laida.	of the Highest.

THE TWELFTH KEY

12.1	NONCI	Nonci	O you
12.2	DS	dsonf	that
12.3	SONF		rayne§
12.4	BABAGE	Babage	in the sowth
12.5	OD	od	and
12.6	CHIS	chis	are
12.7	OB	ob	:28:
12.8	HUBARO	hubiao	the lanterns*
12.9	TIBIBP	tibibp	of sorrow
12.10	ALLAR	allar	bynde up
12.11	ATRAAH	atraah	your girdles
12.12	OD	od	and
12.13	EF	ef	viset us
12.14	DRIX	drix	Bring down
12.15	FAFEN	fafen	your trayn
12.16	MAIN	Mian	3663
12.17	AR	ar	that
12.18	ENAY	Enay	the Lord
12.19	OVOF	ovof	may be magnified
12.20	SOBA	soba	whose

§ 12.3: SONF for 'which'; however, dSONF could be a contraction.

* 12.8: HUBAR- stem for 'lamp' or 'lantern'; see 5.39, 17.13.

12.21	DOOAIN	dooain	name
12.22	AAI	aai	amongst you
12.23	I	i	is
12.24	VONPH	VONPH	Wrath
12.25	ZACAR	ZACAR	Move,
12.26	GOHUS	gohus	I say,
12.27	OD	od	and
12.28	ZAMRAN	ZAMRAN,	shew yourselves
12.29	ODO	odo	open
12.30	CICLE	cicle	the mysteries
12.31	QAA	Qaa,	of your Creation
12.32	ZORGE	Zorge,	be friendly unto me
12.33	LAP	Lap	for
12.34	ZIRDO	zirdo	I am
12.35	NOCO	noco	the servant
12.36	MAD	MAD	of the same your God,
12.37	HOATH	Hoath	the true worshipper
12.38	LAIDA	laida.	of the Highest.

THE THIRTEENTH KEY

13.1	NAPEAI	Napeai	Oh you swords
13.2	BABAGEN	Babagen	of the sowth
13.3	DS	dsbrin	which
13.4	BRIN		have†
13.5	VX	vx	42
13.6	OOAONA	oodona	eyes
13.7	LRING	lring	to styr up
13.8	VONPH	vonph	wrath
13.9	DOALIM	doalim	of synn
13.10	EOLIS	eolis	making
13.11	OLLOG	ollog	men
13.12	ORSBA	orsba	drunken
13.13	DS	ds	which
13.14	CHIS	chis	are
13.15	APFA	affa	empty:

† 13.4: BRIN for 'have'; see 9.7, 14.6, 16.7, 17.11.

13.16	MICMA	<i>Micma</i>	Behold
13.17	ISRO	<i>isro</i>	the promise
13.18	MAD	<i>MAD</i>	of God
13.19	OD	<i>od</i>	and
13.20	LONSHI	<i>Lon-shi-tox</i>	his powre
13.21	TOX†		
13.22	DS	<i>ds</i>	which
13.23	IUMD	<i>ivmd</i>	is called
13.24	AAI	<i>aai</i>	amongst you
13.25	GROSB	<i>GROSB:</i>	A bitter sting:
13.26	ZACAR	<i>ZACAR</i>	Move
13.27	OD	<i>od</i>	and
13.28	ZAMRAN	<i>ZAMRAN,</i>	shew yourselves
13.29	ODO	<i>odo</i>	Open
13.30	CICLE	<i>cicle</i>	the mysteries
13.31	QAA	<i>Qāa,</i>	of your Creation
13.32	ZORGE	<i>Zorge,</i>	Be friendly unto me:
13.33	LAP	<i>Lap</i>	for
13.34	ZIRDO	<i>zirdo</i>	I am
13.35	NOCO	<i>Noco</i>	the servant
13.36	MAD	<i>MAD,</i>	of the same your God
13.37	HOATH	<i>Hoath</i>	The true worshipper
13.38	IAIDA	<i>Iaida.</i>	of the Highest

THE FOURTEENTH KEY

14.1	NOROMI	<i>Norómi</i>	O you sonns
14.2	BAGIE	<i>bagie</i>	of fury
14.3	PASBS	<i>pasbs</i>	the dowghters
14.4	OIAD	<i>oiad</i>	of the Just
14.5	DS	<i>ds</i>	which
14.6	TRINT	<i>trint</i>	sit
14.7	MIRC	<i>mirc</i>	uppon
14.8	OL	<i>ol</i>	24
14.9	THIL	<i>thil</i>	seats
14.10	DODS	<i>dods</i>	vexing

† 13.21: TOX may be a suffix that expresses possession; see 14.23.

14.11	TOL	<i>tolham</i>	all
14.12	HAMI		creatures
14.13	CAOSGO	<i>caosgo</i>	of the earth
14.14	HOMIN	<i>Homin</i>	with age
14.15	DS	<i>ds</i>	which
14.16	BRIN	<i>brin</i>	have
14.17	OROCH	<i>oroch</i>	under you
14.18	QUAR	<i>Quar</i>	1636
14.19	MICMA	<i>Micma</i>	Behold
14.20	BIAL	<i>bial</i>	the voyce
14.21	OIAD	<i>oiad</i>	of God
14.22	AIRO	<i>aisro</i>	promys
14.23	TOX	<i>tox</i>	of him
14.24	DS	<i>dsivm</i>	which
14.25	IUMD		is called†
14.26	AAI	<i>aai</i>	amongst you
14.27	BALTIM	<i>Baltim</i>	Furye, or Extreme Justice
14.28	ZACAR	<i>ZACAR</i>	Move
14.29	OD	<i>od</i>	and
14.30	ZAMRAN	<i>ZAMRAN</i>	shew yourselves
14.31	ODO	<i>odo</i>	open
14.32	CICLE	<i>cicle</i>	the mysteries
14.33	QAA	<i>Qāa,</i>	of your Creation
14.34	ZORGE	<i>Zorge,</i>	Be friendly unto me
14.35	LAP	<i>Lap</i>	for
14.36	ZIRDO	<i>zirdo</i>	I am
14.37	NOCO	<i>Noco</i>	the servant
14.38	MAD	<i>MAD,</i>	of the same your God
14.39	HOATH	<i>hoath</i>	the true worshipper
14.40	IAIDA	<i>Iaida.</i>	of the Highest.

THE FIFTEENTH KEY

15.1	ILS	<i>Ilis</i>	O thow
15.2	TABAAM	<i>tabāan</i>	the governor
15.3	L	<i>Lidlprt</i>	of the first

† 14.25: IUMD for 'is called'; see 13.23, 18.19.

15.4	IALPRT		flame*
15.5	CASARMAN	<i>casarman</i>	under whose
15.6	UPAAH	<i>vpaāhi</i>	wyngs
15.7	CHIS	<i>chis</i>	are
15.8	DARG	<i>darg</i>	6739
15.9	DS	<i>dsoādo</i>	which
15.10	OADO		weave

17.29 QAA	<i>Qâa,</i>	of your Creation
17.30 ZORGE	<i>zorge,</i>	Be friendly unto me

* 17.19: Contraction of VONPHO-VONPH or 'of wrath'-'wrath'. This appears to be a peculiar kind of emphatic redundancy.

17.31 LAP	<i>Lap</i>	for
17.32 ZIRDO	<i>zirdo</i>	I am
17.33 NOCO	<i>Noco</i>	the servant
17.34 MAD	<i>Mad</i>	of the same your God
17.35 HOATH	<i>hoath</i>	the true worshipper
17.36 IAIDA	<i>Iaida</i>	of the Highest.

THE EIGHTEENTH KEY

18.1 ILS	<i>Ilis</i>	O thow
18.2 MICAOLZ	<i>Micaôlz</i>	mighty
18.3 OLPIRT	<i>Olprit</i>	light
18.4 OD		and
18.5 IALPRG	<i>ialprg</i>	burning flame
18.6 BLIORS	<i>Bliors</i>	of comfort
18.7 DS	<i>ds</i>	which
18.8 ODO	<i>odo</i>	openest
18.9 BUSDIR	<i>Busdir</i>	the glory
18.10 OIAD	<i>oiad</i>	of God
18.11 OVOARS	<i>ouôars</i>	to the center
18.12 CAOSGO	<i>caôsgo</i>	of the erth
18.13 CASARMG	<i>Casarmg</i>	In whome
18.14 LAIAD	<i>Laiad</i>	the secrets of truth
18.15 ERAN	<i>erân</i>	6332
18.16 BRINTS	<i>brints</i>	have
18.17 CASASAM	<i>casâsam</i>	their abiding
18.18 DS	<i>ds</i>	which
18.19 IUMD	<i>ivmd</i>	is called
18.20 ACLONDOH	<i>â-q-lo adôhi</i>	in thy Kingdome
18.21 MOZ	<i>MOZ</i>	IOYE
18.22 OD	<i>od</i>	and
18.23 MAOFFAS	<i>maôffas</i>	not to be measured
18.24 BOLP	<i>Bolp</i>	Be thow
18.25 COMO	<i>comobliort</i>	a wyndow
18.26 BLIORT		of comfort
18.27 PAMBT	<i>pambt</i>	vnto me.
18.28 ZACAR	<i>ZACAR</i>	Move
18.29 OD	<i>od</i>	and

18.30 ZAMRAN	ZAMRAN	shew yourselves
18.31 ODO	odo	Open
18.32 CICLE	cicle	the mysteries
18.33 QAA	Qāa,	of your Creation
18.34 ZORGE	zorge	Be friendly unto me
18.35 LAP	Lap	for
18.36 ZIRDO	zirdo	I am
18.37 NOCO	Noco	the servant
18.38 MAD	MAD	of the same your God
18.39 HOATH	Hoath	the true worshipper
18.40 LAIDA	Laīda.	of the Highest.

THE KEY OF THE THIRTY AYRES

30.1	MADRIAX	Madriax	Oh you heavens
30.2	DS	dspraf	which
30.3	PRAF		dwell
30.4	LIL	LIL	in the first Ayre, [‡]
30.5	CHIS	chis	are
30.6	MICAOLZ	Micaol̄z	Mightie
30.7	SAANIR	saānir	in the partes
30.8	CAOSGO	Caōsgo	of the Erth,
30.9	OD	od	and
30.10	FISIS	fisis	execute
30.11	BALZIZRAS	balzizras	the Judgement
30.12	LAIDA	Laīda	of the highest
30.13	NONCA	nonca	to you
30.14	GOHULIM	gohūlim	it is sayd,
30.15	MICMA	Micma	Beholde
30.16	ADOIAN	adoīan	the face
30.17	MAD	MAD	of your God,
30.18	IAOD	Jāod	the begynning
30.19	BLIORB	bliorb	of comfort:
30.20	SOBA	sabaoōāōna	whose
30.21	OOAONA		eyes§
30.22	CHIS	chis	are
30.23	LUCIFTIAS	Luciftias	the brightnes
30.24	PERIPSOL	peripsol	of the heavens:
30.25	DS	ds	which
30.26	ABRAASSA	abraāssa	provided
30.27	NONCF	noncf	you
30.28	NETAĀIB	netāāib	for the government
30.29	CAOSGO	Caōsgo	of the Erth,*
30.30	OD	od	and

‡ The name of the ayre being invoked is inserted here. The ayres are listed in the margin of Sl. MS. 3191 as well as on the preceeding figure. A more detailed description of the ayres and the beings attributed to each ayre is given in Book Four of this volume.

§ 30.21: OOAONA for 'eyes'; see 13.6.

* 30.29: CAOSGO for 'of the earth'; see 8.35, 8.63, 9.32, 14.13, 30.8. CAOSGI is 'the earth'; see 4.44, 5.26.

DIAGRAM OF THE 30 AYRES]

30.31	TILB	<i>tilb</i>	her
30.32	ADPHAHT	<i>adphahit</i>	unspeakable
30.33	DAMPLOZ	<i>damploz</i>	varietie
30.34	TOOAT	<i>toôat</i>	furnishing
30.35	NONCF	<i>noncf</i>	you
30.36	GMICALZ	<i>gmicalzôma</i>	with a powr
30.37	OM		understanding*
30.38	LRASD	<i>Lrásd</i>	to dispose
30.39	TOFGLO	<i>tôfglo</i>	all things
30.40	MARB	<i>marb</i>	according
30.41	YARRY	<i>yárry</i>	to the providence
30.42	IDOIGO	<i>IDOIGO</i>	of him that sitteth on the holy Throne
30.43	OD	<i>od</i>	and
30.44	TORZULP	<i>torzulp</i>	rose up
30.45	IAODAF	<i>iáodaf</i>	in the begynning
30.46	GOHOL	<i>gohól</i>	saying,
30.47	CAOSGI	<i>Caósge</i>	The Earth
30.48	TABAORD	<i>tabaord</i>	Let her be governed
30.49	SAANIR	<i>saánir</i>	by her parts
30.50	OD	<i>od</i>	and
30.51	CHRISTEOS	<i>christéós</i>	Let there be
30.52	YRPOIL	<i>yrpóil</i>	Division
30.53	TIOBL	<i>tióbl</i>	in her,
30.54	BUSDIR	<i>Busdir</i>	that the glory
30.55	TILB	<i>tilb</i>	of hir
30.56	NOALN	<i>noaln</i>	may be
30.57	PAID	<i>paid</i>	allwayes
30.58	ORSBA	<i>orsba</i>	drunken
30.59	OD	<i>od</i>	and
30.60	DODRMNI	<i>dodrmni</i>	vexed
30.61	ZYLNA	<i>zylna</i>	in itself:
30.62	ELZAP	<i>Elzáptilb</i>	Her course,
30.63	TILB†		

* 30.37: OM for 'understanding'; see 2.4, 10.54, 16.19.

† 30.63: TILB for 'of her'; see 30.55. Could *tilb* be another suffix (like *rox*) signifying possession?

30.64	PARMGI	<i>parngi</i>	let it ronne
30.65	PERIPSAX	<i>peripsax</i>	with the heavens:
30.66	OD	<i>od</i>	and
30.67	TA	<i>ta</i>	as
30.68	QURLST	<i>qurlst</i>	a handmayd
30.69	BOOAPIS	<i>booapiS</i>	let her serve them:
30.70	L	<i>Lnibm</i>	One
30.71	NIMB		season
30.72	OUCHO	<i>ovcho</i>	Let it confownd
30.73	SYMP	<i>symp,</i>	another:
30.74	OD	<i>od</i>	And
30.75	CHRISTEOS	<i>Christéos</i>	let there be
30.76	AG	<i>Agtoltorn</i>	no
30.77	TOLTORN		Creature‡
30.78	MIRC	<i>mirc</i>	uppon
30.79	Q	<i>Q</i>	or
30.80	TIOBL	<i>tióbl</i>	within her
30.81	LEL	<i>Lel,</i>	the same:
30.82	TOL	<i>Ton</i>	All
30.83	PAOMBD	<i>paombd</i>	her members
30.84	DILZMO	<i>dilzmo</i>	let them differ
30.85	ASPIAN	<i>aspian,</i>	in their qualities:
30.86	OD	<i>Od</i>	And
30.87	CHRISTEOS	<i>christéos</i>	let there be
30.88	AG	<i>ag</i>	no
30.89	L	<i>L</i>	one
30.90	TOLTORN	<i>tortorn</i>	Creature
30.91	PARACH	<i>parach</i>	æquall
30.92	ASYMP	<i>asymp,</i>	with another
30.93	CORDZIZ	<i>Cordziz</i>	The reasonable Creatures of Erth or Men
30.94	DODPAL	<i>dodpal</i>	let them vex
30.95	OD	<i>od</i>	and
30.96	FIFALZ	<i>fifalz</i>	weede out
30.97	L	<i>Lsmnad,</i>	one
30.98	SMNAD		another:

‡ 30.77: TOLTORN for 'creatures'; see 30.90.

30.99	OD	od	And
30.100	FARGT	fargt	the dwelling places,
30.101	BAMS	bams	let them forget
30.102	OMAOAS	omaoas,	their names:
30.103	CONISBRA	Conisbra	The work of man
30.104	OD	od	and
30.105	AVAVOX	auuvox	his pomp,
30.106	TONUG	tonug,	let them be defaced:
30.107	ORSCA	Orscatbl	His buyldings
30.108	TLB		
30.109	NOASMI	noasmi	let them become
30.110	TABGES	tabges,	Caves
30.111	LEVITHMONG	Levithmong	for the beasts of the feild:
30.112	UNCHI	unchi	Confownd
30.113	OM	omptilb	her understanding
30.114	TILB*		
30.115	ORS	ors.	with darknes.
30.116	BAGLE	Bagle	For why?
30.117	MOOOAH	Mooóah	It repenteth me
30.118	OL	olcórdziz.	I made§
30.119	CORDZIZ		Man.
30.120	L	L	One
30.121	CAPIMAO	capimao	while
30.122	IXOMAXIP	ixomaxip	let her be known,
30.123	OD	od	and
30.124	CA	cacócasb	another
30.125	CAPIMAO		while†
30.126	GOSAA	gosaa.	a stranger:
30.127	BAGLEN	Baglen	Bycause
30.128	PI	pii	she
30.129	I		is
30.130	TIANTA	tianta	the bed
30.131	ABABALOND	ababálon	of an Harlot,

* 30.114: The English would be better rendered as 'the understanding of her'; see note on 30.63.

§ 30.118: Possibly a contraction—if so, a word is missing. OL is 'I' (first person singular), while CORDZIZ is 'men'. Perhaps the 'made' is somehow understood?

† 30.125: The English probably should be 'time'; see 4.32.

30.132	OD	od	and
30.133	FAORGT	faórgt	the dwelling place
30.134	TELOCVOVIM	telocvovim.	of him that is faln:*
30.135	MADRILAX	Mádrilax	O you heavens,
30.136	TORZU	torzu	arise,
30.137	OADRIAX	oádríax	the lower heavens
30.138	OROCHA	orócha	underneath you,
30.139	ABOAPRI	abóápri.	Let them serve you:
30.140	TABAORI	Tabáóri	Govern
30.141	PRIAZ	priáz	those
30.142	AR	artabas.	that†
30.143	TABAORI		govern:
30.144	ADRPAN	Adrpan	Cast down
30.144	ADRPAN		Cast down
30.145	CORS	corsta	such
30.146	TA		as
30.147	DOBIX	dobix.	fall:
30.148	YOLCAM	Yolcam	Bring forth
30.149	PRIAZI	priazi	with those
30.150	AR	arcoazior.	that
30.151	COAZIOR		encrease:
30.152	OD	od	And
30.153	QUASB	quasb	destroy
30.154	QTING	qting.	the rotten:
30.155	RIPR	Ripr	No place
30.156	PAAOXT	paoxt	let it remayne
30.157	SAGACOR	sagácor.	in one number:
30.158	UML	vml	Ad
30.159	OD	od	and
30.160	PRDZAR	prd-zar	Diminish
30.161	CACRG	cácr	vntill
30.162	AOIVÉE	Aoivée	the stars
30.163	CORMPT	cornpt.	be numbred:
30.164	TORZU	TORZU	ARRISE,

* 30.134: Contraction of TELOCH-VOVIN or 'death'-dragon'. In this case the fallen one is the great dragon Coronzon..

† 30.142 to 30.143: AR for 'that'; see 12.17; TABAORI for 'govern'; see 30.140.

30.165	ZACAR	ZACAR	MOVE,
30.166	OD	od	and
30.167	ZAMRAN	ZAMRAN	APPERE
30.168	ASPT	aspt	before
30.169	SIBSI	sibsi	the Covenant
30.170	BUTMONA	butmōna	of his mowth,
30.171	DS	ds	which
30.172	SURZAS	surzas	he hath sworne
30.173	TIA	tia	unto us
30.174	BALTAN	baltan:	in his Justice:
30.175	ODO	Odo	OPEN
30.176	CICLE	cicle	the Mysteries
30.177	QAA	Qāa:	of your Creation:
30.178	OD	od	And
30.179	OZAZMA	ozazma	Make us
30.180	PLAPLI	plapli	partakers
30.181	IADNAMAD	Iadnāmad	of undefyled knowledg.†

† 30.181: Contraction IAD-NAMAD or 'God'-'knowledge'.

BOOK FOUR

EARTHLY KNOWLEDGE, AID & VICTORY

WHEN THE MOST HIGH DIVIDED TO THE NATIONS THEIR inheritance, when he separated the sons of Adam, he set the bounds of the people according to the number of the children of Israel*. † And had a wall great and high, and had twelve gates, and at the gates twelve angels, and names written thereon, which are the names of the twelve tribes of the children of Israel†.

* Deuteronomy, Chapter 32.

† Revelation, Chapter 21.

[NB. The following captions are to be read for the numbered columns following:—ED.]

- 1.] Part of the Earth as imposed by Man.
- 2.] Part of the Earth as imposed by God.
- 3.] Divinely ordained Symetric Characters.
- 4.] Ordered Sphere of good & noble Ayres.
- 5.] Number of Good Ministers ordered in 3 parts.
- 6.] Total of all good Ministers.
- 7.] Angelic Kings Ruling the 30 orders and also the 12 tribes.
- 8.] Tribes of the people of Israel Dispersed.
- 9.] Quarter of the Earth to which the dispersed tribes are assigned.

CHAPTER IJJ
THE GREAT CIRCLE OF THE QUARTERS

¶ The four triads are the Names of God extracted from the four lines of the holy spirit, which govern all creatures on the earth (both visible and invisible). They are carried upon twelve banners.

CHAPTER IV
THE FUNDAMENTAL OBESANCE

This is the fundamental obesance to God, and the conjuration for obtaining the benign ministry of the good angels.

IEOVAH ZEBAOOTH, I, JOHN DEE (YOUR UNWORTHY servant) most earnestly invoke and call upon your divine power, wisdom, and goodness. I humbly and faithfully seek your favour and assistance to me in all my deeds, words, and thoughts, and in the promoting, procuring, and mingling of your praise, honour, and glory. Through these, your twelve mystical Names: ORO, IBAH, AOZPI, MOR, DIAL, HCTGA, OIP, TEAA, PDOCE, MPH, ARSL, GAIOL, I conjure and pray most zealously to your divine and omnipotent majesty, that all your angelic spirits (whose mystical names are contained in this book, and whose offices are herein briefly noted) might be called from any and all parts of the universe, or at any time in my life, through the special domination and controlling power of your holy Names (which are also in this book). Let them come most quickly to me. Let them appear visibly, friendly, and peacefully to me. Let them remain visible according to my will. Let them vanish from me and from my sight when I so request. Let them give reverence and obedience before you and your 12 mystical Names. I command that they happily satisfy me in all things and at all times in my life, by accomplishing each and every one of my petitions—if not by one means, then by another—goodly, virtuously, and perfectly, with an excellent and thorough completeness, according to their virtues and powers, both general and unique, and by Your united ministry and office

O God. AMEN.

Through you, Jesu Christe,

AMEN

CHAPTER V
THE TWENTY FOUR SENIORS

These are the twenty-four Seniors (mentioned in the Apocalypse of Saint John) whose names are compiled from the lines of the Father, the Son, and the Holy Ghost. The duty of these Good Angels is to impart knowledge and judgement in human affairs.

QUARTER	GOD NAME	SENIORS
East	BATAIVA	Abioro or Habiore
	or BATAIVH	Aaoxaif Htmorda Haozpi or Ahaozpi Hipotga Autotar
South	ICZHHCA	Aidrom or Laidrom
	or ICZHHCL	Aczinor Lzinopo Lhctga or Alhctga Lhiansa Acmbicu
West	RAAGIOS	Srahpm or Lsrahpm
	or RAAGIOL	Saiinou Laoaxrp Lgaiol or Slgaiol Ligdisa Soaiznt
North	ELDPRNA	Ætpio or Aætpio
	or EDLPRNA	Adocoet Alndvod Apdoce or Aapdoce Arinnaq Anodoin

¶ This is the invitation to the six seniors of the East:

Q YOU SIX SENIORS OF THE EAST, POWERFUL AND FAITHFUL to the omnipotent God of our ministry, in the name of the same God (one and three), I say to you, ABIORO or HABIORO, AAOZAI, HTMORDA, HAOZPI or AHAOZPI, HIPOTGA, AUTOTAR, through the divine Name by which you are particularly bound, the angelic Name BATAIVA or BATAIVH, I, John Dee, a faithful servant of the omnipotent God, amicably, earnestly, and confidently demand and beseech you to appear placidly, affably, and favourably before me, immediately and without delay, and henceforth at any time I wish, through all the remaining journey of my life, I beseech all of you, some of you, or whichever of you I name, united or divided, to grant all my petitions, and especially grant me Knowledge and Judgement in human affairs, and in all other things that are assigned to your Office and Ministry and that are accomplished by you, one and many. I command you to appear, to perform, and to complete, goodly, plainly, intelligibly, and perfectly, according to your Virtue, Power, and Office, and according to the capacity of your Ministry, entrusted and committed to you by the omnipotent God.

AMEN

Through the sacred Name of God
BATAIVA or BATAIVH

AMEN

This is the invitation to the four good angels of the West, who are most skilled and powerful in medicine and the cure of diseases:

O YOU ANGELS OF LIGHT, TACO OR TAGCO, NHDD OR NHODD, PAAX OR PATAX, SAIZ OR SAAIZ, dwelling in the Western part of the universe, powerful in the administering of the strong and healthy medicine of God and in the dispensing of cures: In the Name of the omnipotent, living, and true God, I, John Dee, by the grace of the God of the Celestial City of Jerusalem, and through the reverence and obedience which you owe to the same, our God, and through these, His divine and mystical Names, OLGOTA and OALCO, I vehemently and faithfully require of you, one and all to come before me, I beseech you, at whatever moment of time I wish for the duration of my natural life. I summon you by the Names of God, OLGOTA and OALCO, to perform, to accomplish, and to complete all my requests, abundantly, excellently, thoroughly, pleasantly, plentifully, and perfectly, in any and all things, through every possible medicine, and through the peculiar strength and power of your office and ministry.

Through the Sacrosanct Names of God
OLGOTA and OALCO

AMEN

North	VADALI OBARA	Gmnm or Gmdnm Ecop or Ecaop Amox or Amlox Brap or Briap	Mgm Oec Cam Hbr	ILADAV AVABO

¶ This is the invitation of the four good angels of the East, who are powerful and learned in metals and jewels:

YOU FOUR ANGELS OF LIGHT, FAITHFUL IN THE MINISTRY of God (our Creator), OYUB or OYAUB, PAOC or PACOC, RBNH or RBZNH, DIRI or DIARI, lords in the Eastern part of the universe, and who (out of the peculiar gifts and dispensations of God) are powerful and learned in the lore of ore-veins, the finding of metal and treasure hoards, the uses and virtues of metals, the coagulation and magical properties of jewels, the places where metals and jewels are gathered, as well as their natures, properties, virtues, and uses, both secret and arcane: I, John Dee, the humble and devoted servant of the omnipotent, living, and true God, IEOVA ZEBOATH, through the inevitable power which is known to the same, our God, in these Names, LLACZA and PALAM, to whom you owe reverence and obedience, I vehemently and confidently require of you, one and all, that, through the whole of my remaining life at whatever time I wish, you come and appear before me, benignly, placidly, visibly, and pleasantly, and be favourable unto me. I beseech thee, one and all, to complete and to make perfect all my petitions for intended deeds, most swiftly, manifestly, certainly, immaculately, and plentifully. Yet I bind myself by this condition, that all my demands, totally or for the most part, be mindful of your peculiar skills, strengths, faculties, and powers over metals and jewels. By the speaking of the divine Names, LLACZA and PALAM, I call and command you, one and all.

North	VOLXDO SIODA	Datt or Dabtt Diom or Dixom Oopz or Oodpz Rgan or Rgoan	Rda Adi Xoo Erg	ODXLOV ADIOS

¶ This is the invitation of the four good angels of the East, who are learned and powerful in Transformation:

YOU FOUR GOOD AND TRUE ANGELS OF GOD (OUR CREATOR), ABMO or ABAMO, NACO or NAOCO, OCNM or OCANM, SHAL or SHIAL, who rule in the Eastern part of the world, who received of God in your creation the singular strength, true knowledge, and perfect absolute power of Transformation as your duty and office, that you might impart and make manifest unto men (as preordained by the same, our God) this true knowledge and perfect power, to the praise, honour, and glory of God. Therefore, I, John Dee, the devoted servant of the same, our God and Creator, truly, diligently, and faithfully desiring to praise, honour, and glorify in God, do vehemently demand and confidently beseech you, one and all, to bring to pass and amplify amongst men this your aforementioned true knowledge, through these mystical Names of God (pre-eminently and predominantly peculiar to you): AIAOAI and OIIIT. I, John Dee, demand that you appear benignly, placidly, and visibly to me, at whatever moment in time I should choose, for all the remaining time of my life, and moreover I demand that you deign to be friendly and favourable unto me. I, John Dee, demand that you (one and all), immediately and without delay, perfectly accomplish, manifestly discharge, plainly complete, and plentifully make perfect each and every one of my petitions, by whatever means necessary, that concern or respect your skill, knowledge and power of Transformations, no matter when I shall require it of you, through these Names of our God, here rehearsed: AIAOAI and OIIIT.

FIN

APPENDICES

APPENDIX A

THE PRACTICE OF ENOCHIAN EVOCATION

HERE ARE NO DESCRIPTIONS IN DEE'S EXTANT DIARIES OF actual Enochian evocation rituals, a fact that has led some scholars to conclude that he never attempted the magic. The existence, however, of artifacts such as the wax sigils of Æmeth in the British museum indicate that Dee, at the very least, constructed some of the requisite furniture. In addition, Dee compiled Sloane MS. 3191 (the primary source for *The Enochian Evocation*) to be a working collection of conjurations for use in magical ceremonies. Although it is possible that Dee never went through with the experiments, it is far more likely that he recorded the events in a separate diary that has not survived. Dee was a rabid diarist, and kept at least three concurrent diaries during the period that he was working with Kelly, each diary covering a different aspect of his life. It would be well in character for Dee to initiate a special diary for the practice of the 'radical truths' that he had sought for so many years.

There are many clues that assist in uncovering the operative portions of this arcane branch of magical lore. Sloane MS. 3191, for example, delineates the portions of Enochian evocation that Dee thought were most essential. Other clues are scattered throughout the surviving diaries. Dee describes many scrying sessions, and it is unlikely that the Enochian rituals differed very greatly from those he practiced with his scryers. In addition, many passages from the scrying sessions contain hints and instructions concerning Enochian evocation. Another valuable source of information is the body of magical literature that was available to Dee and Kelly. The effect of Agrippa, for example, upon Dee's philosophical outlook is obvious, and many aspects of Enochian evocation are dependant upon the world-view of

THE HOLY TABLE.

[Vide page 181, II., number 6.]

the renaissance Magi. Also, Kelly's involvement in black magic indicates influence from other magical texts. When all these sources of information are gathered together, a coherent picture emerges of the practice of Enochian evocation.

This appendix discusses:

1. The personnel & apparel required for the rituals.
2. The furniture and construction of the temple.
3. The book of prayers & conjurations.
4. The Angelic hierarchies.
5. The talismans for the Angelic hierarchies.
6. The scheduling of the ceremonies.

¶ I. PERSONNEL

ENOCHIAN rituals were practiced by two people, a Magus and Stryer. The Magus chanted the conjurations, compelling the Angels (by the power of the Names of God) to appear within the crystal stone. The Stryer gazed into the crystal and related his visions. The Magus doubled as scribe, recording the visions and the results of the ceremony.

Both Stryer and Magus were expected to lead holy lives (at least while practicing the magic), to cultivate piety and humility, and to abstain from the practice of black magic. During the ceremonies, both were dressed in white linen robes, and the magus wore a magical ring with a gold seal (as shown in Book Two). Other renaissance magical texts recommend that the Magus wear a crown and carry a magical wand and or sword, but none of these are mentioned in Dee's work.

¶ II. FURNITURE

BEFORE practicing Enochian evocation, the Magus and Stryer located or constructed the following items:

1. A crystal ball. This was handled only by the magus or the stryer. Dee's was rather small, about two inches in diameter.
2. A circular wax tablet, 9 inches in diameter and 1.5 inches thick, inscribed on the front with the sigil of Æmeth and on the back with a cross. These designs are shown in Book Two. The center of the front was hollowed out slightly, so that

- the crystal ball could easily be placed on top of the Sigil.
3. Four wax tablets, about 4 inches in diameter, similarly inscribed.
 4. A red silk 'rug', two yards square.
 5. A red and green (or multi-coloured) tablecloth, about 1.5 yards square, with tassles at each corner.
 6. A table constructed of 'sweet wood' [cedar?] a yard (two cubits) square, with yard long legs. Each leg terminated with a hollow cylinder, slightly more than 4 inches on the inside diameter and about 0.5 inches thick. The basic structure of this table is shown in Book Two; because of its low profile, two wooden stools were probably also necessary. A set of elaborate sigils were to be painted in yellow oils on the top surface of the table. The arrangement of these sigils is too complex to be reproduced in this volume, but can be found in *The True Relation* between the Preface and the first book, on the page labeled 'The Holy Table'.
 7. Twelve banners or flags each embroidered with a Name of God as shown in Book Five.

This furniture was arranged into a temple where Enochian evocation could be practiced. This may have been intended to be in the open air rather than within a building, as there are no descriptions of candles or torches. Furthermore, the magical circle specifies 'Terra' [Earth], which may or may not have been intended symbolically.

The temple was constructed in the following manner:

1. The place of working was enclosed by a circle as shown in Book Five, Chapter Three. The banners were propped at the circle's edge.
2. The red silk rug was laid in the center of the circle.
3. The four small wax tablets were arranged in a square pattern in the center of the silk rug, 1 yard square.
4. The table was balanced upon the wax tablets, so that the hollow cylinders at the end of the table legs overlapped them.
5. The large wax tablet was placed on the center of the table.
6. The silk tablecloth was draped over the table, covering the large wax tablet, so that the tassles dangled almost to the floor.

7. The crystal was laid on the top of the tablecloth, balanced on the indentation in the wax tablet.

III. THE MAGICAL BOOK

THE MAGUS was required to have a book in which prayers and conjurations were recorded for use within the temple. For the complete practice of Enochian evocation, it probably would have had the following contents:

§1: PRAYERS

THE ORATION TO GOD—as shown in Book Two, Chapter Five.

THE PRAYER OF ENOCH—as shown in Book One, Chapter Two.

THE FUNDAMENTAL OBESANCE—as shown in Book Five, Chapter Four.

§2. CONJURATIONS

THE HEPTARCHIC CONJURATIONS—formed by inserting the specific attributes of each King and Prince (as shown in Book Two, Chapter Seven) with the generalized conjuration (as shown in Book Two, Chapter Six).

THE ANGELICAL KEYS—as shown in Book Three. These were to be written in both Angelical and English. Note that the last key was to be repeated 30 times, with the third word altered to indicate the Aire being worked. In Sloane MS. 3191, the the various Aires are listed in the margin. The individual names of the Aires are given in Book Four, Column Four.

THE INVITATIONS TO THE ANGELS OF THE QUARTERS—as shown in Book Five, Chapters Five through Thirteen.

The ordering of Dee's workbooks suggests that he intended a certain cross-semination of the earlier (Heptarchic) and later (Angelical) systems. In any case, the magical book is described in Dee's diaries as consisting *first of the invocation of the Names of God and second of the invocation of the Angels, by the Names of God*—an ordering is preserved in the contents above.

Note that, unlike other renaissance magical systems, Enochian evocation does not include a 'Dismissal' or 'Licence to Depart', a conjuration designed to send a spirit back to its dwelling place. Dee evidently felt this to be unnecessary, although most renaissance Magi would have considered this omission dangerous.

IV. THE ANGELS

ENOCHIAN evocation was believed to summon three interrelated hierarchies of angels:

1. THE HEPTARCHICAL ROYALTY—who were believed to govern all earthly actions, & disperse of the will of the Creator. One conjured them to obtain knowledge of God truly, the number and doings of His Angels perfectly and the beginning and ending of Nature substantially. These Angels were based upon the 7 planets and the 7 days of the week.
2. THE ANGELS OF THE AIRES—who were believed to rule over the various countries of the earth. One conjured them to subvert whole countries without armies, to get the favour of all the (human) Princes, & to know the secret treasure of the waters, and the unknown caves of the earth. These Angels were based on the 12 houses of the Zodiac and the 30 Aires, which were evidently subdivisions of the 'vault of stars' in which the 'fixed stars' were believed to reside.
3. THE ANGELS OF THE QUARTERS—who were believed to have been put onto the earth so that the Devil's envious will might be bridled, the determinations of God fulfilled, and his creatures kept and preserved. One conjured them to obtain a variety of semi-divine powers and capabilities. These Angels were based upon the 4 Elements and the 4 compass points.

Thus Enochian evocation consisted of a complete panoply of magical art, covering planetary, zodiacal, and elemental operations and reputed to control hundreds of named and thousands of unnamed Angelic creatures. Because of the complexity of these Angelic hierarchies, I shall discuss each in detail.

§1. THE HEPTARCHICAL ROYALTY

THE HEPTARCHICAL Royalty are described in Book Two, Chapter Four, and were believed to rule over the days of the week and the planets. The relationship of the primary Heptarchic hierarchy is shown in the following figure:

KING CARMARA

PRINCE HAGONEL

Sons of Light	I	Ih	Isr	Dmal	Hecoa	Beigia	Stimcul
Sons of the Sons of Light	EL	An	Avc	Liba	Rocle	Hagonel	Ilemese
Kings	BALIGON	BNASPOL	BOBOGEL	BABALEL	BYNEPOR	BNAPSEN	BLUMAZA
Princes	BAGANOL	BLISDON	BORNOGO	BEFAFES	BUTMONO	BRORGES	BRALGES
The Table of the 42 Ministers	AOAYNNL	ELGNSEB	LEENARB	EILOMFO	BBARNFL	BANSSZE	OESNGLE
	LBBNAAV	NLINZVB	LNANAEB	NEOTPTA	BRAIGAO	BYAPARE	AVZNILN
	IOAESPM	SFAMLLB	ROEMNAB	SAGACTY	BBALPAE	BNAMGEN	YLLMAPS
	GGLPPSA	OOGOSRS	LEAORIB	ONEDPON	BBANIFG	BNVAGES	NRSOGOO
	OEEOOEZ	NRPCRRB	NEICIAB	NOONMAN	BBOSNIA	BLBOPOO	NERCPRN
	NLLRINA	ergdbab	AOIDIAB	ETEVGL	BBASNOD	BABEPEN	LABDGE
	(Fri.)	(Wed.)	(Sun.)	(Tues.)	(Thurs.)	(Sat.)	(Mon.)

Note that the 'Son of the Sons' HAGONEL had a different sigil than PRINCE HAGONEL and thus was a different angelic personage.

The names of the 42 ministers were generated from the each table by starting with each letter and continuing rightwards to the end of the table, then looping around to the beginning. This made six sets of seven ministers per day, each set ruling for four hours [beginning at midnight]. For example, the 42 ministers for Prince BAGANOL (Friday) are

12AM—4AM	Aoaynnl	Oaynnla	Aynnlaa	ynnlaaa	Nlaaay	Nlaayn	Laaaynn
4AM—8AM	Lbbnaav	Bbnaavl	Bnaavlb	Naavllb	Aavllbn	Avllbna	Vllbnaa
8AM—12PM	Ioaespm	Oaespmi	Aespmio	Espmioa	Spmioa	Pmioas	Mioaes
12PM—4PM	Gglppsa	Glpssag	Lpssagg	Ppsaggl	Psagglp	Sagglpp	Agglpps
4PM—8PM	Oeeooez	Eeeoozo	Eeeooze	Oeeooze	Oeeoozo	Eeeoozo	Zeeooze
8PM—12AM	Nllrina	Lllrina	Lllrina	Nllrina	Nllrina	Nllrina	Nllrina

The Heptarchical Royalty also included a set of 49 planetary angels, of whom 14 were the Kings and Princes for the days. The 'Table of the 49 Good Angels' at the close of Book Two shows the primary planetary attribution of each of these entities. Curiously, the planetary attributions of the Kings were the only ones that matched the traditional linking of the days of the week with the planets. By extrapolation, it is likely that each angel had a double attribution as follows:

	SUNDAY		MONDAY
BOBOGEL	Sol of Sol	BLUMAZA	Luna of Luna
BORNOGO	Sol of Venus	BRALGES	Luna of Saturn
Bablibo	Sol of Luna	Baspalo	Luna of Mercury
Buscnab	Sol of Saturn	Belmara	Luna of Jupiter
Bariges	Sol of Mercury	Bragiop	Luna of Mars
Barnafa	Sol of Jupiter	Brisfli	Luna of Sol
Bonefon	Sol of Mars	Basledf	Luna of Venus
	TUESDAY		WEDNESDAY
BABALEL	Mars of Mars	BNASPOL	Mercury of Mrcry
BEFAFES	Mars of Sol	BLISDON	Mercury of Jupitr
Bapnido	Mars of Venus	Bazpama	Mercury of Mars
Busduna	Mars of Luna	Bernole	Mercury of Sol
Bminpol	Mars of Saturn	Blamapo	Mercury of Venus
Binofon	Mars of Mercury	Barfort	Mercury of Luna
Bmilges	Mars of Jupiter	Bliigan	Mercury of Satur
	THURSDAY		FRIDAY
BYNEPOR	Jupiter of Jupiter	BALIGON	Venus of Venus
BUTMONO	Jupiter of Mars	BAGENOL	Venus of Luna
Basmelo	Jupiter of Sol	Bormifa	Venus of Saturn
Besgame	Jupiter of Venus	Binodab	Venus of Mercury
Blingef	Jupiter of Luna	Benpagi	Venus of Jupiter
Bartiro	Jupiter of Saturn	Bermale	Venus of Mars
Baldago	Jupiter of Merc.	Bagnole	Venus of Sol

SATURDAY

BNAPSEN	Saturn of Saturn
BRORGES	Saturn of Mercury
Balceor	Saturn of Jupiter
Blintom	Saturn of Mars
Branglo	Saturn of Sol
Bmamgal	Saturn of Venus
Bamnode	Saturn of Luna

§2. THE ANGELS OF THE AIRES

THE 91 PRINCIPAL Angels of the Aires are listed in tabular form in Book Four.

COLUMN ONE gives the name of the country over which each Angel rules. These are based on Ptolemy's Geography.

COLUMN TWO gives the name of each Angel, which is the same as the name of the part of the Earth as imposed by God.

COLUMN THREE gives the sigil for each Angel. These are derived from the Great Table of the Quarters, by connecting the letters that spell the Angel's name. Note that 'PARAOAN' is an 'overlay' using letters belonging to other Angels, (beginning with the 'P' in PARZIBA) and that 'LEXARPH', 'COMANAN', and 'TABITOM' are generated from the central cross. 'LEXARPH' uses the 'L' at the bottom right corner of the Western quarter. These sigils are not given in Sloane MS. 3191, but are included here for completeness. Note also that a sigil is given in the table for an entity LAXDIZI, which is not in the 91 Aires.

COLUMN FOUR gives the Aire in which the Angel dwells. These are evidently similar to the layers of Heaven described in Gnostic texts. The order LIL is the highest and TEX is the lowest; note that the Holy Land is governed by LIL.

COLUMN FIVE gives the number of servitor Angels (ministers) that are controlled by each Angel.

COLUMN SIX gives the total of all the Angels ruling in each Aire.

COLUMN SEVEN gives the names of the Angelic Kings that rule over each Angel. There is one King per sign of the Zodiac:

1. OLPAGED for Scorpio, 2. ZIRACAH for Aquarius, 3. HONONOL for Leo, 4. ZARNAAH for Gemini, 5. GEBABAL for Libra, 6. ZURCHOL for Pisces, 7. ALPUDUS for Cancer, 8. CADDAMP for Sagittarius, 9. ZARZILG for Virgo, 10. LAVAVOTH for Aries, 11. ZINGGEN for Capricorn & 12. ARFALOG for Taurus.

COLUMN EIGHT gives the tribe of Israel that corresponds to the Angelic King and each sign of the Zodiac.

COLUMN NINE gives the compass points that should be faced when invoking each angel.

§3. THE ANGELS OF THE QUARTERS

THE ANGELS of the Quarters are listed in detail at the beginning of Chapters Five through Thirteen of Book Five. A cursory examination of the crosses on the tables accompanying each 'Invitation' [conjunction] reveals how these names are generated. Many of the Angels have dual names—presumably both are correct, as both are used in the invitations.

The names of the cacodemons in Chapters Six through Nine are generated by taking a letter from the central cross of the Great Table, and combining it with the first two letters of each Angel's name. For example, the cacodemon Xcz is formed by taking the 'X' in EXARP and combining it with the 'Cz' in CZNS or CZONS. These cacodemons are the only vestige of black magic in Dee's evocation system, other than the stipulation that the word VAOAN in the first Angelical key is to be altered to VOOAN when conjuring evil spirits.

¶ V. TALISMANS

THE USE of various talismans were considered necessary for the practice of evocation magic in general, and were probably used for Enochian evocation as well. Only one Enochian talisman has survived: a beautiful gold disk in the British Museum. *A True Relation* shows an engraving of his disk on page preceding THE HOLY TABLE; the talisman commemorates a vision that Kelly had of the Angels of the Quarters:

A Vision. The sign of the love of God toward his faithful. Four sumptuous and belligerant Castles, out of the which sounded Trumpets thrice.

§ The sign of Majesty, the Cloth of the passage was cast forth.

§ In the East, the cloth red; after the new smitten blood

§ In the South, the cloth white, Lilly-colour

§ In the West a cloth, the skins of many Dragons, green; garlic bladed.

§ In the North, the cloth, Hair-coloured, Bilbery juyce.

The Trumpets sound once. The gates open. The four Castles are moved. There issueth 4 Trumpeters, whose Trumpets are a Pyramis, six cones, wreathed. There followeth out of every Castle 3, holding up their Banners displayed, with ensigne, the Names of God. There follow Seniors six, alike from the four Gates: After them cometh from every part a King: whose Princes are five, gardant, and holding up his train. Next issueth the Crosse of 4 angels, of the Majesty of Creation in God attended upon everyone, with 4: a white Cloud, 4 Crosses, bearing the witnesses of the Covenant of God, with the Prince gone out before; which were confirmed, everyone, with ten Angels, visible in countenance; After every Crosses, attendeth 16 Angels, dispositors of the will of those, that govern the Castles. They proceed. And, in and about the middle of the Court, the Ensigns keep their standings, opposite to the middle of the Gate: The rest pause. The 24 Senators meet: They seem to consult. It vanisheth.

Although the use for the gold disk is not known, it may have been worn as a protective amulet during the Enochian evocation ritual.

The Magus was definitely required to construct a talisman for each group of Angels that he wished to conjure. These were made of 'sweet wood', with the characters 'painted' upon them. The talismans were held in the hand as thou shalt have cause to use them, implying that the Magus held them during the prayers. During the conjurations, however, thy feet must be placed upon these tables, indicating that the Magus' dominance over the Angels was signified by his standing upon the Talisman.

Although none of these talismans appear to have survived, the talismanic methods of Agrippa can be applied to devise probable reconstructions of these important ceremonial objects.

§1. TALISMANS FOR THE HEPTARCHICAL ROYALTY

ALTHOUGH this hierarchy includes several hundred entities, only the prince of each day and the SONS OF THE SONS OF LIGHT actually have their own 'signatures' or sigils. Evidently this means that a single talisman was to be constructed for each day, with an extra one for King CARMARA and Prince HAGONEL. The following sample represents a speculative reconstruction of the talisman for the conjuration of the Angels of Friday:

§2. TALISMANS FOR THE ANGELS OF THE AIRES

EACH OF THE 91 Princes has his [or her] own signature, which clearly implies that 91 separate talismans were to be constructed. The Angelic Kings of the Zodiac have no signatures, which indicates that their name alone (like the magical Names of God) carried the requisite power to invoke their influence. The following sample represents a speculative reconstruction of the talisman for the conjuration of PASCOMB, the Earthly Guardian of Syria:

§3. TALISMANS FOR THE ANGELS OF THE QUARTERS

NONE OF THE Angels of the Quarters have their own signatures, a fact that would seem to indicate the relatively exalted status of

these entities. The following sample represents a speculative reconstruction of the talisman for the conjuration of the Angels of Transformation that dwell in the West:

§4. ENOCHIAN LETTERS

It is possible that, rather than Roman letters, the 'Enochian' alphabet was to be used to draw up the talismans (although no Enochian letters appear in Sloane MS. 3191). There are several versions of this magical alphabet in Dee's diaries; the following version appears to be a script rendition, as it is much easier to write with a quill pen than the sigil-like letters that appear later in Dee's notes.

VI. THE CEREMONIES

AFTER THE FURNITURE, book, and talisman had been prepared, the following schedule was to be kept:

1. FIRST FOUR DAYS—prayers were fervently spoken three times daily.
2. NEXT FOURTEEN DAYS—while continuing with the prayers, conjurations were added to the agenda.
3. THE FIFTEENTH DAY—at this point the prayers and conjurations were believed to become effective, and the Angels were supposed to appear within the crystal.

Once the Angels had appeared, it was no longer considered necessary to go through the entire repertory to conjure them. Once successfully conjured, the Angels were to remain obedient to the Magus for the remainder of his life.

It is probable that some cross-semination might have been intended, for example, using the first 18 Keys as preliminary conjurations to summoning the Angels of the Quarters. Dee also tended to punctuate his scrying sessions with readings from the Bible; *Psalms* 33 is mentioned specifically.

APPENDIX B
TRANSLATOR'S NOTES

The Story of the Manuscripts

THE SURVIVAL OF THE MAGICAL MANUSCRIPTS OF JOHN DEE was an accident, or more accurately, a series of accidents and coincidences that rival in strangeness the subject matter that the manuscripts contain.

Even while they were being written, certain of the most essential manuscripts were almost destroyed. Although the incident and the motivations behind it are not mentioned in any of the extant diaries, Dee describes their reappearance:

I espied . . . a sheet of faire white paper lying tossed to and fro in the wind. I rose and went up to it and there I found three of my Books lying, which were so diligently burnt the tenth day of April last. The three books were: 1. Enoch his Book, 2. The 48 Claves Angelicæ, 3. Liber Scientia terrestris auxilii & victoriæ.[Additional manuscripts were then discovered to be:] in the back of the furnace . . . the hole which was not greater than the thickness of a brick.†*

Pethaps to prevent further mishaps, Dee later secreted a number of the more important manuscripts in the false bottom of a cedar chest, whose lock and hinges [were] extraordinarily neat, where they remained hidden for over 50 years. The chest was sold at the auction following Dee's death to one Mr. John Woodall, and eventually found its way into a furniture shop in Adle Street on London. A Mr. Jones, confectioner, bought it for his wife, and for twenty years the chest with its secret treasure remained in her boudoir. Then one day, upon moving the chest, Mrs. Jones heard some loose thing rattle it, toward the right hand end, under the box or till. Her husband pried open the bottom, revealing a private drawer, which being drawn out, therein were found diverse books

* Casaubon, *op. cit.*, p. 418.

† *Ibidem*, p. 419.

in manuscript and papers, together with a little box, and therein a chaplet of olive beads, and a cross of wood hanging at the end of them.*

Ignorant of the value of the papers, they allowed their servant maid to waste about one half of them under pies, and other like uses but later kept the rest more safe. Four years later, Mrs. Jones was forced to flee the great fire of London and, though the chest perished in the flames, because not easily to be removed, yet the books were taken out and carried with the rest of her goods. She later remarried a Mr. Wale, who identified the manuscripts and transferred them to Elias Ashmole, a respected scholar, for transcription and preservation.†

Elias Ashmole also preserved a number of Dee's diaries (December 22, 1581 to May 23, 1583) that were in the library of one Samuel Story. Yet another 17th Century scholar, Meric Casaubon discovered [and published in the *True Relation*] additional diaries from April 20, 1583 to May 23, 1587 in the library of Sir Thomas Cotton, who had inherited them from his father, Sir Robert Cotton, one of Dee's contemporaries. Casaubon also located a very rare fragment of Dee's diaries from late in his life (March 20, 1607 to September 7, 1607), which had been underground, God knows how long.‡

The preservation of Dee's manuscripts by Ashmole & Casaubon illustrates that the importance of Dee's manuscripts was already recognized within 50 years of his death. These manuscripts have had an enormous effect upon the development of occultism in Great Britain and the United States. An interesting fragment, included at the back of Sloane MS. 3677 (Ashmole's copy of Sloane MS. 3188), describes the finding of treasure using magical names from the Enochian system. From internal references and style of handwriting, we know that this fragment dates from the mid-17th Century, indicating that the Enochian magical system was maintained in practical use after Dee's death. It is possible that elements of the system may have been introduced into the Rosicrucian teachings by Ashmole; in any case magicians of later centuries have constructed elaborate additions to Dee's original system.

APPENDIX C

GENERAL METHOD OF TRANSLATION & TRANSCRIPTION

THE ENTIRE CORPUS of Dee's magical work is far too large to present in a single volume. The *Enochian Evocation* is intended to present the essential core of Dee's evocation system arranged in a fashion similar to other renaissance evocation texts. It was transcribed, translated and edited according to the following procedure:

1. Manuscripts copies were obtained in microfilm from the British Library.
2. The various manuscripts were cross-compared to differentiate between essential and non-essential portions. The first level of cross-comparison was performed at this time.
3. The textual material from the essential portions of the manuscripts was transcribed.
4. Latin portions were translated.
5. The resulting corpus was subjected to further cross-comparison and linguistic analysis, and arranged to resemble a typical evocation text of the renaissance.
6. The text was edited for consistency and clarity.
7. The various sigils and figures for the text were carefully traced and restored from microfilm prints of the source manuscripts.
8. To clarify discrepancies, I traveled to London and examined Sloane MS. 3191 personally at the British Library.
9. The resulting material was brought to completion and published by Heptangle Books.

Notes on Book One

BOOK ONE consists of excerpts from four of Dee's diaries, all contained in Cotton Appendix XLVI and published in the *True Relation*:

Mensis Mysticus Saobaticus Pars primus ejusdem, op. cit. 73-114

Libri Mystici Apertorii Cracoviensis Sabbatici, op. cit., 115-152

Libri Semptimi Apertorii Cracoviensis Mystici Sabbatici, op. cit., 153-202

Libri Cracoviensis Mysticus Apertorius Præteria Præmium Madimianum, op. cit., 203-212

The intent of Book One is to provide the pseudo-history of the magic as related by Kelly's angels, as well as hints as to its purpose and practice. Nearly every renaissance magical text contains such a 'pedigree', which is entirely lacking in Sloane MS. 3191.

Notes on Book Two

BOOK TWO consists primarily of *De Heptarchia Mystica*, which is contained in Sloane MS. 3191, 32[ro] to 51[ro]. The sigil of Æmeth, the ring of Solomon, and the table are from *Mysteriorum Liber Primus* in Sloane MS. 3188. The first three chapters of *De Heptarchia Mystica* (as presented in MS. 3191) contain cross-references to dates in Sloane MS. 3188; these have been omitted as unnecessary. Sloane MS. 3677 and Sloane MS. 3678 (Elias Ashmole's copies of MSS. 3188 and 3199 respectively) were also used for additional readings.

Notes on Book Three

BOOK THREE is based upon the 49 *Claves Angelice*, contained in Sloane MS. 3191, 1[ro] to 13[ro]. Because so many versions of the Angelical Keys have been published in the past, I have taken a different approach in the present volume.

The first column of Book Three contains a cross-reference number for each Angelical word, showing the key that it is in, as well as its numerical position in that key. The second column shows a corrected version of the Enochian, the result of extensive cross-comparison and linguistic analysis. Corrections based upon NN

Cotton Appendix XLVI have been incorporated, as well as simple corrections based on common-sense grammatical rules. Variants from Sloane MS. 3191 reading have been documented in footnotes, except where the correction was sufficiently obvious. § Presumably an even more self-consistent version of the keys could be generated with further cross analysis. Column 2 represents what I believe to be the logical limit of amendment; further corrections would deviate too greatly from the keys as dictated by Kelly.

Column 3 contains an exact transcription of the Angelical version of the keys in Sloane MS. 3191; the pronunciation marks are Dee's own. Column 4 contains an exact transcription of the English version of the keys in Sloane MS. 3191; the punctuation and spelling is Dee's own. Lacunæ in the text are described in the footnotes. Note that Sloane MS. 3191 shows the Angelical left to right, with the English written above. I have returned the format to that used in Cotton Appendix XLVI—a downwardly enumerated matched list.

Additional readings for Book Three were taken from Sloane MS. 3678 (Ashmole's copy of Sloane MS. 3191) and the following books from Sloane MS. 3188:

Mensis Mysticus Saobaticus Pars primus ejusdem, Casaubon, *op. cit.* pgs. 73-114.

Libri Mystici Apertorii Cracoviensis Sabbatici, *ibid.*, pgs. 115-152.

Libri Semptimi Apertorii Cracoviensis Mystici Sabbatici, *ibid.*, 153-202.

Libri Cracoviensis Mystici Apertorius Præteria Præmium Madimianum, *ibid.*, pgs., 203-212.

Notes on Book Four

BOOK FOUR is the first part of the *Liber Scientiæ Auxilii et Victoriæ Terrestris*, contained in Sloane MS. 3191, 14[ro] to 31[ro]. The biblical quotes at the beginning refer obviously to the figure showing the ordering of the tribes of Israel. In Sloane MS. 3191, this figure appears on 31[ro]. I have redrawn it with English captions and inserted it next to the quotes that refer to it. The large table of sigils at the end of Book Four is actually [57vo] & 58[ro] in Sloane MS. 3191; since the sigils refer directly to the

§ An early version of the corrected keys appeared in *Gnostica Magazine* Number 47, September 1978.

third and fourth columns of the lists in Book Four, I have included it here as a bridge into Book Five. These sigils are overlays to the GREAT TABLE in Book Five.

Notes on Book Five

BOOK FIVE is taken from the remainder of *Liber Scientia* following *De Heptarchia Mystica* in Sloane MS. 3191, 52[ro] to [80vo]. The GREAT TABLE (not to be confused with the 'Great Table' published in the preface to the *True Relation*) proposed some interesting transcription problems. Sloane MS. 3191 contains three variants (if you include the sigils shown in Book Four), while two additional variants are given in Cotton Appendix XLVI. Within all the variant tables are corrections, slashed letters, and amendments, indicating a series of changes. The problem lies in that the final version (which wasn't completed until 1587, three years after the original table was dictated) does not match the names of the angels as given in Sloane MS. 3191. I have therefore chosen to give two versions of the table, the first matching the angels, and the second representing the final corrections made in 1587. The intermediary versions I have omitted as unessential. The ambitious scholar is free to retrofit the angelic names to the 'corrected' table, as it is sufficiently obvious how each name is generated from the table.* It should be noted that my presentation of this table as two separate versions departs significantly from the Golden Dawn tradition of including all the variant letters in each square. I judged this approach as unsatisfactory, because every other 'magic square' in renaissance magic contains only one element per square, and because many of the letters included in the G. D. version are clearly scratched out in the original manuscript. The tables in the present volume represent what I believe to be an accurate portrayal of what Dee and Kelly intended. The breakdown of Book Five into individual chapters is not in Sloane MS. 3191, but the material lends itself well to this approach, as there are distinct sets of tables and conjurations.

* *Vide* Israel Regardie, *How to Make and Use Talismans*, New York: Weiser, 1972.

APPENDIX D

BIBLIOGRAPHY

§1. Manuscripts

The Sloane and Cotton collections are in the British Library. The Bodleian and Ashmolean collections are at Oxford.

SLOANE MS. 3191.

This manuscript is the only book of ceremonial magic extant in Dee's handwriting. It consists of three separate 'books,' each detailing a different aspect of Dee's angelic magical system. The books are:—

49 *Claves Angelicæ Anno 1584 Cracoviæ (Liber 18)* which contains Dee's transcription of the Angelical Keys (often called the *Enochian Keys* or *Enochian Calls*).

Liber Scientiæ Auxilii et Victoriæ Terrestris which contains a complex system of magic based upon the Great Table (often called *The Table of Watchtowers*). It is entirely in Latin, and related to the *Call of the Thirty Aires*.

De Heptarchia Mystica which describes a complete system of planetary magic, along with excerpts from the various scrying sessions.

SLOANE MS. 3188.

This manuscript contains Dee's earliest scrying sessions. It contains six individual 'books,' which are:—

Mysteriorum Liber Primus covering December 22, 1581 to March 15, 1582, and containing a ceremony with Saul (Dee's first

scryer) and the first ceremonies with Edward Talbot, in which the table and Solomon's ring are described.

Mysteriorum Liber Secundus covering March 6, 1582 to March 21, 1582, and containin the first elements of the Heptarchic system, the spirits of the Sigil of Æmeth, and the first suggestion that an antediluvian language would be delivered to Dee. The title page is missing, but can be inferred from textual references in Sloane MS. 3677.

Mysteriorum Liber Tertius covering April 28, 1582 to May 4, 1582, and containing numerous sigils related but apparently not essential to the Heptarchic system, as well as the names of the 49 good angels.

Quartus Liber Mysteriorum covering November 15, 1583 to November 21, 1583, and containing the remainder of the Heptarchic system; this book is the first to record the name of Edward Kelly as the scryer.

Liber Mysteriorum Quintus covering March 23, 1583 to April 18, 1583, and containing the tables later transcribed by Kelly into Sloane MS. 3189.

Quinti Libri Mysteriorum Appendix covering April 20, 1583 to May 23, 1583, and containing the famous *Enochian* letters, as well as information concerning the construction of the *Great Table*.

COTTON APPENDIX XLVI, PARTS 1 & 2.

This manuscript is occasionally referred to as Royal Appendix XLVI, or Sloane MS. 5007. It contains thirteen 'books,' which are:—

Liber Mysteriorum (et Sancti) parallelus Novalisque covering May 28,

1583 to July 4, 1583, and containing the tail end of the Hepharchic system and the only recorded incident of Kelly speaking Greek.

Liber Peregrinationis Prime Videlicet A Mortlaco Angeliae Ad Craconiam Poloniæ covering September 21, 1583 to March 13, 1584, and containing the journey from Mortlack to Cracow Poland and various political speculations.

Mensis Mysticus Sabbaticus Pars primus ejusdem covering April 10, 1584 to April 30, 1584, and containing the dictations of the first four calls (backwards).

Libri Mystici Apertorii Cracoviensis Sabbatici covering May 7, 1584 to May 22, 1584, and containing the remainder of the call (except for the call of the Thirty aires) in the Angelical tongue, and the spirits of the Thirty aires.

Libri Septimi Cracoviensis Mystici Sabbatici covering May 23, 1584 to July 12, 1584, and containing the geographic locations of the spirits of the Thirty aires, the *Great Table* or *Watchtowers*, and the first third of the *Call of the Thirty Aires*.

Libri Cracoviensis Mysticus Apertorius Præterea Præmium Madimianum covering July 12, 1584 to August 15, 1584, and containing the remainder of the *Call of the Thirty Aires*, as well as the names of the Thirty aires.

Mysteriorum Pragensium Liber Primus Cæsareusque covering August 15, 1584 to October 8, 1584, and containing an attempt to convince the Holy Roman Emperor of the canonical nature of the visions.

Mysteriorum Pragensium Confirmatio covering December 20, 1584 to March 20, 1585, and containing mostly political speculation.

Mysteriorum Cracoveinsium Stephanicorum Mysteria Stephanica covering April 12, 1585 to June 6, 1585, and containing an alchemical formula and a letter from Dee's wife to the spirits.

Unica Actio, quæ Pucciana vocetor covering August 6, 1585 to September 6, 1585, and containing religious visions obviously meant to impress the Papal Nuncio who was then attending the ceremonies.

Liber Resurrectionis Pragæ, Pactum seu Fœdus Sabbatismi covering fragments from April 30, 1586 to January 21, 1587, and containing further ceremonies with the Papal Nuncio.

Actio Tertia Trebonæ Generalis covering April 4, 1587 to May 23, 1587, and containing a complex series of corrections to the *Watch-towers* and the infamous wife-swapping episode.

Jesus, Omnipotens sempiternæ & unæ Deus covering March 20, 1607 to September 7, 1607 and containing the last records of Dee's magical experiments.

§2. Related Manuscripts.

The following manuscripts are of general interest to the scholar of Dee's magical system:

SLOANE MS. 3677—Elias Ashmole's copy of Sloane MS. 3188.

SLOANE MS. 3678—Elias Ashmole's copy of Sloane MS. 3191.

SLOANE MS. 3189, *Liber Mysteriorum Sextus and Sanctus* or *The Book of Enoch revealed to John Dee by the Angels* which contains 49 double-sided tables of (apparently) random letters. It is in Edward Kelly's handwriting.

SLOANE MS. 2599—Copy of Sloane MS. 3189, possibly by Ashmole.

SLOANE MS. 78—contains fragments of Sloane MS. 3189.

SLOANE MS. 2575—contains fragments of Sloane MS. 3189.

§3. *More Related Manuscripts.*

I have not personally examined or researched the following manuscripts, but I include their references as points for future study. Some of the catalogue numbers may be out of date.

SLOANE MS. 307—A collection of Enochian material from other manuscripts.

SLOANE MS. 3190—A copy of the *True Relation* with notes.

BODELEIAN MS. 8465aa (Black Catalogue 580)—*Collation of his printed actions with spirits with the original MSS.* (Ashmole).

BODELEIAN MS. 8460* (Black Catalogue 1788, p 38, 65)—*Papers concerning the actions* (Ashmole).

BODELEIAN MS. 8461* (Black Catalogue 1790, 1-28, 34 &c.)—*Papers concerning the actions* (Ashmole).

BODELEIAN MS. 8462* *Papers concerning the actions* (Ashmole).

BODELEIAN MS. 487 *Notes from his fifth book of Mysteries* (Ashmole).

ASHMOLE MS. 580—Ashmole's copy of *True Relation* with notes and cross references.

ASHMOLE MS. 1788—Various papers relating to the action, compiled by Ashmole.

ASHMOLE MS. 1790—Ashmole's observations and recollections concerning Dee's magical work.

§4. *Published Works.*

The following published works also contributed to the writing of this volume:—

Meric Casaubon, ed., *A True and Faithful Relation of what passed for many Yeers Between Dr. John Dee and Some Spirits*: London, 1659; Republished by Askin: London, 1974. The published version of Cotton Appendix XLVI Parts 1 & 2.

Aleister Crowley, *The Equinox*, Weiser: New York, 1972, Vol. VII, pages 228 to 243 presents some scattered pieces of Sloane MS. 3191 with Golden Dawn elaborations. Volume VIII, pages 100-128 presents a 'self-pronouncing' interpretation of the Keys.

John Dee, *The Hieroglyphic Monad*, Weiser: New York, 1975; Dee's early philosophical-magical speculations.

John Dee, *The Mathematicall Præface to the Elements of Geometrie of Euclid of Megara*, Science History Publications: New York, 1975; John Dee's most influential work, but only marginally concerned with magic.

Peter J. French, *John Dee, The World of an Elizabethian Magus*, Routledge and Kegan Paul: London, 1972; A definitive look at Dee's life, including an excellent bibliography of manuscripts and published works about Dee.

James Orchard Halliwell, ed., *The Private Diary of Dr. John Dee*, AMS Press: London, 1968; Another of Dee's diaries, along with a catalogue of the books and manuscripts in his collection prior to its partial destruction.

Donald C. Laycock, *The Complete Enochian Dictionary*, Askin: London, 1978; Contains an accurate transcription of the

Angelical Keys in Sloane MS. 3191, but without pronunciation marks or lacunæ. The English rendering has been modernized. The dictionary also references Crowley's 'phonetic' Angelical. It includes an excellent bibliography of recent minor publications dealing with Enochian matters.

Israel Regardie, ed., *The Golden Dawn*, Llewellyn Publications: St. Paul, 1971; Book Nine contains an overview of then baroque Golden Dawn 'Enochian' magic, loosely based on Dee's original system. A version of the Keys is also included.

Leo Vinci, *GMICALZOMA! An Enochian Dictionary*, Regency Press: London & New York, 1976; An exhaustive early dictionary.

A. E. Waite, ed., *The Alchemical Writings of Edward Kelly*, Weiser: New York, 1975; provides a contrast to Kelly's work with Dee.

ADVERTISEMENT
TO THE
READER.

ALTHOUGH we cannot, with justice, compare Elias Ashmole to that excellent Antiquary John Leland, or William Lilly to the learned and indefatigable Thomas Hearne; yet I think we may fairly rank them with such writers as honest Antony Wood, whose Diary greatly resembles that of his cotemporary, and intimate friend, Elias Ashmole.

Some

Some anecdotes, connected with affairs of state; many particulars relating to illustrious persons, and antient and noble families; several occurrences in which the Public is interested, and other matters of a more private nature, can only be found in works of this kind. History cannot stoop to the meanness of examining the materials of which Memoirs are generally composed.

And yet the pleasure and benefit resulting from such books, are manifest to every reader.

I hope the admirers of the very laborious Thomas Hearne will pardon me, if I should venture to give it as my opinion, and with much deference to their judgment, that William Lilly's Life and Death of Charles the first, contains more useful matter of instruction, as well as more splendid and striking occurrences, than are to be found in several of those monkish

ish volumes published by that learned Oxonian.

Lilly affords us many curious particulars relating to the life of that unfortunate Prince, which are no where else to be found. In delineating the character of Charles, he seems dispassionate and impartial, and indeed it agrees perfectly with the general portraiture of him, as it is drawn by our most authentic Historians.

The History of Lilly's Life and Times is certainly one of the most entertaining narratives in our language. With respect to the science he professed of calculating nativities, casting figures, the prediction of events, and other appendages of Astrology, he would fain make us think that he was a very solemn and serious Believer. Indeed, such is the manner of telling his story, that sometimes the Reader may possibly be induced to suppose Lilly rather an Enthusiast than an Impostor. He
relates

relates many anecdotes of the pretenders to foretell events, raise spirits, and other impostures, with such seeming candor, and with such an artless simplicity of style, that we are almost persuaded to take his word when he protests such an inviolable respect to truth and sincerity.

The powerful genius of Shakespeare could carry him triumphantly through subjects the most unpromising, and fables the most improbable: we therefore cannot wonder at the success of such of his plays, where the magic of witches; and the incantation of spirits are described, or where the power of Fairies is introduced; when such was the Credulity of the times respecting these imaginary Beings, and when that belief was made a science of, and kept alive by artful and superstitious, knavish and enthusiastic teachers; what Lilly relates of these people, considered only as matter of fact, is surely very curious.

To conclude ; I know no Record but this where we can find so just, and so entertaining a History of Doctor Dee, Doctor Forman, Booker, Winder, Kelly, Evans, (Lilly's Master) the famous William Poole, and Captain Bubb Fiske, Sarah Shelborne, and many others.

To these we may add, the uncommon effects of the Crystal, the appearance of Queen Mabb, and other strange and miraculous, operations, which owe their origin to folly, curiosity, superstition, bigotry and imposture.

T. D.

THE
L I F E
OF
W I L L I A M L I L L Y,
STUDENT IN ASTROLOGY.

Wrote by himself in the 66th Year of his Age,
at HERSHAM, in the Parish of WALTON
UPON THAMES, in the County of SURRY.

Propria Mana.

I WAS born in the county of Leiceſter, in an obſcure town, in the north-weſt borders thereof, called Diſeworth, ſeven miles ſouth of the town of Derby, one mile from Caſtle-Donnington, a town of great rudeneſs, wherein it is not remembered that any of the farmers thereof did ever educate any of their ſons to learning, only my grandfather ſent his younger
B ſon

son to Cambridge, whose name was Robert Lilly, and died Vicar of Cambden in Gloucestershire, about 1640.

The town of Diseworth did formerly belong unto the Lord Seagrave, for there is one record in the hands of my cousin Melborn Williamson, which mentions one acre of land abutting north upon the gates of the Lord Seagrave; and there is one close, called Hall-close, wherein the ruins of some ancient Buildings appear, and particularly where the dove-house stood; and there is also the ruins of decayed fish-ponds and other outhouses. This town came at length to be the inheritance of Margaret, Countess of Richmond, Mother of Henry VII. which Margaret gave this town and lordship of Diseworth unto Christ's College in Cambridge, the Master and Fellows whereof have ever since, and at present, enjoy and possess it.

In the church of this town there is but one monument, and that is a white marble stone, now almost broken to pieces, which was placed there by Robert Lilly, my grandfather, in memory of Jane his wife, the daughter of Mr. Poole of Dalby, in the same county, a family now quite extinguished. My grandmother's brother was Mr. Henry Poole, one of the Knights of Rhodes, or Templars, who
being

being a soldier at Rhodes at the taking thereof by Solyman the Magnificent, and escaping with his life, came afterwards to England, and married the Lady Parron or Perham, of Oxfordshire, and was called, during his life, Sir Henry Poole. William Poole the Astrologer knew him very well, and remembers him to have been a very tall person, and reputed of great strength in his younger years.

The impropriation of this town of Diseworth was formerly the inheritance of three sisters, whereof two became votaries; one in the nunnery of Langly in the parish of Diseworth, valued at the suppression, I mean the whole nunnery, at thirty-two pounds per annum, and this sister's part is yet enjoyed by the family of the Grayes, who now, and for some years past, have the enjoyment and possession of all the lands formerly belonging to the nunnery in the parish of Diseworth, and are at present of the yearly value of three hundred and fifty pounds per annum. One of the sisters gave her part of the great tithes unto a religious house in Bredon upon the Hill; and, as the inhabitants report, became a religious person afterwards.

The third sister married, and her part of the tithes in succeeding ages became the

Earl of Huntingdon's, who not many years since sold it to one of his servants.

The donation of the vicarage is in the gift of the Grayes of Langley, unto whom they pay yearly, (I mean unto the Vicar) as I am informed, six pounds per annum. Very lately some charitable citizens have purchased one third portion of the tithes, and given it for a maintenance of a preaching minister, and it is now of the value of about fifty pounds per annum.

There have been two hermitages in this parish; the last hermit was well remembered by one Thomas Cooke, a very ancient inhabitant, who in my younger years acquainted me therewith.

This town of Diseworth is divided into three parishes; one part belongs unto Lockington, in which part standeth my father's house, over-against the west end of the steeple, in which I was born: some other farms are in the parish of Bredon, the rest in the parish of Diseworth.

In this town, but in the parish of Lockington, was I born, the first day of May, 1602.

My father's name was William Lilly, son of Robert, the son of Robert, the son of Rowland, &c. My mother was Alice, the daughter of Edward Barham, of Fiskerton Mills, in Nottinghamshire, two miles from Newark upon Trent: this Edward

ward Barham was born in Norwich, and well remembered the rebellion of Kett the Tanner, in the days of Edward VI.

Our family have continued many ages in this town as yeomen; besides the farm my father and his ancestors lived in, both my father and grandfather had much free land, and many houses in the town, not belonging to the college, as the farm wherein they were all born doth, and is now at this present of the value of forty pounds per annum, and in possession of my brother's son; but the freehold land and houses, formerly purchased by my ancestors, were all sold by my grandfather and father; so that now our family depend wholly upon a college lease. Of my infancy I can speak little, only I do remember that in the fourth year of my age I had the measles.

I was, during my minority, put to learn at such schools, and of such masters, as the rudeness of the place and country afforded; my mother intending I should be a scholar from my infancy, seeing my father's backslidings in the world, and no hopes by plain husbandry to recruit a decayed estate; therefore upon Trinity Tuesday, 1613, my father had me to Ashby de la Zouch, to be instructed by one Mr. John Brinsley; one, in those times, of great abilities for instruction of youth in

the Latin and Greek tongues ; he was very severe in his life and conversation, and did breed up many scholars for the universities : in religion he was a strict Puritan, not conformable wholly to the ceremonies of the Church of England. In this town of Ashby de la Zouch, for many years together, Mr. Arthur Hildersham exercised his ministry at my being there ; and all the while I continued at Ashby, he was silenced. This is that famous Hildersham, who left behind him a commentary on the fifty-first Psalm ; as also many sermons upon the fourth of John, both which are printed : he was an excellent textuary, of exemplary life, pleasant in discourse, a strong enemy to the Brownists, and dissented not from the Church of England in any article of faith, but only about wearing the surplice, baptizing with the cross, and kneeling at the sacrament ; most of the people in the town were directed by his judgment, and so continued, and yet do continue presbyterianly affected ; for when the Lord of Loughborough in 1642, 1643, 1644, and 1645, had his garrison in that town, if by chance at any time any troops of horse had lodged within the town, though they came late at night to their quarters ; yet would one or other of the town presently give Sir John Gell of Derby notice, so

that ere next morning most of his Majesty's troops were seized in their lodgings, which moved the Lord of Loughborough merrily to say, there was not a fart let in Asby but it was presently carried to Derby.

The several authors I there learned were these, viz. *Sententiæ Pueriles*, Cato, *Corderius*, *Æsop's Fables*, Tully's *Offices*, Ovid de *Tristibus*; lastly, Virgil, then Horace; as also Camden's *Greek Grammar*, *Theognis* and Homer's *Iliads*: I was only entered into Udall's *Hebrew Grammar*; he never taught Logick, but often would say it was fit to be learned in the universities.

In the fourteenth year of my age, by a fellow scholar of swarth, black complexion, I had like to have my right eye beaten out as we were at play; the same year, about Michaelmas, I got a surfeit, and thereupon a fever, by eating beech-nuts.

In the sixteenth year of my age I was exceedingly troubled in my dreams concerning my salvation and damnation, and also concerning the safety and destruction of the souls of my father and mother; in the nights I frequently wept, prayed and mourned, for fear my sins might offend God.

In the seventeenth year of my age my mother died.

In the eighteenth year of my age my master Brinsley was enforced from keeping school, being persecuted by the Bishop's officers, he came to London, and then lectured in London, where he afterwards died. In this year, by reason of my father's poverty, I was also enforced to leave school, and so came to my father's house, where I lived in much penury for one year, and taught school one quarter of a year, until God's providence provided better for me.

For the two last years of my being at school, I was of the highest form in the school, and chieftest of that form; I could then speak Latin as well as English; could make extempore verses upon any theme; all kinds of verses, Hexameter, Pentameter, Phaleuciacks, Iambicks, Sapphicks, &c. so that if any scholars from remote schools came to dispute, I was ringleader to dispute with them; I could cap verses, &c. If any minister came to examine us, I was brought forth against him, nor would I argue with him unless in the Latin tongue, which I found few of them could well speak without breaking Priscian's head; which, if once they did, I would complain to my master, *Non bene intelligit linguam Latinam, nec prorsus loquitur*. In the derivation of words, I found
most

most of them defective, nor indeed were any of them good grammarians: all and every of those scholars who were of my form and standing, went to Cambridge and proved excellent divines, only poor I, William Lilly, was not so happy; fortune then frowning upon father's present condition, he not in any capacity to maintain me at the university.

Of the Manner how I came unto London.

Worthy sir, I take much delight to recount unto you, even all and every circumstance of my life, whether good, moderate, or evil; *Deo gloria*.

My father had one Samuel Smatty for his Attorney, unto whom I went sundry times with letters, who perceiving I was a scholar, and that I lived miserably in the country, losing my time, nor any ways likely to do better, if I continued there; pitying my condition, he sent word for me to come and speak with him, and told me that he had lately been at London, where there was a gentleman wanted a youth, to attend him and his wife, who could write, &c.

I acquainted my father with it, who was very willing to be rid of me, for I could

could not work, drive the plough, or endure any country labour; my father oft would say, I was good for nothing.

I had only twenty shillings, and no more, to buy me a new suit, hose, doublet, &c. my doublet was fustian: I repaired to Mr. Smatty, when I was accoutred, for a letter to my master, which he gave me.

Upon Monday, April 3, 1620, I departed from Diseworth, and came to Leicester: but I must acquaint you, that before I came away I visited my friends, amongst whom I had given me about ten shillings, which was a great comfort unto me. On Tuesday, April the 4th, I took leave of my father, then in Leicester gaol for debt, and came along with Bradshaw the carrier, the same person with whom many of the Duke of Buckingham's kindred had come up with. Hark how the waggons crack with their rich lading! It was a very stormy week, cold and uncomfortable: I footed it all along; we could not reach London until Palm-Sunday, the 9th of April, about half an hour after three in the afternoon, at which time we entered Smithfield. When I had gratified the carrier and his servants, I had seven shillings and six pence left, and no more; one suit of cloaths
upon

upon my back, two shirts, three bands, one pair of shoes, and as many stockings. Upon the delivery of my letter my master entertained me, and next day bought me a new cloak, of which you may imagine (good Esquire) whether I was not proud of; besides, I saw and eat good white bread, contrary to our diet in Leicestershire. My master's name was Gilbert Wright, born at Market Bosworth in Leicestershire; my mistress was born at Ashby de la Zouch, in the same county, and in the town where I had gone to school. This Gilbert Wright could neither write nor read; he lived upon his annual rents, was of no calling or profession; he had for many years been servant to the Lady Pawlet in Hertfordshire; and when Serjeant Puckering was made Lord keeper, he made him keeper of his lodgings at Whitehall. When Sir Thomas Egerton was made Lord Chancellor, he entertained him in the same place; and when he married a widow in Newgate Market, the Lord Chancellor recommended him to the company of Salters, London, to admit him into their company, and so they did, and my master in 1624, was master of that company; he was a man of excellent natural parts, and would speak publickly upon any occasion very rationally and to the purpose. I
write

write this, that the world may know he was no taylor, or myself of that or any other calling or profession: My work was to go before my master to church; to attend my master when he went abroad; to make clean his shoes; sweep the street; help to drive bucks when we washed; fetch water in a tub from the Thames: I have helped to carry eighteen tubs of water in one morning, weed the garden; all manner of drudgeries I willingly performed; scrape trenchers, &c. If I had any profession, it was of this nature: I should never have denied my being a taylor, had I been one; for there is no calling so base, which by God's mercy may not afford a livelihood; and had not my master entertained me, I would have been of a very mean profession ere I would have returned into the country again; so here ends the actions of eighteen years of my life.

My master married his second wife for her estate; she was competently rich; she married him for considerations he performed not, (nocturnal society) so that they lived very uncomfortably; she was about seventy years of age, he sixty six or more; yet never was any woman more jealous of a husband than she; inasmuch, that whensoever he went into London, she was confident of his going
to

to women; by those means my life was the more uncomfortable, it being very difficult to please two such opposite natures: However, as to the things of this world I had enough, and endured their discontents with much serenity. My mistress was very curious to know of such as were then called cunning or wise men, whether she should bury her husband? She frequently visited such persons, and this occasion begot in me a little desire to learn something that way, but wanting money to buy books, I laid aside these motions, and endeavoured to please both master and mistress.

Of my Mistress's Death, and Occasion thereof by Means of a Cancer in her Breast.

In 1622 she complained of a pain in her left breast, whereon there appeared at first a hard knob no bigger than a small pea; it increased in a little time very much, was very hard, and sometimes would look very red; she took advice of surgeons, had oils, scar-cloths, plates of lead, and what not: In 1623 it grew very big, and spread all over her breast; then for many weeks pultices were applied to it, which in continuance of time broke the skin,
and

and then abundance of watery thin stuff came from it, but nothing else; at length the matter came to suppuration, but never any great store issued forth; it was exceeding noisome and painful; from the beginning of it until she died, she would permit no surgeon to dress it but only myself; I applied every thing unto it, and her pains were so great the winter before she died, that I have been called out of my bed two or three times in one night to dress it and change plaisters. In 1624 by degrees with scissars I cut all the whole breast away, I mean the sinews, nerves, &c. In one fortnight, or little more, it appeared, as it were, mere flesh, all raw, so that she could scarce endure any unguent to be applied. I remember there was a great cleft through the middle of the breast, which when that fully appeared she died, which was in September 1624; my master being then in the country, his kindred in London would willingly have had mourning for her; but by advice of an especial friend of his I contradicted them; nor would I permit them to look into any chest or trunk in the house: She was decently buried, and so fond of me in the time of her sickness, she would never permit me out of her chamber, gave me five pounds in old gold, and sent me unto a private trunk of hers

hers at a friend's house, where she had one hundred pounds in gold; she bid me bring it away and take it, but when I opened the trunk I found nothing therein; for a kinsman of hers had been there a few days before and carried all away: She was in a great passion at my relating thereof, because she could not gratify my pains in all her sickness, advised me to help myself when she was gone, out of my master's goods, which I never did.

Courteous Esquire, be not weary of reading hereof, or what followeth.

When my mistress died, she had under her arm-hole a small scarlet bag full of many things, which, one that was there delivered unto me. There was in this bag several figils, some of Jupiter in Trine, others of the nature of Venus, some of iron, and one of gold, of pure angel-gold, of the bigness of a thirty three shilling piece of King James's coin. In the circumference on one side was engraven, *Vicit Leo de tribu Judæ Tetragrammaton* +, within the middle there was engraven an holy lamb. In the other circumference there was *Amraphel* and three +. In the middle, *Sanctus Petrus, Alpha and Omega*.

The occasion of framing this sigil was thus; her former husband travelling into Suffex, happened to lodge in an inn, and
to

to lie in a chamber thereof; wherein, not many months before a country grazier had lain, and in the night cut his own throat; after this night's lodging he was perpetually, and for many years, followed by a spirit, which vocally and articulately provoked him to cut his throat; he was used frequently to say, 'I defy thee, I defy thee,' and to spit at the spirit; this spirit followed him many years, he not making any body acquainted with it; at last he grew melancholly and discontented; which being carefully observed by his wife, she many times hearing him pronounce, 'I defy thee,' &c. she desired him to acquaint her with the cause of his distemper, which he then did. Away she went to Dr. Simon Forman, who lived then in Lambeth, and acquaints him with it; who having framed this sigil, and hanged it about his neck, he wearing it continually until he died, was never more molested by the spirit: I sold the sigil for thirty two shillings, but transcribed the words *verbatim* as I have related. Sir, you shall now have a story of this Simon Forman, as his widow, whom I well knew, related it unto me. But before I relate his death, I shall acquaint you something of the man, as I have gathered them from some manuscripts of his own writing.

Of

Of Dr. Simon Forman.

He was a chandler's son in the city of Westminster. He travelled into Holland for a month in 1580, purposely to be instructed in astrology, and other more occult sciences; as also in physick, taking his degree of Doctor beyond seas: being sufficiently furnished and instructed with what he desired, he returned into England towards the latter end of the reign of Queen Elizabeth, and flourished until that year of King James, wherein the Countess of Essex, the Earl of Somerset, and Sir Thomas Overbury's matters were questioned. He lived in Lambeth with a very good report of the neighbourhood, especially of the poor, unto whom he was charitable. He was a person that in horary questions (especially thefts) was very judicious and fortunate; so also in sicknesses, which indeed was his masterpiece. In resolving questions about marriage he had good success: in other questions very moderate. He was a person of indefatigable pains. I have seen sometimes half one sheet of paper wrote of his judgment upon one question; in writing whereof he used much tautology, as you may see yourself (most excellent Esquire) if you read a great book of Dr.

Flood's, which you have, who had all that book from the manuscripts of Forman; for I have seen the same word for word in an English manuscript formerly belonging to Doctor Willoughby of Gloucestershire. Had Forman lived to have methodized his own papers, I doubt not but he would have advanced the Jatro-mathematical part thereof very compleatly; for he was very observant, and kept notes of the success of his judgments, as in many of his figures I have observed. I very well remember to have read in one of his manuscripts, what followeth.

‘ Being in bed one morning’ (says he) ‘ I was desirous to know whether I should ever be a Lord, Earl or Knight, &c. whereupon I set a figure; and thereupon my judgment:’ by which he concluded, that within two years time he should be a Lord or great man: ‘ But,’ says he, ‘ before the two years were expired, the Doctors put me in Newgate, and nothing came.’ Not long after, he was desirous to know the same things concerning his honour or greatship. Another figure was set, and that promised him to be a great Lord within one year. But he sets down, that in that year he had no preferment at all; only ‘ I became acquainted with a merchant’s wife, by whom I got well.’ There is another figure

figure concerning one Sir——Ayre his going into Turkey, whether it would be a good voyage or not: The Doctor repeats all his astrological reasons, and musters them together, and then gave his judgment it would be a fortunate voyage. But under this figure, he concludes, ‘ this proved not so, for he was ‘ taken prisoner by pirates ere he arrived in ‘ Turkey, and lost all.’ He set several questions to know if he should attain the philosophers stone, and the figures, according to his straining, did seem to signify as much; and then he tuggs upon the aspects and configurations, and elected a fit time to begin his operation; but by and by, in conclusion, he adds, ‘ so the ‘ work went very forward; but upon the ‘ □ of ♄ the setting-glass broke, and I ‘ lost all my pains:’ He sets down five or six such judgments, but still complains all came to nothing, upon the malignant aspects of ♀ and ♄. Although some of his astrological judgments did fail, more particularly those concerning himself, he being no way capable of such preferment as he ambitiously desired; yet I shall repeat some other of his judgments, which did not fail, being performed by conference with spirits. My mistress went once unto him, to know when her husband, then in Cumberland, would return,

he having promised to be at home near the time of the question ; after some consideration, he told her to this effect : ‘ Margery,’ ‘ for so her name was, thy husband will not ‘ be at home these eighteen days ; his kindred have vexed him, and he is come ‘ away from them in much anger : he is ‘ now in Carlisle, and hath but three pence ‘ in his purse.’ And when he came home he confessed all to be true, and that upon leaving his kindred he had but three pence in his purse. I shall relate one story more, and then his death.

One Coleman, clerk to Sir Thomas Beaumont of Leicestershire, having had some liberal favours both from his Lady and her daughters, bragged of it, &c. The Knight brought him into the star-chamber, had his servant sentenced to be pilloried, whipped, and afterwards, during life, to be imprisoned. The sentence was executed in London, and was to be in Leicestershire : Two keepers were to convey Coleman from the Fleet to Leicester. My mistress taking consideration of Coleman, and the miseries he was to suffer, went presently to Forman, acquainted him therewith ; who, after consideration, swore Coleman had lain both with mother and daughters ; and besides said, that the old Lady being afflicted with fits of the mother, called him into
her

her chamber to hold down the fits with his hands ; and that he holding his hands about the breast, she cried ‘ Lower, lower,’ and put his hands below her belly ; and then——He also told my mistress in what posture he lay with the young Ladies, &c. and said, ‘ they intend in Leicester to whip ‘ him to death ; but I assure thee, Margery, he shall never come there ; yet they ‘ set forward tomorrow,’ says he ; and so his two keepers did, Coleman’s legs being locked with an iron chain under the horse’s belly. In this nature they travelled the first and second day ; on the third day the two keepers, seeing their prisoner’s civility the two preceding days, did not lock his chain under the horse’s belly as formerly, but locked it only to one side. In this posture they rode some miles beyond Northampton, when, on a sudden, one of the keepers had a necessity to untruss, and so the other and Coleman stood still ; by and by the other keeper desired Coleman to hold his horse, for he had occasion also : Coleman immediately took one of their swords, and ran through two of the horses, killing them stark dead ; gets upon the other, with one of the r swords ; ‘ Farewell, gentlemen,’ quoth he, ‘ tell my master I have ‘ no mind to be whipped in Leicestershire,’ and so went his way. The two keepers

in all haste went to a gentleman's house near at hand, complaining of their misfortune, and desired of him to pursue their prisoner, which he with much civility granted; but ere the horses could be got ready, the mistress of the house came down, and enquiring what the matter was, went to the stable, and commanded the horses to be unfaddled, with this sharp speech—‘ Let the Lady Beaumont and her daughters live honestly, none of my horses shall go forth upon this occasion.’

I could relate many such stories of his performances; as also what he wrote in a book left behind him, *viz.* ‘ This I made the devil write with his own hand in Lambeth Fields 1596, in June or July, as I now remember.’ He professed to his wife there would be much trouble about Carr and the Countess of Essex, who frequently resorted unto him, and from whose company he would sometimes lock himself in his study a whole day. Now we come to his death, which happened as follows; the Sunday night before he died, his wife and he being at supper in their garden-house, she being pleasant, told him, that she had been informed he could resolve, whether man or wife should die first; ‘ Whether shall I’ (quoth she) ‘ bury you or no?’ ‘ Oh Trunco,’ for so he called her,

her, 'thou wilt bury me, but thou wilt
 'much repent it.' 'Yea, but how long first?'
 'I shall die,' said he, 'ere Thursday night.'
 Monday came, all was well. Tuesday
 came, he not sick. Wednesday came,
 and still he was well; with which his
 impertinent wife did much twit him in
 the teeth. Thursday came, and dinner
 was ended, he very well: he went down
 to the water-side, and took a pair of
 oars to go to some buildings he was in
 hand with in Puddle-dock. Being in the
 middle of the Thames, he presently fell
 down, only saying, 'An impost, an impost,'
 and so died. A most sad storm of wind
 immediately following. He died worth
 one thousand two hundred pounds, and
 left only one son called Clement. All
 his rarities, secret manuscripts, of what
 quality soever, Dr. Napper of Lindford
 in Buckinghamshire had, who had been
 a long time his scholar; and of whom
 Forman was used to say he would be a
 dunce: Yet in continuance of time he
 proved a singular astrologer and physi-
 cian. Sir Richard now living I believe
 has all those rarities in possession, which
 were Forman's, being kinsman and heir
 unto Dr. Napper. [His son Thomas
 Napper, Esq; most generously gave most of
 these manuscripts to Elias Ashmole, Esq;]
 I hope you will pardon this digression.

After my mistress was dead, I lived most comfortably, my master having a great affection for me.

The year 1625 now comes on, and the plague exceeding violent, I will relate what I observed the spring before it broke forth. Against our corner house every night there would come down, about five or six of the clock, sometime one hundred or more boys, some playing, others as if in serious discourse, and just as it grew dark would all be gone home; many succeeding years there was no such, or any concourse usually, no more than four or five in a company: In the spring of 1625, the boys and youths of several parishes in like number appeared again, which I beholding, called Thomas Sanders, my landlord, and told him, that the youth and young boys of several parishes did in that nature assemble and play, in the beginning of the year 1625. ‘God bless us,’ quoth I, ‘from a plague this year;’ but then there succeeded one, and the greatest that ever was in London. In 1625, the visitation encreasing, and my master having a great charge of money and plate, some of his own, some other men’s, left me and a fellow-servant to keep the house, and himself in June went into Leicestershire. He was in that year feoffee collector

lector for twelve poor alms-people living in Clement-Dane's Church-Yard; whose pensions I in his absence paid weekly, to his and parish's great satisfaction. My master was no sooner gone down, but I bought a bass-viol, and got a master to instruct me; the intervals of time I spent in bowling in Lincoln's-Inn-Fields, with Wat the cobbler, Dick the blacksmith, and such like companions: We have sometimes been at our work at six in the morning, and so continued till three or four in the afternoon, many times without bread or drink all that while. Sometimes I went to church and heard funeral sermons, of which there was then great plenty. At other times I went early to St. Antholine's in London, where there was every morning a sermon. The most able people of the whole city and suburbs were out of town; if any remained, it were such as were engaged by parish-offices to remain; no habit of a gentleman or woman continued; the woeful calamity of that year was grievous, people dying in the open fields and in the open streets. At last, in August, the bills of mortality so encreased, that very few people had thoughts of surviving the contagion: The Sunday before the great bill came forth, which was of five thousand and odd hundreds, there was appointed a sacra-

a sacrament at Clement Dane's; during the distributing whereof I do very well remember we sang thirteen parts of the one hundred and nineteenth Psalm. One Jacob, our minister (for we had three that day, the communion was so great) fell sick as he was giving the sacrament, went home, and was buried of the plague the Thursday following. Mr. James, another of the ministers, fell sick ere he had quite finished, had the plague, and was thirteen weeks ere he recovered. Mr. Whitacre, the last of the three, escaped not only then, but all the contagion following, without any sickness at all; though he officiated at every funeral, and buried all manner of people, whether they died of the plague or not. He was given to drink, seldom could preach more than one quarter of an hour at a time, &c. In November my master came home. My fellow-servant's and my diet came weekly to six shillings and six pence, sometimes to seven shillings, so cheap was diet at that time.

In February of that year, my master married again (one who after his death became my wife). In the same year he settled upon me, during my life, twenty pounds *per annum*, which I have enjoyed ever since, even to the writing hereof.

May

May 22, 1627, my master died at the corner house in the Strand, where I also lived so long. He died intestate; my mistress relinquishing the administration, it came to his elder brother, who assigned the estate over to me for payment of my master's debts; which being paid, I faithfully returned the remaining part unto his administrator; nor had one penny of the estate more than twenty pounds *per annum*, which was allowed me by contract, to undertake the payment of my master's debts.

Of my Marriage the first Time.

My mistress had been twice married to old men, was now resolved to be couzened no more; she was of a brown ruddy complexion, corpulent, of but mean stature, plain, no education, yet a very provident person, and of good condition: She had many suitors, old men, whom she declined; some gentlemen of decayed fortunes, whom she liked not, for she was covetous and sparing: By my fellow-servant she was observed frequently to say, she cared not if she married a man that would love her, so that he had never a penny; and would ordinarily talk of me when she was in bed: This servant

vant gave me encouragement to give the onset : I was much perplexed hereat, for should I attempt her, and be slighted, she would never care for me afterwards ; but again, I considered that if I should attempt and fail, she would never speak of it ; or would any believe I durst be so audacious as to propound such a question, the disproportion of years and fortune being so great betwixt us : However, all her talk was of husbands, and in my presence saying one day after dinner, she respected not wealth, but desired an honest man ; I made answer, I thought I could fit her with such a husband ; she asked me, where ? I made no more ado, but presently saluted her, and told her myself was the man : She replied, I was too young ; I said nay ; what I had not in wealth, I would supply in love ; and saluted her frequently, which she accepted lovingly ; and next day at dinner made me sit down at dinner with my hat on my head, and said, she intended to make me her husband ; for which I gave her many salutes, &c.

I was very careful to keep all things secret, for I well knew, if she should take counsel of any friend, my hopes would be frustrated, therefore I suddenly procured her consent to marry, unto which she assented ; so that upon the eighth day
of

of September 1627, at St. George's church in Southwark, I was married unto her, and for two whole years we kept it secret. When it was divulged, and some people blamed her for it, she constantly replied, that she had no kindred; if I proved kind, and a good husband, she would make me a man; if I proved otherwise, she only undid herself. In the third and fourth years after our marriage, we had strong suits of law with her first husband's kindred, but overthrew them in the end. During all the time of her life, which was until October 1633, we lived very lovingly, I frequenting no company at all; my exercises were sometimes angling, in which I ever delighted: My companions, two aged men. I then frequented lectures, two or three in a week; I heard Mr. Sute in Lombard-Street, Mr. Gouge of Black-Fryars, Dr. Micklethwait of the Temple, Dr. Oldworth, with others, the most learned men of these times, and leaned in judgment to Puritanism. In October 1627, I was made free of the Salters company in London.

How I came to study Astrology.

It happened on one Sunday 1632, as myself and a Justice of Peace's clerk were,
before

before service, discoursing of many things, he chanced to say, that such a person was a great scholar, nay, so learned, that he could make an Almanack, which to me then was strange: One speech begot another, till, at last, he said, he could bring me acquainted with one Evans in Gun-Powder-Alley, who had formerly lived in Staffordshire, that was an excellent wise man, and studied the Black Art. The same week after we went to see Mr. Evans. When we came to his house, he having been drunk the night before, was upon his bed, if it be lawful to call that a bed whereon he then lay; he roused up himself, and, after some compliments, he was content to instruct me in astrology; I attended his best opportunities for seven or eight weeks, in which time I could set a figure perfectly: Books he had not any, except Haly de judiciis Astrorum, and Orriganus's Ephemerides; so that as often as I entered his house, I thought I was in the Wilderness. Now something of the man: He was by birth a Welshman, a Master of Arts, and in sacred orders; he had formerly had a cure of souls in Staffordshire, but now was come to try his fortunes at London, being in a manner enforced to fly for some offences very scandalous committed by him in these parts, where he had lately lived;

for

for he gave judgment upon things lost, the only shame of astrology: He was the most saturnine person my eyes ever beheld, either before I practised or since; of a middle stature, broad forehead, beetle-browed, thick shoulders, flat nosed, full lips, down-looked, black curling stiff hair, splay-footed; to give him his right, he had the most piercing judgment naturally upon a figure of theft, and many other questions, that I ever met withal; yet for money he would willingly give contrary judgments, was much addicted to debauchery, and then very abusive and quarrelsome, seldom without a black eye, or one mischief or other: This is the same Evans who made so many antimonial cups, upon the sale whereof he principally subsisted; he understood Latin very well, the Greek tongue not at all: He had some arts above, and beyond astrology, for he was well versed in the nature of spirits, and had many times used the circular way of invoking, as in the time of our familiarity he told me. Two of his actions I will relate, as to me delivered. There was in Staffordshire a young gentlewoman that had, for her preferment, married an aged rich person, who being desirous to purchase some lands for his wife's maintenance; but this young gentlewoman, his wife, was
desired

desired to buy the land in the name of a gentleman, her very dear friend, but for her use: After the aged man was dead, the widow could by no means procure the deed of purchase from her friend; whereupon she applies herself to Evans, who, for a sum of money, promises to have her deed safely delivered into her own hands; the sum was forty pounds. Evans applies himself to the invocation of the angel Salmon, of the nature of Mars, reads his Litany in the Common-Prayer-Book every day, at select hours, wears his surplice, lives orderly all that time; at the fortnight's end Salmon appeared, and having received his commands what to do, in a small time returns with the very deed desired, lays it down gently upon a table where a white cloth was spread, and then, being dismissed, vanished. The deed was, by the gentleman who formerly kept it, placed among many other of his evidences in a large wooden chest, and in a chamber at one end of the house; but upon Salmon's removing and bringing away the deed, all that bay of building was quite blown down, and all his own proper evidences torn all to pieces. The second story followeth.

Some time before I became acquainted with him, he then living in the Minorities, was desired by the Lord Bothwell
and

and Sir Kenelm Digby to shew them a spirit. He promised so to do: the time came, and they were all in the body of the circle, when lo, upon a sudden, after some time of invocation, Evans was taken from out the room, and carried into the field near Battersea Causeway, close to the Thames. Next morning a countryman going by to his labour, and espying a man in black cloaths, came unto him and awaked him, and asked him how he came there? Evans by this understood his condition, enquired where he was, how far from London, and in what parish he was; which when he understood, he told the labourer he had been late at Battersea the night before, and by chance was left there by his friends. Sir Kenelm Digby and the Lord Bothwell went home without any harm, came next day to hear what was become of him; just as they in the afternoon came into the house, a messenger came from Evans to his wife, to come to him at Battersea. I enquired upon what account the spirit carried him away: who said, he had not, at the time of invocation, made any suffumigation, at which the spirits were vexed. It happened, that after I discerned what astrology was, I went weekly into Little-Britain, and bought many books of astrology, not acquainting Evans therewith.

Mr. A. Bedwell, Minister of Tottenham-High-Cross near London, who had been many years chaplain to Sir Henry Wotton, whilst he was Ambassador at Venice, and assisted Pietro Soave Polano, in composing and writing the Council of Trent, was lately dead; and his library being sold into Little-Britain, I bought amongst them my choicest books of astrology. The occasion of our falling out was thus: a woman demanded the resolution of a question, which when he had done, she went her way; I standing by all the while, and observing the figure, asked him why he gave the judgment he did, since the signification shewed quite the contrary, and gave him my reasons; which when he had pondered, he called me boy, and must he be contradicted by such a novice! But when his heat was over, he said, had he not so judged to please the woman, she would have given him nothing, and he had a wife and family to provide for; upon this we never came together after. Being now very meanly introduced, I applied myself to study those books I had obtained, many times twelve, or fifteen, or eighteen hours day and night; I was curious to discover, whether there was any verity in the art or not. Astrology in this time, *viz.* in 1633, was very rare in London, few professing
it

it that understood any thing thereof. Let it not repent you (O noble Esquire) if now I make a short digression of such persons as then professed astrology, that posterity may understand in what condition I found it, and in whose hands that little that remained was lodged.

There lived then in Houndsditch one Alexander Hart, who had been a soldier formerly, a comely old man, of good aspect; he professed questionnaire astrology, and a little of physick; his greatest skill was to elect young gentlemen fit times to play at dice, that they might win or get money. I went unto him for resolutions for three questions at several times, and he erred in every one. To speak soberly of him, he was but a cheat, as appeared suddenly after; for a rustical fellow of the city, desirous of knowledge, contracted with Hart to assist for a conference with a spirit, and paid him twenty pounds of thirty pounds the contract. At last, after many delays, and no spirit appearing, or money returned, the young man indicts him for a cheat at the Old-Bailey in London; the Jury found the bill, and at the hearing of the cause this jest happened: some of the bench enquired what Hart did? ‘He sat like an Alderman
‘in his gown,’ quoth the fellow; at which

the court fell into a great laughter, most of the court being Aldermen. He was to have been set upon the pillory for this cheat; but John Taylour, the Water Poet, being his great friend, got the Lord Chief Justice Richardfon to bail him, ere he stood upon the pillory, and so Hart fled presently into Holland, where he ended his days. It was my fortune, upon the sale of his books in 1634, to buy Argoll's *Primum Mobile* for fourteen shillings, which I only wanted.

In Lambeth Marsh at the same time lived one Captain Bubb, who resolved horary questions astrologically; a proper handsome man, well spoken, but withal covetous, and of no honesty, as will appear by this story, for which he stood upon the pillory. A certain butcher was robbed, going to a fair, of forty pounds; he goes to Bubb, who for ten pounds in hand paid, would help him to the thief; appoints the butcher such a night precisely, to watch at such a place, and the thief should come thither; commanded him by any means to stop him; the butcher attends according to direction. About twelve in the night there comes one riding very fiercely upon a full gallop, whom the butcher knocks down, and seized both upon man and horse:

The

The butcher brings the man and horse to the next town, but then the person whom the butcher attacked was John, the servant of Dr. Bubb; for which the Captain was indicted and suffered upon the pillory, and afterwards ended his days in great disgrace.

There was also one Jeffry Neve, at this time a student in physick and astrology; he had formerly been a merchant in Yarmouth, and Mayor of the town, but failing in estate, went into the Low-Countries, and at Franeker took the degree of Doctor in Physick; he had some little smattering in astrology; could resolve a question of theft, or love-question, something of sickness; a very grave person, laborious and honest, of tall stature and comely feature; he died of late years, almost in the very street near Tower-Hill: He had a design of printing two hundred verified questions, and desired my approbation ere they went to the press; that I first would see them, and then give testimony. When I had perused the first forty, I corrected thirty of them, would read over no more: I shewed him how erroneous they were, desired his emendation of the rest, which he performed not. These were afterwards, in R. Saunders's custody, bought

by him either of his son or of a stationer: (a)

There was then William Poole, a nibbler at astrology, sometimes a gardener, an apparitor, a drawer of linen; as quoifs, handkerchiefs; a plaisterer and a bricklayer; he would brag many times he had been of seventeen professions; was very good company for drolling, as you yourself very well remember (most honoured Sir); (b) he pretended to poetry; and that posterity may have a taste of it, you shall here have inserted two verses of his own making; the occasion of making them was thus. One Sir Thomas Jay, a Justice of the Peace in Rosemary-Lane, issued out his warrant for the apprehension of Poole, upon a pretended suggestion, that he was in company with some lewd people in a Tavern, where a silver cup was lost, Anglice stolen. Poole hearing of the warrant, packs up his little trunk of books, being all his library, and runs to Westminster; but hearing some months after that the Justice was dead and buried, he came and enquired

(a) But first offered to be sold to me for twenty shillings. When Mr. Saunders died I bought them of his son for less.—E. A——.

(b) 17 December this William Poole was married to Alice How, at St. George's Church in Southwark. Mr. Lilly gave her to him.

where

where the grave was; and after the discharge of his belly upon the grave, left these two verses upon it, which he swore he made himself,

Here lieth buried Sir Thomas Jay, Knight,
Who being dead, I upon his grave did write.

He died about 1651, or 1652, at St. Mary Overy's in Southwark; and this was part of his last will.

'Item; I give to Dr. Ardee all my books, and one manuscript of my own, worth one hundred of Lilly's Introduction.'

'Item; If Dr. Ardee give my wife any thing that is mine, I wish the devil may fetch him body and soul.' The Doctor, terrified with this curse, gave me all the books and his goods, which I presently gave to his widow.—*Interdum seria jocos.*

Now also lived this Dr. Ardee, but his true name was Richard Delahay, formerly an Attorney; he studied astrology and physick, being in necessity, and forced from Derbyshire, where he had lived, by the old Countess of Shrewsbury; he was of moderate judgment, both in astrology and physick. He had formerly been well acquainted with Charles Sledd, (a)

(a) Of this Charles Sledd, there is mention made in Dr. Dee's book of his discourse with spirits, set forth by Dr. Causabon, page 17.

an apothecary, who used the crystal, and had a very perfect sight. This Dr. Ardee hath many times affirmed unto me, (*esto fides*) that an angel, one time, appeared unto him, and offered him a lease of his life for one thousand years; he died about the age of fourscore years; left his widow, who married into Kent, (*a*) worth two or three thousand pounds, and William Poole's estate came to four or five pounds.

In the years 1632, and 1633, John Booker became famous for a prediction of his upon a solar eclipse in the 19th degree of Aries 1663, taken out of Leovitius de magnis conjunctionibus, viz. *Ob Reges & Principes, &c.* Both the King of Bohemia, and Gustavus King of Sweden, dying during the effects of that eclipse.

John Booker was born in Manchester, of good parentage, in the year 1601; was in his youth well instructed in the Latin tongue, which he understood very well: He seemed from his infancy to be designed for astrology; for from the time he had any understanding, he would be always poring on, and studying almanacks. He came to London at fitting years, and served an apprenticeship to an haber-

(a) To one Moreland,

dasher in Laurence-Lane, London; but either wanting stock to set up, disliking the calling, he left his trade, and taught to write at Hadley in Middlesex several scholars in that school: He wrote singularly well both Secretary and Roman. In process of time he served Sir Christopher Clethero, Knight, Alderman of London, as his clerk, being a city Justice of Peace: He also was clerk to Sir Hugh Hammerley, Alderman of London, both which he served with great credit and estimation; and by that means became not only well known, but as well respected of the most eminent citizens of London, even to his dying day.

He was an excellent proficient in astrology, whose excellent verses upon the twelve months, framed according to the configurations of each month, being blessed with success according to his predictions, procured him much reputation all over England: He was a very honest man, abhorred any deceit in the art he studied; had a curious fancy in judging of thefts, and as successful in resolving love-questions: He was no mean proficient in astronomy; he understood much in physick; was a great admirer of the antimonial cup; not unlearned in chymistry, which he loved well, but did not practise. He was inclined to a diabetes; and

and in the last three years of his life was afflicted with a dysentery, which at last consumed him to nothing: He died of good fame in 1667. Since his decease I have seen one nativity of his performance exactly directed, and judged with as much learning as from astrology can be expected.

His library of books came short of the world's approbation, and were by his widow sold to Elias Ashmole, Esq; who most generously gave her (*a*) far more money than they were worth; but out of his respects unto the deceased and his memory, he most willingly paid her the money. He left behind him two sons and two daughters. He left in writing very little but his annual prognostications. He began first to write about the year 1630; he wrote *Bellum Hibernicæ*, in the time of the long parliament, a very sober and judicious book: the epistle thereunto I gave him. He wrote lately a small treatise of Easter-Day, a very learned thing, wherein he shewed much learning and reading. To say no more of him, he lived an honest man, his fame not questioned at his death.

In this year 1633, I became acquainted with Nicholas Fiske, licentiate in physick,

(*a*) They cost me 140 pounds.

who was born in Suffolk, near Framingham (b) Castle, of very good parentage, who educated him at country schools, until he was fit for the university; but he went not to the academy, studying at home both astrology and physick, which he afterwards practised in Colchester; and there was well acquainted with Dr. Gilbert, who wrote *De Magnete*. He came afterwards unto London, and exercised his faculty in several places thereof. (For in his youth he would never stay long in one house.) In 1633 he was sent for out of Suffolk by Dr. Winston of Gresham College, to instruct the Lord Treasurer Weston's son in arithmetick, astronomy upon the globes, and their uses. He was a person very studious, laborious, of good apprehension, and had by his own industry obtained both in astrology, physick, arithmetick, astronomy, geometry and algebra, singular judgment: He would in astrology resolve horary questions very soundly; but was ever diffident of his own abilities: He was exquisitely skilful in the art of directions upon nativities, and had a good genius in performing judgment thereupon, but very unhappy he was, that he had

(b) There is no such place in Suffolk, it being mistaken for Framlingham in that county.

no genius in teaching his scholars, for he never perfected any: his own son Matthew hath often told me, that where his father did teach any scholars in his time, they would principally learn of him; he had Scorpio ascending, and was secretly envious to those he thought had more parts than himself; however, I must be ingenuous, and do affirm, that by frequent conversation with him, I came to know which were the best authors, and much to enlarge my judgment, especially in the art of directions: He visited me most days once after I became acquainted with him, and would communicate his most doubtful questions unto me, and accept of my judgment therein rather than his own: He singularly well judged and directed Sir Robert Holborn's nativity, but desired me to adjudge the first house, seventh and tenth thereof, which I did, and which nativity (since Sir Robert gave it me) came to your hands, and remains in your library; [oh learned Esquire] he died about the seventy-eighth year of his age, poor.

In this year also William Bredon, parson or vicar of Thornton in Buckinghamshire, was living, a profound divine, but absolutely the most polite person for nativities in that age, strictly adhering to Ptolomy, which he well understood; he
had

had a hand in composing Sir Christopher Heydon's defence of judicial astrology, being that time his chaplain; he was so given over to tobacco and drink, that when he had no tobacco, he would cut the bell-ropes and smoke them.

I come now to continue the story of my own life, but thought it not inconvenient to commit unto memory something concerning those persons who practised when first I became a student in astrology; I have wrote nothing concerning any of them, which I myself do not either know, or believe to be true.

In October 1633 my first wife died, and left me whatever was hers: it was considerable, very near to the value of one thousand pounds.

One whole year and more I continued a widower, and followed my studies very hard; during which time a scholar pawned unto me, for forty shillings, *Ars Notoria*, (*a*) a large volume wrote in parchment, with the names of those angels, and their pictures, which are thought and believed by wise men, to teach and instruct in all the several liberal sciences, and is attained by observing elected times,

(*a*) Among Dr. Napier's MSS. I had an *Ars Notoria*, written by S. Forman in large vellum.

and those prayers appropriated unto the several angels.

I do ingenuously acknowledge, I used those prayers according to the form and direction prescribed for some weeks, using the word *astrologia* for *astronomia*; but of this no more: That *Ars Notoria*, inserted in the latter end of Cornelius Agrippa signifieth nothing; many of the prayers being not the same, nor is the direction to these prayers any thing considerable.

In the year 1634, I taught Sir George Peckham, Knight, astrology, that part which concerns sickness, wherein he so profited, that in two or three months he would give a very true discovery of any disease, only by his figures: He practised in Nottingham, but unfortunately died in 1635, at St. Winifred's Well in Wales; in which well he continued so long mumbling his *Pater Nosters* and *Sancta Winifrida ora pro me*, that the cold struck into his body; and, after his coming forth of that well, never spoke more.

In this year 1634, I purchased the moiety of thirteen houses in the Strand for five hundred and thirty pounds.

In November, the 18th day, I was again the second time married, and had five hundred pounds portion with that wife; she was of the nature of Mars.

Two accidents happened to me in that year something memorable.

Davy Ramsey, his Majesty's clock-maker, had been informed, that there was a great quantity of treasure buried in the cloyster of Westminster-Abbey; he acquaints Dean Williams therewith, who was also then Bishop of Lincoln; the Dean gave him liberty to search after it, with this proviso, that if any was discovered, his church should have a share of it. Davy Ramsey finds out one John Scott, (a) who pretended the use of the Mosaical rods, to assist him herein: I was desired to join with him, unto which I consented. One winter's night Davy Ramsey, with several gentlemen, myself, and Scott, entered the cloysters; we played the hazel-rod round about the cloyster; upon the west-side of the cloysters the rods turned one over another, an argument that the treasure was there: The labourers digged at least six foot deep, and then we met with a coffin; but in regard it was not heavy, we did not open, which we afterwards much repented: From the cloysters we went into the Abbey church, where, upon a sudden, (there being no wind when we

(a) This Scott lived in Pudding-Lane, and had some time been a page (or such like) to the Lord Norris.

began) so fierce, so high, so blustering and loud a wind did rise, that we verily believed the west-end of the church would have fallen upon us; our rods would not move at all; the candles and torches, all but one, were extinguished, or burned very dimly: (a) John Scott, my partner, was amazed, looked pale, knew not what to think or do, until I gave directions and command to dismiss the Dæmons; which when done, all was quiet again, and each man returned unto his lodging late, about twelve o'clock at night; I could never since be induced to join with any in such-like actions.

The true miscarriage of the business, was by reason of so many people being present at the operation; for there was above thirty, some laughing, others deriding us; so that if we had not dismissed the Dæmons, I believe most part of the Abbey church had been blown down; secrecy and intelligent operators, with a strong confidence and knowledge of what they are doing, are best for this work.

In 1634, or 1635, a Lady living in Greenwich, who had tried all the known artists in London, but to no purpose, came weeping and lamenting her con-

(a) Davy Ramsey brought an half quartern sack to put the treasure in,

dition, which was this: She had permitted a young Lord to have the use of her body, till she was with child by him; after which time he could not or would not endure her sight, but commanded his lacquies and servants to keep his doors fast shut, lest she should get into his chamber; or if they chanced to see her near his lodging, to drive her away, which they several times had done. Her desire unto me was to assist her to see him, and then she should be content; whereupon I ordered such a day, such an hour of that day, to try her fortune once more. She obeyed; and when she came to the King's Bench, where the Lord there was imprisoned, the outward door stood wide open: none speaking a word unto her, she went up stairs, no body molesting her; she found the Lord's chamber door wide open: he in bed, not a servant to be heard or seen, so she was pleased. Three days after she came to acquaint me with her success, and then drew out of her pocket a paper full of ratbane, which, had she not had admision unto him that day I appointed, she would in a pint of white wine have drank at the stair's foot where the Lord lodged. The like misfortune befell her after that; when the Lord was out of the prison: then I ordered her such a day to go and see a play

at Salisbury-Court; which she did, and within one quarter of an hour the Lord came into the same box wherein she was. But I grew weary of such employments, and since have burned my books which instructed these curiosities: For after that I became melancholly, very much afflicted with the hypocondraick melancholly, growing lean and spare, and every day worse; so that in the year 1635 my infirmity continuing, and my acquaintance increasing, I resolved to live in the country, and in March and April 1636 removed my goods unto Herfham, where I now live; and in May my person, where I continued until 1641, no notice being taken who, or what I was.

In the years 1637 and 1638, I had great lawfuits both in the Exchequer and Chancery, about a lease I had of the annual value of eighty pounds: I got the victory.

In the year 1640 I instructed John Humphreys, master of that art, in the study of astrology: upon this occasion, being at London, by accident in Fleet-Street, I met Dr. Percival Willoughby of Derby; we were of old acquaintance, and he but by great chance lately come to town, we went to the Mitre-Tavern in Fleet-Steet, where I sent for old Will Poole the astrologer, living then in Ram-Alley:

Alley: being come to us, the Doctor produced a bill, set forth by a master of arts in Cambridge, intimating his abilities for resolving of all manner of questions astrologically: The bill was shewed, and I wondering at it, Poole made answer, he knew the man, and that he was a silly fool; 'I' quoth he, 'can do more than he; he sees me every day, he will be here by and by;' and indeed he came into our room presently: Poole had just as we came to him set a figure, and then shewed it me, desiring my judgment; which I refused, but desired the master of arts to judge first; he denied, so I gave mine, to the very great liking of Humphreys, who presently enquired, if I would teach him, and for what? I told him I was willing to teach, but would have one hundred pounds. I heard Poole, whilst I was judging the figure, whisper in Humphreys's ear, and swear I was the best in England. Staying three or four days in town, at last we contracted for forty pounds, for I could never be quiet from his solicitations; he invited me to supper, and before I had shewed him any thing, paid me thirty five pounds. As we were at supper a client came to speak with him, and so up into his closet he went with his client; I called him in before he set his figure, or resolved

the question, and instantly acquainted him how he should discover the moles or marks of his client: he set his figure, and presently discovers four moles the querent had; and was so overjoyed therewith, that he came tumbling down the stairs, crying, 'Four by G—, four by 'G—, I will not take one hundred pounds 'for this one rule.' In six weeks time, and tarrying with him three days in a week, he became a most judicious person.

This Humphreys was a laborious person, vain-glorious, loquacious, fool-hardy, desirous of all secrets which he knew not, insomuch that he would have given me two hundred pounds to have instructed him in some curiosities he was persuaded I had knowledge of, but, *Artis est celere artem*, especially to those who live not in the fear of God, or can be masters of their own counsels: He was in person and condition such another as that monster of ingratitude my *quondam* taylor, John Gadbury. After my refusal of teaching him, what he was not capable of, we grew strange, though I afforded him many civilities whenever he required it; for after the siege of Colchester he wrote a book against me, called *Anti Merlinus-Anglicus*, married a second wife, his first living in Cambridgeshire, then practised physick by a contrary name, having

having intentions to practise in Ireland, he went to Bristol, but there understanding the parliament's forces had reduced that kingdom, he came back to London, but durst not abide therein; but running from his second wife, who also had another husband, he went to sea, with intention for Barbadoes, but died by the way in his voyage. I had never seen John Booker at that time; but telling him one day I had a desire to see him, but first, ere I would speak with him, I would fit myself with my old rules, and rub up my astrology; for at that time [and this was 1640] I thought John Booker the greatest and most compleat astrologer in the world. My scholar Humphreys presently made answer, 'Tutor, you need not pump for any of your former knowledge, John Booker is no such pumper; we met,' saith he, 'the other day, and I was too hard for him myself, upon judgment of three or four questions.' If all the transactions happening unto that my scholar were in one volume, they would transcend either Guzman, Don Quixote, Lazarillo de Tormes, or any other of the like nature I ever did see.

Having now in part recovered my health, being weary of the country, and perceiving there was money to be got in

London, and thinking myself to be as sufficiently enabled in astrology as any I could meet with, I made it my business to repair thither; and so in September 1641 I did; where, in the years 1642 and 1643, I had great leisure to better my former knowledge: I then read over all my books of astrology, over and over; had very little or no practice at all: And whereas formerly I could never endure to read Valentine Naibod's Commentary upon Alcabitius, now having seriously studied him, I found him to be the profoundest author I ever met with; him I traversed over day and night, from whom I must acknowledge to have advanced my judgment and knowledge unto that height I soon after arrived at, or unto: A most rational author, and the sharpest expositor of Ptolomy that hath yet appeared. To exercise my genius, I began to collect notes, and thought of writing some little thing upon the σ of η and ψ then approaching: I had not wrote above one sheet, and that very meanly, but James Lord Galloway came to see me; and, by chance, casting his eyes upon that rude collection, he read it over, and so approved of it, yea, so encouraged me to proceed farther, that then, and after that time, I spent most of my time in composing thereof,

thereof, and bringing it, in the end, into that method wherein it was printed 1644. I do seriously now profess, I had not the assistance of any person living, in the writing or composing thereof. Mr. Fiske sent me a small manuscript which had been Sir Christopher Heydon's, who had wrote something of the conjunction of h and 4 , 1603; out of which, to bring my method in order, I transcribed, in the beginning, five or six lines, and not any more, though that graceless fellow Gadbury wrote the contrary; but, *Semel & semper nebulo & mendax*. I did formerly write one treatise, in the year 1639, upon the eclipse of the sun, in the 11th degree of Gemini, 22 May 1639: It consisted of six sheets of paper. But that manuscript I gave unto my most munificent patron, and ever bountiful friend William Pennington, of Muncaſter in Cumberland, Esq; a wise and excellently learned person; who, from the year 1634, even till he died, continued unto me the most grateful person I ever was acquainted with. I became acquainted with him by means of Davy Ramsey.

Oh! most noble Esquire, let me now beg your pardon, if I digress for some small time, in commemorating his bounty unto me, and my requital of his

friendship, by performing many things successfully for his advantage.

In 1639 he was made captain, and served His Majesty in his then wars against the Scots; during which time a farmer's daughter being delivered of a bastard, and hearing, by report, that he was slain, fathered the child upon him. Shortly after he returned, most woefully vexed to be thus abused, when absent. The woman was countenanced by some gentlemen of Cumberland, in this her villany against him; so that, notwithstanding he had warrants to attach her body, he could never discover her: But yet, hunting her from one place to another, her friends thought it most convenient to send her to London, where she might be in most safety. She came up to the city, and immediately I had notice thereof, and the care of that matter left unto me. I procured the Lord Chief Justice Bramston's warrant, and had it lying dormant by me. She had not been in the city above one fortnight, but that I, going casually to the clerk of the assizes office for Cumberland, saw there an handsome woman; and hearing of her speak the northern tone, I concluded she was the party I did so want. I rounded the clerk in his ear, and told him I would give him five shillings to
hold

hold the woman in chat till I came again, for I had a writing concerned her. I hasted for my warrant, and a constable, and returned into the office, seized her person before the clerk of the assizes, who was very angry with me: It was then sessions at Old-Bayley, and neither Judge nor Justice to be found. At night we carried her before the Recorder, Gardner. It being Saturday at night, she, having no bail, was sent to Bridewell, where she remained till Monday. On Monday morning, at the Old-Bayley, she produced bail; but I desiring of the Recorder some time to enquire after the bail, whether they were sufficient, returned presently, and told him one of the bail was a prisoner in Ludgate, the other a very poor man: At which he was so vexed, that he sent her to Newgate, where she lay all that week, until she could please me with good sureties; which then she did, and so was bound over to appear at the next assizes in Cumberland; which she did, and was there sentenced to be whipped, and imprisoned one whole year.

This action infinitely pleased Mr. Pennington, who thought I could do wonders; and I was most thankfully requited for it. All the while of this scandalous business, do what he could, he could not discover

discover what persons they were that supported her; but the woman's father coming to town, I became acquainted with him, by the name of Mr. Sute, merchant; invited him to a dinner; got George Farmer with me; when we so plied him with wine, he could neither see or feel. I paid the reckoning, being twenty two shillings. But next morning the poor man had never a writing or letter in his pocket. I sent them down to my friend, who thereby discovered the plots of several gentlemen in the business; after which, Mr. Sute returned to his old name again.

Mr. Pennington was a true royalist, whom Charles the Second made one of his Commissioners of Array for Cumberland. Having directions from me continually how matters did and would go betwixt the King and Parliament, he acted warily, and did but sign one only warrant of that nature, and then gave over. When the times of sequestrations came, one John Musgrave, the most bold and impudent fellow, and most active of all the north of England, and most malicious against my friend, had got this warrant under Mr. Pennington's hand into his custody; which affrighted my friend, and so it might, for it was cause enough of sequestration, and would have
done

done it. Musgrave intending and promising himself great matters out of his estate, I was made acquainted herewith. Musgrave being in London, by much ado, I got acquainted with him, pretending myself a bitter enemy against Pennington, whereat he very heartily rejoiced; and so we appointed one night to meet at the Five Bells, to compare notes; for I pretended much. We did meet, and he very suddenly produced upon the table all his papers, and withal, the warrant of array unto which my friend had set his hand; which when I saw, 'I marry,' said I, 'this is his hand I will swear; now have at all; come, the other cup, this warrant shall pay for all.' I observed where the warrant lay upon the table, and, after some time took occasion ignorantly to let the candle fall out, which whilst he went to light again at the fire, I made sure of the warrant, and put it into my boot; he never missing it of eight or ten days; about which time, I believe, it was above half way towards Cumberland, for I instantly sent it by the post, with this friendly caveat, 'Sin no more.' Musgrave durst not challenge me in those times, and so the business was ended very satisfactory to his friend, and no less to myself.

He

He was, besides, extreamly abused by one Isaac Antrobus, parson of Egremond, a most evil liver, bold, and very rich; at last he procured a minister of that country, in hope of the parsonage, to article against him in London, before the committee of plundered ministers. I was once more invited to solicit against Antrobus, which I did upon three or more articles.

I. That Antrobus baptized a cock, and called him Peter.

II. He had knowledge of such a woman and of her daughter, *viz.* of both their bodies, in as large a manner as ever of his own wife.

III. Being drunk, a woman took a cord and tied it about his privy members unto a manger in a stable.

IV. Being a continual drunkard.

V. He never preached, &c.

Antrobus was now become a great champion for the Parliament; but, at the day of hearing, I had procured abundance of my friends to be there; for the godly, as they termed themselves, sided with him; the present Master of the Rolls was Chairman that day, Sir Harbottle Grimston.

Who

Who hearing the foulness of the cause, was very much ashamed thereof. I remember Antrobus, being there, pleaded he was in his natural condition when he acted so ungraciously.

‘What condition were you in,’ said the Chairman, ‘when you lay with mother and daughter?’

‘There is no proof of that,’ said he.

‘None but your own confession,’ said the Chairman, ‘nor could any tell so well.’

‘I am not given to drunkenness,’ quoth he. ‘He was so drunk within this fortnight’ quoth I, ‘he reeled from one side of the street to the other; here is the witness to prove it:’ who presently, before the committee, being sworn, made it good, and named the place and street where he was drunk. So he was adjudged scandalous, and outed of his benefice, and our minister had the parsonage.

You cannot imagine how much the routing of this drunken parson pleased Mr. Pennington, who paid all charges munificently and thankfully.

But now follows the last and greatest kindness I ever did him. Notwithstanding the committee for sequestrations in Cumberland were his very good friends, yet the sub-sequestrators, of their own heads,
and

and without order, and by strength of arms, secured his iron, his wood, and so much of his personal estate as was valued at seven thousand pounds. Now had I complaint upon complaint: would I suffer my old friend to be thus abused? it was in my power to free him from these villains.

I hereupon advised what was best to do, and was counselled to get Mr. Speaker Lenthall's letter to the sub-sequestrators, and command them to be obedient to the committee of the county.

Whereupon, I framed a letter myself, unto the sub-sequestrators directed, and with it, myself and Mr. Laurence Maydwell (whom yourself well knew) went to Mr. Speaker, unto whom we sufficiently related the stubbornness of the officers of Cumberland; their disobedience to the committee; and then shewed him the letter, which when he had read over, he most courteously signed, adding withal, that if they proceeded further in sequestring Mr. Pennington, he would command a Serjeant at Arms to bring them up to answer their contempts: I immediately posted that letter to my friend, which when the absurd fellows received, they delivered him possession of his goods again; and, for my pains, when he came to London, gave me one hundred

hundred pounds: He died in 1652, of a violent fever. I did carefully, in 1642 and 1643, take notice of every grand action which happened betwixt King and Parliament, and did first then incline to believe, that as all sublunary affairs did depend upon superior causes, so there was a possibility of discovering them by the configurations of the superior bodies; in which way making some essays in those two years, I found encouragement to proceed further, which I did; I perused the writings of the ancients, but therein they were silent, or gave no satisfaction; at last, I framed unto myself that method, which then and since I follow, which, I hope, in time may be more perfected by a more penetrating person than myself.

In 1643, I became familiarly known to Sir Bulstrode Whitlocke, a member of the House of Commons; he being sick, his urine was brought unto me by Mrs. Lisle, (a) wife to John Lisle, afterwards one of the keepers of the Great Seal;

(a) She was afterwards beheaded at Winchester, for harbouring one Nelthrop, a rebel in the Duke of Monmouth's army 1685. She had made herself remarkable, by saying at the martyrdom of King Charles I. 1648, 'that her blood leaped within her to see the tyrant fall;' for this, when she fell into the state trap, she neither did nor could expect favour from any of that martyr's family. D. N.

having

having set my figure, I returned answer, the sick for that time would recover, but by means of a surfeit would dangerously relapse within one month; which he did, by eating of trouts at Mr. Sand's house, near Leatherhead in Surrey. Then I went daily to visit him, Dr. Prideau despairing of his life; but I said there was no danger thereof, and that he would be sufficiently well in five or six weeks; and so he was.

In 1644, I published *Merlinus Anglicus Junior* about April. I had given one day the copy thereof unto the then Mr. Whitlocke, who by accident was reading thereof in the House of Commons: ere the Speaker took the chair, one looked upon it, and so did many, and got copies thereof; which when I heard, I applied myself to John Booker to license it, for then he was licenser of all mathematical books; I had, to my knowledge, never seen him before; he wondered at the book, made many impertinent obliterations, framed many objections, swore it was not possible to distinguish betwixt King and Parliament; at last licensed it according to his own fancy; I delivered it unto the printer, who being an arch Presbyterian, had five of the ministry to inspect it, who could make nothing of it, but said it might be printed, for in that I meddled

not with their Dagon. The first impression was sold in less than one week; when I presented some to the members of Parliament, I complained of John Booker the licenser, who had defaced my book; they gave me order forthwith to reprint it as I would, and let them know if any durst resist me in the reprinting, or adding what I thought fit; so the second time it came forth as I would have it.

I must confess, I now found my scholar Humphreys's words to be true concerning John Booker, whom at that time I found but moderately versed in astrology; nor could he take the circles of position of the planets, until in that year I instructed him. After my Introduction in 1647 became publick, he amended beyond measure, by study partly, and partly upon emulation to keep up his fame and reputation; so that since 1647, I have seen some nativities by him very judiciously performed. When the printer presented him with an Introduction of mine, as soon as they were forth of the press; 'I wish,' saith he, 'there was never another but this in England, conditionally I gave one hundred pounds for this.' After that time we were very great friends to his dying day.

In June 1644, I published Supernatural Sight; and, indeed, if I could have procured the dull stationer to have been at charges to have cut the icon or form of that prodigious apparition, as I had drawn it forth, it would have given great satisfaction; however, the astrological judgment thereupon had its full event in every particular.

That year also I published the White King's Prophecy, of which there were sold in three days eighteen hundred, so that it was oft reprinted: I then made no commentary upon it.

In that year I printed the Prophetical Merlin, and had eight pounds for the copy.

I had then no farther intention to trouble the press any more, but Sir Richard Napper having received one of Captain Wharton's Almanacks for 1645, under the name Naworth, he came unto me: 'Now, Lilly, you are met withal, see here what Naworth writes.' The words were, he called me 'an impudent senseless fellow, and by name William Lilly.'

Before that time, I was more Cavalier than Roundhead, and so taken notice of; but after that I engaged body and soul in the cause of Parliament, but still with much affection to his Majesty's person and

and unto monarchy, which I ever loved and approved beyond any government whatsoever; and you will find in this story many passages of civility which I did, and endeavoured to do, with the hazard of my life, for his Majesty: But God had ordered all his affairs and counsels to have no successes; as in the sequel will appear.

To vindicate my reputation, and to cry quittance with Naworth, against whom I was highly incensed, to work I went again for *Anglicus* 1645; which as soon as finished I got to the press, thinking every day one month till it was publick: I therein made use of the King's nativity, and finding that his ascendant was approaching to the quadrature of Mars, about June 1645, I gave this unlucky judgment; 'If now we fight, a victory stealeth upon us;' and so it did in June 1645, at Naseby, the most fatal overthrow he ever had.

In this year 1645, I published a treatise call the *Starry Messenger*, with an interpretation of three suns seen in London 29 May 1644, being Charles the Second's birth-day: In that book I also put forth an astrological judgment concerning the effects of a solar eclipse, visible the 11th of August 1645. Two days before its publishing, my antagonist,

Captain Wharton, having given his astrological judgment upon his Majesty's present march from Oxford; therein again fell foul against me and John Booker: Sir Samuel Luke, Governor of Newport-pagnel, had the thing came to his garriſon from Oxford, which preſently was preſented unto my view. I had but twelve hours, or thereabout, to answer it, which I did with ſuch ſucceſs as is incredible; and the printer printed both the March and my answer unto it, and produced it to light, with my Starry Meſſenger, which came forth and was made publick the very day of the Parliament's great victory obtained againſt his Majesty in perſon at Naſeby, under the conduct of the Lord Thomas Fairfax.

That book no ſooner appeared, but within fourteen days complaint was made to the committee of examinations, Miles Corbet then being Chairman, my mortal enemy, he who after was hanged, drawn, and quartered, for being one of the King's Judges; he grants his warrant, and a meſſenger to the Serjeant at Arms ſeizeth my perſon. As I was going to Weſtminſter with the meſſenger, I met Sir Philip Stapleton, Sir Chriſtopher Wray, Mr. Denzil Hollis, Mr. Robert Reynolds, who, by great fortune, had the Starry Meſſenger ſheet by ſheet from me as it
came

came from the press. They presently fell a smiling at me; 'Miles Corbet, Lilly, will punish thee soundly; but fear nothing, we will dine, and make haste to be at the Committee time enough to do the business;' and so they most honourably performed; for they, as soon as they came, sat down, and put Mr. Reynolds purposely into the chair, and I was called in; but Corbet being not there, they bid me withdraw until he came; which when he did, I was commanded to appear, and Corbet desired to give the cause of my being in restraint, and of the Committee's order. Mr. Reynolds was purposely put into the chair, and continued till my business was over.

Corbet produced my *Anglicus* of 1645, and said there were many scandalous passages therein against the Commissioners of the Excise in London. He produced one passage, which being openly read by himself, the whole committee adjudged it to signify the errors of sub-officers, but had no relation to the Commissioners themselves, which I affirmatively maintained to be the true meaning as the committee declared.

Then Corbet found out another dangerous place, as he thought, and the words were thus in the printed book—
'In the name of the Father, Son, and

‘ Holy Ghost, will not the Excise pay
‘ the soldiers ?’

Corbet very ignorantly read, ‘ will not
‘ the Eclipse pay soldiers ?’ at which the
Committee fell heartily to laugh at him,
and so he became silent.

There was a great many Parliament
men there ; the chamber was full. ‘ Have
‘ you any more against Mr. Lilly ?’ cried
the chairman.

‘ Yes,’ saith the Sollicitor for the Ex-
cise, ‘ since his Starry Messenger came
‘ forth we had our house burnt, and the
‘ Commissioners pulled by their cloaks in
‘ the Exchange.’ ‘ Pray, Sir, when was
‘ this,’ asked old Sir Robert Pye, ‘ that
‘ the house was burnt, and the Aldermen
‘ abused ?’ ‘ It was in such a week,’ saith
he. ‘ Mr. Lilly, when came the book
‘ forth ?’ ‘ The very day of Naseby fight,’
answered Mr. Reynolds, ‘ nor needs he
‘ be ashamed of writing it: I had it
‘ daily as it came forth of the press: It
‘ was then found the house to be burnt,
‘ and the Aldermen abused, twelve days
‘ before the Starry Messenger came forth.’
‘ What a lying fellow art thou,’ saith
Sir Robert Pye, ‘ to abuse us so !’ This
he spoke to the Sollicitor. Then stood
up one Bassell, a merchant: he inveighed
bitterly against me, being a Presbyterian,
and would have had my books burnt.

‘ You

‘ You smell more of a citizen than a scholar,’ replied Mr. Francis Drake. I was ordered to withdraw, and by and by was called in, and acquainted the Committee did discharge me. But I cried with a loud voice, ‘ I was under a messenger ;’ whereupon the Committee ordered him or the Serjeant at Arms not to take any fees ; Mr. Reynolds saying, ‘ Literate men never pay any fees.’

But within one week after, I was likely to have had worse success, but that the before-named gentlemen stoutly befriended me. In my Epistle of the Starry Messenger, I had been a little too plain with the Committee of Leicestershire ; who thereof made complaint unto Sir Arthur Hazelrigg, Knight for that county ; he was a furious person, and made a motion in the House of Commons against me, and the business was committed to that Committee, whereof Baron Rigby was Chairman. A day was assigned to hear the matter ; in the morning whereof, as I passed by Mr. Pullen’s shop in St. Paul’s Church-yard, Pullen bad God be with you, and named me by name. Mr. Sel-den being there, and hearing my name, gave direction to call me unto him, where he acquaints me with Hazelrigg’s humour and malice towards me, called for the Starry Messenger, and having

read over the words mentioning that Committee, he asked me how I would answer them? I related what I would have said, but he contradicted me, and acquainted me what to say, and how to answer. In the afternoon I went to appear, but there was no Committee set, or would sit; for both Mr. Reynolds and Sir Philip Stapleton, and my other friends, had fully acquainted Baron Rigby with the business, and desired not to call upon me until they appeared; for the matter and charge intended against me was very frivolous, and only presented by a cholerick person to please a company of clowns, meaning the Committee of Leicester. Baron Rigby said, if it were so he would not meddle with the matter, but exceedingly desired to see me. Not long after he met Sir Arthur, and acquainting him what friends appeared for me, said, 'I will then prosecute him no further.'

All the ancient astrologers of England were much startled and confounded at my manner of writing, especially old Mr. William Hodges, who lived near Wolverhampton in Staffordshire, and many others who understood astrology competently well, as they thought. Hodges swore I did more by astrology than he could by the crystal, and use thereof,
which

which indeed he understood as perfectly as any one in England. He was a great royalist, but could never hit any thing right for that party, though he much desired it: He resolved questions astrologically; nativities he meddled not with; in things of other nature, which required more curiosity, he repaired to the crystal: His angels were Raphael, Gabriel, and Uriel: his life answered not in holiness and sanctity to what it should, having to deal with those holy angels. Being contemporary with me, I shall relate what my partner John Scott, the same Scott as is before-mentioned, affirmed of him. John Scott was a little skilful in surgery and physick, so was Will Hodges, and had formerly been a school-master. Scott having some occasions into Staffordshire, addressed himself for a month or six weeks to Hodges, assisted him to dress his patients, let blood, &c. Being to return to London, he desired Hodges to shew him the person and feature of the woman he should marry. Hodges carries him into a field not far from his house, pulls out his crystal, bids Scott set his foot to his, and, after a while, wishes him to inspect the crystal, and observe what he saw there. ‘I see,’ saith Scott, ‘a ruddy complexioned wench in a red waistcoat,
‘drawing

‘drawing a can of beer.’ ‘She must be your wife,’ said Hodges. ‘You are mistaken, Sir,’ said Scott. ‘I am, so soon as I come to London, to marry a tall gentlewoman in the Old-Bailey.’ ‘You must marry the red waistcoat,’ said Hodges. Scott leaves the country, comes up to London, finds his gentlewoman married: Two years after going into Dover, in his return, he refreshed himself at an inn in Canterbury, and as he came into the hall, or first room thereof, he mistook the room, and went into the buttery, where he espied a maid, described by Hodges, as before said, drawing a can of beer, &c. He then more narrowly viewing her person and habit, found her, in all parts, to be the same Hodges had described; after which he became a suitor unto her, and was married unto her; which woman I have often seen. This Scott related unto me several times, being a very honest person, and made great conscience of what he spoke. Another story of him is as followeth, which I had related from a person which well knew the truth of it.

A neighbour gentleman of Hodges lost his horse; who having Hodges’s advice for recovery of him, did again obtain him. Some years after, in a frolick, he thought to abuse him, acquainting a
neighbour

neighbour therewith, *viz.* That he had formerly lost a horse, went to Hodges, recovered him again, but saith it was by chance; I might have had him without going unto him: ‘Come, let’s go, I will now put a trick upon him; I will leave some boy or other at the town’s-end with my horse, and then go to Hodges and enquire for him.’ He did so, gave his horse to a youth, with orders to walk him till he returned. Away he goes with his friend, salutes Mr. Hodges, thanks him for his former courtesy, and now desires the like, having lost a horse very lately. Hodges, after some time of pausing, said; ‘Sir, your horse is lost, and never to be recovered.’ ‘I thought what skill you had,’ replies the gallant, ‘my horse is walking in a lane at the town’s-end.’ With that Hodges swore (as he was too much given unto that vice) ‘your horse is gone, and you will never have him again.’ The gentleman departed in great derision of Hodges, and went where he left his horse: when he came there, he found the boy fast asleep upon the ground, the horse gone, the boy’s arm in the bridle.

He returns again to Hodges, desiring his aid, being sorry for his former abuse. Old Will swore like a devil, ‘Be gone, be gone; go look your horse.’ This business ended

ended not so; for the malicious man brought Hodges into the star-chamber, bound him over to the assizes, put Hodges to great expences: but, by means of the Lord Dudley, if I remember aright, or some other person thereabouts, he overcame the gentleman, and was acquitted.

Besides this, a gentlewoman of my acquaintance, and of credit, in Leicestershire, having lost a pillion-cloth, a very new one, went to desire his judgment. He ordered her such a day to attend at Mountsorrel in Leicestershire, and about twelve o'clock she should see her pillion-cloth upon a horse, and a woman upon it. My friend attended the hour and place; it being told, she must needs warm herself well, and then enquired if any passengers had lately gone by the inn? Unto whom answer was made, there passed by whilst she was at the fire, about half an hour before, a man, and a woman behind him, on horse-back. Inquiring of what colour the pillion-cloth was of; it was answered, directly of the colour my friend's was: They pursued, but too late.

In those times, there lived one William Marsh in Dunstable, a man of godly life and upright conversation, a Recusant. By astrology he resolved thievish questions with great success; that was his utmost
sole

sole practice. He was many times in trouble; but by Dr. Napper's interest with the Earl of Bolingbroke, Lord Wentworth, after Earl of Cleveland, he still continued his practice, the said Earl not permitting any Justice of Peace to vex him.

This man had only two books, Guido and Haly bound together: He had so mumbled and tumbled the leaves of both, that half one side of every leaf was torn even to the middle. I was familiar with him for many years: He died about 1647.

A word or two of Dr. Napper, who lived at Great Lindford in Buckinghamshire, was parson, and had the advowson thereof. He descended of worshipful parents, and this you must believe; for when Dr. Napper's brother, Sir Robert Napper, a Turkey merchant, was to be made a Baronet in King James's reign, there was some dispute whether he could prove himself a gentleman for three or more descents. 'By my faul,' saith King James, 'I will certify for Napper, that he is of
'above three hundred years standing in
'his family, all of them, by my faul,
'gentlemen,' &c. However, their family came into England in King Henry the Eighth's time. The parson was Master of Arts; but whether doctorated by degree or courtesy, because of his profession, I know

know not. Miscarrying one day in the pulpit, he never after used it, but all his life-time kept in his house some excellent scholar or other to officiate for him, with allowance of a good salary: He out-went Forman in physick and holiness of life; cured the falling-sickness perfectly by constellated rings, some diseases by amulets, &c.

A maid was much afflicted with the falling-sickness, whose parents applied themselves unto him for cure: he framed her a constellated ring, upon wearing whereof, she recovered perfectly. Her parents acquainted some scrupulous divines with the cure of their daughter: 'The cure is done by enchantment,' say they. 'Cast away the ring, it's diabolical; God cannot bless you, if you do not cast the ring away.' The ring was cast into the well, whereupon the maid became epileptical as formerly, and endured much misery for a long time. At last her parents cleansed the well, and recovered the ring again; the maid wore it, and her fits took her no more. In this condition she was one year or two; which the Puritan ministers there adjoining hearing, never left off, till they procured her parents to cast the ring quite away; which done, the fits returned in such violence, that they were enforced to apply

ply to the Doctor again, relating at large the whole story, humbly imploring his once more assistance; but he could not be procured to do any thing, only said, those who despised God's mercies, were not capable or worthy of enjoying them.

I was with him in 1632, or 1633, upon occasion. He had me up into his library, being excellently furnished with very choice books: there he prayed almost one hour; he invoked several angels in his prayer, *viz.* (a) Michael, Gabriel, Raphael, Uriel, &c. We parted.

He instructed many ministers in astrology, would lend them whole cloak-bags of books; protected them from harm and violence, by means of his power with the Earl of (b) Bolingbroke. He would confess my master Evans knew more than himself in some things: and some time before he died, he got his cousin Sir Richard to set a figure to see when he should die. Being brought him; 'Well,' he said, 'the old man will live this winter, but in the spring he will die; welcome Lord Jesus, thy will be done.'

(a) The collect read on Michaelmas day, seems to allow of praying to angels. At some times, upon great occasions, he had conference with Michael, but very rarely.

(b) Lord Wentworth, after Earl of Cleveland.

He

He had many enemies : Cotta, Doctor of physick in Northampton, wrote a sharp book of witchcraft, wherein, obliquely, he bitterly inveighed against the Doctor.

In 1646, I printed a collection of Prophecies, with the explanation and verification of Aquila, or the White King's Prophecy ; as also the nativities of Bishop Laud and Thomas Earl of Strafford, and a most learned speech by him intended to have been spoke upon the scaffold. In this year 1646, after a great consideration, and many importunities, I began to fix upon thoughts of an Introduction unto Astrology, which was very much wanting, and as earnestly longed for by many persons of quality. something also much occasioned and hastened the impression, *viz.* the malevolent barking of Presbyterian ministers in their weekly sermons, reviling the professors thereof, and myself particularly by name.

Secondly, I thought it a duty incumbent upon me, to satisfy the whole kingdom of the lawfulness thereof, by framing a plain and easy method for any person but of indifferent capacity to learn the art, and instruct himself therein, without any other master than my Introduction ; by which means, when many understood it, I should have more partners
and

and assistants to contradict all and every antagonist.

Thirdly, I found it best as unto point of time, because many of the soldiers were wholly for it, and many of the Independant party; and I had abundance of worthy men in the House of Commons, my assured friends, no lovers of Presbytery, which then were in great esteem, and able to protect the art; for should the Presbyterian party have prevailed, as they thought of nothing less than to be Lords of all, I knew well they would have silenced my pen annually, and committed the Introduction unto everlasting silence.

Fourthly, I had something of conscience touched my spirit, and much elevated my conceptions, believing God had not bestowed those abilities upon me, to bury them under a bushel; for though my education was very mean, yet, by my continual industry, and God's great mercy, I found myself capable to go forward with the work, and to commit the issue thereof unto divine providence.

I had a hard task in hand to begin the first part hereof, and much labour I underwent to methodize it as it is.

I ingenuously confess unto you (Arts' great Mecænas, noble Esquire Ashmole,) no mortal man had any share in the

composition or ordering of the first part thereof, but my one only self. You are a person of great reading, yet I well know you never found the least trace thereof in any author yet extant.

In composing, contriving, ordering, and framing thereof (*viz.* the first part) a great part of that year was spent. I again perused all, or most, authors I had, sometimes adding, at other times diminishing, until at last I thought it worthy of the press. When I came to frame the second part thereof, having formerly collected out of many manuscripts, and exchanged rules with the most able professors I had acquaintance with, in transcribing those papers for impresson, I found, upon a strict inquisition, those rules were, for the most part, defective; so that once more I had now a difficult labour to correct their deficiency, to new rectify them according to art; and lastly, considering the multiplicity of daily questions propounded unto me, it was as hard a labour as might be to transcribe the papers themselves with my own hand. The desire I had to benefit posterity and my country, at last overcame all difficulties; so that what I could not do in one year, I perfected early the next year, 1647; and then in that year, *viz.* 1647, I finished

I finished the third book of (a) nativities, (b) during the composing whereof, for seven whole weeks, I was shut up of the plague, burying in that time two maid-servants thereof; yet towards November that year, the Introduction, called by the name of Christian Astrology was made publick. There being, in those times, some smart difference between the army and the Parliament, the head-quarters of the army were at Windsor, whither I was carried with a coach and four horses, and John Booker with me. We were welcome thither, and feasted in a garden where General Fairfax lodged. We were brought to the General, who bid us kindly welcome to Windsor; and, in effect, said thus much:

‘ That God had blessed the army with
 ‘ many signal victories, and yet their work
 ‘ was not finished. He hoped God would
 ‘ go along with them until his work was
 ‘ done. They fought not themselves, but
 ‘ the welfare and tranquillity of the good
 ‘ people, and whole nation; and, for
 ‘ that end, were resolved to sacrifice both
 ‘ their lives and their own fortunes. As

(a) The name of the person whose nativity is directed and judged, is Mr. Thompson, whose father had been some time an inn-keeper at the White-hart in Newark.

(b) I devised the forms and fashions of the several schemes. E. A.

‘ for the art we studied, he hoped it was
‘ lawful and agreeable to God’s word :
‘ He understood it not ; but doubted not
‘ but we both feared God ; and therefore
‘ had a good opinion of us both.’ Unto
his speech I presently made this reply :

‘ My Lord, I am glad to see you here
‘ at this time.

‘ Certainly, both the people of God,
‘ and all others of this nation, are very
‘ sensible of God’s mercy, love, and fa-
‘ vour unto them, in directing the par-
‘ liament to nominate and elect you Ge-
‘ neral of their armies, a person so religi-
‘ ous, so valiant.

‘ The several unexpected victories ob-
‘ tained under your Excellency’s conduct,
‘ will eternize the same unto all poste-
‘ rity.

‘ We are confident of God’s going
‘ along with you and your army, until
‘ the great work for which he ordained
‘ you both, is fully perfected ; which we
‘ hope will be the conquering and sub-
‘ version of your’s and the Parliament’s
‘ enemies, and then a quiet settlement
‘ and firm peace over all the nation, unto
‘ God’s glory, and full satisfaction of ten-
‘ der consciences.

‘ Sir, as for ourselves, we trust in God ;
‘ and, as christians, believe in him. We
‘ do not study any art but what is lawful,
‘ and

‘ and consonant to the scriptures, fathers,
 ‘ and antiquity; which we humbly desire
 ‘ you to believe,’ &c.

This ended, we departed, and went to visit Mr. Peters the minister, who lodged in the castle, whom we found reading an idle pamphlet come from London that morning. ‘ Lilly, thou art herein,’ says he. ‘ Are not you there also?’ I replied. ‘ Yes, that I am,’ quoth he.——The words concerning me, were these :

From th’ oracles of the Sibyls so filly,
 The curst predictions of William Lilly,
 And Dr. Sybbald’s Shoe-lane Philly,
 Good Lord, deliver me.

After much conference with Hugh Peters, and some private discourse betwixt us two, not to be divulged, we parted, and so came back to London.

King Charles the First, in the year 1646, April 27, went unto the Scots, then in this nation. Many desired my judgment, in time of his absence, to discover the way he might be taken : which I would never be drawn unto, or give any direction concerning his person.

There were many lewd Mercuries printed both in London and Oxford, wherein I was sufficiently abused, in this year 1646. I had then my ascendant *ad* ☐ ♄, and ☾ *ad proprium*. The Presbyterians were, in

their pulpits, as merciless as the Cavaliers in their pamphlets.

About this time, the most famous mathematician of all Europe, (*a*) Mr. William Oughtred, parson of Aldbury in Surrey, was in danger of sequestration by the Committee of or for plundered ministers; (Ambo-dexters they were;) several inconsiderable articles were deposed and sworn against him, material enough to have sequestered him, but that, upon his day of hearing, I applied myself to Sir Bolstrode Whitlock, and all my own old friends, who in such numbers appeared in his behalf, that though the chairman and many other Presbyterian members were stiff against him, yet he was cleared by the major number. The truth is, he had a considerable parsonage, and that only was enough to sequester any moderate judgment: He was also well known to affect his Majesty. In these times many worthy ministers lost their livings or benefices, for not complying with the Three-penny Directory. Had you seen (O noble Esquire) what pitiful ideots were preferred into sequestered church-benefices, you would have been grieved in your soul; but when they came before the classis of divines, could

(*a*) This gentleman I was very well acquainted with, having lived at the house over-against his, at Aldbury in Surrey, three or four years. E. A.

those simpletons but only say, they were converted by hearing such a sermon, such a lecture, of that godly man Hugh Peters, Stephen Marshall, or any of that gang, he was presently admitted.

In 1647, I published the World's Catastrophe, the Prophecies of Ambrose Merlin, with the Key wherewith to unlock those obstruse Prophecies; also Trithemius of the Government of the World by the presiding Angels; these came forth all in one book.

The two first were exquisitely translated by yourself, (most learned Sir) as I do ingenuously acknowledge in my Epistle unto the Reader, with a true character of the worth and admirable parts, unto which I refer any that do desire to read you perfectly delineated. I was once resolved to have continued Trithemius for some succeeding years, but multiplicity of employment impeded me. The study required, in that kind of learning, must be sedentary, of great reading, sound judgment, which no man can accomplish except he wholly retire, use prayer, and accompany himself with angelical consorts.

His Majesty Charles the First, having entrusted the Scots with his person, was, for money, delivered into the hands of the English Parliament, and, by several removals, was had to Hampton-Court about July or August 1647; for he was

there, and at that time when my house was visited with the plague. He was desirous to escape from the soldiery, and to obscure himself for some time near London, the citizens whereof began now to be unruly, and alienated in affection from the Parliament, inclining wholly to his Majesty, and very averse to the army. His Majesty was well informed of all this, and thought to make good use hereof; besides, the army and Parliament were at some odds, who should be masters. Upon the King's intention to escape, and with his consent, Madam Whorewood (whom you knew very well, worthy Esquire) came to receive my judgment, viz. In what quarter of this nation he might be most safe, and not to be discovered until himself pleased.

When she came to my door, I told her I would not let her come into my house, for I buried a maid-servant of the plague very lately. 'I fear not the plague,' but the pox,' quoth she; so up we went. After erection of my figure, I told her about twenty miles (or thereabouts) from London, and in Essex, I was certain he might continue undiscovered. She liked my judgment very well; and, being herself of a sharp judgment, remembered a place in Essex about that distance, where was an excellent house, and all conveniences for his reception.

ception. Away she went, early next morning, unto Hampton-Court, to acquaint his Majesty; but see the misfortune: He, either guided by his own approaching hard fate, or misguided by (a) Ashburnham, went away in the night-time westward, and surrendered himself to Hammond, in the Isle of Wight.

Whilst his Majesty was at Hampton-Court, Alderman Adams sent his Majesty one thousand pounds in gold, five hundred whereof he gave to Madam Whorewood. I believe I had twenty pieces of that very gold for my share.

I have something more to write of Charles the First's misfortunes, wherein I was concerned; the matter happened in 1648, but I thought good to insert it here, having after this no more occasion to mention him.

His Majesty being in Carisbrook-Castle in the Isle of Wight, the Kentish men, in great numbers, rose in arms, and joined with the Lord Goring; a considerable number of the best ships revolted from the Parliament; the citizens of London were forward to rise against the Parliament; his Majesty laid his design to escape

(a) This Ashburnham was turned out of the House of Commons the 3d of November, 1667, for taking a bribe of five hundred pounds of the merchants. I was informed hereof 26 November, 1667.

out of prison, by sawing the iron bars of his chamber window; a small ship was provided, and anchored not far from the castle to bring him into Suffex; horses were provided ready to carry him through Suffex into Kent, that so he might be at the head of the army in Kent, and from thence to march immediately to London, where thousands then would have armed for him. The Lady Whorewood came to me, acquaints me herewith. I got G. Farmer (who was a most ingenious lock-smith, and dwelt in Bow-lane) to make a saw to cut the iron bars in funder, I mean to saw them, and aqua fortis besides. His Majesty in a small time did his work; the bars gave liberty for him to go out; he was out with his body till he came to his breast; but then his heart failing, he proceeded no farther: when this was discovered, as soon after it was, he was narrowly looked after, and no opportunity after that could be devised to enlarge him. About September the Parliament sent their Commissioners with propositions unto him into the Isle of Wight, the Lord William Sea being one; the Lady Whorewood comes again unto me from him or by his consent, to be directed: After perusal of my figure, I told her the Commissioners would be there such a day; I elected a day and hour when

when to receive the Commissioners and propositions; and as soon as the propositions were read, to sign them, and make haste with all speed to come up with the Commissioners to London. The army being then far distant from London, and the city enraged stoutly against them, he promised he would do so. That night the Commissioners came, and old Sea and his Majesty had private conference till one in the morning: the King acquaints Sea with his intention, who clearly dissuaded him from signing the propositions, telling him they were not fit for him to sign; that he had many friends in the House of Lords, and some in the House of Commons; that he would procure more, and then they would frame more easy propositions. This flattery of this unfortunate Lord, occasioned his Majesty to wave the advice I and some others that wished his prosperity had given, in expectation of that which afterwards could never be gained. The army having some notice hereof from one of the Commissioners, who had an eye upon old Sea, hastened unto London, and made the citizens very quiet; and besides, the Parliament and army kept a better correspondence afterwards with each other.

Whilst the King was at Windsor-Castle, one walking upon the leads there, he
looked

looked upon Captain Wharton's Almanack; 'My book,' saith he, 'speaks well 'as to the weather:' One William Allen standing by; 'what,' saith he, 'saith his antagonist, Mr. Lilly?' 'I do not care 'for Lilly,' said his Majesty, 'he hath 'been always against me, and became a 'little bitter in his expressions.' 'Sir,' said Allen, 'the man is an honest man, 'and writes but what his art informs 'him.' 'I believe it,' said his Majesty, 'and that Lilly understands astrology as 'well as any man in Europe.' *Exit Rex Carolus.*

In 1648 I published a Treatise of the three Suns, seen the winter preceding; as also an Astrological Judgment upon a Conjunction of Saturn and Mars 28 June, in 11 degrees 8 minutes of Gemini.

I commend unto your perusal that book and the Prophetical Merlin, which seriously considered, (Oh worthy Esquire) will more instruct your judgment (*De generalibus contingentibus Mundi*) than all the authors you yet ever met with.

In this year, for very great considerations, the Counsel of State gave me in money fifty pounds, and a pension of one hundred pounds *per Annum*, which for two years I received, but no more: upon some discontents I after would not or did require it. The cause moving them
was

was this; they could get no intelligence out of France, although they had several agents there for that purpose. I had formerly acquaintance with a secular priest, at this time confessor to one of the Secretaries; unto him I wrote, and by that means had perfect knowledge of the chiefest concernments of France, at which they admired; but I never yet, until this day, revealed the name of the person.

One occasion why I deserted that employment was, because Scott, who had eight hundred pounds *per Annum* for intelligence, would not contribute any occasion to gratify my friend: And another thing was, I received some affront from Gualter Frost their Secretary, one that was a principal minister belonging to the Council of State. Scott was ever my enemy, the other knave died of a gangrene in his arm suddenly after.

In 1648 and 1649, that I might encourage young students in astrology, I publickly read over the first part of my Introduction, wherein there are many things contained, not easily to be understood.

And now we are entered into the year 1649: his Majesty being at St. James's House, in January of that year, I begun its observations thus:

“ I am

“ I am ferious, I beg and expect justice; either fear or shame begins to question offenders.

“ The lofty cedars begin to divine a thundering hurricane is at hand; God elevates men contemptible.

“ Our demigods are sensible we begin to dislike their actions very much in London, more in the country.

“ Blessed be God, who encourages his servants, makes them valiant, and of undaunted spirits, to go on with his decrees: upon a sudden, great expectations arise, and men generally believe a quiet and calm time draws nigh.”

In Christmas holidays, the Lord Gray of Grooby and Hugh Peters, sent for me to Somerset-House, with directions to bring them two of my Almanacks.—I did so; Peters and he read January's Observations.

‘ If we are not fools and knaves,’ saith he, ‘ we shall do justice:’ then they whispered. I understood not their meaning till his Majesty was beheaded. They applied what I wrote of justice, to be understood of his Majesty, which was contrary to my intention; for Jupiter, the first day of January, became direct; and Libra is a sign signifying Justice; I implored for justice generally upon such as
had

had cheated in their places, being treasurers, and such like officers. I had not then heard the least intimation of bringing the King unto trial, and yet the first day thereof I was casually there, it being upon a Saturday; for going to Westminster every Saturday in the afternoon, in these times, at White-hall I casually met Peters; ‘Come, Lilly, wilt thou go hear ‘the King tried?’ ‘When?’ said I. ‘Now, ‘just now; go with me.’ I did so, and was permitted by the guard of soldiers to pass up to the King’s-Bench. Within one quarter of an hour came the Judges, presently his Majesty, who spoke excellently well, and majestically, without impediment in the least when he spoke. I saw the silver top of his staff unexpectedly fall to the ground, which was took up by Mr. Rushworth: but when I heard Bradshaw the Judge say to his Majesty,

‘Sir, instead of answering the court, ‘you interrogate their power, which be- ‘comes not one in your condition.’

These words pierced my heart and soul, to hear a subject thus audaciously to reprehend his Sovereign, who ever and anon replied with great magnanimity and prudence.

After that his Majesty was beheaded, the Parliament for some years affected nothing either for the publick peace or tran-

tranquillity of the nation, or settling religion as they had formerly promised. The interval of time betwixt his Majesty's death and Oliver Cromwell's displacing them, was wholly consumed in voting for themselves, and bringing their own relations to be members of Parliament, thinking to make a trade thereof.

The week, or three or four days before his Majesty's beheading, one Major Sydenham, who had commands in Scotland, came to take his leave of me, and told me the King was to be put to death, which I was not willing to believe, and said, 'I could not be persuaded the Parliament could find any Englishman so barbarous, that would do that foul action.' 'Rather,' saith he, 'than they should want such a man, these arms of mine should do it.' He went presently after into Scotland, and upon the first engagement against them, was slain, and his body miserably cut and mangled.

In 1651 I published Monarchy or no Monarchy, and in the latter end thereof some hieroglyphicks of my own, composed, at spare time, by the accult learning, many of those types having representations of what should from thence succeed in England, and have since had verification.

I had

I had not that learning from books, or any manuscript I ever yet met withal, it is reduced from a cabal lodging in astrology, but so mysterious and difficult to be attained, that I have not yet been acquainted with any who had that knowledge. I will say no more thereof, but that the asterisms and signs and constellations give greatest light thereunto.

During Bradshaw's being President of the Council of State, it was my happiness to procure Captain Wharton his liberty, which when Bradshaw understood, said, 'I will be an enemy to Lilly, if ever he come before me.' Sir Bolstrode Whitlock broke the ice first of all on behalf of Captain Wharton: after him the Committee, unto whom his offence had been committed, spoke for him, and said he might well be bailed or enlarged: I had spoken to the Committee the morning of his delivery, who thereupon were so civil unto him, especially Sir William Ermin of Lincolnshire. who at first wondered I appeared not against him; but upon my humble request, my long continued antagonist was enlarged and had his liberty.

In 1651 I purchased one hundred and ten pounds *per Annum* in fee-farm rents for one thousand and thirty pounds. I paid all in ready money; but when his

H

Majesty

Majesty King Charles the Second, 1660, was restored; I lost it all again, and it returned to the right owner; the loss thereof never afflicted me, for I have ever reduced my mind according to my fortune. I was drawn in by several persons to make that simple purchase. The year I bought it, I had my ascendant directed into a Trine of Jupiter first, and in the same year into the Cauda Draconis—my fortune into a quadrant of Mercury. When Colchester was besieged, John Booker and myself were sent for, where we encouraged the soldiers, assuring them the town would very shortly be surrendered, as indeed it was: I would willingly have obtained leave to enter the town, to have informed Sir Charles Lucas, whom I well knew, with the condition of affairs as they then stood, he being deluded by false intelligence: at that time my scholar Humphreys was therein, who many times deluded the Governor with expectation of relief; but failing very many times with his lies, at last he had the bastinado, was put in prison, and enforced to become a soldier; and well it was, he escaped so.—During my being there, the steeple of St. Mary's Church was much battered by two cannons purposely placed: I was there one day about three of the clock in the afternoon, talking

ing

ing with the cannoneer, when presently he desired us to look to ourselves, for he perceived by his perspective glass there was a piece charged in the castle against his work, and ready to be discharged. I ran for haste under an old ash-tree, and immediately the cannon-bullet came hissing quite over us. 'No danger now,' saith the gunner, 'but begone, for there are five more charging,' which was true; for two hours after those cannons were discharged, and unluckily killed our cannoneer and matross. I came the next morning and saw the blood of the two poor men lie upon the planks: we were well entertained at the head quarters, and after two whole days abiding there, came for London.

But we prosecute our story again, and say that in the year 1652 I purchased my house and some lands in Herisham, in the parish of Walton upon Thames, in the county of Surrey, where I now live; intending by the blessing of God, when I found it convenient, to retire into the country, there to end my days in peace and tranquillity; for in London my practice was such, I had none or very little time afforded me to serve God, who had been so gracious unto me. The purchase of the house and lands, and building, stood me in nine hundred and

fifty pounds sterling, which I have very much augmented.

The Parliament now grows odious unto all good men, the members whereof became insufferable in their pride, covetousness, self-ends, laziness, minding nothing but how to enrich themselves. Much heart-burning now arose betwixt the Presbyterian and Independant, the latter siding with the army, betwixt whose two judgments there was no medium. Now came up, or first appeared, that monstrous people called Ranters: and many other novel opinions in themselves heretical and scandalous, were countenanced by members of Parliament, many whereof were of the same judgment. Justice was neglected, vice countenanced, and all care of the common good laid aside. Every judgment almost groaned under the heavy burthen they then suffered; the army neglected; the city of London scorned; the ministry, especially those who were orthodox and serious, honest or virtuous, had no countenance; my soul began to loath the very name of a Parliament, or Parliament-men. There yet remained in the House very able, judicious, and worthy patriots; but they, by their silence, only served themselves: all was carried on by a rabble of dunces, who being the greater number, voted
what

what seemed best to their nonintelligent fancies.

In this year I published *Annus Tenebrosus*, which book I did not so entitle, because of the great obscurity of the solar eclipse, by so many prattled of to no purpose, but because of those underhand and clandestine counsels held in England by the soldiery, of which I would never, but in generals, give any knowledge unto any Parliamant man. I had wrote publicly in 1650, that the Parliament should not continue, but a new government should arise, &c.

In my next year's *Anglicus*, upon rational grounds in astrology, I was so bold as to aver therein, that the Parliament stood upon a tottering foundation, and that the commonalty and soldiery would join together against them.

My *Anglicus* was for a whole week every day in the Parliament House, peeped into by the Presbyterians, one disliking this sentence, another finds another fault, others misliked the whole; so in the end a motion was made, that *Anglicus* should be inspected by the Committee for plundered ministers; which being done, they were to return them to the House, *viz.* report its errors.

A messenger attached me by a warrant from that Committee; I had private

notice ere the messenger came, and hasted unto Mr. Speaker Lenthall, ever my friend. He was exceeding glad to see me, told me what was done; called for Anglicus, marked the passages which tormented the Presbyterians so highly. I presently sent for Mr. Warren the printer, an assured Cavalier, obliterated what was most offensive, put in other more significant words, and desired only to have six amended against next morning, which very honestly he brought me. I told him my design was to deny the book found fault with, to own only the six books. I told him, I doubted he would be examined. 'Hang them,' said he, 'they are all rogues. I'll swear myself to the devil ere they shall have an advantage against you by my oath.'

The day after, I appeared before the Committee, being thirty six in number that day; whereas it was observed, at other times, it was very difficult to get five of them together. At first they shewed me the true Anglicus, and asked if I wrote and printed it. I took the book and inspected it very heedfully; and, when I had done so, said thus:

'This is none of my book, some malicious Presbyterian hath wrote it, who are my mortal enemies; I disown it.' The Committee looked upon one another

ther like distracted men, not imagining what I presently did; for I presently pulled out of my pocket six books, and said, 'These I own, the others are counterfeits, published purposely to ruin me.' The Committee were now more vexed than before: Not one word was spoke a good while; at last, many of them, or the greatest number of them, were of opinion to imprison me. Some were for Newgate, others for the Gate-House; but then one Brown of Sussex, called the Presbyterian beadle, whom the company of Stationers had bribed to be my friend, by giving him a new book of Martyrs; he, I say, preached unto the Committee this doctrine, that neither Newgate or the Gate-House were prisons unto which at any time the Parliament sent prisoners: it was most convenient for the Serjeant at Arms to take me in custody.

Mr. Strickland, who had for many years been the Parliament's Ambassador or Agent in Holland, when he saw how they inclined, spoke thus:

'I came purposely into the Committee this day to see the man who is so famous in those parts where I have so long continued: I assure you his name is famous all over Europe: I come to do him justice. A book is produced by

'us, and said to be his; he denies it; we have not proved it, yet will commit him, Truly this is great injustice. It is likely he will write next year, and acquaint the whole world with our injustice; and so well he may. It is my opinion, first to prove the book to be his, ere he be committed.'

Another old friend of mine, Mr. R. spoke thus:

'You do not know the many services this man hath done for the Parliament these many years, or how many times, in our greatest distresses, we applying unto him, he hath refreshed our languishing expectations; he never failed us of comfort in our most unhappy distresses. I assure you his writings have kept up the spirits both of the soldiery, the honest people of this nation, and many of us Parliament men; and now at last, for a slip of his pen (if it were his) to be thus violent against him: I must tell you, I fear the consequence urged out of the book will prove effectually true. It is my counsel, to admonish him hereafter to be more wary, and for the present to dismiss him.'

Notwithstanding any thing that was spoken on my behalf, I was ordered to stand committed to the Serjeant at Arms.

The

The messenger attached my person, said I was his prisoner. As he was carrying me away, he was called to bring me again. Oliver Cromwell, Lieutenant-General of the army, having never seen me, caused me to be produced again, where he steadfastly beheld me for a good space, and then I went with the messenger; but instantly a young clerk of that Committee asks the messenger what he did with me, where's the warrant? until that is signed you cannot seize Mr. Lilly, or shall. Will you have an action of false imprisonment against you? So I escaped that night, but next day obeyed the warrant. That night Oliver Cromwell went to Mr. R. my friend, and said, 'What never a man to take Lilly's cause in hand but yourself? None to take his part but you? He shall not be long there.' Hugh Peters spoke much in my behalf to the Committee; but they were resolved to lodge me in the Serjeant's custody. One Millington, a drunken member, was much my enemy; and so was Cawley and Chichester, a deformed fellow, unto whom I had done several courtesies.

First thirteen days I was a prisoner; and though every day of the Committee's sitting I had a petition to deliver, yet so many churlish Presbyterians still appeared, I could not get it accepted. The
last

last day of the thirteen, Mr. Joseph Ash was made Chairman, unto whom my cause being related, he took my petition, and said I should be bailed in despite of them all, but desired I would procure as many friends as I could to be there. Sir Arthur Hazelrigg, and Major Salloway, a person of excellent parts, appeared for me, and many now of my old friends came in. After two whole hours arguing of my cause by Sir Arthur and Major Salloway, and other friends, the matter came to this point; I should be bailed, and a Committee nominated to examine the printer. The order of the Committee being brought afterwards to him who should be Chairman, he sent me word, do what I would, he would see all the knaves hanged, ere he would examine the printer. This is the truth of the story.

The 16th of February 165 $\frac{1}{4}$, my second wife died; for whose death I shed no tears. I had five hundred pounds with her as a portion, but she and her poor relations spent me one thousand pounds. *Gloria Patri, & Filio, & Spiritui Sancto: sicut erat in principio & nunc & semper, & in sæcula sæculorum:* For the 20th of April 1655, these enemies of mine, viz. Parliament men, were turned out of doors by Oliver Cromwell. A German doctor
of

of physick being then in London, sent me this paper :

*Strophe Alcaica: Generoso Domino Gulielmo
Lillio Astrologo, de dissoluto nuper Par-
liamento.*

Quod calculasti Sydere prævio,
Miles peregit numine conscio,
Gentis videmus nunc Senatum,
Marte Togæq; gravi levatum.

In the time of my imprisonment, Mr. Rushworth came to visit me, and told me, the army would do as much as I had predicted unto the Parliament.

In October 1654, I married the third wife, who is signified in my nativity by Jupiter in Libra; and she is so totally in her conditions, to my great comfort.

In 1655, I was indicted at Hicks's-Hall by a half-witted young woman. Three several Sessions she was neglected, and the Jury cast forth her bill; but the fourth time, they found it against me: I put in bail to traverse the indictment. The cause of the indictment was, for that I had given judgment upon stolen goods, and received two shillings and six pence. —And this was said to be contrary unto an Act in King James's time made.

This mad woman was put upon this action against me by two ministers, who
had

had framed for her a very ingenious speech, which she could speak without book, as she did the day of hearing the traverse. She produced one woman, who told the court, a son of her's was run from her; that being in much affliction of mind for her loss, she repaired unto me to know what was become of him; that I told her he was gone for the Barbadoes, and she would hear of him within thirteen days; which, she said, she did.

A second woman made oath, that her husband being wanting two years, she repaired to me for advice: That I told her he was in Ireland, and would be at home such a time; and, said she, he did come home accordingly.

I owned the taking of half a crown for my judgment of the theft; but said, I gave no other judgment, but that the goods would not be recovered, being that was all which was required of me: the party, before that, having been with several astrologers, some affirming she should have her goods again, others gave contrary judgment, which made her come unto me for a final resolution.

At last my enemy began her before-made speech, and, without the least stumbling, pronounced it before the court; which ended, she had some queries put unto her, and then I spoke for myself, and

and produced my own Introduction into court, saying, that I had some years before emitted that book for the benefit of this and other nations; that it was allowed by authority, and had found good acceptance in both universities; that the study of astrology was lawful, and not contradicted by any scripture; that I neither had, or ever did, use any charms, forceries, or enchantments related in the bill of indictment, &c.

She then related, that she had been several times with me, and that afterwards she could not rest a nights, but was troubled with bears, lions, and tygers, &c. My counsel was the Recorder Green, who after he had answered all objections, concluded, astrology was a lawful art.

‘Mistress,’ said he, ‘what colour was those beasts that you were so terrified with?’

‘I never saw any,’ said she.

‘How do you then know they were lions, tygers, or bears,’ replied he.—‘This is an idle person, only fit for Bedlam.’ The Jury who went not from the bar, brought in, No true Bill.

There were many Presbyterian Justices much for her, and especially one Roberts, a busy fellow for the Parliament, who after his Majesty came in, had like to have lost life and fortune.

I had

I had procured Justice Hooker to be there, who was the oracle of all the Justices of Peace in Middlesex.

There was nothing memorable, after that happened unto me, until 1650, and the month of October, at what time Captain Owen Cox brought me over from his Majesty of Sweden, a gold chain and medal, worth about fifty pounds; the cause whereof was, that in the year 1657, and 1658, I had made honourable mention of him: the Anglicus of 1658 being translated into the language spoke at Hamburgh, printed and cried about the streets, as it is in London.

The occasion of my writing so honourably of his Majesty of Sweden was this: Sir Bolstrode Whitlock, Knight, upon the very time of Oliver's being made Protector, having made very noble articles betwixt Christina then Queen of Sweden, and the English nation, was in his being at Stockholm visited frequently by Charles Gustavus, unto whom Christina resigned during his abode, and used with all manner of civility by him, insomuch as some other Ambassadors took it ill, that they had not so much respect or equal: unto which he would reply, he would be kind where himself did find just cause of merit unto any. He was a great lover of our nation; but there was some other causes
also

also moving my pen to be so liberal, *viz*: The great hopes I had of his prevailing, and of taking Copenhagen and Elsinore, which if he had lived, was hoped he might have accomplished; and had assuredly done, if Oliver the Protector had not so untimely died ere our fleet of ships returned; for Oliver sent the fleet on purpose to fight the Dutch; but dying, and the Parliament being restored, Sir Henry Vane, who afterwards was beheaded, had order from the Council of State to give order to the fleet what to do now Oliver was dead, and themselves restored. Vane, out of state-policy, gave the Earl of Sandwich direction not to fight the Dutch. Captain Symons, who carried those letters, swore unto me, had he known the letters he carried had contained any such prohibition, he would have sunk both ship and letters. Oliver said, when the fleet was to go forth, ‘That if God blessed his Majesty of Sweden with Copenhagen, the English were to have Elsinore as their share; which if once I have,’ saith Oliver, ‘the English shall have the whole trade of the Baltick Sea: I will make the Dutch find another passage, except they will pay such customs as I shall impose.’ Considering the advantages this would have been to our English, who can blame my
pen

pen for being liberal, thereby to have encouraged our famous and noble seamen, or for writing so honourably of the Swedish nation, who had most courteously treated my best of friends, Sir Bolstrode Whitlock, and by whose means, had the design taken effect, the English nation had been made happy with the most beneficial concern of all Christendom. I shall conclude about Oliver the then Protector, with whom obliquely I had transactions by his son-in-law, Mr. Cleypool; and to speak truly of him, he sent one that waited upon him in his chamber, once in two or three days, to hear how it fared with me in my sessions business; but I never had of him, directly or indirectly, either pension, or any the least sum of money, or any gratuity during his whole Protectorship; this I protest to be true, by the name and in the name of the most holy God.

In 1653, before the dissolution of the Parliament, and that ere they had chosen any for their Ambassador into Sweden, Mr. Cleypool came unto me, demanding of me whom I thought fittest to send upon that ambassy into Sweden: I nominated Sir B. Whitlock, who was chosen, and two or three days after Mr. Cleypool came again: 'I hope Mr. Lilly, my fa-

ther, hath now pleased you: Your friend

' Sir

' Sir B. Whitlock is to go for Sweden.' But since I have mentioned Oliver Cromwell, I will relate something of him, which perhaps no other pen can, or will mention. He was born of generous parents in Huntingdonshire, educated some time at the university of Cambridge: in his youth was wholly given to debauchery, quarelling, drinking, &c. *quid non*; having by those means wasted his patrimony, he was enforced to bethink himself of leaving England, and go to New-England: he had hired a passage in a ship, but ere she launched out for her voyage, a kinsman dieth, leaving him a considerable fortune; upon which he returns, pays his debts, became affected to religion; is elected in 1640 a member of Parliament, in 1642 made a Captain of horse under Sir Philip Stapleton, fought at Edge-Hill; after he was made a Colonel, then Lieutenant-General to the Earl of Manchester, who was one of the three Generals to fight the Earl of Newcastle and Prince Rupert at York: Ferdinando Lord Fairfax, and Earl Leven the Scot, were the other two for the Parliament: the last two thinking all had been lost at Marston-Moor fight, Fairfax went into Cawood Castle, giving all for lost: at twelve at night there came word of the Parliament's victory; Fairfax being then

I

laid

laid down upon a bed, there was not a candle in the castle, nor any fire: up riseth Lord Fairfax, procures after some time, paper, ink, and candle, writes to Hull, and other garrisons of the Parliament's, of the success, and then slept.

Leven the Scot asked the way to Tweed: the honour of that day's fight was given to Manchester, Sir Thomas Fairfax's brigade of horse, and Oliver Cromwell's iron sides; for Cromwell's horse, in those times, usually wore head-pieces, back and breast-plates, of iron. After this victory Cromwell became gracious with the House of Commons, especially the Zealots, or Presbyterians, with whom at that time he especially joined; the name Independent, at that time, *viz.* 1644, being not so much spoken of.

There was some animosity at or before the fight, betwixt the Earl of Newcastle and Prince Rupert; for Newcastle being General of his Majesty's forces in the North, a person of valour, and well esteemed in those parts, took it not well to have a competitor in his concernments; for if the victory should fall on his Majesty's side, Prince Rupert's forces would attribute it unto their own General, *viz.* Rupert, and give him the glory thereof: but that it happened, Prince Rupert, in that day's fight, engaged the Parliament's forces

forces too soon, and before the Earl of Newcastle could well come out of York with his army; by reason whereof, though Rupert had absolutely routed the Scots and the Lord Fairfax's forces; yet ere timely assistance could second his army, Sir Thomas Fairfax and Cromwell had put him to flight, and not long after all Newcastle's army. Amongst the most memorable actions of that day's this happened, that one entire regiment of foot belonging to Newcastle, called the Lambs, because they were all new cloathed in white woollen cloth, two or three days before the fight. This sole regiment, after the day was lost, having got into a small parcel of ground ditched in, and not of easy access of horse, would take no quarter; and by mere valour, for one whole hour, kept the troops of horse from entering amongst them at near push of pike: when the horse did enter, they would have no quarter, but fought it out till there was not thirty of them living: those whose hap it was to be beaten down upon the ground as the troopers came near them, though they could not rise for their wounds, yet were so desperate as to get either a pike or sword, or piece of them, and to gore the troopers horses as they came over them, or passed by them. Captain Camby, then a trooper under Crom-

well, and an actor, who was the third or fourth man that entered amongst them, protested, he never in all the fights he was in, met with such resolute brave fellows, or whom he pitied so much, and said, ' he saved two or three against their ' wills.'

After the fight, Manchester marched slowly southward, &c. but at last came with his army to Newbery fight; which ended, he came for London, and there he accuseth Cromwell, being his Lieutenant, to the Parliament, of disobedience, and not obeying his orders.

The House of Commons acquaint Cromwell herewith, and charge him, as he would answer it before God, that the day following he should give them a full account of Manchester's proceedings, and the cause and occasion of their difference, and of the reasons why Manchester did not timely move westward for the relief of Essex, then in the west, who was absolutely routed, inforced to fly, all his foot taken, and all his ordnance and train of artillery, only the horse escaping.

Cromwell the next day gave this account to Mr. Speaker in the House of Commons—by way of recrimination.

That after God had given them a successful victory at Marston over the King's forces, and that they had well refreshed
their

their army, Manchester, by their order, did move southward, but with such slowness, that sometimes he would not march for three days together; sometimes he would lie still one day, then two days; whereupon he said, considering the Earl of Essex was in the west, with what success he then knew not, he moved Manchester several times to quicken his march to the west, for relief of Essex, if he were beaten, or to divert the King's forces from following of Essex; but he said Manchester still refused to make any haste; and that one day he said, 'If any
' man but yourself, Lieutenant, should
' so frequently trouble me, I would call
' him before a Council of War. We
' have beaten the King's forces in the
' north; if we should do so in the west,
' his Majesty is then undone: He hath
' many sons living; if any of them come
' to the Crown, as they well may, they
' will never forget us.' This Major Hammond, a man of honour, will justify as well as myself. After which he marched not at all, until he had order from the Committee to hasten westward, by reason of Essex's being lost in Cornwall, which then he did; and at Newbery fight, it is true, I refused to obey his directions and order: for this it was; his Majesty's horse being betwixt

four and five thousand in a large common, in good order, he commands me, Mr. Speaker, to charge them; we having no way to come at them but through a narrow lane, where not above three horse could march abreast; whereby had I followed his order, we had been all cut off ere we could have got into any order. Mr. Speaker, (and then he wept; which he could do *toties quoties*) I considering that all the visible army you then had, was by this counsel in danger to be lost, refused thus to endanger the main strength, which now most of all consisted of those horse under my command, &c. This his recrimination was well accepted by the House of Commons, who thereupon, and from that time, thought there was none of the House of Lords, very fit to be entrusted with their future armies, but had then thoughts of making a commoner their General; which afterwards they did, and elected Sir Thomas Fairfax their General, and Cromwell Lieutenant-General; but it was next spring first. Upon Essex's being lost in Cornwall, I heard Serjeant Maynard say, 'If now the King haste to London we are undone, having no army to resist him.'

His Majesty had many misfortunes ever attending him, during his abode at

Oxford; some by reason of that great animosity betwixt Prince Rupert and the Lord Digby, each endeavouring to cross one another; but the worst of all was by treachery of several officers under his command, and in his service; for the Parliament had in continual pay one Colonel of the King's Council of War; one Lieutenant-Colonel; one Captain; one Ensign; one or two Serjeants; several Corporals, who had constant pay, and duly paid them every month, according to the capacity of their offices and places, and yet none of these knew any thing of each other's being so employed. There were several well-wishers unto the Parliament in Oxford, where each left his letter, putting it in at the hole of a glass-window, as he made water in the street. What was put in at the window in any of those houses, was the same day conveyed two miles off by some in the habit of town-gardeners, to the side of a ditch, where one or more were ever ready to give the intelligence to the next Parliament garrison: I was then familiar with all the spies that constantly went in and out to Oxford.

But once more to my own actions. I had in 1652 and 1653 and 1654 much contention with Mr. Gatacre of Rotherhithe, a man endued with all kind of

learning, and the ablest man of the whole synod of divines in the Oriental tongues.

The synod had concluded to make an exposition upon the bible; some undertook one book, some another. Gatacre fell upon Jeremy. Upon making his exposition on the 2d verse of the 10th chapter,

‘ Learn not the way of the heathen,
‘ and be not dismayed at the signs of
‘ heaven, for the heathen are dismayed at
‘ them.’

In his Annotations thereupon, he makes a scandalous exposition; and in express terms, hints at me, repeating *verbatim*, ten or twelve times an Epistle of mine in one of my former Anglicus.

The substance of my Epistle was, that I did conceive the good angels of God, did first reveal astrology unto mankind, &c. but he in his Annotations calls me blind buzzard, &c.

Having now liberty of the press, and hearing the old man was very cholerick, I thought fit to raise it up—and only wrote—I referred my discourse then in hand to the discussion and judgment of sober persons, but not unto Thomas Wiseacre, for *Senes bis pueri*: These very words begot the writing of forty-two sheets against myself and astrology. The next year I quibbled again in three or four
lines

lines against him, then he printed twenty-two sheets against me. I was persuaded by Dr. Gauden, late Bishop of Exeter, to let him alone; but in my next year's Anglicus, in August observations, I wrote, *Hoc in tumba jacet Presbyter & Nebulo*, in which very month he died.

Several divines applied themselves unto me, desiring me to forbear any further vexing of Mr. Gatacre; but all of them did as much condemn him of indiscretion, that in so sober a piece of work as that was, viz. in an Annotation upon a sacred text of scripture to particularize me and in that dirty language: they pitied him, that he had not better considered with himself ere he published it.

Dean Owen of Christ's-Church in Oxford, also in his sermons had sharp invectives against me and astrology; I cried quittance with him, by urging *Abbot Panormitan's* judgment of astrology contrary to Owen's, and concluded, 'An Abbot was an ace above a Dean.'

One Mr. Nye of the assembly of divines, a Jesuitical Presbyterian, bleated forth his judgment publicly against me and astrology: to be quit with him, I urged *Causinus* the Jesuit's approbation of astrology, and concluded, *Sic canibus catulos, &c.*

In

In some time after the Dutch Ambassador was offended with some things in Anglicus, presented a memorial to the Council of State, that Merlinus Anglicus might be considered, and the abuses against their nation examined; but his paper was not accepted of, or I any way molested.

In Oliver's Protectorship, I wrote freely and satyrical enough: he was now become Independant, and all the soldiery my friends; for when he was in Scotland, the day of one of their fights, a soldier stood with Anglicus in his hand; and as the several troops passed by him, 'Lo, 'hear what Lilly saith; you are in this 'month promised victory, fight it out, 'brave boys, and then read that month's 'prediction.'

I had long before predicted the downfall of Presbytery, as you (most honoured Sir) in the figure thereof, in my Introduction, may observe; and it was upon this occasion. Sir Thomas Middleton of Chark Castle, enemy to Presbytery, seeing they much prevailed, being a member of the House, seriously demanded my judgment, if Presbytery should prevail, or not, in England? The figure printed in my Introduction, will best give you an account, long before it happened, of the sinking and failing of Presbytery; so will
the

the second page of my Hieroglyphicks. Those men, to be serious, would preach well; but they were more lordly than Bishops, and usually, in their parishes, more tyrannical than the Great Turk.

Of the Year 1660; the Actions whereof, as they were remarkable in England, so were they no less memorable as to my particular Fortune and Person.

Upon the Lord General Monk's returning from Scotland with his army into England, suddenly after his coming to London, Richard Cromwell, the then Protector's authority was laid aside, and the old Parliament restored; the Council of State sat as formerly. The first act they put the General upon was, to take down the city gates and portcullisses, an act which, the General said, was fitter for a Janizary to do than for a General; yet he effected the Commands received, and then lodged in the city with his army. The citizens took this pulling down of their gates so heinously, that one night the ruder sort of them procured all the rumps of beef, and other baggage, and publickly burnt them in the streets, in derision of the then Parliament,

Parliament, calling them that now sat, The Rump. This hurly-burly was managed as well by the General's soldiers as the citizens. The King's health was publicly drank all over the city, to the confusion of the Parliament. The matter continued until midnight, or longer. The Council of State, sitting at White-Hall, had hereof no knowledge, until Sir Martin Noell, a discreet citizen, came about nine at night, and then first informed them thereof. The Council could not believe it, until they had sent some ministers of their own, who affirmed the verity thereof. They were at a stand, and could not resolve what to do; at last Nevil Smith came, being one of them, and publicly protested there was but one way to regain their authority, and to be revenged of this affront, and to overthrow the Lord General Monk, whom they now perceived intended otherways than he had pretended; his counsel was, to take away Monk's commission, and to give a present commission to Major-General Lambert to be their General; which counsel of his, if they would take and put it speedily in execution, would put an end unto all the present mischiefs. The Council in general did all very well approve Nevil Smith's judgment; but presently up starts Sir Arthur Hazellrigg, and

and makes a sharp invective against Lambert, and concluded, he would rather perish under the King of Scots power, than that Lambert should ever any more have command under the Parliament.

The Lord General suddenly after brings in the long excluded Members to sit in Parliament, being persons of great judgment, and formerly enforced from sitting therein by the soldiery, and connivance of those who stiled themselves the godly part of the Parliament. These honourable patriots presently voted his Majesty's coming into England, and so he did in May 1660. But because Charles the Second, now (1667.) King of England, Son of Charles the First, grandchild to James the First, King of Great Brittain, was so miraculously restored, and so many hundreds of years since prophesied of by Ambrose Merlin, it will not be impertinent to mention the prophecies themselves, the rather because we have seen their verification.

Ambrose Merlin's Prophecy wrote
about 990 Years since.

He calls King James, The Lion of Righteousness; and saith, when he died, or was dead, there would reign a noble
White

White King; this was Charles the First. The prophet discovers all his troubles, his flying up and down, his imprisonment, his death; and calls him Aquila. What concerns Charles the Second, is the subject of our discourse: In the Latin copy it is thus:

Deinde ab Austro veniet cum Sole super ligneos equos, & super spumantem inundationem maris, Pullus Aquilæ navigans in Britanniam.

Et applicans statim tunc altam domum Aquilæ sitiens, & cito aliam sitiet.

Deinde Pullus Aquilæ nidificabit in summa rupe totius Britanniae: nec juvenis occidet, nec ad senem vivet.

This, in an old copy, is Englished thus:

‘ After then, shall come through the
‘ south with the sun, on horse of tree,
‘ and upon all waves of the sea, the
‘ Chicken of the Eagle, sailing into Bri-
‘ tain, and arriving anon to the house of
‘ the Eagle, he shall shew fellowship to
‘ them beasts.

‘ After, the Chicken of the Eagle shall
‘ nestle in the highest rock of all Britain;
‘ nay, he shall nought be slain young;
‘ nay, he nought come old.’

Another Latin copy renders the last verse thus:

Deinde

Deinde pullus Aquilæ nidificabit in summo rupium, nec juvenis occidetur, nec ad senium perveniet. There is after this, *pacificato regno, Omnes occidet*; which is intended of those persons put to death, that sat as Judges upon his father's death.

The Verification.

His Majesty being in the Low-Countries when the Lord General had restored the seclused Members, the Parliament sent part of the Royal Navy to bring him for England, which they did in May 1660. Holland is East from England, so he came with the sun; but he landed at Dover, a port in the south part of England. Wooden-horses, are the English ships.

Tunc nidificabit in summo rupium.

The Lord General, and most of the gentry in England, met him in Kent, and brought him unto London, then to White-hall.

Here, by the highest Roock, (some write Rock,) is intended London, being the metropolis of all England.

Since which time, unto this very day I write this story, he hath reigned in England, and long may he do hereafter. 10 December 1667.

Had

Had I leifure, I might verify the whole preceding part concerning King Charles. Much of the verification thereof is mentioned in my Collection of Prophecies, printed 1645. But his Majesty being then alive, I forbore much of that subject, not willing to give offence. I dedicated that book unto him; and, in the conclusion thereof, I advised his return unto Parliament, with these words, *Fac hoc & vivet.*

There was also a Prophecy printed 1588, in Greek characters, exactly decyphering the long troubles the English nation had from 1641 until 1660; and then it ended thus:

‘ And after that shall come a dreadful
‘ dead man, and with him a Royal G.’ [it
is Gamma in the Greek, intending C.
in the Latin, being the third letter in
the alphabet,] ‘ of the best blood in the
‘ world, and he shall have the Crown, and
‘ shall set England on the right way, and
‘ put out all heresies.’

Monkery being extinguished above eighty or ninety years, and the Lord General's name being Monk, is the Dead Man. The Royal G. or C. is Charles the Second, who, for his extraction, may be said to be of the best blood in the world.

These

These two Prophecies were not given vocally by the angels, but by inspection of the crystal in types and figures, or by apparition the circular way, where, at some distance, the angels appear, representing by forms, shapes, and creatures, what is demanded. It is very rare, yea, even in our days, for any operator or master to have the angels speak articulately; when they do speak, it is like the Irish, much in the throat.

What further concerns his Majesty, will more fully be evident about 1672 or 1674, or, at farthest, in 1676. And now unto my own actions in 1660.

In the first place, my fee-farm rents, being of the yearly value of one hundred and twenty pounds, were all lost by his Majesty's coming to his restoration; but I do say truly, the loss thereof did never trouble me, or did I repine thereat.

In June of that year, a new Parliament was called, whereunto I was unwillingly invited by two messengers of the Serjeant at Arms. The matter whereupon I was taken into custody was, to examine me concerning the person who cut off the King's head, *viz.* the late King's.

Sir Daniel Harvey, of Surrey, got the business moved against me in great displeasure,

pleasure, because, at the election of new Knights for Surrey, I procured the whole town of Walton to stand, and give their voices, for Sir Richard Onslow. The Committee to examine me, were Mr. Prinn, one Colonel King, and Mr. Richard Weston of Gray's-Inn.

God's providence appeared very much for me that day, for walking in Westminster-Hall, Mr. Richard Pennington, son to my old friend Mr. William Pennington, met me, and enquiring the cause of my being there, said no more, but walked up and down the hall, and related my kindness to his father unto very many Parliament men of Cheshire and Lancashire, Yorkshire, Cumberland, and those northern countries, who numerously came up into the Speaker's chamber, and bade me be of good comfort: at last he meets Mr. Weston, one of the three unto whom my matter was referred for examination, who told Mr. Pennington, that he came purposely to punish me, and would be bitter against me; but hearing it related, *viz.* my singular kindness and preservation of old Mr. Pennington's estate, to the value of six or seven thousand pounds, 'I will do him all the good I can,' says he. 'I thought he had never done any good; let me see him, and let him stand behind me where
' I sit:'

‘ I fit :’ I did so. At my first appearance, many of the young members affronted me highly, and demanded several scurrilous questions. Mr. Weston held a paper before his mouth ; bade me answer nobody but Mr. Prinn ; I obeyed his command, and saved myself much trouble thereby ; and when Mr. Prinn put any difficult or doubtful query unto me, Mr. Weston prompted me with a fit answer. At last, after almost one hour’s tugging, I desired to be fully heard what I could say as to the person who cut Charles the First’s head off. Liberty being given me to speak, I related what follows, *viz.*

That the next Sunday but one after Charles the First was beheaded, Robert Spavin, Secretary unto Lieutenant-General Cromwell at that time, invited himself to dine with me, and brought Anthony Peirson, and several others, along with him to dinner : That their principal discourse all dinner-time, was only, who it was that beheaded the King ; one said it was the common hangman ; another, Hugh Peters ; others also were nominated, but none concluded. Robert Spavin, so soon as dinner was done, took me by the hand, and carried me to the south window : saith he, ‘ These are all mistaken, they have not named the man that did the fact ; it was Lieutenant-

‘Colonel JOICE; I was in the room
‘when he fitted himself for the work,
‘stood behind him when he did it;
‘when done, went in again with him:
‘There is no man knows this but my
‘master, *viz.* Cromwell, Commissary
‘Ireton, and myself.’ ‘Doth not Mr.
‘Rushworth know it?’ said I. ‘No, he
‘doth not know it,’ saith Spavin. The
same thing Spavin since had often related
unto me when we were alone. Mr.
Prinn did, with much civility, make a
report hereof in the House; yet Norfolk
the Serjeant, after my discharge, kept
me two days longer in arrest, purposely to
get money of me. He had six pounds, and
his Messenger forty shillings; and yet I was
attached but upon Sunday, examined on
Tuesday, and then discharged, though
the covetous Serjeant detained me until
Thursday. By means of a friend, I cried
quittance with Norfolk, which friend was
to pay him his salary at that time, and
abated Norfolk three pounds, which we
spent every penny at one dinner, without
inviting the wretched Serjeant: but in
the latter end of the year, when the
King’s Judges were arraigned at the Old-
Bailey, Norfolk warned me to attend,
believing I could give information con-
cerning Hugh Peters. At the sessions I
attended during its continuance, but was
never

never called or examined. There I heard Harrifon, Scott, Clement, Peters, Hacker, Scroop, and others of the King's Judges, and Cook the Sollicitor, who excellently defended himself; I say, I did hear what they could say for themselves, and after heard the sentence of condemnation pronounced against them by the incomparably modest and learned Judge Bridgman, now Lord Keeper of the Great Seal of England.

One would think my troubles for that year had been ended; but in January 166½, one Everard, a Justice of Peace in Westminster, ere I was stirring, sent a Serjeant and thirty four musqueteers for me to White-Hall: he had twice that night seized about sixty persons, supposed fanaticks, very despicable persons, many whereof were aged, some were water-bearers, and had been Parliament-foldiers; others, of ordinary callings: all these were guarded unto White-Hall, into a large room, until day-light, and then committed to the Gate-House: I was had into the guard-room, which I thought to be hell; some therein were sleeping, others swearing, others smoaking tobacco. In the chimney of the room I believe there was two bushels of broken tobacco-pipes, almost half one load of ashes. Everard, about nine in the morn-

ing, comes, writes my mittimus for the Gate-House, then shews it me: I must be contented. I desired no other courtesy, but that I might be privately carried unto the Gate-House by two soldiers; that was denied. Among the miserable crew of people, with a whole company of soldiers, I marched to prison, and there for three hours was in the open air upon the ground, where the common house of office came down. After three hours, I was advanced from this stinking place up the stairs, where there was on one side a company of rude swearing persons; on the other side many Quakers, who lovingly entertained me. As soon as I was fixed, I wrote to my old friend Sir Edward Walker, Garter King at Arms, who presently went to Mr. Secretary Nicholas, and acquainted him with my condition. He ordered Sir Edward to write to Everard to release me, unless he had any particular information against me, which he had not. He further said, it was not his Majesty's pleasure that any of his subjects should be thus had to prison without good cause shewed before. Upon receipt of Sir Edward's letter, Everard discharged me, I taking the Oaths of Allegiance and Supremacy. This day's work cost me thirty seven shillings. Afterwards Everard stood to be Burgefs for
Westmin-

Westminster; sent me to procure him voices. I returned answer, that of all men living he deserved no courtesy from me, nor should have any.

In this year 1660, I sued out my pardon under the Broad Seal of England, being so advised by good counsel, because there should be no obstruction; I passed as William Lilly, Citizen and Salter of London; it cost me thirteen pounds six shillings and eight pence.

There happened a verification of an astrological judgment of mine in this year 1660, which because it was predicted sixteen years before it came to pass, and the year expressly nominated, I thought fit to mention.

In page III. of my Prophetical Merlin, upon three sextile Aspects of Saturn and Jupiter, made in 1659 and 1660, I wrote thus—

‘ This their friendly salutation com-
 ‘ forts us in England, every man now
 ‘ possesses his own vineyard; our young
 ‘ youth grow up unto man’s estate,
 ‘ and our old men live their full years;
 ‘ our nobles and gentlemen root again;
 ‘ our yeomanry, many years disconsolated,
 ‘ now take pleasure in their husbandry.
 ‘ The merchant sends out ships, and hath
 ‘ prosperous returns; the mechanick hath
 ‘ quick trading: Here is almost a new
 K 4 ‘ world;

‘ world; new laws, new Lords. Now
 ‘ my country of England shall shed no
 ‘ more tears, but rejoice with, and in
 ‘ the many blessings God gives or affords
 ‘ her annually.’

And in the same book, page 118, over-against the year 1660, you shall find, A Bonny Scot acts his part.

The long Parliament would give Charles the Second no other title than King of Scots.—

I also wrote to Sir Edward Walker, Kt. Garter King at Arms in 1659, he then being in Holland—

Tu, Dominusq; vester videbitis Angliam, infra duos Annos.—For in 1662, his moon came by direction to the body of the sun.

But he came in upon the ascendant directed unto the Trine of Sol and antiscion of Jupiter.—

And happy it was for the nation he did come in, and long and prosperously may he reign amongst us.

In 1663 and 1664, I had a long and tedious law-suit in Chancery, M. C. coming to Quartile of Saturn; and the occasion of that suit, was concerning houses; and my enemy, though aged, had no beard, was really saturnine. We came unto a hearing Feb. 166 $\frac{3}{4}$, before the Master of the Rolls, Sir Harbottle Grimston,

Grimston, where I had the victory, but no costs given me.

My adversary not satisfied with that judgment, petitioned that most just and honourable man the Lord Chancellor Hyde, for a re-hearing his cause before him.

It was granted, and the 13 June 1664, my M. C. then directed to Quartile of Venus and Sol. His Lordship most judiciously heard it with much attention, and when my adversary's counsel had urged those depositions which they had against me, his Lordship stood up, and said,

‘Here is not one word against Mr. Lilly.’—

I replied, ‘My Lord, I hope I shall have costs.’

‘Very good reason,’ saith he; and so I had: And, at my departure out of court, put off his hat, and bid God be with you.

This is the month of Dec. 1667, wherein, by misfortune, he is much traduced and highly persecuted by his enemies: is also retired, however not in the least questioned for any indirect judgment as as Chancellor, in the Chancery; [but in other things he hath been very foul, as in the articles drawn up by the Parliament against him, it appears. Which articles
I pre-

I presume you have not seen, otherwise you would have been of another mind, A W] for there was never any person sat in that place, who executed justice with more uprightness, or judgment, or quickness for dispatch, than this very noble Lord. God, I hope, in mercy will preserve his person from his enemies, and in good time restore him unto all his honours again: From my soul I wish it, and hope I shall live to see it. *Amen: Fiat ob tu Deus justitiæ.*

In 1663, and 1664, I was made churchwarden of Walton upon Thames, settling as well as I could the affairs of that distracted parish, upon my own charges; and upon my leaving the place, forgave them seven pounds odd money due unto me.

In 1664, I had another law-suit with Captain Colborn, Lord of the manor of Esher, concerning the rights of the parish of Walton. He had newly purchased that manor, and having one hundred and fifty acres of ground, formerly park and wood ground lying in our parish, conceived, he had right of common in our parish of Walton: Thereupon he puts three hundred sheep upon the common; part whereof I impounded: He replevins them, gave me a declaration. I answered it, The trial was to be

at

at the Assizes at Kingston in April 1664. When the day of trial came, he had not one witness in his cause, I had many; whereupon upon conference, and by mediation, he gave me eleven pounds for my charges sustained in that suit, whereof I returned him back again fifty shillings: forty shillings for himself, and ten shillings for the poor of the parish he lived in.

This I did at my own cost and charges, not one parishioner joining with me. I had now M. C. unto Quartile of Venus and Sol—both in my second, Ergo, I got money by this thing, or suit. Sir Bolstrode Whitlock gave me counsel.

Now I come unto the year 1665, wherein that horrible and devouring plague so extreemly raged in the city of London. 27th of June 1665, I retired into the country to my wife and family, where since I have wholly continued, and so intend by permission of God. I had, before I came away, very many people of the poorer sort frequented my lodging, many whereof were so civil, as when they brought waters, *viz.* urines, from infected people, they would stand purposely at a distance. I ordered those infected, and not like to die, cordials, and caused them to sweat, whereby many recovered. My landlord of the house was afraid of those poor people, I nothing at all.

all. He was desirous I should be gone. He had four children: I took them with me into the country and provided for them. Six weeks after I departed, he, his wife, and man-servant died of the plague.

In Monarchy or no Monarchy, printed 1651, I had framed an Hieroglyphick, which you may see in page the 7th, representing a great sickness and mortality; wherein you may see the representation of people in their winding-sheets, persons digging graves and sepultures, coffins, &c. All this was performed by the more secret Key of Astrology, or Prophetical Astrology.

In 1666, happened that miraculous conflagration in the city of London, whereby in four days, the most part thereof was consumed by fire. In my Monarchy or no Monarchy, the next side after the coffins, and pickaxes, there is representation of a great city all in flames of fire. The memorial whereof some Parliament men remembering, thought fit to send for me before that Committee which then did sit, for examination of the causes of the fire; and whether there was no treachery or design in the business, his Majesty being then in war both with the French and Dutch. The summons
to

to appear before that Committee was as followeth.

Monday, 22d October, 1666.

At the Committee appointed to enquire after the Causes of the late Fires.

ORDERED,

That Mr. Lilly do attend this Committee on Friday next being the 25th of October 1666, at two of the clock in the afternoon in the Speaker's chamber; to answer such questions as shall be then and there asked him.

ROBERT BROOKE.

By accident I was then in London, when the summons came unto me. I was timorous of Committees, being ever by some of them calumniated, upbraided, scorned, and derided. However I must and did appear; and let me never forget that great affection and care yourself (Oh most excellent and learned Esquire Ashmole) shewed unto me at that time. First, your affection in going along with me all that day; secondly, your great pains and care, in speaking unto many worthy Members of that Committee your acquaintance,

quaintance, that they should befriend me, and not permit me to be affronted, or have any disgraceful language cast upon me. I must seriously acknowledge the persuasions so prevailed with those generous souls, that I conceive there was never more civility used unto any than unto myself; and you know, there were no small number of Parliament men appeared, when they heard I was to be there.

Sir Robert Brooke spoke to this purpose:

‘ Mr. Lilly, This Committee thought
‘ fit to summon you to appear before them
‘ this day, to know, if you can say any
‘ thing as to the cause of the late fire, or
‘ whether there might be any design
‘ therein. You are called the rather
‘ ther, because in a book of yours long
‘ since printed, you hinted some such thing
‘ by one of your Hieroglyphicks.’ Unto
which I replied,

May it please your Honours,

‘ After the beheading of the late King,
‘ considering that in the three subsequent
‘ years the Parliament acted nothing which
‘ concerned the settlement of the nation
‘ in peace; and seeing the generality of
‘ people dissatisfied, the citizens of London
‘ discontented, the soldiery prone to
‘ mutiny,

‘ mutiny, I was desirous, according to
 ‘ the best knowledge God had given me,
 ‘ to make enquiry by the art I studied,
 ‘ what might from that time happen unto
 ‘ the Parliament and nation in general.
 ‘ At last, having satisfied myself as well as
 ‘ I could, and perfected my judgment
 ‘ therein, I thought it most convenient
 ‘ to signify my intentions and conceptions
 ‘ thereof, in Forms, Shapes, Types,
 ‘ Hieroglyphicks, &c. without any com-
 ‘ mentary, that so my judgment might
 ‘ be concealed from the vulgar, and made
 ‘ manifest only unto the wise. I herein
 ‘ imitating the examples of many wise
 ‘ philosophers who had done the like.’

‘ Sir Robert,’ saith one, ‘ Lilly is yet
 ‘ *sub vestibulo*.’

I proceeded further. Said I, ‘ Having
 ‘ found, Sir, that the city of London
 ‘ should be sadly afflicted with a great
 ‘ plague, and not long after with an
 ‘ exorbitant fire, I framed these two
 ‘ hieroglyphicks as represented in the
 ‘ book, which in effect have proved very
 ‘ true.’

‘ Did you foresee the year,’ said one?

‘ I did not,’ said I, ‘ or was desirous :
 ‘ of that I made no scrutiny.’ I pro-
 ceeded——

‘ Now, Sir, whether there was any de-
 ‘ sign of burning the city, or any em-
 ‘ ployed

‘ployed to that purpose, I must deal ingenuously with you, that since the fire, I have aken much pains in the search thereof, but cannot or could not give myself any the least satisfaction therein. I conclude, that it was the only finger of God; but what instruments he used thereunto, I am ignorant.’

The Committee seemed well pleased with what I spoke, and dismissed me with great civility.

Since which time no memorable action hath happened unto me, my retirement impeding all concourse unto me.

I have many things more to communicate, which I shall do, as they offer themselves to memory.

In *Anno* 1634, and 1635, I had much familiarity with John Hegenius, Doctor of Physick, a Dutchman, an excellent scholar and an able physician, not meanly versed in astrology. Unto him, for his great civility, I communicated the art of framing Sigils, Lamens, &c. and the use of the Mosaical Rods:—and we did create several Sigils to very good purpose. I gave him the true key thereof, *viz.* instructed him of their forms, characters, words, and last of all, how to give them vivification, and what number or numbers were appropriated to every planet:

net: *Cum multis aliis in libris veterum latentibus; aut perspicuè non intellectis.*

I was well acquainted with the Speculator of John a Windor, a scrivener, sometimes living in Newbury. This Windor was club-fisted, wrote with a pen betwixt both his hands. I have seen many bonds and bills wrote by him. He was much given to debauchery, so that at some times the Dæmons would not appear to the Speculator; he would then suffumigate: sometimes, to vex the spirits, he would curse them, fumigate with contraries. Upon his examination before Sir Henry Wallop, Kt. which I have seen, he said, he once visited Dr. Dee in Mortlack; and out of a book that lay in the window, he copied out that call which he used, when he invocated——

It was that—which near the beginning of it hath these words,

*Per virtutem illorum qui invocant nomen tuum,
Hermeli—mitte nobis tres Angelos, &c.*

Windor had many good parts, but was a most lewd person: My master Wright knew him well, and having dealing in those parts, made use of him as a scrivener.

Oliver Withers, servant to Sir H. Wallop, brought up a Windor's examination

L

unto

unto London, purposely for me to peruse. This Withers was Mr. Fiske's scholar three years more or less, to learn astrology of him; but being never the wiser, Fiske brought him unto me: by shewing him but how to judge one figure, his eyes were opened: He made the Epistle before Dr. Neve's book, now in Mr. Sander's hands, was very learned in the Latin, Greek and Hebrew tongues.

Having mentioned Dr. John Dee, I hold it not impertinent to speak something of him; but more especially of Edward Kelly's Speculator.

Dr. Dee himself was a Cambro Briton, educated in the university of Oxford, there took his degree of Doctor; afterwards for many years in search of the profounder studies, travelled into foreign parts: to be serious, he was Queen Elizabeth's intelligencer, and had a salary for his maintenance from the Secretaries of State. He was a ready witted man, quick of apprehension, very learned, and of great judgment in the Latin and Greek tongues. He was a very great investigator of the more secret Hermetical learning, a perfect astronomer, a curious astrologer, a serious geometrician; to speak truth, he was excellent in all kinds of learning.

With

With all this, he was the most ambitious person living, and most desirous of fame and renown, and was never so well pleased as when he heard himself stiled, Most Excellent.

He was studious in chymistry, and attained to good perfection therein; but his servant, or rather companion, Kelly, out-went him, *viz.* about the Elixir or Philosopher's Stone; which neither Kelly or Dee attained by their own labour and industry. It was in this manner Kelly obtained it, as I had it related from an ancient minister, who knew the certainty thereof from an old English merchant, resident in Germany, at what time both Kelly and Dee were there.

Dee and Kelly being in the confines of the Emperor's dominions, in a city where resided many English merchants, with whom they had much familiarity, there happened an old Friar to come to Dr. Dee's lodging. Knocking at the door, Dee peeped down the stairs. 'Kelly,' says he, 'tell the old man I am not at home.' Kelly did so. The Friar said, 'I will take another time to wait on him.' Some few days after, he came again. Dee ordered Kelly, if it were the same person, to deny him again. He did so; at which the Friar was very angry. 'Tell

‘ thy master I came to speak with him and
 ‘ to do him good, because he is a great
 ‘ scholar and famous ; but now tell him,
 ‘ he put forth a book, and dedicated it to
 ‘ the Emperor : it is called Monas Hiero-
 ‘ glyphicas. He understands it not. I
 ‘ wrote it myself, I came to instruct him
 ‘ therein, and in some other more pro-
 ‘ found things. Do thou, Kelly, come
 ‘ along with me, I will make thee more
 ‘ famous than thy master Dee.’

Kelly was very apprehensive of what the Friar delivered, and thereupon suddenly retired from Dee, and wholly applied unto the Friar ; and of him either had the Elixir ready made, or the perfect method of its preparation and making. The poor Friar lived a very short time after : whether he died a natural death, or was otherwise poisoned or made away by Kelly, the merchant who related this, did not certainly know.

How Kelly died afterwards at Prague, you well know : he was born at Worcester, had been an apothecary. Not above thirty years since he had a sister lived in Worcester, who had some gold made by her brother’s projection.

Dr. Dee died at Mortlack in Surrey, very poor, enforced many times to sell some book or other to buy his dinner with, as Dr. Napier of Linford in Buckinghamshire

inghamshire oft related, who knew him very well.

I have read over his book of Conference with Spirits, and thereby perceive many weaknesſes in the manage of that way of Moſaical learning: but I conceive, the reaſon why he had not more plain reſolutions, and more to the purpoſe, was, becauſe Kelly was very vicious, unto whom the angels were not obedient, or willingly did declare the queſtions propounded; but I could give other reaſons, but thoſe are not for paper.

I was very familiar with one Sarah Skelhorn, who had been Speculatrix unto one Arthur Gauntlet about Gray's-Inn-Lane, a very lewd fellow, profeſſing phyſick. This Sarah had a perfect ſight, and indeed the beſt eyes for that purpoſe I ever yet did ſee. Gauntlet's books, after he was dead, were ſold, after I had peruſed them, to my ſcholar Humphreys: there were rare notions in them. This Sarah lived a long time, even until her death, with one Mrs. Stockman in the Iſle of Purbeck, and died about ſixteen years ſince. Her miſtreſs one time being deſirous to accompany her mother, the Lady Beconsfield, unto London, who lived twelve miles from her habitation, cauſed Sarah to inſpect her cryſtal, to ſee if ſhe, viz. her mother, was gone,

yea or not: the angels appeared, and shewed her mother opening a trunk, and taking out a red waistcoat, whereby she perceived she was not gone. Next day she went to her mother's, and there, as she entered the chamber, she was opening a trunk, and had a red waistcoat in her hand. Sarah told me oft, the angels would for some years follow her, and appear in every room of the house, until she was weary of them.

This Sarah Skelhorn, her call unto the crystal began,

' Oh ye good angels, only and only,' &c.

Ellen Evans, daughter of my tutor Evans, her call unto the crystal was this:

O Micol, O tu Micol, regina pigmeorum veni, &c.

Since I have related of the Queen of Fairies, I shall acquaint you, that it is not for every one, or every person that these angelical creatures will appear unto, though they may say over the call, over and over, or indeed is it given to very many persons to endure their glorious aspects; even very many have failed just at that present when they are ready to manifest themselves; even persons otherwise of undaunted spirits and firm resolution, are herewith astonished, and tremble; as it happened not many years since with us. A very sober discreet person, of virtuous
life

life and conversation, was beyond measure desirous to see something in this nature. He went with a friend into my Hurst Wood: the Queen of Fairies was invoked, a gentle murmuring wind came first; after that, amongst the hedges, a smart whirlwind; by and by a strong blast of wind blew upon the face of the friend,—and the Queen appearing in a most illustrious glory, ‘No more, I beseech you,’ (quoth the friend :) ‘My heart fails; I am not ‘able to endure longer.’ Nor was he: his black curling hair rose up, and I believe a bullrush would have beat him to the ground: he was soundly laughed at, &c.

Sir Robert Holborn, Knight, brought once unto me (a) Gladwell of Suffolk, who had formerly had sight and conference with Uriel and Raphael, but lost them both by carelessness; so that neither of them both would but rarely appear, and then presently be gone, resolving nothing. He would have given me two hundred pounds to have assisted him for their recovery, but I am no such man.—Those glorious creatures, if well commanded, and well observed, do teach the master

(a) Mr. Gilbert Wakering gave him his berril when he died; it was of the largeness of a good big orange, set in silver, with a cross on the top, and another on the handle; and round about engraved the names of these angels, Raphael, Gabriel, Uriel.

any thing he desires; *Amant secreta, fugiunt aperta*. The Fairies love the southern side of hills, mountains, groves.—Neatness and cleanliness in apparel, a strict diet, an upright life, fervent prayers unto God, conduce much to the assistance of those who are curious these ways.

It hath been my happiness to meet with many rarities in my time unexpectedly. I had a sister lived in the Minories, in that very house where formerly had lived one Evans, not my tutor, but another far exceeding him in astrology, and all other occult learning, questioned for his life about 1612. I am sure it was when the present Earl of Manchester's father was Lord Chief Justice of England. He was found guilty by a peevish Jury: but petitioning King James by a Greek petition, as indeed he was an excellent Grecian; 'By my faul,' said King James, 'this man shall not die; I think he is a better Grecian than any of my Bishops:' so his life was spared, &c. My sister's master when new modelling the house, broke up a window, under which were Evans's secret manuscripts, and two moulds in brass; one of a man, the other of a woman. I bought the moulds and (a) book for

(a) From these manuscripts he gained his first knowledge.

five shillings; the secrets were wrote in an imperfect Greek character; but after I found the vowels, all the rest were presently clear enough.

You see, most worthy Sir, I write freely; it is out of the sincerity of my affection, many things wrote by me having been more fit for a sepulture than a book: But,

Quo major est virorum præstantium, tui similitum inopia; eo mihi charior est, & esse debet & amicitia tua: Quam quidem omnibus officiis, & studiis, quæ a summa benevolentia possunt, perpetuò colam: However, who study the curiosities before-named, if they are not very well versed in astrology, they shall rarely attain their desired ends. There was, in the late times of troubles, one Mortlack, who pretended unto Speculations, had a crystal, a call of Queen Mab, one of the Queen of Fairies; he deluded many thereby: at last I was brought into his company; he was desired to make invocation, he did so; nothing appeared, or would: three or four times in my company he was put upon to do the work, but could not; at last he said he could do nothing as long as I was in presence. I at last shewed him his error, but left him as I found him, a pretended ignoramus.

I may

I may seem to some to write incredibilia ; be it so, but knowing unto whom, and for whose only sake, I do write them, I am much comforted therewith, well knowing you are the most knowing man in these curiosities of any now living in England ; and therefore it is my hope, these will be a present well-becoming you to accept.

Præclara omnia quam difficilia sint, his præsertim temporibus. (Celeberrimè Armiger,) non te fugit ; and therefore I will acquaint you with one memorable story related unto me by Mr. John Marr, an excellent mathematician and geometrician, whom I conceive you remember : he was servant to King James and Charles the First.

At first, when the Lord Napier, or Marchiston made publick his Logarithms, Mr. Briggs, then reader of the astronomy lecture at Gresham-College in London, was so surprized with admiration of them, that he could have no quietness in himself, until he had seen that noble person the Lord Marchiston, whose only invention they were : he acquaints John Marr herewith, who went into Scotland before Mr. Briggs, purposely to be there when these two so learned persons should meet. Mr. Briggs appoints a certain day when to meet at Edinburgh : but failing thereof, the Lord Napier was doubtful he would

would not come. It happened one day as John Marr and the Lord Napier were speaking of Mr. Briggs; 'Ah, John,' saith Marchiston, 'Mr. Briggs will not 'now come:' at the very instant one knocks at the gate; John Marr hastened down, and it proved Mr. Briggs, to his great contentment. He brings Mr. Briggs up into my Lord's chamber, where almost one quarter of an hour was spent, each beholding other almost with admiration, before one word was spoke: at last Mr. Briggs began.

'My Lord, I have undertaken this 'long journey purposely to see your person, and to know by what engine of 'wit or ingenuity you came first to think 'of this most excellent help unto astronomy, viz. the Logarithms; but, my 'Lord, being by you found out, I wonder no body else found it out before, 'when now known, it is so easy.' He was nobly entertained by the Lord Napier, and every summer after that, during the Lord's being alive, this venerable man, Mr. Briggs, went purposely into Scotland to visit him. *Tempora nunc mutantur.*

These two persons were worthy men in their time; and yet the one, viz. Lord Marchiston, was a great lover of astrology, but Briggs the most satirical man against it that hath been known: but the reason

reason hereof I conceive was, that Briggs was a severe Presbyterian, and wholly conversant with persons of that judgment; whereas the Lord Marchiston was a general scholar, and deeply read in all divine and human histories: it is the same Marchiston who made that most serious and learned exposition upon the Revelation of St. John; which is the best that ever yet appeared in the world.

Thus far proceeded Mr. William Lilly in setting down the account of his life, with some other things of note. Now shall be added something more which afterwards happened during his retirement at his house at Herisham, until his death.

He left London in the year 1665, (as he hath before noted) and betook himself to the study of physick; in which, having arrived at a competent degree of knowledge, assisted by diligent observation and practice, he desired his old friend Mr. Ashmole, to obtain of his Grace Dr. Sheldon, then Lord Archbishop of Canterbury, a license for the practice of physick; which upon application to his Grace, and producing a testimonial [October 8. 1670,] under the hands of two physicians of the college in London, on Mr. Lilly's behalf, he most readily granted, in the manner following, *viz.* ‘ G I L-

 per Provinciam Cantuariensem.

Hereupon he began to practise more
 openly, and with good success; and every
 Saturday rode to Kingston, where the
 poorer sort flockt to him from several
 parts, and received much benefit by his
 advice and prescriptions, which he gave
 them freely, and without money. From
 those that were more able, he now and
 then

then received a shilling, and sometimes an half crown, if they offered it to him, otherwise he demanded nothing; and, in truth, his charity towards poor people was very great, no less than the care and pains he took in considering and weighing their particular cases, and applying proper remedies to their infirmities, which gained him extraordinary credit and estimation.

He was of a strong constitution, and continued generally in good health, till the 16th of August 1674, when a violent humour discovered itself in red spots all over his body, with little pushes in his head. This, in the winter [18 December] following, was seconded by a distemper whereof he fell sick, and was let blood in the left foot, a little above the ancle.

The 20th of December following, a humour descended from his head to his left side, from eight o'clock at night till the next morning; and then staying a while in the calf of his leg, at length descended towards his toes, the anguish whereof put him into a fever. This humour fixed in two places on the top of his left foot (one in that where he was let blood two days before) which (upon application of pledgets) growing ripe, they were [28 Dec.] lanced by Mr. Agar of Kingston, his apothecary (and no less a skilful

skilful Surgeon :) after which he began to be at ease, his fever abated, and within five months the cure was perfected.

The 7th of November 1675, he was taken with a violent fit of vomiting for some hours, to which a fever succeeded, that continued four months: This brought his body exceeding low, together with a dimness in his eyes, which after occasioned him to make use of Mr. Henry Coley, as his amanuensis, to transcribe (from his dictates) his astrological judgments for the year 1677; but the monthly observations for that year, were written with his own hand some time before, though by this time he was grown very dim-sighted. His judgments and observations for the succeeding years, till his death, (so also for the year 1682,) were all composed by his directions, Mr. Coley coming to Hersham the beginning of every summer, and stayed there, till, by conference with him, he had dispatched them for the press; to whom, at these opportunities, he communicated his way of judgment, and other astrological ar-cana's.

In the beginning of the year 1681, he had a flux, which weakened him much, yet after some time his strength encreased; but now his sight was wholly taken from him,

him, not having any glimmering as formerly.

He had dwelt many years at Herisham, where his charity and kindness to his poor neighbours was always great and hearty; and the 30th of May 1681, towards the evening, a dead palsy began to seize his left side. The second of June, towards evening, he took his bed, and then his tongue began to falter. The next day he became very dull and heavy: sometimes his senses began to fail him. Henceforward he took little or nothing, for his larynx swelled, and that impeded his swallowing.

The fourth of June, Mr. Ashmole went to visit him, and found he knew him, but spake little, and some of that scarce intelligible; for the palsy began now to seize upon his tongue.

The eighth of June he lay in a great agony, insomuch that the sweat followed drop after drop, which he bore with wonderful courage and patience (as indeed he did all his sickness) without complaint; and about three o'clock the next morning, he died, without any shew of trouble or pangs. Immediately before his breath went from him, he sneezed three times.

He had often, in his life-time, desired Mr. Ashmole to take care of his funeral, and now his widow desired the

M

same:

same: whereupon Mr. Ashmole obtained leave from Sir Mathew Andrews (who had the parsonage of Walton) to bury him in the chancel of that church.

The 10th of June, his corpse was brought thither, and received by the minister (in his surplice) at the Litch-Gates, who, passing before the body into the church, read the first part of the Office for the Burial of the Dead. In the reading desk he said all the evening service, and after performed the rest of the office (as established by law) in the chancel, at the interment, which was about eight o'clock in the evening, on the left side of the communion table, Mr. Ashmole assisting at the laying him in his grave; whereupon afterwards [9 July 1681.] he placed a fair black marble stone, (which cost him six pounds four shillings and six pence) with this inscription following.

Ne Oblivione conteretur Urna
G U L I E L M I L I L L I I
ASTROLOGI PERITISSIMI,
QUI FATIS CESSIT

Quinto Idus Junii Anno Christi Juliano
M D C L X X X I.

Hoc Illi posuit amoris Monumentum

E L I A S A S H M O L E,
A R M I G E R.

Shortly after his death, Mr. Ashmole bought his library of books of Mrs. Ruth Lilly, (his widow and executrix) for fifty pounds: he oft times, in his life-time, expressed, that if Mr. Ashmole would give that sum, he should have them.

The following Epitaphs (Latin and English) were made by George Smalridge, then a scholar at Westminster, after Student of Christ-Church in Oxford.

In Mortem Viri Doctissimi Domini GULIELMI
LILLY, Astrologi, nuper defuncti.

O Ccidit atque suis annalibus addidit atram
Astrologus, quâ non tristior ulla, diem
Pone triumphales, lugubris Luna, quadrigas;
Sol mæstum piceâ nube reconde caput.
Illum, qui Phœbi scripsit, Phœbesq; labores
Eclipsin docuit Stella maligna pati.
Invidia Astrorum cecidit, qui Sidera rexit
Tanta erat in notas scandere cura domos.
Quod vidit, visum cupiit, potiturq; cupito
Cœlo, & Sidereo fulget in orbe decus.
Scilicet hoc nobis prædixit ab ane Cometa,
Et fati emicuit nuncia Stella tui
Fallentem vidi faciem gemuiq; videndo
Illa fuit vati mortis imago suo,
Civilis timuere alii primordia belli
Jejunam metuit plebs stupefata famem
Non tantos tulerat bellumve fameſve dolores:
Auspiciis eſſent hæc relevanda tuis.
In cautam ſubitus plebem nunc opprimat enſis,
Securos fati mors violenta trahat.
Nemo eſt qui videat moneatq; avertere fatum,
Ars jacet in Domini funera merſa ſui

Solus naturæ reservare arcana solebat,
 Solus & ambigui solvere jura poti.
 Lustrâsti erantes benè finâ mente Planetas
 Conspectum latuit stellata nulla tuum
 Defessos oculos pensârunt lumina mentis
 Firefias oculis, mentibus Argus eras.
 Cernere, Firefia, poteras ventura, sed, Arge,
 In fatum haud poteras sat vigil esse tuum
 Sed vivit nomen semper cum sole vigebit,
 Immemor Astrologi non erit ulla dies
 Sæcla canent laudes, quas si percurrere cones,
 Arte opus est, Stellâs quâ numerare soles
 Hæreat hoc carmen cinerum custodibus urnis,
 Hospes quod spargens marmora rore legat.
 " Hic situs est, dignus nunquam cecidisse Propheta ;
 " Fatorum interpres fata inopina subit.
 " Versari æthereo dum vixit in orbe solebat :
 " Nunc humilem jactat Terra superba virum.
 " Sed Cœlum metitur adhuc resupinus in urnâ
 " Vertitur in solitos palpebra clausa polos.
 " Huic busto invigilant solenni lampade Musæ,
 " Perpetuo nubes imbre sepulchra rigant.
 " Ille oculis movit distantia Sidera nostris,
 " Illam amota oculis traxit ad astra Deus."

AN ELEGY upon the Death of WILLIAM LILLY the Astrologer.

OUR Prophet's gone ; no longer may our ears
 Be charm'd with musick of th' harmonious spheres.
 Let sun and moon withdraw, leave gloomy night
 To shew their NUNCIO's fate, who gave more light
 To th' erring world, than all the feeble rays
 Of sun or moon ; taught us to know those days
 Bright TITAN makes ; follow'd the hasty sun
 Through all his circuits ; knew th' unconstant moon,
 And more unconstant ebbings of the flood ;
 And what is most uncertain, th' factious brood,

Flowing

Flowing in civil broils : by the heavens could date
 The flux and reflux of our dubious state.
 He saw the eclipse of sun, and change of moon
 He saw, but seeing would not shun his own :
 Eclips'd he was, that he might shine more bright,
 And only chang'd to give a fuller light.
 He having view'd the sky, and glorious train
 Of gilded stars, scorn'd longer to remain
 In earthly prisons : could he a village love,
 Whom the twelve houses waited for above ?
 The grateful stars a heavenly mansion gave
 T' his heavenly soul, nor could he live a slave
 To mortal passions, whose immortal mind,
 Whilst here on earth, was not to earth confin'd.
 He must be gone, the stars had so decreed ;
 As he of them, so they of him, had need.
 This message 'twas the blazing comet brought ;
 I saw the pale-fac'd star, and seeing thought
 (For we could guess, but only LILLY knew)
 It did some glorious hero's fall foreshew :
 A hero's fall'n, whose death, more than a war,
 Or fire, deserv'd a comet : th' obsequious star,
 Could do no less than his sad fate unfold,
 Who had their risings, and their settings told.
 Some thought a plague, and some a famine near ;
 Some wars from France, some fires at home did fear :
 Nor did they fear too much : scarce kinder fate,
 But plague of plagues befell th' unhappy state
 When LILLY died. Now swords may safely come
 From France or Rome, fanaticks plot at home.
 Now an unseen, and unexpected hand,
 By guidance of ill stars, may hurt our land ;
 Unsafe, because secure, there's none to show
 How England may avert the fatal blow.
 He's dead, whose death the weeping clouds deplore
 I wish we did not owe to him that show'r
 Which long expected was, and might have still
 Expected been, had not our nation's ill
 Drawn from the heavens a sympathetick tear :
 England hath cause a second draught to fear.
 We have no second LILLY, who may die,
 And by his death may make the heavens cry.

Then let your annals, COLEY, want this day,
Think every year leap-year; or if 't must stay,
Cloath it in black; let a sad note stand by,
And stigmatize it to posterity.

Here follows the Copy of an Indictment filed against Mr. Lilly, for which see Page 104 of his Life.

THE jurors for the Lord Protector of the commonwealth of England, Scotland and Ireland, &c. upon their oaths do present, that William Lilly, late of the Parish of St. Clements Danes, in the County of Middlesex, Gent. not having the fear of God before his eyes, but being moved and seduced by the instigation of the devil, the 10th day of July, in the Year of our Lord, 1654, at the Parish aforesaid, in the County aforesaid, wickedly, unlawfully and deceitfully, did take upon him, the said William Lilly, by enchantment, charm and sorcery, to tell and declare to one Anne East, the wife of Alexander East, where ten waistcoats, of the value of five pounds, of the goods and chattels of the said Alexander East, then lately before lost and stolen from the said Alexander East, should be found and become; and two shillings and sixpence in monies numbred, of the monies of the said

2

faid Alexander, from the faid Anne East, then and there unlawfully and deceitfully, he, the faid William Lilly, did take, receive, and had, to tell and declare to her the faid Anne, where the faid goods, so lost and stolen as aforefaid, should be found and become: And also that he, the faid William Lilly, on the faid tenth day of July, in the Year of our Lord, 1654, and divers other days and times, as well before as afterwards, at the faid Parish aforefaid, in the County aforefaid, unlawfully and deceitfully did take upon him, the faid William Lilly, by enchantment, charm and sorcery, to tell and declare to divers other persons, to the faid jurors, yet unknown, where divers goods, chattels and things of the faid persons yet unknown, there lately before lost and stolen from the faid persons yet unknown, should be found and become; and divers sums of monies of the faid persons yet unknown, then and there unlawfully and deceitfully, he the faid William Lilly did take, receive, and had, to tell and declare to the faid persons yet unknown, where their goods, chattels and things, so lost and stolen, as aforefaid, should be found and become, in contempt of the laws of England, to the great damage and deceit of the faid Alexander and Anne, and of the faid other

persons yet unknown, to the evil and pernicious example of all others in the like case offending, against the form of the statute in this case made and provided, and against the publick peace, &c.

OF
CHARLES I.
LATE
KING OF ENGLAND.

REVISED

OBSERVATIONS

ON THE

LIFE OF MARY

AND

CHARLES

BY

JOHN G. LEWIS

TO THE

R E A D E R.

BY the ensuing discourse, I shall draw down upon me the malevolent influence of a number of people ; with whose malice being already acquainted, I care the less : I can fall no lower than the earth ; and whoever thrusts me down sooner than nature intended, must follow me sooner than he would be willing.

An impudent prick-eared Presbyterian Priest, rencounters me one day. ‘ Now Lilly, what say you Mr. Merlinus unto Charles, the son of Charles the present Scottish King ; he’ll pull the rebels out of White-Hall by the ears.’ After a little modest scolding, the man was calm, and I promised silence as to his name, &c. I cannot

cannot wash the Blackmoor white : these woeful Priests have so hardned their hearts against this State, pipe I never so melodiously unto them, or though the Parliament act never so wisely and prudently for our and their goods, they will rebel against the State, and envy me.

If any busy-body object, it's besides my task to write the life of the late King ; I say, no : I could do no less. I have no way injured him ; there is nothing I mention of him which I had not from those persons of credit, who either saw the actions done, or heard with their ears the words delivered. I have rather been sparing than lavish, even when I mention his worst or foulest actions : there are hundreds alive, who will swear I have more balsam than corrosive in the discourse. I would be sorry to belie the dead, as Mr. Fuller hath Paracelsus, who delivers him unto posterity for a drunkard, though those * who lived with him, knew no such thing by him, but report him virtuous. But that Mr. Fuller may know he hath wantonly abused his oratory, I let the ages to come know thus much of himself, viz. That he took the Covenant

* Bishop of Saltburg,

twice for the Parliament, before my face in the Savoy Church; invited others unto it; yet, Apostate-like, ran within few days to Oxford, and there whined to his companions, and protested, the Countess of R. made him take it. ‘ Let not thy
 ‘ jests, like mummy, be made of dead
 ‘ mens flesh. Abuse not any that are
 ‘ departed; for to wrong their memo-
 ‘ ries, is to rob their ghosts of their
 ‘ winding-sheets *.’ And yet this man must call Paracelsus a quacksalver, and give him besides, other Billingsgate language. Doctor Charlton † styles Paracelsus the ornament of Germany, &c. Let the world and writings of the man judge of the truth of Mr. Fuller’s scurvy language.

I’ll apologize for nothing I have now writ; only, if in 1644 I differ somewhat from what I now write about the White King and Eagle; I can say for myself, ‘ later counsels ever correct the form-
 ‘ er;’ and that’s answer enough. Besides, the White King’s tragedy is now acted, it was then on the stage. Long live the Parliament; God bless the Army; all

* Says Thomas Fuller in his Holy State, page 156.

happinefs unto the Commonwealth,
and unto all my disperfed friends in
England, Ireland, and Scotland. Adieu,
I am,

Corner-houfe, over
againft Strand-
Bridge, July 23.
1651.

WILLIAM LILLY.

OBSER-

OBSERVATIONS

UPON THE

LIFE AND DEATH

OF

KING CHARLES I.

CHARLES STUART, late King of England, was born at Dumferlin in Scotland, about fifteen miles from Edinburgh, November 19, 1600. He lived forty eight years, and about seventy two days. He died in the beginning of his climacterical year, fatal many times where killing directions in the nativity threaten. Several characters are given of him ; some do too much magnify him, others as much vilify him. He was well educated by his father under careful tutors, men of great knowledge in all manner of qualities, fit for education of princes ; and came to the crown being,

being aged twenty-four years and about four months, even in the flower of his age. Of his infancy we have little to mention, only he was noted to be very wilful and obstinate by Queen Anne his mother, and some others who then were about him. His mother being told he was very sick and like to die, said, He would not then die, or at that time, but live to be the ruin of himself, and the occasion of the loss of his three Kingdoms, by his too much wilfulness: A sad prediction from a mother, who most entirely loved him; but it proved very true in the sequel. Some affirm she had that foresight of his condition from a stranger, who had not only great judgment in nativities, but in the more secret learning; others, that one English, a Scot, informed her thereof first. Queen Anne may be thought to have the spirit of prophecy in judging so rightly on her son and daughter; for she so much scorned and undervalued the Palsgrave for a husband unto the Lady Elizabeth, that in most of her language after and before the marriage, she would call her Goodwife Palsgrave; a name and title she thought good enough for any woman should marry that dull and unfortunate man: and indeed her fears and predictions proved most true. The old Scottish Lady his nurse was used to

affirm as much, and that he was of a very evil nature even in his infancy; and the lady, who after took charge of him, cannot deny it, but that he was beyond measure wilful, and unthankful: Yet while he was young, he followed his book seriously, which his elder brother Prince Henry could not endure; and therefore King James would frequently blame Prince Henry with the neglect of his book, and tell him how his brother Charles followed it; whereupon the Prince would reply, when that he himself should be King, he would make his brother Charles Archbishop of Canterbury. And to speak truly of him, he had many singular parts in nature; he was an excellent horseman, would shoot well at a mark, had singular skill in limning and pictures, a good mathematician, not unskilful in musick, well read in divinity, excellently in history, and no less in the laws and statutes of this nation; he had a quick and sharp conception, would write his mind singularly well, and in good language and stile, only he loved long Parentheses. He would apprehend a matter in difference betwixt party and party with great readiness, and methodise a long matter, or contract it in few lines: insomuch as I have heard Sir Robert Holborne oft say, he had a quicker conception, and would

fooner understand a case in law, or with more sharpness drive a matter unto a head, than any of his Privy Council; in-somuch, that when the King was not at the Council Table, Sir Robert never cared to be there. He had also, amongst other his special gifts, the gift of patience; in-somuch, that if any offered him a long discourse or speech, he would with much patience, and without any interruption or distaste, hear a speech or story out at length; but then he would expect the same civility from others. He was a great admirer of his Queen (if he dissembled not), very uxorious, seldom denying her any request, and for her sake was very civil to the old Queen of France her mother. The height of his affection unto the Queen, fully you may perceive in those transcendent expressions of his, in letters sent unto her, the copies whereof were intercepted at Naseby, and since printed; his conclusion being always, "Thine eternally," or, "Farewel dear heart."

He communicated his weightiest, and most private designs unto her; nay, there was very little of any moment, but she was advised with concerning it: and yet, what reason the Queen knew to the contrary, I could not learn, but she more
than

than once twitted him in the teeth with dissembling, &c. a quality which indeed he was as sufficiently master of as any man living, and which questionless he had partly from his father, and partly from the climate he was born in, *viz.* Scotland. An indulgent father, careful, if not too covetous to have provided patrimonies for his children; for he would often say, when some beggarly courtier propounded a monopoly or project unto him, affirming it would produce unto his coffers so many thousand pounds a year, or much increase his revenue; he would presently send for the Judges, or some of his Counsel at Law, and if they affirmed and consented he might by law grant the thing desired, he often would say, ‘ He knew no reason, but that he might grant the matter in question, sith the thing itself was just and lawful, for he had many children to provide for.’ Before the wars he was a great enemy to bloodshed, or wilful murder, insomuch, that when one Stamford had in an insurrection in Fleet-street, killed a man, he could by no means be drawn to sign a pardon unto him, though Stamford had been Buckingham’s favourite and countryman, and very great intercession had been made unto him for his pardon. Where he once really affected,

he was ever a perfect friend; witness his continuance of affection unto all Buckingham's friends after his death, yea, until his own last decay of fortune. He was a great lover, if not too much, of the clergy, and highly advanced them; in-
 somuch, as under him they grew first insolent, and then saucy; and indeed, his indulgence unto them did in part procure unto himself the people's hate. Whether his indulgence unto the clergy, proceeded from a religious affection rather to advance the ways of righteousness, or God's cause, than his own private designs, it hath been by many controverted; but by judicious men adjudged, that his own self-ends were therein more sought after than propagating the gospel; so that he served himself by pretending to advance the clergy. He erred extreamly in this one business: when divers godly christians in Norfolk delivered him a petition against the tyrant Wren, their bishop; he sent for Wren, and bad him answer it. Novelty in doctrine he hated, as much as in ceremony. He loved not greatly the ancient nobility or gentry of this nation; but did rather prefer creatures of his own, or father's making. How much he loved any of the nobility or gentry, but for his own ends, he made it plainly appear at Oxford, where he procured fundry of the
 Eng-

English nobles, and many gentlemen, members of the House of Commons, to recede from the Parliament at Westminster, and convene at Oxford, where himself was ; and after that this mock Parliament, to satisfy his desire, had convened and assembled, done what they could, and thereby engaged their persons and estates for him ; yet, because they would not in all things comply with his tyrannical humour, in a letter of his unto the Queen, he complains of them unto her, and said, ‘ He was so troubled with a ‘ mongrel Parliament, he could do no-
‘ thing, &c.’ This scornful epithet, or badge of disgrace, was all the reward any of those unfortunate gentlemen had from him ; but it was just they should be so paid their wages, that in so traiterous a way deserted the Parliament at Westminster, which sits to this day, &c. He cared not much for the Common Law, or very much for the Long Gown men ; he learned that disaffection of his from his father Jemmy, who could not endure the Lord Chief Justice Coke, because he ever said the Prerogative was bounded by Law, and was limitable ; but that excellent patriot was worsted for his dear affection to his country, by Egerton the Chancellor, who maintained the contrary ; and was worthily as well rewarded by the old Scot

for his labour, Jemmy taking the Great Seal from him before he was dead, yea, in a disgraceful manner. The Commonalty of England he neither cared for, took much notice of, or much disrespected; holding this opinion only, because he was their King, they ought in duty to serve him. The Citizens of London, though they much courted him with their flatteries, and large gifts, and in his latest extremities relieved him with considerable sums of money, yea even at Oxford in soap barrels; yet he slighted them, thought them ever too rich, and intended for them a severe revenge. Had he ever mastered the Parliament, he was advised, by one I well knew, to have demolished half the city: what he would have done had he been victorious, God knows. He would often say, it was the nursery of the present rebellion, for so he called the wars, &c. and that the body of the city was too large for the head. I have heard it from the mouths of many worthy gentlemen, whose hap it was to serve him in the late wars, that they did believe, had he, *viz.* the King, by arms conquered this Parliament, he would have proved the greatest tyrant the English nation ever had to rule over them, and therefore they did still pray for a reconciliation betwixt the Parliament and Him, but could never
endure

endure to hear he should conquer our armies, &c. And so much in a manner dropped out from the mouth of Rupert, who giving command for executing some things contrary to the laws; and being acquainted with his mistake, "Tush," quoth he, "we will have no more law in England henceforward but the sword." He had a natural imperfection in his speech, at some times could hardly get out a word, yet at other times he would speak freely and articulately; as the first day of his coming before the High Court of Justice, where casually I heard him; there he stammered nothing at all, but spoke very distinctly, with much courage and magnanimity. As a man he had his imperfections, for he was very covetous and gripple, and sparing of his treasure (qualities nothing commendable in a King;) and if at any time liberal, it was rather to the undeserving or boisterous fellows, than well meriting: by how much the more humbly any made their addressees unto him, by so much the more was he imperious, lofty, and at a distance with them; whereupon it most an end happened, that the impudent and bold were rewarded, and the virtuous slighted; which imperfection of his enforced a bold-spirited Courtier to say, ' There was no way ' to get any boon from him, but by im-

‘pudence, and cajoling him with unbecoming language.’ Yet he himself was never obscene in his speech, or affected it in others. I have only met with, or taken notice of, two passages, which argue him guilty of unbecoming language. First, in all or most of his letters unto the Queen, he terms the Parliament rebels, though they were lawfully convened, and not dissolved, or to be dissolved, without their own consent; but time, and their victories, acquainted him with more civil language, and taught him to style them a Parliament. In another letter of his unto her, he calls the Lord General Fairfax, who was then the Parliament’s General, their brutish General; a most uncivil term and epithet to bestow upon so brave a man, so civil, so valiant, and so much a gentleman as Fairfax was, and is. Assuredly the progenitors of the Lord Fairfax were gentlemen, and of good estates then, and at what time the ancestors of the Stuarts were but poor stewards unto a family in Scotland: and what a preferment it is now, or was some three hundred years since, to be bailiff or steward unto a Scottish family, let the whole world judge; for this was the true original of the rise and growth of the family of Stuarts, and no other; though since by marriage they came to be

Kings

Kings of Scotland, (as their own chronicles relate). He did not greatly court the ladies, nor had he a lavish affection unto many. He was manly, and well fitted for venerious sports, yet rarely frequented illicit beds. I do not hear of above one or two natural children he had, or left behind him. He had exquisite judgment by the eye, and physiognomy, to discover the virtuous from the wanton. He honoured the virtuous, and was very shy and choice in wandring those ways, and when he did it, it was with much cautiousness and secrecy; nor did he prostitute his affection, but unto those of exquisite persons or parts: and this the Queen well knew; nor did she wink at it. He had much of self-ends in all that he did, and a most difficult thing it was to hold him close to his own promise or word: he was apt to recede, unless something therein appeared compliable, either unto his own will, profit, or judgment; so that some foreign princes bestowed on him the character of a most false prince, and one that never kept his word, unless for his own advantage. Had his judgment been as sound, as his conception was quick and nimble, he had been a most accomplished gentleman: and though in most dangerous results, and extraordinary serious consultations, and very material, either for state

or

or commonwealth, he would himself give the most solid advice, and sound reasons, why such or such a thing should be so, or not so; yet was he most easily withdrawn from his own most wholesome and sound advice or resolutions; and with as much facility drawn on, inclined, to embrace a far more unsafe, and nothing so wholesome a counsel. He would argue logically, and frame his arguments artificially; yet never almost had the happiness to conclude or drive on a design in his own sense, but was ever baffled with meaner capacities. He feared nothing in this world, or disdained any thing more than the convention of a Parliament; the very name was a bugbear unto him. He was ever refractory against the summoning of a Parliament, and as willingly would embrace an opportunity to break it off. This his averfeness being well known to some grave members, they contrived at last by wit, and the necessity of the times, that his hands were fast tied up in granting a triennial sitting, or a perpetuity as it were unto this present Parliament; a thing he often blamed himself for subscribing unto, and as often those who importuned him thereunto. And therefore I wonder at that passage of his (if it was his, which I doubt of) in that book published under
his

his name, and called his PORTRAITURE, wherein he maintains this Parliament was called as much by his own choice and inclination, as advice of others : whereas it is manifestly known even unto all, it was only necessity, and the importunity of the English, who would not fight with the Scots, and this only cause was it which gave occasion for calling of this Parliament ; the Scots at present being possessed of Newcastle. For the book itself, it maintains so many contradictions unto those things manifested by his own letters, under his own hands, unto the Queen, that I conceive the most part of it Apocrypha ; the Meditations or Psalms wholly were added by others : some loose papers he had, I do well know, but they were nothing so well methodised, but rather papers intended after for the press, or as it were a Memorial or Diary, than such a well couched piece, and to so little purpose. But it is answered by the learned Milton. He was seldom in the times of war seen to be sorrowful for the slaughter of his people or soldiers, or indeed any thing else : whether by nature or custom his heart was hardened, I leave for others to judge. When unfortunately the Parliament had lost some of their men in the west, at Marlborough, and the Devizes, and they brought in a
miserable

miserable condition, without hose or shoes, or scarce cloaths, into Oxford as a triumph, he was content to be a spectator of their calamities, but gave neither order for their relief, or commands for ease of their sufferings; nay, it was noted by some there present, he rejoiced in their sad affliction. So afterwards, when Hambden was wounded, or near that time in Buckinghamshire, it happened a very valiant soldier of the Parliament's side to be taken, stript stark naked, his body being shot in many places, and his shoulder broke: this poor soul in this condition and pickle, was set on a poor lean jade, and brought as a triumph before the King, where he stood accompanied with many Nobles. It would have pitied any one's heart, to have heard how this poor man was reviled and upbraided by lewd people, even as he passed close by the King's presence; who neither pitied the man, rebuked the unruly people, or gave order for cure of his wounds: but God cured the soldier instantly, for he died ere he was forty paces from the King's presence; and notwithstanding the misery of the man, and sharpness of his wounds, yet was the greatness of his spirit and courage so undaunted, that he rode very upright upon the poor jade, nothing daunted either at his own present condition,

dition, or presence of the King. It was observed, that a lewd woman, as he passed by, calling him Rebel, he only looked sternly at her, and said, 'You whore.' Some Nobles seeing the hard-heartedness of the King upon this sad accident, and how little he valued those who either fought for or against him, upon this meer occasion deserted him, and came for London, &c.

Even the looks and gestures of Princes are observed, you may see, and several either good or ill constructions grounded thereon. He was observed in his diet to feed heartily, and would drink wines at meals freely, but not in excess. He was rather violent than moderate in exercises: when he walked on foot, he rather trotted than paced, he went so fast. He was nothing at all given to luxury, was extream sober both in his food and apparel; in the latter whereof he might rather be said to go cleanly and neat, then gaudy or riotously; and as to the former, he rather loved sober, full and substantial dishes, than kickshaws, which the extravagant Nobles feed for their wantonness sake; though many times, ere they are satisfied with curiosities in diet, their estates lie pawned for them. In the general he was not vicious; and yet who ever shall say he was virtuous, extreamly
errs.

errs. He was a medley betwixt virtue and vice. He was magnificent in some measure, and was the only cause of the building that miracle of ships called the Royal Sovereign: and when some of his Nobles acquainted him with the vast charge thereof, he replied, ‘Why should
 ‘not he be admitted to build that ship
 ‘for his own pleasure, and which might
 ‘be upon occasion useful for service of
 ‘the kingdoms, as well as some Nobles
 ‘prodigally spent their patrimony in riotous and ungodly courses, nothing either
 ‘for their credits or reputations, or any
 ‘way beneficial to the kingdom?’ It was wisely said of him at that time, ‘Every
 ‘man had his proper vanity, and that was
 ‘his, if the people accounted it so.’ He was ill thought of by many, especially the Puritans then so called, for suffering the chapel at Somerset-House to be built for the Queen, where mass was publickly said. Yet was he no Papist, or favoured any of their tenets; nor do I remember any such thing was ever objected against him. Myself was once there to gaze, whilst the priest was at high mass: the sexton and others thrust me out very uncivilly, for which I protested never to come there again.

The actions of Kings and Princes are lookt upon with many eyes, whereof some
 ever

ever prove either squint or purblind. So long as we live in this world, our conversation cannot be with saints, but with the sons of Adam, who ever smell of some corruptions. Many also have blamed him for writing unto the Pope when he was in Spain: others think ill of him for the many reprieves he gave unto seminary priests; and Mr. Pryn sweats to purpose in aggravating his offence thereby. Why he might not as well in a civil way write unto the Pope, as write and send his Ambassador to the great Turk, I know not: and for his mercy to those priests, who had not occasioned rebellion in his dominions, truly charity bids me to make rather a good than ill construction. And were not the common law of this nation more in force than that canon of scripture, those things could not be justified, putting men to death for religion, or taking orders beyond sea, &c.

He was ambitious, and disdained in his youth to match with any of the English ladies; and therefore, upon hopes of a marriage with the present King of Spain's sister, Monday the 27th of Feb. 1622. he set forward for Spain, went first into France, and from thence with his high thoughts passed the mountains. Neither had he success in the marriage desired, or did he get honour by that journey, although

though most magnificently entertained in Spain. Some private disgusts happened there and in that voyage, infomuch as he never, after his return into England, much cared for the Spaniard; which he made publickly known in several years of his reign. He was accompanied to Spain with the Duke of Buckingham, one whom formerly he extreemly hated, but after that journey as extreemly fancied, being his only great favourite. People generally were nothing satisfied with that his journey undertaken so rashly; yet many sober men judged very well of the marriage itself, and these did publickly aver, the Spaniard was rich, and a brave man, would not be troublesome unto us with unnecessary visits, would ever bring gold in his pockets; was a people, with whom the English merchants had a great and rich trade, and with whose natural conditions the English did pretty well sympathise; and for the Infanta's strictness in the Roman religion, there was by many prudent men very little question made, that it would produce any ill to this nation, which now had been Protestant above sixty years: and they did also consider that the Prince was very surely grounded in his own Protestant faith, and that the common law would well provide for the multiplicity of priests, who might
 presume

presume to come upon her account. The 27th of March, being Sunday 1625, King James died. All that whole year a most furious plague afflicted the city of London, there dying above fifty thousand people. Amongst those, whose misfortune it was to abide in the city, during that pestilent contagion, myself was one, and therein beheld God's great mercy unto me, being nothing at any time visited, though my conversation was daily with the infected. And I do well remember this accident, that going in July 1625, about half an hour after six in the morning, to St. Antholine's Church, I met only three persons in the way, and no more, from my house over against Strand-bridge, till I came there; so few people were then alive, and the streets so unfrequented.

In June 1625, Mary, daughter of Henry the Fourth, King of France, came over, and was married to the King the same month. Several constructions were made upon this marriage with France, and many disputations in private were had, whether she or the Infanta might have been better for this nation. However the Parliament, in regard of the sickness, was translated to Oxford, August 1, 1625, and the 12th of the same dissolved. There are two main reasons
O given

given for its dissolution: one was, because the Duke of Buckingham his own favourite, should not be questioned concerning King James's death; and the second was, his Majesty made several propositions unto the people, which they would not consent unto. That King James was really and absolutely poisoned by a plaister, applied by Buckingham's mother unto King James's stomach, was evidently proved before a Committee. But whether Buckingham himself, or the late King, was guilty either in the knowledge of, or application of the plaister, I could never learn. Many feared the King did know of it, and they gave this reason; because, when the Parliament did order to question Buckingham for it, and had prepared their charge or articles, to present against him in the House of Lords, and to accuse him thereof, his Majesty, contrary to all expectation, and as an affront of both Houses, and in the Upper House, when the articles came up, gave Buckingham his hand to kiss, carried him away with him, &c. This action lost him the present Parliament's affections. Even the most sober of his friends held him very much overseen to deny a Parliament justice in any matter whatsoever; but in matter of poison, and the party poisoned being his father,

in

in that to prohibit a due course, or a legal proceeding against the party suspected, it was to deny justice with a refractory hand. But at that time he was lusty and young, and in his infancy of convening Parliaments, thought to make himself sure ever after, or to master the Commons of England. There is no pen, how able soever, can take off the blemish that will ever hang on him, for falling out with his Parliament, because they questioned, how and by what means his father came to his death.

The second of February 1625, he was crowned at Westminster. William Laud altered the old coronation oath, and framed another new. And in March following was a Parliament again summoned, and therein Montague questioned for Popish and Arminian tenets; and Buckingham was again also put to it by the Commons. In time of this Parliament he sent for the Bishops, and blamed their backwardness, for that they did not inform him, how he might promote the cause of the church. Indeed, he did well know what fawning Jacks most of them were, and how easily he might with hopes of profit win them to his side: they made up a good part of the House of Lords in number. Here, again the Houses of Parliament were troubled with Buckingham

and Bristol, who was the wiser man of the two, but had least friends. These framed bills, and accused each other of treason. At that time most men pitied Bristol, and thought him ill rewarded for all his service in Spain; for it was conceived he acted not but according to commission. In this Parliament he committed Sir Dudley Diggs, and Sir John Elliot, Members of the House of Commons, because they most rigorously had managed an accusation against Buckingham: An high affront it was to the Parliament, and a great breach of privilege to commit a Member of that House, without the House's consent: that matter was much resented and very ill taken. By those and other his high miscarriages unto both Houses, they began to mistrust him; many gave sad conjectures of his actions, and thought that in the end he would either have or lose all. June 15, 1626, he dissolves the Parliament, only because they should not prosecute Buckingham. An argument of sound affection unto his favourite, to hazard the love of millions only for him; but a deep imprudence and high oversight, to slight a whole nation for love only of one man, and he but of yesterday; or a new creature, of but his father's stamping, and his own continuing.

It was in August this year, that Tilly overthrew his uncle the King of Denmark

mark in a pitch field. How the King carried the business with his uncle, or what treasure he promised to supply him with, and did not perform, I know not. Sure I am, the old King, after this fight, could never endure our King, but would swear, he endeavoured what in him lay to make him lose his kingdom. This I had from the mouth of Dr. M. who heard the King of Denmark speak what I write.

In *Anno* 1627, he set forth men and ships to the Isle of Rhé in France, under the conduct of Buckingham. We lost our best men in that scurvy design, who were no better than butchered by the French, through the indiscretion of some that had principal command therein. But give me leave, before I proceed farther, to relate what I had from the mouth of an eminent Colonel, employed in that successful expedition, and one of the Council of War, and a sworn enemy to the Duke. Buckingham I well know was extremely blamed about the loss of our men, the day of their retreat unto the ships. The matter was thus carried: The night before the retreat, the Duke called a Council of War, and there shewed them the necessity of their retreat the next day, and that himself in martial discipline being wholly unexperienced, he left the managing of the next day's action

to the ordering of the Council of War, offering the service of his own person unto any hazard whatever as far as any private foldier. The Council committed the management of their retreat, by a free consent, unto old Sir William Courtney, a heavy dull covetous old man, who having been twenty or thirty years a private Captain in Holland, was, by Sir John Burrows's means, made Colonel in that expedition. And Burrows being now dead, and Courtney the oldest Colonel, it was referred unto him how with safety to bring off our men. But he, either through want of judgment, or forgetfulness, having not sufficiently provided for security of our rear, our men were most unfortunately many of them cut in pieces: and had not Sir Pierce Crosby with eight hundred Irish made good the retreat, all our men had been lost. Courtney himself fell into a salt-pan in the defeat, and was saved by means of his man Anthony's crying, 'O save my Captain:' but the poor fellow lost his own life, and saved his master's.

A bullet by chance, during their stay in that island, was shot at the said Courtney; and he having a piece of gold of twenty one shillings price in his fob, the bullet light there, bent the gold, and so he was preserved. Courtney, at his return,

turn, shewed me the gold, and told me the story. The King hearing of our loss at the Isle of Rhé, and landing of the Duke, instead of being angry at the loss of so many gallant men, or calling him to account, sent to comfort the Duke, desiring that he should not be troubled at the loss, for the chance of war was casual.

And now we are speaking of Rochelle, let me acquaint the world, that his Majesty was the sole cause of its losing, for he lent the King of France eight or ten of his own navy, by which means the Rochellers ships were sunk and destroyed; who before were ever able to relieve themselves with their own ships, against all opposition the Kings of France could make. And that it may appear, he willingly lent these ships unto the French, and was not forced unto it by Buckingham, as many have affirmed, I will relate this passage, perhaps not vulgarly known. Sir John Pennington, being Vice-Admiral, had commission to carry eight or more royal ships into France. When he arrived there, the French acquainted him the ships were to serve the French King against the Rochellers; and if that he the said Sir John would serve in that employment, he should be honourably rewarded. But this gallant man

being truly English, scorned the proffer, and utterly refused the employment, and ere he would resign the ships unto the French, came privately himself unto the King, and informed the King of the French intentions against Rochelle. But the King said only thus much: ‘ Pennington, go and deliver your ships, and leave them in France:’ and then gave him a particular or private warrant under his own hand for his discharge, &c. He had much ado to get his ships again from the French, and then was enforced to send Sir John Pennington amongst the French, who seized above a hundred French ships, and kept them until ours were delivered. One thing is observable, that we had only two sailors assisted against Rochelle in our ships, and no more. This I relate in honour of the seamen.

The destruction of Rochelle is wholly laid upon our King’s score, as well and justly it may be, to his eternal dishonour and blemish; for had he not furnished the French with ships, Rochelle could not have been taken as it was. And verily I believe, the sad groans and miseries of those poor Protestants poured out unto Almighty God in their height of calamities against our King, were extreme instrumental in hastening down the anger of God against the late King. However,
this

this action of his lost him the love of the Protestant Princes in all parts of the world, and his own subjects could after that action never well brook him, but daily were alienated in their affection from him, supposing him either not well grounded in the Protestant Faith, or else a meer state-juggler and no other. I know some have accused Buckingham to be instrumental about the lending those ships: 'tis possible he was. However, in March 1627, a Parliament was summoned again, Buckingham articted against, and in June prorogued until October; after in March dissolved, because William Laud was remonstrated against by the Commons, his ruin laboured. There were also articles exhibited against Buckingham in the Parliament, but the latter of the two, *viz.* Buckingham was stabbed the 23d of August 1628, he being ready to go unto sea for relief of Rochelle, then besieged. Many complained of the King in this his various action about Rochelle, *viz.* in first aiding the French to destroy the Rochellers ships, then to take part with them against the King of France; but to no purpose. Some therefore compared him to a black witch, whom they say can bewitch and hurt cattle, but hath no ability to cure them again. It was an act of great inconstancy, and much dishonour
to

to himself and whole nation, though the nation had no hand in it. When first the news was brought unto the King of Buckingham's death, he was at a sermon, or in a church, or at service. He did not seem much troubled at the news, but stayed out the sermon with much patience, only gave Maxwell present directions to seize the Duke's cabinet, wherein his letters and private instructions were. All men generally, except a few court parasites, were glad of Buckingham's death: yet nothing was bettered in the court or commonwealth after his death; which moved many to affirm, that all the misgovernments in the realm proceeded not from Buckingham's ill advice, but most from the corrupt and depraved nature of the King's own haste. Sith I am upon the death of Buckingham, I shall relate a true story of his being admonished often of the manner of his death he should die, is this manner.

An aged gentleman, one Parker, as I remember, having formerly belonged unto the Duke, or of great acquaintance with the Duke's father, and now retired, had a dæmon appeared several times unto him, in the shape or image of Sir George Villiers the Duke's Father. This dæmon walked many times in Parker's bed chamber, without any action of terror, noise,
hurt,

hurt, or speech; but at last one night broke out into these words: ‘ Mr. Parker; ‘ I know you loved me formerly, and my ‘ son George at this time very well: I ‘ would have you go from me, you know ‘ me very well to be his father, old Sir ‘ George Villiers of Leicestershire, and ‘ from me acquaint him with these and ‘ these particulars, &c. and that he above ‘ all refrain the counsel and company of ‘ such and such,’ whom he then nominated, ‘ or else he will come to destruction, and ‘ that suddenly.’ Parker did partly, though a very discreet man, imagine he himself was in a dream all this time, and being unwilling to proceed upon no better grounds, forbore addressing himself to the Duke; for he conceived, if he should acquaint the Duke with the words of his father, and the manner of his appearance unto him, (such apparitions being not usual) that he should be laughed at, and thought to dote, being he was aged. Some few nights passed without further trouble to the old man. But not very many nights after, old Sir George Villiers appeared again, walked quick and furiously in the room, seemed angry with Mr. Parker, and at last said, ‘ Mr. Parker, ‘ I thought you had been my friend so ‘ much, and loved my son George so ‘ well, that you would have acquainted ‘ him

‘ him with what I desired, but yet I
 ‘ know that you have not done it. By
 ‘ all the friendship that ever was betwixt
 ‘ you and me, and the great respect you
 ‘ bear my son, I desire you to deliver what
 ‘ I formerly commanded you unto my
 ‘ son.’ The old man, seeing himself thus
 solicited in this manner, promised the dæ-
 mon he would; but first argued it thus :
 That the Duke was not easy to be spoke
 withal, and that he would account him
 a vain man to come with such a message
 from the dead; nor did he conceive the
 Duke would give any credit unto him.
 Whereunto the dæmon thus answered;
 ‘ If he will not believe you have this dis-
 ‘ course from me, tell him of such a
 ‘ secret,’ and named it, ‘ which he knows
 ‘ none in the world ever knew but my-
 ‘ self and he.’ Mr. Parker being now
 well satisfied, that he was not asleep, or
 that the apparition was a vain delusion,
 took a fit opportunity therefore, and seri-
 ously acquainted the Duke with his fa-
 ther’s words, and the manner of his ap-
 parition. The Duke heartily laughed at
 the relation, which put old Parker to a
 stand: but at last he assumed courage,
 and told the Duke, that he acquainted
 his father’s ghost with what he now found
 to be true, viz. scorn and derision: ‘ But
 ‘ my Lord,’ saith he, ‘ your father bad
 ‘ me

' me acquaint you by this token, and he
 ' said it was such as none in the world
 ' but your two selves did yet know.'
 Hereat the Duke was amazed and much
 astonished; but took no warning or no-
 tice thereof, keeping the same company
 still, advising with such counsellors, and
 performing such actions, as his father by
 Parker countermanded. Shortly after,
 old Sir George Villiers, in a very quiet
 but sorrowful posture, appears again un-
 to Mr. Parker; and said, ' Mr. Parker, I
 ' know you delivered my words unto
 ' George my son; I thank you for so
 ' doing: but he slighted them; and now
 ' I only request this more at your hands,
 ' that once again you repair unto my son,
 ' and tell him, if he will not amend, and
 ' follow the counsel I have given him,
 ' this knife or dagger,' and with that he
 pulled a knife or dagger from under
 his gown, ' shall end him; and do you
 ' Mr. Parker set your house in order, for
 ' you shall die at such a time.' Mr. Par-
 ker once more engaged, though very un-
 willingly, to acquaint the Duke with
 this last message, and so did; but the
 Duke desired him to trouble him no fur-
 ther with such messages and dreams: told
 him, he perceived he was now an old
 man, and doted. And within a month
 after meeting Mr. Parker on Lambeth-
 Bridge,

Bridge, ‘Now, Mr. Parker, what say you of your dream?’ Who only returned, ‘Sir, I wish it may never have success,’ &c. But within six weeks after, he was stabbed with a knife, according to his father’s admonition before-hand; and Mr. Parker died soon after he had seen the dream or vision performed.

The 29th of May, 1630, being Saturday, near unto one in the afternoon, the present King of Scotland was born. The next day the King came to Paul’s-Cross; to give God thanks for the birth of his son, where were presented unto him these verses :

Rex ubi Paulinias accessit gratus ad aras,
 Immicuit medio lucida stella polo.
 Dic divina mihi tractans ænigmata cœli,
 Hæc oriens nobis, quid sibi stella velit?
 Magnus in occiduo princeps modo nascitur orbe;
 Moxque sub eclîpsi regna orientis erunt.

About May, 1633, he went into Scotland, and was crowned there the 18th of June, ☉ in 7° 25, ♃ in 7° 17. In July he had a dangerous passage from Brunt-Island, and hardly escaped drowning. Some of his household-stuff or plate was lost.

In 1634, he was infinitely troubled with faction in his court, which much displeased him; but by little and little he put all things in order again. Then also he levied

levied a general great tax upon the whole kingdom, vulgarly called Ship-money, because it was pretended it was for maintenance of the navy: and truly much of it was that way expended, and the sailors well paid their wages; which occasioned for two years together a good fleet of royal ships to be set forth, much for the honour of the nation.

This ship-money was generally misliked, being a mere innovation, and a cleanly trick to poll the subjects, and cheat them into an annual payment. Myself was then a collector for it in the place I lived in. I remember my proportion was twenty two shillings, and no more. If we compare the times then, and the present in which I now live, you shall see great difference even in assessments, the necessity of maintaining our armies requiring it: for now my annual payments to the soldiery are very near or more than twenty pounds, my estate being no way greater than formerly. Against this ship-money many gallant men opposed, and at last in Parliament it was voted down.

In July 1637, viz. 23d day, there was great disturbance in Edinburgh, about a new Service-Book endeavoured to be obtruded on the Scots by the King and Canterbury. I have heard, an old woman begun the quarrel by casting her stool

stool at the priest, when he read the Service-Book. Many very modest divines exceedingly blame both the King and Canterbury for that book; it admitted unto the people, as I remember, the Communion but in one kind. However, by the prudence of some grave men, being then Privy-Counsellors in Scotland, matters were slubbered over all that winter in Scotland; but in May, or April, new tumults arose, and truly I may almost say, that that corrupt Common-Prayer-Book was the sole and whole occasion of all the miseries and wars that since that time have happened in both nations. Had his Majesty first endeavoured the imposition of that same book upon the English, most men did believe we had swallowed it, and then the Scots must have done it afterwards; for the clergy at that time generally were such idle and lazy lubbers, and so pampered with court preferment, and places temporal in every shire of England, and such flattering sycophants, that doubtless the great hand of God was in it, that those rude Scots first broke the ice, and taught us the way to expel an insulting priesthood, and to resist the King; he endeavouring by unwarrantable means to intrude things contrary to the divine law of Almighty God upon our consciences.

In

In Anno 1638, the Queen-mother of France, and mother unto the English Queen, widow of Henry the fourth, King of France, landed in England, and came unto London the 31st of October. She was very meanly accompanied, and few of quality attending her. The King most humanely and generously receives and entertains her, though all men were extremely against it; for it was observed, that wherever, or unto what country this miserable old Queen came, there followed immediately after her either the plague, war, famine, or one misfortune or other. Strange it is unto me, how she could be so fatal to any land she entred into. True it is, and I do very well know, that some people born under an unfortunate constellation of heaven (without this, that they live above nature, and live wholly in the spirit) are so extreme unsuccessful in every thing they undertake, that let them use the greatest industry they can to be rich, all will not amount to obtain a poor living, though they are assisted not only with a good stock of money to begin their profession with, but have also many very profitable and assisting friends, and means for their better encouragement and furtherance. It is very possible, that such like ill fortune from her infancy might attend this

old Queen, as to be thought an unlucky presage of what mischief presently followed her in those countries she resided in.

In November, proclamation was made to dissolve the great assembly in Scotland, but to little purpose; for the Scots have this privilege belonging unto them, that where, and when they please, to obey no edicts or commands of their Kings, except those edicts fancy their own humours. This proclamation was laughed at, and slighted by the Scots, who made it appear they were in good earnest, and began to raise an army for their own defence, by no means enduring the half Popish Common-Prayer-Book. This raising of an army by the Scots, in opposition of the Common-Prayer-Book, made our prelates prick up their ears, and the lazy bishops most of all, who convened, and raised, amongst their own Levitical Tribe great sums of money towards the maintenance of an army against the Scots, whom they now hated worse than Turks. Several particular men are summoned to appear at court, are enforced to lend vast sums of money towards the maintenance of an army. I have heard some affirm, the King had in his coffers at that time above six hundred thousand pounds: No
great

great sum for so provident a prince, and such large incomes as he had.

In or about the 27th of March 1639, the King set forward towards Scotland. His army followed immediately: the Earl of Arundel being made general, a man of great nobility, courage, and resolution, and one whose ancestors had been generals several times against the Scots with excellent success. There attended the King in this expedition most of the nobility of this nation, but with great unwillingness; for the English and Scots having now lived like brethren, or natives, or people of one nation, one amongst another for almost forty years, and having intermarried one with another, both the nobility or gentry, and others, they thought it a very strange thing, and not lawful or convenient, that this nation should now take up arms, and engage against the Scots, only to satisfy the insatiable lust of a few domineering priests, and half popish bishops; as also of an obstinate King, wholly led by the nose by these snuffling Priests. The common soldier was nothing well pleased, and marched most unwillingly upon this service. At last both armies, for many days, accosted each other; yet I never heard of so much as one louse killed by either army; the Scots being

very tender of provoking the English, and they as willing to give no offence unto the Scots. In June of that year a peace was concluded betwixt both nations, the English nobility much desiring and furthering it.

The King himself was most greedy above all men of this union with the Scots, as will appear by this ensuing story. That day which was assigned for certain of the English nobility and Scottish to treat about those articles of agreement or pacification the Scottish nobility were to produce; the nobles of each nation being set, the Earl of Arundel began with much gravity to rebuke the Scots for their unadvisedness and rebellion in raising their army against their lawful King, and disturbing the peace of both nations; and yet he commended the good nature of the King, who was, notwithstanding their high provocations and misdemeanors, very inclinable to hear their just grievances, and to that purpose had appointed himself, being General of the English army, and some other select nobles of his council, to meet them that day, to treat with them, and to hear their grievances, and what they could say for themselves. This gallant man was proceeding further in his speech, and aggravating the Scots offences, when, lo,

unexpectedly his Majesty entered the room, called for the articles the Scots desired to be ratified, or consented unto, read them scarce over, but took pen and ink immediately, and signed them, without ever advising with any of his council; which so displeased the nobility of the English nation, that the very next day after signing the Scots articles, they all hastened home to their own habitations; the King staying behind, and for his daily exercise, played at a scurvy game called pigeon-holes, or nine-pins. His fellow gamesters also were equal to the game, *viz.* lackeys, pages, and such others, *ejusdem generis*. He again no sooner came to London, but as I remember, caused those articles to be burned by the common hangman; making himself as ridiculous in doing the one, as he was reputed weak and simple of judgment in doing the other. But at that time most imputed the burning of the Scots articles, unto the advices given him, and importunity of the proud clergy and bishops, who humoured him in every itching desire of his, even to his ruin.

There happened many memorable accidents in this year 1639; as first, five eclipses of the sun and moon; three of the sun, two of the moon; none was

visible in our horizon, but the eclipse of the sun, which here began with us at London the 22d of May, being Wednesday, at 3 hours and 52 minutes after noon; its middle was at 4 hours and 52 minutes, and its end at 46 minutes after 5. The digits eclipsed were 8. 51 minutes, 41 seconds; the whole time of its continuance was 1 hour, and 54 minutes of time: The scheme of heaven follows.

His Majesty was in the field against the Scots at the very time of the eclipse; and some that were there with him said,
 ' They

‘ They felt not a more sharp cold day in
 ‘ all their lives than that was, the season
 ‘ of the year, and height of the sun con-
 ‘ sidered. I’ll meddle little with the prog-
 nostick part of this eclipse : yet I might
 tell you, that Mercury, at the time of
 the beginning of the eclipse, represented
 the clergy, and he was retrograde near to
 conjunction with Mars : one ill omen unto
 the clergy. At the middle of the eclipse
 the moon was their significator, and she
 combust and near the dragon’s-tail, which
 signified much calamity unto the priests.
 This eclipse signified unto the King much
 treachery and damage by his friends the
 Scots ; the degree eclipsed was in the op-
 posite degree, almost, of the sun in his
 radix. As this eclipse shewed his troubles,
 or their beginning ; so the moon’s eclipse
 in 8 ♄ in 1648, ended his afflictions,
 &c.

The effects of this eclipse had most in-
 fluence upon the King of Spain, it falling
 even in the very degree of the seventh
 house ; so that upon the 11th or 12th of
 October 1639, upon our English coast,
 and under our noses, almost in our har-
 bour, the Hollander burnt and sunk a
 great navy of his, with many miserable
 souls in the navy, which were to be land-
 ed in Flanders. I know some have not
 stuck to affirm, that the eight thousand

men, transported in the Spanish navy, were intended to have been landed here in assistance of his Majesty: but it was a meer untruth; for who could have hindered their landing in Kent, if his Majesty had commanded it? Sure I am, the Spaniard took it ill at his Majesty's hand, that he suffered them to perish so near our harbour. They also took exception, that his Majesty having promised them ammunition and powder, which it seems they wanted, it came not at the place for them, either by neglect or treachery of our officers, until they were worsted. The truth of the story of these eight thousand Spaniards in the navy was thus. There was a part of that country where the Walloons inhabit, under the dominion of the King of Spain, in the Netherlands, which was taken notice to be very disaffected unto him: now upon landing these amongst the Walloons, so many of that people were to have been transported into Spain, &c. When his Majesty first heard of the Spanish and Dutch fleet, and their near approach, he said to one standing by him, 'I would I were well rid of both navies.' To speak the truth of him, either as he was virtuous or vicious, is not to wrong him; but in every trivial miscarriage to make him the

author

author of it, I hold it barbarous, and not the part of an honest moral man.

In this memorable year, the Scots, by act amongst themselves, thrust out all bishops; who after came sneaking hither, and had by Canterbury's means large and plentiful exhibitions for their maintenance. His Majesty took the expulsion of the bishops so ill, as that he resolved to check the sauciness of the Scots, his dear countrymen, and caused their trade with us to be prohibited, and their ships to be seized; which so enraged the Scottish nation, that they were again in 1640 in arms. The King summons a Parliament in April about the Scots, which Parliament would not give a farthing unto him towards maintenance of his intended army against the Scots; therefore in May he dissolves the Parliament; which gave great discontent all over the nation, and great encouragement unto the Scots: whereupon their army was suddenly ready, and their presumption such, as without invitation, they, the 17th of August 1640, entered England. The King prepares an army of English to resist them: but such was the general inclination even of the common soldiers, and so great an odium or hatred was cast upon William Laud, Archbishop of Canterbury, that nothing would serve the common soldiers but

but a Parliament; not a man of the English would fight against the Scots, who were now crept into the strong town of Newcastle: our soldiers were mutinous, the officers generally disaffected to the service: in some countries the new raised soldiers slew their officers, and would not go. All these commotions moved the King little to desist from the war, being continually furthered by the bishops and clergy, who in their convocation gave a large benevolence towards the maintenance of those wars, and commanded their tribes in their several pulpits to inveigh, and cry aloud against the profane Scots, and to persuade the people to assist as willingly as against Infidels or Turks. His Majesty again commanded the nobility to attend him in this Northern expedition, who leisurely, and rather unseasonably or unwillingly, than otherways, attended him at York.

All men knew this war was promoted by the clergy, whom the nobility began to disdain and scorn, and the gentry and yeomanry of England extreamly to hate; for at this present time the high commission-court, and other bawdy courts, did most horrible injustice against the persons and estates of any gentleman, who by misfortune came thither. There was also one Wrenn, bishop of Norwich,
born

born in London, a fellow whose father sold babies and such pedlary ware in Cheapside. This fellow very peremptorily one day, as he sat in Judicature in the High Commission-Court, said openly, 'He hoped to live to see the time, when a Master of Arts, or a minister, should be as good a man as any Jack gentleman in England.' And verily the pride of this saucy citizen's son, hath been one main cause of the ruin of the clergy. Concerning this Wrenn, I know Canterbury preferred him, and brought him to those Ecclesiastical advancements in court and church, which he enjoyed. I do also know, and have heard it from some who waited on Canterbury in his chamber, that he would oft say, that the rash actions and unwarrantable proceedings of this Wrenn would undo the clergy; but in regard he had been the sole means of his advancement, he could not well do any act prejudicial against him, but it would redound to the dishonour of himself, and the clergy in general: also he had many reluctancies in himself, for preferring so unworthy a scornful fellow, who proved the scandal and scorn of churchmen, and an extraordinary plague to the whole nation. For upon his plaguing and punishing many godly clothiers in the countries of Norfolk and Suffolk,

Suffolk, they were forced to leave their native country, and betake themselves and families into the United Provinces, where they have taught the Dutch the art and manufacture of cloathing, even to the utter impoverishment of this whole nation, &c. and yet this wretched Wrenn lives, &c.

As I remember, near upon, or in this year 1639, or 1640, the citizens of London were miserably abused by a beggarly Knight, one Sir Phillips of Ireland, who exhibited his bill against them, for certain misdemeanors pretended to be committed by some of their sub-officers in Ireland, about the parts of London-Derry. True it is, the citizens of London very gallantly, about the coming in of King James, or not long after, sent colonies of their own in great numbers, and at their own extreme great charges, to settle a civil plantation in the North of Ireland. They had a large patent from King James, and many privileges granted unto them for their so doing and planting. Above thirty years they had quietly possessed their own lands there, had built many beautiful market-towns, one or more city or cities, many churches in the territories assigned them. But near these years of 1639, or 1640, this Sir Phillips demanding some unreasonable things of the citizens,

zens, and being denied them, he in malice exhibits his bill for misdemeanors of their officers, against the Londoners in the Star-chamber; brought the cause unto a hearing; the court of Star-chamber fined the Londoners deeply, adjudged their plantations forfeited to the King, who as eagerly and greedily swallowed them for his own. This very act in or near this exigence of time, so embittered the spirits of the citizens, that although they were singularly invited for loan of monies, and had as great plenty in their possessions as ever, yet would not contribute any assistance or money against the Scots, or advance of his Majesty in this his Scottish expedition. And though I do not attribute these casualties and losses of the cities, to be derived or caused from the eclipse of 1639, although the eclipse was in Gemini, which sign is the ascendant of London: yet certainly, that Eclipse did in a natural way threaten or portend much damage unto them, and did manifest the casualties, but was not the cause.

There was at last a cessation of arms by consent of both parties, Scots and English. Some petty scuffling there was to no purpose. The King, when he saw no other means could be thought on for to serve his turn, and that the common soldier unanimously refused engaging with
the

the Scots, by the constant and earnest desire of the English nobility, which attended him, he with much unwillingness at length was content to give summons for another Parliament to be convened the third day of November 1640. But you must understand in the mean while, when the King saw he could no ways engage the English against the Scots, he had sent unto Ireland for the then present Lord Deputy, the Earl of Strafford, formerly Sir Thomas Wentworth, a Yorkshire gentleman by birth, and one who had formerly been a great stickler against him, until, poisoned with court-preference, he turned Royalist, and so was made Lord Deputy of Ireland; a man of the rarest parts and deepest judgment of any Englishman living; I say, he sent for this Strafford to consult with him about composing these emergent differences. Strafford advises with Canterbury, all to little purpose; for the Bishop was a very ass in any thing but church-matters; the hand of providence now going along with the Parliament and commonwealth, who became masters of all public spirited people, the King daily declining. In April 1641, the Parliament accuse Strafford for several misdemeanors, treasons, tyrannies, &c. against the commonwealth, during his government in Ireland.

Ireland. The Parliament follow it so lustily, that notwithstanding Strafford spoke and defended himself as well as any mortal man in the world could do, yet he was found guilty, had his sentence to die, and did die. Thomas Earl of Arundel being Lord High Steward, the King signed the warrant for his death, either by himself or Commissioners. Thus died Strafford, the wisest politician this nation ever bred.

All men accuse the King for his falseness and cowardice unto this man, who being satisfied in his own conscience, that Strafford was not guilty of treason or death, but only of misdemeanors, yet signed a warrant, either under his own hand, or by commissioners. Some there are who do say, with the same pen, and at the same time, he signed the warrant against Strafford, and also the Act for a triennial or perpetual Parliament, which should not be dissolved without consent of both Houses. Many affirm, the Queen procured him to do both these things: others impute it to Hamilton. It matters not who did it, or persuaded him, it was his ruin, &c.

The matter is not great, who invited the Scots into England: some thought Pim, Hambden, and several other gentlemen were instrumental. It is very like
it

it was true, and that the King knew as much, but could not remedy it. The Parliament however in policy and judgment gave the Scots a round sum of money for their losses, and ordered them to depart this kingdom, which they did; so that in August 1641, the King went into Scotland purposely to pacify and compose the present threatening differences there.

In the same month of August 1641, I beheld the old Queen-Mother of France departing from London, in company of Thomas Earl of Arundel. A sad spectacle of mortality it was, and produced tears from mine eyes, and many other beholders, to see an aged, lean, decrepid, poor Queen, ready for her grave, necessitated to depart hence, having no place of residence in this world left her, but where the courtesy of her hard fortune assigned it. She had been the only stately and magnificent woman of Europe; wife to the greatest King ever lived in France, mother unto one King and unto two Queens. The King cared not much for the Earl of Arundel, being he was of a severe and grave nature, could not endure court-novelties or flatterers, was potent in allies, &c. But there was one thing or cause mainly above the rest, and that was, because the Earl of Arundel
being

being Lord High Steward and Judge in Strafford's trial, gave his voice that he was guilty of treason, &c. The Earl also had but a few years before given the King a touch of his own great heart, and the King's unthankfulness unto him and his family. The case was thus: A priest pretends the King had a right in a rectory: the Earl challenged for his, and had procured Canterbury for his friend and second. The matter had many debates: for Arundel was no fool, but stood stoutly for his right. Canterbury was as violent for the priest, and had procured the King to take cognizance, or hear the matter. The King upon some slight evidence maintained it was his, *viz.* belonged to the Crown. The Earl seeing the obstinateness of the King, and his siding with a petty priest against him, and his proper right, out of the greatness of his heart, said, 'Sir, this rectory was
 'an appendant unto such or such a
 'manor of mine, until my grandfather,
 'unfortunately, lost both his life and
 'seventeen Lordships more, for the love
 'he bore to your grandmother.' This was a smart speech, and home to purpose: it so astonished the King, that he replied pretty mildly, 'My Lord, I would
 'not have you to think that so poor a
 'thing as this rectory or thing in question
 Q 'shall

‘ shall stand in competition betwixt my
 ‘ respect unto you and your family, which
 ‘ I know to be deserving,’ &c. After
 that time the Earl little liked the King’s
 actions, and therefore took this opportune
 occasion of going away with the Queen-
 mother: and when one said unto him,
 his Majesty would miss him; ‘ It is an
 ‘ ill dog,’ said the Earl, ‘ that is not worth
 ‘ whistling; and though he is a King, he
 ‘ will find Arundel’s affection unto him
 ‘ would not have been inconsiderable,’
 &c. Some few years since, this Earl died
 at Padua, being the last man of the
 English nation, that maintained the gra-
 vity and port of the ancient nobility; a
 great lover of antiquities, and of the
 English nation. He brought over the
 new way of building with brick in the
 city, greatly to the safety of the city, and
 preservation of the wood of this nation.
 He was a great patron of decayed gentry;
 and being Lord High Marshal of Eng-
 land, carried too strict an hand against
 the yeomanry and commonalty; for which
 he was nothing beloved, but rather hated
 of them. However, the gentry and no-
 bility owe much unto his memory.

In October 1641, the Irish unanimously
 rebel and massacre the poor English, who
 were not able to relieve themselves, as
 matters at present were handled, wanting
 able

able governors to direct them. And the very truth is, the way which at first was taken to suppress the rebellion, did only support it: for confidence being given to some of the Irish nobility, and many of them furnished with arms, they furnish their own kindred, being native Irish; who were no sooner possessed of arms, but they became errant traitors to the English. A great question will here arise, whether the murder of the English was by consent or commission from the King unto the Irish? Many have affirmed in words and in print publickly, that he should be guilty of such a villanous act; which I cannot believe, in regard I could never have any assured relation, what those commissions were the Irish boasted of, they being only the affirmations of the Catholick Irish, purposely to win others unto their party, and seducing many by saying, they acted by the King's commissions. Had this been true, it had been more than equal unto his assisting for destruction of Rochelle; but I may hope better things, both as he was a Protestant, a Christian, and a King. Yet methink there is little satisfaction given unto this in his late pretended book. Two main things are objected against the King, which that book meddles not with, or answers. First, why his Majesty was

so tender-hearted of the Irish, as not to suffer above forty proclamations to issue out against those rebels in Ireland, and those also to no purpose, or unopportunity, when too late. Besides, to shew his respect unto them, I know he obliterated with his own hands the word Irish rebels, and put in Irish subjects, in a manuscript discourse, writ by Sir Edward Walker, and presented unto him, which I have seen of the Irish rebellion, &c. Secondly, whereas the Parliament were sending over cloaths, and other necessaries, for the English soldiers in Ireland, the King seized them as they went, armed and furnished the English and Welsh against the Parliament. The reasons of these are omitted by the penner of his Portraiture.

In November 1641, the Parliament still sitting, the King comes for London, is entertained by them in the greatest state might be, and met on the way by some hundreds in gold chains; and nothing is now cried but ‘Hosanna, welcome home; your Majesty is welcome.’ The Queen perceiving a breach was likely to be betwixt the King and Parliament, thought politickly to engage the city for him. He gives the citizens good words, tells them, he will give them their lands in Ireland again, a promise he was never able to perform,

perform, &c. As I remember at their request, he also kept his Christmas at Whitehall, intending otherways to have kept it at Hampton-Court, and also knighted some of the Aldermen. At his return from Scotland, he affirmed in a speech he made unto both Houses, how he had left that kingdom in as quiet and good condition as could be expected. The devil was in the crags of the Scots, if he left them not contented, who gave them whatever they required, and signed whatever they desired or demanded, confirmed as much as their large consciences could require.

But now in January 1641, began a sea of misfortunes to fall upon us, and overwhelm our long-continued happiness, by disagreement of the King and the two Houses of Parliament, and partly by the daily coming to the Parliament House of many hundred citizens, sometimes in very rude manner. True it is, the King disliked these too frequent addressees unto both Houses in so tumultuous and unwarrantable a manner: whereupon, fearing the worst (as himself pretended) he had a court of guard before Whitehall of the trained-bands. He had also many dissolute gentlemen, and some very civil, that kept within Whitehall, with their swords by their sides, to be ready upon

any sudden occasion. Verily, mens fears now began to be great, and it was by many perceived, the King began to swell with anger against the proceedings of Parliament, and to intend a war against them: some speeches dropped from him to that purpose. It happened one day, as some of the ruder sort of citizens came by Whitehall, one busy citizen must needs cry, ‘No Bishops:’ some of the gentlemen issued out of Whitehall, either to correct the sauciness of the fool in words, if they would serve, else it seems with blows: what passed on either side in words, none but themselves knew; the citizen being more tongue than soldier, was wounded, and I have heard, died of his wounds received at that time. It hath been affirmed by very many, that in or near unto that place where this fellow was hurt and wounded, the late KING’s head was cut off, the SCAFFOLD standing just over that place.

Those people or citizens who used thus to flock unto Westminster, were most of them men of mean or a middle quality themselves; no Aldermen, Merchants, or Common-Council Men, but set on by some of better quality; and yet most of them were either such as had publick spirits, or lived a more religious life than the vulgar, and were usually called Puritans,

tans, and had suffered under the tyranny of the Bishops: in the general they were very honest men, and well meaning. Some particular fools, or others, perhaps now and then got in amongst them, greatly to the disadvantage of the more sober. They were modest in their apparel, but not in language: they had the hair of their heads, very few of them, longer than their ears: whereupon it came to pass, that those who usually with their cries attended at Westminster, were, by a nick name, called Roundheads. The courtiers again wearing long hair and locks, and always sworded, at last were called by these men Cavaliers: and so after that this broken language had been used a while, all that adhered to the Parliament were termed Roundheads; all that took part or appeared for his Majesty Cavaliers; few of the vulgar knowing the sense of the word Cavalier. However, the present hatred of the citizens were such unto gentlemen, especially courtiers, that few durst come into the city; or if they did, they were sure to receive affronts, and be abused.

To speak freely and ingenuously, what I then observed of the city tumults, was this. First, the sufferings of the citizens who were any thing well devoted, had, during all this King's reign, been such,

and so great, being harrowed or abused continually, either with the High Commission Court, or the Star Chamber, that as men in whose breasts the spirit of liberty had some place, they were even glad to vent out their sighs and sufferings in this rather tumultuous than civil manner; being assured, if ever this Parliament had been dissolved, they must have been racked, whipped, and stripped by the snotty clergy, and other extravagant courses. And for any amendment which they might expect from the King, they too well knew his temper: that though in a time of Parliament he often promised to redress any grievances, yet the best friend he hath, cannot produce any one act of good for his subjects done by him in the vacancy of a Parliament. The losers usually have leave to speak, and so had the citizens.

All this Christmas 1641, there was nothing but private whisperings in Court, and secret councils held by the Queen, and her party, with whom the King sat in council very late many nights. What was the particular result of those clandestine consultations, it will presently appear.

January 4, 1641. By what sinister council led, I know not, but the King in person went into the then Lower House

House of Parliament, where the Commons sat, and for some things he had been informed of, demanded five of their principal members, *viz.* Pimm, Hollis, Hazlerigg, Hambden, and Stroud. In that book called his Portraiture, he affirms, he went to the House of Commons to demand justice upon those five members; and saith, 'He thought he had discovered some unlawful correspondencies and engagements they had made to embroil his kingdoms.' He confesseth he missed but little of procuring some writings, &c. to make his thoughts good. So here is no evidence against these members, but his own thoughts, as himself confesseth. But assuredly, had he demanded justice of the House of Commons against them, and proved his charge, he might have had it; but for himself to attach their bodies, and be Judge also (as he intended) was a matter most unequal. And surely, had it been in his power to have got their bodies, he would have served these members as he did Elliot, whom without cause he committed to the tower, and never would either release him, or shew cause of his commitment, till death.

All that time he had a guard with him at the doors of the House of Parliament, consisting of many gentlemen with halberts

berts and fwords. Truly, I did not hear there was any incivility offered by those gentlemen then attending unto any member of the House, his Majesty having given them strict commands to the contrary. This rash action of the King's lost him his Crown: for as he was the first of Kings that ever, or so imprudently, brake the privileges by his entrance into the House of Commons assembled in Parliament; so by that unparalleled demand of his, he utterly lost himself, and left scarce any possibility of reconciliation; he not willing to trust them, nor they him, who had so often failed them. It was my fortune that very day to dine in Whitehall, and in that room where the halberts, newly brought from the tower, were lodged, for use of such as attended the King to the House of Commons. Sir Peter Wich, ere we had fully dined, came into the room I was in, and brake open the chests wherein the arms were, which frightened us all that were there. However, one of our company got out of doors, and presently informed some members, that the King was preparing to come unto the House; else I believe all those members, or some of them, had been taken in the House. All that I could do further was presently to be gone. But it happened also the same day,

day, that some of my neighbours were at the court of guard at Whitehall, unto whom I related the King's present design, and conjured them to defend the Parliament and members thereof, in whose well or ill doing consisted our happiness or misfortune: they promised assistance if need were, and I believe would have stoutly stood to it for defence of the Parliament, or members thereof. The King lost his reputation exceedingly by this his improvident and unadvised demand: yet notwithstanding this his failing, so wilful and obstinate he was in pursuance of that preposterous course he intended, and so desirous to compass the bodies of these five members, that the next day he posted and trotted into the city to demand the members there. He convened a meeting at Guildhall. The Common Council assembled: but mum could he get there, for the word London-Derry was then fresh in every man's mouth.

But whereas the author of the King's Portraiture complains, 'That the insolvency of the tumults was such, that his Majesty's person was in danger in the streets.' This is a very untruth: for notwithstanding his Majesty dined in the city that day he required the five members of the citizens, yet he had no incivility

civility in the least measure offered unto his person; only many cried out as he passed the streets, 'Sir, let us have our 'just liberties, we desire no more.' Unto which he several times answered, 'They 'should,' &c.

An honest citizen, as I remember, threw into his coach a new sermon, the text whereof was, as I now remember, 'To thy tents, O Israel.' Indeed the citizens (unto their everlasting honour be it spoken) did with much resolution protect the five members: and many thousands were willing to sacrifice their lives for defence of the Parliament, and the several members thereof.

The tenth of January approached and came: upon which day the five demanded members were brought into the House of Commons with as much triumph as could be expressed, several companies of trained bands marching to the Parliament to assist if need were. There were upon the River Thames I know not how many barges full of sailors, having some guns ready charged, if occasion were: and these also came in multitudes to serve the Parliament. A word dropped out of the King's mouth a little before, which lost him the love of the seamen. Some being in conference with his Majesty, acquainted him, that he was lost in the
affection

affection of the seamen, for they intended to petition the house, &c. 'I wonder,' quoth the King, 'how I have lost the 'affection of those water-rats.' A word sure that slipped out of his mouth unadvisedly; for all men must and do know, that the ships of England, and our valiant sailors, are the very strength of England.

His Majesty finding nothing thrived on his side, and seeing the abundant affection of the commonalty in general for the Parliament, the aforesaid tenth of January 1641, went unto Hampton-Court, and never after could by entreaty, or otherwise, be drawn to come unto his Parliament, though they in most humble wise, and by many and several addresses, exceedingly desired it. One misfortune follows another: for the 25th of February, 1641, the Queen went into Holland, and afterwards the King into Yorkshire. There was at this time a sufficient magazine of arms in Hull, being the remainder of those employed against the Scots. The Parliament sent down a member of their own, one Sir John Hotham, to take care of them; who undertook, and also did maintain the town, and preserve the arms therein for the Parliament. Although his Majesty, in April 1642, came unto the walls of the town to require them, yet
could

could he neither procure arms, or admittance into the town.

The Earl of Warwick, exceedingly beloved of the seamen, secured the navy; so that in few days the Parliament had store of arms for land soldiers, and plenty of stout ships for their sea occasions. His Majesty in the mean time being destitute both of the affections of his people, and means to supply an army, which it was perceived he intended shortly to raise, returned from viewing Hull unto York. The Parliament having perfect intelligence, and being assured he would raise an army against them, began to consider of their present condition; whom to make their General; how to raise men and money for their own, and commonwealth's, defence. But one would have blessed himself to see what running and trotting away here was both of Lords and Commons unto his Majesty. I do assure you a very thin house was left: of Lords who remained, Essex the people's darling was chief; a most noble soul, and generally well esteemed: he in this exigency was by both houses nominated and voted the Parliament's General. I do herein admire at the wonderful providence of Almighty God, who put it into the peoples hearts to make this man General, this very Earl, this
good

good man, who had suffered beyond belief, by the partial judgment of King James; who to satisfy the lechery of a lustful Scot, took away Essex's wife (being a lewd woman) for one Carr, alias Somerset; she pretending Essex was *Frigidus in Coitu*, and old Jemmy believing it.

Had Essex refused to be General, our cause in all likelihood had sunk in the beginning, we having 'never a Nobleman at that time, either willing or capable of that honour and preferment: indeed, scarce any of them were fit to be trusted. So that God raised up Essex to be a scourge for his son, whose father had so unjustly abused him. And for the Countess, she had abundance of sorrow ere she died, and felt the divine hand of heaven against her; for she was incapable of coition at least a dozen years ere she died, having an impediment in that very member she had so much delighted in and abused: and this I had from the mouth of one who saw her when bowelled. For Somerset himself, he died a poor man, contemptible and despised of every man; and yet I never heard any ill of that Scotchman, except in this alone business concerning the Earl of Essex, and his wife. In this summer the citizens listed themselves plentifully
for

for soldiers. Horse and arms were provided, and the Lord knows how many treacherous knaves had command in this first expedition in the Parliament army : so that if God himself had not been on our side, we must of necessity have perished.

The youth of the City of London made up the major part of Essex's infantry. His horses were good, but the riders unskilful : for they were taken up as they came and lifted, or offered themselves unto the service. The truth is, the Parliament were at that time glad to see any mens willingness and forwardness unto their service ; therefore they promised largely, and made some pleasing votes ; so that the plate and monies of the citizens came tumbling into Guild-hall upon the publick faith.

His Majesty in the interim, and at that time, was necessitated for money and arms extreamly, having no magazine to command, but those of the northern counties ; yea, into what other county soever he came (and he traversed many) he was so courteous, as he made shift to seize their arms, and carry them along for his use, pretending for the safety of the people, and his person.

The King had lain most part at York, or rambled into some other counties near adjacent until August, and done little to
any

and in what manner to set up the Standard Royal: they therefore hung it out in one of the turrets, or upper rooms of Nottingham Castle, within the Castle Wall. King Richard the Third set up his Standard there, &c. His Majesty disliked his Standard was placed within the castle. He said it was to be placed in an open place, where all men that would might freely come unto it, and not in a prison: they therefore carried it, at his command, without the castle, towards or into the park there adjoining, into an open place and easy of access. When they came to fix it in the ground, they perceived it was a meer rock stone, so that they with daggers and knives made a small hole for the Standard to be put in; but all would not serve; men were enforced for the present to support it with the strength of their arms and bodies; which gave great occasion unto some gentlemen there present, to give a very sad judgment on the King's side, and to divine long beforehand, that he would never do any good by arms. I have also heard, that in eight or ten days he had not thirty attended the Standard, or lifted themselves.

All the remainder of his life after this August 22, 1642, was a meer labyrinth of sorrow, a continued and daily misfortune,

tune, unto which it seems providence had ordained him from the very entrance of his reign. His wars are wrote by several learned hands, unto whom I refer the reader. I shall only repeat a few more things of him, and then conclude. Favourites he had three; Buckingham stabbed to death; William Laud, and Thomas Earl of Strafford, both beheaded. Bishops and Clergymen, whom he most favoured, and wholly advanced, and occasionally ruined, he lived to see their bishopricks sold, the Bishops themselves scorned, and all the whole clergy of his party and opinion quite undone.

The English Noblemen he cared not much for, but only to serve his own turns by them: yet such as had the unhappiness to adventure their lives and fortunes for him, he lived to see them and their families ruined, only for his sake. Pity it is many of them had not served a more fortunate master, and one more grateful.

The Scots, his countrey men, on whom he bestowed so many favours, he lived to see them in arms against himself; to sell him for more money than the Jews did Christ, and themselves to be handsomely routed, and sold for knaves and slaves. They made their best market of him at all times, changing their affection with his fortune.

The old Prince of Orange he almost beggared, and yet to no purpose, the Parliament one time or other getting all arms and ammunition which ever came over unto him. It is confidently averred, if the King had become absolute here in England, Orange had been King, &c.

The city of London, which he had so fore oppressed and slighted, he lived to see thousands of them in arms against him; and they to thrive, and himself consume unto nothing. The Parliament, which he so abhorred, and formerly scorned, he lived to know was superior unto him; and the scorns and flights he had used formerly to Elliot, and others, he saw now returned upon himself in folio.

With Spain he had no perfect correspondence, since his being there; less after he suffered their fleet to perish in his havens; least of all, after he received an Ambassador from Portugal; the Spaniard ever upbraiding him with falsehood, and breach of promise. Indeed, the nativities of both Kings were very contrary.

With France he had no good amity; the Protestants there abhorring his legerdemain and treachery unto Rochelle; the Papists as little loving or trusting him, for some hard measure offered unto those of their religion in England. He cunningly

ningly would labour to please all, but in effect gave satisfaction to none.

Denmark could not endure him; sent him little or no assistance, if any at all: besides, the old King suspected another matter; and made a query in his drink.

The Swede extremely complained of him for nonperformance of some secret contract betwixt them, and uttered high words against him.

The Protestant PRINCES of Germany loathed his very name, &c.

The Portugal King and he had little to do; yet in one of his own letters to the Queen, though he acknowledges the Portugal's courtesy unto him, yet saith, that he would give him an answer unto a thing of concernment that should signify nothing.

The Hollanders being only courteous for their own ends, and as far as his money would extend, furnished him with arms at such rates as a Turk might have had them elsewhere: but they neither loved or cared for him in his prosperity, or pitied him in his adversity; which occasioned these words to drop from him, 'If he ere came to his throne, he would make Hans Butter-box know, he should pay well for his fishing, and satisfy for old knaveries,' &c.

In conclusion. He was generally unfortunate in the world, in the esteem both

of friends and enemies: his friends exclaim on his breach of faith; his enemies would say, he could never be fast enough bound. He was more lamented as he was a King, than for any affection had unto his person as a man.

He had several opportunities offered him for his restoring. First, by several treaties, all ending in smoke, by his own perverseness. By several opportunities and victories which he prosecuted not. First, when Bristol was cowardly surrendered by Fines: had he then come unto London, all had been his own; but loitering to no purpose at Gloucester, he was presently after well banged by Essex.

When in the west, *viz.* Cornwall, he worsted Essex: had he then immediately hastened to London, his army had been without doubt masters of that city; for Manchester was none of his enemy at that time, though he was General of the associated counties.

Or had he, ere the Scots came into England, commanded Newcastle to have marched southward for London, he could not have missed obtaining the city, and then the work had been ended.

Or when in 1645, he had taken Leicester, if then he had speedily marched for London, I know not who could have resisted him: but his camp was so overcharged

charged with plunder and Irish whores, there was no marching.

Amongst many of his misfortunes, this I relate was not the least; *viz.* when the Parliament last time were to send him propositions unto the Isle of Wight, he had advice, &c. that the only way, and that there was no other means remaining upon earth to make himself happy, and settle a firm peace betwixt himself and Parliament, and to bring him out of thralldom, but by receiving our Commissioners civilly; to sign whatever propositions they brought; and above all, to make haste to London, and to do all things speedily: he was willing, and he promised fairly to perform thus much. Our Commissioners were no sooner come, but one of them, an old subtil fox, had every night private and long conference with him; to whom, when his Majesty had communicated his intentions of signing the propositions, he utterly disliked the design, and told him plainly, ‘He
 ‘ should come unto his Parliament upon
 ‘ easier terms; for he assured him, the
 ‘ House of Lords were wholly his, and
 ‘ at his devotion.’ This old man knew that well enough, himself being one of them: and in the House of Commons he had such a strong party, that the propositions should be mitigated, and made

more easy and more fit for him to sign, Upon this, the old Lord was to be Treasurer *apud Græcas Calendas*, and a cowardly son of his, Secretary of State. This was the last and greatest misfortune ever befel him, to be thus ruled and fooled by that backsliding old Lord, who was never fortunate either to Parliament or commonwealth. But by this action, and the like, you may perceive how easily he was ever convertible unto the worser advice. In like nature, the former time of propositions sent unto him, when of himself he was inclinable to give the Parliament satisfaction unto their propositions, the Scots Commissioners pretending what their cold affectionate country would do for him: upon this their dissembling, he had so little wit, as to slight the English, and confide in the Scots, though he well knew they only had been the sole means of ruining him and his posterity by their juggling, selling, and betraying him.

Whilst he was in prison at Carisbrook-Castle, horses were laid at several stages, both in Suffex and Kent, purposely to have conveyed him to the Kentish forces, and to have been in the head of them, and with the revolted ships, if he could have escaped; and he was so near escaping, that his legs and body, even unto the breast, were out at the window: but whether
fear

fear surpris'd him, or, as he said himself, he could not get his body out of the window, being full-chested; he tarried behind, &c. and escaped not. Many such misfortunes attended him; so that one may truly say, he was *Regum infelicitissimus*. Some affirm before his death several prodigies appeared. All I observed a long time before, was, that there appeared almost in every year after 1664, several paelia, or mock-suns; sometimes two, sometimes three. So also mock-moons, or paraselenes, which were the greatest prodigies I ever observed or feared. He was beheaded January 30, 1648. The figure of that moment is as followeth.

After

After the execution, his body was carried to Windfor, and buried with Henry the VIIIth, in the same vault where his body was lodged. Some, who saw him embowelled, affirm, had he not come unto this untimely end, he might have lived, according unto nature, even unto the height of old age.

Many have curiously enquired who it was that cut off his head: I have no permission to speak of such things; only thus much I say, he that did it, is as valiant and resolute a man as lives, and one of a competent fortune †.

King Charles being dead, and some foolish citizens going a whoring after his picture or image, formerly set up in the Old Exchange; the Parliament made bold to take it down, and to engrave in its place these words:

Exit Tyrannus Regum ultimus, Anno Libertatis Angliæ restitutæ primo, Anno Dom. 1648. Jan. 30.

For my part I do believe he was not the worst, but the most unfortunate of Kings.

† See above, in Lilly's History of his Life and Times, page 131, 132. where this secret is discovered.

Several

Several English Prophecies, relating to the Life and Death of
 CHARLES STUART, late King of
 Britain.

WE usually say prophecies and oracles are best understood, when they are performed; many having complained of the ambiguity of oracles, and their ambodextrous interpretations; as many also finding fault with the obscurity of prophecies, imagining no mortal men can give the proper sense of any oracle or prophecy, except endued from above with the same divine spirits as were given unto the first authors. Were I to meddle with divine prophecies, I could transcend a volume in discourse of this subject; but I have confined my present endeavours in the ensuing treatise, only to manifest unto the whole world, and this nation principally, the certain and unquestionable events, of very many English prophecies, long since delivered unto us, and still remaining amongst us, which have so clearly and manifestly declared the actions of these present times wherein we live, and with that lively portraiture, that it were the highest of incredulities to question

question their abilities in the gift of prophesying, or by unnecessary and ambiguous queries to make the world believe there can be any other interpretation rendered of their sayings, than such as we have visibly with our eyes beheld, even in this very age and time we now live in. And if any curious impertinent shall be so nice as to question by what divine fury, or heavenly rapture infused into them, either by dreams, visions, or any other nocturnal revelation, these reverend persons became so wise, so fore-knowing: I must first intreat such criticks to acquaint me how, and by what means either the Sybils, or many others, and especially Balaam the Prophet, came so truly to prophesy either of Christ, as the most learned believe he did, or of the kingdom of the Jews, or of both, in Numb. xxiv. ver. 17. ‘ Then shall come a
‘ star out of Jacob, and a scepter shall
‘ arise out of Israel.’ I willingly consent with the several expositions of the learned upon those words: yet do think it no heresy, if I say Balaam intended, by the star there mentioned, Jesus Christ; and by the scepter, that the people or nation of the Jews, should in future time become a great and mighty people, and have Kings to rule over them as other nations had at that present; whereas the Jews were
only

only governed by Moses at that time: yet we know Balaam was not of the people of the Jews; and yet in the 16th verse of that chapter he plainly saith, 'He heard the words of God, and knew 'the knowledge of the most High.' We must acknowledge that he prophesied very truly; for the scripture, against whose evidence there is no appeal to be made, confirms it. But if Balaam loved the ways of unrighteousness, and laboured with that continued infirmity of the clergy and priesthood, *viz.* covetousness, let us lament and pity human kind, that so excellent a man as he in many things, should blemish all his rare parts, with those filthy, but pleasing minerals, gold and silver.

If God Almighty, in those times of so great darkness or heathenism, did not leave some kindoms destitute of prophetick spirits, though the true causes by which they did prophesy, lie concealed unto posterity, or are manifested unto very few at present living; shall we now think, that in the purest times of Christianity, God either hath been, or is less merciful than unto former ages he was? or that he is not as able or willing to infuse into some Christians the spirit of prophecy as into some heathens of old? How truly did Homer deliver that prophecy of Æneas,
many

many hundred years before it came to pass :

*At Domus Æneæ cunctis dominabitur Oris,
Et Nati natorum, & qui nascentur ab illis.*

A prophecy it was of the greatness of the Roman empire; which we all know was fully verified. How true is also that of Seneca :

————— *Venient Annis
Secula feris, quibus Oceanus
Vincula rerum laxet, &c.*

Which was a prophecy of the discovery of the West-Indies and America, never known to the ancients, and to us not above one hundred and fifty years since. But I leave mentioning of heathen prophets, &c.

What shall we say of that prophecy of Henry the VIth, King of England, which he delivered so positively upon Henry the VIIth, then a boy, and holding water unto him : ‘ This is the lad or boy,’ saith he, ‘ that shall enjoy the crown for which we strive.’

Or of David Upan or Unanthony, who many years since prophesied of the pulling down of Charing-Cross. His prophecy was printed 1558; the words are these :

To

To tell the truth, many one would wonder,
Charing-Cross shall be broken asunder :

P. Shall preach, R. shall reach, S. shall stand
stiff.

R. Signifies Round-head. P. Pres-
bytery. S. The Soldier, &c.

Charing-Cross, we know, was pulled down 1647, in June, July, and August, part of the stones converted to pave before White-Hall. I have seen knife-hafts made of some of the stones, which being well polished, looked like marble.

But I leave further determination of these things unto some other pen, or discourse, and come unto the present intended discourse itself, wherein I shall make it very clearly to appear, that all, or most of our ancient English, Welch, and Saxon prophecies, had relation to Charles Stuart, late King of England, unto his reign, his actions, life and death; and unto the now present times wherein we live, and unto no other preceding King or times whatsoever : which I prove only by this undeniable argument, *viz.* no King or Queen reigning in this nation or kingdom did ever write or style him or herself, King or Queen of Britain, before King James, who being naturally King of Scotland, and successively of England and Wales, was the first that ever
either

either really was King of all Britain, or that did so entitle himself; nor was ever any King crowned in white apparel but King Charles. Besides there is a prophecy extant, and printed long before Queen Elizabeth died, *viz.*

When HEMPE is sponne,
England's donne.

O R,

When HEMPE is come and also gon,
Scotland and England shall be one.

Which words intimate, that both Henry the VIIIth, Edward the VIth, Mary, Philip, and Elizabeth, Kings and Queens of England, must first have reigned, before Merlin's Prophecy could take place: in King James both nations were united, and not before. Let me also add unto this, a very ancient prophecy of the Welch, *viz.*

Koronog fab Anē a wna ddiwedh ar y
daroganeu.

In English thus :

The sonne of Ann crowned, ends all our
prophecies.

We

We never had yet any King whose mother's name was Anne; but King Charles's mother was Anne, sister to the King of Denmark, late deceased.

The putting to death of the late King was prophesied of above eighty years before it was done, by Nostradamus: the book itself was printed about 1578, as I remember in century the 9th: these are the words,

Senat de Londres mettront a mort leur
Roy, *viz.*

The Senate or Parliament of London,
shall put to death their King.

These examples shew, that christians have had the spirit of prophecy, and foretold plainly many ages before, what should succeed.

The most significant of all our English prophecies, is that of Ambrose Merlin, which I have made choice of in the first place, repeating orderly a verse of the prophecy, and then how it was fulfilled.

A Prophecy of the White King,
wrote by Ambrose Merlin, nine
hundred years since, concern-
ing C H A R L E S the late
K I N G.

‘ **W**HEN the Lion of Rightful-
ness is dead, then shall arise a
‘ White King in Brittain, first flying,
‘ and after riding, after liggig downe,
‘ and in this ligg down, he shall be lymed,
‘ and after that he shall be led.’

We have seen with our own eyes, and
thousands besides, first King James, who
reigned peaceably, and was therefore called
Jacobus Pacificus, is dead, viz. that styling
himself King of Great-Britain, and reign-
ing two and twenty years, died 1625, the
27th of March. Many affirmed he had the
picture of a lion on his breast or side;
but it is probable he had some eminent
natural mole there, which might cause
that error; because in his nativity he had
both Saturn and Mars in Leone. In re-
gard of the great tranquillity and peace
we enjoyed in King James’s time, and
the little or no blood shed in his reign;
and in consideration of the propagation,
and

and free admittance of the gospel all over this kingdom, he was rightly by the Prophet stiled, 'The LION of Rightfulness.' But if the Prophet had given him the name of Lion in any other sense, he had notoriously failed; being King James was the most pusillanimous Prince of spirit that ever we read of, and the least addicted unto martial discipline. But in judgment either in things divine or human (whilst sober or unbiaſſed) the most acute and piercing of any Prince either before or since. He was admonished of his death by a dream. He dreamed that his master Buchanan appeared unto him in his sleep, and gave him these two verses. I thought good for the rarity thereof to repeat them.

*Sexte verere Deum, tibi vitæ terminus instat,
Cum tua candenti flagrat carbunculus igne.*

The English whereof is;

Thou James the VIth of that name,
King of Scots, fear God, the term of
thy life is near or at hand, when thy
carbuncle-stone burns in the hot fire,

The King told his bed-chamber men,
and some other Lords, of these verses next
morning, relating them really, and averred

he made not the verses, nor could his master Buchanan ever almost get him to make a Latin verse. The success was thus: the King had a very large and fair carbuncle stone usually set in his hat; and we have seen him pictured many times with such a carbuncle fixed to his hat. But thus it happened: sitting by the fire, not long after, this great carbuncle fell out of his hat, and into the fire: a Scottish Lord took it up, and observed the King sickened, and also died very shortly after.

After King James was dead, Charles Stuart, his then only son, was proclaimed King of Great Britain, by a general consent of the people, his title being unquestionable. The occasion of the Prophet's calling him White King, was this: The Kings of England anciently did wear the day of their coronation purple cloaths, being a colour only fit for Kings: both Queen Elizabeth, King James, and all their ancestors did wear that colour the day of their coronation, as any may perceive by the records of the wardrobes. Contrary unto this custom, and led unto it by the indirect and fatal advice of William Laud, Archbishop of Canterbury, he was persuaded to apparel himself the day of his coronation in a white garment. There were some dehorted him from
wearing

wearing the white apparel, but he obstinately refused their counsel. Canterbury would have it as an apparel representing the King's innocency, or I know not what other superstitious device of his. And of this there is no question to be made, myself, though not occularly seeing him that day, yet have had it related verbally by above twenty, whose eyes beheld it; one or two were workmen that carried his Majesty's apparel that day; so that I challenge all the men upon earth living, to deny his wearing white apparel that day of his coronation, &c. It is also reported, and I believe it to be true, that such was his haste to have the crown upon his head, that he had not patience to wait the coming of the Archbishop, whose office it was to do it, but impatiently in great haste, he placed the crown upon his head with his own hands; which moved the Spanish Ambassador, who was then present, to say, 'The King's putting the crown upon his head so rashly with his own hands, was an ill omen.'

'First flying.'

King Charles summons a Parliament, November 1640: the troubles of Scotland arising in 1641, he left the English Parliament sitting, and went in person

himself to settle the disturbed affairs of Scotland. He came home to London about November, and was himself and Queen royally entertained by the citizens, who cried then ‘Hosanna,’ &c. But see how suddenly many of the same city cry ‘Crucify, crucify.’ For lo, in January 1641, the citizens of London, and other rude people, in great numbers flock down unto the Parliament, and affront the King, the Bishops, and other temporal Lords: which rudeness and sauciness of theirs, as himself pretended, moved him, the 10th of January, 1641, first to fly or remove unto Hampton-Court, then to Windsor, then into Kent, from thence into Yorkshire; so that all the remainder of his life, until he surrendered his person to the Scots, was running and flying from one place to another. I must ingenuously acknowledge, my eyes were witness of very great rudeness in the citizens, and of as great a defect of civility and judgment in some courtiers, unto those ill-bred citizens.

‘And after riding.’

The first horse his Majesty raised, were in Yorkshire, and these in or about July, August, and September, 1642, pretending they were for a guard for his person:
from

from which time, until the very time he rendered himself to his countrymen the Scots, which was May, 1646, he had an army of horse, and was frequently himself amongst them: though it is not once reported himself ever charged, as he was sometimes invited unto it by the Lord Charles Gerrard, a most gallant man, who would say unto him many times, 'CHARGE, SIR,' &c. And indeed, who would have lost three kingdoms, without first losing some blood in the quarrel!

'After ligging downe.'

From the time of his own voluntary rendition unto the Scots, until his dying day, he was never in the head of an army, but did ligg down or lie still, and was carried up and down from one place to another as a prisoner: yet had he very great liberty until he discharged himself of his own word or parol at Hampton-Court, and immediately escaped to the Isle of Wight.

'In this ligg down he shall be lymed.'

During the time of his imprisonment, or from that time the Scots sold his person unto us for two hundred thousand pounds,

it may properly be said, ‘In this ligg down ‘he shall be lymed,’ that is, he was attempted and allured first by one side, then another; or he was several times, and by several occasions, tempted or treated withal, (every one thinking themselves surest who possessed his person) sometimes by the Scots, other times by the English, as well Parliament as army: but notwithstanding all overtures, his person was still safe looked unto, &c.

‘And after that he shall be led.’

After that propositions had been presented unto him at Hampton-Court, and last of all at the Isle of Wight, he refusing to sign them, or give such satisfaction as was required; from that time, *viz.* from December, 1648, until his death, he was led, *viz.* he was more strictly guarded and imprisoned than ever; nor from that time had the benefit of his liberty as formerly he had had, but was removed first to one castle, then to another; then to Windsor, then last of all to Whitehall. So that most properly he may be said to be now led. For I dare swear he went and came into all these places most unwillingly.

‘And

‘ And there shall be shewed whether
‘ there be another King.’

Since King Charles did retreat from his Parliament, they on the behalf of the commonwealth acted as Kings, using regal command, raising armies, monies, taxes, & *quid non*, breaking his Majesty’s Great Seal, making a new one of their own, and since have altered the frame of government, and converted monarchy into a commonwealth.

‘ Then shall bee gadered together much
‘ folk, and he shall take helpe for him.’

How many of the nobility, gentry, and clergy, and what numbers of the commonalty assisted him, we know, and they who were his assistants do well to their cost remember: for indeed, the greatest part of the nobility, and gentry, and priesthood, most cordially and unanimously followed him, and assisted him to the hazard of their lives, and consumption of estates. And we know, even whilst he was in Carisbrook-Castle, what a rebellion was raised by Goring, and others, &c. in Kent and Essex 1648, besides that great army of Scots and English routed in Lancashire.

‘ And

‘ And there shall be merchandise of men,
 ‘ as of an horse or an ox.’

This part of the prophecy was exactly verified in King Charles's, or the White King's Time; for in 1648, after the defeat of the wretched Scots in Lancashire, the English merchants did give money for as many of the common soldiers as were worth any thing, and sent them for Barbadoes and other foreign plantations. Some were sold dear, others cheap, according to the quality of the person or profession he was of. It is reported, that many of those miserable wretches, since their being at the Barbadoes, do say, they have left hell, *viz.* Scotland, and are arrived into heaven. There was in 1644, 1645, &c. exchanging of soldiers and prisoners; but in 1648, absolute merchandising of mens bodies, and not before. What price the Scots were sold for, I know not: he that gave but twelve pence apiece for any of that nasty people, gave too much.

‘ There shall bee sought helpe, and there
 ‘ shall none arise, but bed for head.’

What Prince or State of Europe, was not attempted since 1642, unto 1648, to assist his late Majesty? but in vain. Pro-
 vidence

vidence being not to be deluded by any mortal man: each man that assisted, had only a bed for his head, *viz.* a grave or piece of earth for his burial. And how many royal English families, both of gentry and nobles, I pity to relate, who have miscarried for his sake.

‘ And then shall one gone there the sun
 ‘ ariseth, another there the sun gone
 ‘ downe.’

Intimating no more, but that the fear and sadness of those times should be such, as should cause several persons to leave this kingdom or nation, for their safety, as many nobles and gentry, who took part with him did, some going to Holland, others to France, others to several countries, as their fancies or occasions led them: or it may import his Majesty should go Eastward or North-East, as he did when he went first to the Scots; and the Queen before went Westward or South-West, *viz.* to France. I pity exceedingly the sad condition of many noble families, which still to this day continue, in foreign parts, poor, beggarly, and in a most uncomfortable condition.

‘ After this, it shall be said by Britain,
 ‘ (King is King,) King is no King: after
 ‘ this hee shall raise his head, and he
 ‘ shall be taken to be a King.’

After

After he went to the Scots, and whilst he was in durance, he was treated with both by England and Scotland, as a King. Yet afterwards it appeared he had not the power of a King, to conclude any thing: nay, afterward our Parliament made a vote,

‘ That no Addresses should be made unto
‘ him any more.’

But that vote was repealed, and addressess were made, but to no purpose. So that the Prophet said well, ‘ Sometimes King ;
‘ after, King is no King,’ &c.

‘ Bee many things to done, but wise men
‘ reading, &c. and then shall a range of
‘ gleeds, and ever each hath bereaving,
‘ he shall have it for his owne.’

I conceive this intimates no more than the multiplicity of affairs in these times: but whether by the range of gleeds, he intend either the Parliament themselves, or the army, or the Parliament’s sub-officers, I know not. I conceive here are some words wanting in the copy, which might lead to explain these words, *viz.*

‘ And hee shall have it for his owne.’

Unless

Unless it be intended, those meant by the range of gleeds, *viz.* great oppressors, or those who then rule or command, shall have all for their own; the Latin copy hath no more, but

Post hæc erit tempus milvorum, & quod quisque rapuerit, pro suo habebit.

Viz. After these things, it shall be a time of kites or gleeds, and what every man can get or purloin, he will take it for his own. And this seems to be the genuine sense of it: for how many very poor men have we known to arrive unto great estates, since these times, even to thousands a year and more? Some, I know myself, were men of very mean fortunes in the beginning of this Parliament, that are now so elevated, so proud, so rich, so arrogant, having had a hand in some publick employments, they scorn their kindred and country, forget their birth and that neighbourhood which brought them to this height of honour: and although like poor sneaks they came to London in leather-breeches, and in 1642 were but vulgar fellows; yet now coach it with four or two horses, are impudent, because in authority: yet to require some of these, to write true English, or speak sense, were to command a
f—t

f—from a dead man: but such as these must know, if they have good estates as that they have, we of the commonalty must have an account of our treasure.

‘ And this shall last seven yeares, loe
‘ ravening and shedding of bloud.’

If we consider that our wars began in *Anno* 1642, we shall then find that our distempers and wars have continued seven whole years, within our own kingdom; for one copy hath it,

Et septennio durabit guerra intra.

The war shall endure seven years within the bowels of the kingdoms: and whereas he mentions ravening, I conceive where the soldier is quartered, that action of ravening cannot be avoided. England hath felt free quarter, both of her own countrymen, and of the Scots and Scottish army, who were the truest harpies that ever lived, stealing and purloining wherever they came, even unto a dish-clout. You shall have one example of two Scots in Lancashire 1648, quartered there in a poor house, where they got a kettle of brasse, being all their poor landlord had, and having it on the fire with oatmeal boiling in ale or milk; an alarm comes,
and

and one of their own countrymen passes by and invites these two soldiers to run away, for all was lost. But see their villany, and present reward of these two fools: away they trudge, but carry the kettle and porridge on a staff betwixt them, their landlord in vain crying out for his kettle. But it pleased God an honest trooper of ours, making haste to pursue the knaves, slew both these gluttons, and so returned the kettle to the right owner.

‘ And ovens shall be made like kirkes or churches.’

If it were not publicly done in many places of this kingdom before 1646, *viz.* that churches were many times as beastly as ovens: yet in 1648, and 1649, Paul’s church was made a horse-guard, and so continued until of late.

After, ‘ Then shall come through the south with the sun, on horse of tree, the chicken of the eagle sayling into Brittain, and arriving anone to the House of the eagle, hee shall shew fellowship to them beasts.’

Here the copies vary exceedingly, one saying only,

Deinde

Deinde Pullus Aquilæ veniet super ligneos equos anno & senio & erit guerra in Britannia.

Viz. After the chicken of the eagle shall come upon wooden horses within a year and a half, and there shall be war in Britain.

Another copy hath it thus :

Deinde ab austro veniet cum sole super ligneos Equos; & sunio spumantem inundationem maris, pullus aquilæ navigans in Britanniam, & applicans statim tunc altam domum aquilæ sitiens & cito aliam sitiet, viz.

Afterwards the chicken of the Eagle shall come with the Sun upon wooden Horses, &c.

Verily, in a former treatise of ours, we were not much estranged from verity : yet our modesty was such, and our respect to his Majesty's person, we were in many things silent. But upon further consideration, this chicken of the eagle will prove one of his Majesty's children. And we remember, that the present Scots King did about July 1648, upon the South or South-East coast of England, come in person unto the revolted ships : he landed, or was victualled at Yarmouth, and then sailed towards Kent, but without success : He also after that attempted Yarmouth,

but

but that attempt proved successless. But whereas, the prophecy mentions, 'He should shew (fellowship unto them 'beasts.)' These words are in no Latin copy that I have seen: however, at that time of the Prince's being at sea, here was no treaty or overture either offered by him unto the Parliament, or by them unto him; only the rest of the ships, which revolted not, were several ways dealt with to deliver them up unto him.

If by the eagle be intended King Charles lately dead, as doubtless he was, the chicken of the eagle must of consequence then be one of his children, and the present King of Scotland; and then the words may have this sense: That the Prince at that time should be desirous of getting some footing or landing-place in Kent (called here the High House of the Eagle) in regard Dover-Castle standeth in Kent on a rock: but failing there, he made his journey to Yarmouth, and so was desirous to procure that town: but herein he also was deceived. It is evident that the late King was the Eagle; for he did nothing but fly or ride up and down, during some years, before his restraint: and it must of necessity then follow, that the chicken here mentioned is the Scots King; for the chicken is mentioned before the death of the King to

T

come

come from the East; and so the Prince did upon wooden horses, *viz.* ships. It is true, the Prince got a castle or two in Kent, but to no purpose.

‘ After a year and a halfe shall be war
‘ in Britain.’

This shews a continuance of the wars, either abroad or at home for some certain time, or several years. And we know in 1646, that most excellent man the Lord Fairfax had even ended our wars; but lo, in 1648, several revolts and rebellions appeared against the Parliament; besides the Scottish treacherous invasion; all which manifest a continuance as it were of the wars: nor are we yet quit of wars, or shall be for some time hereafter.

‘ Then shall a sooth be nought worth,
‘ and every man shall keepe his thing, and
‘ gotten other mens goods.’

It is in Latin, *Tunc nihil valebit Mercurius.*

These words say only thus much, that after that time, when the chicken of the eagle, or prince of Wales, at that time should either personally land himself, or set on shore some forces of his in any part of England, which was in July 1648, or August;

August; that then, and from that time, there would be no faith given to words, or any peace come from treaties: and we well know with what difficulty the last treaty with his Majesty was obtained. The Parliament had just cause to fear no good would come from thence. The White King, who ever loved to fish in troubled waters, gave such ambiguous answers unto the Parliaments' propositions, as signified nothing. Whereupon, considering the great engagement which lay upon them, they at last resolved,

Immedicabile vulnus ense recidendum. And so it was.

For verification of the latter part:

Sed quisque curabit quomodo, &c.

That every man, who under the Parliament hath pilled, poled, or cheated the people; or any Parliament-man, who hath by the ruin of the commonwealth enriched himself, will be careful to preserve his ill gotten goods, I do as verily believe, as I do that there is a GOD in Heaven.

‘ After the White King feeble shall goe
‘ towards the west, beclipped about with
T 2 ‘ his

“ his folke to the old place been running
 “ water.”

It is in the Latin ;

Ibit Rex debilis versus occidentem.

At what time His Majesty went from Hampton-Court, he went feeble, *viz.* accompanied with no more than two or three (a feeble company for a King) ; and he then went to the Isle of Wight, and there furrendred himself to one Hammond, governour of Carisbrough-Castle in the Isle of Wight. That castle stands near or upon the water. From this time of his furrendring himself unto Hammond, he was beclipped or straitly looked unto by the soldiers. This is that Hammond, as the King himself acknowledged at Windsor, unto Ad. A. who furnished him with that smutty sheet Elencticus ; which accused me of connivance with one How of Gloucestershire, about Arabella Scroop, one of the natural daughters of the Earl of Sunderland. I challenge the whole world, and both How and his wife, and Hammond, to declare publickly, if I had the least engagement, or did give the least advertisement of any meeting of theirs in the Spring-garden, or had any connivance or plot in their design : all
 that

that ever I did, was a resolution of two or three horary questions, which promised the enjoyment of the woman. Not having met with a fit opportunity of the press, since that slander cast upon me, I took liberty herein to repeat this matter; giving that cavalier my most hearty thanks, that in publick took the pains to vindicate my reputation: and although I never had the happiness, since that his vindication of me, to see him; yet let my acknowledgment of that his courtesy be accepted from him. Indeed, that oracle of the law, whilst he lived, Sir Robert Holborne, Knight, and my singular friend, both acquainted me of the man, and his great labour to sift out the matter wholly, ere committed to the press. The Lord guide me in my ways, for I seriously protest unto posterity, I never received such injurious aspersions or calumnies, from those who in reason had cause to be my enemies, *viz.* the Royalists, as from many of our own party, or such as will or would be called Roundheads. Had not the virtue and honour of one not to be paralleled member of Parliament, been ever my support and defender, I had buried my conceptions in silence, and smothered my endeavours in deep obscurity. For really, so great is my respect and affection unto this honourable person, that

were my fortune necessitous (as GOD be thanked it is not) I durst not, nay, I would not do any dishonest or unbecoming action; fearing it might trench upon the honour of that all, and nothing but all gentleman, who lives only, and desires to live no longer, than he may serve this commonwealth, without doing injustice to any particular person, or oppression, or any thing that is dishonourable to the commonwealth, Parliament, or army. O, I abhor the incivility and absurdity of one now in some authority for the Parliament, who hearing a scandalous aspersiō against me, without further enquiry, protested he would be mine enemy, if I ever came before him, &c.

‘ Then his enemies shall meet him, and
 ‘ March in her place shall be ordained about
 ‘ him, an hoast in a manner of a shield,
 ‘ shall be formed; then shall they fighten
 ‘ an oven front.’

When His Majesty was brought from the Isle of Wight to Windsor, he was guarded before and behind, and on every side, with several troops of horse, so that it was impossible he should escape; so that it might well be said, he was in the midst of an oven, &c.

‘ After

‘ After the White King shall fall into a
 ‘ kirkyard, over a hall.’

We may justly wonder, how exactly this was fulfilled in the death of King Charles, or the White King. The truth of it was thus : that some few nights before his death, he was brought to White-hall, the regal seat of his progenitors : against the day of his death a scaffold was framed over against the new Banqueting-House, built by King James : and when the King went unto execution, a way or passage was made out at one of the west windows for him, to pass out unto the scaffold, where his head was cut off. So that very pertinently it was prophesied, he should fall into a churchyard over a hall.

What manner of death the Archbishop of Canterbury should die †.

It may appear to all indifferent minded men, the verity and worth of astrology by this question; for there is not any amongst the wisest of men in this world could better have represented the person and condition of this old man, his present state and condition, and the manner of his death, than this present figure of heaven doth.

† See, Mr. Lilly's Christian Astrology, 4to.

Being a man of the church, his ascendant is Capricornus, the cusp of the ninth house: Saturn is lord of the sign, now in Aries his fall; a long time retrograde, and now posited in the twelfth of the figure, or fourth from his ascendant; so that the heavens represent him in condition of mind, of a violent spirit, turbulent and envious, a man involved in troubles, imprisoned, &c. Jupiter, a general significator of churchmen, doth somewhat also represent his condition, being of that eminency he was of in our commonwealth. Jupiter, as you see, is retrograde, and with many fixed stars of the nature of Mars and Luna: an argument he was deep laden with misfortunes, and vulgar clamours, at this present.

The Moon is lady of the fourth in the figure, but of the eighth as to his ascendant: she separates from Saturn, and applies to the opposition of the sun, near the cusp of the eighth-house. Sol in a fiery sign; applying to an opposition of Mars, the dispositor of the aged Bishop. Mars being in an airy sign and humane, from hence I judged that he should not be hanged, but suffer a more noble kind of death, and that within the space of six or seven weeks, or thereabouts; because the Moon wanted seven degrees of the body of Mars.

He

He was beheaded about the 10th of January following.

I write not these things as that I rejoiced at his death; no, I do not: for I ever honoured the man, and naturally loved him, though I never had speech or acquaintance with him. Nor do I write these lines without tears, considering the great uncertainty of human affairs. He was a liberal Mæcenas to Oxford, and produced as good manuscripts as any were in Europe to that university, whereby the learned must acknowledge his bounty: Let his imperfections be buried in silence. *Mortuus est; & de mortuis nil nisi bonum.* Yet I account him not a martyr, as one also did; for by the sentence of the greatest court of England, viz. the Parliament, he was brought to his end.

MEMORANDUM

OF

THE

PROCEEDINGS

OF THE

COMMISSIONERS

OF THE

LAND OFFICE

IN

THE

THE
P R E F A C E.

THE bare mention of the person, whose Diary and Letters are now published, may sufficiently satisfy the world from whence they originally came, and where they are still preserved. The copy, from whence these papers are published, is in the hand-writing of Robert Plot, L. D. late professor of chymistry, chief keeper of the Ashmolean Musæum in the university of Oxford, and secretary of the Royal Society; and was by him transcribed for the use of a near relation of Mr. Ashmole's, a private gentleman in Staffordshire, who has been pleased to think they may be acceptable to the world for their exactness and singularity. They were collated a few years since by David Parry, M. A. of Jesus College in Oxford, and head-keeper of the same place, who corrected from the original manuscript (*a*) some few literal errors. The character of Mr. Ashmole is so well known,

(*a*) Inter MSS. Ashmol. Oxon. Num. 1136.

THE PREFACE.

and so excellently, though concisely drawn in these papers, as well as in that article published under his name, in the Supplement to the learned Mr. Collier's Historical Dictionary, partly extracted from these materials by the justly celebrated Mr. Edward Llwyd, superior bedel of divinity in the university of Oxford, that no recommendation of an obscure editor can be of any service, after so noted names. The usefulness of this kind of works I shall not descant upon: but only say thus much, That they let us into the secret history of the affairs of their several times; discover the springs of motion; and display many valuable, though minute circumstances overlooked, or unknown to our general Historians; and, to conclude all, satiate our largest curiosity.

Newington,
Feb. 17, 16-7.

CHARLES BURMAN.

THE

THE
L I F E
OF
ELIAS ASHMOLE, Esq.

IELIAS ASHMOLE, was the son and only child of Simon Ashmole of Litchfield, sadler, eldest son unto Mr. Thomas Ashmole of the said city, sadler, twice chief bailiff of that corporation; and of Anne, one of the daughters of Anthony Bowyer of the city of Coventry, draper, and Bridget his wife, only daughter to Mr. Fitch of Ausley in the county of Warwick, gentleman.

I was born the 23d. of May 1617, (and as my dear and good mother hath often told me) near half an hour after 3 o'clock in the morning.

When I rectified my nativity, An. 1647. I found it to be 3 hours 25 minutes 49 seconds A. M. the quarter ϕ of π ascending. But upon Mr. Lilly's rectification

tion thereof, Anno 1667, he makes the quarter 36 ascending. I was baptized, the 2d of June following, at St. Mary's church in Litchfield. My godfathers were Mr. Christopher Baxter, one of the proctors of the Bishop's Court, and Mr. Offey, sacrist of the cathedral church.

Before I was carried to church, it was agreed my name should be Thomas (as was my grandfather). But, when the minister bad name the child, my godfather Offey answered Elias, at which his partners wondered; and being (at their return home) asked, why he so called me, he could render no account, but that it came suddenly into his mind, by a more than ordinary impulse of spirit. My godmother's name was Mrs. Bridges.

When I was about a year old, and set by the fire, I fell into it, and burned the right side of my forehead, it resting upon the iron bar of the grate (of which a scar always remained) but my good mother being near, presently took me up, and applied something for my cure.

I had the small-pox (yet but few) as also the swine-pox and the measles, when I was young; but know not the certain time of either.

Being about 8 or 10 years old (but the year I cannot remember) my mother
and

and I were invited to my Cousin Blackburn's in Long Parish; at that time they were building of a barn, and I getting up by ladders to the top thereof, fell down; in which fall the inside of my right knee struck against the edge of a great beam, which thereby received a deep triangular gash, of which I lay a long time before it was cured.

James Pagit, Esq; some time Puisne Baron of the Exchequer, married to his second wife, Bridget, one of my mother's sisters, and widow to Moyre, a confectioner in London. He had a sister, who first was married to Dr. Masters Chancellor of Litchfield; and after, to Dr. Twisden his successor in the said Chancellorship.

Thomas Pagit his second son (the chief instrument of my future preferments, which I acknowledge with all gratitude to his memory) being much beloved of his aunt Twisden, came often to Litchfield, when he was young; whose stay there, as it occasioned an acquaintance with my mother (sister to his mother-in-law) so it begat in him an affection towards me; insomuch, as having given some good character of me to his father, he became inclined to have me sent up to London: And because he and his sons were greatly affected to musick, and very

well skilled therein, he was desirous I should spend part of my time at the musick school (having before spent all at the grammar school): and being competently grounded therein, I became a chorister in the cathedral church, where I remained till the said Baron sent for me up to his house.

Mr. Messenger, and after him Mr. Toby Henchman taught me Latin.

Mr. Henry Hinde, organist of the cathedral, who died the 6th of August, 1641, taught me the virginets and organ.

1633. The 2d of July I began my journey from Litchfield: my father and mother brought me onward to the far end of Bassett's heath.

The 5th of July, about 11 o'clock before noon, I entred London.

16 July, the before-mentioned Mrs. Twisden died of the *iliaca passio*, and was buried the 18th following, in Litchfield cathedral, in a chapel on the right hand of the Lord Bassett's tomb; where was a monument for Dr. Masters and herself, but broken down by the soldiers in the Parliament war.

4 October, Mr. John Person, a physician in Coventry (who had my mother's eldest sister) was buried.

1634. My father died about eleven o'clock before noon.

22. Mr. Simon Martin's letter, which gave me notice of his death, bears date, the 22d of June.

My father was born upon a Whitsunday in the morning.

He was bred up by his father to his trade; yet when he came to man's estate, followed it but little: He more affected war, than his profession, and spent many of his years abroad, which drew on him a course of expences and ill-husbandry. His first voyage was into Ireland, with Robert Earl of Essex, Anno 159 . . . Two other voyages he afterwards made, with his son, Robert Earl of Essex into the Palatinate, from whom he received good respect. He was an honest fair conditioned man, and kind to others; yet through ill husbandry, became a great enemy to himself and poor family.

1635. In this year I was taught on the harpsichord, by Mr. Farmelow, who lay in St. Michael's church-yard in Cornhill, and continued learning with him till 31 Jan. 1635-6.

11 July. I came to live at Mount-Pleasant, near Barnet, and stayed there the rest of the summer.

1637. August 21. I came to Smallwood, to Mr. Peter Mainwaring's, to ask his consent to marry his daughter.

September 4. The second time I went to Smallwood.

16. I returned to London.

1638. Jan. 23. I came from Mr. Justinian Pagitt.

March 27. I was married to Mrs. Eleanor Mainwaring, eldest daughter to Mr. Peter Mainwaring, and Jane his wife, of Smallwood in Com. Cest. gent. She proved a virtuous good wife. The marriage was in St. Benedict's church, near Paul's Wharf, by Mr. Adams, parson there.

July 16. I and my wife went towards her father's in Cheshire, about four, *post merid.* where he arrived the 22d of July.

30. I took possession of my house at Litchfield.

September 10. My uncle Thomas Ashmole, caused a privy sessions to be called at Litchfield, whereby I had some trouble about my house there: The bill was found *ignoramus*.

October 8. I came to London.

In Michaelmas term I began to solicit in Chancery, and had indifferent good practice.

December 20. I went from London towards Cheshire.

This term I preferred a bill in Chancery against my uncle Thomas Ashmole.

1639, Jan. 28. I returned from Smallwood to London.

About the beginning of March, Catherine wife to my brother Mr. Peter Mainwaring, and one of the daughters and coheirs of Mr. Newton of Pownall in com. Cest. came to full age.

March 5. *Post merid.* my sister Ann Mainwaring, was brought to bed of her first child.

In Trinity term (as I think) I became acquainted with Dr. Thomas Cademan the Queen's physician : About the beginning of July, Peter Venables, Baron of Kinderton wrote to me, to take upon me the management of his law business.

August 1. I went from London towards Smallwood

5. I arrived at Smallwood.

October 12. I and my wife returned towards London, beginning our journey from Smallwood this day,

October 20. I began to keep house, being arrived at London, this day.

1640. Jan. 11. My wife's sister Mrs. Mary Mainwaring, fell ill of an ague, and having had five fits ;

20. She took her bed.

February 6. 1 *Post merid.* She died, and was buried in the church of St. Clement Danes, near the entrance into the chancel. She had a very handsome funeral,

ral, with escutcheons of her arms, in a lozenge, pinned upon her velvet pall.

18. My cousin Philip Mainwaring (a younger son of the house of Keringham) married Mary the daughter and coheir of Sir John Miller of Islington.

May 14. Mr. Driver married Mrs. Miller, the other coheir.

April 4. I took lodgings in St. Clement's Lane.

May 19. My wife was brought to bed of a female child, still-born, about noon, which was buried the next day.

June 9. I was presented to the Lord Keeper Finch, and on the 12th, entertained by him upon the recommendation of my worthy friend Dr. Cademan.

About the beginning of September, my wife fell ill of a fever.

October 31. I removed myself to a chamber in the Middle Temple, in Elm Court, lent me by Mr. Thomas Pagit.

December 11. Joan Morgan, my maid, died of the small pox.

1641. January 18. I began my journey from Smallwood to London.

28. I entered London.

February 4. Mr. Hill moved me to an agreement with my uncle Thomas Ashmole.

February 6. I was admitted of Clement's Inn.

February

February 11. I was sworn an attorney in the court of Common Pleas.

April 22. William Clark came to London to be my servant, he continued with me until 1645.

24. He came to dwell with me.

May. About the beginning of May, my maid Elizabeth Coley fell sick of the plague, but escaped.

3. I borrowed of my cousin Riplingham 70*l.* and paid it 29 June.

June 21. My brother Mainwaring received 200*l.* from Mr. Simon Ives, upon a mortgage of Smallwood.

22. I was bound with my brother, for performance of covenants, about the beginning of June. Towards the end of Trinity Term I was sick for 3 or 4 days.

August 11. I went to Windsor, upon some business for Dr. Cademan, being the first time I saw that castle.

September 20. I and my wife went towards Smallwood.

23. We came to Litchfield.

October 12. My wife quickened.

October 25. I went towards London, leaving my wife behind me; because big with child.

29. I came to London.

30. I came to lodge in my chamber at Clement's Inn.

December 5. My dear wife fell suddenly sick about evening, and died (to my own grief, and the grief of all her friends). She was buried the next night about nine of the clock in the Astbury church in Cheshire, near the entrance of the south aisle of that church, *viz.* the West end of that aisle.

December 14. I went from London towards Cheshire.

16. Arriving at Litchfield, I first heard of my wife's death. She was a virtuous, modest, careful, and loving wife: her affection was exceeding great towards me, as was mine to her, which caused us to live so happily together. Nor was I less beloved and esteemed both by her father and mother, insomuch as at her funeral, her mother sitting near the corps, with tears, professed to the Baron of Kinderton's lady (who after told it to me) and others present, that she knew not whether she loved me or her only son better.

18. I came to Smallwood.

1642. January 16. I visited my dear wife's grave.

January 18. I came from Smallwood.

28. I arrived at London.

February 3. Mr. Justinian Pagit having proposed to me one of his clerk's places in the *Nisi Prius* office the 10th day of December last; but finding the
terms

terms too hard, I this day resigned it up.

March 7. I removed my goods to my chamber at Clement's Inn, and lay there.

August 9. Mr. Hutchinson of Clement's Inn, and myself, took a journey, first to see my old school-master Mr. Hinchman, at Drayton in Buckinghamshire, then to Oxford, so into Hampshire, and thence to London.

29. The troubles in London growing great, I resolved to leave the city and retire into the country: and this day I set forward from London towards Cheshire, to my father-in-law's house of Smallwood.

November 1643. Sir Thomas Mainwaring, Recorder of Reading, was knighted. I married his widow in 1649.

April 17. I went towards London with my cousin Mainwaring of Caringsham.

25. I came to London.

May. 8. I came from London.

17 I arrived at Smallwood.

July 2. I went towards Long Witton in Northumberland.

12. I came first to Newcastle with the young Baron of Kinderton.

17. I returned into Cheshire with the Baron of Kinderton's lady.

21. We came into Cheshire.

The rest of the summer I spent at Kinderton, in assisting Mrs. Venables, to get off the Baron's sequestration; but we could not prevail.

Octob. 16. I went a second journey into the North.

21. I returned towards Cheshire.

1645. The beginning of this year (as also part of the last) was spent at Oxford by Mr. Hill of Litchfield, and myself, in soliciting the Parliament there against Colonel Bagot, Governor of Litchfield, for opposing the execution of the King's Commission of Excise (Mr. Hill and myself being Commissioners :) whereupon January 8. a letter was sent to fetch the Colonel thither.

Feb. 3. Mr. Hill returned to Litchfield.

Mar. 22. I first became acquainted with Captain Wharton, between eight and nine in the morning.

Apr. 17. Captain Wharton moved me to be one of the four gentlemen of the Ordnance in the Garrison of Oxford, 11 *ante merid.*

May 9. I was entered a gentleman of the Ordnance, 9 *ante merid.*

15. I was affronted by a soldier at my battery at Dover-Peer, but had satisfaction.

Sept. 1. I was very much troubled with my eye for a week.

14. I christened Mr. Fox's son at Oxford, 4 *post meridiem*.

16. Mrs. Henchman died, my schoolmaster's wife.

17. This afternoon Sir John Heydon, Lieutenant of the Ordnance, began to exercise my gunners in Magdalen Meadows.

Octob. 8. Mr. Wharton was made a Captain of Horse.

12. I saw Mrs. March in Brazen-Nose Library, being brought thither by Captain Swingfield, 2 *post merid*. This day Mr. Merick made a motion to me to be a Commissioner of the Excise at Worcester.

Dec. 8. I was recommended to be Commissioner for the Excise at Worcester, unknown to me; which when I knew, I accepted, and prepared for my journey thither.

16. The King caused Mr. ——— to be out of the Commission of Excise, and mine to be inserted in his place.

19. 2 *post merid*. Mr. Swingfield and myself received the Commission of Excise from the Clerk of the Crown.

21. Sir John Heydon gave me a letter of recommendation to my Lord Ashley at Worcester, of which this is a copy.

My LORD,

‘ **T** HIS bearer, one of the gentlemen
‘ of the Ordnance to the garrison
‘ of

‘ of Oxford, having an employment in
 ‘ your Lordship’s government, by the Par-
 ‘ liament here put upon him, out of his
 ‘ desire to be made known and serviceable
 ‘ to your Lordship, hath intreated my
 ‘ mediation and attestation, to whose
 ‘ person, industry, and merits, during
 ‘ the time he hath been interested in his
 ‘ Majesty’s service, under my survey, I can
 ‘ no less than recommend him to your
 ‘ Lordship’s favour, as an able, diligent
 ‘ and faithful man, wherein your Lord-
 ‘ ship may be pleased to believe

‘ Your Lordship’s,

Dec. 21,
1645.

‘ Most affectionate servant,

‘ JOHN HEYDON.’

Dec. 22. I took my journey from Oxford to Worcester, 10 *ant.* *merid.* with Sir Charles Lucas.

23. 8 *ant.* *merid.* I arrived at Worcester.

27. 11 *Hor.* 15 min. *ant.* *merid.* Mr. Jordan Mayor of Worcester, Mr. Swingfield, and myself, took the Oath as Commissioners of Excise in the Town-Hall, and thence went unto the office, and entered upon the execution of the commission. The commission bears teste the 15th of December preceding.

1646.

1646. Jan. 1. 8 *Hor. ante merid.* I delivered Sir John Heydon's letter to my Lord Ashley, who promised me all kindness, and to fix me in the Train of Artillery in the Garrison.

3d. 3 *Hor. post merid.* Mr. Jordan, the Mayor of Worcester, Mr. Francis Grave, Mr. John Swingfield, and myself, the three Commissioners of the Excise; being met at Worcester, Mr. Gerald moved to have me Receiver and Register, and Mr. Swingfield to be Comptroller; which was agreed unto.

Jan. 19. I first heard of my mother Mainwaring's death from Mrs. Mary Brereton, my Lord Brereton's daughter.

March 12. 1 *Hor. post merid.* I received my commission for a Captainship in the Lord Ashley's regiment.

Apr. 18. A new commission for the Excise came to Worcester.

21. Colonel Baldwin, Mr. Swingfield, and myself, took our oaths to the said commission, 11 *Hor. 40 minutes ante merid.*

27. I was chosen Register to the said commission, 1 *Hor. 30 minutes post merid.*

28. Mr. Yardley was sworn one of our clerks, 3 hour *post merid.* upon my recommendation. This Mr. Yardley was one of the choir of Worcester, after the surrender of the garrison my servant some years,

years, and upon the King's return, made one of the gentlemen of his chapel.

May 19. 5 *Hor. post merid.* walking in the fields at Worcester, where some were shooting at Rovers, an arrow struck very near me, but I escaped hurt: thanks be to God.

22. 10 *ante merid.* Sir Ralph Clare moved me to take a command about the Ordnance in the fort of Worcester.

June 12. I entered upon my command as Comptroller of the Ordnance.

18. 1 *Hor. 10 minutes post merid.* I received my commission from Colonel Washington.

July 14. Lichfield-Close was surrendered to the Parliament.

July 24. Worcester was surrendered; and thence I rid out of town according to the articles, and went to my father Mainwaring in Cheshire.

July 31. Mr. Richard Harrison, minister of Tetnal formerly, and afterwards of Litchfield, told me of my mother's death, and that she died about the 8th or 9th of July, of the plague not long before, that city being visited this summer. She was a discreet, sober, provident woman, and with great patience endured many afflictions. Her parents had given her exceeding good breeding, and she was excellent at her needle; which (my father being
I
impro-

improvident). stood her 'in great stead. She was competently read in divinity, history, and poetry; and was continually instilling into my ears such religious and moral precepts, as my younger years were capable of. Nor did she ever fail to correct my faults, always adding sharp reproofs and good lectures to boot. She was much esteemed of by persons of note with whom she was acquainted. She lived in much friendship among her neighbours, and left a good name behind her. In fine, she was truly religious and virtuous.

Octob. 16. 4 *Hor.* 30 minutes *post merid.* I was made a Free-Mason at War-rington in Lancashire, with Colonel Henry Mainwaring of Karticham in Cheshire; the names of those that were then at the lodge, Mr. Richard Penket Warden, Mr. James Collier, Mr. Richard Sankey, Henry Littler, John Ellam, and Hugh Brewer.

Oct. 25. I left Cheshire, and came to London about the end of this month, *viz.* the 30th day, 4 *Hor. post merid.* About a fortnight or three weeks before I came to London, Mr. Jonas Moore brought and acquainted me with Mr. William Lilly: it was on a Friday night, and I think on the 20th of Nov.

Dec. 3. This day, at noon, I first became acquainted with Mr. John Bopker.

22. I was invited by Mrs. March, to keep my Christmas with her at Lime-house, which I did.

23. 4 *Hor.* 30 minutes I went thither.

1647. Feb. 10. A boil broke out of my throat, under my right ear.

14. The mathematical feast was at the White-Hart in the Old-Bailey, where I dined.

Mar. 1. I first moved the Lady Mainwaring, in way of marriage, and received a fair answer, though no condescension.

Apr. 14. I went to Sir Arthur Mainwaring's, with the Lady Mainwaring.

May 25. I went towards Bradfield.

27. 8 *Hor. ante merid.* Mr. Humphry Trafford and I went into Bradfield House.

Jun. 12. I went from St. James's to Engle-field, to table with Antipass Chervington; and the next morning about eight of the clock I came to his house.

14. I first became acquainted with Dr. Wimberley, minister of Engle-field, 3 *Hor. post merid.*

16. 1 *Hor. post merid.* it pleased God to put me in mind, that I was now placed in the condition I always desired, which was, that I might be enabled to live to myself and studies; without being forced to take pains for a livelihood in the world. And seeing I am thus retired, according to my heart's desire, I beseech God to
bless

blefs me in my retirement, and to prosper my studies, that I may faithfully and diligently ſerve him, and in all things ſubmit to his will: and for the peace and happineſs I enjoy (in the miſt of bad times) to render him all humble thanks, and for what I attain to in the courſe of my ſtudies, to give him the glory.

June 25. Eleven *Hor. ante merid.* the Lady Mainwaring gave me a ring enameled with black, whereon was this poſy: ‘ A true Friend’s Gift.’

28. 7 *Hor.* 15 minutes *poſt merid.* I fell ill, and 10 *Hor.* 30 minutes *poſt merid.* took my bed. I was pained in my head, reins, thighs; and taking a carduus poſſet at night, and ſweating upon it, I mended.

July 1. This day I was much pained in my head and eyes.

12. I went towards London.

23. The Lady Mainwaring entered upon her jointure-lands.

26. Ten *Hor. ante merid.* I began to be ſick, and 5 *Hor.* 15 minutes *poſt merid.* I took my bed: the diſeaſe happened to be a violent fever.

30. About 2 *Hor. poſt merid.* (as I was afterwards told) Mr. Humphry Stafford, the Lady Mainwaring’s ſecond ſon (ſuſpecting I ſhould marry his mother) broke into my chamber, and had like to have killed me, but Chriſtopher Smith with-

held him by force; for which all persons exceedingly blamed him, in regard it was thought I was near death, and knew nobody. God be blessed for this deliverance.

Aug. 1. I was in the extremity of my fever, senseless and raging.

14. Being somewhat mended of my fever, I this day got up. About this time the Lady Mainwaring fell into a fever, and Captain Wharton had the plague.

25. Was the first day I went down stairs.

31. I was very faint and ill again.

Septemb. 2. I fell ill again, and became light in my head.

9. I took a purge, which wrought very well, and mended.

28. I went to visit the Lady Mainwaring.

Octob. 26. I fell sick of a quartan ague, at Mr. Stafford's, having been invited there to dinner.

Novem. 11. I went towards London, and came thither the next day by noon.

25. My ague left me.

30. The Lady Mainwaring came to live at her house at Bradfield.

Dec. 16. Being much troubled with phlegm, I took an opening drink from Dr. Wharton.

1648. January 14. I went towards Bradfield from London.

Feb. 25. I was very ill as I went to Theale.

28. Very sick in the afternoon.

March 2. Being at Pangborne, I was very ill there.

12. Captain Wharton taken in his bed
3 *Hor. ante merid.* he was carried to Newgate, 6 *Hor. post merid.*

May 11. I entertained John Fox into my service.

22. The Lady Mainwaring sealed me a lease of the parks at Bradfield, worth
— *per ann.*

June 6. Having entered upon the study of plants, this day, about three of the clock, was the first time I went a simpling. Dr. Carter of Reading, and Mr. Watlington an apothecary there, accompanying me.

29. The Lady Mainwaring sealed me a lease of the field mead, worth fifty pounds *per annum.*

August 26. Captain Wharton made an escape out of Newgate.

29. I began my journey towards Bristol, with Mr. Hutchinson.

31. We came to Bristol.

Sept. 6. We returned to Bradfield.

October 23. Going towards London, I was robbed in Maidenhead Thicket, 5 *Hor. post merid.*

Nov. 6. Having several times before made application to the Lady Mainwaring, in way of marriage; this day, 11 *Hor.* 7 minutes *ante merid.* she promised me not to marry any man, unless myself.

10. Two *Hor.* 15 minutes *post merid.* she sealed a contract of marriage to me.

15. I was sequestered of my lands in Berkshire.

21. The sequestration was taken off at Reading.

Decemb. 5, 1649. The Lady Mainwaring was sequestered by the committee of Reading, upon her son Humfrey Stafford's information.

Feb. 14. An order for receiving the Lady Mainwaring's rents.

April 7. Eleven *Hor.* 30 minutes *ant. merid.* I came to Mr. Watlington's house to table, who was an apothecary in Reading, and a very good botanist.

25. My journey to the physick garden in Oxford.

May 8. I was godfather to Elias Yardly at Reading.

June 3. This afternoon I kissed the Duke of Gloucester and Elizabeth's hands, at Sion House.

Aug. 1. The astrologers feast at Painters-Hall, where I dined.

Octob. 16. I accompanied the Lady Mainwaring to London.

31. The

31. The astrologers feast.

Nov. 16. Eight *Hor. ante merid.* I married the Lady Mainwaring. We were married in Silver-Street, London.

20. I was arrested by Mr. Ives for my brother Mainwaring's debt.

21. Captain Wharton was re-taken and carried to prison.

Decem. 19. I agreed with Mr. Myne, for printing my Fasciculus Chemicus.

21. I first began to learn to dissect a body.

1650. Feb. 18. I met Mr. Ives, and we came to an agreement.

June 3. Mr. Lilly and myself, went to visit Dr. Ardee, at his house in the Minories.

15. Myself, my wife, and Dr. Wharton, went to visit Mr. John TreDESCANT, at South-Lambeth.

21. I and my wife went towards Bradfield.

22. Ten *Hor.* 30 minutes *ante merid.* we arrived there.

24. Mr. William Forster and his Lady came to visit us.

25. I and Captain Wharton went to visit him at Rushall.

26. Nine *Hor.* 42 minutes *post merid.* we arrived at London.

July 2. Six *Hor. post merid.* I was served with a *subpœna* at Sir Humfrey Forster's suit.

29. Much troubled with the toothach on my right side.

Aug. 8. I being at the astrologers feast, two *Hor. post merid.* I was chosen steward for the following year.

Captain Wharton having been carried to the Gate-House the 21st of November last, the next day after, I went to Mr. Lilly, and acquainted him therewith, who professed himself very sorry, because he knew Bradshaw intended to hang him; and most generously (forgetting the quarrels that had been between the Captain and him) promised me to use his interest with Mr. Bulstrode Whitlock (his patron) to obtain his release. I thought it was prudent to have my name then (as the times stood) not to appear in print as the instrument that wrought Mr. Lilly to do this kindness for him; and therefore in Captain Wharton's Epistle to the reader before his Almanack, in 1651, wherein his publick acknowledgments are made of Mr. Lilly's assistance in this strait, all acknowledgments to me are omitted; tho' in truth, I was the only person that moved and induced, and constantly solicited Mr. Lilly to perfect his enlargement: having at all times, since my return to London, *anno* 1646, befriended Captain Wharton, not only in discovering all designs that I heard were laid against him,

him, either at Mr. Lilly's or elsewhere, but also affording him my purse freely and liberally, towards his support in many necessitous occasions. Upon Mr. Lilly's application to Mr. Whitlock, he advised, that the Captain should lie quiet, without making the least complaint: and after Christmas, when his being a prisoner was almost forgotten, Bradshaw out of the way, and Mr. Whitlock Chairman to the council of state; Mr. Lilly having also by this time, made some other of the said council the Captain's friends (upon his petition) he was discharged; no other engagement being taken from him, but that he would not thenceforward write against the Parliament or State. Hereupon he became utterly void of all subsistence (which whilst he was under troubles, some or other contributed unto, besides what he got by writing against those times) and thereupon, consulting with me, about a new course of life, and how he might subsist, I frankly offered him my house at Bradfield in Berks, for him, his wife and family, to live at, with some other advantages there; which he most gladly and thankfully accepting, he went thither, and past his time with quiet and comfort for the most part, till his Majesty was restored to the Crown: and hereupon he stiled me in his Alma-

nack for the year 1653, his 'Oaken Friend.'

Aug. 13. I bought of Mr. Milbourn all his books and mathematical instruments.

14. Eight *Hor.* 30 minutes *post merid.* I bought Mr. Hawkins's books.

October 18. I put in a plea and demur to Sir Humphrey Forster's bill.

Nov. 1. My cousin Bridget Smart (only daughter to my uncle Anthony Bowyer) was buried.

12. I agreed with Mr. Lyfter for his house in Black Friars, where I afterwards dwelt.

23. Two *Hor.* *post merid.* he sealed me a lease of the said house at forty-four pounds *per ann.*

26. *Post merid.* I came thither to dwell.

1651. Jan. 1. I fell into a great looseness, which turned into a fever, but mended next day.

7. Captain Wharton returned from Bradfield, whether I sent him to receive my rents.

16. Four *Hor.* *post merid.* my demurrer against Sir Humfrey Forster's bill was argued, and held good.

22. About this time my left side of my neck began to break forth, occasioned by shaving my beard with a bad razor.

22. About this time I grew melancholly and dull, and heavy in my limbs and back.

About this time I began to learn seal-graving, casting in sand, and goldsmiths work.

Feb. 1. Three *Hor.* 30 minutes *post merid.* I agreed with Mrs. Backhouse of London, for her deceased husband's books.

March 7. I went to Maidstone with Dr. Child the physician. And 3 *Hor. post merid.* I first became acquainted with Dr. Flood.

18. This night my maid's bed was on fire; but I rose quickly (and thanks to God) quenched it.

April 3. *Post merid.* Mr. William Backhouse of Swallowfield in *com.* Berks, caused me to call him father thenceforward.

26. Five *Hor.* 30 minutes *post merid.* my father Backhouse brought me acquainted with the Lord Ruthin, who was a most ingenious person.

June 10. Mr. Backhouse told me I must now needs be his son, because he had communicated so many secrets to me.

July 21. I gave Mr. Grismond my *Theatrum Chemicum Britannicum* to print.

August 11. Captain Wharton went to receive my rents at Bradfield.

Aug. 14.

August 14. The Astrologers feast at Painters Hall, London.

This night about one of the clock, I fell ill of a surfeit, occasioned by drinking water after venison. I was greatly oppressed in my stomach; and next day Mr. Saunders the Astrologian sent me a piece of Briony root to hold in my hand; and within a quarter of an hour, my stomach was freed of that great oppression, which nothing which I took from Dr. Wharton could do before.

About this time my brother Peter Mainwaring's wife died.

September 11. Captain Wharton went to receive my rents.

22. Mr. Vaughan began to engrave the pictures in Norton's Ordinal. He wrought and finished all the cuts for my *Theatrum Chemicum Britannicum*, at my house in Black-Friars.

30. Captain Wharton arrested: I and Mr. Grismond, bail.

October 9. My father Backhouse and I went to see Mr. Goodier, the great botanist, at Petersfield.

20. Mr. Lilly gave me several old astrological manuscripts.

November 10. About four *post merid.* my wife's eldest son, Mr. Edward Stafford, died.

11. Ten *post merid.* he was buried in Bradfield church.

12. Sir John Backhouse of Swallowfield's widow died.

December 7. Two *hor. post merid.* Dr. Paget lent me several Chymical manuscripts: and here began my acquaintance with him.

19. I sent Captain Wharton to receive my rents at Bradfield.

1652. January 21. The gum at the back end of the right side of my upper jaw cleft; and about nine *hor. post merid.* I felt a new tooth coming up.

26. Six *hor. post merid.* the first copy of my *Theatrum Chemicum Britannicum* was sold to the Earl of Pembroke.

29. Ten *hor. ante merid.* Mr. Lilly gave me his picture in oil colours, of which there never had been copy taken.

February 11, Two *hor.* forty-five minutes *post merid.* the statute of 3000*l.* and Mr. Stafford's counterpart of his lease of my wife's jointure was delivered to me, by direction of Sir Arthur Mainwaring's lady, who had been trusted with it.

About this time I began to learn Hebrew of Rabbi Solomon Frank.

March 1. I fell sick of the headach and a cold, which continued five weeks.

8. Six *hor.* fifteen minutes *ante merid.* Dr. Wharton let me blood.

10. This morning my father Backhouse opened himself very freely, touching the great secret.

April 9. I paid my man John Fox his wages, and discharged him of my service.

12. This morning I received more satisfaction from my father Backhouse, to the questions I proposed.

I sent Captain Wharton to Bradfield to receive my rents.

27. I went to the sessions at Newbury, where Colonel Evelin, governor of Wallingford (being set on by Sir Humfrey Forster) was exceeding bitter against me, to the wonder of the whole court.

May 28. The inquisition upon my statute of 3000*l.* was found at Maidenhead.

I and my wife tabled this summer at Mr. Tradescant's.

June 14. 11 *Hor. ante merid.* Dr. Wilkins and Mr. Wren came to visit me at Black Friars: this was the first time I saw the doctor.

23. Captain Wharton was sent to receive my rents; and July 16, brought his wife and family to Bradfield.

August 2. I went to Maidstone affizes to hear the witches tried, and took Mr. Tredecant with me.

16. I went towards Cheshire.

26. Dr. Wharton fell sick of a violent and dangerous fever about noon.

28. I arrived at Gawsworth, where my father-in-law, Mr. Mainwaring then lived.

September 11. Young John Tredecant died.

15. He was buried in Lambeth Church-yard by his grandfather.

23. I took a journey into the Peak, in search of plants, and other curiosities.

27. I came to Mr. John Tompson's, who dwelt near Dove Bridge; he used a call, and had responses in a soft voice. He told me Dr. Wharton was recovering from his sickness, and so it proved.

October 2. I came to Litchfield.

3. Mr. Anthony Diot moved me to refer controversy between me and my uncle Thomas Ashmole.

13. My said uncle quitted his title to me, which pretended to my house in Litchfield, and sealed to me a deed of bargain and sale.

14. He also sealed me a release, and gave me possession.

November 2. Four *hor. post merid.* I returned to London, and in an hour after to my house.

3. Mr. Lilly called before the committee of plundered ministers, and committed.

20. My wife went again to Mr. Tredecant's, to stay some time there.

21. I discharged my man Hobs of my service.

December 14. I was served with a *sub-pœna* at Sir Humphry Foster's suit, three *hor.* forty minutes *post merid.*

15. His bill was filed.

18. My sister Mrs. Dorothy Mainwaring came to live with my wife eleven *hor. ante merid.*

She stayed with her but till the 16th of January following.

January 13, 1653. I held a court at Bradfield, as lord of that manor.

Mr. Anthony Brook of Sunning was my steward. Sir Humphrey Forster coming thither, I arrested him.

17. My wife left Mr. TreDESCANT's, and came to Mr. Flint's.

March 18. The Astrologers feast was held.

April 8. Dr. Langbaine, provost of Queen's College, shewed me Mr. Selden's letter to him, wherein he said, he should be glad to be acquainted with me; for he found by what I had published, that I was affected to the furtherance of all good learning.

20. This morning I first became acquainted with Arise Evans, a Welch prophet; and speaking of the Parliament, I asked him when it would end? He answered, the time was short, and it was even

even at the door. This very morning at eleven of the clock, the mace was taken away from the Speaker, and the Parliament dissolved; and I conjecture it was much about the time that Arise Evans and I had this discourse.

May 12. Three *hor. post merid.* My cousin William Ashmole came to London. He went to Mr. Sidley upon trial.

13. My father Backhouse lying sick in Fleet-street, over against St. Dunstan's church; and not knowing whether he should live or die, about eleven of the clock, told me, in syllables, the true matter of the Philosophers Stone, which he bequeathed to me as a legacy.

June 21. I agreed with Dr. Bathurst for the remaining years, in my house at Black-Friars.

July 25. Nine *hor.* thirty minutes, I was first acquainted with Mr. Selden; who used me very courteously, and encouraged me in my studies.

August 8. Eight *hor.* thirty minutes *ante merid.* I began my voyage with Dr. Carver into Cornwall, he going thither to open a mine for the Lord Mohun.

17. Nine *hor. post merid.* we came to Brecknock.

September 12. Nine *hor.* fifteen minutes *post merid.* we returned to London.

October 1. Seven *hor. post merid.* I first became acquainted with Mr. Ogilby.

4. I was troubled with the toothach: Major Rufwell, (Dr. Bathurst's apothecary) stopped it.

16. Sir John Heydon, lieutenant of the ordnance to King Charles the 1st, and my worthy friend died.

November 18. My aunt Bowyer, wife to my uncle Anthony Bowyer, was buried.

20. I was again troubled with the toothach for three days.

23. My good friend and neighbour Dr. Wimberley, minister of Englefield in Berkshire, died.

25. He was buried at St. Margaret's in Westminster, where formerly he had been parson.

This day I bound my cousin William Ashmole an apprentice to Mr. Clothier, a sadler.

1654. January 21. Doctor Wharton began his lecture at the Physician's College 10 *hor. ante merid.*

February 6. The hearing in Chancery came on, wherein Sir Humphrey Forster was plaintiff against me. As soon as my answer was opened, it was referred to Mr. Chaloner Chute my counsel to determine.

March 11. 4 *Hor. post merid.* Mr. Chute signed his award.

16. In pursuance whereof I received from Sir Humphrey Forster 350*l.* 11 *hor.* *ante merid.*

February 2. I acquainted Doctor Wharton with my secret for the cure of the *iliaca passio*; and he applied it this morning to Mr. Faithorne the graver, and it cured him.

July 3. My wife went to lodge at Mr. Wit's.

17. I came to Litchfield.

22. I returned thence.

August 22. Astrologers feast.

24. I made a journey to Canterbury, Dover, &c.

September 1. I returned to London.

15. I went to visit Mr. Oughtred, the famous mathematician.

28. I received 300*l.* from Sir Humphrey Forster.

Oct. 7. Mr. William Floyd's first wife (was) buried at Swallowfield in Berkshire.

November 24. 6 *Hor. post Merid.* my good father-in-law Mr. Peter Mainwaring died at Gawsworth.

December 8. Doctor Pordage was put out of Bradfield living. By his removal it fell to me to present, and knowing the worth and learning of Mr. Floyd (then living with my father Backhouse, as tutor to his children) I resolved to bestow it upon him; and thereupon sent for him up

to London, and on the 18th acquainted him with my intention.

30. I signed a presentation to him. He was examined by the Tryers, and passed with approbation: But designs being laid against him by Mr. Fowler and Mr. Ford, both ministers of Reading, who endeavoured to bring in Doctor Temple, supposing Sir Humphrey Forster had right of presentation, he thought better to resign his presentation to me, than to undergo a contest with those men.

1655. March 30. Hereupon I presented one Mr. Adams, who, having a living of 140*l.* *per ann.* and finding he must undergo a contest with those that opposed, Mr. Floyd thought fitter to keep his own living, than part with it in hopes of a far better.

November 28. The peace between England and France was proclaimed at Westminster 10 *hor.* 45 minutes *ante merid.*

1656. And at 11 *hor.* 45 minutes it was proclaimed at White-Hall.

April 17. Archbishop of Armagh (was) buried.

May 23. First show at Sir William Davenant's opera.

June 26. I fell sick, and had a great looseness.

July. In this month I was troubled with a great pain in my right breast.

12. I paid Mr. Faithorne 7*l.* for engraving my picture.

August 1. Journey to Mr. Sterill's in Essex.

7. Colonel Wharton came home upon his parole.

29. I signed and sealed my presentation for Bradfield living to Mr. Lancelot Smith 6 *hor.* 15 minutes *ante merid.* and delivered it to the committee.

This man, after some contest, enjoyed the living; and the right of presentation being acknowledged to be mine, I had no farther trouble.

This day the Astrologers feast was held

September 4. Cousin ——— Thompson (was) christened.

11. I went towards Litchfield.

13. About 9 *hor. ante merid.* I came first to Mr. Dugdale's at Blyth-Hall.

October 9. I returned to London.

December 19. I went towards Blyth-Hall.

1657. January 14. 10 *Hor.* 40 minutes *ante merid.* I returned to London.

February 22. My cousin Everard Mainwaring died. March. 27. I went towards Blyth-Hall.

April 20. 5 *Hor. post merid.* I bruised my great toe with the fall of a great form.

May 2. 7 *Hor. ante merid.* I returned to London.

19. I accompanied Mr. Dugdale in his journey towards the Fens 4 *Hor. 30 minutes ante merid.*

June 3. 9 *Hor. 30 minutes ante merid.* we came to York.

July 7. 6 *Hor. 45 minutes ante merid.* I returned to London.

September 22. I fell ill of the tooth-ach, which continued three days.

October 8. The cause between me and my wife was heard, where Mr. Serjeant Maynard observed to the court that there were 800 sheets of depositions on my wife's part, and not one word proved against me of using her ill, nor ever giving her a bad or provoking word.

9. The Lords Commissioners having found no cause for allowing my wife alimony, did, 4. *hor. post merid.* deliver my wife to me; whereupon I carried her to Mr. Lilly's, and there took lodgings for us both.

November 11. 2 *Hor. 15 minutes post merid.* I was admitted of the Middle Temple.

December 1. About 10 *hor. 30 minutes post merid.* it thundered and lightened, and at this time was the writ sealed for summons to the new Lords of the Parliament.

22. I and my wife came towards Albury.

28. I went to London;

29. And thence towards Blyth-Hall.

1658. January 15. I came to Bradfield.

19. I returned to Albury.

March 30. I dined with the Florida Embassador at Mr. Martin Noell's.

May 7. I first went to the Record-Office in the Tower, to collect materials for my work of the Garter.

9. I was struck by a coach-horse, on the inside of my left thigh.

June 12. I first became acquainted with Sir Roger Twisden.

July 27. 4 *Hor. post merid.* I went towards Warwickshire and Staffordshire. In this journey I visited Sir Thomas Leigh, Sir Harvey Bagot, Sir Richard Lewson, and the Earl of Denbigh.

August 21. I returned to London.

November 13. I was entered into Mr. Henshaw's chamber in the Middle Temple, which I bought of him for 130*l.* being admitted to it this day 7 *hor. 30 minutes ante merid.*

17. 11 *Hor. 15 minutes ante merid.* I brought my goods thither, and 2 *hor. post merid.* came the rest.

1659. May 24. I became acquainted with Mr. Scipio Squire.

25. I went to Windsor, and took Mr. Hollar with me to take views of the castle.

July 2. Was the Antiquaries feast.

August 16. I came to Roe-Barnes, to table there.

21. My Study was broken up by the foldiers, upon pretence of searching for the King, but I lost nothing out of it.

October 2. Mr. John Watlington, an apothecary of Reading, and an able botanist (my very good friend) was buried.

5. Mr. Lilly received a gold chain from the King of Sweden.

November 2. Was the Astrologers feast.

December 12. Mr. TreDESCANT and his wife told me they had been long considering upon whom to bestow their closet of curiosities when they died, and at last had resolved to give it unto me.

14. This afternoon they gave their scrivener instructions to draw a deed of gift of the said closet to me.

16. 5 *Hor.* 30 minutes *past merid.* Mr. TreDESCANT and his wife sealed and delivered to me the deed of gift of all his rarities.

1660. January 3. My uncle Anthony Bowyer died.

March 2. I went into Warwickshire.

April 11. I returned to London.

June

June 6. 4 *Hor.* 15 minutes *post merid.*
I first became acquainted with Sir Edmund Walker Garter.

16. 4 *Hor.* *post merid.* I first kissed the King's hand, being introduced by Mr. Thomas Chiffinch.

18. 10 *Hor.* *ante merid.* was the second time I had the honour to discourse with the King, and then he gave me the place of Windsor Herald.

22. This day the warrant bears date.

About this time the King appointed me to make a description of his medals, and I had them delivered into my hands, and Henry the VIIIth's closet assigned for my use.

July 19. This morning Mr. Secretary Morris told me the King had a great kindness for me.

August 6. Mr. Ayton, the King's chief gentleman-usher came to me into the closet, and told me, the King had commanded that I should have my diet at the waiters table, which I accordingly had.

10. The Officers at Arms took the oaths, and myself among them, as Windsor Herald.

14. This afternoon was the first public meeting of the Officers at Arms in the Herald's Office.

21. I presented the King with the three books I had printed, viz. *Fasciculus Chemicus*, *Theatrum Chemicum*, and *The Way to Bliss*.

September 3. My warrant signed for the Comptroller's Office in the Excise.

17. I delivered my said warrant for the Excise to the Commissioners of Appeals.

October 24. 5 *Hor. post merid.* I came to the Excise Office, and took possession of the Comptroller's Office.

November 2. I was this night called to the bar in the Middle Temple Hall.

7. I had my admittance to the bar in the said hall.

December 28. I took my oath, as Comptroller of the Excise before Baron Turner.

1661. January 15. I was admitted a member of the Royal Society at Gresham College.

February 9. A warrant was signed by the King for my being Secretary of Surinam in the West Indies.

April 3. My patent for Comptrollership of the Excise bears teste.

13. The King gave my Lord Chamberlain order, to settle me as the first Herald, in case any dispute should happen.

May 16. The grant of Arms to me from Sir Edward Bysh Clarencieux bears date.

- June

June 28. John Walsh was sworn my deputy.

November 6. Mr. Thomas Chiffinch dined at my chamber in the Middle Temple.

July 12. I christened Mr. Buttler the goldsmith's son, William.

1662. January 26. I paid in 50*l.* the half of my Royal Present to the King.

March 5. I sent a set of Services and Anthems to Litchfield cathedral, which cost me 16*l.*

April 22. Mr. John TreDESCANT died.

May 29. I was made one of the Commissioners for recovering the King's goods.

May 30. My Father Backhouse died this evening at Swallowfield.

This Easter Term I preferred a bill in Chancery against Mrs. TreDESCANT, for the rarities her husband had settled on me.

June 17. About 3 *Hor. post merid.* the Commissioners for the office of Earl Marshal first sat in Whitehall.

This afternoon my father Backhouse was buried in Swallowfield church.

29. 11 *Hor.* 36 minutes *ante merid.* I first kissed the Queen's hand.

August. I accompanied Mr. Dugdale in his visitation of Derby and Nottinghamshires.

9. I bought Mr. Tumepemine's interest in the lease of Homerich lands.

Sep-

September, I paid the other half of my Royal present to the King, *viz.* 50*l.*

December 5. I christened Captain Wharton's daughter, Anne.

1663. March. I accompanied Mr. Dugdale in his visitation of Staffordshire and Derbyshire.

May. Towards the end of this month I christened Mr. Timothy Eman's son of Windfor.

27. I fell ill of a feverish distemper.

July 6. I went towards Oxford, attending the body of Archbishop Juxon.

August 3. 9 *Hor. ante merid.* I began my journey to accompany Mr. Dugdale in his visitations of Shropshire and Cheshire.

October 10. I returned to London.

November 21. Mr. Povey brought the Earl of Peterborough to my chamber.

1664. January 19. Mr. Thomas first promised me a place in the White Office.

February 5. The Benchers of the Middle Temple granted me an assignment of my chamber in the Middle Temple.

8. My picture was drawn by Mr. Le Neve in my Herald's coat.

12. Mr. Dugdale fell sick of a fever.

13. I gave 20*l.* towards the repair of Litchfield minster.

March 17. I christened Secundus son to Mr. Lacy the Comedian,

May

May 18. My cause came to hearing in Chancery against Mrs. Tredecant.

June 17. I gave five volumes of Mr. Dugdale's Works to the Temple Library, and had this acknowledgment.

Parliamentum tentum 17th die Junii,
1664.

‘ Ordered that Mr. Ashmole of the utter bar have their Masterships thanks for the books now presented by him to their Masterships for the library.’

27. The White Office was opened, wherein I was Comptroller.

July 16. I having bought the third part of my chamber upon the death of Mr. Perrot, the bench this day gave me an assignment of it.

August 9. Grand day at the reading in the Middle Temple, whereat I was one of the Stewards.

1665. February 8. About 8 *Hor. ante merid.* Mr. Thomas gave a warrant of attorney to confess a judgment to me of 1200*l.*

17. Sir Edward Bish sealed his deputation of me for visiting Berkshire.

May 11. I began to make my visitation of Berkshire at Reading.

August 26. I went towards Blyth Hall.

This

This year about 15 of July (the plague encreasing) I retired to Roe Barnes, and the following winter composed a good part of my work of the Garter there.

1666. January 17. I bestowed on the Bailiffs of Litchfield a large chased silver bowl and cover, which cost me 23l. 8s. 6d.

June. I presented the publick library at Oxford with three folio volumes, containing a description of the Consular and Imperial Coins there, which I had formerly made and digested, being all fairly transcribed with my own hand. In acknowledgment of which the following was entered in the register of benefactors :

Elias Ashmole *armiger, & Regius Fecialis de Windesore, vir præstantissimus & rei antiquariæ peritissimus, accuratissimum antiquorum Numismatum Laudantium Catalogum in tria volumina distributum concinnavit, & Bibliothecæ Bodleianæ dono dedit.*

August. This month I went to Blyth Hall, and returned the same month.

September 2. The dreadful fire of London began.

October 4. 1 *Hor.* 30 minutes *post merid.* some of my books, carried to my cousin Moyse's, were returned to my chamber at the Temple.

ELIAS ASHMOLE, Esq. 1333

11. 1 *Hor.* 30 minutes *post merid.* my first boatful of books, which were carried to Mrs. Tredescant's the 3d of September, were brought back to the Temple.

18. 4 *Post merid.* all the rest of my things were brought thence to the Temple.

1667. May 21. I bought Mr. John Booker's study of books, and gave 140*l.* for them.

July 16. I went to Warwickshire.

24. I returned to London.

31. I went again towards Warwickshire.

August 21. I returned to Roe Barnes.

November 25. I took a lease of the Moggs in Litchfield from the Bailiffs, and this day paid 20*l.* part of 40*l.* fine.

1668. January 11. I paid to Mr. Rowlins 20*l.* the remaining part of my fine for the Moggs at Litchfield.

April 1. 2 *Hor. ante merid.* the Lady Mainwaring, my wife, died.

25. Mr. Joseph Williamson and Dr. Thomas Smith (afterwards Bishop of Carlisle) dined with me at my chamber in the Temple.

June 9. 5 *Hor. post merid.* the Lords Commissioners of the Treasury appointed me to execute the Office of Accomptant General in the Excise and Country Accomptant.

15. 5 *Hor. post merid.* they appointed me to execute the place of Country Accountant in the Excise.

August 10. I went towards Blyth Hall.

26. I returned to London.

September 4. 7 *Hor. 30 minutes ante merid.* I concluded with Mr. Laurence for his house in Shire Lane. At 7 *hor. post merid.* he sealed his assignment to me.

16. Doctor Curren, the Chymical Physician, my most entire friend, died.

October 1. He was buried at St. Clement Danes; and Dr. William Floyd preached his funeral sermon November 1.

November 3. I married Mrs. Elizabeth Dugdale, daughter to William Dugdale, Esq. Norroy King of Arms, at Lincoln's Inn Chapel. Dr. William Floyd married us, and her father gave her. The wedding was finished at 10 *hor. post merid.*

December 3. Doctor William Floyd married.

29. Justinian Pagitt, Esq. died.

1669. January 2. Mr. Justinian Pagitt was buried at St. Giles's in the fields.

April 15. Mr. Rose, the King's Gardener, and myself, went to Mrs. Tredecant's, and thence to Captain Forster's at South Lambeth, where I first was acquainted with him.

17. Mr. Oldenburgh (Secretary to the Royal Society) sent me a letter, that Count Maga-

Magalotti would visit me at my chamber, from the Prince of Tuscany.

19. Count Magalotti and two other gentlemen of the Prince of Tuscany's chief attendants, came to my chamber to see my library and coins.

27. I felt the first touch of the gout, in my great toe, on my left foot, and in my left fore-finger.

June 5. I and my wife went to Hertham to visit Mr. Lilly.

14. We returned to London.

July 6. I went towards Oxford.

9. The possession of the Theatre (built by Dr. Sheldon Archbishop of Canterbury) was taken by the Vice Chancellor.

I received the honour of being made a Doctor of Physick at Oxford.

August 11. I and my wife went again to Mr. Lilly's.

22. Sir William Backhouse of Swallowfield died.

September 3. I returned to London from Mr. Lilly's.

Mrs. Dorcas Pagitt, wife to Justinian Pagitt, Esq. was buried.

21. I went towards Swallowfield to serve at the funeral of Sir William Backhouse.

28. He was buried at Swallowfield.

29. I let a lease of Homerich lands to H. Aldrich for seven years.

Novemb. 3. This evening Dr. Yates, Principal of Brazen-Nose College, presented me with a diploma from the university of Oxford, for my degree of Doctor of Physick, between six and seven at night.

About the middle of December, my friendship began to be renewed with Dr. Wharton, which had been discontinued for many years, by reason of his unhand-some and unfriendly dealing with me.

1670. March 14. I bestowed a grave-stone on Mr. Booker formerly, and this day paid for it: it had this inscription in capital letters.

*Ne oblivione contereretur urna
Johannis Bookeri Astrologi
qui fati cessit*

*Vito Idus Aprilis, Anno Christi Juliano.
MDCLXVII.*

Hoc illi posuit amoris monumentum.

Elias Ashmole

Armiger.

16. I was entertained by Monsieur Lion-berg, the Swedish Envoy.

31. I obtained the King's warrant to my book of the Garter.

May 5. The Earl of Anglesea visited me at my chamber in the Temple.

10. I dined at Sir Charles Cotterel's with the Danish Envoy, and after dinner they went to my chamber in the Temple; where I so satisfied the Envoy touching the King of Sweden's precedence in the Order before his master's, that he thereupon waved the further prosecution of that affair.

June 22. Captain Burgh, my old acquaintance, died.

July 5. The Lord Hatton, my much honoured friend, died this morning.

I fell ill of a surfeit; but thanks be to God, I recovered the next day.

9. I dined with the Swedish Envoy.

27. Sir Gilbert Talbot, Master of the Jewel House, and Mr. Joseph Williamson, dined at my chamber in the Temple.

August 19. Six *Hor. post merid.* my cousin Moyse of Tottenham, died.

24. Myself and wife went to Captain Wharton's, at Greenwich.

Sept. 25. Eleven *Hor. 30 minutes ante merid.* I became acquainted with the Count de Monroux, Envoy from the Duke of Savoy.

Octob. 8. I moved my Lord Archbishop of Canterbury for a licence for Mr. Lilly, to practise physick; which he granted.

Nov. 18. I fell ill of the gout, in my great toe on the right foot.

20. I bled with leeches, and was well the next morning.

1671. Jan. 9. My sister Dugdale died.

13. I became acquainted with Mr. Peter Arnold the Chymist.

April 4. My brother Dugdale married to Mrs. Pigeon.

May 16. I let a lease of my house in Litchfield, to Mr. Edmund Falkingham, for 7 years.

July 20. I went towards Blyth-Hall with my wife.

31. I came to Litchfield.

Aug. 10. I and my wife went to Litchfield, where we were entertained by the Bailiffs at a dinner, and a great banquet.

15. We went to the Earl of Denbigh at Newnham.

18. Four *Hor. post merid.* I arrived at London.

Sept. 21. I went again towards Blyth-Hall.

Octob. 5. I came to Litchfield, where I met my brother Mainwaring.

16. I and my wife returned to London.

19. My brother Mainwaring came to London.

Decemb. 7. My brother Mainwaring took his oath as one of my deputies: so did Mr. Street.

1672. Jan. 24. I was entertained at dinner by the Venetian Agent.

May 8.

May 8. Two *Hor.* 40 minutes, *post merid.* I presented my book of the Garter to the King.

July 20. I and my wife went to Mr. Lilly's, where we stayed till September the 2d.

Aug. 20. My good friend Mr. Wale, sent me Dr. Dee's original books and papers.

Sept. 14. The Earl of Peterborough having about June, by the Duke of York's command, called at my chamber in the Temple, for one of my books of the Garter, to carry to the Duke, then at sea; the Duke received it with much pleasure, and the Earl believed he had read it all over.

27. Mr. Philip Floyd's patent passed the Great Seal for the reversion of my office of Comptroller of the Excise.

Octob. 12. Ten *Hor.* 30 minutes *ante merid.* I sprained my right foot.

17. The Earl of Peterborough presented me to the Duke of York, who told me he had read a great part of my book; that I had done a great deal of honour to the Order of the Garter; that I had taken a great deal of pains therein; and deserved encouragement, 9 *Hor.* 20 minutes *ante merid.*

Decemb. 17. Being at the Treasury chamber, the Lord Treasurer Clifford very courteously invited me to his lodgings in the court.

20. I waited on him, and was received with great kindness.

23. The Earl of Bristol gave great commendations of my book; and said, 'he thought the Knights of the Garter were obliged to present me with some considerable gift, and that himself would move it.'

1673. Jan 11. This evening I sat with the Lord Treasurer two hours.

27. Ten *Hor.* 40 minutes *ante merid.* the Earl of Bedford gave his approbation, with great commendation of my book of the Garter.

Feb. 3. Ten *Hor.* 30 minutes *ante merid.* I delivered my petition to the Earl of Arlington, for the custom of paper, with a desire of his opinion about it. He answered, it was but a reasonable request, and he would confer with the Lord Treasurer about it, before he moved the King; and that he would do me service.

13. Eight *Hor.* 20 minutes *post merid.* I moved the Lord Treasurer for my arrears of my pension as Windsor Herald, and to favour my petition for getting the custom of some paper. The first he said should be done; and to the second, he would be my friend: and so he was.

March 13. My book of the Garter was sent to Captain Bartie, to be presented to the King of Denmark.

16. I grew indisposed with a fulness in my stomach; but taking some physick, I grew well.

25. The Earl of Denbigh came to my house to visit me.

April 2. Seven *Hor. post merid.* coming from Windsor in a coach with Sir Edward Walker, the coach overturned, and I sprained my left wrist.

17. I delivered my book of the Garter to Sir John Finch, to present it to the Duke of Tuscany.

May 24. I received the Lord Treasurer's warrant for one hundred and six pounds, thirteen shillings, and four pence, the arrears of my pension.

June 18. I received my Privy-Seal for four hundred pounds out of the custom of paper, which the King was pleased to bestow upon me, for my work of the Garter.

29. I was let blood.

July 4. The learned and ingenious Sir Robert Murrey died.

Sept. 29. I renewed my lease of Homerich lands, from the vicars of Litchfield.

Octob. 4. I and my wife came from Hertham to London, having spent a good part of the summer with Mr. Lilly.

12. The Lady Forster, Sir Humfrey Forster's widow, died.

Novemb. 8. This morning Dr. Wharton was found almost dead in his bed of an apoplexy, and palsy on his left side.

12. He sent for me at midnight, and because some differences had formerly fallen out between us, he desired to be reconciled to me: which he was.

15. Ten *Hor.* 15 minutes *ante merid.* Dr. Wharton died, and was buried in Basinghall church in a vault.

Decemb. 3. Dr. Teme, the physician, died this evening. He was buried at St. Andrew's Undershaft the 7th of January following.

1674. Feb. 25. Nine *Hor.* 30 minutes *ante merid.* I desired Mr. Hayes, the Earl Marshal's Secretary, to move his Lord, to give me leave to resign my Herald's place.

April 2. The Earl Marshal came to see my chamber in the Temple.

13. He gave me a George in gold, which his grandfather wore when he went Embassador into Germany.

24. My wife and I went to Mr. Lilly's, where we stayed till the 8th of September following.

May 29. About Five *post merid.* the order was made in the Chapter House at Windsor, for recommending me to the Knights of the Garter.

June 20. I dined with the Duke of Lauderdale at Ham, whither he had invited me, and treated me very kindly.

July 1. Sir John Davis, some time of Panborne in Berkshire, died.

20. I met with Mr. Thomas Henshaw upon his return from Denmark, having brought me a gold chain, and that King's medal thereat, from the said King.

27. I first spake with the Prince Elector of Brandenburg's Envoy.

August 1. I lent Mr. Edward Hopkins four hundred pounds, upon a mortgage of his lands in Little Pipe near Litchfield.

4. Sir William Swan, the King's Resident at Hamburg, gave me an account of his sending my books of the Garter to the Duke of Saxony, and Prince Elector of Brandenburg, and gave me a letter from the said Prince.

Sept. 17. I waited on the King, and shewed him the gold chain the King of Denmark sent me: he liked it well, and gave me leave to wear it.

October 2. Eleven *Hor.* 30 minutes *ante merid.* I and my wife first entered my house at South-Lambeth.

5. This night Mr. Tredecant was in danger of being robbed, but most strangely prevented.

28. I waited on the Earl Marshal, to gain his leave for disposing of my Herald's place. He told me I was a person of that ability, that he was loath to leave me; and put off the discourse to a further time.

Novemb. 17. I received a case of excellent pistols, and a silver hilt for a sword, sent me as a present, from the Earl of Castlemaine, from Liege.

26. Mrs. Tredecant being willing to deliver up the rarities to me, I carried several of them to my house.

Decemb. 1. I began to remove the rest of the rarities to my house at South-Lambeth.

2. This night my affair about the enlarging my control upon the counties, was settled.

18. Mr. Lilly fell sick, and was let blood in the left foot, a little above the ancle: new moon the day before, and the sun eclipsed.

20. Mr. Lilly had a great pain in his left leg, which lasted twenty four hours, and put him into a great fever.

23. My wife went to see him.

26. I went to visit him also.

28. The humour being fixed in two places upon the top of his left foot (one being the place he was let blood in) and now grown ripe, they were lanced by Mr. Agar, an apothecary (and no less a good surgeon)

surgeon) of Kingston: after which he began to be at more ease, and the fever abated.

I was present at the operation.

1675. Jan. 6. I wore the chain of gold, sent me from the King of Denmark, before the King, in his proceeding to the chapel, to offer gold, frankincense, and myrrh.

20. The Earl of Winchelsea, Sir William Swan, and Mr. Thynn, were entertained at my chamber in the Temple.

29. This afternoon I obtained the Earl Marshal's leave to resign my Herald's place.

Feb. 10. Colonel Gervais Hollis, a Master of the Requests, died.

21. Two *Hor. post merid.* I sealed the counterpart of Mr. Hopkins's mortgage of Little Pipe in *com.* Stafford, to me for four hundred pounds.

25. Mr. Dethick offered me three hundred pounds, if I would resign my Herald's place to him.

March 1. This night Mr. Sandford offered me the like sum, if I would resign it to him.

9. Colonel Gervais Hollis's body was carried through London, towards Mansfield in Nottinghamshire, where he was buried.

24. Lord Hatton and his sisters dined with me.

26. Mr. Smith, of Moorfields, died; he had an excellent good library of books.

April 17. My brother Dugdale having agreed with me for my Herald's place, this morning moved the Earl Marshal that he might succeed me; which he granted.

The same morning I agreed with my carpenter for building the additional rooms I made to my house at South-Lambeth.

27. This afternoon Sir William Swan told me, the Prince Elector of Brandenburg had given order for a present to me, and that it lay ready for me at Ham-
burgh.

May 1. Ten *Hor.* 30 minutes *ante merid.* I and my wife came to my house at South-Lambeth, to lie there.

5. Ten *Hor.* 20 minutes *ante merid.* I laid the first stone of my new building there.

20. This day Monsieur Swerene, the Prince Elector of Brandenburg's Envoy, came to visit me at my chamber in the Temple.

25. My wife, in getting up of her horse near Farnham Castle, fell down, and hurt the hinder part of her hand and left shoulder.

June 6,

June 6. Mr. Richard Hodgkinson (my old friend, and fellow gentleman of the Ordnance in the garrison of Oxford) was buried.

25. Six *Hor.* 30 minutes *ante merid.* the foundation of St. Paul's Church in London was laid.

27. Dr. Barlow (my old and worthy friend) was consecrated Bishop of Lincoln.

July 15. This morning a jury of sewers set out my brick wall made towards the highway, at my house at South-Lambeth.

21. Four *Hor.* *post merid.* I surrendered my Herald's place to his Majesty in Chancery, before Sir —— Clerk, one of the Masters of that court.

Aug. 28. One *Hor.* 40 minutes *post merid.* I and my wife came to dwell at my house in South-Lambeth.

Octob. 7. Mons. la Mere (lately sent from the Prince of Orange to his Majesty) gave me a visit at my chamber in the Temple.

8. I first became acquainted with Monsieur Spanheim, the Prince Elector Palatine's Envoy to his Majesty; 9 *Hor.* 30 minutes *ante merid.* He was the Prince Elector Palatine's Plenipotentiary at Cologne; and there Sir Joseph Williamson delivered to him my book of the Garter, to present to the said Prince.

26. My brother Dugdale was created Windsor Herald.

27. Mr. Thomas Rofs (tutor to the Duke of Monmouth) died.

29. Between nine and ten *Hor. post merid.* my uncle Ralph Ashmole died.

Novemb. 2. I fell ill of a cold.

7. Great pain in my farther tooth, on the left side of my upper jaw, which continued three or four days.

16. Eleven *Hor. ante merid.* I began to plant my garden walls with fruit-trees.

This day Robert Chaloner, Lancaster Herald, died.

Decemb. 4. I first became acquainted with Mr. Butler, chaplain to the Duke of Ormond, and an able astrologian.

1676. Feb. 27. Sir Thomas Chicheley and Sir Jonas Moore came to dine with me.

March 10. I fell ill of the toothach, and the farthest tooth in the upper side of my left jaw was very loose.

29. My teeth fell looser, and put me to so great trouble, I could not chew my meat for a week.

31. My brother Harrison of Litchfield, died.

April 6. I was afflicted with the vertigo, and drew out my tooth that had so greatly troubled me.

7. The officers of Arms seeming unwilling to let me have the funeral-turn, which was my due, I acquainted the Earl Marshal with it: and this day, Sir Thomas St. George waiting on him, he told him, he would have me have the benefit of it. His Lordship afterwards told me, that he said to Sir Thomas, 'That he
'esteemed me the best officer in the office; and if he could have persuaded me
'to have staid in the office, I should not
'have wanted the best employment, and
'have been made the fore-horse in the
'team; and that I had deserved greatly,
'in getting money for rebuilding the
'office.'

Apr. 16. This evening the gout took me in my left foot, and held me for a fortnight.

Aug. 8. I fell ill of a looseness, and had above twenty stools.

Sept. 4. Mr. Ogilby died.

November 20. I fell ill of the gout in my left toe: This fit held me a fortnight.

Decemb. 18. My old friend Major Brooke, the stationer, died.

22. He was buried.

1677. Feb. 6. My uncle Ralph Ashmole's widow died.

7. In the afternoon I took cold in my head.

14. I took cold in my right ear.

19. Mr.

19. Mr. Richard Edlin, one of my clerks, died this night.

20. Sir Edward Walker, Garter, died suddenly.

21, 23, 25. I took *pile macri* which did me much good.

21. Mr. Richard Edlin was buried in St. Alhallow's Church-Yard.

22. The Bishop of Salisbury wrote to me, that he had moved the King to bestow Garter's place upon me. I wrote back to excuse my accepting of it, with desires to move no further on my behalf.

26. The Earl Marshal sent his Secretary, Mr. Hayes, to have my opinion, whether Garter's place was in the King's or his dispose. I gave my opinion, that it was in the King's disposal.

Mar. 6. The Bishop of Salisbury came to my house, to acquaint me with the King's command, that I should assist him in making good the King's title to Garter's place.

28. 7 *Hor. ante merid.* I laid the foundation of my back buildings to my house at South-Lambeth.

30. There was a hearing before some of the Lords of the Council and some Knights of the Garter, between the King and Earl Marshal, at which Garter's place was adjudged to be solely in the King's disposal.

31. Mr.

31. Mr. Bartie earnestly pressed me to accept of Garter's place, intimating my Lord Treasurer thought me fittest for it; which I excused: nevertheless he gave me an opportunity to speak with my Lord, which when I had, I forebore saying any thing of this matter to him.

Apr. 1. Mr. Bartie set more earnestly upon me to be Garter; but I absolutely refused.

2. My father Dugdale was pitched upon to be Garter, and the King gave his consent: whereupon the Earl Marshal sent for him out of Warwickshire by this night's post.

10. My father Dugdale came to town.

11. The Earl Marshal told my father Dugdale, that I had carried myself very fairly in the matter between him and the King, touching Garter's place.

May 10. 9 *Hor. ante merid.* The first foundation of the rebuilding of Cheapside was laid.

12. About noon I sprained my right foot, near my anclè.

24. My father Dugdale was created Garter; principal King at Arms.

25. He was Knighted.

June 1. He took his oath in a chapter, called to that purpose.

7. My Lord Treasurer agreed to have my comptrol continue upon the vouchers.

July 2.

July 2. I sealed a lease of my house in Litchfield to Mr. Falkingham, for eight years.

Another to Henry Aldrich of the lands in Homerich, for seven years.

Another to Mr. William Webb, of the Moggs in Litchfield, for eleven years.

10. I made a feast at my house in South-Lambeth, in honour of my benefactors to my work of the Garter.

Aug. 1. I received four hundred pounds, being the mortgage-money I formerly lent upon Mr. Hopkin's estate, at Little Pipe near Litchfield.

Sept. 10. 1 *Hor. post merid.* Mr. Rose, the King's gardener, died.

17. Count Wallestein, Envoy Extraordinary from the Emperor, Marquis de Este Borganiainiers, Envoy Extraordinary from the King of Spain, Monsieur Swerene, Envoy Extraordinary from the Prince Elector of Brandenburg, and the Count of Flamburgh, bestowed a visit on me at my house at South-Lambeth.

28. There was a fire in the Inner Temple.

Oct. 4. Mr. Loggan began to draw my picture in black lead.

16. My Lord Bishop of Oxford gave me a visit at Mr. Loggan's.

31. Myne Heere van Zeelin (Secretary to the Prince of Orange) came to visit me at my chamber in the Temple. Nov.

Nov. 4. Mr. Rawlins, Town-clerk of Litchfield, acquainted me, that Mr. Richard Dyott, Parliament-man for that city, was likely to die, and that the Bailiffs, &c. were willing to chuse me in his room: but I answered, I had no inclination to accept of that honour, and therefore desired him to give my thanks to all that were so well affected to me.

10. Myne Heere van Zeelin, and the Dutch Embassadors, came to my house to visit me.

Dec. 10. Doctor Plot (a) came to me, to request me to nominate him to be Reader, at Oxford, of the philosophical lecture upon natural things. I told him if the university liked him, he should have my suffrage.

19. 2 *Hor. post merid.* Mrs. Ogilby died.

This morning my tooth, next my foretooth, in my upper jaw, was very loose, and I easily pulled it out.

Having received several letters from Litchfield, to request me to stand for a Parliament-man there: I at length consented, provided it was not too late: and upon attempting it by others for me, found it was so; for I found the magistrates and friends not so cordial to me as I expected, and therefore drew off and would not stand.

(a) See Appendix.

1678: Feb. 9. One of my middle teeth, in my lower jaw, was broke out while I was at dinner.

Mar. 23. The gout took me in my right toe.

Apr. 4. 11 *Hor.* 30 minutes *ante merid.* my wife told me, that Mrs. TreDESCANT was found drowned in her pond. She was drowned the day before about noon, as appeared by some circumstance.

6. 8 *Hor. post merid.* She was buried in a vault in Lambeth Churchyard, where her husband and his son John had been formerly laid.

22. I removed the pictures from Mrs. TreDESCANT's house to mine.

May 11. My Lord Bishop of Oxford, and Dr. Nicholas, Vice-Chancellor of Oxford, gave me a visit at my house, 7 *Hor.* 30 min. *ante merid.*

June 18. Mr. Lea and his wife's release to me of the one hundred pounds I was to pay after Mrs. TreDESCANT's death, bears date.

July 17. About eight of the clock this morning I was served with a subpœna out of the Chancery, at Mr. Searles's suit.

Aug. 5. The Earl of Peterborough came to visit me at my chamber in the Temple, and to see my collection of coins.

Sept. 28. I took my purging pills.

29. I bled with leeches.

1679. Jan. 26. 10 *Hor. post merid.* The fire in the Temple began next room to my chamber, and burned my library, &c.

Mar. 25. I entered upon the house and ground adjoining to my house at South-Lambeth, which Mr. Bartholmew let me a lease of.

31. 9 *Hor. 45 minutes ante merid.* Mr. Bartholmew sealed my lease.

April I first became acquainted with the Lord Roberts

June 8. I went to Sir —— Napier, at Great Linford in Buckinghamshire, and came thither next day 8 *Hor. post merid.*

14. I returned to London.

27. I visited Monsieur Spanheim.

Aug. 15. My Lord Grace of Canterbury, (Dr. Sancroft) came to visit me at my house, and spent a great part of the day with me in my study.

25. Sir Jonas Moore, Surveyor of the Ordnance, and my old friend, died.

Sept. 2. Sir Jonas Moore was buried in the Tower-Church.

About the end of October I was much troubled with the vertigo.

1680. Mar. 15. 8 *post merid.* I fell ill of the gout in my left great toe.

20. It fell into my right great toe, and this fit held me for five weeks.

Apr. 17. My wife fell ill of a rheumatism.

June 28. The Countess of Clarendon came to visit me and my wife.

July 26. The Archbishop of Canterbury's sister and niece came to visit my wife.

Sept. 6. The Earl of Radnor, Lord President of the Council, with his Lady and daughters, dined at my house.

15. 5 *Hor.* 30 minutes *post merid.* Sir Charles Cotterell presented me to the Prince Elector Palatine, in the Council-chamber, whose hand I kissed, and had much discourse with him about the Order of the Garter, into which he was ready to be elected.

16. 2 *Hor.* *post merid.* I presented the said Prince with one of my books of the Garter; which he courteously received: and now I had much discourse with him.

18. Sir Charles Cotterell told me this morning, that one of the Prince Elector's gentlemen came to him the day before, to desire me to dine with him this day. Hereupon I attended him accordingly, and he placed me next himself, on his left hand, and received me with great respect; and when he rose, took me aside, and told me he had heard much of my worth and esteem, and desired to have a correspondence with me, after he returned into his country.

Sept. 24. This day between eleven and twelve, my esteemed good friend Mr. John Staniesby of Clement's-Inn died. He fell sick at Northampton the 17th instant, between eleven and twelve of the clock, as he was coming towards London from his native country, Derbyshire. He was buried the 26th. of September at night, in a vault, in St. Clement Danes church, under the seats belonging to the gentlemen of Clement's-Inn. He gave me this legacy by his will, *viz.* 'ITEM, I give
' to my honoured friend Elias Ashmole
' Esq. and his wife, each of them a ring
' of twenty shillings value, and likewise
' what books in my study he shall please
' to make choice of (many of them being
' his noble gift to me after I had lost
' many of my own, by the fire at my
' chamber).'

The Prince Elector Palatine, at his departure, on September 18, put a medal of gold into Sir Charles Cotterell's hands, which had his father's picture on the one side, and an escutcheon of his arms on the other, supported by a lion; and bade him to deliver it to me, and to assure me, that when he came home, he would also send me one of his own.

27. This day, Sir Charles Cotterel sent me the medal.

November 4. Mr. Bartholomew sealed me a new lease of my house, &c. in South-Lambeth.

16. I received from the hands of Sir Robert Southwell, lately returned from Berlin, a gold chain with a medal, from the Elector of Brandenburg. It is composed of ninety links of philagreen links in great knobs, most curious work. Upon the one side is the Elector's effigy, on the other, the view of Strallsund, and made upon the rendition of that city into his hands. It weighs twenty two ounces.

29. I waited on the King, and acquainted him with the honour the Elector had done me, and shewed him the chain. He liked it well, and commended the workmanship.

1681. Feb. 9. Mr. William Chiffinch, Closet-keeper to the King, dined at my house, and then told me that his nephew Thomas Chiffinch (son to Thomas Chiffinch, my most worthy friend) died the week before.

March 15. Between nine and ten *ante merid.* Mr. Butler, the minister and astrologian, brought me acquainted with Sir Edward Deering, brother to Sir Edward Deering, now one of the Lords Commissioners of the Treasury,

April 5. Having been very lame in the hollow of my right foot most part of the

winter

winter (occasioned, as I suppose, by applying pultices to my gout, which relaxed my tendons) this evening my pains were so encreased I could scarce go, and put me into so great a heat, that I became very feverish, and my urine pricked me sore as it came from me.

6. I took my usual sweat, which made me well, and strengthened my tendons, so that the next day I went to London, and walked much up and down the streets, without any pain: at night I became hot, and slept ill.

9. 11 *Hor.* 45 minutes *post merid.* I fell into a cold fit of an ague, which, with the hot fit, held me seven hours.

11. I took, early in the morning, a good dose of Elixir, and hung three spiders about my neck, and they drove my ague away—*Deo gratias.*

14. Dr. Gunning, Bishop of Ely, came this afternoon to visit me at my house, and staid in my study till night.

May 19. My worthy friend and my neighbour, both at the Temple and in the country, Thomas Siderfin Esq; died, near Epsom, about 4 *Hor. post merid.*

24. Mr. Siderfin was buried in Lambeth Church.

25. At the end of dinner Mr. Lilly's left side of his mouth was drawn aside, but recovered again.

30. This evening the dead palsy seized on the left side of my old friend Mr. William Lilly, astrologer.

June 2. Mr. Lilly took a vomit: at night he took his bed.

4. I went to visit him, but found him beyond hope.

9. 3 *Hor. ante merid.* Mr. Lilly died.

10. 8 *Hor. post merid.* He was buried in the chancel of Walton Church.

12. I bought Mr. Lilly's library of books of his widow for fifty pounds.

12. I sold one of my chambers at the Temple to Mr. ——— Holt, for one hundred and thirty eight pounds: and in this evening he was admitted.

17. This day my god-daughter——the only child of my neighbour Thomas Sinderfin Esq; died.

July 1. Mr. Sawbridge the stationer, an old friend of Mr. Lilly's and mine, died.

6. Mr. Sawbridge was buried in the middle aisle of St. Bridget Church in Fleet-street.

This day my wife went towards Blyth-Hall, with Sir William Dugdale, her father, to visit her mother.

Aug. 12. Sir George Wharton died at Enfield between one and two in the morning.

18. My wife returned from Blyth-Hall.

25. Sir

25. Sir George Wharton was buried in the Tower.

September 19. My wife miscarried, having gone about three months.

October 1. I took purging phyfick.

2. I took my sweat for the prevention of the gout.

4. About 8 *Hor. ante merid.* I fell sick of the cholick, which held me with sharp pains, especially on my right side, for 24 hours; and then I was presently eased, by applying bay-salt and bran, heated in a frying-pan; but before nothing else could ease me.

24. Mr. Thomas Flatman came to my house to visit me.

November 1. Mrs. Lilly came to my house, and stayed a week.

4. About 9 *Hor. ante merid.* I sealed an assignment of my judgment of 1200*l.* formerly given me by Sir Robert Thomas, and about an hour after, received from Sir Robert Clayton 800*l.* a composition agreed on with Sir Robert Thomas, out of which I gave him 70*l.*

December 18. (a) About 4 *post merid.* my dear mother-in-law, the Lady Dugdale, died.

21. She was buried in a sepulchre made in the chancel of Shustock church, by

(a) Vide last page of Sir William Dugdale's Life—London, 1714. 8vo.

Sir William Dugdale, for himself and her.

1682. Mar. 10. About 5 *Hor. post merid.* I received a summons, to appear at a lodge to be held the next day at Masons-Hall in London.

11. Accordingly I went, and about noon was admitted into the fellowship of Free-Masons, by Sir William Wilson Knight, Captain Richard Borthwick, Mr. William Wodman, Mr. William Grey, Mr. Samuel Taylour, and Mr. William Wife.

I was the senior fellow among them (it being thirty five years since I was admitted) there was present besides myself the fellows afternamed, Mr. Thomas Wife, Master of the Masons-company this present year; Mr. Thomas Shorthose, Mr. Thomas Shadbolt, — Waidsford, Esq; Mr. Nicholas Young, Mr. John Shorthose, Mr. William Hamon, Mr. John Thompson, and Mr. William Stanton. We all dined at the Half-Moon-Tavern in Cheapside, at a noble dinner prepared at the charge of the new-accepted Masons.

April 1. My wife fell ill of a rheumatism: it began in her left ancle, then into her left knee and right toe.

18. Sir Charles Cotterell carried me to the Morocco Embassador,

Alcade, Abdelloe, and Bomonzore came to my house, and dined with me.

May 17. George Smalldridge was elected out of Westminster-School to go to Christ Church in Oxford.

20. The Marquis of Worcester and Earl of Aylesbury, with their eldest sons, gave me a visit at my house this afternoon.

22. This night, scratching the right side of my buttocks, above the fundament, thence proceeded a violent sharp humour.

25. I applied pultices thereunto (and now was not able to sit or lie upon my bed) it was made of white bread crums, oil of roses and rose-leaves.

28. The pultices having well drawn the humour out, I applied *Unguentum Nutritum* to it.

June 4. Being hard bound in my body I was five hours before I could go to stool, and suffered much torment.

9. I purged with pills.

13. I went abroad again, thanks be to God.

17. Bomonzore dined with me, and gave me several excellent receipts.

July 5. The Morocco Embassador dined at my house.

13. The Astrologer's feast was restored by Mr. Moxon.

16. The Lord Lansdown, and Sir William Haward gave me a kind visit at my house.

20. The Morocco Embassador made ready to go away, but the Alcade slipt out of his lodgings, and hindered his journey.

21. The Alcade was taken.

22. This morning I gave the Morocco Embassador a large magnifying glass. In the afternoon the Alcade returned to the Embassador's lodgings.

23. About 3 in the morning the Embassador went away.

August 16. I went towards Oxford, to see the building prepared to receive my rarities, where I arrived about 7 of the clock in the evening.

17. Between 8 and 9. I first saw the said building. I was invited by the Vice-Chancellor, and dined with him at Queen's College.

22. 6 *Hor.* 30 minutes *post merid.* I arrived back at my house.

October 23. My Lord Chancellor Finch sent for me to cure him of his rheumatism. I dined there, but would not undertake the cure.

1683. January 23. I took a great cold, going by water, and kept my chamber three days.

29. The Astrolagers feast was held at the Three Cranes in Chancery-Lane: Sir Edward Deering and the Town-clerk of London were stewards.

February 2. My picture (after sent to Oxford) came home 3 *Hor. post merid.* I acquainted Mr. Woolrich, in part, with the secret of raising flowers from a virgin-earth.

15. I began to put up my rarities in cases to send to Oxford.

March 7. I took purging pills, which wrought very well.

10. The gout fell into my left great toe this morning.

14. The last load of my rarities were sent to the barge, and this afternoon I relapsed into the gout.

21. The gout fell into my right great toe.

April 8. Major Huntingdon came to my house, to visit me.

10. I took my pills, and purged very well.

11. The pains in my feet returned.

24. Mr. Anthony Bowyer, and his lady, came to visit me and my wife.

25. I went first abroad, after so long confinement, by reason of my gout.

26. Dr. Smallwood, Dean of Litchfield, died.

August 6. The surveyors of the highways began to raise the causeway at Hornhead Still.

9. They finished their work, all at my charge.

September 5. I took pills,

6. I took a sweat,

7. I took leeches: all wrought very well.

17. Monsieur Job Ludolph came to visit me.

23. I first saw Dr. Lister, at my Lord Archbishop of Canterbury's at dinner.

24. The Prince Elector of the Rhine's secretary dined with me. As also a nobleman of that country, a son of a patrician of Nurembergh, and Dr. Lister.

26. A stitch took me at the setting on of my left hip.

28. I was very much troubled with it.

October 8. Monsieur Lodolph, and his son, dined with me.

10. I gave Mr. Heyseg a book of the Garter: my wife gave him three gold buckles.

16. The Commissioners of the Excise dined with me.

30. I took leave of Monsieur Ludolph and his son, who were returning into Germany.

November, Monsieur Ludolph went from London.

De-

December. 7. A boil began under my chin.

26. 6 *Hor.* 30 minutes *ante merid.* I had a long fit of a vertigo.

1684. February 4. Mr. Jean Schielleras, the Bishop of Bergen's son, and Mr. Godfreed Ross, a Prussian, visited me.

March 5. 11 *Hor. ante merid.* a green staff was sent me by the Steward of St. Thomas's Hospital, with a signification that I was chosen one of the Governors.

April 6. Major Huntingdon dined with me.

8. There was an installation of George Prince of Denmark.

21. Major Huntingdon died : and this day Mr. Thomas Henshaw, Mr. Rogers, Dr. More, and Dr. Bernard dined at my house.

30. Major Huntingdon was buried at St. Botolph Aldersgate church.

May 5. 2 *Hor. post merid.* I laid the foundation of my new stable.

14. I took a sweat.

19. Sir Thomas Walcot came to visit me.

June 27. I bruised my left great toe.

July 18. 10 *Hor.* 15 minutes *ante merid.* my two coach-horses were brought to me.

22. My coach was brought to me.

23. I went towards Oxford.

28. I returned home.

August 4. Several French gentlemen, and Johannes Serenius Chodowieskey, a Polander, came to visit me.

6. I rubbed the skin near my rump, whereupon it began to be very sore.

8. I purged.

9. I took leeches.

10. I purged again.

12. I applied a plaister to it.

15. Mr. Agur applied a balsam.

17. The sore began to break.

18. Dr. Plott, sent from Oxford to visit me, came to me.

19. I fell into a looseness, which continued for two days.

24. Mr. Agur lanced the sore.

26. Being hard bound, I was two hours before I could go to stool, and then with exceeding great trouble.

31. I was lanced again, to prevent a fistula.

September 10. By this time the sore, near my fundament, was healed.

October 20. Sir Thomas Duppa, and Mr Matthews dined with me.

November 19. Dr. Plott presented me with his book *de Origine Fontium*, which he had dedicated to me.

24. My teeth began to be loose.

December 8. Mr. Haak brought Mr. Bowen of Upton in Pembrokehire, to visit me.

19. Dr. Chamberlain proposed to me to bring Dr. Lister to my wife, that he might undertake her.

22. They both came to my house, and Dr. Lister did undertake her.

1685. January 24. I was much troubled with my teeth, in my upper jaw, on my left side, which, by fits, continued for a week; and then I held pills in my mouth, made of burned allom, pepper, and tobacco, which drew much rheum from me, and so I was eased.

February 6. King Charles II. my gracious master, died.

14. About 9 *post merid.* he was buried.

13. I took a violent cold, which held me till the 5th of next month.

26. I took my purging pills;

27. I took my sweat, both worked very well.

March 2. 5 *Hor.* 15 minutes *post merid.* I received an obliging letter from the Bailiffs, Justices, &c. of Litchfield; so also from the Dean, inviting me to stand to be one of their Burgeses for Parliament. I sent them word that I would stand:

3. Whereupon they set about getting votes for me, and I found the citizens

very affectionate and hearty. About a fortnight after my Lord Dartmouth told me, the King would take it kindly from me, if I would give way to Mr. Lewson. Upon this I applied myself to my Lord Treasurer, and desired to know of him the King's pleasure, by whom I found it was the King's desire, and then I immediately wrote down, to acquaint my friends that I would resign; but they would not believe my letter, which occasioned me to go to the King, and let him know so much; who told me he did not know I stood, when he gave Mr. Lewson encouragement to go down, for if he had, he would not have done it. I told him I was all obedience, which he took very kindly. I then wrote down again, to assure them I would sit down, and so Mr. Lewson, with the assistance of my votes, carried it at the day of election.

April 1. 6 *Hor. post merid.* I first became acquainted with Mr. Negos, secretary to the Duke of Norfolk.

27. Mr. — of Nurembergh, and a French gentleman, which Mr. Labadie brought along with him, dined with me.

May 1. Judge Walcot, and Mr. Cook, the Prothonotary dined with me.

4. Monsieur Spanheim, Envoy extraordinary from the Elector of Brandenburg, and his Lady, and Monsieur Bessor his agent

agent here, with Sir Charles Cotterel, his Lady, and son, dined with me.

5. The Duke of Norfolk invited me to dine with him the next day; which I did, and was well received.

13. I took my purging pills,

14. And my sweat.

29. I visited Dr. Smith, Bishop of Carlisle, who was of my ancient acquaintance at Oxford.

31. This night again a pain (in my sleep) took me in my middle toe of my right foot, which removed to my ankle, and after three days went away.

June 2. A pain took the uppermost tooth but one, on the right side of my uppermost jaw.

4. My said tooth sunk so low I could not chew.

9. A boil rose in the left side of my throat.

17. This evening I had a grievous fit of the toothach.

July 9. The Countess of Clarendon, Bishop of St. Asaph, Mr. Henshaw, Mr. Evelyn, Dr. Tenison, and Mr. Frazier supped at my house.

11. The Earl of Radnor fell sick about noon.

17. 1 *Hor. post merid.* The Earl of Radnor died.

20. Dr. Ridgley (my old acquaintance) gave me a visit.

21. I went to Windsor, to the installation of the Duke of Norfolk, Earl of Peterborough, and Lord Treasurer.

25. The Earl of Radnor's body was carried into Cornwall.

August 4. I and my wife went to Mr. Napier's at Brookhill.

5. We went to Mr. Hutchinson's at Delroe.

8. We returned home.

10. A boil began to appear in my right groin.

13. This night my boil broke.

15. Another appeared a little higher, but it died.

24. I went to Windsor, to the Installation of the Earl of Feversham.

September 5. Passing upon the Thames, I took a great cold.

9. I took a purge.

10. I took a sweat.

October 13. I took my sweat.

28. The Earl of Peterborough shewed me his rare collection of gems and ancient rings.

30. I became acquainted with Mr. Cary, who came lately from Berlin. He told me his Electoral Highness of Brandenburg did often speak, with a great deal of honour, of me, and designed to have my

my book of the Garter translated into Dutch.

November 10. This morning I had some discourse with Mr. Gerard, about purchasing Mr. Plommer's farm.

16. Mr. Dean of Windsor, and Dr. Chamberlain the Civilian, brought Sir John Faulconer of Scotland, to dine with me. I found him a very ingenious gentleman, well read in his own country antiquities and coins.

December 3. I first sat upon the Commission of Sewers, it being opened this morning, and myself named therein; but nothing further was done at this sitting.

14. Sir John Faulconer dined with me, and I gave him divers of my English coins.

16. I waited on the Earl of Clarendon, Lord Lieutenant of Ireland, as far as St. Albans in his journey thither. The jolting of the coach, which drove very hard, raised a swelling in my left breech.

1686. January 9. Mr. Cook, my neighbour at South Lambeth, having lately set up a pale along his garden, and encroached upon the church-way about two foot, I undertook to complain of it; and this day Mr. Cooper, his landlord, and myself, upon a debate on the matter, agreed (by his consent) to set it back a

foot and an half, which was done accordingly.

20. The Commissioners of Sewers met, and I (with some others of the Commissioners) took my oath.

February 1. Sir John Faulconer, a Scotch gentleman, died.

4. He was buried this night in the church of St. Margaret Westminster.

10. This morning I dreamed, that being at my old house in Shire-Lane, the side of the garret seemed to totter and fall, insomuch that I thought the house itself would presently fall down.

This afternoon, about one of the clock my wife's father, Sir William Dugdale, died.

14. I moved the Duke of Norfolk, on my brother Dugdale's behalf, that he would move the King, that he might succeed him, which he promised to do; (but I found him more inclinable to prefer Sir Thomas St. George). In his discourse he told me, no man was fitter for the place than myself, if I would accept of it; but I made the same excuse to him as I did to his father, after the death of Sir Edward Walker.

19. The Duke of Norfolk proposed to me, to give my brother Dugdale the place of Norroy, and the next day gave him assurance of it.

March 26. This night I pissed so much, that I feared a diabetes, notwithstanding I had kept myself very temperate all the spring time.

27. This morning I grew ill and very hot, and was troubled with a sharpness of urine. I took syrup of white lilies in posset-drink, and the next day an emulsion of the four cooling seeds, (this kept me temperate) with water of violets and wood-bine, to wash my mouth; and giving myself rest and ease, I thank God, I recovered in a few days.

April 5. I took my sweat.

May 6. My wife took Dr. Nagel's tincture.

17. I first dined at St. Thomas's Hospital, the general court being held there this day.

20. 11 *Hor.* 15 minutes *ante merid.* I first sat upon the commission for charitable uses.

23. Dr. Plot presented me with his Natural History of Staffordshire.

26. Mr. Plummer sealed his part of the conveyance of the farm to me, and his wife acknowledged a fine before the Chief Justice of the Common Pleas.

July 10. This morning early the fang-tooth in the right side of my upper jaw fell out.

13. I began to repair my barn at South Lambeth for Goodman Ingram.

25. I took my sweat.

August 2. I and my wife went to Brockhill to Mr. Napier's.

7. We went to Delroe to Mr. Hutchinson's.

9. We returned to South Lambeth.

13. The gout fell into my left great toe : I applied leeches.

28. I applied black snails to my right foot, they being bruised ; but they blistered and poisoned the top of my foot, and after several breakings out, it was healed towards the middle of October.

September 8. I took my usual sweat.

23. 5 *Hor.* 30 minutes *post merid.* I agreed upon conditions with Goodman Ingram, to make him a lease of the farm I bought of Mr. Plummer, except the oat-field.

29. Sir Philip Floyd (who had the reversion of my office in the Excise) died.

October 7. I waited upon the King, upon his return to town from Windsor, who was pleased to receive me with much kindness.

12. I took a great cold in my neck, which held me six days.

25. 6 *Hor.* 45 *post merid.* I sealed the lease of John Ingram.

26. The running gout seized on my wife's right instep. It continued shifting into her arms and knees with great torment till after Easter, and then she began to set her feet on the ground, yet was not able to go abroad till towards Midsummer.

29. I received a letter from Sir Henry Chauncey, Treasurer of the Temple, to invite me to the bench, but I wrote him an excuse; and next day gave reasons for my refusal.

December 7. The Commissioners of Excise moved the Lord Treasurer, shewing the necessity of my having another clerk, and obtained 80*l. per An.* salary for him.

23. 10. *Hor.* 30 minutes *ante merid.* I received my order from the Lord Treasurer, for a new clerk, with 80*l. per An.* salary.

23. This day my nephew Dugdale (Sir John Dugdale's son) was married.

1687. January 5. The Earl of Rochester surrendered his staff.

6. About 6 *post merid.* the Commission for the Lord Commissioners was opened and read.

8. This morning the Commissioners of Excise, and myself, waited on the new Lords Commissioners of the Treasury.

13. The gout fell into my right hand, which disabled me from using my pen for above a quarter of a year.

16. I took my sweat.

17, 18, 19. I was much troubled with the wind cholick.

24. I applied leeches to my right hand.

27. The swelling of my hand abated.

28. There were two tides this morning.

February 8. This afternoon the gout swelled my hand again, and the night passed with great torment.

4. This night my hand did most grievously pain me.

March 3. This afternoon I and my wife were both suddenly struck with a cold and hoarseness.

I felt the effects of this hoarseness, in the back part of my throat, for a long time after.

22. 2 *Hor.* 30 minutes *post merid.* An issue was made in my left arm.

April 16. My wife took Mr. Bigg's vomit, which wrought very well.

19. She took *pulvis sanctus*, in the afternoon she took cold.

N. B. That both were too strong physick for her.

21. My wife fell very ill, and into a great weakness.

26. I purged with my usual pills.

27. I took my usual sweat.

Towards the end of this month my wife began to mend, but not fully recover till a fortnight after.

July 16. This morning I received a Parcel of books from J. W. Irnhoff of Nurembergh, among which was his *Excellentium Familiarum in Gallia Genealogia*.

August 31. Sir John Chardin, and Mr. Bever, came to South Lambeth, to visit me.

September 14. 10 *Hor.* 40 minutes *ante merid.* I sat for a second picture to Mr. Ryley.

October 5. 11 *Hor.* 7 minutes *ante merid.* the Earl Marshal's Court first sat in the Painted Chamber at Westminster.

7. Dr. Plot came to me at my office, and told me, that the Earl Marshal had chosen him Register of the Court.

8. 10 *Hor. ante merid.* I went first to the Earl Marshal's Court, and when his Lordship rose, he invited me to dine with him; which I did.

9. I took my usual sweat. (a)

(a) Here ends Mr. Ashmole's M. S.

WHAT remains further, I shall give you in the words of Mr. John Aubrey, F. R. S. who in his designed Survey of the County of Surrey, (repositied in the Ashmolean Museum at Oxford) towards the beginning, has these words — “ And now I am come as a
 “ mourner to perform my last office at
 “ the grave of my worthy friend Elias
 “ Ashmole, Esq. whose body lieth buried
 “ in the South aisle (of the Church of
 “ South Lambeth) at the East end, on the
 “ North side of it, under a black marble,
 “ with this inscription.

*Hic jacet inclytus ille & eruditissimus
 Elias Ashmole Leichfeldensis Armiger,
 inter alia in Republica Munera,
 Tributi in cerviciâs contra rotulator,
 Fæcialis autem Windsoresiensis titulo
 per annos plurimos dignatus,
 Qui post duo connubia in Uxorem duxit tertiam
 Elizabetham Gulielmi Dugdale
 Militis, Garteri Principalis Régis Armorum
 filiam;
 Mortem obiit 18 Maii, 1692, anno ætatis 76.
 Sed durante Musæo Ashmoleano, Oxon.
 nunquam moriturus.*

Near it, is an atchievement set up for the same person, whereon is the following coat
 coat

coat of arms, viz. Quarterly, Sable and Or, the first quarter on a *Fleur de lis*; of the second: Ashmole, impaling Dugdale, viz. Argent, a cross malines Gules, and a Torteaux, with this Motto—*Ex una omnia*.

Over the entrance to the Musæum, fronting the street is the following inscription in capital letters:

Musæum Ashmoleanum, Schola Naturalis Historiæ, Officina Chymica.

Over the door of Mr. Ashmole's Library, at the top of the stairs, is the following inscription, in letters of gold, viz.

Libri Impressi & Manuscripti e donis Clariss. Virorum D. Eliæ Ashmole & Martini Lister quibus non paucos addidit Vir industrias nec infime de Re Antiquariâ Promeritus D. Johannes Aubrey de Easton Peirce apud Wiltonienses Arm. & Soc. Reg. Socius.

O F

Original Letters sent to and from
Mr. Ashmole.

A letter of thanks from the corporation
of Litchfield, upon the receipt of a
silver bowl, presented to them by
Mr. Ashmole.

For the truly honoured Elias Ashmole,
Esq. at his chamber in the Middle
Temple, over Serjeant Maynard's cham-
ber. In his absence, to be left with
the Butler or Porter of the Middle
Temple, London.

Honoured Sir,

U P O N Thursday, being the 17th
day of this instant January (a day
ever to be rubrical amongst our city re-
mem-

membrances) we received your Tina Argentea, your munificent silver bowl, cloathed, in its delivery, with all those rich circumstances of advantage, that could possibly either enable the gift to bespeak the goodness and prudence of the giver, or invite the fairest acceptation in the receiver. For if we consider the person from whom, it is the gift of an Elias, a herald, not only proclaiming, but actually contributing good things to our city; and that by the hands of a Zacharias, a faithful messenger, who with the gift, did emphatically communicate the sense and good affection of the giver. And if we consider the time it was presented, it was the day of our Epiphany sessions of the peace for this city, where our Bailiffs, High-Steward, Sheriff, Grand Jury, and the rest of the body politick of this ancient and loyal corporation, together with other persons of quality both of the clergy and laity were convened together, and so became present at this great offering: As if some propitious star arising in the East, had (at this time) gone before our Magus, steering its course to this our city of Litchfield (the Sarepta of our Elias) and stood over the new-erected pyramids of our cathedral (where as yet a star appears) darting its benign influence upon this poor and loyal city, inviting the

Magi

Magi from afar, to offer some tribute to it: A city that hath nothing to glory in, but its ancient and modern loyalty to God and Cæsar, evidenced by her ancient bearing in the city escutcheon (three Knights martyred) as ancient as the days of Dioclesian, and her name signifying a field of blood then spilt; to which may be well added her modern and unparalleled loyalty to that blessed saint (now in heaven) King Charles the martyr; universally witnessed by those honourable marks, erases, and wounds of loyalty, she yet bears upon her persons, temples, streets, and walls; (trophies of honour) sufficiently blazing to the world the true heraldry of her ancient arms: nor have you only given us this great cratera (upon which you have wisely imprest our city arms) to solace the best of the city, after their time of suffering; but, like one of those true Magi, that offered to Christ in his poorest condition, you have largely offered to the repair of his church, our ruined cathedral, which, by the unwearied labour, prudence, piety, and charity of our good (a) Bishop, a second Cedda, and the charity of yourself, and others, happily deposited in his hands, is (almost to a miracle) so well and so soon restored

(a) Dr. Hacket,

again.

again. But you have likewise annually and liberally offered, relieved, and refreshed Christ in his members, the poor of our city. And as if you intended piously to engross and cover all our necessities, under that warm and nourishing mantle of Elias, we have received intimation of your promises of greater good intended this great city. Now, Sir, give us leave to conclude (having been already too tedious) by informing you that, according to your desire, (upon the first receipt of your Poculum Charitatis, at the sign of the George for England) we filled it with catholick wine, and devoted it a sober health to our most gracious King, which being of so large a continent, past the hands of thirty to pledge; nor did we forget yourself in the next place, being our great Mæcenās; assuring you that (God willing) we shall take course that this great Tina Argentea shall, with our city-mace, and other publick ensigns of dignity and authority, be carefully transmitted, by indenture, from Bailiffs to Bailiffs, in a continual succession, so long as this ancient and loyal corporation through the favour of Princes (which we hope, we shall never forfeit) shall have a charter to give it life and being. For which end your many other multiplied favours to this poor

C c

city,

city, we, the present Bailiffs of this city, do, in the name (and by the desire) of our whole company, return you most hearty thanks, subscribing ourselves, what we truly are,

Sir,

Your obliged faithful friends,

Litchfield, 26
Jan. 1666.

To serve you,

JOHN BARNES,
HEN. BAKER.

A Preface to the Catalogue of Archbishop Laud's Medals, drawn up by Mr. Ashmole, and preserved in the publick Library at Oxford, and referred to in Page 332 of this Work.

Lectori Benevolo, *ἐν πατριῇ καὶ ἐν δαίμονειν.*

tamen affatim illic abundant Archiva,
(paupertate & nova tyrannide pressi) ad-
jecissent animum. Supra laudati Doct̃oris,
inquam, rogatu, conquestuque, hoc ultro
mihimet (ut brevem illorum descriptionem
exhiberem) pensum imposui: Tum ad
novitios & in rei Nummariæ scientia pa-
rum exercitatos, melius informandos, tum
ad eorum Genium excitandum, qui ad
tantum, tam proficuum, tam dignum, tam
honorificum, tam denique necessarium
erudito viro studium aspirare niterentur.

Hoc igitur sic mihi propositum sponte-
que susceptum (arduum illud quidem, &
laboriosæ plenum opus aleæ pensum) lætus
aggredior, indies fact̃ione Cromwelliana,
non sine damno publico ingravescente, &
paulo post Britanniae παλιγγενεσίαν & sacrae
Regiæ Majestatis (auspicato & quasi post-
liminio) reditum, σὺν θεῷ ad finem perduxī.
Sed cum hujus exscriptum, manu pro-

pria cuperem exarare, ut ingenue fatear, mihi fuit *αὐτὸ* ante hunc diem illud absolvere, cum negotiorum (quæ me continuo circumvallat) turba, modicum mihi subinde spatium, ad aliquid per intervalla & quasi furtim nonnunquam ex eo transcribendum permiserit. Verum antequam huic Operi considerando te Lector accingas, de nonnullis, & ad promptiorem ejus diligentiam, & ad faciliorem ejusdem usum, te monitum cupio.

Atque ut aggrediar, totum opus de antiquis Numismatis quibus Oxoniæ ditescunt Archiva, in tria dividitur Volumina. Primum est Consularium Nummorum, aliquosque Illustrium Romæ Familiarum, reliqua duo Imperatoria Numismata continent.

Huc accedit, quod Monetam, consulum Alphabetico locarim ordine potius, quam illam in annorum consulatus cujusque seriem redigerim: Multi etenim Consulares Nummi, nequaquam ab iis, quibus assimilantur, excusi sunt. Sed ab illis Triumviris Monetalibus Augusti regno, qui vellent ista ratione, vel quod forsitan ab ipsis ducerent originem, ut præclaras illorum actiones aliquot exciperet, actueretur æternitas. Quod autem attinet ad Imperiales Nummos (qui hic incipiunt à Julio Cæsare, atque cum Heraclio desinunt) hi ad eos perfecte referuntur annos,

nos, in quibus conflati, proculque fuere; cum relatione tamen ad tempus vel præcedens, vel subsequens Incarnationem Christi Salvatoris nostri, quod characteribus istis expressi, A. C. hoc est, ante Incarnationem Christi, & J. C. id est, ab Incarnatione Christi. Qui characteres notantur in capite cujuslibet paginæ, paucis exceptis, qui sufficiens ad hoc, ut ad manifestam sui temporis cognitionem deducere me queant, lumen desiderare videntur. Atque istos quidem sub imperatoris cujusque regni finem, Anno ante eosdem in margine nullo designato, collocare, quam eosdem, cæteros inter intrudere certa sine ratione, satius elegi. Idemque circa Imperatrices omnes, candemque ob rationem, a me præstitum est.

Præterea, ut ex quo genere metalli, quodlibet ex dictis Numismatis cūsum est, constare possit; metalla per has sequentes distinxī notas AV. enim denotat aurum, AR. indicat argentum, Æ, denique significat Æs.

Porro cum Ænei Nummi diversæ magnitudinis existant; ad triplicem præsertim (qua dignoscantur) juxta numericas figuras (1.) (2.) & (3.) characteribus illorum præfixas (exceptis parvulis valdeque minutis aliquot, qui peculiariter pro talibus exhibentur) ad triplicem, inquam, præciue magnitudinem, revocari possunt.

Adde superioribus, quod ubi quempiam argenteum Nummum, formam habentem secundæ magnitudinis æreorum invenio, quod ut duxtaxat ab ordinario distingua-
tur denario, figuram illi (2.) soleam ad-
jungere.

Hanc, hoc gemino cum voto, præfa-
tiunculam claudere mihi est animus
D. O. M. enixe deprecatus, tum ut gene-
rosorum hâc in parte Benefactorum nu-
merum adaugeat: Tum ut eos qui prisca
Numismata celeberrimum hoc in Ærarium
conferunt, novis, quibus suam sublevent
inopiam, Numismatis, nunquam egere
patiatur.

Pene omiseram quemlibet post annum,
hic a me de industria relictum esse spa-
tium, ut quid è novo dictum ad Thesau-
rum, antiqui ferentur Nummi, ad hunc
quoque Catalogum, pari (quo superiores)
modo, referri valeant.

A copy

A copy of a letter from Doctor Barlow to Mr. Ashmole, on his present of his books, describing Archbishop Laud's cabinet of medals.

For my honoured Friend Elias Ashmole, Esq. at his chamber in the Middle Temple, these; London.

My dear Friend,

IT is a good while since I received your excellent present to our University-Library, and, 'ere this, told you so; and returned our many and hearty thanks, had I not been suddenly and unexpectedly called away to Worcester, whence I am now returned. At the visitation of Bodley's Library (when the Vice-Chancellor and all the Curators were met) I presented your books to the Vice-Chancellor, and the rest, in your name, as a testimony of your kindness and love to learning and our University; as also of your ability to enrich Bodley's Library with your own works. Anyman who has a mind to it, and money, may give us good books of other mens making, but very few of their own; '*pauci quos æquus*

'*amavit Jupiter.*' Some more generous and ingenuous souls, a Selden, a Dugdale, or an Ashmole may do this, none else. The Vice-Chancellor and Curators were exceeding well satisfied with, and very thankful for, your great charity and munificence to the publick. Care is taken, that your name and gift be recorded in our register, (*a*) to your deserved honour, and the encouragement of others, by your good example, if not to an equal, yet to a like liberality. And sure I am, it will be an honour to you, and a comfort to your friends, when they shall find in our register, that you have been so great a benefactor to Bodley's Library. My love and respects to yourself and my honest friend Mr. Dugdale. God Almighty bless you both, And,

Sir,

Your affectionate friend,

Queen's College,
Oxon. Decemb.
28, 1668.

T. BARLOW.

(*a*) P. 41.

For

For Elias Ashmole, Esq. at his
House in Lambeth.

Sir,

THE bearer hereof will need no recommendation from me, when you shall understand, that it is Doctor Plott, the learned author of the Natural History of Oxfordshire. It is upon the reputation of your own worth, as well as your magnificent gift intended to the University, that he has the ambition to be better known to you. They are (I hear) designing to create a philosophical lecture upon natural things; and their inclination to pitch upon this knowing gentleman for that purpose (whose talent and merits are so eminent) I am sure, cannot miss of your concurrent suffrage. I am only sorry, that the affair, which carries me this morning out of town, deprives me of so desired an opportunity of kissing your hand at Lambeth; who am, for many great obligations,

Sir,

Your most humble

And obedient servant,

Whitehall, 7
Dec. 1677.

J. EVELYN.

For

For the worshipful and learned
Elias Ashmole, Esq. at his
house in South Lambeth, near
London.

Most worthy and learned Sir;

BEING informed by my friend Mr. Gadbury, that there were several passages in my history, which did some way reflect on your great worth and learning, and also intimate me to be guilty of gross rudeness and heat, I found it my duty to make this recantation; and so let you know that whatever in that kind may occur, I utterly repent and disown; and am both heartily sorry and ashamed, that any way I should prove so unhappily offensive to so good and learned, so industrious and renowned a gentleman, whose books I am not worthy to bear after him. And, Sir, if it will please you to let me see a copy of the passages, as you have collected them, (which on occasion I promise to return) with your confutations and reasons annexed, I do solemnly protest, that I will make a publick recantation, or otherwise as you shall think fit: and also, if ever King Edward sees another impression, I will alter those passages

passages as far as truth and equity shall acquire, still protesting in *verbo Sacerdotis*, that I never had any but honourable and respectful thoughts of you and Sir William Dugdale, (*Dii! quanto nomina*) and what I did, proceeded from a desire of finding out the truth, however my frailty might betray me to an error. Sir, the honour of a line, especially with an intimation of your good will, will be highly acceptable to the real honourer of your learning and goodness.

Emanuel College, Camb.
Oct. 15, 1688.

J. BARNES.

My humble duty to his Grace at Lambeth: and pray, Sir, have me recommended to my good master Doctor Goad and Mr. Gadbury, &c.

For

For my worthy friend M. Joshua Barnes, at Emanuel College in Cambridge.

Sir,

MY present weak indisposition has took me off from too much resenting those reflections you have made on me in your book, * and moulded in me more peaceable thoughts, than to be disturbed at what you have done. Your letter makes me think there was no ill meaning in what you did, and perhaps nothing more than an inadvertent and overhasty humour, which the civility of a penny-post letter would have cleared and prevented. I need not trouble myself, nor you, with giving you an account of those passages that concern me: they are easily found out, for they carry my name along with them. All I expect from you is, that your acknowledgments to others (as you have occasion) be what you have now made to me, and (if ever an oppor-

* The History of King Edward the III. Folio, wherein Mr. Barnes reflected on Mr. Ashmole's Order of the Garter, in a very gross manner.

tunity be offered) to reprint your History, then to rectify your copy.

Sir,

I am,

Your very humble servant,

Octob. 23,
1688.

E. ASHMOLE.

A copy of a letter from the Chapter of the Church of Litchfield to Mr. Ashmole, communicated from the Registers of that cathedral.

Honoured Sir,

WHatever interest this city and church have in your birth and education, hath already redounded, in so much honour thereby, and in your continual bounty, to both, that we have not the confidence to back, with that to-pick, this our petition for your free gift towards finishing the ring of ten bells, instead of our former six bad and useless ones.

ones : nor, in truth, have we any other arguments, but your charity and our necessity ; of the former, you have given us good proof, as we acknowledge with all thankfulness : and of the latter, we have too much, through the misfortunes of the work. The deceitfulness of the ground first making our honest bellfounder lose his casting the four biggest, to the damage of 30%. and now his error in oversizing the eight bells he hath cast, so far that they have swallowed up all the metal for the ten ; and that requires 80%. more to be added to our poor fund for the two other bells, proportionable to that bigness. But yet an error so much on the better hand, that would make extremely for the advantage and glory of the Cathedral (the bigness of such a ring far more besitting the place ; and these eight being judged so very good, that all are loth to have them broken, and cast into less) if possibly that additional sum could be raised. To this purpose 'Squire Diot, Mr. Walmisley the Subchantor, and other Vicars and ringers are most industriously undertaking a new collection, and we and several others are willing anew to contribute ; and if you will please to put to the helping hand of your piety and munificence, you will add signally to those instances thereof already in our publick cata-

catalogue of benefactors, and will highly oblige both those zealous undertakers, and especially,

Sir,

Your thankful humble servants,

Litchfield,
Oct. 15,
1688.

COLLECTION OF
EDWIN NEWTON OHL, Ph.D.

Ashmole (Elias), 1617 - 1692.

Theatrum Chemicum Britannicum. Containing Severall Poeticall Pieces of our Famous English Philosophers, who have written the Hermetique Mysteries in their owne Ancient Language. Faithfully Collected into one Volume, with Annotations thereon. Thick small 4to. Title printed in red and black with a very fine engraved title vignette. With folding plate by John Goddard, 7 full-page and several smaller engravings by Robert Vaughan. Old calf, neatly rebacked, gilt title-piece.

London: J. Grismond for Nath. Brooke, 1652

Ashmole, "perhaps the most remarkable antiquarian adventurer of the century" (Gunter) and founder of the Ashmolean Museum at Oxford, provided in the Theatrum Chemicum Britannicum the most valuable collection of old English alchemical writings in verse, 29 altogether. The first and longest (106 pages) of them is the original English version of The Opinall of Alchimy Thomas Norton of Bristol (fl. 1477), a true storehouse of medieval science. Two other contributions of first-rate importance are The Compound of Alchymie by George Ripley (c.1415-1490) and The Tale of the Chanons Yeoman by Geoffrey Chaucer.

Ashmole's collection was one of the favorite books of Sir Isaac Newton. An entry in one of his note-books shows that he bought it in 1669 for £1.8.0. Manuscript transcripts of parts of this book, in Newton's handwriting, are still extant and his richly annotated copy of the printed book is also preserved. The fine engravings by Vaughan are of unusual interest.

One of the very rarest books in English alchemy. Ours is a fine, well-preserved copy, but without the unnumbered plate between pp. 436-437, which is found

in half-a-dozen copies only.—Wing A.3987. Not in the James Young Collection (see Ferguson I, 52, who consequently says: "Difficult to get complete."). Read 174 ff. Thorndike IV, 351 ff. Jung, passim. M. Nierenstein & P.F. Chapman, Enquiry into the authorship of the Ordinal of Alchemy, in: Isis, XVIII (1932), 290-321.

Angel in Cornhill. M D C L I I.

TO

All Ingeniously Elaborate Students,
In the most Divine Mysteries of
Hermetique Learning.

He Subject of this ensuing Worke, is a Philosophicall account of that Eminent Secret treasur'd up in the bosome of Nature; which hath been sought for of Many, but found by a Few, notwithstanding Experienc'd Antiquity hath afforded faithfull (though not frequent) Discoveries thereof. Past Ages have like Rivers convey'd downe to us, (upon the floate,) the more light, and Sophisticall pieces of Learning; but what were Profound and Misterious, the weight and solidity thereof, sunke to the Bottome; Whence every one who attempts to dive, cannot easily fetch them up: So, that what our Saviour said to his Disciples, may (I hope without offence) be spoken to the Elected Sons of Art; Unto you it is given to know the Mysteries of the Kingdome of God; but to others in Parables, that seeing they might not see, and hearing they might not understand,

Our English Philosophers Generally, (like Prophets) have received little honour (unlesse what hath beene privately paid them) in their owne Countrey; nor have they done any mighty Workes amongst us, except in covertly administring their Medicine to a few Sick, and healing them. (For greater Experiments then what it performs in Physick, they never publikely made shew of.) Thus did I. O. (one of the first foure Fellowes of the Fratres R. C.) in curing the young Earle of Norfolke, of the Leprosie; and Doctor B. in carrying off the virulency of the Small-pox, twice, from Queen Elizabeth; insomuch that they never appeared. But in Parts abroad they have found more noble Reception, and the world greedy of obteyning their Workes; nay, (rather then want the sight thereof) contented to view

them through a Translation, though never so imperfect. Witnesse what Maierius, Hermannus, Combachius, Faber, and many others have done; the first of which came out of Germanie, to live in England; purposely that he might so understand our English Tongue, as to Translate Norton's Ordinall into Latine verse, which most judiciously and learnedly he did; Yet (to our shame be it spoken) his Entertainment was too too coarse for so deserving a Scholler.

How great a blemish is it then to us, that refuse to reade so Famous Authors in our Naturall Language, whilst Strangers are necessitated, to Reade them in Ours, to understand them in their Own, Yet think the dignity of the Subject, much more deserving, then their Paines.

If this We do but ingeniously Consider, We shall judge it more of Reason that We looke back upon, then neglect such pieces of Learning as are Natives of our owne Countrey, and by this Inquisition, finde no Nation hath written more, or better, although at present (as well through our owne Supinenesse, as the Decrees of Fate,) few of their Workes can be found. John Leland tooke very much paines, even at the yeilding up of the Ghost, of our English Learning, to preserve its latest (but weakest, cause almost spent) Breath; and from him John Bale, with John Pitts (who indeed is but Bale's Plagiary) hath left us a Catalogue of the Writers of this Nation, and that's neere all. Yet Posterity for this is deeply obliged. What punishment then did their pestilent Malice deserve, who rob'd us of their whole Workes?

A Judicious Author speaking of the Dissolution of our Monasteries, saith thus: Many Manuscripts, guilty of no other superstition then Red letters in the Front, were condemned to the Fire; and here a principall Key of Antiquity was lost to the great prejudice of Posterity. Indeed (such was Learnings misfortune, at that great Devastation of our English Libraries, that) where a Red letter or a Mathematicall Diagram appeared, they were sufficient to intitle the Booke to be Popish or Diabolicall.

Our English Nation hath ever beene happy for Learning and Learned men, and to illustrate this, I hope it will not prove distastfull.

As first, the Druydæ (the famous and mysterious Druydæ) that were Priests, Diviners, and Wise men: and took their Originall and Name from Druijs Sarronyus the fourth King of the Celts, (styled Sapientum & Augurum Doctor,) who dyed Anno Mundi. 2069.

Next

Next the Bardi, who celebrated the Illustrious Deeds of Famous Men, which they ingeniously dispos'd in Heroique Verse, and sung them to the sweete Melody of the Harpe: Amongst other Testimonies hereof receive Chaucer's;

The old gentle Brittons in her dayes
Of divers adventures maden Layes;
Wyped best in her Mother Tongue,
wherch Layes, with her Instruments they longe.

These Philosophers had their Name from Bardus Druydas (the King of the Celts,) who was the first Inventor of Verses, as Berosius tells us; and dyed An. Mundi 2138. Neither of these Sects of Philosophers used any writing (indeed it was not lawfull; for,) such was the Policy and Curiosity of Elder Ages (to defend their Learning and Mysteries from the Injury of Ignorant Interpretations) that they delivered them to Posterity, by Tradition only.

Cæsar testifies, (and tis a noble Testimony) That the Learning of the Druydi, was first invented in Britaine; and thence transferr'd into France; and that, in all his time, those of France came over hither to be Instructed. Agricola (in Tacitus) prefers the Britaines before the Students of France (notwithstanding that they were of a docible Wit, and apt to Learne) in that they were curious in attaining the Eloquence of the Latin Tongue.

As for Magick, Pliny tells us, It flourished in Britaine, and that the People there were so devoted to it (yea, with all Complements of Ceremony) a man would think that even the Persian learned his Magick thence.

A Germane Poet, sayes, that when the World was troubled with Pannonick Invasions, England flourished in the knowledge of all good Arts; and was able to send of her Learned Men into other Countries, to propogate Learning; and instances Winifrid (alias Boniface the Devonshire Man) and Willebroad (the Northerne Man) that were sent into Germany.

Nay more, England was twice Schoole-Mistris to France (for so saith Peter Ramus) viz. First by the Druydæ (who taught them their Discipline) and afterwards by Alcinus, in Charles the Great's time, through whose perswasions the Emperour founded the University of Paris.

For the Saxons, it is not to be denied but that many of them, after

their conversion to Christianity; were exceedingly Learned; and before that, much addicted to Southsaying, Augury Divination by the Neighing of Horses, &c. And tis worth the Enquiry (there being more in it then we ordinarily apprehend) why they in Generall worshipped *Herthus* [i. e. *Dame Earth*] for a Goddesse, and honoured *Mercury* above all the Gods of the Germanes, whom they called *Wooden*, (hence *Modensday* now our *Wednesday*;) For, they believed that this *Dame Herthus* Intermediated in Humane Affaires and Relieved the Poore; whose Image was made Armed, standing among Flowers, having in its right hand a Staffe, and in it a Banner, wherein was painted a Rose; In the other Hand a Ballance, and upon the Head thereof a Cock; on the Brest a carved Beare, and before the Midle, a fixed Scutchion; in Chiefe whereof was also a Ballance; in Face, a Lyon; and in Point, a Rose. And for their God *Wooden* they esteemed him as their God of Battaille, representing him by an Armed Man. Infomuch that wee to this very day retaine the Word *Wood* among us, to Signifie Fierce, Furious, Raging, [as When one is in a great Rage, we usually say he is *Wood*:] So the *Mercury* of the Philosophers is shaddowed under the fierce and terrible Names of *Lyon*, *Dragon*, *Poyson*, &c. But this is not All, although it be Something.

And now to come yet neerer to our Selves; we must needs say that of Later Times (since the Conquest) our Nation hath produced such Famous and eminently learned Men, as have equall'd (if not surpass'd) the greatest Schollers of other Nations, and happy were we if now we could but partake of those Legacies they left, and which Envy and Ignorance has defrauded us of: (Howsoever the small remainder which is left, we have good reason to prize,

For out of olde Fields as Men saythe,
Cometh alle this new Corne fro yeare to yeare;
And out of olde Bokes in good saythe
Cometh alle this Science, that Men leare.)

That England hath beene successively enrich'd with such Men, our Country-men *John Leland* (and I never heard he was Partiall) abundantly Testifies: who avers, That Generally wee have had a great number of excellent Wits and Writers, learned with the best as Times served, who besides their knowledge in the foure Tongues, in which

Prolegomena.

which part of them excelled, there was no Liberrall Science or any Feate concerning Learning, in which they have not shewed certaine Arguments of great Felicity and Wit. And thus much for the Generality of Learning.

Now for a Particular account of the Hermetique Science, vouchsafe (Ingenious Reader) to accept the ensuing Collections, yet not so, as if therein were contained all the Workes of our English Hermetique Philosophers, (for more are design'd in a Second Part to follow and compleate this a full Theatrum ; the Which GOD allowing me further Time and Tranquility to run through it, as I have already this, I intend shortly to make ready for the Presse.) whereby yet more to manifest what Men we have had, no lesse famous for this kinde of Philosophy, then for all other Commendable Arts and Sciences.

To adde any thing to the praise thereof, were but to hold a Candle before the Sunne ; or should I here deliver a full Account of the Marvellous Operations and Effects thereof, it would be as far beyond the limits of a Preface, as remote from the Beliefe of the generality of the World. Nor doe I expect that all my Readers should come with an Engagement, to believe what I here write , or that there was ever any such thing in rerum natura as what we call A Philosophers Stone, nor will I perswade them to it, (though I must tell them I have not the vanity to publish these Sacred and Serious Mysteries and Arcana, as Romances) tis enough that I know Incredulity is given to the world as a punishment. Yet Ile tell them what one of our Ancient Poeticall Philosophers sayes,

If you wyl listen to my Lay,
Something thereby you may finde,
That may content your minde :
I will not sweare to make you give credence,
For a Philosopher will finde, here in Evident
Of the Truth ; and to Men that be Lay,
I skill not greatly what they say.

I must professe I know enough to hold my Tongue, but not enough to Speake ; and the no lesse Reall then Miraculous Fruits I have found in my diligent enquiry into these Arcana, lead me on to such degrees of Admiration, they command Silence, and force me to lose
my

Prolegomena.

my Tongue. Yet, as one greatly affecting my Native Countrey, and the satisfaction of all Ingenious Artists, I have published (for their use) these ensuing Collected Antiquities; and shall here say something more then they speak of.

He who shall have the happinesse to meet with S. Dunstons worke De Occulta Philosophia, (a Booke which E. G. A. I. made much use of, and which shall chiefly back what here I am about to say) may therein reade such Stories as will make him amaz'd to think what stupendious and Immense things are to bee performed by vertue of the Philosophers Mercury, of which a Taste onely and no more.

And first, of the Minerall Stone, the which is wrought up to the degree onely that hath the power of Transmuting any Imperfect Earthy Matter into its utmost degree of Perfection; that is, to convert the basest of Metalls into perfect Gold and Silver; Flints into all manner of Precious Stones; [as Rubies, Saphirs, Emeralds, and Diamonds, &c.] and many more Experiments of the like nature. But as this is but a part, so it is the least share of that Blessing which may be acquired by the Philosophers Materia, if the full vertue thereof were knowne. Gold I confesse is a delicious Object, a goodly Light, which we admire and gaze upon ut Pueri in Junonis avem; but, as to make Gold (saith an incomparable Authour) is the cheifest intent of the Alchimyists, so was it scarce any intent of the ancient Philosophers, and the lowest use the Adepti made of this Materia.

For they being lovers of Wisdome more then Worldly Wealth, drove at higher and more Excellent Operations: And certainly He to whom the whole Courle of Nature lyes open, rejoyceth not so much that he can make Gold and Silver, or the Divells to become Subject to him, as that he sees the Heavens open, the Angells of God Ascending and Descending, and that his own Name is fairely written in the Book of life.

Next, to come to the Vegetable, Magicall, and Angelicall Stones; the which have in them no part of the Minerall Stone (Quatenus a Stone Fermented with Metalline and Earthy Nature) for they are marvelously Subtile, and each of them differing in Operation and Nature, because Fitted and Fermented for severall Effects and Purposes. Doubtlesse Adam (with the Fathers before the Flood,

and

Prolegomena.

and since) Abraham, Moses, and Solomon, wrought many Wonders by them, yet the utmost of their Vertues they never fully understood; nor indeed any but GOD the Maker of All things in Heaven and Earth, blessed for evermore.

For, by the Vegetable may be perfectly known the Nature of Man, Beasts, Fowles, Fishes, together with all kinds of Trees, Plants, Flowers, &c. and how to produce and make them Grow, Flourish & beare Fruit; how to encrease them in Colour and Smell, and when and where we please, and all this not onely at an instant, Experimenti gratia, but Daily, Monethly, Yearly, at any Time, at any Season; yea, in the depth of Winter. And therefore not unlike, but the Wall-nut-Tree which anciently grew in Glastenbury Church-yard, and never put forth Leaves before S. Barnabies Day, yet then was fully loaded with them, as also the Hawthorne there, so greatly fam'd for shooting forth Leaves and Flowers at Christmas, together with the Oake in New-Forrest in Hampshire that bore greene Leaves at the same Season; may be some Experiments made of the Vegetable Stone.

Besides the Masculine part of it which is wrought up to a Solar Quality, and through its exceeding Heat will burne up and destroy any Creature, Plant, &c. That which is Lunar & Feminine (if immediately applyed) will mitigate it with its extreme Cold: and in like manner the Lunar Quality benums and congeals any Animall, &c. unlesse it be presently helped and resolved by that of the Sun; For though they both are made out of one Natural Substance, yet in working they have contrary Qualities: nevertheless there is such a naturall Assistance between them, that what the one cannot doe, the other both can, and will perform.

Nor are their inward Vertues more then their outward Beauties; for the Solar part is of so resplendent, transparent Lustre, that the Eye of Man is scarce able to indure it; and if the Lunar part be expos'd abroad in a dark Night, Birds will repaire to (and circulate about) it, as a Fly round a Candle, and submit themselves to the Captivity of the Hand: And this invites mee to believe, that the Stone which the ancient Hermet (being then 140 Years old) tooke out of the Wall in his Cell, and shewed Cornelius Gallus, Ann. 1602. was of the Nature of this Vegetable Stone: For, (upon the opening his Golden Box wherein it was inclosed) it dilated its Beames all

over the Roome, and that with so great Splendor, that it overcame the Light that was kindled therein; Besides the Hermet refused to project it upon Metall (as being unworthy of it) but made his Experiment upon Veronica and Rue.

By the Magicall or Prospective Stone it is possible to discover any Person in what part of the World soever, although never so secretly concealed or hid; in Chambers, Closets, or Cavernes of the Earth: For there it makes a strict Inquisition. In a Word, it fairely presents to your view even the whole World, wherein to behold, heare, or see your Desire. Nay more, It enables Man to understand the Language of the Creatures, as the Chirping of Birds, Lowing of Beasts, &c. To Convey a Spirit into an Image, which by observing the Influence of Heavenly Bodies, shall become a true Oracle; And yet this as E. A. assures you, is not any wayes Necromanticall, or Devilish; but easy, wonderous easy, Naturall and Honest.

Lastly, as touching the Angelicall Stone, it is so subtile, saith the aforesaid Author, that it can neither be seene, felt, or weighed; but Tasted only. The voyce of Man (which bears some proportion to these subtile properties,) comes short in comparison; Nay the Air it selfe is not so penetrable, and yet (Oh mysterious Wonder!) A Stone, that will lodge in the Fire to Eternity without being prejudiced. It hath a Divine Power, Celestiall, and Invisible, above the rest; and endowes the possessor with Divine Gifts. It affords the Apparition of Angels, and gives a power of conversing with them, by Dreames and Revelations: nor dare any Evill Spirit approach the Place where it lodgeth. Because it is a Quintessence wherein there is no corruptible Thing: and where the Elements are not corrupt, no Devill can stay or abide.

S. Dunston calls it the Food of Angels, and by others it is tearmed The Heavenly Viaticum; The Tree of Life; and is undoubtedly (next under G O D) the true Alchochodon, or Giver of Years; for by it Mans Body is preserved from Corruption, being thereby inabled to live a long time without Foode: nay 'tis made a question whether any Man can Dye that uses it. Which I doe not so much admire, as to think why the Possessors of it should desire to live, that have these Manifestations of Glory and Eternity, presented unto their Fleshly Eyes; but rather desire to be Dissolved, and to enjoy the full Fruition, then live where they must be content with the bare Speculation.

After

Prolegomena.

After Hermes had once obtained the Knowledge of this Stone, he gave over the use of all other Stones, and therein only delighted: Moses, and Solomon, (together with Hermes were the only three, that) excelled in the Knowledge thereof, and who therewith wrought Wonders.

That there is a Gift of Propheſie hid in the Red-stone, Raciſ will tell you; for thereby (ſaith he) Philoſophers have foretold things to come: And Petrus Bonus avers, that they did Propheſie, not only Generally but Specially; having a Fore-knowledge of the Reſurrection, Incarnation of Chriſt, day of Judgement, and that the World ſhould be conſumed with Fire: and this not otherwiſe, then from the Inſight of their Operations.

In Briefe, by the true and various uſe of the Philoſophers Prima materia (for there are diverſities of Gifts, but the ſame ſpirit) the perfection of Liberall Sciences are made known, the whole Wiſdome of Nature may be grapted: And (Notwithſtanding what has been ſaid, I muſt further adde) There are yet hid greater things then theſe, for we have ſeen but few of his Workes.

Howbeit, there are but a few Stocks that are fitted to Inoculate the Grafts of this Science on: They are Myſteries Incommunicable to any but the Adepti, and thoſe that have bene Devoted even from their Cradles to ſerve and waite at this Altar: And how rarely ſuch have been heard of, may appear by Norton:

For ſew (ſaith he) or ſcarcely One

In ſilteene Kingdomes had our Red Stone.

And they perhaps were (with S. Paul) Caught up into Paradice, and as he, heard unſpeakeable Words, ſo they, wrought unoperable Workes; ſuch as it is not lawfull for to utter.

Of ſuch as theſe therefore will I glory, yet of my ſelfe I will not glory, but of mine Infirmities. And truly whether ſuch were in the Body or out of the Body I cannot tell, GOD knoweth, doubtleſſe they were not far from the Kingdome of GOD.

But I feare I have waded too farre; and therefore now to give ſome Particular Account, as well touching the Publication of theſe Worke, as alſo the Diſpoſition thereof, and the Nature of the Obſolete Language wherein tis Written: I ſhall in the Firſt place acquaint the Reader, that the kinde Acceptance my former Endeavours received at the Hands of Candid Artiſts, in publiſhing ſome Chemicall Collections; very earneſtly invited me to finde out a Second Piece

Prolegomena.

wherewith to present those Gratefull Persons. Whereupon I intended to rally up some of my own Conceptions in this Science, and expose them also to the Test: But (to this end, reviewing the Philosophers) I found that many (assuming that Name) wrote what their Fancies, not their Hands had wrought, and further then in Apprehension had not seen Projection; (amongst whom our Ripley was sometime One, as appeares by his Ingenious Retractation, hereafter mentioned:) and being truly sensible of the great Injury such Workes have done young Students (at the first not able to distinguish, who have written upon their undeceveable Experience, who not; and consequently, not which to follow, or which to avoyde) I withdrew my Thoughts (having never as yet set my selfe Effectually upon the Manuall Practise) lest I should adde to the many Injuries the World has already suffered, by delivering the bare Medley of my Dubious Apprehensions, without the confident Attestation of Practise: and be justly esteemed as indiscreete as those whom Ripley mentions; that prate

Of Robin Hode and of his Bow,
Which never shot therein I trow.

Yet still casting about what to make choyce of, at length (by the encouragement of some that are Industrious after publique benefit) Centred my Thoughts, and fix'd them on this designe of Collecting All (or as many as I could meeete With) of our own English Hermeticque Philosophers, and to make them publique.

Nor did I change this Resolution with my Clothes, notwithstanding the Difficulties I saw, ready to encounter. and obstruct the Undertaking: For, besides the Paines and Care that was thereunto requisite, the Feare of not meeting with, or obtaining the Originall Manuscripts, or Authentique Copies of this Nature, (which I knew to be in some Mens hands, yet wanting them my selfe,) shrewdly beset, though nothing discourag'd me: yet was I therewith freely and plentifully supplied by some worthy and intimate Friends, whom I would gladly here mention, but that I well know they delight not to see their Names in Print. These had, My Care was next to dispose them in such a Series as might be answerable to the Respective Times, wherein each Author Flourished; and withall to the best Advantage of the laborious Student: the which I have manag'd with so just an Adequation, as (I hope) Will neither detract from the due Honour of the One, nor yet disturbe or darken the direct path of the Other.

But

But whilst I was doing this, I made a Question (in regard some Philosophers had writ in Verse, others in Prose) Which of these should take Precedency ; and after some Consideration adjudged it to the Poetique part : And that, not only because its Originall may probably Anticipate the time of Orpheus, (although he be noted by Maierus, Primus Antistes, Sacerdos, Theologus, VATES, & Doctor totius Græcorum nationis) because that Linus is said to be the most Perite of any Lyrick Poet ; and so Ancient that some suppose him Master to Orpheus, who writ that admirable Allegory of the Golden Fléece, and was the first of all the Grecians that brought the Chemick Learning (with other Sciences) out of Ægipt, as the other the first that brought the Phænician Learning to the Grecians : I say not only for that it is the Ancientest, and Prose but of Latter use with other Nations: but because Poetry hath bin most Anciently used with us, and (as if from a Grant of Nature) held unquestionable.

*Again, the Excellent Melody thereof is so Naturall and Univer-
sall, as that it seemes to be borne With all the Nations of the World,
as an Hereditary Eloquence proper to all Mankind: Nor was this
all, for I considered that it Claimes a Generall succession, and Re-
ception, in All Nations, all Ages, who were never without a Ho-
mer, a Virgil, or an Ovid : No not this small Segment of the World
[England] without a Rasis Cestrensis and an Hortulanus ; For the
First of these, His Liber Luminum, and his Lumen de Luminum, are
the Ancientest now extant in Latine Verse : In the latter of Which, I
cannot omit this Title of his, [Responsio Rasis Cestrensis Filio suo
Merlino ;] Whereby it appeares he was Merlin's Contemporary (at
least) if not his Master, in this Abstruse Mystery. These Workes of
his are both Published by Hermannus, but very Imperfectly, as I
found by Comparing them with a Manuscript, as ancient as King
John's Time. And for the Second He was the first Christian Philo-
sopher after Morienus, who (travelling abroad, and returning hither in
the Raigne of William the Conquerour) because he was the first that
Transplanted the Chemicall Muses from remotest Parts into his own
Country, is called Garland, ab Coronam Hermeticam & Poeticam.
But, to returne to our Matter.*

*If neither its Antiquity, nor the Naturall Ratification, Generall
Succession, and Reception thereof, were enough to allow it the Right-
hand of Fellowship, yet I suppose the Effects thereof, (which so
affect and delight the Eare, rejoyce the Heart, satisfie the Judge-
ment,*

ment, and indulge the Hearers) justly may : In regard Poesy has a Life, a Pulse, and such a secret Energy, as leaves in the Minde, a far deeper Impression, then what runs in the slow and evenlesse Numbers of Prose : whereby it won so much upon the World, That in Rude Times, and even amongst Barbarous Nations, When other sorts of Learning stood excluded, there was nothing more in Estimation. And for that we call Rythme ; the Custome of divers of our Saxon and Norman Poets, shewes the Opinion they had thereof ; whilst the Latine (notwithstanding its Excellency) could not sufficiently delight their Eares, unlesse their Verses (in that Language,) were form'd with an Harmonicall Cadence, and brought into Rythme : Nor did the Ancients wrap up their Chiefest Mysteries, any Where else, then in the Parobolical & Allusive part of Poetry, as the most Sacred, and Venerable in their Esteeme, and the securest from Prophane and Vulgar Wits. For such was the goodnesse of our Fathers, that they would not willingly hazard (much lesse throw) their Childrens Bread among Dogs ; And therefore their Wisdome and Policy was, First, to finde out a way to Teach, and then an Art (which was this) to Conceale. In a word, to prefer Prose before Poetry, is no other, or better, then to let a Rough-hewen-Clowne, take the Wall of a Rich-clad-Lady of Honour : or to Hang a Presence Chamber with Tarpalin, instead of Tapestry.

And for these Reasons, and out of these Respects, the Poeticall (as I conceiv'd) deserved the Precedency.

Howbeit probably some of these Pieces (now brought to publique Light) had welnigh perish'd in a silent Ruine ; and Destruction got a compleate Victory over them, but that my Diligence and Laborious Inquisition rescued them from the Jawes thereof : being almost quite shrouded in the Dust of Antiquity, and involv'd in the obscurity of forgotten things, with their Leaves halfe Worme-eaten. And a wonder it is, that (like the Creatures in Noahs Arke) they were hitherto so safely preserved from that Universall Deluge, which (at the Dissolution of Abbies) overflowed our greatest Libraries.

And in doing thus, I presume it no Arrogance to challenge the Reputation of performing a Worke, next that of a Mans own : and something more, in that (as if having the Elixir it selfe) I have made Old Age become Young and Lively, by restoring each of the Ancient Writers not only to the Spring of their severall Beauties, but to the Summer of their Strength and Perfection.

Prolegomena.

As for the whole Worke it selfe, it is sheav'd up from a few gleanings in part of our English Fields; where though I have bestow'd my Industry to pick up here and there, what I could finde in my way, yet I believe there are many other Pieces of this Nature in private Hands, which if any are pleas'd (out of the same Ingenious score that I have published these,) to Communicate to me: I shall set thereon a value sutable to the worth of their Favours, and let the World know its Obligation to them besides.

The Style and Language thereof, may, I confesse (to some) seeme Irksome and Uncouth, and so it is indeed to those that are strangers thereunto; but withall very Significant: Old words have strong Emphasis; others may look upon them as Rubbish or Trifles, but they are grossly Mistaken: for what some light Braines may esteeme as Foolish Toys; deeper Judgements can and will value as sound and serious Matter.

We English have often varied our Fashions (such is the levity of our Fancies) and therefore if you meet with Spellings different from those in use; or uncouth Words as strangely ridiculous, as a Maunch, Hood, Cod-piece, or Trunke-hose, know; as they were the fashionable Attayres, so these the usuall Dialects of those Times: And Posterity will pay us in our own Coyne, should we deride the behaviour and dresse of our Ancestors. For we must consider that Languages which are daily used in our Discourse, are in as continuall Mutation: what Custome brings into habit, is best lik'd for the Present, whether it be to revive what is lost, or introduce something new; or to piece up the present, with the retained shreds of what preceded; But learned Tongues (which are contain'd in Books) enjoy a more immutable Fate, because not subject to be washt away with the daily tyde and current of Times. They are like the fashion and Drapery wrought on Marble Statues, which must ever be retained without alteration:

And therefore that the Truth and Worth of their Workes might receive no Diminution by my Transcription, I purposely retain'd the old Words and manner of their Spelling, as I found them in the Originalls (except only some palpable Mistakes and Blemishes of former Transcribers, which I took upon me to correct and purge as little more then Litterall Imperfections:) yet not to leave the Reader unsatisfied, have added a Compendious Table, for the Interpretation of Old, unusuall, and obsolete Words, and thereby smooth'd (as I suppose) the Passage for such as have not hitherto bin Conversant in these Ancient Rough-hew'd Expressions.

Where.

Prolegomena.

Wherefore you that love to converse with the Dead, or consult with their Monuments, draw near : perhaps you may find more benefit in them, then the Living; There you may meet with the Genii of our Hermetique Philosophers, learne the Language in which they woo'd and courted Dame Nature, and enjoy them more freely, and at Greater Command, (to satisfie your Doubts) then when they were in the Flesh; For, they have Written more then they would Speake; and left their Lines so Rich, as if they had dissolved Gold in their Inke, and clad their Words with the Sovereign Moylture.

My Annotations are limited Within the Bounds of what is Historicall, or what occasionally must needs intrench on the Confines of other Arts, and all Glosses upon the Philosophicall Worke purposely omitted, for the same Reasons that I chose to send forth other Mens Children into the World, rather then my own. And what presumptuous Mistaks, or Errors, the Candid Reader shall meet with, will (I hope) be Censured with no lesse Favour and Charity, then that whereby they are wont to Judge the Faults of these they esteem their Friends and Well-wishers.

And now to Conclude : May the GOD of NATURE be gratioously pleased (out of the Immense Treasury of his Goodness) to vouchsafe all (such whose good Angells direct them to, or have already Religiously Engaged them in this Mysterious knowledge) the Full and Entire Accomplishments of a True and Pious Philosopher, [To wit, Learning, Humility, Judgement, Courage, Hope, Patience, Discretion, Charity & Secrecie:] That so they may enjoy the Fruits of their Labours, which otherwise Will be but vain, and unpleasant: and causelessly render the Divine Science and Secret it selfe, Contemptible.

Farewell (Industrious Students) and let your Goodnesse still invite me to accomplish the End I have propos'd : In doing which, (I presume) you may one Day esteeme me, better deserving your Patronage; At least-Wise, your charitable Censure; which is all the Recompence Expected or Merited, by him, who is

Yours Really Devoted,

26 Jan. 165¹/₂.

E. Ashmole.

THE
ORDINALL
OF
ALCHIMY.

Written by
THOMAS NORTON
OF
BRISTOLL.

Liber iste Clericis monstrat scientiam,
Liber sed Laicis auget inscitiam :
Liber, honores iuvans per copiam :
Et Liber pauperum fugans inopiam :
Liber fiducia est & veritatis :
Regibus consilium, doctrina Prelatis :
Et Liber utilis viris beatis
Vivere qui cupiunt absq̃ peccatis.
Liber secretum, Liber doni Dei,
Electis semita, vires bona spei,
Valens constantibus firma fidei :
Ve non credentibus verbis oris mei.
Quærunt Alchimiam, falsi quoque recti :
Falsi sine numero, sed hi sunt reiecti,
Et cupiditatibus (heu) tot sunt infecti,
Quod inter mille millia vix sunt tres electi,
Istam ad scientiam multi sunt vocati
Nobiles, & pauperes, inscii, literati,
Qui noelunt labores, neque tempus pati ;
Ideo non perficient, quia sunt ingrati.
Liber Artis filios docet iste satis,
Quibus hac percipere deus dedit gratis,
Versiculis prophetis quatuor his credatis,
Omnia dat gratis divina fons pietatis.
Hæc nobilis scientia est tantum illis data,
Qui diligunt iustitiam, mente cum beata ;
Dolosis, & raptoribus sed est denegata,
Propter peccata tardantur munera grata.

THis Booke the grsate ft *Clearkes* mayteach,
 But *shorteneth* the *Vulgar-Reach* :
 A Booke that gets (by *Wealth*) *Renowne*,
 And *Boggles* at a *thred-bare-Gowne* :
 A *trusty-Booke* of *faithfull-Things* ;
 Instructing *Priests*, Advising *Kings* :
 A Booke that's fitted for the *sence*
 Of Man, who lives without *offence* :
 A Booke of *secrets* given by *God* ;
 To men *Elect*, a *Beaten-Trod* :
 Availing such as *constant* be
 In *Faith*, and *Hope*, and *trusting Me*.
Good Men and *Bad*, even *Numberlesse*,
 (The latter, but without *successe*)
 Desire the *Art* : But still (Alas !)
 They are so given to *Avarice*,
 That of a *Million*, hardly *three*
 Were ere *Ordaind* for *Alchimy*.
 Yet many *called* every *Houre*,
Learn'd and *Unlearned*, *Rich*, and *Poore* ;
 Who'll neither *Tend*, nor take the *Paines* ;
 And therefore *Trudge* without the *Gaines*.
 On whom *God* doth this *Art* bestow,
 Her *Sons* may herein fully know :
 By these * *foure-lines* you may believe
Heaven doth all things gratis give.
 This *Art* in such you only finde
 As *Iustice* love, with *spotles-Minde* :
 But tis deny'd to *guilefull Men* ;
For sin protracts the gifts of *Heaven*.

* These foure
 Propheticke
 lines extracted
 from Sir *John*
Abbot of *Brid-*
*lington*s Pro-
 phecies, *Ubi de*
Tauro, &c.

4
*Sape Reges Anglia decorasset hac res,
Firma si in domino fuisset eorum spes;
Ille sed qui capiet per hanc rem honores,
Antiquos mores mutabit in meliores.
Iste cumque venerit, regnum reformabit,
Virtutibus & moribus, & exemplum dabit
Sempiternum Regibus, plebs tunc jubilabit,
Et mutuo se diligens laudes Deo dabit:
O Rex, hac facturus! Deum Regem ora,
Et ejus auxilium pro re hac implora:
Tunc regi justo fulgenti mente decora
Grata supervenient quâ non sperabitur hora.*

These had adorn'd the *English-Throne*,
 If they had trusted *God* alone :
 For he that hereby *Honor* winns,
Shall change the old for better things.

And when he comes to *rule* the Land,
Reforme it with a *vertuous hand* :
 Leaving *examples* of good *deedes*
 To every *King* that him *succeedes* :
 Then shall the People *Jubilize*
 In *mutuall love* ; and *sacrifice*
Praises to *God*. O *King* that shall
 These *Workes* ! implore the *God* of all
 For timely helpe, in this *good thing* :
 So to a *Iust*, and *Glorious King*,
Most goodly Graces shall descend,
 When least look'd for : *To Crowne his End.*

C 3

The

THE PROHEME.

O the honor of *God*, One in Persons three,
This Boke is made, that *Lay-men* shulde it
And Clerks alsoe, after my decease, (see,
Whereby all *Lay-men* which putteth
(them in prease,
To seech by *Alkimy* great ryches to winn
May finde good Counsell er they such warke begin;
And greate deceipts they may hereby eschewe,
And by this doctrine know fals men from trewe.
Nathles Clerks greate seacreats heere may leare,
But all *Lay men* shall finde heere cause to feare,
And to beware of fals illusions,
Which *Multipliers* worke with their Conclusions :
But for that I desire not worldly fame,
But your good prayers, unknowne shall be my name.
That no man shulde therafter search, ne looke,
But wisely Consider the flowers of this booke :
Of every estate that is within Mankind
If yee make search much people ye may finde,
Which to *Alkimy* their Corage doe address
Only for appetite of Lucre and Riches.
As *Popes* with *Cardinalls* of *Dignity*,
Archbyshopes with *Byshopes* of *high* degree;
With *Abbots* and *Priors* of Religion,
With *Friars*, *Heremites*, and *Preefts* manie one,
And *Kings* with *Princes* and *Lords* great of blood,
For every estate *desireth* after good ;

And

And Merchaunts also which dwell in the fiere
 Of brenning Coverife, have thereto desire;
 And *Common-workemen* will not be out-laste,
 For as well as *Lords* they love this noble Crafte;
 As *Gouldsmithes* whome we shulde lest reprove
 For *sights* in their Craft meverth them to beleeeve:
 But wonder it is that *Wevers* deale with such warks,
Free Masons and *Tanners* with poore *Parish Clerks*;
Tailors and *Glasiers* woll not thereof cease,
 And eke sely *Tinkers* will put them in the prease
 With greate presumption; but yet some collour there was,
 For all such Men as give Tincture to Glasse:
 But many *Artificers* have byn over-swifte
 With hasty Credence to fume away their thrifte:
 And albeit thar losses made them to smarte,
 Yet ever in hope continued their hearte,
 Trusting some tyme to speede right well,
 Of many such truly I can tell,
 Which in such hope continued all their lyfe,
 Whereby they were pore and made to unthrife:
 It had byne good for them to have lest off
 In season, for noughte they founde but a scoffe,
 For trewly he that is not a greate *Clerke*
 Is nice and lewde to medle with this warke;
 Ye may trust me well it is no small inginn
 To know all secreats pertaining to the Myne;
 For it is most profound *Philosophie*,
 The subtill science of holy *Alkimy*,
 Of which Science here I intend to write,
 Howbeit I may not curiously indite.
 For he that shulde all a common people teache,
 He must for them use plaine and common speache;
 Though that I write in plaine, and hoemely wise
 No good Man then shulde such writenge dispise.

All *Masters* that write of this Soleme werke
 They made their Bokes to many Men full derke,
 In Poyfes, Parables, and in Metaphors alsoe,
 Which to Shollers causeth peine and woe:
 For in their practise whan they would it assay,
 They leese their Cofts, as men see aldaye.
Hermes, Rasis, Geber, and Avicen,
Merlin, Hortolan, Democrit, and Morien,
Bacon, and Raimond, with others many moe
 Wrote under covert, and *Aristotle* alsoe.
 For what hereof they wrote with their penn,
 Their Cloudy Clauses dulled many Men:
 Fro *Lay-men*, Fro *Clearks*, and so fro every Man
 They hid this *Art* that no Man finde it cann.
 By their bokes do they shew Reasons faire,
 Whereby much people are brought into dispaire.
 Yet *Anaxagoras* wrote plainest of them all
 In his boke of *Conversions naturall*;
 Of the old *Fathers* that ever I founde
 He most disclosed of this *Science* the grownde;
 Whereof *Aristotle* had greate envly,
 And him rebuked unrightfully
 In many places, as I can well report,
 Intending that men to him shulde not resort:
 For he was large of his cunning and love,
God have his soule in blisse with him above:
 And suche as sowed envious seede,
God forgive them their misdeede.
 As the *Mounke* which a Boke did write
 Of a *thousand receipts* in mallice for despight;
 Which be coppied in many a place
 Whereby hath beene made pale many a Face;
 And many *Gownds* have byne made bare of hewe,
 And men made fals which before tyme were trewe.

Wherefore

Wherefore my Pitty doth me constreyne
 To shew the trewth in fewe words and plaine,
 Soe that you may fro false doctrine flee,
 If ye give Credence to this boke and mee;
 Avoide your Bokes written of Receipts,
 For all such Receipts are full of Deceipts;
 Trust not such Receipts, and lerne well this Clause,
Nothing is wrought but by his proper Cause:
 Wherefore that Practise falleth farr behinde
 Wher Knowledge of the cause is not in minde:
 Therefore remember ever more wisely, (whie.
 That you woorke nothing but you knowe howe and
 Alsoe he that would in this *Arte* proceede,
 To eschewe falshood he hath greate need:
 For trewth is good which this *Arte* must guide,
 Wherefore to falshood ye may never slide;
 But stedfastly your minde must be set,
 Fals Colloured Metall never to Counterfett;
 As thei that seeke Blanchers or Citrinacions,
 Which woll not abide all Examinacions,
 Wherewith fals Plate they make as they cann
 Or Money to beguile some good trew Mann:
 But *God* hath made that of this blessed *Arte*,
 All that be fals shall have thereof noe parte;
 He must have Grace that would for this *Arte* sue,
 Therefore of right him needeth to be trew:
 Also he may not be trobled in his Minde
 With outward charges, which this *Arte* would finde:
 And he that would have his intent,
 He must have Riches sufficient.
 In many wayes he maie not looke
 But only pursue the order of this Boke;
 Named of *Alkimy the Ordinall*,
The Crede mihi, the Standard perpetuall:

For like as the *Ordinall* to *Preefts* setteth out
 The service of the dayes as they goe aboute :
 Soe of all the Bokes unordered in *Alkimy*
 The effect is here set out Orderly:
 Therefore this Boke to an *Alchimister* wise,
 Is a Boke of incomparable price ;
 Whose trewth shall never be defiled,
 Though it appeare in homely wise compiled :
 And as I had this *Arte* by Grace from Heaven,
 I give you the same here in *Chapters* seaven :
 As largely as by my fealty I may,
 By licence of the dreadfull Judge at domes daye.

The *first Chapter* shall all Men teache
 What manner People may this *Science* reache,
 And whie the trew *Science* of *Alkimy*,
 Is of old Fathers called *Blessed and Holy*.

In the *second Chapter* maie be sayne,
 The nice Joyes thereof, with the greate paine.

The *third Chapter* for the love of One,
 Shall trewly disclose the Matters of our Stone ;
 Which the *Arabies* doon *Elixir* call,
 Whereof it is, there understonde you shall.

The *fourth Chapter* teacheth the grosse Werke,
 A foule labour not kindly for a *Clerke*.
 In which is found full greate travaile,
 With many perills, and many a faile.

The *fift Chapter* is of the subtrill Werk,
 Which *God* ordeyned only for a *Clerke* ;
 Full few *Clerks* can it comprehend,
 Therefore to few Men is the *Science* send.

The *sixt Chapter* is of Concord and love,
 Between low *natures*, and heavenly spheares above :
 Whereof trew knowledge advanceth greatly *Clerks*,
 And causeth furtherance in our wonderfull werks.

The *seaventh Chapter* trewly teach you shall,
The doubtfull Regiments of your Fires.all.

NOW Sovereigne *Lord God* me guide and speede,
For to my Matters as now I will proceede,
Praying all men which this Boke shall finde,
With devoute Prayers to have my soule in minde;
And that noe Man for better ne for worse,
Chaunge my writing for drede of *Gods curse* :
For where quick sentence shall seame not to be
Ther may wise men finde selcouthe previtye;
And chaunging of some one fillable
May make this Boke unprofitable.
Therefore trust not to one Reading or twaine,
But twenty tymes it would be over sayne;
For it conteyneth full ponderous sentence,
Albeit that it faute forme of Eloquence;
But the best thing that ye doe shall,
Is to reade many Bokes, and than this withall.

Nortons Ordinall.

CHAP. I.

ALIS tryefull mervaylous and Archimastrye
Is the tincture of holi *Alkimy*:
A wonderfull *Science*, secrete Philosophie,
A singular grace & giste of th'almightie:
Which never was founde by labour of

But it by Teaching, or Revelacion begann. (Mann,
It was never for Mony sold ne bought,
By any Man which for it hath sought:
But given to an able Man by grace, (space.
Wrought with greate Cost, with long layfir and
It helpeth a Man when he hath neede,
It voydeth vaine Glory, Hope, and also dreade:
It voydeth Ambitiousnesse, Extorcion, and Excesse,
It fenceth Adversity that shee doe not oppresse.
He that thereof hath his full intent,
Forsaketh Extremities, with Measure is content.
Some people would not have it cauled *Holy*,
And in this wise thei doe replye,
Thei say how *Painims* maie this *Arte* have,
Such as our *Lord God* woll never save:
For their wilfull fals infidelitie,
The cause of goodnes, possessours cannot be.
Alsoe it maketh none other thing
But Gold or Silver, for Mony, Cupp, or Ring.
Whiche of wise men is proved and well founde:
Least verteous thing that is upon the Ground.
Wherefore concluding all men of that sect,
Say, how this *Science* n'is holy in effect.
To this we say and wittnes as we cann
How that this *Science* was never tought to Man;

Chap. I.

But he were proved perfectly with space,
 Whether he were able to receyve this Grace :
 For his Trewth, Vertue, and for his stable Witt,
 Which if he faulte he shall never have it ;
 Also no man could yet this *Science* reach,
 But if *God* send a *Master* him to teach :
 For it is soe *wonderfull* and soe selcouth,
 That it must needes be taught from mouth to mouth :
 Also he must (be he never soe loath)
 Receive it with a most sacred dreadfull Oath,
 That as we refuse greate dignitie and fame,
 Soe he must needly refuse the same.
 And also that he shall not be so wilde
 To teach this secret to his owne childe ;
 For nighnes of Blood ne Consanguinity
 May not accepted be to this dignitie :
 Soe blood as blood, may have hereof noe part,
 But only vertue winneth this holy *Arte* :
 Therefore straightly you shall search and see,
 All manners and vertues with th'abilitie
 Of the person which shall this *Scyence* leere,
 And in likewise make him straightlie swere :
 Soe that noe man shall leave this *Arte* behinde,
 But he an able and approved Man can finde ;
 When Age shall greave him to ride or goe,
 One he may teach, but then never no moe :
 For this *Science* must ever secret be,
 The Cause whereof is this as ye may see ;
 If one evill man had hereof all his will
 All Christian Pease he might hastilie spill,
 And with his Pride he might pull downe
 Rightfull *Kings* and *Princes* of renowne :
 Wherefore the sentence of perill and jeopardy,
 Upon the *Teacher* resteth dreadfully.

Soe

So than for doubt of such pride and wreach,
 He must be ware that will this *Science* teach :
 No Man therefore maie reach this greate present,
 But he that hath vertues excellent.
 Soe though Men weene Possessours not to aide,
 To hallow this *Science* as before is said ;
 Neither seeme not blessed effectually ,
 Yet in her Order this *Science* is *holy*.
 And forasmuch as noe Man maie her finde
 But only by grace, she is holy of her kinde.
 Also it is a worke and Cure divine,
 Foule Copper to make Gold or Silver fine :
 No man maie finde such chaunge by his thought,
 Of diuers kinds which *Gods* hands have wrought.
 For *Gods* Conjunctions Man maie not undoe,
 But if his Grace fully consent thereto,
 By helpe of this *Science*, which our *Lord* above
 Hath given to such Men as he doth love ;
 Wherefore old *Fathers* conveniently
 Called this *Science* *Holy Alkimy*.

Therefore noe Man shulde be too swifte,
 To cast away our *Lords* blessed giust :
 Consideringe how that Almighty *God*
 From great Doctours hath this *Science* forbod,
 And graunted it to few Men of his mercy,
 Such as be faithfull trew and lowly.
 And as there be but *Planets* seaven
 Amonge the multitude of starrs in Heaven :
 Soe among millions of millions of Mankinde,
 Scarllie seaven men maie this *Science* finde.
 Wherefore *Lay-men* ye may lere and see
 How many *Doctours* of great authoritie,
 With many searchers hath this *Science* sought,
 Yet all their labours have turned into nought;

Chap. 1.

If thei did cost, yet found thei none availe,
 For of their purpose every tyme thei faile;
 And in despaire thei reason and departe,
 And then thei said how there is noe such arte;
 But fained Fables thei name it where thei goe,
 A fals fond thing thei say it is alsoe:
 Such Men presume too much upon their minde,
 They weene their witts sufficient this *Arte* to finde.
 But of their flaunder and words of outrage,
 We take thereof trewlie little Charge:
 For such be not invited to our feast,
 Which weeneth themselves wise and can doe leaste.
 Albeit such Men list not lenger to persue,
 Yet is this *Science* of *Alkimy* full trew;
 And albeit some proude *Clerks* say nay
 Yet every wise *Clarke* well consider may,
 How he whiche hereof might no trewth see
 Maie not hereof lawfull wittnes be,
 For it were a wonderous thing and queinte,
 A man that never had sight to peinte.
 How shoulde a borne blinde Man be sure
 To write or make good Portrature.
 To build Poules steeple might be greate doubt,
 For such proude *Clerks* to bring about;
 Such might well happ to breake their crowne,
 Ere they coude wisely take it downe.
 Wherefore all such are full farr behinde,
 To fetch out the secreatest pointe of kinde,
 Therefore all Men take their fortune and chaunce,
 Remit such *Clerks* to their Ignorance.

NOW ye that will this *Science* pursue,
 Learne ye to know fals Men from trew.
 All trew searchers of this *Science* of *Alkimy*,
 Must be full learned in their first Philosophie:

Else all their laboure shall them let and greive,
 As he that fetcheth Water in a Sive;
 The trew men search and seeke all alone
 In hope to finde our delectable stone,
 And for that thei would that no Man shulde have losse,
 They prove and seeke all at their owne Coste;
 Soe their owne Purfes they will not spare,
 They make their Coffers thereby full bare,
 With greate Patience thei doe proceede,
 Trusting only in *God* to be their speede.

THe fals man walketh from Towne to Towne,
 For the most parte in a threed-bare Gowne;
 Ever searching with diligent awaite
 To winn his praye with some fals deceit
 Of swearing and leasing; such will not cease,
 To say how they can Silver plate increase.
 And ever they rayle with perjury;
 Saying how they can Multiplie
 Gold and Silver, and in such wise
 With promise thei please the Covetise,
 And Causeth his minde to be on him sett,
 Then Falsehood and Covetise be well mett.
 But afterwards within a little while
 The Multiplier doth him beguile
 With his faire promise, and with his fals othes,
 The Covetise is brought to threed-bare clothes:
 But if he can hastily be well aware,
 Of the Multiplier and of his Chaffare,
 Of whose deceits much I can reporte,
 But I dare not least I give comforte
 To such as be disposed to Treachery;
 For so much hurte mought come thereby;
 Wherefore advise you and be wise,
 Of them which proffer such servise.

Chap. 1.

If they had Cunning have ye no doubt,
 They will be loath to shew it out:
 When such men promise to Multiplie,
 They compasse to doe some Villony,
 Some trew mans goods to beare awaye;
 Of such fellowes what shulde I saye?
 All such false men where ever thei goe,
 They shulde be punished, thei be not so.
 Upon *Nature* thei falsely lye
 For Mettalls doe not Multiplie;
 Of this Sentence all men be sure,
 Evermore Arte must serve *Nature*.
 Nothing multiplieth as Auctors sayes,
 But by one of theis two wayes,
 One by rotting, called Putrefaction,
 That other as Beasts, by Propagation;
 Propagation in Mettalls maie not be,
 But in our Stone much like thing ye may see.
 Putrefaction must destroy and deface,
 But it be don in its proper place.

Mettalls of kinde grow lowe under ground,
 For above erth rust in them is found;
 Soe above erth appeareth corruption,
 Of mettalls, and in long tyme destruction,
 Whereof noe Cause is found in this Case,
 But that above Erth thei be not in their place.
 Contrarie places to nature causeth strife,
 As Fishes out of water losen their Lyfe:
 And Man, with Beasts, and Birds live in ayer,
 But Stone and Mineralls under Erth repaier.
 Physicians and Appoticaries faut appetite and will,
 To seech water flowers on a dry hill:
 For *God* hath ordeyned of his wisdome and grace,
 All things to grow in their naturall place.

Against

Against this doctrine some Men replie,
 And say that Mettalls doe Multiplie :
 For of Silver, Lead, Tinn, and also Brasse,
 Some veyne is more, and some is lasse,
 Or which diversitie Nature shulde cease,
 If Mettalls did not multiplie and increase ;
 Wherefore they say that reason sheweth nowe,
 How that under Erth they multiplie and growe ;
 Why not then above Erth in vessells close and faire,
 Such as shulde preserve them from Fire Water and Aier:
 Hereto we say this reason is but rude,
 For this is noe perfect similitude ;
 For cause efficient of Mettalls finde ye shall
 Only to be the vertue Minerall,
 Which in everie Erth is not found,
 But in certaine places of eligible ground ;
 Into which places the Heavenly Spheare,
 Sendeth his beames directly everie yeare.
 And as the matters there disposed be
 Such Mettalls thereof formed shall you see.
 Few grownds be apt to such generation :
 How shoulde then above ground be Multiplication?
 Also all men perceyven that be wise,
 How Water conjealed with Cold is yse ;
 And before tyme it harded was
 Some lay in more places and some in lasse,
 As water in fosses of the Carte-wheele,
 Were veynes smale whan they began to keele,
 But water in ditches made veynes more,
 For plenty of water that was therein froare.
 Hereupon to say it were noe good advice,
 That therefore of yse should multiply more yse.
 Soe though there be of Mettalls veynes more and lasse,
 It proveth not that they increase more then it was ,

Chap. I.

Alsoe ye may trust without any doubt,
 If Multipling should be brought about :
 All th'engredience must draw to simplicitie,
 And breake Composition as yearly ye may see:
 For Multipling of Hearbes how *Nature* hath provided,
 That all things joyned in the seede be divided :
 Else stalke and leaves which virtually therein be,
 May not come forth actually that eye mought them see.
 But Mettall holdeth his holle Composition,
 When corrasive waters have made dissolucion :
 Therefore syth yse is nerrer to simplicity,
 Then is Mettall, and maie not increased be,
 Trewly ye maie trust as I said before,
 How of one ounce of Silver, maie Silver be noe more.
 Also nothing multiplied shall ye finde,
 But it be of Vegetative or of Sensitive kinde:
 Where Mettalls be only Elementative,
 Having noe seede, nether feeling of life ;
 Wherefore concluding all Multipliers must cease,
 For Mettalls once Mettalls shall noe more increase ;
 Nathlesse one Mettall transmuted we finde,
 Unto a Mettall of another kinde;
 For propinquity of matter that in them was,
 As it is knowne betwixt *Iron* and *Brasse*.
 But to make trew *Silver* or *Gold* is noeingin,
 Except only the Philosophers medicine.
 Wherefore such leasings as Multipliers use,
Clerks reprove and utterly refuse;
 Such art of Multipling is to be reprov'd,
 But holy *Alkimy* of right is to be loved,
 Which treateth of a precious Medicine,
 Such as trewly maketh *Gold* and *Silver* fine :
 Whereof example for Testimonie,
 Is in a Citty of *Catilony*.

Which

Which *Raymond Lully*, Knight, men suppose,
 Made in seaven Images the trewth to disclose;
 Three were good *Silver*, in shape like Ladies bright,
 Everie each of Foure were *Gold* and did a Knight:
 In borders of their Clothing Letters like appeare,
 Signifying in Sentence as it sheweth here.

1. Of old Horschoes (said one) I was yre,
 Now I am good *Silver* as good as ye desire.
2. I was (said another) *Iron* fet from the Mine,
 But now I am *Gould* pure perfect and fine.
3. Whilome was I *Copper* of an old red pann,
 Now am I good *Silver*, said the third woman.
4. The fourth saide, I was *Copper* growne in the filthy
 Now am I perfect *Gould* made by Gods grace. (place,
5. The fift said, I was *Silver* perfect through fine,
 Now am I perfect *Gould*, excellent, better then the prime.
6. I was a Pipe of *Leade* well nigh two hundred yeare,
 And now to all men good *Silver* I appeare.
7. The seventh said, I *Leade* am *Gould* made for a Maistrie,
 But trewlie my fellowes are nerer thereto then I.

This *Science* beareth her name of a King,
 Called *Alchimus*, without leasing:
 A glorious Prince of most noble minde;
 His noble vertues holpe him this arte to finde;
 He searched *Nature*, he was nobil *Clerke*,
 He left Extorcion, than sought and found this werke.
 King *Hermes* alsoe he did the same,
 Being a *Clerke* of Excellēt fame;
 In his *Quadripartite* made of *Astrologie*,
 Of *Physique* and of this *Arte* of *Alkimy*,
 And also of *Magique naturall*,
 As of four *Sciences* in nature passing all.
 And there he said that blessed is hee
 That knoweth things truly as thei bee.

Chap. I.

And blessed is he that maketh due prooffe,
 For that is roote of cunning and rooffe;
 For by opinion is many a Man
 Deceived, which hereof litle cann.
 An old Proverbe, *In a Busshell of weeninge,*
Is not found one handfull of Cunninge :
 With due prooffe and with discret assaye,
 Wise men may leare new things every day.
 By Cunninge, Men know themselves and every thinge;
 Man is but a Beast and worse without Cunninge :
 But litle favour hath every Man
 To Science whereof he litle can;
 And litle Cunning maketh men proud and wilde,
 Sufficient Cunning maketh men full milde.
 Nobil men now in manner have despighte
 Of them that have to Cunning appetite :
 But noble Kings in auncient dayes,
 Ordained (as olde Auctors saies,)
 That the seven *Sciences* to learne and can,
 Shulde none but only a *Noble man*;
 And at the least he shulde be so free,
 That he mought Studie with libertie;
 Wherefore old Sages did them call
The seaven Sciences liberall :
 For he that would leare them perfectly and well,
 In cleere liberty he must dwell.
 From worldly warkes he must withdrawe,
 That would lerne but Mans Lawe :
 Much more the Worlde he must forsake,
 Which many Sciences woulde overtake.
 And for that cause Men may well see,
 Why Cunninge men dispised be.
 Yet nobil Memory shall never cease,
 Of him which Cunninge doth increase.

Hee

Hee which loveth Cunning, Justice, and Grace
 Is set aside in many a place;
 But whoe to Courte bringeth in with guile,
 Profit, or present, he is the Man that while.
 Wherefore this *Science* and many Graces moe,
 Be lost and be departed all ye fro.
 And furthermore remember what I say,
 Sinn caletth fast for his ending day:
 Covetise and Cunnings have discorde by kinde;
 Who lucre coveteth this *Science* shall not finde;
 But he that loveth Science for her owne kinde,
 He may purchase both for his blessed minde.

Of this *Chapter* more I need not teach,
 For here appeareth what men may it reach:
 That is to remember only the trewe,
 And he that is constant in minde to pursue,
 And is not Ambitious, to borrow hath no neede,
 And can be Patient, not hasty for to speede;
 And that in *God* he set fully his trust,
 And that in Cunning be fixed all his lust;
 And with all this he leade a rightfull lyfe,
 Falshoode subduinge, support no sinfull strife;
 Such Men be apt this *Science* to attaine.
 The Chapter following, is of Joy and paine.

C H A P. II.

*N*Ormandy nurished a *Monke* of late,
 Which deceived Men of every state.
 But before that done he in his fantazie,
 Weened he had caught this *Art* fully.
 Such rejoycing thereof he had,
 That he began to dote and to be madde.

Chap. 2.

Of whose *Foyes* (albeit they were smalle)
 For an ensample I write this Tale.
 This *Monke* had walked about in *Fraunce*,
 Raunging Apostata in his plosaunce.
 And after he came into this lond,
 Willing Men should understonde;
 How that of *Alkimy* he had the grounde,
 By a Boke of *Receipts* which he had founde.
 In surety thereof he set all his minde,
 Some nobil Acte to leave behinde,
 Whereby his name should be immortall,
 And his greate Fame in laude perpetuall.
 And ofte he mused where to beginne,
 To spend the riches that he shulde winn.
 And ever he thought loe this I cann,
 Where mought I finde some trusty Man,
 Which would accorde now with my will,
 And help my purpose to fulfill.
 Then would I make upon the plaine
 Of *Salisbury* glorious to be saine,
 Fifteen *Abbies* in a little while,
 One *Abbie* in the end of every mile.
 Hereupon this *Monke* to me resorted,
 Of trust (he said) which men of me reported,
 His foresaid mind he did to me tell,
 And prayd me to keep his great Councell.
 I said before an Image of Saint *Fame*,
 That I would never disclose his name;
 Yet I may write without all vice,
 Of his desires that were so nice.
 When he had discovered his great Cunning,
 He said that he faughted nothing,
 But a good meane for his solace,
 To labour to the *Kings* good grace,

To get lycence of his estate,
 And of his *Lords* mediate,
 To purchase lond for the *Abbies* aforesaid,
 For which all coste should be well paid;
 But yet he had great doubt and feare,
 How to purchase, of whom, and where.
 When I had heard of this greate werke,
 I searched (to wit) what manner of *Clerke*
 He was, and what he knew of Schoole,
 And therein he was but a Foole.
 Yet I suffered, and held me still,
 More to lerne of his lewd Will.
 Then said I, it were a lewd thinge,
 Such matter to shew unto the *Kinge*;
 But if the prooffe were reasonable,
 He would thinke it a foolish Fable.
 The *Monke* saide how that he had in fire,
 A thing which shulde fulfill his desire,
 Whereof the trewth within forty dayes,
 I shulde well know by trew assaies.
 Then I said, I would no more that tyde,
 But forty dayes I said I would abide.
 When forty dayes were gone and past,
 The *Monkes* Crafte was cleane overcast.
 Then all his *Abbies* and all his thought,
 Was turned to a thing of nought;
 And as he came, he went full lewde,
 Departing in a minde full shrewd:
 For soone after within a little while,
 Many trewe men he did beguile;
 And afterwards went into *Fraunce*.
 Loc ! this was a pittifull chance,
 That fiftene *Abbies* of Religion,
 Shulde in this wise fall to confusion.

Chap. 2. Great wonder was what thing he meant,
 And why he set all his intent
Abbies to build; then was it wonder,
 Why nould he live Obedient under,
 But be Apostata, and range about,
 This blessed *Science* to finde out:
 But as I wrote above in this Boke,
 Let no Deceiver after this *Science* looke.

AN other Ensamble is good to tell,
 Of one that trusted to doe as well
 As *Raymond Lully*, or *Bacon* the Frier,
 Wherefore he named himselfe *saunce peere*;
 He was *Parson* of a little Town,
 Not farr from the Citty of *London*,
 Which was taken for halfe a Leach,
 But little cunning had he to Preach;
 He weened him sure this *Arte* to finde;
 His Name he would have ever in minde
 By meanes of a *Bridge*, imagined in dotage,
 To be made over *Thames* for light passage:
 Whereof shulde grow a Common ease,
 All the Countrey thereabout to please.
 Yet though he might that warke fulfill,
 It might in no wise suffice his will;
 Wherefore he would set up in hight,
 That *Bridge* for a wonderfull sight,
 With Pinacles guilt shining as goulde,
 A glorious thing for men to beholde.
 Then he remembered of the newe,
 How greater fame shulde him pursue,
 If he mought make that *Bridge* so bright,
 That it mought shine also by Nighte.
 And so continue and not breake,
 Than all the Londe of him would speake.

But in his minde ran many a doubt,
 How he might bring that warke about;
 He trowed that Lampes with lights of fire,
 Shulde well performe his nice desire;
 Wherefore Lampes for that intent,
 He would ordaine sufficient:
 But then he fell in full great dreade,
 How after the time that he were deade;
 That light to find Men would refuse,
 And chaunge the Rent to some other use.
 Then thoughte he well is him that wiste,
 In whom he mought set all his trust;
 At the laste he thought to make the light,
 For that Bridge to shine by nighte,
 With *Carbuncle Stones*, to Make men wonder,
 With duple reflexion above and under:
 Then new thoughts troubled his Minde,
Carbuncle Stones how he mought find;
 And where to find wise men and trewe,
 Which would for his intent pursue,
 In seeking all the Worlde about,
 Plenty of *Carbuncles* to find out;
 For this he tooke soe micle thought,
 That his fatt flesh wasted nigh to nought:
 And where he trusted without despaire,
 Of this *Science* to have been heire,
 When the yeare was fully come and goe,
 His *Crafte* was lost, and thrift also;
 For when that he tooke up his Glasse,
 There was no matter for *Gold* ne *Brasse*:
 Then he was angry and well neere wood,
 For he had wasted away his good:
 In this wise ended all his disporte,
 What should I more of him report.

Chap. 2.

But that *Lay-men* and *Clerks* in Schooles,
 Maie know the dotage of theis two fooles,
 Remember this example where ye goe,
 For in such Mindes be trewly many moe:
 Theie lewdly beleeeve every Conclusion,
 Be it never so false an elusion:
 If it in boke written they may finde,
 Thei weene it trewe, thei be so lewde of minde.
 Such lewde and hasty confidence,
 Causeth poverty and lewde expence.
 Of trust of this *Arte* riseth Joyes nice,
 For *lewde hope is fooles Paradise*.
 The trewe tought Children made this confession,
Lord without thee all is digression;
 For as thou arte of our *Science* begininge,
 Soe without thee may be noe good endinge.

AS of the *Foyes* of this *Arte* ye have seene,
 Soe shall ye now heare some deale of the *Paine*:
 Albeit contrary to the appetite
 Of them that hath to this *Science* delight.

The

The first *Paine* is to remember in minde,
 How many seeken, and how few doe finde,
 And yet noe Man may this *Science* wynn,
 But it be taught him before that he beginn;
 He is well lerned, and of full cleere witt,
 Which by teaching can surely learne it:
 Of many diversities he must be sure,
 Which secreats woulde know of working Nature:
 Yet teaching maie not surely availe,
 But that sometime shall happ a man to faile;
 As all that be now dead and gone
 Failed before theie found our *Stone*:
 One tyme or other, first tyme or laste,
 All Men failed till trew *Practise* were paste;
 No Man sooner faileth in heate and colde,
 Then doth the *Master* which hasty is and boulder:
 For noe Man sooner maie our Worke spill,
 Then he that is presuminge his purpose to fulfill:
 But he that shall trewlie doe the deede
 He must use providence and ever worke with dreade;
 For of all paines the most greivous paine,
 Is for one faile to beginn all againe.

Every man shall greate *Paine* have
 When he shall first this *Arte* covet and crave,
 He shall oft tymes Chaunge his desire,
 With new tydings which he shall heare;
 His Councell shall oftentimes him beguile,
 For that season he dreadeth noe subtil wile:
 And oftentimes his minde to and fro,
 With new Oppinions he shall chaunge in woe:
 And soe long tyme continue in Phantasie,
 A greate adventure for him to come thereby:
 Soe of this *Arte* be ye never so faine,
 Yet he must taste of manie a bitter paine.

OF Paines yet I must shewe more,
 Against your appetite though it be full fore:
 It is greate Paine, as all wise-men gesse,
 To witt where a trewe Master is;
 And if ye finde him, it will be Paine,
 Of his trewe love to be certeyne.
 Forasmuch as noe Man maie teach but one,
 Of the making of our delicious stone;
 And albeit yee finde him that will ye teach,
 Yet much trouble and paines may ye reach;
 For if your minde be verteously set,
 Then the Devil will labour you to lett;
 In three wises to let he woll awaite,
 With Haste, with Despaire, and with Deceipte:
 For dreade of Vertue which ye maie doe,
 When ye shulde attaine this grace unto.
 The first perill aforesaide is of Haste,
 Which causeth most destruction and waste;
 All Auctors writing of this Arte,
 Saye haste is of the Devils parte:
 The little Boke writ of the Philosophers feast,
 Saith, *omnis festinatio ex parte diaboli est*:
 Wherefore that Man shall soonest speede,
 Which with greate Leasure wisely woll proceede;
 Upon assay ye shall trewly knowe
 That who most hasteth he trewly shalbe slowe;
 For he with haste shall bringe his warke arreare,
 Sometymes a Moneth, and sometymes a whole Yeare
 And in this Arte it shall ever be soe,
 That a hasty Man shall never faile of woe:
 Alsoe of haste ye may trewly be sure
 That she leaveth nothing cleane and pure;
 The Devil hath none so subtrill wile
 As with hastinesse you to beguile;

Therefore

Therefore oft tymes he will assault,
 Your minde with haste to make default;
 He shall finde grace in Towne and Land,
 Which can hastines all tymes withstand:
 I say all tymes, for in one point of tyme,
 Haste may destroy all your engine;
 Therefore all haste eschewe and feare,
 As if that she a *Devil* were.
 My witt trewly cannot suffice,
 Haste sufficiently for to despise;
 Many Men have byne cast in greate care,
 Because thei would not of haste beware:
 But ever call upon to see an end,
 Which is temptation of the Fende:
 Noe more of haste at this present,
 But blessed be ever the Patient.

WHen with *Haste* the Feind hath noe availe,
 Then with *Despaire* your mind he will assaile;
 And oft present this Sentence to your minde,
 How many seeken, and how few maie finde,
 Of wiser Men then ever were yee:
 What suretie than to you maie be?
 He woll move ye to doubt also
 Whether your Teacher had it or noe;
 And also how it mought so fall,
 That part he taught you but not all;
 Such uncertaintie he woll cast out,
 To set your minde with greevous doubt;
 And soe your *Paines* he woll repaire
 With wann hope and with much *Despaire*;
 Against this assault is no defence,
 But only the vertue of Confidence:
 To whome reason shulde you leade,
 That you shall have noe cause to dreade;

Chap. 2.

If you wisely call to your minde
 The vertuous manners, such as you finde
 In your *Master* and your *Teacher*,
 Soe shall you have noe neede to feare;
 If you consider all Circumstances about,
 Whether he taught you for Love or for Doubt;
 Or whether Motion of him began,
 For it is hard to trust such a Man:
 For he that prosereth hath more neede
 Of you, then you of him to speede.
 This wise certainly ye maie well win,
 Before that you your warkes do begin;
 When such certainty ye truly have,
 Fro Dispaire ye maie be sure and save.

But who can finde such a *Master* out,
 As was my *Master*, him needeth not to doubt:
 Which right nobil was and fully worthy laude,
 He loved Justice, and he abhorred fraude;
 He was full secrete when other men were lowde,
 Loath to be knowne that hereof ought he Could;
 When men disputed of Colours of the Rose,
 He would not speake but keepe himselfe full close;
 To whome I laboured long and many a day,
 But he was solleyn to prove with straight assaye,
 To search and know of my Disposition,
 With manifold proofes to know my Condition:
 And when he found unfeigned fidelity,
 In my greate hope which yet nothing did see,
 At last I conquered by grace divine
 His love, which did to me incline.
 Wherefore he thought soone after on a tyde,
 That longer delays I ne shulde abide;
 My manifold letters, my heavie heart and cheere,
 Moved his Compassion, thei perced him full neere;
 Wherefore

Wherefore his Penn he would noe more refraine,
But as heere followeth soe wrote he againe.

MY very trusty, my deere beloved *Brother*,
I must you answer, it may be none other;
The tyme is come you shall receive this Grace,
To your greate comfort and to your solace:
Your honest desire with your greate Confidence,
Your Vertue proved with your Sapience;
Your Love, your Trewth, your long Perseverance,
Your stedfast Minde shall your Desire advance:
Wherefore it is neede that within short space,
Wee speake together, and see face to face:
If I shulde write, I shulde my fealty breake,
Therefore Mouth to Mouth I must needes speake;
And when you come, mine *Heier* unto this *Arte*
I will you make, and fro this londe departe.
Ye shall be both my *Brother* and myne *Heier*,
Of this greate secrete whereof *Clerkes* despaire:
Therefore thanke *God* which giveth this renowne,
For it is better then to were a Crowne:
Next after his Saints, our *Lord* doth him call
Which hath this *Arte* to honour him withall:
Noe more to you at this present tyde,
But hastily to see me, dispose you to ride.

THis *Letter* receiving, I hasted full sore,
To ride to my *Master* an hundred miles and more;
And there Forty dayes continually,
I learned all the secreats of *Alkimy*:
Albeit *Philosophy* by me was understonde,
As much as of many other in this Londe;
Nethles fooles which for their *Science* sought,
Ween that in forty dayes it wilbe wrought.
Betweene Forty dayes warke now ye may see,
And Forty dayes lerninge is greate diversitie.

Chap. 2.

Then darke doubts to me appeared pure,
 There fownd I disclosed the *Bonds of Nature*:
 The cause of Wonders were to me soe faire,
 And so reasonable, that I could not dispaier.
 If your *Master* and ye resemble all aboute
 My good *Master* and me, than have ye no doubt.

THe third impediment deceipt we call,
 Amongst other to me the worst all;
 And that is of *Servants* that should awaite
 Upon your warke, for some can much deceipte;
 Some be negligent, some sleeping by the fire,
 Some be ill-willd, such shall let your desire;
 Some be foolish, and some be over bold,
 Some keepe no Counsell of Doctrine to them tould;
 Some be filthie of hands and of sleeves,
 Some meddle straunge Matter, that greatly greeves;
 Some be drunken, and some use much to jape,
 Beware of thes if you will hurt escape,
 The Trew be foolish, the Witty be false,
 That one hurts me Sore, that other als:
 For when I had my warke well wrought,
 Such stole it away and left me nought.
 Then I remembring the cost, the tyme, and the paine,
 Which I shulde have to begin againe,
 With heauey hearte farewell adieu said I,
 I will noe more of *Alkimy*.
 But howe that chaunce befell that Season,
 Few men would it beleewe by reason:
 Yet Tenn persons be witnes trew all
 How that mishapp did me befall;
 Which might not be only by Man,
 Without the Devil as they tell can.
 I made also the *Elixer* of life,
 Which me bereft a Merchaunt's wife.

The *Quintessens* I made also,
 With other secrets manie moe,
 Which sinfull people tooke me fro,
 To my greate paine and much more woe:
 Soe in this worke there is no more to saine,
 But that every *Ioy* is medled with his *paine*.

O F *Paine* there is a litle yet behinde,
 Which is convenient to be had in minde;
 That fell upon a blessed Man;
 Whereof the trewth report I cann.
Thomas Daulton this good man height,
 He served *God* both day and night,
 Of the Red Medicine he had greate Store,
 I trowe never English man had more.
 A *Squier* for the body of *King Edward*,
 Whose name was *Thomas Harbert*,
 Tooke this *Daulton* against his desier,
 Out of an *Abbie* in *Gloucester-shier*,
 And brought him in presence of the *King*,
 Whereof *Deluis* had some tiding,
 For *Daulton* was whilome *Deluis's* Clerke;
Deluis disclosed of *Daultons* werke.
Deluis was *Squier* in confidence
 With *King Edward* oft in his presence.
Deluis reported that in a little stounde,
 How *Daulton* had made to him a thousand pound
 Of as good *Goulde* as the Royall was,
 Within halfe a daye and some dele lasse;
 For which *Deluis* sware on a Booke.
 Then *Daulton* on *Deluis* cast his looke,
 And said to *Deluis*, Sir you be forswore,
 Wherefore your hert hath cause to be sore.
 Of nothing said he, that I now have told,
 Witnes our *Lord* whom *Judas*ould.

Chap. 2.

But once said *Deluis* I sware to thee,
 That thou shouldst not be uttered by me;
 Which I may breake well I understand,
 For the *Kings* weale and for a'l his Lande.
 Then said *Daulton* full soberlie,
 This answer voydeth no perjury.
 How should the *King* in you have Confidence,
 Your untrewth confessed in his presence.
 But Sir said *Daulton* to the *Kings* Grace,
 I have bin troubled oft in many a place
 For this Medicine greivously and sore,
 And now I thought it should hurt me no more:
 Wherefore in the *Abbie* where I was take,
 I cast it in a foule and Common lake
 Going to the River which doth ebb and flowe,
 There is destroyed as much riches nowe,
 As would have served to the Holy land,
 For twenty thousand men upon a band.
 I kept it longe for our *Lords* blessed sake,
 To helpe a *Kinge* which that journey would make.
 Alas *Daulton* then saide the *Kinge*,
 It was fowly don to spill such a thinge.
 He would have *Daulton* to make it againe,
Daulton said it might not be certeine:
 Why (said the *Kinge*) how came ye thereby?
 He laide by a *Channon* of *Lichfelde* trewly,
 Whose workes *Daulton* kept dilligently,
 Many yeares till that *Channon* must dye.
 And for his service he said in that space,
 The Cannon gave him all that thereof was;
 The *Kinge* gave to *Daulton* Marks foure,
 With liberty to goe where he would that houre.
 Then was the *Kinge* in his herte sore,
 That he had not knowne *Daulton* before.

And

And ever it happneth without leasinge,
 That Tyrants be full nigh to a Kinge.
 For *Herberte* lay for *Daulton* in waight,
 And brought him to *Stepsey* with deceipte.
 The servaunts of *Herbert* the mony tooke away
 Which the King gave to *Daulton* that day.
 And after *Herbert* carried *Daulton* farr,
 From thence to the Castle of *Gloucester*;
 There was *Daulton* prisner full longe,
Herbert to *Daulton* did mickle wronge :
 Fro thence he had him to prison fast
 To *Troy*, till foure yeares were nigh past,
 And after he brought him out to dye;
Daulton to death obeyed lowly,
 And said *Lord Jesue* blessed thou be,
 Me thinks I have byne too longe from thee.
 A Science thou gavest me with full greate charge;
 Which I have kept without outrage.
 I founde noe man yet apt thereto,
 To be myne Heyer when I am goe :
 Wherefore (sweete *Lord*) now I am faine
 To resigne this thy guift to thee againe.
 Then *Daulton* made devout prayers, and still
 Withsmiling cheere he said now doe your wil.
 When *Herbert* sawe him so glad to dye,
 Then ran water from *Herberts* Eye:
 For Prison ne Death could him not availe
 To winn this *Arte*, his Crafte did him faile.
 Now let him goe said *Herbert* than,
 For he shall never hurt ne profett man.
 But when *Daulton* from the block should rise,
 He looked forth in full heavie wise,
 And so departed with full heavie cheere,
 It was not his will to live one yeare.

Chap. 2.

This was his *Paine* as I you tell,
 By men that had no dread of Hell.
Herbert dyed soone after in his bed,
 And *Deluis* at *Teuxbury* lost his head ;
 This wise greate *Paine*, as you may see,
 Followeth this *Arte* in every degree.
Heere lost the *King* all his intent,
 For *Herbert* was proude and violent ,
 Soe nobil a man to oppresse with pride,
 And like a *Fellone* him leade and guide;
 Where that by goodnesse patience and grace,
 There might have growen full great solace ,
 As well to the *King*, ye may understonde,
 As for th'ease of Commons of this londe ;
 But wonder not that grace doe not fall,
 For sinn reygneeth in this londe over all.
 Loe here was grace full ready at honde,
 To have ceased Taxes and Tallages of this londe ;
 Whereby much Love and Grace would have be,
 Betweene Knight-hood Priest-hood and Comminaltie.
 Here ye maie see how vicious violence
 Maie not purchase the vertue of sapience :
 For vice and vertue be things contrary,
 Therefore the vicious maie not come thereby ;
 If Vicious men mought lerne this *Science*,
 They would therewith doe wondrous violence :
 And with Ambitioufnesse grow evermore
 Worse of Conditions then they were before.
 Now is this *Chapter* of *Foy* and *Paine* gone,
 The *Chapter* following sheweth *Matters of our Stone*.

C H A P. I I I.

TONfile was a labourer in the fire
 Threescore years and more to win his desire:
Brian was another, with *Holton* in the Weste,
 Thes were ever busie, & could practice with
 But yet this *Science* thei never founde, (the best :
 For thei knew not the Matters, ne the Grounde,
 But rumbled foorth, and evermore they sought,
 They spent their lyfe and their goods to nought ;
 Much losse, much cost, much anguish they bought,
 Amonge their Receipts which they had wrought :
 Then made *Tonfile* to me his greate complainte;
 With weeping Teares he said his heart was fainte;
 For he had spende all his lusty dayes
 In fals Receipts, and in such lewde assayes ;
 Of Herbes, Gommes, of Rootes and of Grasse,
 Many kindes by him assayed was,
 As Crowefoote, Celondine and Mizerion,
 Vervaine, Lunara, and Martagon :
 In Antimony, Arsenick, Honey, Wax and Wine,
 In Haire, in Eggs, in Merds, and Urine,
 In Calx vive, Sandifer, and Vitriall,
 In Markasits, Tutits, and every Minerall,
 In Malgams, in Blanchers, and Citrinacions,
 All fell to nought in his opperacions :
 For he considered not how he did rage,
 When to *Gods* proportions he layde surcharge :
 After all this, he thought nothing so good,
 To worke upon as shulde be mans Blode ;
 Till that I said how blode would waste and fume
 In mighty fire, and utterly consume.

For

For *Christ* his love then saide he teach me,
 Whereof the substance of our *Stone* should be :
Tonsile (said I) what shulde it you avayle
 Such thing to know ? your lims doth you faile
 For very Age, therefore cease your lay,
 And love your Beades, it is high time to Praye;
 For if you knew the Materialls of our *Stone*,
 Ere you could make it your dayes would begone.
 Thereof no charge good *Master* said he,
 It were sufficient Comfort now to me
 To know the trewe Materialls without wronge
 Of that *Stone* which I have sought soe longe :
Tonsile (said I) It is noe litle thinge,
 Whereof you would have trewe tydinge;
 For many Auctors write of this doubtte,
 But none of them sheweth it Cleerly oute :
 For Auctors which of this *Arte* doe write,
 Besought *God* (as witnesseth *Democrite*,)
 That he unpained would fro this Worlde take
 Their Soules whom he tought Bokes thereof to make;
 For greatly doubted evermore all suche,
 That of this *Scyence* they may write too muche :
 Every each of them tought but one pointe or twayne,
 Whereby his fellowes were made certayne ;
 How that he was to them a *Brother*,
 For every of them understoode each other;
 Alsoe they wrote not every man to Teache,
 But to shew themselves by a secret Speache :
 Trust not therefore to reading of one Boke,
 But in many Auctors works ye may looke ;
Liber librum apperit saith *Arnold* the greate *Clerke*,
Anaxagoras said the same for his werke :
 Who that slothfull is in many bokes to see,
 Such one in Practice prompt shall never be ;

But *Tonfile* for almes I will make no store
 Plainly to disclose it that never was done before,
 By way of answer for your recreation,
 If ye cann wisely make *Interrogation*.
 Good *Master* (saide he) then teach me trewly,
 Whether the matters be *Sol* or *Mercury*?
 Or whether of *Sol* or *Lune* it maie be,
 Or whether I shall take them all three,
 Or *Sol* by it selfe, or *Mercury* alone,
 Or *Sulpher* with them, for matters of our Stone?
 Or whether I shall *sal Almoniack* take,
 Or *Minerall meanes*, our Stone thereof to make?

Here be many questions *Tonfile*, said I,
 Wisely remembred and full craftily;
 You name it not yet but onely in generall,
 For you must take some deale of theis things all;
 Of these and of other you must take a parte,
 One time or other to minister this *Arte*:
 Many things helpeth to apt our Stone,
 But *two be Materialls*, yet our Stone is one;
 Betweene which two is such diversity,
 As betweene the *Mother* and the *Childe* may be:
 An other diversity betweene them find ye shall,
 Such as is found betweene *Male* and *Female*:
 Theis two kindes shall doe all your service,
 As for the *White worke* (if you can be wise;)
 One of thes kindes a Stone ye shall finde,
 For it abiderth fire as stones doe by kinde:
 But it is no Stone in touching ne in sight,
 But a subtill Earth, browne, roddy, and not bright:
 And when it is separate and brought to his appearge,
 Then we name it our grounde *Litharge*.
 First it is browne, roddy, and after some deale white,
 And then it is called our chosen *Markasite*:

Chap. 3.

One ounce thereof is better then fifty pounce;
 It is not to be sould in all Christian groundes;
 But he that would have it he shalbe faine
 To doe it make, or take himselfe the paine:
 But one greate grace in that labour is faine,
 Make it once well and never more againe.
 Olde fathers called it thinge of vile price,
 For it is nought worth by way of Marchandise:
 Noe man that findeth it woll beare it awaie,
 Noe more then thei would an Ounce of Claye;
 Men will not beleeeve that it is ot high price,
 No man knoweth it therefore but he be wise:
 Here have I disclosed a greate secret wonder,
 Which never was writ by *them* which been-erth under.

A Nother *Stone Tensile* you must have withall,
 Or else you sawte your cheefe Materiall;
 Which is a Stone gloriouse faier and bright,
 In handling a Stone, and a Stone in sight;
 A Stone glittering with perspecuitie,
 Being of wonderfull Diaphanitie;
 The price of an Ounce Conveniently,
 Is twenty shillings or well neere thereby:
 Her name is *Magnetia*, few people her knowe,
 She is fownde in high places as well as in lowe;
Plato knew her property and called her by her name,
 And *Chaucer* reherseth how *Titanos* is the same,
 In the *Channons Yeomans Taile*, saying what is thus,
 But *quid ignotum per magis ignotius*:
 That is to say, what may this be,
 But unknowne by more unknowne named is she;
 Nethles *Tensile* now I will trewlie teach
 What is *Magnetia* to say in our speache:
Magos is Greeke, *Mirabile* in Latine it ys,
As is Money, *ycos Science*, *A* is God ywisse.

That is to say it is such a thinge,
 Wherein of Money is wonderous divine Cunninge;
 Now here you may know what is *Magnetia*,
Res aris in qua latet scientia diuinaque mira.
 Thes two *Stones* *Tonfile* ye must take
 For your materialls, *Elixir* if ye make.
 Albeit the first tyme materialls be no more,
 Yet many things helpeth as I saide before.
 This secrete was never before this daye
 So trewly discovered, take it for your praye;
 I pray *God* that this turne not me to Charge,
 For I dread fore my penn goeth too large:
 For though much people perceiue not this Sentence,
 Yet subtill *Clerks* have too much Evidence;
 For many *Clerks* be so cleere of witt,
 If thei had this ground, thei were sure of it;
 Wher our Lord hath ordained that no man it finde,
 But only he that is of verteous minde:
 Wherefore olde Fathers Covered for great reason,
 The Matters of our *Stone* disclosed at this season.
 Other Materials ye shall none take,
 But only theis two oure *white stone* to make;
 Except *Sal Armoniack* with *Sulphur* of kinde,
 Such as out of *Mettals* ye can finde;
 Theis two woll abide to fulfill your desire,
 The remnant will void when thei come to fire;
Sulpher woll brenn and chaunge Collours fast,
 But our *Litharge* abiderh first and last:
 Ye may not with mettals or Quicksilver beginn,
 To make *Elixir* if you intend to winn:
 Yet if you destroy the whole Composition,
 Some of their Compounds will help in Conclusion;
 And that is nothing Els of that one or that other,
 But only *Magnetia* and *Litharge* her Brother.

Ro: Vaughan. sculp:

C H A P. IV.

F the grosse Warke now I wil not spare,
Though it be secrete, largely to declare :
To teach you the trewth is myne intente,
As far forth as I dare for *Gods* Com-
(maundement.

I will informe and guide you in the way,

In such wise as you may finde your praye :

If you consider how the partes of Werkes,

Be out of Order set by the old *Clerks*.

As I saide before, the *Masters* of this *Arte*,

Every each of them disclosed but a parte :

Wherefore though ye perceived them as ye woulde,

Yet ye cannot order and joyne them as ye shulde.

Arnold sheweth in his writinge,

How our finall secret is to know the thinge :

Whereupon our worke shulde take her grounde,

And how pure Natures & simple may be found :

In this Boke begining *multipharie*,

He saith in our grounded Matter two kindes be ;

But how to find them he kept that in store,

Ye have their Names the last *Chapter* before.

Freer Bacon disclosed more of that pointe,

When he said, Depart ye every joynte

In Elementa propinqua : take good heede thereto ;

But unwise Doctours never worken soe,

But headly they proceed as men well nigh madd,

To the Matters divisible moe Matters they adde :

Soe when thei weene to bringe forth a Flower,

They doe nothinge but multiply Errour.

There cesed *Bacon*, and so doe other such,

For very dread least they shulde shew too much.

Chap. 4.

Avicen in Porta wrote, if ye remember,
 How ye shulde proceede perfection to ingender,
 Trewly teaching as the pure trewth was,
Comedas ut bibas, et bibas ut Comedas,
 Eate as it drinketh, and drinke as it doth eate,
 And in the meane season take it a perfect sweate.
Rasis set the Dietary and spake some deale farr,
Non tamen comedat res festinanter,
 Let not your Matters eate over hastilie,
 But wisely consume their foode leasurelic.
 Hereof the *Prophet* made wondrous mention,
 Yf ye applie it to this intention.

Visitasti terram, & inebriasti eam,
Multiplicasti locupletare eam
Terram fructiferam in salsuginem,
Et terram sine aqua in exitus aquarum.

If it I have plenty of Meate and of Drinke,
 Men must wake when they desier to winke:
 For it is laboure of watch and paines greate.
 Also the Foode is full costly meate;
 Therefore all Poore men beware said *Arnold*,
 For this *Arte* longeth to greate men of the worlde.
 Trust to his words ye Poore men all,
 For I am witnes that soe ye finde shall.

Esto longanimis & suavis said he,
 For hasty men th' end shall never see.
 The lengthe of clensing of Matters infected,
 Deceyveth much People, for that is unsuspected.
 Wherefore Poore men put ye not in prease,
 Such wonders to seech, but in season cease.
 Excesse for one halfe quarter of an howre,
 May destroy all: therefore cheefe succoure
 Is *Primum pro quo, & vltimum pro quo non*,
 To know of the simpering of our Stone.

Till

Till it may noe more *simper* doe not cease,
 And yet longe Continuance may not cause increase.
 Remember that Water will bubble and boyle,
 But Butter must *simper* and also Oyle.
 And soe with long leasure it will waste,
 And not with bubling made in haste:
 For doubt of perrills many moe then one,
 And for supergression of our stone.
 Amongst grosse Workes the fowleſt of all
 Is to clarifie our meanes Minerall.
 Extremities may not be well wrought,
 Without many Meanes wisely sought.
 And everie Meane must be made pure,
 If this worke shulde be made sure.
 For foule and cleane by naturall lawe
 Hath greate discord, and soe hath ripe and rawe.
 Stedfast to stedfast will it selfe combine,
 And fleeting to fleeting will drawe by kinde:
 And ever where as the Concordance is more,
 Natures will drawe that were elsewhere before;
 This grosse Worke is fowle in her kinde,
 And full of perrills as ye shall it finde.
 No mans witt can him soe much availe,
 But that sometyme he shall make a fayle.
 As well as the *Lay-man* soe shall the *Clerke*,
 And all that labour the grosse werke:
 Whereof *Anaxagoras* said trewlie thus,
Nemo primo fronte reperitur discretus.
 And once I heard a wise man say,
 How in *Catilonia* at this day,
Magnetia with Minerall meanes all,
 Be made to sale if ye for them call,
 Whereby the honds of a cleanly *Clerke*,
 Shall not be filed about so foule a werke.

Chap. 4.

And longe tyme sooner your Worke I understonde,
 Shulde be farr onward before honde.
 For if you shulde make all things as I cann,
 Ye might be weary before your worke begann.
 The Philosophers warke doe not begin,
 Till all things be pure without and within.
 We that must seeke Tincture most specious,
 Must needely avoyd all things vild and vicious.
 Of manifold meanes each hath his propertie,
 To doe his Office after his degree :
 With them hid things be out sett,
 Some that will helpe and some that would lett.
 Our *Appoticaries* to dresse them can no skill,
 And we to teach them have no manner of will :
 Whereof the cause trewly is none other,
 But that they will counterfaict to beguile their Brother,
 Rather then they will take the paine
 Thereto belonging, ere they should it attaine :
 It is there use whereof my hert is sore,
 Much to desire and litle to doe therefore.
 Who would have trewe warke he may no labour spare,
 Neither yet his Purse, though he make it bare :
 And in the Grosse Warke he is furthest behinde,
 That daily desireth the end thereof to finde.
 If the grosse warke with all his Circumstance,
 Were don in three yeares, it were a blessed chance :
 For he that shall end it once for certeyne,
 Shall never have neede to begin againe,
 If he his Medicine wisely can Augment ;
 For that is the Mastrie of all our intent.
 It needeth not to name the meanes Minerall,
 For *Albert* writeth openly of them all.
 Much I might write of nature of Mynes,
 Which in this Grosse Warke be but engines;

For

For in this Warke finde ye nothing shall,
 But handie-crafte called Arte Mechanicall :
 Wherein an hundreth wayes and moe,
 Ye maie committ a faulte as ye therein goe.
 Wherefore beleeeve what old Auctors tell,
 Without Experience ye maie not doe well.
 Consider all Circumstances, and set your delight
 To keepe Uniformity of all things requisite.
 Use one manner of Vessell in Matter and in Shape,
 Beware of Commixtion that nothing miscap.
 And hundreth faultes in speciall,
 Ye maie make under this warning generall.
 Nethles this Doctrine woll suffice,
 To him that can in Practise be wise.
 If your Ministers be witty and trew,
 Such shall not neede your warkes to renew.
 Therefore if ye woll avoyde all dreade,
 In the Grosse Warke doe by my read :
 Take never thereto no Household-man,
 Thei be soone weary as I tell cann ;
 Therefore take noe man thereto,
 But he be Waged, however you doe;
 Not by the Moneth, as nigh as ye maie,
 Ne by the Weeke, but by the Daye :
 And that your Wages be to their minde,
 Better then thei elsewhere can finde ;
 And that thei neede not for Wages sue,
 But that their Payment be quick and trewe ;
 For that shall cause them to love and dreade,
 And to their Warks to take good heede,
 For doubt least thei be put awaye,
 For Negligence of them in one daye :
 Household-men woll not doe soe,
 From this Warke therefore let them goe.

Chap. 4.

If I had knowne this, and had done soe,
I had avoyded mickle woe.

Alsoe in this Warke must be Liberty,
Without impediment, in eyerie degree,
With divers Comforts peynes to release
Of labours continuall which maie not Cease;
Els anguish of Labour and Melancholly,
Mought be Cause your Warkes to destroy.

Of the grosse Warke it needes to shew noe more,
For old men have tought the remnant before;
And what is necessary that thei last out,
This Boke sheweth it without doubt.
Wherefore this litle Boke the *Ordinall*,
Is in *Alkimy* the Complement of all;
The *Chapter* following convenient for a *Clerke*,
Sheweth the *Councells* of the subtill Werke.

CHAP.

C H A P. V.

RISE by Surname when the chaunge of
 (Coyne was had,
 Made some Men sorry, and some Men glad:
 And as to much people that chaunge,
 Seemed a newe thinge and a straunge;
 Soe that season befell a wonderous thinge,
 Tuching this *Science* without leasinge.
 That three *Masters* of this *Science* all
 Lay in one Bed nigh to *Leaden-Hall*,
 Which had *Elixirs* parsite White and Red,
 A wonder such Three to rest in one Bed,
 And that within the space of dayes Tenn,
 While hard it is to finde One in Millions of Men.
 Of the *Dukedome* of *Lorraine* one I understand
 Was borne, that other nigh the *Midle* of *England*,
Under a Crosse, in the end of *Shires* three,
 The third was borne; the youngest of them is he.
 Which by his *Nativity* is by *Clerks* found,
 That he shulde honour all English ground;
 A Man mought walke all the World aboute,
 And faile such Three *Masters* to finde oute;
 Twayne be fleeting, the Youngest shall abide,
 And doe much good in this *Londe* at a Tyde.
 But sinne of *Princes* shall let or delaye
 The Grace that he shulde doe on a daye.
 The eldest *Master* chaunted of him a Songe,
 And said that he shulde suffer much wronge.
 Of them which were to him greatly behould,
 And manie things moe this *Master* tould,
 Which sith that tyme hath trewly befall,
 And some of them hereafter shall,

Whereof one is trewlie (said he)
 After Troubles great Joy shalbe
 In every quarter of this *Londe*,
 Which all good Men shall understonde :
 The Younger asked when that shulde be,
 The old Man said when Men shall see
 The *holy Crosse* honored both day and night,
 In the Lond of *God* in the Lond of Light;
 Which maie be done in right good season,
 But long delayed it is without reason :
 When that beginneth note well this thinge,
 This *Science* shall drawe towards the *Kinge* ;
 And many moe Graces ye maie be boulded,
 Moe then of us shall now be tould ;
 Grace on that *King* shall descend,
 When he ould Manners shall amende :
 He shall make full secrete search,
 For this *Scyence* with doulced speech ;
 And amonge the Solitary,
 He shall have tidings certainly.
 So sought *King Kalid* of manie Men,
 Till he met with *Morien*,
 Which helped *Kalid* at his neede,
 His Vertues caused him to speede.

NOwe of such Matters let us cease,
 And of the fittill Warke reherse ;
 Greate need hath he to be a *Clerke*,
 That would perceiue this fittill Werke.
 He must know his first Philosophie,
 If he trust to come by *Alkimye* :
 And first ye shall well understonde,
 All that take this Werke in honde ;
 When your materialls by preparation,

Be made well apt for Generation,
 Then thei must be departed a twinn,
 Into foure Elements if ye would to winn:
 Which thing to doe if ye ne can,
 Goe and lerne it of *Hortolan*.
 Which made his Boke of that Doctrine,
 How ye shulde part the Elements of Wine.
 Moreover ye must for your succour,
 Know th'effects of the quallities fower;
 Called Heate, Colde, Moisture, and Drines,
 Of which fower all things Compounded is;
 And sith in this *Arte* your cheefe desire
 Is to have Colour which shulde abide fier,
 Ye must know before you can that see,
 How everie Colour ingendred shall be,
 For every Colour whiche maie be thought,
 Shall heere appeare before that White be wrought.
 Yet more ye would have to this summe,
 Swiftly to melt as Wex or Gumme:
 Els mought it not enter and perce
 The Center of Mettalls as Auctors reherse;
 Soe ye would have it both fix and flowe,
 With Colour plenty if ye wist howe;
 Such three Contraries joyntly to meete
 In one accord is a greate Secret.
 Nethles he that is cleere of Minde,
 In this Chapter maie it well finde;
 And first to give you a short Doctrine,
 Of the aforesaid qualities prime:
 Heate, and Cold, be qualities Active
 Moisture, and Drines, be qualities Passive;
 For they suffren the Actives evermore,
 As Stones to be Lyme, and Water to be Froare.
 Hereupon to Judge, ye maie be bold,

Nothing is full wrought but by Heate and Cold;
 Nethles the Passives have some Activity,
 As in Handicrafts men ye maie daily see;
 In Bakinge, and Brewinge, and other Crafts all,
 Moisture is opperative and soe Drines be shall.

Aristotle in his *Phisicks* and other manie moe,
 Said *ab actionibus procedit speculatio*;
 They said that Practise is roote and beginning,
 Of Speculation and of all Cunning;
 For the properties of every thinge,
 Be perceaved by their working;
 As by Colours of *Urins* we may be bold
 To give sentence of Heate and Colde;
 By thes aforesaid foure qualities prime,
 We seeche Colours with length of tyme;
 Of White Colour we be not full sure,
 To seeche it but in a substance pure:
 Greate Doctrine thereof lerne now ye maie,
 When ye know how Colours growe all day.

Colour is the utmost thinge of a Body cleere,
 Cleere substance well termined is his matter heere;
 If Heate hath maistery in matter that is drye,
 White Colour is ever thereof certainly;
 As it appeareth in sight of brent Bones,
 And in making of all Lyme Stones.

Where Cold worketh in matter moist & cleere,
 Yet of such working Whitnes woll appeare:
 As it sheweth in Ice and Frosts hore,
 The cause is set out in Philosophie before:
 I write not here of common Philosophie,
 But by example to teach *Alkimy*;
 That one maie be perceived by that other,
 As is the Child perceived by the Mother.

Chap. 5.

If Heate in moyft matter and groffe withall,
 Warke, thereof *Black* Colour ingender shall;
 Example hereof if ye of me desire,
 Behold when you fee greene Wood fet on a fire;
 When Cold worketh in matter thick and drye,
 Black Colour shall be, this is the cause whie;
 Such matter is compacted and more thick,
 With Cold constreyning, enemy to all quick,
 Thicknes made Darknes with privation of Light,
 Soe Collour is private, then Black it is to Sight,
 Therefore evermore remember this,
 How cleere matter is matter of Whitenes;
 The cause efficient maie be manyfold,
 For somewhile it is Heate, and sometime Cold:
 But White and Black, as all men maie see,
 Be Colours contrary in most extremitie:
 Wherefore your warke with Black must beginn,
 If the end shulde be with Whitenes to winn.

The midle Colour as *Philosophers* write,
 Is *Red* Colour betweene Black and White:
 Nethlesse trust me certainly,
 Red is last in work of *Alkimy*.
 Alsoe they say in their Doctrine,
 How theis two Colours Ruse and Citrine,
 Be meane Colours betweene White and Red,
 And how that Greene, and Colour wan as Lead,
 Betweene Red and Black be Colours meane,
 And freshest Colour is of matter most Cleane.

Physitians in *Urines* have Colours Nyntcene,
 Betweene White and Black as thei weene;
 Whereof Colour underwhite *Subalbidus* is one,
 Like in Colour to *Onychyne* stone:
 Of such like Colour *Magnetia* found is,
 But *Magnetia* glittereth with Cleerenes:

In our suttill warke of *Alkimy*
 Shall be all Colours that hath ~~beene~~ seen with Eye:
 An hundreth Colours more in certeyne,
 Then ever hath been seene in *Urine*.
 Wherein so many Colours mought not be,
 But if our *Stone* conteyned every degrec,
 Of all Compositions found in warke of kinde,
 And of all Compositions imaginable by minde.
 Of as manie Colours as shall therein be saine,
 So manie graduations your wisdome must attaine:
 And if you knowe not such graduations all,
 Lerne them of *Raymond* in his *Atre Generall*.
Gilbert Kymer wrote after his devise,
 Of 17. Proportions, but thei maie not suffice
 In this *Science*, which he coude never finde;
 And yet in *Phisick* he had a nobil minde.
 Wher the royalty of the nature of Man,
 Advaunceth ofte Medicines of the Phisician:
 And so honoreth oft times his Crafte,
 When that the Medicines peradventure mought be laste;
 But it is not so in *Phisick* of *Mines*,
 For that *Arte* exceedeth all other engines:
 And resteth only in the wisdome of Man,
 As by experience wise men witnes can.

ANd soe of *Alkimy* the trew foundation,
 Is in *Composition* by wise graduation
 Of Heate and Cold, of Moist and of Drye,
 Knowing other Qualities ingendered thereby;
 As hard and soft, heavy and light,
 Rough and smoothe, by ponders right,
 With Number and Measure wisely sought,
 In which three resteth all that *God* wrought:
 For *God* made all things, and set it sure,

Chap. 5. In Number Ponder and in Measure,
 Which numbers if you *doe* chaunge and breake,
 Upon *Nature* you must *doe* wreake.
 Wherefore *Anaxagoras* said Take good heede,
 That to *Conjunction* ye not proceede,
 Till ye know the Ponders full compleate
 Of all Components which shulde therein meete;
Bacon said that old Men did nothing hide,
 But only *Proportion*, wherein was noe guide:
 For none old Auctor, King, Prince, ne Lord,
 Writing of this *Science* with others did accorde
 In the Proportions; which if ye would reach,
Raymond, with *Bacon*, and *Albert*, done it teach,
 With old *Anaxagoras*, of them fowre ye shall
 Have perfect knowledge, but not of one have all:
 And if you would joyne fowre Qualities to intent,
 Then must ye Conjoyne every Element:
 As Water and Erthe after your desire,
 Well compounded with Ayer, and Fier:
 Knowing the worthiest in his activitie,
 The second, the third, every-each in his degree;
 The fourth, and the vilest maie not be refused,
 For it is profitable and best to be used;
 And best maie extend his Multiplication,
 In whome is the virtue of our Generation;
 And that is the Erthly *Lytharge* of our *Stone*,
 Without him Generation shall be none;
 Neyther of our Tincture fixation,
 For nothing is fixt but Erthe alone;
 All other Elements moveable be,
 Fier, Ayer, and Water, as ye daily see:
 But Fier is cause of extendibility,
 And causeth matters permiscible to be,
 And cleere brightnes in Colours faire

Is caused of kinde evermore of Ayer,
 And Ayer also with his Coaction,
 Maketh things to be of light liquefaction :
 As Wax is and Butter, and Gummes all,
 A little heate maketh them to melt and fall :
 Water clenseth with ablution blive,
 And things mortified causeth to revive.
 Of multiplying of Fier is no greater wonder,
 Than is of multiplying of Erth set under :
 For Erth beareth Herbes daily new and newe,
 Witbout number, therefore it is trewe
 That Erth is wonderfull as well as Fier,
 Though one sparke maie soone fill a Sheere :
 If all a Sheere were filled with Flaxe,
 One sparke than would wonderfully waxe :
 Fier and Erth be multipliers alone,
 And thei be causers of multiplying our *Stone*.
 Of this Erth showeth *Albert* our great Brother,
 In his *Mineralls*, which *Lytharge* is better than other.
 For the white *Elixir* he doth it there rehearse,
 And the booke of *Meeter* showeth it in a verse.

NOW to *Conjunction* let us resorte,
 And some wise Councell thereof reporte :
 Conjoyne your Elements *Grammatically*,
 With all their Concords conveniently :
 Whiche Concords to healpe a Clerke,
 Be cheefe Instruments of all this werke :
 For nothinge maie be more contrary now,
 Than to be fixt and unperfectly flowe :
 All the *Grammarians* of *England* and of *Fraunce*,
 Cannot teach you this Concordance :
 This *Ordinall* telleth where ye maie it see,
 In *Phisick* in the Boke de *Arbore*.

Chap. 5.

Joyne them also in *Rhetoricall* guise,
 With Natures Ornate in purified wise:
 Sithens our Tincture must be most pure and faire,
 Be sure of pure Erth, Water, Fier and Ayre.
 In *Logicall* wise be it early or late;
 Joyne trewe kinde not sophisticate;
 Ignorance hereof hath made many Clerks,
 Lewdly to leese their labour and their werkes.
 Joyne them together also *Arithmetically*,
 By suttill Numbers proportionally.
 Whereof a litle mention made there was,
 When *Boetius* said *tu numeris elementa ligas*.
 Joyne your Elements *Musically*,
 For two causes, one is for Melody:
 Which there accords will make to your mind,
 The trewe effect when that ye shall finde.
 And also for like as *Diapason*,
 With *Diapente* and with *Diatefferon*,
 With *ypate ypaton*, and *Lecunas muse*,
 With other accords which in Musick be,
 With their proporcions causen Harmony,
 Much like proportions be in *Alkimy*,
 As for the great Numbers Actuell:
 But for the secrete Numbers Intellectuall;
 Ye must seeche them as I said before,
 Out of *Raymond* and out of *Bacons* lore.
Bacon sheweth it darkly in his three letters all,
 And *Raymonde* better in his *Arte Generall*.
 Many men weene which doth them reade,
 That theie doe understonde them when theie doe not
 With *Astrologie* joyne Elements also, (indeede
 To fortune their Workings as theie goe:
 Such simple kinde unformed and unwrought,
 Must craftily be guided till the end be sought.

All which season theie have more obedience,
 Above formed Natures to Sterrs influence.
 And Science *Perspective* giveth great evidence,
 To all the Ministers of this *Science*.
 And so done other Sciences manie moe
 And specially the Science *de Pleno & Vacuo*,
 But the chiefe Mistris among Sciences all,
 For helpe of this *Arte*, is *Magick Naturall*.

WHen the foure Elements wisely joyned be,
 And every-each of them set in his degree,
 Then of divers degrees and of divers digestion,
 Colours will arise towards perfection.
 For then worketh inward heate naturall,
 Which in our substance is but Intellectuall:
 To fight unknowne, hand maie it not feele,
 His working is knowne to few Men and seild;
 And when this heate naturall moved be shall
 By our outward heate artificiall,
 Then Nature excited to labour will not cease
 Many diversities of degrees to increase.
 Which is one cause by reason you maie see,
 Whie in our warke so manie Colours be:
 Therefore it causeth in this *Arte* great doubt,
 Ignorance of heate within and without,
 To know how theis two heates shulde accord,
 And which of them in working shulde be Lord.

Digestion in this warke hath great likenesse
 To digestion in things of Quicknes:
 And before other (as I witnesse can)
 It is most like to digestion of Man.
 Therefore said *Merien*, our *Stone* in generation
 Is most like thing to Mans Creation,

Chap. 5.

In whom faith *Raymond* the fowre degrees all
 Of the fowre Complexions together finde ye shall,
 And that actually, which ye cannot finde
 Amongst Creatures in none other kinde.
 Wherefore amonge Creatures theis two alone
 Be called *Microcosmus*, *Man* and our *Stone*.
 Now of Digestion the aliment and foode
 Perfectly to know is needfull and full good.
 It is humor sollid constant with ficcitie,
 Mightily medled after some degree,
 In opposite passives mixed duly,
 Ingendered by inward and outward heat trewly.
 Soe nothing else is our Digestion,
 But of humour substantiall a create perfection.
 I pray ye *Laymen* haue me excused,
 Though such *Tearmes* with you be not used,
 I must use them, for all Auctors affirmes,
 How *every Science hath his proper Tearmes*.
 Digestion sometimes advanced maie be
 By outward cold, as yearly ye maie see
 How in Winter men eaten more meate
 Than in Summer, when expanded is their heate;
 For colde maketh heate inward then to flye,
 And ligge nigh together, then stronger is he;
 Which by his strength his power is more
 To make Digestion than he mought before.
 But our cheefe Digesture for our intent,
 Is virtuall heate of the matter digerent;
 Nethles heate of the digestible thinge,
 Helpeth digestion and her working:
 Feaverly heate maketh no digestion,
 Baines maie helpe and cause also destruction.
 Wine digested hath more heate naturall,
 Than hath new Muste, whose heate is accidentall:

Coagula-

Coagulation is noe forme substantiall,
But onlie passion of things materiall.

More ye must know, when Colours appeare,
Who is principall Agent in that matter Cleere.
For sometimes it is Heate, and sometimes Cold it is,
And sometime Moysture, and sometime Drines.
The principall Agent to know at every season,
Requireth great search made by suttill reason:
Which is not perceived but of *Masters* fewe,
For thei mark not how Colours arise by rewe:
The principall Agent of the qualities fowre,
Hath power royall as Lord of most honour
The remnant of qualities to Converte to his kinde,
Of which conversion *Anaxagoras* maketh minde.
In his Boke of *Conversions Naturall*,
Whereof *Raymond* sheweth causes speciall:
It is no Jape neither light to lerne
Your principall Agent all seasons to discerne:
Which I teach you to knowne by signes fowre,
By *Colour*, *Odour*, *Sapor* and *Liquore*.

And first by *Colour* to serve your intende,
To know thereby your principall Agent.
Looke in your Vessell which Colour sheweth most,
He that causeth him is principall of the host
As for that season, whose pride ye maie swage,
By this our Doctrine, if ye see him rage:
Which ye maie doe when ye well understonde,
The cause of all Colours which ye have in honde.
Which I woll teach you now shortly withall,
Bycause here and there seeke them ye ne shall:
Whitnes is caused of manie matters cleere,
In another thing terminated, and soe it isheere;

Blacknes.

Chap. 5. *Blacknes* is when parts of a body darke,
 With thicknes oppreſſerth the cleernes of the Warke;
 Or els it is of a Combust terreſtrietie,
 But of ſuch Combustion greate hardnes ſhall be;
 And by Commixion of Darke Cleere and Cleane,
 Shall be ingendered all the Colours meane:
 Every cleere thing perſpicuate and fayre,
 Standeth by the matters of Water and Aire,
 Whome a pure Erth doth apprehend,
 Such as ſhall not their cleerenes offend;
 And if in ſuch cleerenes and perſpicuitie,
 Ye can noe ſpeciall Colour ſee,
 Thereupon to Judge you maie be bold,
 The cauſe of ſuch things was exceeding Colde:
 As *Chriſtall*, *Berill*, and other things moe,
 Diuerſitie betweene them lerne ere ye goe;
 Chriſtall hath Water declyning toward Ayer,
 Wherefore it is cleere, perſpicuous and faire;
 But where it declineth towards Water more,
 It is darke, as *Berill* or Ice hard frore;
 But when matters draweth toward ſiccitie,
 Darknes with hardnes ingendred ſhall be;
 As it appeareth in the *Adamant Stone*,
 And in other things manie one.
 Twinckling and glittering as in *Magnetia* is,
 Light is cauſe thereof within matter of Cleerenes;
 Which is ſuperduced upon waterly vapour,
 Beforetyme incenced with Heate beye ſure;
 Now after cleerenes and Colours in extremitie,
 Of meane Colours a litle ſhew will I.

Ruby colour is of a thinn fume ſuccended
 In a cleere Body, which alſoe is amended
 When in that Body reyneth plenty of light,
 For more or les thereof maketh more or les bright:

As the *Amatist* followeth the Ruby in dignity,
 In less Cleerenes and more Obscuritie :
 And a *Calcedonie* in Slymy substance,
 Followeth the *Berill* in degrees of variance.
Greene as a *Smaragde* is of Water cleere,
 With Erthy substance Combust mixt full neere :
 And the cleerer substance that the Erth be ,
 The cleerer greeness thereof ye shall see.
Tawney is of Cleerenes terminate,
 Infused with thick Fumosity congregate
 Of Water, and alsoe of Erth succended,
 Whereby the cleerenes of Aier is suspended.
Wann or leady Colour ingendred is
 Of Waterie and Erthy parts without amisse;
 And where such parts be cold and thick,
 Ever Wann Colour thereon shall stick ;
 As it appeareth in old layen Lead,
 And in Men that be wellneere dead :
 This Wann Colour called Lividitie,
 In Envious Men useth much to be ;
 Naturall heate and blood done resorte,
 To the Hert, them to comfort,
 And leaveth Cold and Dry the Face,
 For heate and blood is parted fro that place.
 Likewise when Fevers be in extremitie,
 The Naitles of Hands of this Colour wilbe.
 The *Saphire* Colour, that Orient Blewe,
 Like in Colour to the heavenlie hue ,
 Is much fairer than Wann Colour to sight,
 For therein is more of Aier Water and Light
 Than is in Wann Colour, and that by manifold,
 Wherefore such Colour is more deerer solde ;
 All other *Blewes* the sadder that they be,
 Thei have lesse of Aier and more of Terrestriety.

Chap. 5.

Silver to Azure soone broght will be ;
 The cause thereof is perspicuitie ,
 Which is in Silver caused of Ayer ,
 Wherefore it turneth to heavenly Colour faire ;
 And Quicksilver plenty within him is ,
 Causeth in Silver all this brightnes :
 Subtiler Erth, pure Water, with cleerenes of Air ,
 Causeth such brightnes to Quicksilver to repaire .
Citrine Colour Yellowe as ye see in Gould ,
 Is Colour most liking for some men to behould :
 Caused of mighty and strong digestion ,
 For humor in him have strong decoction ;
 Such Colour with Heate ingendred be shall ,
 As it in Honey, Urine, Lye, and Gall :
 The shining of *Gould* is caused as I tell ,
 Of pure and subtile Water termined full well ,
 Perspicuoussly condensed ; for Water pure and fine ,
 The more it is Condensed, the better it woll shine ;
 For of a Mirrour the cause none other is ,
 But moisture termined, as all Clerks gesse ,
 Soe that it be polible withall ;
 For Aier Figures receive never shall ;
 For Aier maie not be terminate in his kinde ;
 So cause of shining in Water ye shall finde .
 With White and Red well medled pure and fine .
 Woll be ingendred faire Colour *Citrine* .
 Soe divers Comixtions of *Elements* ,
 Maketh divers Colours, for divers intents :
 With divers Digestions, and divers degrees ,
 All Colours be made which your Eyen sees .
 Of Elements ye must the proper Colour lerne ,
 Whereby of Colours ye maie better discerne ;
Phisitians saie of good Herbs and soote ,
 Some be colde outward and hot within the roote ;

Ex ample

Example hereof if ye list to gett,
 Behold the working of the gentle Violet:
 Common Philosophie the cause doth disclose,
 Whie colde is within and red without the Rose:
Anaxagoras said in his *Coverfions naturall*,
 Inward and Outward be contrary in things all,
 Which is trewe except such things as be
 Of little composition, and nigh simplicitie;
 As is Scammonye, and Lawrell the Laxative,
 Which be not nourishing to vegetative.
 Remember how in every mixt thinge,
 Evermore one Element desireth to be Kinge:
 Which proude appetite of Elements and vicious,
 Moveth men to be Ambitious:
 Wherefore our *Lord* that best dispose kann,
 Hath made Ordeynance for sinfull Man,
 All proude appetites to equalitie to bringe;
 When *Requiem aeternam* the Church shall singe,
 Than shall everie ambitious thought,
 Plainely appeare how that it was nought:
 Lords, and Beggars, and all shall be
 In the Charnell brought to equalitie.
 Your Principall Agent so rebate shall ye,
 When he usurpeth above equality;
 Therefore *Aristotle* said Compound ye our Stone
 Equall, that in him repugnance be none;
 Neither division as ye proceede;
 Take heede thereto, for it is greate neede;
 And when it falleth that ye shall see
 All Colours at once that named maie be;
 Than suffer Nature with her operation,
 At her owne leasure to make Generation:
 Soc that amonge so manie Colours all,
 Nature maie shew one principall:

Chap. 5. Such as shall draw towards your intent,
According to your desired Element.

This wise by Colours yee maie provide
How in your workes yee shall yee guide.
Manie moe things of Colours I maie write,
But this is sufficient my promise to acquite,
As farr forth as Colours maie serve your intent,
By them to know your principall agent.
But manie Clerks wonder why you may see
Soe manie Colours as in our Stone woll be,
Before that perfect White and Cleere,
And unchaungeable woll appeare,
Considering the fewnes of the ingredients;
I woll that answer to please their intents,
And teach them the trewth of that greate doubt:
By kinde of *Magnesia* such Colours passe out,
Whose nature is of such Convertibilitie,
To everie proportion, and to everie degree,
As Christall to his Subject is founde;
For of everie thing that is upon the grounde,
Which that ye woll Christall set under,
Such Colour hath Christall, therefore cease to wonder:
Wherefore *Hermes* said not untruly ne Envious,
Ad perpetranda miracula rei unius:
God hath so ordeyned faith *Hermes* the Kinge,
To fulfill the miracles of one thinge:
Common *Philosophers* thereof cannot finde
The vertues of our *Stone* exceeding far their minde.

Smelting maie helpe forth your intente,
To know your reigning Elemente;
And be with Colour a Testimony,
To know your principall Agent thereby;
And ye which would by smelling lerne

Of your principall Agent trewly to discern.
 As White, and Black, be Colours in extremitie,
 Soe of Odors, soote and stinking be:
 But like as Fishes know not by sight
 Noe meane Colours, because their Eyne bright
 Have none Eyelidds for their sight closinge,
 Soe meane Odors shall not by smellinge
 Be knowne of you, this is the cause whie,
 For Nostrills be open as the fishes Eye:
 Therefore meane Odors be not in certaine
 Smelled by the Nose, as meane Colours be seene.
 Heavie Smell is not as Clerks thinke
 The midle Odor, but only the lesse Stinke.
 Old Fathers wrote by their Doctrine,
 Of their Experience which is maturine,
 That if ye medle sweete Savour and redolente
 Equally with stinking to prove your intent;
 The soote shall be smelled, the stinking not soe,
 The cause ye may lerne now ere ye goe;
 All sweete smelling things have more puritie,
 And are more spirituall than stinking maie be:
 Wherefore it is in Aier more penetrative,
 And is more extendible, and is alsoe to life
 More acceptable, as friend to Nature,
 And therefore rather received be ye sure.

Odor is a smokish vapour resolved with heate,
 Out of substance, by an invisible sweate;
 Which in the Aier hath free entringe,
 And chaungeth the Aier and your Smelling;
 As Sapor of Meates chaungeth your Tasting,
 And as Sounds chaungeth your Hearing,
 And as Colour chaungeth your Sight,
 Soe Odor chaungeth Smelling by might.

Chap. 5.

The cause of Odours to know if you delight,
 Foure things thereto be requisite;
 First that fittill matter be Obedient
 To the working of Heate, for to present
 By a fume the liknes of the same thinge,
 From whome that fume had his beginnunge;
 Also to beare forth that pure fume and faire,
 There is required a cleere thinn Aier:
 For thick Aier woll not beare it farr,
 But it woll reteyne it much faster;
 And soe thick matter Obedience hath none,
 To the working of Heate, as it sheweth in Stone:
 Heate maketh Odours, Cold shrinketh, by reason
 Dunghills in Summer stink more than in Winter season;
 Pleasant Odours ingendered be shall
 Of cleane and Pure substance and fumigale,
 As it appeareth in Amber, Narde, and Mirrhe,
 Good for a Woman, such things pleaseth her;
 But of Pure substance with a Meane heate,
 Be temperate Odours, as in the Violet;
 Of a Meane heate with substance Impure,
 Is Odours misliking, as Aloes and Sulphure:
 But when Naturall heate beginneth to spill,
 Then thereof ariseth heaueie smell;
 As Fish smelleth that is kept too longe,
 Naturall heate rotteth, soe the smell is stronge;

S*tinch* is a Vapour, a resolved fumositie
 Of things which of Evill Complexions be.
 And when Humor onlie is in Corruption,
 Soe that the Substance be not in Destruction,
 Thereof shall onlie heaueie smell arise,
 But not verie Stinch come in that wise.
 Of everie Stinch the cause of that Chaunce

Is only corruption of the selfe substance;
And when Evill substance shall putrifie,
Horrible Odour is gendred thereby:
As of Dragons and Men that long dead be,
Their stench maie cause greate Mortalitie.
It is not wholsome to smell to some Cole,
For quenching of some Snuffe a Mare woll cast her Foale.
When the Qualities of a thing according is
To your Nature, good Odour will not misse:
But when the substance is contrary to your kinde,
The Odours thereof odious you shall finde.
Fishes love Soote smell, also it is trewe,
Thei love not old Kydles as thei doe the new.
All things that are of good Odour,
Have naturall Heate for their succour;
Though Camphire, Roses, and things colde,
Have soote Odours, yet Auctorstould,
How Heate virtually inclosed is the skell,
With Purennes of substance, whic they so smell:
This olde opinion you maie teach your Brother,
How noe good Odour is contrary to another;
But it is not foe of stinking smells,
For stinch of Garlick voydeth stinch of Dunghills.
Of Odours this Doctrine is sufficiente,
As in *Alkimy* to serve your intent,
Your Warks to understonde thereby,
When things begin to putrifie;
Alsoe by Odours this you maie lerne,
Suttilnes and grosnes of Matters to discerne:
Alsoe of Meane substance knowledge ye may get,
With knowledge of Corruption of Naturall heate;
And knowledge of Diversitie by good attendance,
When Humour corrupteth and when the Substance.
But our Substance was made so pure and cleane,

And

Chap. 5.

And is conserued by vertue of the meane,
That ye no stinke thereof shall finde,
Albeit that it putrifie fro his owne kinde.

THE third signe and the third Testimony
To understand your principall Agent by,
Is *Sapor* called, of Mouth the Taste,
Which evermore is cause of waste
Of the substance of the same thinge
Whereof ye make prooffe by Tastinge
Sapor shulde be much better Judge
Then Colour or Odour, and more refuge,
Were not Taste a perillous thinge,
While our *Stone* is in workinge;
For it is hurting to health and life,
It is so greatly penetrative,
Above all subtile things it hath Victory,
And peirceth solid things hastily,
Wherefore it is perill and not good,
Much or oft to Taste of that foode:
It Comforteth Mettalls as we well finde,
But it is Perillous for all Mankinde,
Till perfect Red thereof be made,
Such as in Fier woll never fade.
A lewde Man late that served this Arte,
Tasted of our *white Stone* a parte,
Trusting thereby to find releefe
Of all sicknes and of all greefe,
Whereby the Wretch was sodenly,
Smitt with a strong Paralysie;
Whom my *Master* with great Engine,
Cured with *Bezoars* of the Mine.
Therefore though Taste by Common reason,
Shulde be best judge at every season,

You

Yet for that Taſt is abominable
Sapor is heere not profitable.
 Yet of ſome parts ſeperable,
 A Taſt maie well be Conuenable
 Before Conjunctions to make aſſay,
 Whether they be well wrought or nay;
 Howbeit a Wiſeman hath helpe ſufficient,
 By Colour and Odour to have his intent:
 For manie Men can chuſe good Wine,
 By Colour and Odour when't it is fine;
 But for new Wine not fined in generall,
 The trew Taſt is moſt ſuertie of all;
 For Smelling hath Organalls but one,
 Nothing diſcerning but ſumous things alone;
 But Taſt hath ſix Organalls without doubt,
 To feele qualitie of things within and without,
 Which Nature ordain'd againſt perill and ſtriſe,
 For more ſuertie of things haveing life:
 An Ape chuſeth her Meate by Smelling,
 Men and Popinjays truſten to Taſting:
 For manie things be of good Smell,
 Which to Taſt be found full ill:
 For they maie be abhominable ſower,
 Over-ſharpe, too bitter, or of greate horreur,
 Or Venamous, ſtinking, or over-ſtronge,
 The Taſt is judge and voideth ſuch wronge.
 Old men wrote in antient time,
 How that of *Sapors* there be fully Nyne;
 Which ye maie lerne in halfe an hower,
 As Sharpe taſt, Unctuouſ, and Sower,
 Which three doe ſuttill matter ſignifie;
 And other three doe meane matter teſtifie,
 As Bitinge taſt, Saltiſh and Weeriſh alſo,
 Other three come thicke ſubſtances fro,

As Bitter tast, under Sower, and Douce;
 Thes Nyne be found in manie a Noble House;
 Five of these Nyne be ingendred by Heat,
 Unctuons, Sharpe, Salt, Bitter, and Doulcet;
 But of the Nyne the remnant all fower,
 Be made with cold, as is the Sapor Sower,
 And so is Sowerish tast called Sapor Pontick,
 And lesse Sower allso called Sapor Stiptick,
 Also is Weerish tast called Unfavoury,
 With Cold ingendered effectually.
Sapor of two things hath his Conception,
 Of divers Substance and of divers Complection.

OF Hot and Moyst in the Second degree,
 With a Thick substance, Doulcet Tast will be;
 The same degrees of the same Complexion,
 To a Meane substance knit by connexion,
 Unctuous Sapor ingender ever shall;
 But where it is Hott and Dry withall,
 With a Meane substance in the Second degree,
 The Tast thereof must needs Saltish be;
 When a thing in the Third degree Hot and Dry is,
 With a substance Thick, there is Bitternes;
 But in the Fowerth degree matter Hot and Dry,
 With a Suttill substance, Sharpe Tast is thereby;
 So five Tasts, as I said before,
 Be ingendered with Heat, and not one more.
 Of Cold and Dry in the Second degree by kinde,
 With a Suttill substance, full Sower ye shall it finde;
 As by Faces of People ye maie Deeme,
 When thei tast Crabs while thei be greene:
 The same Complexion in the same degree,
 In a thing which of Meane substance shall be,
 Of that is ingendred ye maie well suppose,

A Bitinge Taſt as is of the Roaſe,
 But Sower, and Sowriſh, and leaſt Sower, all three
 Be of Cold and Dry in High and Low degree:
 And Cold and Moyſt in the Firſt degree of all,
 A Weeriſh Taſt ingender ever ſhall,
 As of an Egg it ſhoweth in the glaere,
 And in pale Women over White and Fayer:
 For ſuch be Cold, and of Humiditye
 Thei have trewly greate ſuperfluity,
 Therefore to Men thei have leſſe delight;
 Cold rebateth luxurious appetite.
Iſaac ſaid there be but Taſtes ſeaven,
 For Sower and leſſe Sower was one but uneven,
 But in Complexion thei were of one foundation,
 For Unſavoury was but of Taſt privation;
 Compound Taſts be found alſo,
 As Douce Eger and others manie mo;
 So by Taſt men maie Craſtily know,
 Divers complexions and degrees high and low;
 And when ye doubt by Taſt to make report,
 Than to your other testimonies reſort.
 As in *Phyſicke* truſt not to Urine
 Onely, but alſo take witnes and Doctrin
 Of your Pulſes, and wiſely conſidering
 Six things not naturall the Body concerning,
 Having reſpect alſo therewithall,
 Unto theſe Seaven things naturall;
 And take heed if ye woll be ſure,
 Of Three things contrary to nature:
 Compleat theiſ Sixteene wiſely to your ground,
 A lewd *Phifition* leaſt that ye be found:
 For ſo of (*had I wiſt*) ye maie beware,
 And helpe the Sick man from his care:
 So fo this *Science* if ye woll advaunce,

Chap. 5.

Your works, take heed of everie Circumstance,
 Wisely Considering your testimonyes fower,
 Three be now passed, the fowerth is Liquor.

Liquor is the Comfort of this Werke;
 Liquor giveth evidence to a Clerke
 Thereby to fasten his Elements,
 And also to loose them for some intents;
 Liquor conjoyneth Male with Female Wife,
 And causeth dead things to resort to Life;
 Liquors clenseth with their ablution,
 Liquors to our *Stone* be Cheefe nutrition;
 Without Liquor no Meate is good;
 Liquors conveyeth all Aliment and Food
 To every part of Mans Body,
 And so thei doe with us in *Alkimy*.
 Ye must consider the puritie
 Of all your Liquors and quantitie;
 And how thick thei be or thinn,
 Or else thereof shall ye litle winn;
 But not as *Phisitions* maketh mention;
 For *Elixir* is a thing of a second intention;
 Wherefore ye shall more Wondrous natures find
 In his working, than in all other kind;
Phisitions say the thicker Urine be,
 The more it signifieth Humidity,
 Where thick Liquor with us hath siccity,
 And suttill Liquor betokneth Humidity.

Manie Liquors be requisit
 To our *Stone* for his appetite.
 In the Booke of *Tarba Aristens* depofed,
 How Ayre in Water was secretly inclosed;
 Which bare up Erth with his Aierly might.

Pithagoras

Pithagoras said that was spoke with right.
Aristotle Crafterlye his words set he,
 Saying, *cum habueris aquam ab Aere.*
Plato wrote full sapiently,
 And named it *stilla roris madidi*:
 Which was kindly spoken for *Alkimy*.
 But common Students in first Philosophie,
 Say Ayre condensed is turned into Raine,
 And Water rarified becomes Ayre againe.
 Some said how *May* was first season and faire
 To take such Water as is made of Ayre.
 Some said such Waters come heaven fro,
 When the *Sunn* entereth into *Scorpio*.
 Some said all Liquors shulde be refused,
 Which Frost infected shulde not be used:
 The cause whie as telleth Autors old,
 Is that their accuity is duld with cold.
 Some *Philosophers* said that ye shulde take
 Milke for the Liquor *Elixir* to make:
 And other sort said after their intent,
 No Liquor so good for the Complement,
 As Water of *Litharge* which would not misse,
 With Water of *Azet* to make *lac virginis*:
 But *Democrit* said best Liquor to present
Elixir withall was Water permanent:
 Whose naturall vertue and propertie,
 Was fier to abide and never to flye:
Rupiscissa said that cheefe Liquor
 Was *Aqua-vita Elixir* to succour;
 For she was spirituall, and would revive
 Dead things fro death to live,
 Shee was *Quintessence*, the fift thing,
 Whereof *Aristotle* by his writing
 In his Boke of *Secrets* saith soe;

Chap. 5.

How that all perfection was in *quinario*.
Rupiscissa called it best Liquor of all,
 For it maketh grosse matter spirituall;
 But of *Pithagoras* ye maie finde,
 Our *Aqua-vita* of another kinde;
 He saith it was *Vivificans* in his sentence,
Fac fugiens fixum & fixum fugiens,
 For in such wise with strong Coaction,
 Fixt matters were made of light liquefaction.
 Another sort said no Liquor was above
 The Liquor which Congers most desier and love:
 Therefore such Liquors are best found,
 Nigh to Islands, and to such ground
 Which the Ocean Sea hath compassed about,
 For there such Liquors be soonest fet out.
 Of another Liquor wise men tell,
 Which is fresher than Water of the Well;
 Fresher Liquor there is none in tast,
 Yet it woll never consume ne waste;
 Though it be occupied evermore,
 It will never be lesse in store;
 Which *Democrit* named for his intent,
Lux umbra carens, Water most Orient;
Hermes said no Liquor so necessarie,
 As was Water of crude Mercury:
 For he shall stand said that Noble Clerke,
 For the Water within our werke.
 Now lerne ye which for this Science have sought,
 By all these Liquors our *Stone* must be wrought.

Liquor is a thing moveable,
 Of fleeting substance and unstable.
 All such things follow the *Moane*,
 More then standing kindes doone;

And

And that appeareth to a Clerke,
 In working of the white Werke;
 Liquors washen and maken cleane,
 Both Extremities and the Meane;
 God made Liquors for Mans use,
 To clense foule things in everie howse;
 Liquor bringeth without doubt,
 Hidden things in Bodyes out,
 As Landres witnes evidently,
 When of Ashes thei make their Lye;
 Liquor comforteth the roots of Grasse,
 And of Trees such as drye was;
 For Liquors of Nature woll restore
 Humors that were lost before.
 Liquors departeth Qualities asunder,
 Substance resolving in Attomes with wonder;
 Liquors also bringeth into one
 Many things to be one Stone.
 Liquors helpeth to flux and to flowe
 Manie things, and lerne ye maie now
 How Liquor is in manie manners found
 Out of things that be on the ground,
 Some by cutting, as Turpentine;
 Some with Pressing, as Sider and Wine;
 Some with grinding, as Oyle is had;
 Some with stilling, as Waters be made;
 Some with Brenning, as Colophonie;
 And some with Water, as Women make Lye;
 Some be otherwise brought about,
 And by naturall working fet out,
 As Urin, Sweat, Milk, and also Blood,
 And Rennier which for Cheefe is good:
 By as manie manners and moe by one,
 We seek Liquors for our Stone.

Chap. 5.

Every of the forenamed woll cleave
 To that thei touch, and some deale leave:
 But Quicksilver albeit it is fleeting,
 Yet he woll never cleave to any thinge,
 But to a Mettall of one kinde or other,
 For there he findeth Sister or Brother.
 Medling with suddill Erth doth him let,
 To cleave to things such as he meet:
 All the said Liquors which rehearsed be;
 Conteyne fower Elements as well as he;
 As Milke conteyneth Whey, Butter, and Cheefe,
 So done trewly every each of all these:
 Which fower maie be departed a twinn,
 And after conjoynd to make ye winn.
 But much more craftily they be heere sought,
 Then Cheefe, and Butter, and Whey be wrought;
 And drawe neerer to simplicitie,
 Then Cheefe, Butter, or Whey maie be.
 Of all Liquors which be in our Stone,
 None is called simple but Water alone.
 Of every Liquor which to our Stone shall goe,
 Ye must know complexion and degree allso,
 And than with Liquor ye maie abate
 The principall Agent from his Estate,
 If he permanent and abiding be,
 In any point of superfluitie:
 As if the reigning qualitie be Driness,
 Ye maie amend it with humour of Moistnes.
 Now more, now lesse, as ye see need,
 And so in all qualities proceede:
 And in such wise order at your will,
 The principall Agent, your purpose to fulfill:
 With knowledge of diversitie, contrarietie, and accord,
 Ye maie chuse which quality shall be Lord.

Your

Your Liquors be ordained to add and subtray,
 To make equalitie by wisdome of assay;
 But trust not that any thing maie be
 Hot and Moist both in one Degree:
 For all that trust two qualities to be soe,
 Shall be deceived where ever thei goe.
 Common Schooles (so teaching) be not true,
 Leave that Opinion, and lerne this of new
 All Old men in that were overseene,
 To set in one degree anie qualities twaine:
 Else thei said so that Schollers shulde not finde
 The secret mixtures of Elementall kind.
 Therefore who cannot his graduations,
 Maie not be perfect in our operations:
 For in true Number *God* made every thing;
 Without true Number no Man trulie maie sing;
 Who faileth of his Number faileth of his Song,
 Who faileth with us must doe Nature wrong.

COnsider also the nature of the meane;
 When it is in the Third degree made cleane;
 The purer that your meanes be,
 The more perfection thereof ye shall see.
 The meanes reteyne a great part
 Of the vertues of this *Arte*:
 For the Principle maie not give influence
 To the Finall end, neither the refluence
 Unto his Principall without succour and aid
 Of meanes conteyning the extremities aforesaid:
 For like as by meanes of a treble Spirit,
 The Soule of Man is to his Body knit,
 Of which three Spirits one is called Vitall,
 The second is called the Spirit Naturall.
 The third Spirit is Spirit Animall,

Chap. 5.

And where they dwell now lerne ye shall:
 The Spirit Vitall in the Hert doth dwell,
 The Spirit Naturall as old Auctors tell:
 To dwell in the Liver is thereof faine,
 But Spirit Animall dwelleth in the Braine:
 And as long as these Spirits three
 Continue in Man in there prosperitie:
 So long the Soule without all strife
 Woll dwell with the Body in prosperous life,
 But when theis Spirits in Man maie not abide,
 The Soule forthwith departeth at that tide:
 For the fittill Soule pure and immortall,
 With the grosse Body maie never dwell withall,
 He is so heaue, and She so light and cleane,
 Were not the fittilnesse of this Spirit meane.
 Therefore in our worke as Auctors teach us,
 There must be *Corpus Anima & Spiritus*:
 Also in our worke ye shall so finde,
 That our meanes must accord in every kinde
 Of both extremities with wisdome sought,
 Els all our worke shall turne cleere to nought:
 For prudent Nature maie not by workinge,
 Make Complement of appetite of a thing,
 And so passe betweene extremities,
 But if she first passe by all degrees
 Of everie meane, this is truth unfained,
 Wherefore Nature manie meanes ordained.

Now after all this to lerne ye had need,
 Of seven Circulations of Elements for your speede,
 According to number of the Planets seaven;
 Which no man knoweth but he have grace from heaven.
 Old *Philosophers*, men of great engine,
 Said how of Circulations there shulde be Nine;

It is the surer to doe by their advice,
 Nethles Seaven maie your worke suffice,
 By inventions late found of new,
 Of later *Philosophers* whos workes be trewe.
 But for Circulations of Elements,
 Some Clerks ween to have their intents.
 When they fro Fier ordaine to descend,
 To Aire (thei ween not to offend)
 If thei to Water doe then proceed,
 And thens to Erth when thei see need,
 And in such wise by order fall,
 From the highest to the lowest of all:
 Upon these words they tooke their ground,
 That *Aer est cibus ignis* found.
 But trust me that such Circulation,
 Is but only a rectification,
 Better serving for separation,
 And for correction than for transmuta tion
 But the truth is that appetite of the Fier,
 Hath to worke in Erth his cheefe desire,
 As upon his cheefe foode materiall,
 For Fier with Erth hath most concord of all;
 Because that ficcitie is the lyme of heate,
 But Ayre of her kind is most wet;
 Yet Fire without Ayre worketh not,
 For Faces of Elements be knit with a knot
 Of *Gods* hand that they maie not depart,
 By noe engine ne craft of Mans art;
 As in Plomps ye have example faire,
 Where heavie Water ariseth after Ayre;
 Whereof noe cause reasonable ye shall finde,
 But Connexion of faces of Elementall kinde.
 But our Circulation is from Fier on high,
 Which endeth with Water his most contrary:

Chap. 5.

Another Circulation beginneth with Ayre,
 Ending with his Contrary cleane Erth and faier.
 Fro Fier to Erth, fro thence to Water cleane,
 Fro thence to Ayre, then fro thence by a meane,
 Passing to Erth, then eftsoones to Fier,
 To such Circulations the Red worke hath desire.
 Other Circulations be better for the White,
 That be rehearsed for her appetite.
 Every Circulation hath her proper season,
 As her lightnesse accordeth with reason.
 For as one Planet is more ponderous
 Then is another and slower, in his course :
 So some Circulations which Clerks seeks,
 Must for her time have full thirtie Weeks;
 Other Circulations shall oft time have lesse,
 As one Planet is lighter then another was :
 But the time of one with another will amount
 To twenty six Weekes proved by accompt.
 After all grosse workes made before hand,
 And after all Circumstances had I understande;
 Ignorance hereof deceiveth manie a Man,
 Causing them to cease where Wisemen began.
 Common People which for this *Science* have sought,
 Ween how in forty dayes it mought be wrought.
 They know not how Nature and things of Arte,
 Have a proper time assigned for their part,
 As it appeareth by this Similitude,
 The Elephant for that she is great and rude,
 Goeth with Foale years full twayne,
 And fifty yeares ere that Foale gender againe.
Anaxagoras said in his Consideration,
 That Mettals had for their generation
 A thousand Yeares, wherefore him list to say,
 In respect thereof our Worke is but one Day.

Also ye must worke by good advice,
 When ye see Erth above Water rise;
 For as Water beareth Erth which we goe on,
 So woll it doe in working of our *Stone*:
 Wherefore Well-springs with strokes soft,
 Soberly make ye must in tymes oft;
 Whereby Water maie soberly flowe,
 For violent Fluxes be perilous as nowe.

MOreover it healpeth in *Alkimy*
 To know seaven Waters effectually:
 Which be Coppied with manie a Man,
 While thei be common seeke them as ye can,
 Desire not this Boke to show things all,
 For this Boke is but an *Ordinall*.
 By those Waters men Weene in mind
 All faults to amend of Metaline kinde;
 Also thei weene of the Elements fower,
 The effects to weene by their succour:
 For thei suppose with confidence unfeined,
 That all Vertues requisit in them be conteyned;
 Some to molifie Mettalls hard wrought,
 And some to harden Mettalls that be soft,
 Some to purifie, some to make malleable;
 Everie-each according that he was able,
 Such Liquors to know it is profit and good,
 Howbeit thei maie not to our *Stone* be food:
 Noble Auctors men of glorious fame,
 Called our *Stone Microcosmus* by name:
 For his composition is withouten doubt,
 Like to this World in which we walke about:
 Of Heate, of Cold, of Moyst and of Drye,
 Of Hard, of Soft, of Light and of Heavy,
 Of Rough, of Smooth, and of things Stable,

Chap. 5. Medled with things fleetinge and moveable,
 Of all kinds Contrary brought to one accord,
 Knit by the doctrine of *God* our blessed *Lord*:
 Whereby of *Mettalls* is made transmutation,
 Not only in Colour, but transubstantiation,
 In which ye have need to know this thing,
 How all the vertues of the Elements transmuting,
 Upon the transmuted must have full domination,
 Before that the substance be in transmutation;
 And all partes transmuted must figured be
 In the Elements transmuting impressed by degree.
 So that the third thing elemented of them all,
 Of such condition evermore be shall.
 That it trewly have it maie be none other, (other.
 But her Substance of that one, and her Vertue of that
 A Child at his Nativitie can eate his meate and cry,
 Our *Stone* at his Nativity woll Colour largely.
 In three years after a Child can speake and goe,
 Then is our *Stone* more Colouring also.
 One upon a Thousand his tincture trewly is,
 Of clean washen *Mettall* I am trew witnes,
 Fastiely (beleeve it) and fully in your thought,
 It maketh good Silver as of the Myne is wrought;
 And also our *Stone* woll augment and increase,
 In quantitie, and qualitie, and thereof never cease;
 And therefore his growing and augmentation,
 Is likned to Man in waxing and creation.
 Nathles one pointe of trewth I woll reporte,
 Which to some Men maie be discomforte;
 At the first making of our *Stone*,
 That time for winninge looke for none;
 If ye then cease, I understande
 Ye shall departe with loosinge hand,
 The Costs be so great before,

Expended and set upon the score;
 But at the first augment of all
 Which tyme our *Stone* depart ye shall
 In parts twaine full equally,
 With subtill ballance and not with Eye:
 One for the Red, that other for the White,
 To mainteyne both for your delight;
 Then winning first beginneth to arise:
 But afterwards if ye be wise,
 At every augment continually,
 Profit shall grow comodiously;
 In this our White Warke alone,
 As well as in the Ruby Stone;
 Whereof said *Maria* Sister of *Aron*,
Lyfe is short, and Science is full long.
 Nathles it greatly retardeth Age,
 When it is ended by strong Courage;
 But some that have byne tought trewlie,
 Have forsooke their worke lewdly;
 When their greate labour have byne paste,
 For thei know not how at the laste
 Groweth the profit and the winninge,
 Which thei would have at the beginninge,
 Therefore I finde that it is neede,
 The trewth to tell when ye shulde speede,
 For when I am past and out of minde,
 This my Witnes shall rest behinde,
 For which cause I doe not spare,
 Of this *Arte* the trewth to declare;
 As much as I dare, that I be not shent
 For breaking of *Gods* Commandement.
 This wise endeth all our *White Werke*
 Shewed sufficiently for an able Clerke.

Chap. 5.

After all this upon a day
 I heard my noble *Master* say,
 How that manie men patient and wise,
 Found our *White Stone* with Exercise;
 After that thei were trewlie tought,
 With great labour that *Stone* they Caught;
 But few (said he) or scarcely one,
 In fiftene Kingdomes had our *Red Stone*:
 And with that word he cast his Eye,
 Looking on me full steadilye,
 Of his words he saw me woe,
 I said alas what shall I doe?
 For above all Erthly thinge,
 I most desire and love Cunninge.
 And for the *Red Stone* is preservative,
 Most precious thinge to length my Life;
 The *Red Stone* said I is lever to me,
 Then all were Gould that I would see to be.
 He said I was to younge of Age,
 Of Body lusty and likely to outrage,
 Scantly of the age of twenty eight yeares,
 He said *Philosophers* had noe such Compeers;
 This woefull answer then he made to me,
 Till ye be elder he said it maie not be.
 Alas good *Master* remember said I,
 Howbeit my Body be light and lustie,
 Prove and assay and you shall finde
 Age sufficient within my Minde,
 He held his words full still that tyde,
 And so long tyme he did abide,
 After this sudainely in wonderous wise,
 He tempted me after the *Philosophers* guise.
 Which to reherse it were too longe,
 And to shew how I should doe wronge;

For

For that must be kept secrete,
 For them which shall with this *Science* meete;
 Yet at the last with leasure and with space
 I wan his love, by help of *Gods* Grace;
 So that I had with Grace the trewe doctrine
 Of Confection of the *Red medicine*;
 Whom to seeke it availeth right nought,
 Till the *White medicine* be fully wrought.
 Alsoe both Medicines in their beginninge
 Have one manner of Vessell and Workinge,
 As well for the White as alsoe for the Red,
 Till all quick things be made dead;
 Then Vessells and forme of operation
 Shall chaunge, in Matter, Figure, and Graduation.
 But my herte quaketh, my hand is tremblinge,
 When I write of this most selcouth thinge.
Hermes brought forth a true sentence and blounte,
 When he said *Ignis & Azot tibi sufficient*.
 The Expositor of *Hermes* and *Aristotle* joynte,
 In that joynte worke shewd a straunge pointe,
 He said *Albertus Magnus* the Black Freere,
 Nether Freer *Bacon* his compeere,
 Had not of our *Red stone* consideration,
 Him to increase in multiplication.
 The Expositor knew it sufficiently,
 And my *Master* taught me trewly,
 Albeit that I never made assaye
 Of the *Red worke* before this Daye:
 The cause appeareth in this Boke before,
 When I was robbed then I would no more.
 Nethlesse I have put me so farr in preass,
 That secrete Trewth to shew I cannot cease;
 Reherfing such as were greatly too bold,
 So great secreats to shew as thei tolde:

Chap. 5.

Thei said that within the Center of incomplete White
 Was hid our *Red Stone* of most delight:
 Which maie with strength and kinde of Fier,
 Be made to appeare right as we desier.
Pandalphus in Turba faide, mente secura,
Et ejus umbra in vera tinctura.
Maria confirmed it in *fide oculata,*
Quod in ipsa albedine est rubedo occultata.
 The Boke *Landabile Sanctum* made by *Hermes*,
 Of the *Red Worke* speaketh in this wise:
Candida tunc rubeo jacet uxor nupta marito,
 That is to saie, if ye take heede thereto,
 Then is the faire White Woman
 Married to the Ruddy Man.
 Understandinge thereof if ye would gett,
 When our *White Stone* shall suffer heate,
 And rest in Fier as red as Blood,
 Then is the Marriage perfect and good;
 And ye maie trewly know that tyme,
 How the seminall seed Masculine,
 Hath wrought and won the Victory,
 Upon the menstrualls worthily;
 And well converted them to his kinde,
 As by experience ye shall finde:
 Passing the Substance of *Embrion*,
 For then compleate is made our *Stone*;
 Whom wise Men said that ye shulde feede
 With his owne Venome when it is need.
 Then ride or goe where ye delight,
 For all your Costs he woll you quite.

Thus endeth the *subtill Warke* with all her store,
 I need not, I maie not, I woll shew no more.

CHAP. VI.

Owards the Matters of Concordance,
 Consider there be no variance
 Betweene such things as shulde accorde;
 For of variance maie grow discord,
 VWhereby your VVarke maie be lost,
 VWith all your labour and all your cost:
 He that wol take our VVarke in hande,
Five Concords he must understande.

The *first Concord* is neede to marke
 VWhether his *Minde* accorde with the *Warke*,
 VWhich shalbe Lord to paie for all,
 Els all your labour destroy ye shall.
 The *second Concord* is needfull to kenn,
 Between this *Crafte* and her *Workemen*.
 The *Third* shall serve well your intents,
 VWhen *Warke* accordeth with *Instruments*.
 The *fourth Concord* must welbe sought,
 VWith the *Place* where it shall be wrought:
 For trewlie it is no little grace
 To find a perfect working *Place*.

The *Fift* is of *Concord* and of *Love*,
 Betweene your VVarke and the Spheare above.
 Of theis *five Concords* reherse we shall,
 Beginning with the first of all.

FOR the *first* ye shall well finde
 That full few Lords be stable of *Minde*;
 Thei be hasty, the VVarke is longe,
 Thei woulde have you doe Nature wronge.
 Some now be onward as hasty as fier,

Halfe a yeare after have noe desire ;
 And some in a Weeke, it is noe Nay,
 Woll chaunge their mindes, and some in a day,
 And for one Moneth have full beleife,
 And the next Moneth thei wöll the *Arte* repreeve.
 It were much better for such to cease,
 Than for this *Arte* to put them in preasse ;
 Let such like Butterflies wander and passe,
 And lerne this lesson both more and lasse,
 Following the Sentence of this holie letter,
Attingens à fine usq; ad finem fortiter,
Disponens omnia suaviter :

That is, proceede mightily to the End
 From the Beginning, maugre the feinde,
 All things disposing in the meane space,
 With great suavity that commeth of grace.
 All short-witted Men and mutable,
 Such must needs be variable ;
 And some doe every Man beleive,
 Such credence doth their Cofers greive ;
 Tò everie new Tale to them tolde,
 They give Credence and leave the olde.
 But some Lords be stable of wit,
 Such be apt to finish it.
 Everie such *Lord* or *Master* of this Werke,
 Be he *Layman* or be he *Clerke*,
 Be he rich man, *Knight*, *Abbot* or *Lorde*,
 He hath with this *Arte* greate Concorde.

THe *seconde Concorde* with this *Arte* is,
 When ye can finde apt *Ministers*.
 Noe Minister is apt to this intent,
 But he be sober, wise, and diligent ;
 Trewe, and watchfull, and also timerous,

Chap. 6.

Close of Tongue, of Body not vicious,
 Clenly of hands, in Tuching curious,
 Not disobedient, neither presumptuous;
 Such Servants maie your workes of Charge
 Minister, and save from all outrage;
 But trust not that two such Servants or three,
 Maie sufficient for your worke be;
 If your Matter be of quantity reasonable,
 Then Eight such Servants be convenable;
 But upon litle quantity, finde ye shall
 Foure men able to performe all;
 That one halfe of them must werke
 While the other Sleepeth or goeth to Kerke;
 For of this *Arte* ye shall not have your praye;
 But it be ministred as well by Night as Daye
 Continually, except the holy Sondag alone;
 From Evensong begin till Evensong be done.
 And while thei worke thei must needes eschewe
 All Ribaudry, els thei shall finde this trewe,
 That such mishap shall them befall,
 Thei shall destroy part of their Works or all;
 Therefore all the Ministers must be Men,
 Or else thei must be all Weomen;
 Set them not occupied one with another,
 Though some to you be Sister or Brother:
 Yet thei must have some good disporte
 Their greate labours to recomforte:
 Then nothing shall better avaunce
 Your worke than shall this Concordance.

THe *Third Concord* is to manie full derke,
 To ordeyne *Instruments* according to the Werke:
 As everie *Chapter* hath divers intents,
 Soe hath it divers *Instruments*,

Both

Both in Matter and also in Shape,
In Concord that nothing may mis-happ:
As workes of Division and Seperation
Have small Vessells for their Operation;
But Vessells broad for Humectation,
And some deale broad for Circulation;
But longe Vessells for Precipitation;
Both short and long serve Sublimation:
Narrowe Vessells and foure inches high
Serve Correction most properly.
Of Vessells, some be made of Leade,
And some of Clay both quick and deade;
Dead Clay is called such a thinge
As hath suffered greate roastinge;
Such medled in powder with good raw Claye,
Will Fier abide and not goe away;
But manie Claies woll leape in Fier,
Such for Vessells doe not desire.
Other Vessells be made of Stone,
For Fier sufficient but few or none;
Amonge Workemen as yet is founde
In any Country of English grounde,
Which of Water nothing drinke shall,
And yet abide drie Fier withall,
Such Stones large for our intende,
Were a precious Instrument;
All other Vessells be made of Glasse,
That spirituall matters should not out-passe;
Of Ashes of Ferne in this Lond everi-each one
Be made, but els-where be of Stone:
Of our Glasses the better kinde,
The morning stuffe ye shall it finde,
Which was Ashes the night before,
Standing in Heate all night and more,

Chap. 6.

The harder stuffe is called Freton,
 Of clipping of other Glasses it come:
 Tincture with anealing of Glasiers
 Will not perse him as thei reherse.
 By this Doctrine chuse or refuse,
 Take which you woll unto your use,
 But for figures of Vessells kinde,
 Everie Man followeth his owne minde,
 The best fashion is ye maie be sure,
 She that best concordeth with Vessell of Nature,
 And figure that best Concordeth with quantity,
 And with all Circumstances, to matter best is she,
 And this sheweth well *Albertus Magnus*,
 In his Boke *De Mineralibus*.
 Hereof a Sècreate disclosed was,
 By my good *Master*, to more and lesse,
 Saying, *Si Deus non dedisset nobis vas*
Nihil dedisset, and that is Glasse.

Instruments needefull there be more,
 As be *Furnaces* ordeyned therefore.
 Olde Men imagined for this *Arte*
 A speciall Furnace for everie parte,
 Everie each divising after his owne thought;
 But manie Furnaces of them be naught;
 Some were too broade and some too longe,
 Manie of them did Nature wronge:
 Therefore some Furnaces maie be well used,
 But manie of them must be refused,
 For theie were made but by advice
 Of them which seemed, and were not wise:
 The most Commendable Fashion of them all,
 In this Boke portraied finde ye shall.
 One Furnace by me is found of newe,

Such

Such as Olde Men never knewe,
 Whose secrete Power with study sought,
 And with greate Cost was dearely bought;
 In him wilbe at one tyme wrought,
 Threescore Warkes, and cost right nought,
 More than it shulde for one Warke or twaine,
 Therefore profitable it is certaine;
 Threescore degrees divers ye maie gett,
 For threescore warkes, and everie-ech of divers Heate,
 Within that Furnace, to serve your desire,
 And all thei served with one litle Fier,
 Which of a Foote square onlie shalbe,
 Yet everie-ech of the threescore as greate space as he:
 Manie purposes ye maie thereby fulfill,
 For here you shall have Heate after your will.
 Of this Instrument all Men maie not be sure,
 Therefore it is not formed in Picture.
 Another Furnace woll serve threescore
 Glasses trewly, and yet farr more,
 Everie-ech of them standing in like Heate,
 As by the Picture, Doctrine ye maie gett:
 Another Furnace for this operation,
 By me was found by Imagination,
 Notably serving for Seperation
 Of dividents, and for Altification,
 And for Dis-junction called Division,
 And for Correction called Ablution,
 Yt woll for some things serve Desiccation,
 Yt serveth full well for Preparation;
 Soe for six things it serveth well,
 And yet for all at once as I can tell:
 This is a new thinge which shall not be
 Set out in Picture for all men to see;
 Another Furnace in Picture be shall,

Chap. 6.

More full of perills than other Furnaces all,
 Made for *Magnetia*, whereof bould Men had doubt,
 To tuch with hands a poore lynine Cloute;
 Which in the midle thereof unbrenned stoode;
 For feare of flames brenning fierce and woode;
 Which fittill Furnace I devised alsoe,
 In which I found manie wonders moe
 Than is convenient at this season to tell,
 Whose graduation is doubtfull and casuell:
 Wherein *Magnetia*, matter of greate coste,
 Must quickly be served or suddainly be losse:
 Of whose graduation if you woll not misse
 Consider your Stoples, and lerne well this,
 The more is the Stople the lesse is the Heate,
 By manifold Stoples Degrees ye maie gett;
 Whoe knoweth the power, the working and kinde,
 Of everie Furnace, he maie well trewth finde,
 And he which thereof dwelleth in Ignorance,
 All his Warke faileth upon Chaunce:
 Noe man is sure to have his intent,
 Without full concord of *Arte* with Instrument.
 Manie more Instruments occupied ye shall se,
 Than in this *Chapter* now rehearsed be,
 Which ye must ordeyne by good or sad advice
 And prove them before hand oft if ye be wise.

THe *fourth Concord* is full notable
 Betweene this *Arte* and *Places Convenable*.
 Some Places must needes be evermore dry,
 Close from Aier, no waies Windy;
 Some must be darke and dimme of sight,
 In which Sun-beames none maie light;
 But for some Places the trewth so is,
 Thei cannot have too much brightnes:

Some

Some Places must needes be Moist and Cold
 For some workes as Auctors toulde;
 But in our Warkes in everie place,
 Winde will hurt in everie Case:
 Therefore for everie Warke in season,
 Ye must ordaine Places by reason.
Philosophers said by their engine,
 How it shulde be wrought within locks Nynne:
Astrologers said it was a grace,
 To finde a Chosen Working Place;
 For manie things woll wonderous doe
 In some Places and elsewhere not soe,
 But contrarie wonders be of one thinge
 In contrarie Countries wrought without leasing;
 Whereof none other cause maie appeare,
 But only contrarie places of the *Sphere*:
 Whereto Places contrarie of the grounde,
 To them Concordaunt and Obedient be found;
 Hereof great Evidence and wittnes full cleere,
 In the *Magnets Stone* openly doth appeare,
 Whose North pointe draweth toward his Countrie,
 Which under the Southe starr driveth Needles awaye;
 Wherefore wise Men which for this *Arte* sought,
 Found some Places concordant, some Places nought;
 Trewly such Places where Lechery is used
 Must for this *Arte* be utterly refused.

THe *fist Concord* is knowne well of *Clerks*, (*Werks*.
 Betweene the *Sphere of Heaven* and our *Sutill*
 Nothing in Erth hath more Simplicitie,
 Than th'elements of our *Stone* woll be,
 Wherefore thei being in warke of Generation,
 Have most Obedience to Constellation:
 Whereof Concord most kindly and convenient

Chap. 6.

Is a direct and fire *Ascendent*,
 Being signe common for this Operation,
 For the multitude of their Iteration:
 Fortune your *Ascendent*, with his Lord also,
 Keeping th' aspect of *Shrewes* them fro;
 And if thei must let, or needely infect,
 Cause them to looke with a *Trine* aspect.
 For the *White warke* make fortunate the *Moone*,
 For the Lord of the *Fourth house* likewise be it done;
 For that is *Theſaurum abſconditum* of olde Clerks;
 Soe of the *Sixt house* for *servants* of the Werks;
 Save all them well from greate impediments,
 As it is in Picture, or like the same intents.
 Unlesse then your *Nativity* pretend infection,
 In contrariety to this Election,
 The vertue of the Mover of the Orbe is formall,
 The vertue of the Eight Sphere is here Instrumentall,
 With her Signes and Figures and parts aspectuall,
 The Planets vertue is proper and speciall,
 The vertue of the Elements is here materiall,
 The vertue infused resulteth of them all:
 The first is like to a workmans Minde,
 The second like his Hand ye shall finde.
 The third is like a good Instrument,
 The remnant like a Thing wrought to your intent.
 Make all the Premises with other well accord,
 Then shall your merriits make you a greate Lord.
 In this wise the *Elixir* of whom ye make mention,
 Is ingendered, a thing of a second intention.
 Trust not in *Geomantie* that superstitious Arte,
 For God made Reason which there is set aparte.
 Trust not to all *Astrologers*, I saie whie,
 For that Arte is as secreat as *Alkimy*.
 That other is disproved and plainely forbod,

By

By holy *Saincts* of the Church of God.

Trust not, ne love not *Negromancy*,

For it is a property of the Devill to lye.

Trust to this *Doctrine*, set herein your desires,

And now lerne the Regiment of your Fiers.

P 3

CHAP.

C H A P. VII.

parfet *Master* ye maie him call trowe,
Which knoweth his Heates high and lowe.
Nothing maie let more your desires,
Than ignorance of Heates of your Fiers.
Of manie Auctors written ye maie see,

Totum consistit in ignis regimine :

Wherefore in all Chapters you must so proceed,
That Heate worke not more ne lesse than it need;
Wherein manie of *Gebars Cookes*
Deceived were, though thei be wise in Bokes.
Such Heate wherewith Pigg or Goose is Scalded,
In this *Arte Decoction* it is called;
For Minerall meanes serveth such heate,
And to make our *Letharge* to give sweate.
Such Heate as dryeth lawne Karcheeses fayre,
In thirty operations serveth for our Ayre;
But for Divisions you must use such heate,
As Cookes make when they roast grosse Meate;
The same Heate with a circular Fier,
For Separation of Dividents we desire;
But for Circulation of Elements,
Ignis candens observeth our intents;
Which Fier must ever be Coequall
In every minute, and yet perpetuall:
For it maie never abate ne increase,
And yet the Fier maie never cease.
Study wisel and looké about
Such a Jewellie to finde out.
And in that Fier no moisture maie be,
Which Hand maie feele or Eye maie see.

Chap. 7.

Ignis humidus an other Fier alsoe
 Is, and yet it seemeth *oppositum in adjecto* :
 Such Heate dissevereth at certaine tydes
 Matters cleaving to Vessells sides.
 Manie moe things, that Heate maie wynn,
 It maketh oft thick Matters to be thynn.
 A *Philosopher* mistely spake of this Heate,
 And saide, the highest degree thereof to get
 Shall cause and gender such Siccitie,
 As of drie heate shall be in the First degree.
 Another Fier is Fire of Disiccation,
 For matters which be imbibed with Humection.
 An other Fier is Fier of Conservation,
 For all drie things of his operation:
 For *Magnetia* is Fier of effusion,
 Full of perills and full of illusion,
 Not onely perill which to the Warke maie fall,
 But such alsoe which the *Master* hurte shall;
 Against which once received is noe boote,
 Ordaine therefore to fetch breath from your foote;
 Provide for Mouth, Eyes, Eares, and Nose,
 For it is worse than ten times the Pose.
 Men hereby hath found paines sore,
 Because they had not this warning before.
Ignis corrosdens serveth in this *Arte*,
Elementa propinqua wisely to departe.
 By one point of excesse all your Warke is shent,
 And one point too little is insufficient;
 Who can be sure to finde his trewe degree,
Magister magnus in igne thall he be.
 It is the harder to know trewly his might,
 There is no triall for it but our Eyesight:
 Therefore all men faile in his presence,
 Where Heate is lerned with cost of Experience.

Of this Heate in speciall *Anaxagoras* said thus,
Nemo primo fronte reperitur discretus.

Another is Heate of mighty Coaction,
 For Mineralls that be of hard Liquefaction:

This Heate cannot be too strange,
 Be he continued never so long.

Another is Heate of Calcination

For fowle Mettalls for their Preparation;
 Which maie not brenn, ne doe them melte,

For so all thei maie soone be spilde.

The twelfth is Heate for to Sublime

All the Spirits of the Mine.

The last Heate of theis goeth for all,

When to Projection our *Stone* shall fall.

Use maketh Masterie, there is noe more to sayne,

But he that faileth must needs begin againe.

Now have I taught you everie thing by name,

As Men teach other the way to *Walsingham*,

Of every Village, Water, Bridge, and Hill,

Whereby wise Men their Journey maie fulfill:

Soe maie a Clerke by this Doctrinne finde

This *Science* well if he be cleere of minde;

All other maie finde himselfe hereby a foole;

To deale therewith, which litle can of Schoole;

For this is the end of all worldly Cunnenge,

Where to attaine can neither Pope ne King

By their Honours, ne by their great Councell,

But only by Vertue and Grace as Auctors tell.

This precious *Stone* will not be found ne wrought

But he be right devoutely sought.

The Auctors forenamed with this Boke of mine,

Sheweth of *Alkimy* all the Doctrinne,

If ye compleate their Sentences all,

Not by Opinion, but after this *Ordinall*;

Chap. 7.

For in this *Ordinall* I set you from all doubt,
 Is nothing set wronge, nor one point left out.
 The dayes were when that this Doctrine and ground
 Had pleased me more than a Thousand pound;
 Three Hundred pounds was not for my desire,
 As would have byne this *Chapter* of the Fier.
 And mervaille not Lords, ne ye freinds all,
 Why soe noble a *Scyence*, as all Men this *Arte* call,
 Is here set out in *English* blunt and rude,
 For this is soe made to teach a Multitude
 Of rude people which delen with this Werkes,
 Ten Thousand *Laymen* against ten able *Clerks*:
 Whereby yearely greate Riches in this *Londe*
 Is lewdly lost, as Wisemen understonde;
 And manie men of Everie degree
 Yearely be brought to great Povertee.
 Cease *Laymen*, cease, be not in follic ever;
 Lewdnes to leave is better late than never.

All that hath pleasure in this Boke to reade,
 Pray for my Soule, and for all both Quick and deade.
 In this yeare of *Christ* One thousand foure Hundred
 (seaventy and seaven,
 This Warke was begun, *Honour to God in Heaven.*

The

THE
COMPOUND
OF
ALCHYMIE.

A most excellent, learned, and worthy
worke, written by Sir *George Ripley*,
Chanon of *Bridlington* in *Yorke-*
shire, Containing twelve
Gates.

Titulus Operis.

HEre begynneth *The Compound of Alchymie*,
 Made by a Chanon of *Bridlington*,
 After his learning in *Italy*
 At *Yxning* for tyme he there did wonne:
 In which be declared openly
 The secrets both of *Sunne* and *Moone*,
 How they their kinde to multiplie,
 In one body togeder must wonne.

Which Chanon Sir *George Ripley* hight,
 Exempt from Claustrall observance,
 For whom pray ye both day and night,
 Sith he did labour you to advance.
 He turned darknes into light,
 Intending to helpe you to happy chaunce,
 Gyving Counsell that ye live right,
 Doeing to God no displeasaunce.

George

GEORGE RIPLEY

UNTO

King EDWARD the fourth.

O Honorable Lord, and most victorious Knight,
 With Grace and Fortune abundantly endewed,
 The safegard of England, & maynteyner of right;
 That God you loveth indeede he hath well shewed:
 Wherefore I trust thys Lond shalbe renewed
 With Joy and Riches, with Charyty and Peace,
 So that old ranckors understrewed,
 Tempestuous troubles and wretchednes shall cease.

And now syth I see by tokens right evident,
 That God you guydeth, and that ye be vertuous,
 Hating sygne, and such as be insolent,
 How that also Manslaughter to you is edious,
 Upon the Indygent also that ye be piteous,
 Greate ruth it werc if ye should not lyve longe:
 For of your great fortune ye be not presumptuous,
 Nor vengeable of mynde to wreke every wrong.

Theis considered, with others, in your most noble Estate,
 Like as God knoweth, and people doe witnesse beare,
 So entyrelly me meveth, that I must algate
 Recorde the same, and therein be no flatterer:
 And that not onely, but also to write here,
 And to your Highnes humbly for to present
 Great Secretts which I in farre Countrys did lere,
 And which by grace to me most unworthy are lent.

The Epistle.

Once to your Lordship such thyngs I did promise,
 What tyme ye did command to send unto me;
 And since that I wrote in full secret wise,
 Unto your Grace from the Universitie
 Of Lovayne, when God fortun'd me by Grace to see
 Greater secretts and moche more profyte,
 Which onely to you I wyll disclosed to be:
 That is to say the great Elixirs both Red and White.

For like it you to trust that trewlie I have found
 The perfect waye of most secreete Alchimy,
 Which I wyll never trewly for Merke ne for Pounce
 Make common but to you, and that conditionally
 That to your selfe ye shall keepe it full secretly,
 And onely it use as may be to Gods pleasure,
 Els in tyme comming, of God I should abyge
 For my discovering of his secreete treasure.

Therefore advise you well wyth good delyberation,
 For of this Secrete shall know none other Creature
 But onely you, as I make faithfull Protestation,
 For all the tyme that I here in lyfe endure:
 Whereto I wyll your Lordship me to ensure,
 To my desyre in thys by othe to agree,
 Least I should to me the wrath of God procure;
 For my revealing his greate gift and previtie.

And yet moreover I wyll your Hyghnes to pardon me,
 For openly wyth pen I wyll it never wryte,
 But when that ye list by practice ye shall see;
 By Mouth also this pretious secret most of delyght,
 How may be made Elixirs Red and Whyte,
 Playne unto your Hyghnes it shall declared be,
 And if it please you with easy expence and respyte
 To help, I wyll them make by helpe of the Trinitie.

But

But notwithstanding for perill that might befall,
Though I dare not here plainly the knot unbinde,
Yet in my writeing I wyll not be so Mysticall,
But that ye may by studie the knowleige finde:
How that eche thing multiplicāble is in hys kinde,
And that likenes of bodies Metalline be transmutable
I wyll declare, that if ye feelee me in your minde
Ye shall prove my wryting true and noe fayned fable.

And if God graunt you by me to wynnethys treasure,
Serve him devoutly with more Laud and thanking,
Praying his Godhead in lyfe ye may so endure,
His gifts of grace and fortune to use to his pleasing,
Most specially intending over all thing,
To yeur power and connyng his precepts tenne
So to keep, that into no daunger your selfe ye bring;
But that ye may in glorie see him hereafter, Amen.

As the Philosopher in the boke of Meteors doth wryte,
That the lykenesse of bodies Metalline be not transmutable,
But after he added theis words of more delyte,
Without they be redused to theyr beginning materiable.
Wherefore such bodies which in nature be liquable,
Minerall and Mettalline may be Mercurizate,
Conceave ye may that this Scyence is not opinable,
But very true by Raymond and others determinate.

In the said Boke the Philosopher speaketh also,
Therein if it please your Highnes for to reade,
Of divers Sulphurs, but especially of two;
And of two Mercuryes Foyned to them indede:
Whereby he doth true understanders leade
To the knowledge of the principles which be true;
Both Red most pure, and White, as have I speede,
Which be neverthelesse founden but of right few.

And

The Epistle.

*And these two things be best he addeth anone
 For them that worketh the Alchimy to take,
 Our Gold and our Silver therewith to make alone;
 Wherefore I say, who will our Pearle and Ruby make,
 The said principles looke that he not forsake:
 For at the beginning if his principles be trewe,
 And that he can by crafte them so bake;
 Truly at the end his Worke shall him not rewe.*

*But one greate secret ryght nedefull it is to knowe,
 That though the Philosophers speake plurally,
 All is but one Thing, ye may me trewe,
 In kinde, which is our Base principally,
 Whereof doth spring both Whyte and Red naturally;
 And yet the Whyte must come fyrst of the Red:
 Which thyng is not wrought manually,
 But naturally, Craft helping oute of our Leade.*

*For all the parts of our most precious Stone,
 As I can preve, be Coessentiall and concrete;
 Moreover there is no true principle but one;
 Full longe it was er I therewith could mete:
 Who can reduce it, and knoweth his Heate;
 And only kinde with kinde can redresse,
 Till filth originall be clensed from his Seat,
 Likely he is to finde our secrets both more and lesse,*

*Onlie therefore worke Kynde, with his owne Kynde,
 And all your Elements Ioyne that they not stryve,
 This poynte also for any thing beare in mynde;
 That passive natures ye tourne into active,
 Of Water, Fire, and Winde, of Erthe make blive;
 And of the Quadrangle make ye a Figure round,
 Then have ye honie of our bene hive;
 One ounce well worth a thousand pound.*

The Epistle.

113

*The principall secrete of secretes all
Is true Proportion which may not be behinde;
Wherein I counsell you be not superficiall,
The true conclusion if ever ye thinke to fynde;
Turne Erth to Water, and Water into Wynde;
Therof make Fire, and beware of the Floode
Of Noe, wherein many one be blinde;
That by this Science thei get but little good.*

*I counsell you to eate and drinke temperatly,
And be well ware that Iposarcha come not in place;
Nesh not your Wombe by drinking ymmoderatly,
Lest ye quench your naturall Heate in lyttle space;
The colour wyll tell appearing in your Face:
Drinke no more therefore, then ye may eate;
Walke up and downe after an easie pace,
Chafe not your Body too sore for to sweate.*

*With easy Fire after meuing when ye sweate;
Warme your Body and make it dry againe;
By Rivers and Fountaines walke after meate:
At morrowe tymely visit the high Mountaine,
That Phisicke so byddeth I reade certeyne:
So hygh the Mountaine nevertheles ye not ascende;
But that ye may downeward the way have plaine,
And with your Mantell from cold ye you defende.*

*Such labour is holosome, your sweat if ye wyll drie
With a napkin, and after it take no cold,
For grosse humors be purged by Sweat kindly;
Use Diacameron, then consecr with perfect Gold
Hermodactilus for watrie humors good I hold;
Use Hipericon Perforate with mylke of Tithimall;
And Sperma Cete ana with redd Wyne when ye wax old,
And Gotes Mylke soddē with Gold nourisheth moisture radical.*

The Epistle.

But a good Physitian who so intendeth to be,
 Our lower Astronomy him nedeth well to knowe
 And after that to lerne, well, Urine in a glasse to see,
 And if it nede to be chased, the Fyre to blowe,
 Then wyttily, it, by divers wayes to throwe,
 And after the cause to make a Medicine blive,
 Truly telling the ynfirmities all on a rowe :
 Who thus can doo by his Physicke is like to thrive.

We have an Heauen yncorruptible of the Quintessence,
 Ornate with Elements, Signes, Planetts, and Starrs bright;
 Which moisteth our Erthe by Suttile influence :
 And owt thereof a Secrete Sulphure hid from sight,
 It setteth by vertue of his attractive might;
 Like as the Bee fetcheth Hony out of the Flowre
 Which thing can doo none other Erthly wight ;
 Therefore to God only be glory and honour.

And like as Yse to Water doth relente,
 Whereof congealed it was by violence of greate Cold,
 Whence Phebus it smiteth with his Heate influent :
 Right so to Water mynerall, reduced is our Gold,
 (As writeth playnly Albert, Raymond, and Arnold)
 With heate and moisture by craft occasionate,
 With congelation of the Spyrite, Lo ! now have I told
 Howe our materialls togeather must be proportionate.

Att the Dyers craft ye may lerne this Science,
 Beholding with Water how they decoctions make
 Uppon theyr Woad and Maddre easly and with patience,
 Till the Tinctures appeare which the Cloath doth take
 Therein so fixed that they wyll never forsake
 The Cloth for washing after they joyned be ;
 Right so our Tinctures with Water of our Lake
 We draw by boyling with Ashes of Hermes tree.

Which

*Which Tinctures when they by craft are made parfite,
So dieth Mettalls with Colours evermore permanent,
After the qualitie of the Medycine Red or White;
That never away by eny Fire, will be brente:
To this Example, if you take good tent
Unto your purpose the rather shall ye wynne,
And see your Fire be easy and not fervent;
Where Nature did leave off, what tyme look ye begynn.*

*First Calcine, and after that Putrefye,
Dyssolve, Dystill, Sublyme, Descende, and Fyxe,
With Aquavite oft times, both wash and drie,
And make a marriage the Body and Spirit betwixt;
Which thus togeather naturally if ye can myxe,
In losinge the Body the Water shall congealed bee,
Then shall the Body dy utterly of the Flixe,
Bleeding and chaunging Colours as ye shall see.*

*The third daye againe to Life he shall uprise,
And devour Byrds, and Beasts of the Wildernes,
Crowes, Poppingayes, Pyes, Pekocks, and Mavies;
The Phenix, the Egle whyte, the Griffon of fearfulness,
The Greene Lyon and the Red-Dragon he shall destres;
The white Dragon also, the Antlope, Unicorne Panther,
With other Byrds, and Beasts both more and lesse;
The Basiliske also which almost eche one doth feare.*

*In Bus and Nubi he shall arise and ascend
Up to the Moone, and sith up to the Sonne,
Through the Ocean Sea, which round is without end:
Only Shypped within a little glassen Tonne,
When he commeth thither, then is the Maistrie Wonne:
About which Iourney greate good shall ye not spend,
And yet ye shall be glad that ever it was begonne;
Patiently if ye liste to your worke attend.*

The Epistle.

For then both Body and Spirit also both Oyle and Water,
 Sowle and Tincture one thing both White and Red,
 After Colours variable it conteyneth what so men clatter;
 Which also called is when he hath once bene Dedd:
 And is revived our Marchasite, our Magnete, and our Lead,
 Our Sulphure, our Arsenicke, and our true Calcevive:
 Our Sonne, our Moone, our Ferment of our Bread:
 Our Toade, our Basiliske, our unknowne Body, our Man,
 (our Wife.

Our Body thus naturally by crafte when it is renouate
 Of the first ordre is Medicine called in our Philosophy,
 Which oftentimes must againe be Spiritualizate:
 The rounde Whele turning of our foresaid Astronomy:
 And so to the Elixir of Spirites must ye come, for why
 Till the same of the fixed by the same of the flier be over-
 Elixir of Bodies named it is only; (gone
 And this secrete poynt truly deceaveth many one.

This naturall processe by helpe of craft thus consummate
 Dissolveth the Elixir spirituall in our unctuous Humiditie
 Then in Balneo of Mary together let them be Circulat,
 Like new Hony or Oyle till they perfectly thicked be,
 Then will that Medicine heale all manner Infirmitie,
 And turne all Mettalls to Sonne & Moone most perfectly:
 Thus shall ye have both greate Elixir, and Aurum Potabile,
 By the grace and will of God, to whom be laud eternally.

Sol tenet ignem

Our heaven this Figure called is
Our table also of the lower Astronomy
Which understood thou may not misse
To make our Mediceen perfectly
On it therefore set thy study
And vnto God both night and day
For grace and for ^e Author pray

Calum Philosophorum.

Incipit Prologus.

Hyld of thys Dyssyplyne incline to me
 (thyne Ere,
 And harkyn to my doctryne with all thy
 (dyligence;
 Thes words of wysdome in mynde doe
 Which of old Fathers be trew in sentence; (thou bare,
 Live clene in soule, to God doe none offence:
 Exalt thee not but rather keepe thee Lowe,
 Ells wyll thy God in thee no Wysdome sowe.

Fro fayned Doctryne and wycked thought,
 The holy spryt doth hym wythdraw;
 Nylling to dwell where Syn is wrought,
 Dred God therefore and obay his Lawe,
 A ryghteous Man forsooke I never sawe:
 Nether hys seed begg bread for need,
 In holy *Scripture* thus doe I rede.

Make Wysdome therefore thy-Sister to be,
 And call on Prudence to be thy Frynd,
 By pathes of truth they wyll gyde thee,
 Wyth love and honesty wher so thou wend:
 Both vertuose to be, curteous and hend:
 Pray God therefore that thou may fynde
 Wysdome and Prudence with mouth and mynde.

The Prologue.

All manner good cum wyth them shall,
 And honestie by ther hands innumerable,
 Then into combraunce shall thou not fall;
 Soe be they in ryches Incomparable:
 To worshyp and profyt they wyll thee able,
 To conyng and to all manner of grace,
 Both here and after thy lyvys space.

For these benefyts which they don bryng,
 In parte ynnumeryd by sapyence,
 To them I can compare no thyng;
 No rychys, no spyces of redolence:
 Above all trefure such is ther excellence,
 That whatsoever erthly that precyous ys,
 To them comparyd ys but as cley ywys.

Infynyte treasure to Man they be,
 Who usyth them shall fryndshyp have
 With God in Heven, and there hym se,
 After them vyvelyche therefor thou crave,
 For Body and Soule both wyll they save,
 And herein Goods doth multiplie,
 And afore Prynces they dygnyfy.

Thynke how *Adam* lost hys wysdome,
Sampson hys myght that was foe strong,
 Kyng *Saule* also lost hys Kyngdome;
 And *Davyd* was punnyshed soare for hys wrong:
 In the Oake by the here fayre *Absolôn* hong,
 Kyng *Ezeky* by sycknesse had punishment,
 And many one moe for synne was shent.

But

But see how other that livyd well,
And to their God did none offence,
Such chastysment did never fele,
But God shewed ever to them benevolence;
Enok and *Ely* were caryed hence,
To Paradyse, and other good livers were
Of God rewarded in dyvers manner.

Sum had gret Fortune, sum gret Cunnynge,
Sum had gret Peace, sum gret Ryches,
Sum conquered Londs to ther wonyng;
Sum were exalted for ther gret mekenes,
Sum other were saved fro the cruelnes
Of Tyrants, Lyons, and hot Fornacys,
As *Danyell* and other in many places.

Thus to good Livers God send gret grace,
And unto Synners sore ponishment;
Sum to amend in thys lyfe had space,
Sum sodenly with fyre fro Heavyn were brent,
Synfull *Sodomyts* for ever were shent;
With *Dathan* and *Abyron* and other moe,
Which sank for Syn to endles wo.

Thus ever syth the World was wrought,
God hath rewardyd both evyll and good;
Thus yf it maye rest in thy thought,
Fro synfull living wyll chaung thy moode.
Yf synfull people thys understood,
They ought to be aferd God to offend,
And soone ther synfull lyfes to amend.

Therefore

The Prologue.

Therefore with God looke thou begyne;
 That he by grace may dwell with thee,
 So shall thou best to Wysdom wyn,
 And knowledge of our grete prevyte;
 Norysh Vertues, and Vices looke thou flee,
 And trustyng thou wylt thee well dispose,
 Our secrets to thee I wyll dysclose.

Keep thou them secret and for me pray,
 Looke that you use them to Gods pleasure;
 Do good wyth them what ever thou may,
 For tyme thou shalt thys lyfe endure,
 That after thy endyng thou may be sure
 In Hevyn for to rewardyd be,
 Whych God graunt both to thee and me.

The Preface.

Hygh Yncomprehenfible and gloryous
(Magefte,

Whose Luminos Bemes obtundyth our
(speculation;

One-hode in Substance, O Tryne-hode
(in Deite,

Of Hierarchycall Jubylestes the gratulant gloryfycation;
O pytewouse puryfyer of Soules and puer perpetuation;
O deviaunt fro danger, O drawer most deboner;
Fro thys envyos valey of vanyte, O our Exalter.

O Power, O Wyfdom, O Goodnes inexplycable;
Support me, Tech me, and be my Governour;
That never my lyvyng be to thee dysplycable,
But that I aquyte me to thee as a trew professor:
Att thys begynnyng good Lord here my prayer;
Be nygh with Grace for to enforce my wyll,
Graunt well that I may my entent fulfyll.

Most curyose Coffer and copyose of all trefure
Thou art, fro whom all goodnes doth deffend,
(To Man) and also to every-ech Creature;
Thyne Handy-warke therefore vouchsafe to defend,
That we no tyme in lyvying here myfpend,
With truth thou graunt us our lyvelode to wyn
That in no daunger of Synfulnes we renne.

S

And

The Preface.

And for soe much as we have for thy sake
 Renowncyd the World, our Wylls, and the Fleshys Lust,
 As thyne owne wyllfull professyours us take;
 Syth in thee only dependyth all our trust,
 We can no ferther, to thee encline we must:
 Thy secret Treforars, vouchsafe to make us,
 Show us thy Secrets, and to us be bounteous.

Among other which be professyd to thee
 I me present, as one wyth humble Submyssyon,
 Thy Servant besechyng that I may bee,
 And trew in levyng acording to my professyon:
 In order Chanon reguler of *Brydlyngton*;
 Besechyng the Lord that thou wylt me spare,
 To thy trew Servaunts thy secretts to declare.

In the begynnyng when thou madyst all of nought,
 A globose Mater and darke under confusyon,
 By thee Begynner mervelously was wrought,
 Conteynyng naturally all thyngs withoute dyvyssyon,
 Of whych thou madyst in six Dayes dere dystynction;
 As Genesys apertly doth recorde
 Then Heavyn and Erth perfeytyd were wyth thy word.

So thorow thy Wyll and Power owte of one Masse
 Confusyd was made all thyngs that being ys;
 But yn thy glory afore as maker thou was,
 Now ys and shall be wythout end I wys:
 And purysyed Sowls upp to thy blys
 Shall come a pryncyple, thys may be one,
 For the declaryng of our *Stone*.

For

For as of one Masse was made all thyng,
Ryght soe must hyt in our practyse be,
All our secrets of one Image must spryng:
In *Phylosophers* Bokes therefore who lust to se,
Our *Stone* ys callyd the *lesse World* one and three,
Magnesia also of *Sulphure* and *Mercury*,
Propotionat by Nature most perfytyly.

But many one mervelyth whych mervel may,
And muse on such a mervelous thyng,
What ys our *Stone* syth *Phylosophers* doth say,
To such as ever be hyt sechyng:
Yet Fowles and Fyshys to us doth yt bryng,
Every-ech Man yt hath, and ys in every place,
In thee, in me, in every tyme and space.

To thys I answer, that *Mercury* it ys I wys
But not the comyn callyd *Quicksylver* by name,
But *Mercury* withoute whych nothyng beyng ys;
All true *Phylosophers* record and say the same:
But symple serchers puttyth them in blame,
Saying they hyd hyt, but they beblame worthy,
Which be no *Clerks*, and medlyth with *Phylosophy*.

But though hyt *Mercury* be yett wysely understond,
Wherein it ys, where thou shalt it seech,
Ells I thee Councell take not this warke in hond,
For *Philosophers* flattrieth Foolys with fayre Speche:
But lyst to me, for trewly I wyll thee teche,
Whych ys thy *Mercury* most profyttable,
Beyng to thee nothing dysseveable.

It ys more nythe in sum things than in sum,
 Therefore take tent what I unto the wryt,
 For yf thou never to the knowledge cum,
 Therof yet shalt thou me not twytt:
 For I wyll trewly now thee excite,
 To understand well *Mercurys* three,
 The keys which of our *Scyens* be.

Raymond hys Menstrues doth them call,
 Without which trewly no truth ys done,
 But two of them are Superfycyall :
 The third essentyall of Soon and Moone;
 Theyr propertyes I wyll declare ryght soone,
 And *Mercury* of other Mettalls essencyall,
 Ys the pryncipall of our *Stone* materyall.

In Soon and Moone our Menstrue ys not sene
 Hyt not appeareth but by effect to syght,
 That ys the *Stone* of whych we mene;
 Who so our wrytyng concevyth aryght,
 Hyt ys a Soule, a substance bryght:
 Of Soon and Moone, a subtyll influence,
 By whych the Erth receyveth resplendence.

For what ys Gold and Sylver sayth *Avycen*,
 But Erth whych ys pure Whyte and Red,
 Take fro that the sayd clernes, and then
 That Erth wyll stond but lyttyll in stede;
 The hole compound ys called our Lede,
 The qualyte of clernes fro Soon and Moone doth com
 These be our Menstrues both all and sum.

Bodies

Bodies wyth the fyrst we Calcene naturally
 Perfyt, but none whych be unclene,
 Except one whych usually
 Namyd by *Phylosophers* the *Lyon Greene*,
 He ys the meane the Soon and Moone betweene:
 Of joynng Tynctures wyth perfytynes,
 As *Geber* thereto beryth wytnes.

Wyth the Second whych ys an Humydyte
 Vegetable revyvyng that earst was dede,
 Both pryncples materyalls must loosed be;
 And formalls, els standyth they lytle in stead:
 The Menstrues therefore know I the rede:
 Wythout whych neyther trew Calcynatyon,
 Don may be, nether yet naturall Dyssolutyon.

Wyth the thyrd humydyty most permanent
 Incombuftyble and unctuous in hys nature,
Hermes Tre to ashes must be brent:
 Hyt is our *Naturall Fyre* most sure,
 Our *Mercury*, or *Sulphure*, or *Tyncture* pure:
 Our *Soule*, our *Stone*, borne up wyth wynd
 In the Erthe ingendered, bere thys in thy mynde.

Thys *Stone* alsoe tell thee I dare,
 Is the vapor of Mettalls potencyall,
 How thou shall gett hyt thou must beware:
 For invysible ys truly thys Menstruall:
 Howbehytt with the second Water phylosophycall,
 By seperatyon of Elements yt may appeare,
 To fyght in forme of Water cleere.

The Preface.

Of our Menstrue by labour exuberate
 And wyth hyt may be made *Sulphure* of nature
 If itt be well and kyndly acuate;
 And cyrculate into a Spryt pure:
 Then to dyssolve thou must be sure
 Thy Base wyth hyt in dyvers wyse,
 As thou shalt know by thy practyse.

That poynt therefore in hys dew place
 I wyll declare wyth other mo,
 If God wyll graunt me space and grace:
 And mep reserve in lyfe from wo;
 As I thee teche loke thou doe so,
 And for thy fyrst ground pryncypall
 Understond thy Water menstruall.

And when thou hast made true Calcination,
 Encresyng and not Wastyng moysture radycall,
 Tyll thy Base by ofter subtylyatyon
 Wyll lyghtly flow as Wex uppon Mettall;
 Then lowse hyt wyth thy vegetable Menstruall,
 Tyll thou have Oyle thereof in Colour bryght,
 Then ys your Menstrue visible to syght.

And Oyle is drawne owte in colour of Gold,
 Or lyke thereto out of our fine Red Lead,
 Whych *Raymond* sayd when he was old,
 Much more then Gold wold stond hym in stede,
 For whan he was for age nygh dede,
 He made thereof *Aurum Potabile*,
 Whych hym revyvyd as Men myght see.

For so together may they be Cyrclate,
That ys to say, Oyle and the vegetable Menstruall,
Ether so by labour exuberate,
And made by Crafte a Stone Celestyall:
Of Nature so fyrye that we yt call
Our *Bafelysk*, otherwyse our *Coketryse*,
Our great *Elixir* most of pryse.

Whych as the syght of a *Bafelysk* hys object
Kylyth, so sleyth it crude *Mercury*,
When thereon itt ys project,
In twynke of an Eye most sodenly,
That *Mercury* teynyth permanently;
All bodyes to Son and Moone persyt,
Thus gyde thy base both Red and Whyte.

Aurum potable thus ys made,
Of Gold, not comyn calcynat;
But of our Tyncture whych wyll not vade,
Out of our Base drawen wyth the Menstrue circulate,
But naturall Calcynatyon must Algate
Be made, ere thy Gold dyssolved be,
That Pryncypall fyrst I wyll tell thee.

But into Chapters thys Treatis I shall devyde,
In number Twelve with dew Recapitulatyon;
Superfluous rehearfalls I ley asyde,
Intendyng only to geve trew Informatyon,
Both of the Theoryke and Practycall operatyon:
That by my wrytyng who so wyll guyded be,
Of hys intente persytly speed shall he.

The

The Preface.

The Fyrst Chapter shalbe of naturall *Calcination*;
 The Second of *Dyffolution* secret and Phylosophycall;
 The Thyrd of our Elementall *Separation*;
 The Fourth of *Conjunction* matrimonyall;
 The Fyfthe of *Putrefaction* then followe shall;
 Of *Congelatyon*, albyfycative shall be the Syxt,
 Then of *Cybatyon* the Seaventh shall follow next.

The secret of our *Sublymation* the eyght shall shew;
 The nynth shall be of *Fermentation*,
 The Tenth of our *Exaltation* I trow;
 The Eleventh of our mervelose *Multiplycatyon*;
 The Twelfth of *Projectyon*; then *Recapytulatyon*;
 And so thys Treatyse shall take an end,
 By the help of God as I entend.

OF CALCINATION.

The first Gate.

1. **C**alcination is the purgacyon of our *Stone*,
 Restauryng also of hys naturall heate;
 Of radycall moysture it lesyth none;
 Inducyng Solucion into our *Stone* most mete,
 After *Philosophy* I you behyte,
 Do not after the comyn gyse,
 Wyth Sulphure and Salts preparat in dyvers wyse.

2. Nether with Corrosyves nor with Fire alone,
 Nor with Vyneger nor Water ardent,
 Nether with the vapour of Lede our *Stone*
 Is Calcyned to our intente:
 All they to Calcyne whych so be bent
 Fro thys hard *Scyence* withdraw theyre hond,
 Till they our *Calcyning* better understonde.

3. For by such Calcynyng theyre bodyes be shent,
 Whych mynysheth the moysture of our *Stone*;
 Therefore when bodyes to powder be brent,
 Dry as askys of Tre or Bone,
 Of such Calx then wyll we none,
 For moysture we multiply radycall,
 In Calcynyng, mynyshyng none at all.

T

And

Of Calcination.

4. And for a sure ground of our trew *Calcynacyon*,
 Woorch wyttyly kynde only wyth kynde ;
 For kynd to kynde hath appetible *inclynacyon* ;
 Who knoweth not thys yn knowledge is but blynd :
 He may forth wander as Myst doth wyth the Wynd ;
 Woting never wyth perfytnes where to lyght,
 Because he cannot conserve our words aryght.
5. Joyne kynd to kynd therefore as reason ys,
 For every Burgeon answereth to his owne Seed ;
 Man begetteth Man, a Beast a Beast lykewyse ;
 Ferther of thys to trete it is no need,
 But understond thys poynt yf thou wylt spede ;
 Every thyng ys fyrst Calcyned in hys owne kynd,
 Thys well conservyng, frute thereyn shalt thou fynde.
6. And we make Calxes unctious both Whyte and Red,
 Of three degrees or our Base be perfyte ;
 Fluxyble as Wex, ells stond they lyttle in sted ;
 By ryght long processe as *Phylosophers* wryte,
 A yere we take or more for our respyte :
 For, in lesse space our Calxe wyll not be made,
 Able to tayne with colour whych wyll not vade.
7. As for the Proporcyon thou must beware,
 For therein many one ys beguylid,
 Therefore thy warke that thow not marre ;
 Lat the Body be sotelly fylyd
 With *Mercury*, as much then so subtylyd :
 One of the *Sonn*, two of the *Moone*,
 Tyll altogether lyke pap be done.

Then

8. Then make the *Mercury* foure to the *Sonne*;
Two to the *Mone* as hyt should be,
And thus thy worke must be begon,
In fygure of the Trynyte;
Three of the Body and of the Spryt three:
And for the unytye of the substance spirituall,
One more than of the substance corporall.

9. By *Raymonds Reportory* thys ys trew,
Proporcyon there who lyst to looke,
The same my *Doctour* to me did shew;
But three of the Spryt *Bacon* tooke,
To one of the Body for thys I wooke:
Many a nyght or I hyt wylt,
And both be trew take whych you lyst.

10. If the Water be equall in Proporcyon
To the Erthe whych hete in dew mesure,
Of hym shall spryng a new burgyon;
Both Whyte and Red in pure tyncture,
Whych in the Fyre shall ever endure:
Kyll than the quyck, the ded reuyve,
Make Trynyte Unyte without any stryve.

11. Thys ys the best and the surest Proporcyon,
For here ys lest of the part spyrytuall,
The better therefore shall be Solucyon;
Then yf thou dyd it wyth Water small,
Thyne Erth over glutyn whych losyth all:
Take heede therefore to potters loome,
And make you never to nesh thy wome.

12. That loome behold how yt tempered ys,
 The meane also how thou hyt Calcenate;
 And ever in mynd loke thou bare thys,
 That never thyne Erth wyth Water be suffocate,
 Dry up thy moyستure wyth heate most temperate:
 Helpe *Dyssolucyon* wyth moyستure of the Mone,
 And *Congellacyon* wyth the Son, then hast thou done.
13. Foure Natures shall into the fyfth so turne,
 Whych ys a Nature most perfect and temperate;
 But hard hyt ys with thy bare foote to spurne,
 Agaynst a brodyke of Iyron or Steele new acuate:
 Soc many one doth whych bene infatuate,
 When they such hygh thyngs don take in hond,
 Whych they in noe wyse understonde.
14. In Eggs, in Vitryoll, or in Blod,
 What ryches wene they there to fynde;
 Yf they *Phylosophy* understode,
 They wold not in worchyng be so blynd,
 Gold to seke or Sylver out of kynd:
 For lyke as Fyre of brennyng the pryncyple ys,
 So ys the pryncyple of gildyng, Gold I wys.
15. Yf thou intend therefore to make
 Gold and Sylver by craft of our *Philosophy*;
 Therto nother Eggs nor Blood thou take,
 But Gold and Sylver whych naturally,
 Calcyned wysely, and not manually,
 And new generacyon wyll forth bryng,
 Increfying theyr kynde as doth ech thyng.

And

16. And yf yt true were that perfyte myght be,
In thyngs which be not mettallyne :
In which be Colours plesaunt to see,
As in Blood, Eggs, Here, Uryn, and Wyne ;
Or in meane Mettalls dyggyd out of the Myne :
Yet must theyr Elements be putrefyed and separate,
And wyth Elements of perfyte Bodys be dysponfate.
17. But fyrst of these Elements make thou Rotacyon,
And into Water thy Erth turne fyrst of all ;
Then of thy Water make Ayre by Levygacyon ;
And Ayre make Fyre ; then MASTER I wyll thee call
Of all our secretts greate and small :
The Wheele of Elements thou canst turne about,
Trewly conseruyng our Wrytyngs wythowt dowte.
18. Thys done, go backward, turnyng thy Wheele againe,
And into thy Water then turne thy Fyre anon ;
And Ayre into Erth, ells laboryst thou but in vayne :
For soe to temperment ys brought our *Stone*,
And Natures contraryose, fower be made one,
After they have three times ben Cyrcular,
And alsoe thy Bace perfytyly consummate.
19. Thus under the moysture of the *Moone*,
And under the temperate hete of the *Sonne*,
Thy Elements shalbe incynerate sone,
And then thou hast the Maistry wone ;
Thanke God thy worke was then begon :
For there thou hast one token trew,
Whych fyrst in blacknes to thee wyll shew.

20.

The hede of the Crow that tokyn call we,
 And sum men call hyt the Crows byll;
 Sum call hyt the Ashes of *Hermes Tre*,
 And thus they name hyt after theyer wyll,
 Our Tode of the Erth whych ctyth hys fyll:
 Sum name hyt by whych it ys mortyfycat
 The spyryt of the Erth wyth venome intoxycate.

21.

But hyt hath Names I say to the infynyte,
 For after each thyng that Blacke ys to syght;
 Namyd hyt ys tyll the tyme that hyt wex Whyte,
 For after blacknesse when yt wexeth bryght,
 Then hath hyt names of more delyght:
 After Whyte thyngs, the Red after the same,
 Rule of Red thyngs, doth take hys name.

22.

At the *fyrst Gate*, now art thou in,
 Of the *Phylosophers Castle* where they dwell;
 Procede wysely that thou may wyne
 In at mo Gates of that Castell,
 Whych Castle ys round as any Bell:
 And Gates hath Eleven yet mo,
 One ys conquered, now to the *Second go*.

The end of the first Gate.

OF SOLUTION.

The second Gate.

1. **O** *F Solution* now wyll I speke a word or two,
 Whych sheweth owt that err was hyd from syght,
 And makyth intenuate thyngs that were thyk also;
 By the vertue of our fyrst Menstrue clere and bryght,
 In whych our Bodyes eclypsyd ben to syght:
 And of ther hard and dry Compactyon subtylyat
 Into ther owne fyrst nature kyndly retrograde.
2. One in Gender they be and in Nomber not so,
 Whose Father the Son, the Moone truly ys Mother,
 The mean ys Mercury, these two and no mo
 Be our *Magnesia*, our *Adrop*, and none other;
 Thyngs there be, but only *Syster* and *Brother*:
 That ys to wene *Agent* and *Pacyent*,
Sulphure and *Mercury* coessentyall to our entent.
3. Betwyxt these two in qualyte cotraryose,
 Ingendred ys a Mene most mervyllosely
 Whych ys our *Mercury* and Menstrue unctuose;
 Our secrett *Sulphur* worchyng invysybly,
 More fersely than Fyre brennyng the body,
 Into Water dyffolvynge the Body mynerall,
 Which Nyght fro darknes in the North parte we call.
 But

4. But yet I trow thou understandyst not utterly
 The very secrett of Phylosopers *Dyffolucion*;
 Therefore conceve me I counsell thee wyttlyly:
 For I wyll tell thee trewly wythout delusyon;
 Our *Solucyon* ys cause of our *Congelacyon*;
 For the *Dyffolucyon* on the one syde corporall
 Causyth *Congelacyon* on the other syde Spyrityuall.
5. And we Dyffolve into Water whych weytyth no hond,
 For when the Erth ys integrally yncynerat;
 Then ys the Water congelyd, thys understond;
 For the Elements be so concatenat,
 That when the body fro hys fyrst forme ys alterate:
 A new forme ys inducyd immediately,
 For nothyng being wythout all forme ys utterly.
6. And here a secret to thee I wyll dysclose,
 Whych ys the ground of our secrets all;
 And yf thou hyt not know thou shalt but lose
 Thy labour and costs both great and small,
 Take hede therefore in Errour that thou not fall:
 The more thyne Erth and the lesse thy Water be,
 The rather and better *Solucyon* shall thou see.
7. Behold how Yfe to Water doth relent,
 And so hyt must, for Water hyt was before;
 Ryght foe agayne to Water our Erth is bent,
 And Water thereby congelyd for evermore,
 For after all *Phylosophers* whych ever was bore:
 Every Mettall was ons Water mynerall,
 Therefore wyth Water they turne to Water all.

8. In which Water of kynde occasyonate
Of qualytes bene repugnaunce and dyversyte,
Thyngs into thyngs must therefore be rotate;
Untyll dyversyte be brought to parfyte unite,
For Scrypture recordyth when the Earth shall be
Trowbelyd, and into the depe Sea shall be cast
Mountaynes, our Bodies lykewyse at the last.

9. Our Bodies be lekenyd conveniently
To Mountaynes which after hygh Planets we name;
Into the depenes therefore of *Mercury*.
Turne them and kepe the out of blame,
Then shall ye see a Nobyll game;
How all shall become powder soft as sylke,
So doth our Runnett by kynde curd our Mylke.

10. Then hath our Bodys ther fyrst formed losse,
And other be enducyd ymedyately;
Then hast thou well beset thy cost,
Wheras some other uncunning must goe by,
Not knowyng the secretts of our *Phylasophy*.
Yet one poynt I more must tell thee,
Every Body how hyt hath dymencyons three.

11. *Altytude, Latytude, and Profundyte*,
By which algates turne we must our Whele;
Knowyng thy entraunce in the West shall be;
Thy passage forth into the North yf thou do well,
And there thy Lyghts lose theyre Lyght eche-dele:
For there thou must abyde by Ninety Nyght
In darknes of Purgatory wythowten Lyght.

12. Then take thy course up to the Este anon
 By Colours passyng varyable in manyfold wyse,
 And then be Wynter and Vere nygh over-gon
 To the Est, therfore thyne assendyng devyle,
 For there the Son wyth Day-lyght doth upryse
 In Somer, and there dysporte the wyth delyght,
 For there thy Warke shall becom parfyt Whyte.
13. Forth fro the Est ynto the South assend,
 And sett thou up therein thy Chayre of Fyre,
 For there ys Harvest, that ys to say an end
 Of all thys Warke after thyne owne desyre:
 Ther shynyth the Son up in hys owne sphyre,
 And after the Eclyps ys in rednes wyth glory
 As Kyng to rayne uppon all Mettalls and Mercury.
14. And in one Glasse must be done all thys thyng,
 Lyke to an Egg in shape, and closyd well,
 Then must you know the mesure of fying;
 The whych unknowen thy Warke ys lost ech dele,
 Lett never thy Glasse be hotter then thou may feele:
 And suffer styll in thy bare hand to holde
 For dread of losyng as *Philosophers* have the tolde.
15. Yett to my Doctryne furthermore intend,
 Beware thy Glasse thou never opyn ne meve
 Fro thy begynnyng, tyll thou have made an end;
 If thou do contrary thy Warke may never cheve:
 Thus in thys *Chapter* whych ys so breve,
 I have the taught thy trew *Solucion*;
 Now to the *Thyrd Gate* goe, for thys ys won.

OF SEPARATION.

The third Gate.

1. **S***eparacyon*, doth ech parte from other deuyde,
 The subtill fro the groce, fro the thyck the thyn;
 But *Separacyon* manuell look thou put asyde:
 For that pertaynyth to folys whych lyttyll good don
 But in our *Separacyon* nature dorth not blyn: (wyn,
 Makynge dyvysyon of qualytes Elementall
 Into the fyfth degree tyll they be turned all.
2. Erth ys turnyd into Water black and bloe,
 And Water after into Ayre under very whyte:
 Ayre ys turned into Fyre, Elements there be no mo;
 Of thys ys made by crafte our *Stone* of grete delyte,
 But of thys *Separacyon* much more must we wryte;
 And *Separacyon* ys callyd by *Phylosophers* dyffynycyon
 Of the sayd Elements tetrapatyve dyspersyon.
3. And of thys *Separacyon* I fynde a lyke fygure
 Thus spoken by the *Prophet* yn the Psalmody,
 God brought out of a Stone a flud of Water pure,
 And out of the hardyst Stone Oyle abundantly:
 Ryght so of our precyose *Stone* yf thou be wytty,
 Oyle incombustible and Water thou shalt draw,
 And thereabout thou nedyst not at the Coles to blow.

4. Do thys wyth hete esy and mesuryng
 Fyrst wyth moyst Fyre, and after wyth the dry ;
 The flemme by Pacyence owt drawing ;
 And after that thy other natures wyttyly,
 Dry up thyne Erth tyll hyt be thyrsty :
 By Calcenyng els thou laboryst all in vayne,
 And then make hyt drynke up his moysture agayne.
5. *Separacyon* thus must thou ofte tymes make,
 Thy Matter dyvydyng into parts two ;
 So that the Symple fro the groce thou take
 Tyll Erth remayne benethe in color bloe,
 That Erth ys fix for to abyde all wo :
 The other parte ys Spyrityuall and fleyng,
 But thou must turne hem all into one thyng.
6. Than Oyle and Water wyth Water shall dystyll
 And thorow her help receve menyng :
 Kepe well thys two that thou not spyll,
 Thy Wark for lack of dew closyng,
 Make thy Stopell of glas meltyng
 The top of thy Vessle together wyth yt,
 Than Phylosopher-lyke usyd ys hyt.
7. The Water wherwyth thou must renew thy Stone
 Looke thou dystyll afore thou warke wyth hyt
 Oftentymes by it selfe alone
 And by thy syght thou shalt well wyt,
 Fro feculent feces when hyt ys quytt :
 For sum men can wyth *Saturne* it multeply,
 And other Substance which we desyre.

Dystyll

8. Dyſtyll hyt therfore tyll hyt be clene,
And thyn lyke Water as hyt ſhould be;
As Hevyn in Color bryght and ſhyne,
Kepyng both fygure and ponderofyte,
Therwith dyd *Hermes* moyſture hys Tre:
Wythyn hys Glas he made to grow upryght,
Wyth Flowers dyſcoloryd bewtyofely to ſyght.

9. Thys Water ys lyke to the venemous Tyre,
Wherewyth the myghty Tryacle ys wrought;
For yt ys Poyſon moſt ſtronge of yre;
A ſtronger Poyſon can none be thought:
Att the Potecarys therfore oftyn yt ys bought:
But no man ſhall beby hyt intoxycate,
After the tyme yt ys into Medycyne Elevate.

10. For then as ys the Tryacall trew,
Hyt ys of poyſons moſt expulſyfe;
And in hys working doth mervells ſhewe,
Preservyng many from deth to lyfe,
Loke thou meng yt wyth no corroſyve:
But cheſe hyt pure and quick rennyng,
Yf thou thereby wylt have wynnyng.

11. It ys a merveloſe thyng in kynde,
And Wythout hyt may nought be done;
Therefore *Hermes* calleth hyt hys *Wynde*,
For it ys up flying fro Sonn and Mone,
And makyth our *Stone* flye wyth hyt Sone:
Revyvyng the ded and gevyng lyfe
To Son and Mone, Husband and Wyfe.

12. Whych yf they were not by craft made quick,
 And ther fatnes wyth Water drawn out;
 And so the thyn dysslevered from the thyke,
 Thou should never bryng thys worke about:
 Yf thou wylt speed therefore wythout doubt,
 Reyse up thy Byrds out of theyre nest,
 And after agayne bryng them downe to rest.
13. Water wyth Water accord wyll and assend,
 And Spryt wyth Spryt, for they be of kynde;
 Whych after they be exalted make to dyssend,
 And soe thou shalt devyde that nature before dyd bynde,
Mercury effencyall turnyng into wynde:
 Wythout whych naturall and subtyll *Seperacyon*,
 May never be compleat profytable Generacyon.
14. Now to help thee in at thys *Gate*,
 The last Secret I wyll tell to thee;
 Thy Water must be seven tymes Sublymate,
 Ells shall no kyndly Dyssolucyon be,
 Nor Putryfyyng shall thou none see,
 Like lyquyd pytch nor colours apperyng,
 For lack of fyre wythin thy Glasse workyng.
15. Fower Fyers there be whych you must understond,
 Naturall, Innaturall, against Nature, alsoe
 Elementall whych doth bren the brond;
 These foure Fyres use we and no mo:
 Fyre against Nature must doe thy bodyes wo;
 That ys our *Dragon* as I thee tell,
 Ferfely brennyng as Fyre of Hell.

16. Fyre of Nature ys the thyrd Menstruall,
That fyre ys naturally in every thyng;
But fyre occasionat we call Innaturall,
And hete of Askys and balnys for putrefying :
Wythout these fyres thou may not bryng
To Putrefaccyon for to be seperat,
Thy matters togeather proportyonat.
17. Therefore make fyre thy Glasse wythin,
Whych brennyth the Bodyes more then fyre
Elementall; yf thou wylt wyn
Our Secret accordyng to thy desire,
Then shall thy seeds both roote and spyre,
By help of fyre Occasionate,
That kyndly after they may be seperat.
18. Of *Seperacyon* the Gate must thus be wone,
That furthermore yet thou may procede,
Toward the Gate of secret *Conjuncction*,
Into the Castle whych wyll the Inner leade,
Do after my Councell therefore yf thou wylt spede;
Wyth two strong locks thys Gate ys shyte,
As consequently now thou shalt wyt.

The end of the third Gate.

OF CONJUNCTION.

The fourth Gate.

1. **A**fter the Chapter of naturall *Separacion*
 By which the Elements of our *Stone* dyssveryd be
 The Chapter here followyth of *secret Coniunction*;
 Whych natures repugnant joyneth to perfyte *Unyte*,
 And so them knytteth that none from other may fle;
 Whan they by *Fyre* shall be examynate,
 Soc be they together surely conjugate.
2. And therfore *Phylosophers* geueth thys deffynicyon,
 Seyng thus *Coniunction* ys nought ells
 But of dyssveryd qualytes a *Copulacyon*;
 Or of *Pryncypylls* a coequacyon as other tells,
 But some wyth *Mercury* whych the *Potecarys* sells,
 Medleth *Bodyes* whych cannot dyvyde
 Ther matter, and therefore they step asyde.
3. For unto tyme the *Sowle* be Separate
 And clenfyd from hys orygyall *Syn*
 Wyth the *Water* and purely spyrytuallizate:
 Thy trew *Coniunction* may thou never begyn,
 Therefore the *Soule* fyrst fro the *Body* twyn:
 Then of the corporall parte and of the spyrytuall,
 The *Soule Coniunction* shall cause perpetuall.

4. Of two *Conjuncctions* *Phylosophers* don mentyon make,
Groce when the Body with *Mercury* ys reincendar,
But let hyt passe, and to the second tent thou take,
Which as I sayd ys after *Separacion* celebrat :
In whych the partys be lest whych lest so collygate ;
And so promotyd unto most perfyte temperance,
Then never after may be among them Repugnance.
5. Thus causyth *Separacion* trewe *Conjuncction* to be had
Of Water, Ayre, Earth and Fyre;
But that every Element may into other be lad,
And so abyde for ever to thy desyre ;
Do as done Laborours with Clay and Myer,
Temper them thyke, and make them not to thyn,
For so to up drying thou shalt the rather wyn.
6. But manners there be of thys *Conjuncction* three,
The fyrst ys callyd by *Phylosophers* Dyptative,
Betwyxt the Agent and the Patyent which must be
Male and Female, *Mercury* and *Sulphure* vive ;
Matter and forme, thyn and thyke to thryve.
Thys lesson wyll helpe thee wythout any dowte,
Our *Conjuncction* trewly to bryng about.
7. The second manner ys called Tryptative,
Whych ys *Conjuncction* made of thyngs three,
Of Body, Sowle, and Spyrit tyll they not stryve,
Whych Trynite must be brought to perfyte unyte,
For as the Sowle to the Spyrit the bond must be ;
Ryght to the Body the Sowle to hym must knyght,
Out of thy mynde let not thys lesson flyt.

8. The thyrd manner and also the last of all,
 Fowre Elements together whych joynyth to abyde,
 Tetraprative contently *Phylosophers* doth hyt call,
 And specyally *Guydo de Montayno* whose fame goyth
 And therfore the most laudable manner thys tyde, (wyde;
 In our *Conjuncction* four Elements must be aggregat,
 In dew proportion fyrst whych asonder were separat.
9. Therefore lyke as the Woman hath Vaynes fyfteene,
 The Man but five to the act of her secundyte,
 Requyryth in our *Conjuncction* fyrst I mene,
 So must the Man our Sun have of hys water three;
 And (nine) hys Wyfe, whych three to hym must be :
 Then lyke whych lyke wyll joy have for to dwell,
 More of *Conjuncction* me nedyth not to tell.
10. Thys Chapter I will conclude right sone therefore,
 Groce *Conjuncction* charging the to make but one,
 For seldome have Strumpetts Chyldren of them I bore,
 And so thou shalt never cum by our *Stone*,
 Wythout you suffer the Woman to lygg alone;
 That after she hath conceyved of the Man,
 The Matryce of her be shyte from all other than.
11. For such as addyth evermore crude to crude,
 Openyng theyr vessells, and lettyng ther matter kele :
 The sperme conceyvd they norysh not, but delude
 Themselfes, and spylyth ther work every dele;
 If thou therefore lyst for to do well,
 Close up the Matryce and norysh the seed, (spede.
 Wyth hear contynuall and temperate if thou wilt
 And

12. And whan thy Vesse hath stond by Monythys fve,
 And Clowds and Clypsys be passed ech one;
 That lyght apperen increase thy hete then blyve,
 Tyll bryght and shyneing in Whytneffe be thy Stone,
 Then may thou opyn thy Glasse anone,
 And fede thy Chyld whych ys then ybore
 Wyth mylke and mete ay more and more.

13. For now both moyst and dry be so contemperate,
 That of the Water erth hath recevyd impressyon;
 Whych never assunder after that may be seperate,
 And ryght soe Water to Erth hath given ingressyon,
 That both together to dwell hath made professyon:
 And Water of Erth hath purchasyd retentive,
 They fower be made one never more to strive.

14. And in two thyngs all our entent doth hing,
 In dry and moyst whych be contraryous two;
 In dry that hyt the moyst to fyxing bryng,
 In moyst that hyt geve lyquyfaccion the Erth unto,
 That of them thus contemperate may forth go
 A temperament not so thyk as the Body ys,
 Nother so thyn as Water wythout mys.

15. Losyng and knyttyng therefore be Princypalls two
 Of thys hard *Scyence*, and Poles most pryncypall;
 How be hyt that other pryncyple be many mo,
 As shyneyng fanells whych shew I shall:
 Proceed therefore unto another wall
 Of thys strong Castle of our wysdome,
 That Inner at the *Fyft Gate* thou may come.

OF PUTREFACTION.

The fift Gate.

1. **N**OW begynnyth the Chapter of *Putrefaccion*,
 Wythout whych Pole no fede may multiply,
 Whych must be done only by contynuall accyon
 Of hete in the body, moyst, not manually,
 For Bodies ells may not be alterat naturally: (Whete
 Syth Chryst do it wytnes, wythowt the grayne of
 Dye in the ground, encrese may thou not gete.
2. And in lykewyse wythout thy Matter do Putrefye,
 It may in no wyse trewly be alterate,
 Nor thyne Elements may be devyded kyndly;
 Nor thy *Conjunccon* of them perfyty celebrat:
 That thy labor therfore be not frustrate,
 The prevyte of *Putrefying* well understond,
 Orever thou take thys Warke in hond.
3. And *Putrefaccyon* may thus desynde be,
 After Phylosophers sayings it ys of Bodyes the sleynge,
 And in our Compound a dyvysyon of thyngs thre,
 The kylling Bodyes into corrupcyon forth ledyng,
 And after unto Regeneratyon them ablyng:
 For thyngs beyng in Erth wythowt dowte
 Be engendryd of rotacyon of the Hevyns aboute.

4. And therfore as I have seyde afore
They Elements comyxt and wysely coequat,
Thou keepe intemperat heate, eschuyng evermore,
That they by violent hete be never incynerat ;
To powder dry unprofytably Rubyfycate,
But into powder blacke as a Crowes byll
Wyth hete of Balne, or ells of our Dounghyll.
5. To tyme that Nyghts be past nynty,
In moyst hete kepe them fro eny thyng ;
Sone after by blacknes thou shalt espy
That they draw fast to putrefying,
Whych thou shalt after many colers bryng
To perfyte Whytenes wyth Pacyence esyly,
And so thy sede in hys nature shall multiply.
6. Make ech on other to hawse and kyffe,
And lyke as Chyldren to play them up and downe,
And when ther sherts be fylyd wyth pyffe,
Then lat the Woman to wash be bound,
Whych oftyn for fayntnes wyll fall in a sound :
And dye at the last wyth her Chyldren all,
And go to Purgatory to purg ther fylth orygynall.
7. When they be there, by lyttyll and lyttyll encrese
Ther paynys by hete ay more and more,
The Fyre from them lat never cese :
And se thy Fornace be apt therfore,
Whych wyse men do call *Athenor* :
Conservyng hete requyryd most temperately,
By whych the Water doth kyndly putrefy.

8. Of thys Pryncypull spekyth Sapyent *Guydo*,
 And seyth by rottyng dyeth the Compound corporall,
 And then after *Morgen* and other mo,
 Uprylyth agayne Regenerat, Sympill, and Spyrtyuall,
 And were not hete and moysture contynuall,
 Sperme in the wombe myght have now abydyng,
 And so ther shold therof no frute upspring.
9. Therefore at the begynnyng our Stonys thou take,
 And bery ech on wyth other wythin ther Grave;
 Then equally a Marryage betwyxt them make
 To ly together six wekys; then lat them have
 Ther sede consevyd kyndly to norysh and save;
 From the ground of ther grave not rysyng that while,
 Whych secret poynt doth many on begyle.
10. Thys tyme of Conceptyon wyth esye hete abyde,
 The Blacknes showing shall tell the when they dye;
 For they together lyke lyquyd Pyche that tyde,
 Shall swell and burbyll, setyll, and *Putrefye*,
 Shyning Colors therin thou shalt espye:
 Lyke to the Raynbow mervelose unto syght,
 The Water then begynnnyth to dry upryght.
11. For in moyst Bodys hete noryshyng temperate,
 Ingendryth Blacknes fyrst of all which ys
 Of kyndly Commyxyon to the tokyn assygnate;
 And of trew *Putrefying*, remember thys,
 For then to alter perfytyly thou may not mysse;
 And thus by the Gate of Blacknes thou must cum in
 To lyght of Paradyce in Whytenes yf thou wylt wyn.
 For

12. For fyrst the Son in hys uprysyng obscure
 Shalbe, and passe the Waters of *Noyes* flud
 On Erth, whych were a hundred dayes contynuate
 And fyfty, away or all thys Waters yode,
 Ryght so our Waters as wyse men understode
 Shall passe, that thou wyth *Davyd* may say
Abierunt in sicco flumina : bare thys away.
13. Sone after that *Noe* plantyd hys Vyneyard,
 Whych really floryshed and brought forth Graps anon :
 After whych space thou shalt not be aserd ;
 For in lykewyse shall follow the floryshyng of our *Stone* :
 And sone uppon that thyrty dayes overgone,
 Thou shalt have Graps ryght as the Ruby red,
 Whych ys our *Adrop*, our *Ulyser* red and our *Lede*.
14. For lyke as Sowles after paynys transytory
 Be brought into paradyce where ever ys yoyfull lyfe ;
 So shall our *Stone* after hys darknes in Purgatory
 Be purged and joynyd in Elements wythoute stryfe,
 Rejoyse the whytenes and bewty of hys wyfe :
 And passe fro the darknes of Purgatory to lyght
 Of paradyce, in Whytnes *Elyxer* of gret myght.
15. And that thou may the rather to *Putrefaccyon* wyn
 Thys Exampull thou take to the for a trew conclusyon,
 For all the secrett of *Putrefaccyon* restyth therein ;
 The heart of Oke that hath of Water contynuall infusyon
 Wyll not sone putrefy, I tell the wythout delusyon :
 For though yt in Water ly a hundred yeres and more,
 Yet shold thou fynd it sound as ever it was afore.
 But

16. But and thou kepe hyt somtyme wete, & sometyme dry,
 As thow many se in Tymber by usuall experyment,
 By proffes of tyme that Oke shall utterly Putrefy:
 And soe in lykewyse accordyng to our entent,
 Sometyme our Tre must wyth the Son be brent:

And then wyth Water sone after we must hyt kele,
 That by thys menes thou shalt to rottyng bryng hyt
 (wele

17. For nowe in wete and nowe agayne in dry,
 Now in grete hot and now agayne in cold
 To be, shall cause yt sone for to putrefy:
 And so shalt thow bryng to rottyng thy Gold,
 Entrete thy Bodys therfore as I have thee told:
 And in thy Putrefying wyth hete be not so swyft,
 Lest in the Askys thou seke after thy thryft.

18. Therfore thy Water out of the Erth thow draw,
 And make the soule therwyth for to assend;
 Then downe agayne into the Erth hyt throw,
 That they oft tymes so assend and dessend,
 From vyolent hete. and sodayne cold defend
 Thy Glasse, and make thy fyre so temperat,
 That by the sydys thy Water be never vytryfycate.

19. And be thou wyse in chesing of thy Water,
 Medyll with no Salt, Sulphure, nor mene Minerall,
 For whatsoever any Water to the do clatter;
 Our *Sulphure* and *Mercury* be only in Mettall,
 Which Oyls and Waters som men call:
 Fowlys, and Byrds wyth other namys many one,
 Because that folys shold never know our *Stone*.

For

20. For of thys World our *Stone* ys callyd the sement,
 Whych mevyd by craft as Nature doth requyre;
 In hys encrese shall be full opulent;
 And multeply hys kynd of thyne owne desyre:
 Therefore yf God vouchsafe thee to enspyre
 To know the trewth, and fancies to eschew,
 Lyke unto the shalbe in ryches but few.

21. But many be mevyd to worke after ther fantasy
 In many subjects in whych be Tynctors gay,
 Both Whyte and Red, devydyd manually
 To syght, but in the Fyre they fle away,
 Such brekyth Potts and Glassys day by day:
 Enpoysonyng themselves, and losyng of theyr syghts
 Wyth Odors and smoks and wakeyng up by nyghts.

22. Their Clothes be bawdy and woryn threde-bare,
 Men may them smell for Multyplyers where they go;
 To fyle theyr fyngers wyth Corrosyves they do not spare
 Theyr Eyes be bleryd, & theyr Chekys both lene & bloe:
 And thus for (*had I wist*) they suffer losse and wo;
 Such when they have lost that was in theyr purse,
 Then do they chyd and *Phylosophers* sore accurse.

23. For all the whyle that they have *Phylosophers* ben,
 Yet cowde they never know our *Stone*.
 Som sought in Soote, Dung, Uryne, som in Wyne:
 Som in Sterr flyme, for thyng yt ys but one;
 In Blood, Eggs; Som tyll theyr thryft was gone:
 Devydyng Elements, and brekyng many a pott,
 Multyplying the sherds, but yet they hyt yt not.

24. To se theyr Howfys it ys a noble sport,
 What Fornaces, what Glassys there be of divers shape;
 What Salts, what Powders, what Oyles, and waters fort,
 How eloquently, *de materia prima* they clape,
 And yet to fynde the trewth they have no hap:
 Of our *Mercury* they medle and of our *Sulphur vyve*,
 Wherein they dote, and more and more unthryve.
25. They take of the Red Man and hys whyte Wyfe,
 That ys a speciall thyng and of *Elixers* two,
 Of the *Quintessence* and of the *Elixers* of lyfe,
 Of Hony, Celydony, and of Secundyns also,
 These they devyde into Elements wyth other mo;
 No Mulpteyers but *Phylosophers* callyd wyll they be,
 Whych naturall Phylosophye dyd never rede nor see.
26. Thys felyshyp knowyth our *Stone* ryght welc,
 They thynke them rycher then ys the *Kyng*;
 They wyll hym helpe, he shall not fayle
Fraunce for to wyn, a wonders thyng;
 The *holy Crosse* home wyll they bryng:
 And yf the *King* were prysoner I take,
 Anon hys Raunsome would they make.
27. A mervell yt ys that *Westminster Church*,
 To whych these *Phylosophers* do haunte;
 Syth they so much ryches can woorche,
 As they make bofte of and avaunte,
 Drynkyng dayly the wyne a due taunte,
 Ys not made up perfytylly at ons,
 For truly hyt lackyth yet many Stonys.

28. Folys doe folow them at the taylor,
Promotyde to ryches wenyng to be;
But wyll ye here what worshyp and awayle,
They wyn in *London* that nobyll cyte,
Wyth Sylver Macys as ye may se:
Sarjaunts awayting on them every owre,
So be they men of great honour.
29. Sarjaunts seketh them fro Strete to Strete,
Marchaunts and Goldsmyths leyeth after them watch;
That well ys he that wyth them do mete,
For the great advantage that they doe cache,
They hunt about as doth a Rache:
Wenyng to wyn so grete tresure,
That ever in ryches they shall endure.
30. Som wold cache theyr goods agayne,
And some more good wold aventure;
Som for to have wold be full fayne,
Of Ten pound one I you ensuer:
Som whych hath lent wythout mesure
Theyr goods, and be with powerte bestad,
To cache a Nobyll wold be full glad.
31. But when the Sarjaunts do them arest,
Ther Paukeners be stuffed wyth *Parrys* balls;
Or wyth Sygnetts of *Seynt Martynes* at the lest,
But as for Mony yt ys pyssyd on the walls:
Then be they led as well for them befalls
To *Newgate* or *Ludgate* as I you tell,
Because they shall in safegard dwell.

32. Where ys my Mony becom seyth one,
 And where ys myne seyth he and he?
 But wyll ye here how futeell they be anon,
 In answeryng, that they excused may be,
 Saying, Of our *Elyxers* robbyd we be:
 Ells myght we have payd you all your Gold,
 Yf yt had been more by ten folde.
33. And then theyer Creditors they begyn to flatter,
 Promysyng to worke for them agayne;
 The *Elyxers* two in short space after,
 Dotyng the Merchaunts that they be fayne
 To let them go, but ever in vayne:
 They worke so long, tyll at the last
 They be agayne in Pryson cast.
34. Yf any then aske them why they be not ryche,
 They sey they make fynne Gold of Tynn;
 But he they sey may surely swym in dyche,
 Whych ys upholden by the chyn,
 We have no stock, therefore may we nought wyn:
 Whych yf we had we wold some worche,
 I now to fynysh up *Westmynster* Churches.
35. And some of them be so Devowte,
 They wyll not dwell out of that place;
 For there they may wythowten dowte,
 Do what them lyst to their Solace,
 The *Archedeacon* ys so full of grace:
 Yf that they please hym wyth the Crosse,
 He forsyth lyttyll of other menys losse.

36. And when they there syt at the wyne,
These Monkys they sey have many a pound;
Wolde God (seyth one) that som were myne;
Hay hoe, careaway, lat the cup go rounde:
Drynk on, seyth another, the mene ys founde:
I am a Master of that Arte,
I warrant us we shall have parte.
37. Such causyth the Monkys then evyll to don,
To wast ther Wagys thorow theyr dotage;
Som bryngeth a Mazer and som a Spone;
There *Phylosophers* gevyth them such corage,
Behotyng them wynnynge wythout damage:
A pound for a peny at the lest agayne,
And so fayre promys makyth folys fayne.
38. A ryall Medycyne one upon twelve
They promys them thereof to have,
Whych they could never for themselfe
Yet bryng abowte, so God me save:
Beware such *Phylosophers*, no man deprave:
Whych helpyth these Monkys to ryches so,
Wyth thread bare Cowlys that they do go.
39. The *Abbot* well ought to cherysh thys Company,
For they can tech hys Monkys to leve in povertie,
And to go clothyd and monyed relygyously,
As dyd *Seynt Benet*, eschuyng superfluyte,
Elsyng them also of the ponderosyte
Of theyr pursys, wyth pounds so aggravate,
Whych by *Phylosophy* be now allevyat.

40. Lo who so medlyth wyth thys rych Company,
 Gret boſt of ther wynnynge may they make,
 For they ſhall have as much by ther *Phyloſophy*,
 As they of the tayle of an Ape can take;
 Beware therfore for Jeſus ſake:
 And medyll wyth nothyng of gret coſt,
 For and thou do, yt ys but loſt.
41. Theſe *Phyloſophers* (of whych I ſpake afore)
 Medlyth and blondryth wyth many a thyng,
 Renuyng in errors more and more,
 For lac of trew underſtandyng,
 But lyke muſt lyke alway ferth bryng:
 So God hath ordeyned in every kynde,
 Wold Jeſus they wold thys bere in mynde.
42. Wene they of a Nertyll to have a Roſe
 Or of an Elder an Apple ſwete,
 Alas that wyſe men ther goods ſhould loſe:
 Truſtyng ſuch Loſells when they them mete,
 Whych ſeyth our *Stone* ys trodyn under fete:
 And makyth them therfore vyle thyngs for to ſtyll
 Tyll at theyr howſys wyth ſtench they fyll.
43. Som of them never lernyd a word in Scolys,
 Such thynk by reaſon to underſtond *Phyloſophy*:
 Be they *Phyloſophers*? nay, they be folys:
 Therfore ther Waikes provyth unwytty;
 Medyll not wyth them yf thou be happy:
 Leſt wyth theyr flatteryng they ſo the tyll
 That thou agre unto ther wyll.

44. Spend not thy Mony away in waste,
 Geve not to every speche credence;
 But fyrst examyn, grope and taste;
 And as thou provyst, so put thy confydence,
 And ever beware of grete expence:
 But yf thy *Phylosopher* lyve vertuofely,
 Trust the better to hys *Phylosophy*.
54. Prove hym fyrst and hym oppose
 Of all the Secretts of our *Stone*,
 Whych yf he know not thou nedyth not to lose;
 Medyll thou not ferther, but let hym gone,
 Make he never so pytyose a mone:
 For than the Fox can fagg and fayne
 When he wold faynyst hys prey attayne.
46. Yf he can answer as ought a Clarke,
 How be hyt he hath not provyd indede;
 And yf thou wylt helpe hym to hys Warke,
 Yf he be vertuose I hold hyt mede,
 For he wyll the quyte yf ever he spede:
 And thou shalt weete by a lytyll anon
 Yf he have knowledge of our *Stone*.
47. One thyng, one Glasse, one Furnace and no mo,
 Behold thys pryncypyll yf he take,
 And yf he do not, then lat hym go;
 For he shall never thee rych man make;
 Trewly yt ys better thou hym forsake,
 Then after wyth losse and varyaunce,
 And other manner of dyspleasaunce.

But

48. But and God fortune the for to have
 Thys *Scyence* by doctrine whych I have told;
 Dyscover yt not whoever thee crave,
 For Favor, Fere, Sylver, nor Gold:
 Be none Oppressor, Lecher, nor boister bold;
 Serve thy God, and helpe the powre among,
 Yf thou thys lyfe lyst to continew long.
49. Unto thy selfe thy secretts kepe
 From synners whych hath not God in dred;
 But wyll the cast in Pryson depe,
 Tyll thou them tech to do hyt in dede,
 Then slander on the sholde spryng, and sprede,
 That thou dyd coyne then wold they sey,
 And so undo the for ever and aye.
50. And yf thou teche them thys conyng,
 Their synfull levyng for to mayntayne;
 In Hell therfore myght be thy wonnyng,
 For God of the then wold disdayne,
 As thow nought coud for thy selfe sayne:
 That Body, and Soule you may bothe save,
 And here in pece thy levyng have.
51. Now in thys Chapter I have the tought,
 How thou the bodys must *Putrefy*:
 And so to guide the thou be not cawght,
 And put in duraunce, losse, and vylanye:
 My doctrine therefore remember wyttly,
 And passe forth toward the *Syxth Gate*,
 For thys the *Fyfte* ys tryumphate.

OF CONGELATION.

The sixth Gate.

1. **O**F *Congelacyon* I nede not much to wryte,
 But what yt ys now I wyll fyrst declare :
 It ys of soft thyngs Induracyon of Colour Whyte,
 And confyxacyon of Spyritys whych fleyng are :
 How to congele thee nedyth not much to care ;
 For Elements wyll knyt together sone,
 So that *Putrefaccyon* be kyndly done.
2. But *Congelacyons* be made in dyvers wyse,
 And Spyritys and Bodys dyssolvyd to water clere,
 Of Salts also dyssolvyd ons or twyse,
 And then to congele in a fluxyble Mater ;
 Of such *Congelyng* folys do clatter :
 And some dyssolvyth devydyng manually
 Elements, them after congelyng to powder dry.
3. But such Congelyng ys not to our desyre :
 For unto owers yt ys contraryose.
 Our *Congelacion* dredyth not the fire :
 For yt must ever stond in yt unctuos,
 And also in hys Tincture be full bounteous,
 Whych in the Ayre congelyd wyll not relent
 To Water, for then our Worke were shent.

4. Moreover Congele not into so hard a *Stone*
 As Glasse or CrySTALL whych meltyth by fusyon;
 But so that hyt lyke wax wyll melt anon
 Wythouten blast: and beware of Delusyon;
 For such Congelyng longyth not to our Conclusyon
 As wyll not flow and ren to water agen,
 Lyke Salts congelyd, then laboryst thou in vayne.
5. Whych *Congelacyon* awaylyth us never a dell,
 Hyt longyth to Multyplyers whych Congele vulgarly;
 Yf thou therefore lyst to do well,
 (Syth thy Medcynce shall never flow kyndly,
 Nether Congele, wythout thou fyrst yt Putrefye)
 Fyrst Purge and Fyx the Elements of our *Stone*,
 Tyll they together Congele and flow anone.
6. For when the Matter ys made parfyt Whyte,
 Then wyll thy Spryte wyth the Body Congelyd be;
 But of that tyme thou must have long respyte,
 Yer yt appere Congelyd lyke Pearles unto the,
 Such *Congelacyon* be glad for to see;
 And after lyke graynys red as blod,
 Rychy then any worldly good.
7. The erthly Grofnes therefore fyrst mortyfied
 In Moystnes, Blacknes ingendryd ys;
 Thys pryncypell may not be denyed,
 For naturall *Phylosophers* so seyth I wys,
 Whych had, of Whytenes thou may not mys:
 And into Whytenes ys thou Congele hyt ons,
 Thou hast a *Stone* most presyose of all Stonys.

And

Of Congelation.

10

8. And by the Dry lyke as the Moyft dyd putrefy,
Whych causyd in colors Blacknes to appere;
Ryght so the Moyft Congelyd by the Dry,
Ingendryth Whytenes shyneyng with myght full clere,
And Drynes procedyth as Whytyth the matter:
Lyke as in Blackyng Moysture doth hym show,
By colors varyante aye new and new.

9. The cause of all thys ys Hett most temperate,
Workyng and mevyng the Mater contynually;
And thereby also the Mater ys alterate,
Both inward and outward substancyally,
And not to as doth folys to syght sophystically:
But every parte all fyre for to endure,
Fluxyibly fyxe and stabull in tyncture.

10. And *Physycke* determyneth of eche Dygestyon,
Fyrst don in the Stomack in whych ys Drynes,
Causyng Whytnes wythout questyon,
Lyke as the second Dygestyon causyth Rednes,
Compleat in the Lyver by Hete and temperatnes;
And so our *Stone* by Drynes and by Hete,
Dygestyd ys to Whyte and Red compleate.

11. But here thou must another secret knowe,
How the *Phylosophers* Chyld in the Ayre ys borne:
Besy thee not to fast at the Cole to blowe,
And take that nether for mock nor skorne,
But trust me truly else thy work ys all forlorne:
Wythout thyne Erth wyth Water revyvyd be,
Our trew *Congelyng* shalt thou never see.

- 12 A fowle betwyxt Hevyn and Erth beyng,
 Arysyng fro the Erth as Ayre wyth Water pure,
 And causyng lyfe in every lyvely thyng,
 Incessably runnyng uppon our foresayd Nature,
 Enforsyng to better them wyth all hys cure;
 Whych Ayre ys the Fyre of our *Phylosophy*,
 Namyd now Oyle, now Water mystyly.
13. And thus mene Ayre, whych Oyle, or Water we call,
 Our Fyre, our Oyntment, our Spryte, and our *Stone*,
 In whych one thyng we grownd our wysdomes all,
 Goyth nether out nor yn alone,
 Nether the Fyer but the Water anone;
 Fyrst yt outeledyth, and after bryngyth yt yn,
 As Water with Water whych wyll not lyghtly twyn.
14. And so may Water only our Water meve,
 Whych mevyng causyth both Deth and Lyfe,
 And Water doth kyndly to Water cleve
 Wythout repugnance; or any stryfe,
 Whych Water to Foly's ys nothyng ryfe;
 Beyng of the kynd wythowten dowte
 Of the Spryte, callyd Water and leder owte.
15. And Water ys the secret and lyfe of every thyng
 That ys of substance in thys world y found;
 For of the Water eche thyng hath begynnyng,
 As showyth in Woman when she shallbe unbound
 By water whych passyth afore, if all be sound,
